			The following individuals submitted comments on agenda item:	
Agenda #	Relate To	Position	Name	Comments
24.		Favor	Aaron Klaus	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Abigail Mack	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>All people deserve the opportunity to receive care and connect with others in safe spaces that prioritize their liberty. Instead too many Los Angelenos struggling with mental disorders are criminalized and locked in cycles of poverty and incarceration. This must stop and invested members of the community especially those with lived experience of these cycles are the prime leaders for putting a halt to this cycle. This is the only way to integrate true community into the process of healing that Los Angeles so desperately needs.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Alison Agnew	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I support care first, over jails everytime. Jail isn't an environment that promotes growth. By supporting community lead efforts and allocating funds to care, the council can prevent the need for over-jailing and policing. Consider how much crime could be prevented from taking care of the needs of your community by providing housing, food, utilities, and health services.</p> <p>My family has a long history of substance abuse and addiction. Jailing my uncles, aunts, etc.. wouldn't rid them of their illnesses. It's been proven that psycho-therapy and stability helps people recover. However we treat those with addiction like criminals and lock them up, providing no roads to recovery.</p> <p>I shared this story about my family because how many people are in jail because of something similarly vilified: addiction, homeless/houselessness, mental health crises, possession of marijuana, petty-theft, etc..</p> <p>I hope the council takes steps to change this by supporting care first. The community knows what it needs to uplift it's members. I urge you to act on alternatives to incarceration laid out by community organizers.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Amelia C Brooke	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Angela McLafferty	<p>I support this measure, and strongly urge the Board to vote yes on it. If we put more effort into homes and community, and less on incarceration, I think LA County has the chance to be a monumental progressive force, not only in the state, but in the country.</p> <p>I also urge that the County prioritize community input to shape the project from start to finish.</p> <p>26</p> <p>I think that the Board must immediately take action to allocate funding to support the Commission in hiring a full-time consultant and data research team so that it may comply with the requirements of the Measure R mandate. I also support the Commission playing an important role in developing recommendations to reduce the jail population and acting immediately to draft a plan to assess and reinvest cost-savings to more broadly support community-based public safety initiatives.</p>

24.		Favor	Ann Cleary	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>As a healthcare provider, I know that when an individual is healed, their family is healed. As families are healed, communities are healed. No one can expect to get better, whether spiritually, emotionally, or physically, while at Men's Central. It is well known that our fellow citizens who spend time there are traumatized or re-traumatized, even killed. I am very much looking forward to a future where we take care of each other, and if done correctly, this Restorative Justice Village has that potential.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Anna Hossnieh	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I support Care First, Jails Last because my own brother spent a lot of time in jail when what he needed was support from his community. He was held longer than necessary because the right resources were not in place to deal with his mental health issues. They decided locking him up was better than dealing with the real issues that were causing him to get into trouble. We need more community programs and services working with our citizens to improve their lives instead of throwing them back into a system that leads to recidivism.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Anthony Arenas	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Your constituents have been reaching out time and time again urging you to try Care Not Cages because we have experienced the fact that assigning police to any and all people struggling, in crisis right now, have not helped not alleviated the issues people are going through in our county. We need to expand what it means to provide care to individuals and their families, to provide relief and end cycles of addiction. Now is the time to push for alternatives to incarcerations so we can start restoring some piece of mind to all the individuals and families that just need relief.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. 24.		Favor	Bonnie Hernandez	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>As a clinical social worker, I have worked first hand with many previously incarcerated individuals as a part of a re-entry program. I saw over and over again how damaging the prison system is to people who have already been subjected to incredible trauma, hardship, poverty, and systemic oppression. Working for a non-profit, I saw the clear limitations and difficulty in maintaining quality of care due to lack of funding for this vulnerable population. We must begin to divest from these harshly punitive systems that create further trauma and perpetuate continued obstacles and barriers for people who desperately need further resources, opportunities and care.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

Agenda #	Relate To	Position	Name	Comments
24.		Favor	Brenna P Zedan	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county-owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>We should care for and support the most marginalised and hurt members of our community before we criminalise them. How can we healthily grow into the future if jails, something that benefits only the state's pockets, be the first thing we think of when we see open land? Investing in the community to provide support and resources will reduce need for punitive things like jails.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you to vote in favour of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favour of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Bret Hamilton	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Prisons are an insufficient way to deal with the problems of our society. We must strive towards a world in which prisons and the industry that sustains them become obsolete. That world requires serious examinations of our society and the way that we fail individuals which leads to crime and harm, and also reexamining how we respond to harm and restore justice to spaces in which it has been denied.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Cara Ferraro	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I believe so strongly in the idea of community. That when we all work together and use our resources to help one another instead of only ourselves, we can do amazing things. Now we get to decide what to do with the ATI programs that have been proposed, and I'm so grateful and proud of Los Angeles. We keep throwing money at law enforcement and expecting that they play social worker, suicide hotline operator, drug and alcohol counselor, therapist. Those are not their jobs. We need to invest money into creating those actual positions to help citizens. With these new ATI programs, we have that ability, and I believe the Restorative Justice Village Master Plan is the first step.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. 24.		Favor	Caro Brooks	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Offering our communities the care we all need, instead of continuing the status quo practice of punishing them, is the way toward a more just society. Through my development from an abused child to a mentally healthy and supported adult, I've come to believe that we all need guidance in healing our wounds. Punishing people for their woundedness is equivalent to shaming them for lived experiences that were out of their control. Care and guidance should not be set aside for the privileged few -- they are a human right for all.</p> <p>The four-acre plot of land at the Vignes site has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Caroline Lacy	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Putting people in prisons creates a never ending cycle of Black and brown people being incarcerated for minor crimes and then not being able to support themselves when they get out of prison. We need to rehabilitate and actually help people who are struggling rather than just expect them not to steal when they have to to survive. Same with anyone struggling with addiction. We need to put them in rehab, NOT prison.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Celeste Mancia	<p>Thank you to Supervisor Solis for taking progressive steps to use the four-acre plot of land near Men's Central Jail known as the "Vignes Project" in accordance with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report.</p> <p>Incarceration is not, has never been, and never will be a solution to crime. I have personally witnessed the devastating effect that incarceration can have on a person—how it makes people into broken shells of their former selves. It can make people even more violent than when they came in. It destroys families and communities. We must transition away from the use of prisons as a weak band-aid for societal unrest and care for people as human beings.</p> <p>I urge the county to incorporate the recommendations of the community on the Vignes Project, including establishing housing, services, and programs for the surrounding community. Local organizations should be at the helm of the planning for this project, as they have spent years on the ground with these issues and understand them best.</p> <p>I strongly encourage the board to vote in favor of this motion and take the steps outlined above.</p>

24.		Favor	Cinthya Salas	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Corrina Calanoc	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I am extremely thrilled at the prospect of creating a safe space with dedicated resources for those suffering from mental illness, homelessness, or former incarceration. As someone who grew up in the Chinatown area, I am also so excited to see that this plan advocates for the preservation of culture and investment in the Chinatown community which is suffering from gentrification. This is such an intentional plan that incorporates the broader community which I truly believe will benefit LA's economy as well as improve our safety. This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Daniel C Gaines	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>The research is clear: imprisonment overall does not help rehabilitate people but actually tends to increase antisocial behavior. This is especially true when speaking of non-violent offenders, for which prison time can increase the likelihood that offenders will commit more violent acts in the future. Providing alternatives to incarceration will help us to follow evidence-based and, frankly, humane practices when it comes addressing crime. That is why I support the Care First, Jails Last approach.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. 24.		Favor	Daniel J Hirsch	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

24.		Favor	Diane M Tan	I am a longtime community advocate who supports and promotes the saving and protection of the historic cultural neighborhood of Los Angeles Chinatown. I am a volunteer in various community and professional organizations, such as Chinatown Sustainability Dialogue Group (CSDG), Chinatown Community for Equitable Development (CCED), OCA-Greater Los Angeles, Multicultural Bar Alliance (MCBA), and many others. For around 150 or more years, L.A. Chinatown has served as an important, essential and special place to live, work or visit for immigrants, their families, and friends, and many others. The community primarily consists of very low-income seniors and working-class families and individuals who are mostly renters, local ethnically-owned small businesses, and other entities. In order to save and protect L.A. Chinatown from extinction as a historic cultural neighborhood due to the unfair and mounting increase in gentrification and displacement of residential and small business tenants, more affordable housing and community-serving small businesses are essential and greatly needed. Also needed is a community/cultural center. I wholeheartedly support Chair Hilda L. Solis' motion to begin the development of a Restorative Justice Village Master Plan that includes the re-development of County-owned parcels, such as Lot 45 located on Spring Street, for 100% affordable housing in Chinatown. It is important and vital to include proper and adequate outreach efforts and collaboration with Chinatown stakeholders as well as social and criminal justice reform advocates in the planning, development, construction, and maintenance of the facilities in the relevant areas of the Master Plan in a racially, economically and culturally-sensitive manner. These are much-needed, collaborative and creative steps toward achieving and ensuring criminal justice through restorative justice reform and racial, economic and social justice in L.A. County.

Agenda #	Relate To	Position	Name	Comments
24.		Favor	Elizabeth S Logsdon	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you for your time.</p>

24.		Favor	Francesco Colombo	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. 24.		Favor	Gavi Klein	<p>A huge thank you to Supervisor Solis' for your motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>The punitive justice system has separated families and locked communities in a cycle of poverty. Black and brown communities have been disproportionately impacted, at the same time as their communities are stripped of other resources. We criminalize and punish poverty and mental illness, as if retribution will solve the underlying issues of these problems rather than exacerbate them. Members of my family have spent years in jail, where they were locked out of the healthcare and help they needed, condemning them to further years of homelessness and poverty on the outside.</p> <p>There is incredible potential in this four-acre plot of land, but the County must remember to prioritize community input while shaping the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to expand housing, services, and programming for the surrounding community. It is crucial that the process of creating this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process demonstrated that community wants to support your efforts through to the end. Due to your leadership, LA County could be building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. But it's not actually prepared or qualified for mental health management and as Supervisor Solis acknowledges in her motion, there is still much more to be done to provide treatment, housing, and services for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

incarceration. It can show the public how simply providing space for rehabilitation is a stronger, kinder, more lasting way to improve communities, reduce crime and treat mental illness.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Helen Burak

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Now more than ever, it is vital to prioritize the care the community needs by providing services and help, not just locking people up as though that solves any of our problems.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Dear Supervisor Solis and the Board of Supervisors,
We applaud the thinking of Care First, Jail Last, and their work in supporting changes in the justice system. We are glad to hear that Homeboy is calling on a partnership with the City for the construction of 148 transitional housing units at Alpine and Alameda St - and the creation of the Restorative Justice Village Master Plan. In response to the Motion on the Restorative Justice Village Master Plan, we urge the Supervisors to continue to prioritize the input of and consultation with members of the Chinatown community. Homeboy Industries and The Community Endowment continue to be members of the Chinatown community and we are glad to share many of the same values. We were glad to see TCE and Homeboy Industries submit a thorough comment letter for the LA Arterial Transit (the gondola project), sharing many of the same concerns that we did, but we were disheartened to note that they mention the neighborhood of Chinatown, where they are located, only once in their 17-page report, indicating a disconnect with the community in which they are situated. We support the introduction of the Restorative Justice Village Master Plan, but emphasize the lack of community consultation and involvement from Chinatown residents in the development of this master plan from both partners and Supervisor's office. In a community that has been struggling under increasingly unaffordable rent, and transit-oriented displacement that has been only exacerbated by COVID-19, we are deeply disappointed with the lack of engagement.

Since March, low-income, often elderly Chinatown residents have lived in close quarters during COVID-19 in single-room occupancy buildings-- some tenants have died, and many are at risk of eviction (hence why some have gone on rent strike). It is no secret that tenants have been struggling in the community even before the COVID-19 pandemic. The area median income for Chinatown, prior to the pandemic, was approximately \$20,000. This has been nowhere near sufficient for residents to survive— and that's without even considering current circumstances. Chinatowns have been deeply struggling, as reported by Citylab, Washington Post, NBC News, yet have received few resources and funds.

In the meeting with Supervisor Solis's office and members of the community in late November, we were shown indication of the plan, but have only learned of new information from others in the community— up until we pressed for updates on the Motion and plans. We have been disappointed in the lack of communication we received with regard to the progression of the motion, particularly because the community is in an affordable housing crisis, and on the verge of massive waves of evictions. We urge you, Supervisor Solis and the Board, to continue to prioritize affordable housing in the Chinatown community and

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Jessica Craven

I am always for finding alternatives to incarceration. Thus I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell

Katherine Hussey	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Projects like this constitute meaningful action (by way of reallocation of resources) toward a better, more equitable Los Angeles.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>
Katherine Lewis	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p>

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Keith Pakiz

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

I support Care First , Jails Last because I want to live in a county that values human life more than property. I want to live in a county that values human life more than power. Care First, Jails Last is that vision. There is no reason we cannot change our inhuman and brutalizing prison system beyond changing where power lies - which should be with people and not corporations and systems. Care First is a tentpole of anti-racism and is one of our greatest weapons against the rise of neo-fascism in America. This is not just a hope, this is a necessity if we hope to live in a free and just society.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making

Kiana Martinez	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>
Kristen Studard	<p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. Lauren E Pollock	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>Jail should be the last resort. When I taught at an Alternative high school in Chicago, I had a student sent to jail for what ended up being mistaken identity. He missed out on an amazing opportunity to fly to Boston to see his film on a big screen with other high school kids from around the country. He wasn't guilty, but even if he was, this would have been an amazing opportunity to get out of his neighborhood and see what life could be like for him. We're too fast to throw people into jail and prison. More funding absolutely needs to go to rehabilitation and second chance programs for low level offenders.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. As a 9 year public educator, I know firsthand the need for restorative justice in public spaces. It lowers recidivism and makes for more caring and productive citizens.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Compassion should be our guiding principle in all these matters. Compassion in action means involving the community in shaping any kind of program that purports to benefit that particular constituency.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Lucas OConnor

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

The Care First, Jails Last approach is so important to me morally, ethically, practically - and we've seen that Los Angeles's voters find it equally important.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision-making process for the Vignes lot.

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

As a Los Angeles resident, I support care first, jails last.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Lucy McKnight

	Lynne Lueders	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I'm a results-oriented person and our punishment led model of dealing with the social issues of mental illness, poverty and drug addiction is not working. Los Angeles County has become a prison industrial complex when so many of those same resources and personnel could be better invested in the nurture and development of our citizens. To create the society we all want, we clearly need a new direction, and caring for people, rather than criminalizing them, is an approach that makes fiscal and emotional sense.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Now is the time to take bold action to harness the public will for a care first agenda. Our investment in prisons is a failed strategy. Let's imagine better!

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Meridith McNeill

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Our current carceral system is a complete failure. We are not rehabilitating our community members and providing them with what they need to succeed in the real world once released. We are torturing human beings, creating more mental health and physical issues than before, and expecting change. We need to rework our approach in order for our communities to truly succeed.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

Mia Schulman	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>This is an opportunity to right the wrongs of the past, to begin to fix systems created by white supremacist and capitalist agendas. Do we want to keep treating the symptom (i.e. crime committed - solution lock up), or do we want to treat the problem itself (crime committed because of poverty, lack of access to health care, lack of access to education, etc)? The only way forward is compassion, to make available community resources that can educate and/or rehabilitate people. I want to live in a city, a state, a country, that supports its citizens, not persecutes them. I want to believe in my leaders.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. 	Miho Murai	<p>My name is Miho Murai and I currently reside and work in Chinatown. I am also an At Large Board Member of the Historic Cultural North Neighborhood Council, but my statement here is NOT on behalf of HCNNC but as a stakeholder of Chinatown. I have been living in my apartment building since 2014 and it is sad to say but most of the original tenants that were here when I first moved in (seniors and low-income immigrant families), have been displaced due to gentrification of Chinatown. I chose to live in Chinatown because of its historical significance, the small businesses that cater towards the local senior and immigrant community, and the community vibe that I felt instantly when I moved in. For the past seven years, things have changed significantly and the seniors and low-income immigrants are being pushed out of their homes because of sky rocketing rental rates and sadly there is no no more full-service local grocery stores that seniors can walk to.</p> <p>After reading more about Hilda Solis' Motion for a Restorative Justice Village Master Plan, I am now hopeful. I sincerely appreciate her commitment to building truly affordable housing for low and extreme low income individuals and families on County-owned land in Chinatown, and a Master Plan that considers the most important needs of the Chinatown community, as well as those of unhoused people and formerly incarcerated populations. We need more leaders like her who is willing to push the button and fight for what the community really needs, and not what the developers would like to do, i.e. displace long-time tenants so that they can make a profit.</p>
	Mikael Taylor	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p>

		<p>These are exactly the type of motions and ideas that we need to continue to be seeing in the county and our cities at large.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.</p> <p>The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

[Add personalization about why you support care first, jails last]

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Pamela G Agustin
Anguiano

We support this vision to create alternatives to incarceration and prioritize County-owned assets to address the needs of local Chinatown residents, especially its most vulnerable to displacement. It is important that this master plan process centers long-time residents, tenants, and small business owners in this process. We support the priorities shared by the Southeast Asian Community Alliance priorities for this plan, therefore we urge the Board to:

1. Develop the plan as a partnership with the Chinatown community;
2. Commit to incorporating Chinatown priorities including setting aside a majority of the uses for affordable housing accessible for deeply and extremely low-income residents and community serving retail;
3. Create a community engagement process that specifically centers the needs and concerns of the low-income, limited English speaking residents and workers who are often the most excluded from these types of processes;

Pauletta Pierce	<p>Hello,</p> <p>My name is Pauletta Pierce. I was born here in Chinatown at the French Hospital and I am currently a resident of Chinatown. As a resident, I like to express my appreciation for chair Hilda Solis's commitment to building truly affordable housing for low and extreme low income individuals and families as well as those of unhoused people and formerly incarcerated populations."</p> <p>I like to share a little about my experience working with the target population that the Restorative Justice Village will be serving since this is the same group of people that I serve in my professional life. I am co-located at Twin Towers as a "Client Engagement Navigator Specialist" also known as CENS with a 16 year background of substance abuse counseling and domestic violence with the justice involved population. As a service provider, I wanted to inquire and ask if supportive in-house services will be available on site for the Justice Village participants? Supportive in-house services vary and I highly recommend implementing the "Wholistic" approach for the when treating the participants for a favorable outcome. Please review the link that I have provided for more information on my recommendation. file.lacounty.gov/SDSInter/dmh/1055488_2019_IHMHC_Registration.pdf</p> <p>Chinatown residents need to have a seat at the table during the development of the Restorative Justice Village to be successful. There are alot basic human needs that aren't currently met for the current people of Chinatown like a grocery store, which participants would also require. Please feel free to contact me for any further suggestion and insight at ppierce@hhcal.org and or paulettapierce04@gmail.com. I thank you in advance for your consideration.</p> <p>Sincerely, Pauletta</p>

I support a restorative justice vision, and support the need for planning initiatives in Chinatown to include the needs and priorities of Chinatown residents.

Specifically, I ask that the supervisors commit to the following:

- Ensuring that the plan is developed as a partnership with the Chinatown community;
- Engaging the low-income, limited English speaking residents who are often the most excluded from community input;
- Incorporating Chinatown priorities including setting aside a majority of the uses for affordable housing accessible to local low-income residents, targeting deeply and extremely low-income residents and the inclusion of community serving retail.

Chinatown exists historically as a gateway for low-income immigrants of various ethnicities, seeking to establish a new life of opportunity. With increasing rents and real estate speculation, the need for deeply and extremely low-income housing is even more profound for both recent immigrants and established residents. I'm concerned that redevelopment proposals for City and County-owned sites in Chinatown may treat this need as an afterthought.

The MCJ property, "Lot 45," and other public property that are becoming available for redevelopment could have a significant impact on our affordable housing crisis if a significant proportion, on the order of 50% to 100%, is dedicated to affordable housing. We need bold steps like this to make real and timely progress in the housing crisis.

Sincerely,

Phyllis Ling
Savoy St Resident and Property Owner

Priyanka Bhakta

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

I support care first, jails last because this framework ensures the healthy, safety, and care for all community members over harm and profit.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

I support care first, jails last because we have to rectify a system that is keeping too many people incarcerated due to circumstances beyond their control.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Rachel E Van
Amburgh

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

It is imperative that we take the tremendous impetus of LA's widespread support of Measure J in the right direction and prioritize Care First, Jails Last. Preferably, no jails at all.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

Ruby Condon	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>The U.S. incarceration system is just another mode of profit for our country. We cannot say we have progressed from the time of chattel slavery while we are still seeing people (particularly BIPOC people) being locked away and profited off of. Los Angeles has the largest jail population in the world. Instead of investing the time, money, and effort into providing assistance to those who are struggling with drug/alcohol abuse, mental health crises, etc. we lock them away to be forgotten and used for capitol gain. As an Angeleno I am ashamed of this and I hope you are too.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. 	Thank you.
Rudy Espinoza	I'd like to share my strong support for this item. An equity-driven Master Plan has an opportunity to ensure that development not only supports prosperity for the community, but also addresses historical marginalization. To accomplish this, the Plan must partner with the chinatown community and commit to incorporate the priorities many community members have already defined. Any developers and consultants who are engaged for this work in the future should be committed to "restorative justice" and a community-led process.
Ryan Hardin	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I support care first and jails last because I don't believe jails provide any long-term solutions. Prisons disappear people, rather than solving any social problems for generations to come. I would rather go forward with care.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. 	<p>experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.</p>
Sara Lowry	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>There is an unhoused man living in his vehicle outside of my apartment building. This is his home. He wants to live in this neighborhood. Some of the tenants in my building are okay with that and some are not, but it's all a matter of perception. This person used to work at the restaurant across the street and then fell on some hard times. He is respectful of the people and the neighborhood and has helped us clean up trash from the sidewalks. I appreciate him as a neighbor and while I know he is comfortable living in a van, it is a shame that there is literally no other option for him at the moment.</p> <p>This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.</p> <p>The ATI process showed you all that community wants to support your efforts all the way through. Sarah Bowers	<p>Thank you Supervisor Solis for pushing forward plans that align with Alternatives to Incarcerations! It's encouraging to see such initiative. Our city and county's experience with incarceration has shown that it does not work. We can no longer keep jailing people away rather than create caring community methods that truly address community wellness and public health.</p> <p>The Vignes Project land has a lot of potential and I'm sure the Board could</p>

owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Every day I think about what it would mean to actually care for people instead of criminalizing their mental health issues--and to practice restorative justice instead of incarceration, which causes so much of the mental health distress that then gets criminalized. It's a vicious cycle that needs to be broken and this is a step toward that.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Selina Ho

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

This space has contains the possibility for us to tangibly reimagine what safety, justice, and healing means in our community.

	<p>I also urge that the Board support the nuance and specificity of community members' identities by adding recognition of Two Spirit (2S) people. Oftentimes, Two Spirit is left out of the conversation and should not be included within LGBTQ+, as there are both cultural and spiritual differences. To that same end, it is important to separate the identities of Black people & Indigenous people from the broader designation of POC to properly recognize the uniqueness of their lived experiences.</p> <p>While we have seen many efforts to collect data in the past, we have not seen commensurate follow-through to address the issues amongst our community members. I urge the Board to further invest in its commitment to transparency by making it clear to the community how the data collected will be used to support impacted communities. The county should work to develop a plan with community organizations to address these issues.</p>

Central Jail.

Last week I had an opportunity to drive to the Vignes Project on Vignes Street, The gates were locked, however, we had a chance to see the redesigned containers used for housing units.

When I reflect on an endeavor to enhance a community, I think of the Highline in Manhattan, New York City. What makes this the huge success that it is, was community input. The planners included the community to create this highly enjoyable and enhancement to the community.

The community input must be included from the very start of the project for it to have meaning.

This four-acre plot of land has immeasurable potential. to repeat, we urge that the County prioritize community input to shape the project from start to finish.

Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County.

I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Impacted community members can provide information and experiences that will contribute to the success of this project. Thank you.

Susie Giesy

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

We've spent the last 8 months working to re-imagine LA County and this is the perfect opportunity to turn that re-imagining into reality!

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish.

support Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

As a survivor of sexual assault, it's very important to me that we find ways to address harms that center care and healing rather than inflicting more trauma. Restorative Justice means putting the needs of those most harmed in our communities first, and imagining better ways to care for ourselves and each other.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

Tracy Dickerson	<p>I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.</p> <p>I support care first, jails last because it gives people the opportunity to connect with resources that will not only better themselves but better the community. Jailing leads to a negative cycle that's almost impossible to get out of. Whereas, if we support people who haven't had access and opportunity, and give them a chance rather than put them away in jail, we are supporting hope and lasting, positive change.</p>

Honorable Members of the Board of Supervisors
Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, CA 90012

RE: Revised Motion for Restorative Justice Village Master Plan (Sup. Solis)

Dear Honorable Members of the Board of Supervisors:

The ACLU of Southern California supports the revised Motion for Restorative Village Master Plan (Sup. Solis). The ACLU has been a strong supporter of completely moving the County's criminal legal system away from a focus on mass incarceration and towards the vision of Care First Jails Last embodied in the establishment of ODR, the decision to terminate the plans for a mental health jail, and the ATI process.

The Care First Jails Last vision will not be realized without a deep commitment to developing and funding a community-based system of care. Nor it come to pass without careful planning that includes active participation of grassroots organizations, people impacted the criminal legal system as well stakeholders in the communities where housing and other services are planned. Having a Restorative Justice Village Master Plan is an important component of the County's continuing effort to move its criminal legal system in a positive direction.

Sincerely,

A handwritten signature in black ink, appearing to be "Hector O. Villagra". The signature is fluid and cursive, with a long horizontal stroke at the end.

Chief Counsel

1313 WEST EIGHTH STREET • SUITE 200 • LOS ANGELES, CA 90017 • T 213.977.9500 • F 213.915.0220 • ACLUSOCAL.ORG

Item S-1

I was greatly dismayed yesterday to see a number of Supervisors (including my own, Hilda Solis, whose overall leadership I have been impressed with lately) indicate that LA County should unquestioningly follow suit with the Governor's decision to lift the stay-at-home order. You can offer all the cautionary caveats you want to, but people will inevitably take this as a sign they can ease up. They will grow complacent, and we will be in danger of losing whatever modest progress we have made in recent weeks. When hospitals are forced to set up ICU overflow units in their cafeterias, we should not be allowing outdoor dining!

Item 24

I support Supervisor Solis's proposal to move forward with the Vignes Project in a way that is consistent with the spirit of an Alternatives to Incarceration policy vision.

Item 26

I applaud the Board for moving forward with ways to translate the passage of Measure R into actual policy. But I also support advocates pointing out the urgency of providing the COC with the tools (including a full-time consultant and data research team) necessary to complete a comprehensive Public Safety Reinvestment Plan. Having attended COC meetings numerous times, I can attest to the fact that most of the Commissioners are deeply committed but also stretched too thin. Putting this additional (and essential) task on their plate requires that we provide them with all the support they need.

The data analysis is important for numerous reasons, among them the need to assess exactly how much has been saved through reducing the prison population, so those funds can faithfully be reinvested in the community.

Finally, as I have in previous comments, I continue to urge you to take stronger steps to ensure that those who have been most affected by our current system of criminalization and mass incarceration have a seat at the table in the crafting of alternative policies. The standard platforms for public comment are insufficient. Groups in the Justice LA Coalition have deep expertise on these matters—expertise rooted in personal lived experience, and in research and study. The Board should be sure to draw on that expertise to the fullest extent possible.

Item 32

I support a ballot measure that would, if approved, amend the County charter and allow for impeachment and removal of the sheriff. Just like the impeachment of a president, this is obviously an extreme measure, and one to be used only in

extraordinary circumstances. But the current sheriff's behavior is proof that the people of LA County need this option available.

Item 35

Reimagining public safety will only become a reality if: a) there is substantial divestment and demilitarization of local law enforcement; b) if those savings are truly diverted to community reinvestment. If those 'savings' are largely kept within police and sheriff's department budgets, we will not see real change, and people will lose faith in the process. I have seen this happen already with the supposed 'cuts' to the LAPD budget. And advocates are raising real questions as to the same thing happening with AB 109 funds, many of which seem to be staying within LASD and going to things like overtime. It is essential that this reinvestment process be transparent and closely scrutinized.

General Comments

As I have stated in previous comments, I support phasing LASD out of traffic enforcement duties, as well as County hospitals. Involving armed law enforcement officers in these venues invites abuse and unnecessary escalation, as we have seen tragically and all too often.

26 January 2021

TO: Board of Supervisors Meeting, Los Angeles, CA

RE: Written comments for LA Board of Supervisors meeting 26 Jan 2021

Agenda Item 24: [Restorative Justice Village Master Plan](#)

I applaud Supervisor Solis' motion to push forward plans that align with the Alternatives to Incarceration (ATI) "Care First, Jails Last" report for the county owned four-acre property known as the "Vignes Project" located near Men's Central Jail.

Every person deserve a second chance, especially for non-violent crimes. The goal should be rehabilitation & correction not only punishment. Alternatives will allow for families not to be separated for decades and is a better investment for public safety.

This four-acre plot of land has immeasurable potential, but we urge that the County prioritize community input to shape the project from start to finish. Multiple recommendations of the ATI report, which was written by community stakeholders, should be implemented on this lot to create more housing, services, and programming for the surrounding community. It is paramount that the process for this "master plan" be

shifted toward a Whole Community Planning model that includes the community at large in the decision making process for the Vignes lot.

The ATI process showed you all that community wants to support your efforts all the way through. With your leadership, LA County is building housing on land that was once destined for more jail cells. I strongly urge you vote in favor of building homes that will keep people off the streets and out of our jails.

The Los Angeles County jail system is the largest in the world and functions as the largest mental health facility. However, people cannot get well in a cell and as Supervisor Solis acknowledges in her motion, much more can be done to provide housing, services, and treatment for individuals who have experienced incarceration here in LA County. I urge the Board to vote in favor of this motion and advocate for community input throughout the process. Thank you.

Agenda Item 26: [Report on the Comprehensive Public Safety Reinvestment Plan](#)

Supervisors, thank you for supporting and recognizing the priority of honoring the people's mandate of Measure R's Comprehensive Public Safety Reinvestment Plan. The motion passed during November's Board meeting was instrumental in leading us here today. We are also grateful for the incremental steps taken by the Civilian Oversight Commission to advance the drafting of the plan and feasibility study and look forward to Mr. Williams' presentation to the Board at the January 26th meeting.

We can no longer fund a failing program. We must improve what is not working to meet the needs of the people. We do not need military equipment we need medical & mental health services. We do not need more jails we need more treatment centers. These changes will provide a healthy and comprehensive Public Safety Reinvestment Plan.

On March 3, 2020 -- by the will of 73% of LA County voters -- the historic passing of Measure R not only granted subpoena power to the COC, but also established that within 7 months of its passing, the Commission would draft and present to the Board the Comprehensive Public Safety Reinvestment Plan. The plan was to include a feasibility study focused on reducing the county jail population and reinvesting \$3.5 billion previously allocated to support jail expansion into prevention, mental health and additional community-based systems of care. I recognize the COC's inability to meet the 7-month mandate in October was partially due to internal staffing capacity and securing funding to support the drafting of the plan and feasibility study. I **strongly recommend that the Board immediately take action to allocate funding to support the Commission in hiring a full-time consultant and data research team so that it may comply with the requirements of the Measure R mandate.**

I am grateful for the advancements throughout the county with regards to "Cares First, Jails Last" and recognize the importance of streamlining efforts and resources to continue to support county work around decreasing the jail population and reinvesting in community-based systems of care. I am in full support of the COC becoming better aligned and more intentionally engaged in current county conversations with regards to decreasing the jail population. However, Measure R specifically asks for the assessing of savings and developing a plan for reinvestment of those savings. A task that is currently not being addressed in county conversations led by bodies such as ATI, ODR or

the Jail Population Review Council. **I strongly concur that the Commission must play an important role in developing recommendations to reduce the jail population and must act immediately in drafting a plan to assess and reinvest cost-savings to more broadly support community-based public safety initiatives.**

While I appreciate the Commission's efforts in convening the Measure R ad hoc committee, a more inclusive process is needed in which the expertise of community stakeholders especially system-impacted community leaders are engaged. **I ask that the Commissioners prioritize space for community input - especially system-impacted community leaders invested in the drafting and successful implementation of the plan.** Many of our community leaders have been actively engaged in the county's alternatives to incarceration efforts and their expertise should be incorporated to better inform the successful drafting and sustainable implementation of Measure R's plan and feasibility study. **I strongly urge that the COC engage community voices and expert leaders in their research and adoption of the plan.**

Agenda Item 32: Report Regarding Options for Removing the Sheriff

We appreciate the Board's efforts to hold law enforcement agencies accountable to standards of integrity and community safety. In light of the current sheriff's unwillingness to comply with existing accountability mechanisms, however, we urge the Board to take decisive action to enable voters to exercise democratic accountability. Just as with Measure J, which received overwhelming support from voters, the

Board should put on the ballot an amendment to the LA County charter to allow for the impeachment and removal of the sheriff for specific serious violations of the public trust, including legal violations, obstruction of oversight, and patterns of unconstitutional conduct. I strongly support divesting from the Sheriff and investing in care because we are talking about lives of our citizens. We need a Sheriff we trust to care for citizens, his staff and be accountable and transparent to the Board of Supervisors. We need a Sheriff that will listen to the people. Currently, the Sheriff's actions are unprofessional. I have attended the last two LAC Sheriff Oversight Committee Meeting and I have just be shocked by his indignation to the board & citizens. He never stayed at the meeting to listen to the people. I support the removal of the current Sheriff and ensuring the Board of Supervisors have the power to immediately move any Sheriff the fails to uphold his oath to the citizens, fails to be acceptable and fail to be transparent to Los Angeles citizens.

By adding the power to remove the sheriff for misconduct – including the current sheriff's repeated and deliberate obstruction of oversight – the Board would help ensure sheriffs comply with existing transparency, accountability, and oversight requirements without obstruction or delay. Although sheriffs are elected, California law allows for considerable secrecy of law enforcement records, including investigations of misconduct. In granting voters the power to remove sheriffs who systematically block oversight, this amendment would help ensure that voters have the information necessary to hold sheriffs democratically accountable. Allowing for the removal of a sheriff for serious misconduct ultimately strengthens democratic accountability – not just for the current sheriff, but for future sheriffs to come.

In the event of impeachment and removal, the County should consider limiting the Board's power to appoint whomever it wants as the interim sheriff, especially in cases where a significant portion of the term remains. Instead, consistent with the hiring practices at large police departments, the Board could delegate to the COC the responsibility to hold public hearings and create a list of candidates.

Agenda Item 35: Report on the Implementation of the California Public Safety Realignment Act

For nearly a decade, Los Angeles County community members have called for an evaluation of AB109 spending in our county and a reinvestment in community-based alternatives to incarceration. Since 2011, Los Angeles County has received \$2.5 billion dollars in AB109 funding intended to help counties develop and implement alternatives to incarceration such as innovations in re-entry, community-based services, and affordable housing. However, the Sheriff's and Probation Departments have received the vast majority of these funds (77%) and use these dollars as slush funds to pay overtime.

Every day incarcerated people are being denied release or parole because there are no Transitional Housing in the area where they live. Due to COVID-19 several Transitional Houses are not admitting because they do not have funds for the PPE requirements. Its critical that AB109 funds should be used for more Transitional Housing and Rehabilitation Services and not as personal slush funds for the Sheriff and Probation Department.

This Board has put forward several motions to assess how we can reallocate AB109 funding out of the Sheriff's Department and into the

specific Care First recommendations outlined by the Alternatives to Incarceration (ATI) Report.

This most recent implementation report from the County of Los Angeles Probation Department shows that a vast misallocation of funds is still underway in the County. The Report shows that over \$344 million dollars of AB109 funding were allocated to the Los Angeles County Sheriff's Department and Probation Departments combined, whereas only \$22 million of these dollars were allocated to the Office of Diversion and Reentry (ODR). The ODR was created in 2015 to support community members in being diverted out of law enforcement custody or supervision. Given that AB109 dollars are focused on innovations in re-entry, the vast misallocation of these dollars to the Sheriff's Department instead of ODR is a grave mistake, and one that results in serious harm to our communities. As a result, we call for a continued divestment from the Sheriff's Department and Probation and into the Office of Diversion and Reentry; we know that for ODR, people being returned home to our communities is priority.

We call on this Board to be courageous, and to continue to move AB109 funding out of the Sheriff's Department and Probation and into the community-based, non law-enforcement alternatives to incarceration as outlined in the ATI report. We will support you every step of the way.

Thank You

Irma Cooper

Los Angeles County Board of Supervisors,

I support a restorative justice village plan, yet I respectfully urge you to make a motion to amend the existing Restorative Justice Village Master Plan motion by striking out the language referencing Lot 45. An alternative may be to insert language that reserves a percentage of new affordable housing units specifically for low income families and seniors.

For several years, various constituent groups communicated with you to develop a comprehensive vision for the redevelopment of Lot 45 and additional properties. The filed motion proposes a master plan with a scope that does not accommodate needs that many in Chinatown believed, based on communications with you, were among your top priorities for the area under consideration—e.g., some affordable housing units for low income seniors and families. Currently, the plan exclusively involves Homeboy Industries and The California Endowment, with Chinatown merely receiving mention at the end of the motion as a community to outreach with.

It is not too late to implement a more unifying approach. I urge you to reconsider, and to bridge the divides by bringing together the various community groups. I hope to see you leading the way to successful collaborations and partnerships. With your leadership, and with the community behind you, I believe that you can identify common ground and unite your constituents to support a shared, expanded vision that meets a more diverse set of needs while serving a greater number of constituents in the community.

Furthermore, I believe you will find that Chinatown constituents agree that restorative justice is a top priority. In fact many of us, including myself, made public comments at numerous meetings supporting you in the period leading to the final actions resulting in the decision to close the Men's Central County Jail.

Please reconsider and give focus to alleviating the housing crisis by utilizing the extremely limited, remaining lands to construct housing for our extremely low-income Latinx and Asian residents already in the Chinatown neighborhoods. As you know well, many of these residents live in unacceptably cramped conditions— most with multiple generations and multiple families residing in single, shared small housing units.

I look forward to seeing you offer a different path forward in service to a more diverse group of first district constituents.

Thank you for your consideration,
Angelica Lopez Moyes

RE: Written Public Comment on Agenda Item #24, Motion for Restorative Justice
Village Master Plan

Dear Board of Supervisors,

My name is Aileen Louie and I am the Vice President of Development and Communications at Asian Americans Advancing Justice – Los Angeles. First, I want to express my gratitude to Supervisor Solis for her leadership to create a holistic plan that recognizes the urgent need of so many disenfranchised communities. We are appreciative of the inclusive process of the planning and are support of the master plan.

Our organization has worked for 37 years focusing on the advancement of civil rights and social justice through the provision of legal services for the indigent, impact litigation and policy advocacy. Our partners at the Pacific Asian Consortium in Employment (PACE) have been in the community even longer providing services related to workforce & business development, early childhood education and affordable housing.

Within the planning area, we are proposing a joint project to address the plan's need for affordable housing and economic development for the Chinatown community. We are partnering to build a community development campus on Lot 45 (725 N Spring St, Los Angeles, CA) and Vehicle Maintenance Yard(1055 N Alameda, Los Angeles, CA). The project includes affordable housing, a business incubator and job training center, a nonprofit office building, a community cultural center, and a childcare center.

Over the course of our planning, we have been working with Chinatown residents, business owners and stakeholders in order to understand their specific needs and gain their support. On a personal note, my partner's family has deep roots in Chinatown and

his parents live there still. Chinatown is a second home to me and have a deep appreciation of how meaningful this project will be to the community.

We are asking Supervisor Solis and the Board to carefully consider the Community Empowerment Campus project we are planning for Parking Lot 45 and the Vehicle Maintenance Yard on Alameda. We also hope that you will engage our organizations as stakeholders in the master planning process. Thank you for your consideration.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Aileen Louie', with a stylized, cursive script.
