

MOTION BY SUPERVISORS KATHRYN BARGER  
AND JANICE HAHN

MARCH 14, 2017

The Aerospace and Defense industry cluster of Southern California sets a foundation for U.S. global manufacturing leadership, propels scientific invention, and spawns new innovation that leads to commercial market success, to the benefit of the U.S. and the SoCal region and its residents. The industry also remains a dominant regional driver of employment and wages in Southern California, supporting more than 245,000 direct, indirect and induced jobs and paying more than \$20 billion annually. In recognition of the importance of supporting, strengthening and protecting the assets fundamental to the regional success of this industry, The Southern California Aerospace Council has launched the inaugural "Southern California Aerospace Week" to highlight the Aerospace & Defense industry's vital economic impact on our regional economy, supporting tens of thousands of Southern California families with well-paying jobs.

**WE, THEREFORE, MOVE** that the Board of Supervisors proclaim the week of March 20 - 24, 2017, as "Southern California Aerospace Week", in Los Angeles County and acknowledge the Council and its partners to bring together Aerospace & Defense industry leaders throughout L.A. County.
