COUNTY OF LOS ANGELES  
DEPARTMENT OF CHIEF MEDICAL EXAMINER-CORONER

1104 NO. MISSION RD., LOS ANGELES, CALIFORNIA 90033

(213) 226-8023

Board of Supervisors  
County of Los Angeles  
Hall of Administration  
500 West Temple Street  
Los Angeles, CA 90012

Gentlemen:

Submitted herewith is the Chief Medical Examiner-Coroner's Biennial Report covering Fiscal Years 1983-84 and 1984-85.

The Department's workload continued to expand not only in quantity, but also cases of increased complexity. During this period 120,222 deaths were recorded in Los Angeles County of which 33,456 were inquired into by this office.

The Los Angeles County Department of Chief Medical Examiner-Coroner is one of the largest professional Coroner's Offices in the nation. We continue to maintain a high level of scientific expertise through close interchange of information and developments in forensic science.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Ronald N. Kornblum".

RONALD N. KORNBLUM, M.D.  
ACTING CHIEF MEDICAL EXAMINER-CORONER

RNK:rc/rs

## HISTORY OF THE DEPARTMENT

It is difficult to account accurately for the early history of this department. Our oldest records date from 1888, and the oldest budget record is for 1954.

- 1850 - Coroner's Office was established. The law said little about jurisdiction or procedure, except that the Coroner must keep "records". The County population was 3,530.
- 1852 - Coroner's Office was merged as an ex-officio office under the Public Administrator.
- 1888 - The law defined what records the Coroner must keep and that this "Coroner's File" was to be a public record. The population of the County had grown to approximately 100,000.
- 1905 - Death certificates became required by law. Embalming was established as a practice by morticians enabling bodies to be held longer before examination. Inquests were the principal method by which the Coroner determined the cause, manner, and responsibility of death. Occasionally, autopsies were done where cause of death was unknown or where the presence of heavy metals, cyanide, strychnine, morphine, opium, and other poisons was suspected. As a result, the Coroner occasionally enlisted the services of a chemist. The population was now approximately 350,000.
- 1915 - Paperwork began to mount (e.g., Coroner's file, inquest records, photographs, autopsy and chemical analysis records, reports of certain deaths to various public agencies, etc.). Population was now at 700,000.
- 1916 - This was a period of significant growth for the department. A  
to Central Coroner's Office was opened with facilities to process cases  
1930 in a more desirable scientific environment. Autopsy tables, embalming tables, instruments, cameras, dark rooms, refrigeration, vehicles, inquest room, and routine office spaces were provided. The full-time staff increased to include autopsy surgeons, inquest deputies, deputy coroners, technicians, and a clerical staff. Inquests were still the main method by which cause and manner of death were determined. Testimony was sought as to the autopsy, chemical, and police investigative findings. Toxicological tests were performed by the County Health Department. In 1930, the population was 2,208,492, and the number of Coroner's cases was 3,894.
- 1942 - A toxicologist, his staff and laboratory were administratively transferred from the Health Department to the Coroner. Alcohol blood tests and other tests became almost routine for the Coroner to conduct. An increase in traffic deaths and occasional drug overdoses resulted in a growing workload for the department. Questions arose involving liability, insurance payments, etc., which called for careful investigation on the part of the Coroner's staff. Population was now approximately 2,800,000 and Coroner's cases now numbered about 5,500 per year.

- 1956 - Los Angeles County voted a Charter Amendment which separated the Public Administrator and Coroner's Office. According to the new law the Coroner now had to be a Pathologist and the department was designated "Chief Medical Examiner-Coroner". Due to the level of expertise increasingly demanded by the courts, the medical staff shifted from autopsy surgeons to forensic pathologists. Documentation of Coroner's work became more demanding as the judicial world changed. Identification, notification, and storage problems increased as larger and larger numbers of transient and migratory people began dying in the County. Narcotic and other deaths began to increase, calling for a large number of autopsies on unembalmed bodies. This necessitated bringing more bodies into the central facility from "outside" districts. Population was now more than 5,000,000 and Coroner's cases were about 10,000 per year.
- 1961 - Drug deaths, suicides, homicides, and traffic deaths increased above normal population increases. New state law took effect stating that a death was reportable to the Coroner when a physician had not been in attendance during the 10 days prior to death. As a result of this law, approximately one-third more cases became reportable to the Coroner. Population was now over 6,000,000 and there were approximately 11,000 Coroner's cases per year.
- 1962 - This was a period of civil disobedience and one in which the drug  
to culture flourished. There occurred an alarming increase in homicides,  
1970 suicides, and drug-involved deaths. Court time demanded by the District Attorney and Public Defender increased as well as their need, and the need of other agencies (e.g., law enforcement, insurance, etc.,) for increased documentation of records, evidence, microscopic slides, tissue, photographs, x-rays, clothing, etc. Security and chain-of-evidence procedures were strengthened. In 1965 the department established specialists/professionals in the investigation of Coroner's cases. These positions were entitled Coroner's Investigators. During this time the department began experiencing a new demand -- a demand for information. Requests came from local, state, and federal agencies, the press, educational institutions, private citizens, etc. These demands have continued and increased to present time. By 1969 the population had increased to over 7,000,000 and the number of Coroner's cases increased to over 14,000.
- 1970 - During this period the department opened two substations. One in  
to 1970 in Long Beach and a second in San Fernando Valley in 1972. In  
1972 the department moved into the new Forensic Science Center (Central Facility) on the grounds of the LAC/USC Medical Center. At this time approximately 50% of the autopsies were performed in the Center and 50% in the mortuaries.
- 1973 - The Scanning Electron Microscopy Laboratory was established and began full operation.

1974 - This was a period of increasing budgetary restrictions. As a result,  
to the substations were closed in 1975. All autopsies in the County,  
1977 with the exception of the upper desert, were now performed in the  
Forensic Science Center. The Coroner's Investigators were given  
authority to certify cause of death at mortuaries in those cases  
where an autopsy was not required. By law, the department became  
responsible for investigating nursing home deaths. A new State law  
took effect stating that a death was reportable to the Coroner when  
a physician had not been in attendance during the 20 days prior to  
death (in 1961 it was 10 days prior to death). Whereas the County  
population stabilized at its 1969 level -- approximately 7,000,000  
the number of Coroner's cases increased to approximately 16,000.

Whereas the number of traffic deaths, drug deaths, and suicides  
decreased during that eight-year period, the number of homicides and  
accidents increased.

1977 - Homicides and traffic accidents increased 28% and 23% respectively  
to over the previous two years. Drug deaths decreased by 28% during  
1979 the same time period. Overall, the Coroner's workload increased  
primarily due to an increase in the number of cases of a complex  
nature, particularly those involving new and exotic drugs, and to  
the additional effort required to satisfy the demands of the courts.

1979 - Homicides increased 25% over the previous two years, while vehicle  
to accidents increased only 2% over previous experience. Drug deaths  
1981 decreased 19% during the same period. The Coroner's workload  
continues to increase in the number of cases of a complex nature.

1981 - Homicides and traffic accidents decreased 6% and .5% respectively  
to over the previous two years. Drug deaths decreased 3% during  
1983 the same period. Suicides also decreased 3% over the previous  
two years. The Coroner's workload continues to increase with the  
complex nature of cases.

1983 - Homicides and traffic accidents decreased 6% and .5% respectively  
to over the previous two years. Drug deaths and suicides also  
1985 decreased 3% each over the same period of time. The Coroner's  
workload continued to increase. As the number of autopsies  
performed increased 16% while the toxicological workload increased  
11%.

MAJOR SECTIONS OF LAW THAT DESCRIBE  
DUTIES, RESPONSIBILITIES AND AUTHORITY

JURISDICTION OF A DEATH BY THE CORONER

Government Code Section 27491

In substance, it shall be the duty of the Coroner to determine the circumstances, manner, and cause of all deaths, other than natural. However, said section also requires that the Coroner take jurisdiction of all deaths occurring from Sudden Infant Death Syndrome, deaths of those awaiting sentence, deaths from contagious disease that constitute a public hazard, deaths from occupational disease or hazard, and deaths of patients in State mental hospitals.

Health & Safety Code Section 10250

This section requires that every physician, funeral director, or other person immediately notify the Coroner of certain specific types of deaths such as where suicide is suspected or that the death was suspected to have been caused by criminal means.

Health & Safety Code Section 10251

Places a duty upon the Coroner, when notified of those deaths set forth under 10250 of the Health & Safety Code, to ascertain as many as possible of the facts required by Chapter 5, Division 9, of the Health & Safety Code of the State of California.

AUTOPSY BY THE CORONER

Government Code Section 27491.4

Grants the Coroner the discretionary power to autopsy, analyze such things as stomach contents, blood, organs, etc., and requires said results and findings to be put in writing.

Government Code Section 27520

Requires that the Coroner shall perform an autopsy when requested to do so by the next-of-kin, even though the case originally was not a Coroner's case. However, it further provides that the cost of said autopsy shall be born by said next-of-kin.

Health & Safety Code Section 7114

Sets forth under what circumstances persons other than the Coroner could be prosecuted for a misdemeanor if any autopsy is performed without authorization. States this section is not applicable to the Coroner.

California Labor Code No. 5706

The Labor Commission can require an autopsy by the Coroner on a case the Commission is hearing and over which the Coroner has jurisdiction. If the Coroner has already autopsied or does not require one, the Commission then has the right to order a re-examination or autopsy by a physician the Commission names.

NON-AUTOPSY DUTIES WITH THE BODY

Government Code Section 27491.25

Provides that the Coroner shall run an alcohol and barbiturate level on all traffic deaths over 15 years of age who die within 24 hours. Gives the Coroner discretion to run the same tests to determine possible amphetamine level. Further provides that said tests shall also be run on persons 15 years of age or under if the surrounding circumstances indicate the possibility of alcohol, barbituric acid, and amphetamine derivative consumption.

Government Code Section 27471

Authorizes the Coroner under certain circumstances, to embalm a body and charge a fee of \$100 for said embalming when prior permission of the next-of-kin has been obtained for said embalming. Without said permission he may charge a fee of \$30. Restricts the completion application of this section to counties above a certain population.

Penal Code Section 11113

The Coroner shall furnish fingerprints on each Coroner's case to be sent to the State of California State Bureau of Identification and Investigation.

CORONER DOCUMENTS

Health & Safety Code Section 10252

The Coroner shall within three days after examining the body deliver the death certificate to the attending funeral director. Cause, antecedent causes, other significant conditions contributing to death, and such other medical and health section data as required, shall be completed.

Health & Safety Code Section 10410

The Coroner shall register with the local registrar all known data concerning the decedent.

Health & Safety Code Section 10411

Pertains to amending death certificates.

Government Code Section 27491.5 - Investigation Only

States in substance that the cause of death appearing on a death certificate shall be in conformity with the Coroner's findings. And further states how the Coroner may complete the death certificate without holding an inquest or autopsy.

Health & Safety Code Sections 10175,80,85,86, & 90

Fetal death registration. All fetal deaths that cannot be attested to by a physician, that have reached the 20th week of uterogestation will be certified by the Coroner.

Health & Safety Code Section 10203

States that the medical and health section data of the death certificate shall be certified by the Coroner.

Health & Safety Code Section 10204

The Coroner must certify the medical and health data listed on the certificate of death within three days after assuming jurisdiction over the decedent.

Government Code Section 27463

The Coroner shall keep an official register.

Government Code Section 27463.5

After the completion of the Coroner's investigation, the Coroner may photograph or microfilm said file and destroy the original copy.

Government Code Section 27491.4

Sets standards which Coroner must follow for inquiring into a Coroner's case.

PROPERTY

Government Code Section 27461

The Coroner may sell personal property to pay burial expenses if approved by the Superior Court.

Government Code Section 27462

The Coroner is to file with the Clerk of Court a statement showing the amount of property and the monetary result of the sale. If there is not sufficient property belonging to the estate to pay the burial expenses, the expenses are a legal charge against the County.

Government Code Section 27464

Any note, letter, document, etc., directing disposition of property or remains are to be filed with the County Clerk. A facsimile copy shall be placed in the Coroner's records and the original to the addresses. If an inquest be held, a true copy shall be read into the record and transcribed.

Government Code Section 27465

Within 30 days after an inquest, the Coroner shall deliver to the legal representatives of the deceased, any money or other property found upon the body.

Government Code Section 27466

Unclaimed property (found on decedent) after 30 days is to be sold and the case delivered to the Treasurer with an affidavit.

Government Code Section 27491.3

In any death into which the Coroner is to inquire, he may take charge of any and all personal effects, valuables and property at the scene of death, hold and safeguard until lawful disposition is made; lock and seal the premises, but not to interfere with law enforcement if under investigation.

INDIGENTS

Health & Safety Code Section 7104

No matter where death occurs, the Coroner shall inter decedents as indigent when no one can be found to claim the body, and if at the time of death the decedent can be proved a resident of the Coroner's County.

INQUESTS

Government Code Section 68092 & 68095

Sets forth standards for interpreters, translators fees, witness fees, and mileage fees for Coroner's jury.

Government Code Section 27491.6

Coroner must hold an inquest when requested to do so by: Sheriff, City Prosecutor, City Attorney, District Attorney, Attorney General, or Chief of Police in a City of a County in which the Coroner has jurisdiction.

In all other cases, however, Coroner may inquest at his discretion.

Government Code Section 27491.7

The Coroner, his authorized deputy, or a hearing officer shall conduct an inquest.

DISINTERMENTS

Government Code Section 27491.4

Pertains to Sudden Infant Death Syndrome; possession of body; autopsy; exhumation; preservation of medical findings; record of death.

UNIFORM ANATOMICAL GIFT ACT

Health & Safety Code Sections 7150-7153.5

Pertains to gift of body tissue and/or organs, qualification to make such gifts and qualification to receive same.

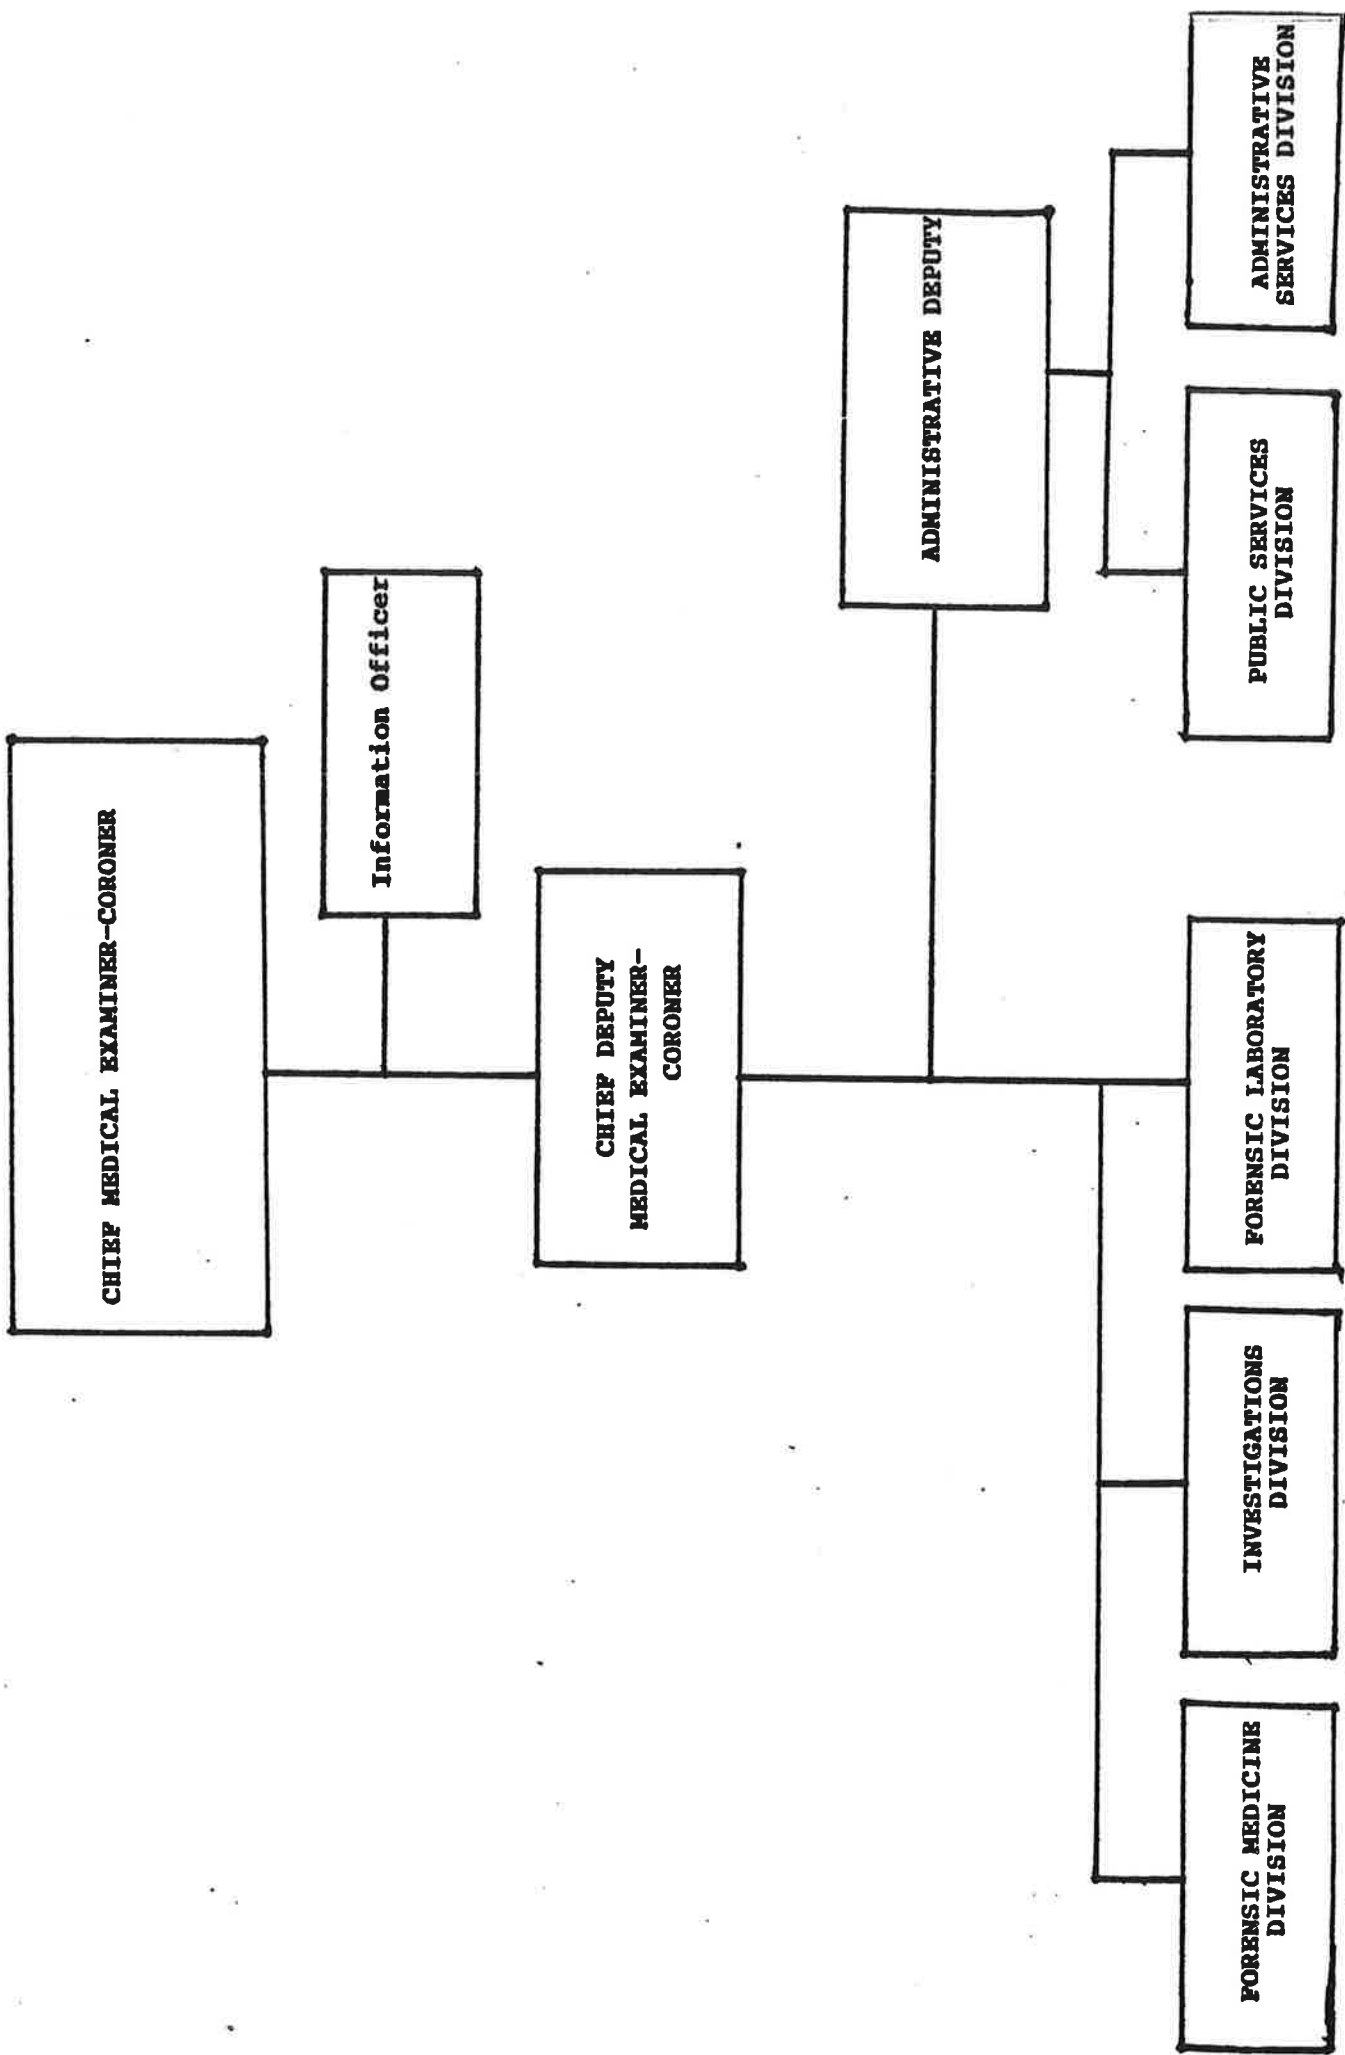

AGENCIES TO NOTIFY

Government Code Section 27491.1

In deaths where criminal means are suspected, the police must be notified immediately by phone and supplied with a written report.

Vehicle Code, 200011

A written report shall be sent to the Department of Highway Patrol before the 10th day of each month of all traffic fatalities and the circumstances.

## DEPARTMENT ORGANIZATION

The Chief Medical Examiner-Coroner is responsible for investigating and determining the circumstances, manner, and cause of all sudden violent, or unusual deaths which occur in the County of Los Angeles.

### ADMINISTRATIVE SERVICES DIVISION

This division is responsible for personnel, payroll, budget, accounting, statistics, and procurement services.

### FORENSIC LABORATORIES DIVISION

This division consists of several laboratories. These laboratories are responsible for interpretation of various tests such as qualitative and quantitative analysis on blood and other tissue specimens, medical evidence to determine the presence or absence of poisons, drugs, or other chemicals; processing tissues and preparing slides for microscopic examination; criminalistic examinations of gunshot residue analysis, examination of electrocution burns, toolmarks in tissues, etc., by scanning electron microscopy, x-ray spectrophotometry, and other microanalytical instrumentation.

### FORENSIC MEDICINE DIVISION

This division is responsible for the medical aspects of death investigation and has the duty to determine the cause, manner, and circumstances of each death handled by this department. The division is composed of physicians who are forensic pathologists trained in the interpretation of gunshot wounds, cutting and stabbing wounds, blunt force injuries, etc. These physicians are skilled in determining the cause of sudden and unexpected death and are frequently called upon to explain and interpret the autopsy findings in court, particularly in homicide cases.

### INVESTIGATIONS DIVISION

This division is responsible for the investigative operations of the department. The personnel work closely with all law enforcement and other governmental agencies in the on-the-scene medicolegal investigation of Coroner's cases. This division also assumes custody of personal property found on the person of the deceased, secures evidence, writes reports, takes at-scene photographs, and transports or causes to be transported to the Coroner's facility or specific mortuaries the cases coming under the Coroner's jurisdiction.

### PUBLIC SERVICES DIVISION

This division is responsible for transcription of autopsy reports, sale of public documents; handling public inquiries; preparation and provision of case documents in response to subpoenas; control, maintenance and microfilming of Coroner's permanent records; and the protective storage and proper release or disposal of personal property of decedents.
