

MOTION BY SUPERVISOR JANICE HAHN

March 26, 2019

Declaring April as National Occupational Therapy Month

The American Occupational Therapy Association has designated April as “Occupational Therapy Month” in recognition of the positive and significant impact occupational therapy practitioners have in the lives of children, adolescents, adults, and families countywide. The promise of occupational therapy is: Living Life To Its Fullest®.

Today, we recognize occupational therapy providers throughout the County of Los Angeles for the outstanding work they do with our most vulnerable residents. Occupational therapists and occupational therapy assistants perform a vital role across numerous County departments including Public Health, Mental Health, and Health Services. Occupational therapy practitioners provide services in the Medical Therapy Program of Public Health’s Children’s Medical Services, as well as in various Health Services facilities, including Rancho Los Amigos National Rehabilitation Center and County-USC Medical Center, and in Mental Health’s community mental health centers.
