44.		<b>Favor</b>	Colin Doty	<p>Thank you, Supervisors Solis and Hahn, for bringing forth this motion. Given these uncertain times, a ??Guaranteed Basic Income program is more than necessary.</p> <p>For the past five decades, the Black unemployment rate has remained close to double the white unemployment rate, even in labor markets where overall unemployment rates were in the very low single digits. The gender wage gap persists, with women of color earning cents to the dollar of white men. During the pandemic, all of the jobs lost belonged to women, and the overwhelming majority of those were women of color. Men, on the other hand, gained new jobs. Los Angeles is home to this deepening economic inequality that falls along racial and gendered lines. L.A. County has a responsibility to address this by committing itself to poverty alleviation with an emphasis on how poverty is exacerbated by race and gender.</p> <p>Years of research has shown that when given unrestricted payments, recipients are able to create economic stability for themselves and their families. The GBI concept is also a powerful tool to combat poverty while also addressing related issues of health, education, housing stability, and equity. More importantly, these programs come without the scrutiny and work requirements of programs such as welfare and food stamps. It is unconditional, with no strings attached and no work requirements, giving participants the freedom to spend money on their most immediate needs—be it food for their household, repairing a car to get to work, medicine to treat a loved one, or simply rent.</p> <p>Stockton's GBI program showed promising results: less income volatility, improved overall well-being, less food and housing insecurity, and greater ability to find gainful employment and cover unexpected expenses. The Board should implement this pilot program to study the beneficial impacts of a GBI program in Los Angeles immediately.</p>
