Benchmark Plan Only

Added for all 2011 Plans

Reference Layers* for Redistricting Software

(in addition to Base Map containing streets, highways, rivers, lakes, parks, etc.)

- Major County Facilities
- Supervisors' Residence (shown in RDU only)
- Community (cities, unincorporated areas, and community areas within city of LA)
- LA City Council District Boundaries
- Current Sup. District Boundaries
- Aerial Imaging
- School Districts
- U.S. Congressional Districts
- State Senate Districts
- State Assembly Districts
- LA City Elections – Precinct Results

* A Reference Layer is a visual overlay that can be placed over the base map. A reference layer may be turned on or off (displayed or not displayed) by the user or overlaid on top of another reference layer. Information in a reference layer is not used to generate reports or analysis of a redistricting plan. Rather, the overlay contains information to which the user may refer when drawing a redistricting plan. For example – A user may refer to city council boundaries for purposes of alignment to new supervisorial district boundaries.
