Subject: **ANNUAL CLEAN FUELS REPORT**

The Board of Supervisor's "Clean Fuels" policy was adopted on January 10, 1995. The policy requires that by March 1 of each year, departments report on the composition of their fleet and their progress toward acquiring clean fuel vehicles.

Attachment I is the 2009 report, which includes data on all of the County departments and vehicles for which ISD provides automotive services. County Departments maintaining their own vehicles (Sheriff, Public Works, and Fire Department) will report separately.

The ISD-maintained motor vehicle fleet includes 4,134 powered vehicles. Currently, 490, or approximately 12% of these vehicles are alternative fuel vehicles (AFV's). ISD maintains a total of 1,262 passenger cars in our fleet, of which 347 (27%) are alternate fuel vehicles.

The attached report shows that County departments purchase a variety of alternative fuel vehicles, including hybrid, electric, natural gas, bi-fuel, flex-fuel and propane. Also reflected is information captured to date on certified low emission vehicles (LEV's) and ultra-low emission vehicles (ULEV's) as defined by the California Air Resources Board (CARB).

Attachment II is the 2009 report on vehicles with a value of \$30,000 or more as recommended by the Grand Jury report dated June 1, 2008.

Hybrid Vehicles

ISD continues to help County departments learn about and acquire hybrid sedans in support of the November 2005 Board of Supervisors direction for departments to acquire hybrid sedans for routine, non-emergency County business, whenever practical and economically feasible, beginning no later than July 1, 2006. The following actions were taken during this reporting period:

- ISD continued to utilize and promote our agreement with Toyota to fulfill the County's requirement for hybrid vehicles with improved delivery timeframe. As a result, County departments purchased 126 additional hybrid sedans in calendar 2008, bringing the total to 325 hybrid sedans purchased.

- The Vehicle Purchasing Services Program was approved February 2008 by your Board to provide employee incentive to lessen the environmental impact of County employees work commute and allow County employees to purchase or lease alternative fuel vehicles. Currently, we have nine (9) participating automotive dealerships. To date, County employees have purchased 126 hybrid vehicles through this program.

Plug-In Hybrid Electric Vehicles

In late 2007, ISD retrofitted two Toyota Prius hybrid vehicles to Plug-In Hybrid Electric Vehicle (PHEV) technology. A grant from the Quality and Productivity Commission funded the conversion cost.

This emerging technology involves adding greater battery capacity and a battery charger that can be plugged into a conventional electrical outlet from the hybrid vehicle. This allows the converted vehicle to increase the range it can travel on an electric charge, decrease its use of gasoline, and greatly improve the vehicle's overall miles per gallon (mpg) performance. These vehicles may be capable of traveling distances of up to 60 miles on battery charge alone, during which no gasoline is used.

Based on inconsistent operation of the two retrofitted PHEV vehicles during 2008, we have extended the pilot period to assess the viability and benefits of these vehicles. ISD has reassigned these vehicles to specific employees that require frequent trips in various driving conditions as part of their County duties, and will continue the pilot project through calendar year 2009.

Concurrently, ISD will seek additional funding available through the Federal Economic Stimulus to expand the County's alternative fuel vehicle initiatives, which may include acquiring additional vehicles and retrofitting them with the PHEV technology.

Regulations for Diesel Vehicles/Equipment

The County of Los Angeles operates 698 diesel vehicles impacted by the CARB Public Fleet rule (January 5, 2007 regulations). County Departments that operate vehicles impacted by the regulations include Public Works, Fire, Sheriff, Health Services, Parks & Recreation, Beaches & Harbors, Probation, Registrar-Recorder, Agricultural Commissioner, Coroner, Public Social Services, Museum of Natural History, Public Library, and Internal Services. So far, the County has retrofitted 355 vehicles at a cost of approximately \$2 million. Approximately \$850,000 of the total has been offset by available grants.

The County is on schedule to meet all compliance requirements consistent with the CARB implementation schedule. The anticipated additional cost to bring the fleet into compliance is approximately \$4.9 million. These costs will be incurred during Fiscal Years 2008-09, 2009-10 and 2010-11.

Alternate Fuel Vehicle Endeavors

In support of Governor Schwarzenegger's greenhouse gas emission reduction target of 80 percent below 1990 levels by 2050, ISD continues to explore alternate fuel vehicles, pilot new technology, educate County departments, and recommend amendments to the Clean Fuels Program Policy as necessary. During the last twelve months, ISD has:

- Updated the Clean Fuels Board Policy in collaboration with other County departments to incorporate compressed natural gas (CNG) and other alternate fuels for medium and heavy trucks.
- Worked toward establishing an agreement with the Metropolitan Transit Authority (MTA) to allow CNG fueling at MTA CNG sites. This will expand the available CNG infrastructure for County departments as they consider alternate fuel options.
- Engaged a technical consultant to develop an alternate fuel vehicle strategy for the County fleet, especially for medium and heavy duty trucks. This review focuses primarily on the use of CNG for such vehicles, and considers ways to address the needed infrastructure of CNG fueling stations. For example, the County must assess the cost/benefit of (1) developing or contracting for its own CNG fueling stations, versus (2) accessing existing CNG fueling stations that are owned by private businesses or other government agencies. The report will also address areas where grant funding is available for alternative fuel projects.

Additionally, ISD management and staff continue to network with County departments and other government agencies on environmental vehicle initiatives, fuel purchasing strategies, and County fuel systems and infrastructure.

If you have questions, please contact me, or your staff may contact Joe Sandoval, Acting General Manager, Purchasing and Contract Services at (323) 267-2109 or via e-mail at jsandoval@isd.lacounty.gov.
