FROM: Jonathan E. Fielding, M.D., M.P.H.
Director and Health Officer

SUBJECT: **2006-07 INFLUENZA IMMUNIZATION OUTREACH CAMPAIGN**

This is to provide you with the schedule for the Los Angeles County Department of Public Health annual influenza immunization (flu shot) outreach campaign for 2006-2007. A schedule of outreach events is attached, organized by date, Service Planning Area (SPA), city/community, zip code, and Supervisorial District.

During the fall of each year, the Public Health Immunization Program receives an allocation of flu vaccine from the State Department of Health Services. This year, we are scheduled to receive 126,950 doses of State-supplied vaccine. We have purchased an additional 30,000 doses to supplement the State's allocation.

This year, the outreach clinics will target adults 50 years of age and older, and other persons with chronic health conditions, which place them at high risk for complications if they get sick with the flu. Healthy infants and children 6 months through 59 months, pregnant women, and persons who are regularly exposed to the high risk persons mentioned above will also be targeted for receipt of flu vaccine through the outreach activities.

The schedule of outreach clinics is developed each year through collaborative planning efforts between the Area Health Offices for each SPA and local community-based organizations including senior centers. Public Health supports the achievement of high flu vaccination coverage levels by scheduling as many outreach clinics as possible in under-served communities, in order to reach high-need populations. Additionally, flu vaccine will be offered on a walk-in basis at the Public Health Centers and distributed to non-profit community clinics (including many of the County's Public Private Partnership clinics). Some of these non-profit community clinics will hold additional outreach clinics, which are not included in the attached schedule.

The cities of Long Beach and Pasadena, as local health jurisdictions, receive vaccine directly from the State and have arranged for vaccinations in their cities according to the attached.

The Department of Health Services has also ordered vaccine to offer vaccinations to patients at the County hospitals and outpatient facilities.

Approximately eight percent (8%) of Los Angeles County residents who are immunized against the flu each year receive their flu shot from the vaccine provided through these outreach clinics, Public Health Clinics and non-profit clinics. Therefore, the majority of persons receiving a flu shot in the County will receive it from their health care provider or another source. Medicare part B and many private insurance plans cover the cost of flu vaccine.

We are issuing a press release announcing the fall influenza vaccination campaign and the schedule will be available on our website. We will work with your offices on any specific publicity you may wish to do for your communities.

If you have any questions or need additional information, please let me or John Schunhoff know.
