

MOTION BY SUPERVISOR HILDA L. SOLIS

March 6, 2018

Women in Construction Week

As we celebrate women’s history throughout the month on March, we also take the first week in March to recognize Women in Construction. Historically, the construction industry has been dominated by males, however, that is changing. More women are making their presence known and are finding that their roles in the industry are growing. Women in Construction week is not only meant to celebrate the inroads that women have made in the construction industry but also to highlight women as viable components of the construction industry.

I, THEREFORE, MOVE THAT THE BOARD OF SUPERVISORS proclaim March 4th – 10th, 2018 as Women in Construction Week in Los Angeles County.
