			BERT RIVERA	A vaccine passport creates medical "apartheid" creating 2 classes of people. This is not life and liberty in the USA, this is communism. Creating 2 classes of citizens based on any medical injection is illegal according to the Unruh Civil Rights Act. Other treatments are available. Medical choice is an individual choice, not a choice made by government for the individual. Any form of coercion via medical mandates, vaccine passports, QR does or any type of verification to show proof of vaccination violates Health & Safety codes #24171 "right of individuals to determine what is done to their own bodies" and #24172(J) "Be given the opportunity to decide to consent or not to consent to a medical experiment without the intervention of any element of force, fraud, deceit, duress, coercion, or undue influence on the subject's decision". Universally accepted codes of medical ethics including the Nuremberg Code and the Declaration of Helsinki absolutely prohibit any form of coercion to force individuals participate in a medical experiment. Big Pharma states the vaccines are voluntary and for Emergency Use Authorized only. There are many individuals who are already immune from Covid 19 as they have had the virus and recovered. There are not exceptions for these individuals further violating their rights. The manufacturers of the vaccines are exempt from liability and many individuals are getting sick and dying after being injected with the unknown substances in their drug cocktails.
			Bert Rivera	Forced vaccination is unconstitutional and violates individual rights. My Body, My Choice! Big Pharma is immune from liability and you want to force employee to take their drug??? Insanity!
			Brenda Davis	
			Brian Millar	
			Bridgette Smith	Freedom of choice
			Bruce Lewis

			Name	Comments
21.		<b>Favor</b>	George Bozic	My body, my choice. Not FDA approved emergency use only in a free society we would never force individuals anything against their will. Are we still the land of the free where if under 60 you have a 99% percent chance of recovery if you contract SARS-Cov2. Focus on nutrition, exercise, sunlight, vitamins and minerals.
			Gina lee	
			Gregory Gath	Those who have recovered from a case of Covid should not be forced to take the vaccine.
			Guy Grant	Save more lives and get the shot!
			Haley Mcdonald	
			HaleyRae C Porwoll	
			Hank Fung	I support requiring the vaccine, but only when the FDA officially authorizes a vaccine under regular procedures. Currently all vaccine takers have to sign a disclaimer that there is no FDA approved vaccine. There are a small percentage of people that are reluctant to take the vaccine while it is still under emergency authorization. I am vaccinated for COVID but recognize that all other vaccines, like for polio, measles, flu, shingles, etc. have been fully FDA approved and COVID should be no different.
			Hannah Lerner	
			Hooman Melamed	
			Jackie Cleveland	This is not a vaccine, its experimental Gene therapy and it has not been tested properly!! It will not protect anyone from actually getting covid-19 if exposed. It also has been proven to have too many serious side effects. No one has the right to force a medical treatment on a individual who does not want that "treatment" Its a personal choice, not a government choice!
			Jacob M DeMonte-Finn	This will save lives.
			Jacqueline Roman	
			Jamie Bristol

Agenda #	Relate To	Position	Name	Comments
21.		<b>Favor</b>	Kathy Yamamoto	<p>Thank you, Supervisor Barger, for bringing forth this motion. Especially in such uncertain times, there is an urgent need for workforce services for our youth. I strongly support the County taking next steps to secure our foster care youth the 'Care First' future they deserve.</p> <p>Youth aging out of foster care are expected to become independent adults overnight, forced to find ways to survive and somehow secure stable employment when they were legally children just the day before. This abrupt, near-impossible transition—and the fact that foster care youth are more likely to be Black, Latinx, female, LGBTQ+, and more likely to suffer from substance use disorders and have mental health needs—is why foster care youth are disproportionately affected by houselessness, unemployment, and incarceration.</p> <p>The statistics are overwhelming: one in four youth leaving foster care will become involved in the criminal justice system within two years of leaving care because workforce services are not readily available to aid their transition. The foster care-to-prison pipeline means it is absolutely critical that youth receive the services and support they need and have lacked. Not only is foster care in itself a pipeline to criminalized survival acts, but it disproportionately affects youth of color, particularly Black youth. Black children are twice as likely as white kids to be placed in foster care. Compounded with already disproportionate rates of school discipline, suspension, and expulsion for Black children, foster care puts Black youth at higher risk of entering the justice system.</p> <p>Workforce referrals and services can also help tackle the crisis that youth aging out of foster care face: nationally, 50% of the homeless population spent time in foster care. Lacking familial or community support, youth aging out of foster care at just eighteen years old are disproportionately harmed by houselessness, a driving factor that can lead to incarceration.</p> <p>Streamlining this program will provide youth with services necessary to survive independently and gain entrance into the workforce. This will create a domino effect of positive outcomes, from education to employment to physical and mental health. I urge the Board's support of this measure.</p>
			Katrina Abbott	All employees should have a choice and not be forced to take an emergency use non-FDA approved vaccine. This should not be required.
			Kay D Tarr	Tyrannical and unconstitutional. People have sovereignty over their own bodies, not be forced into being an experiment. Remember Nuremberg? Former RN here. I would make them fire me first if I was a county RN. My body, my choice!

Agenda #	Relate To	Position	The following individuals submitted comments on agenda item:	
			Name	Comments
21.		<b>Oppose</b>	Al N	This mandate violates the Nuremburg Code and other laws. It infringes upon our civil liberties and our right to make our own medical decisions. You are not doctors who can prescribe medical intervention. This is not your role. Approving the mandate would start lawsuits, and some employees would leave. You need people to run county departments. This is not good for worker morale either. I wholeheartedly oppose the mandate. I am the one who decides what medical intervention is done to my body. There are already COVID protocols at my county job, and so far there has been no major emergency of COVID deaths among staff. The media makes COVID appear worse than it is. This mandate would cause more problems than it is meant to help with. You are going to break the law if you approve this mandate and will face backlash if people are injured or die of the COVID vaccine. There has to be insurance to pay for medical costs and deaths when people start dying because their employer mandated an experimental vaccine.
			Al Negrete	Cannot mandate a vaccine for a virus that has NEVER BEEN ISOLATED.
			Al Private	
			Alaendu Okiyefa	I'm not a robot
			Alain Carpenter	
			Alain Gutierrez	New Centers for Disease Control and Prevention data show that in breakthrough cases of the highly transmissible delta variant, the answer is no. Mandating the vaccine could be more detrimental to someones health than getting the vaccine. The vaccine would be taking away the rights to our health, our body, our freedom of choice.
			Alan Graner

			Alex Aguilar	
			Alex Baldwin	The government is not your doctor. Only you and your doctor can make this decision together.
			Alex Bowers	The vaccine has not been fully approved by the FDA. Some people have personal reasons why they aren't getting it. I, for example, am not a "never" person, but do not feel comfortable getting it at this time. I understand the risks with waiting, and accept them fully. I would like to wait at least 18 months from the time the vaccine came out to take it. Furthermore, the variants seem to beat the vaccine anyway. The argument of having "less severe" symptoms doesn't make sense, as 99.98% chance of recovery exists. Please leave the choice to the people.

			Name	Comments
21.		<b>Oppose</b>	Alicia Royce	When the government is requiring you to have a vaccination to keep your job, for a vaccine that is not even FDA approved, which has a death toll in the last 8 months of 6,490 after taking the vaccine per the CDC website. This information can be found by anyone on the CDC website with a simple Google Search. By the city government requiring a vaccine to be able to make a living and feed your family means we are no longer a free country, but have entered in totalitarian government. Totalitarian regimes are often characterized by extensive political repression, dictatorship or highly undemocratic government, widespread personality cultism, absolute control over the economy, censorship, mass surveillance, limited freedom of movement, you are taking absolute control over the economy, mass surveillance by asking for a vaccine passport just to go to work, and limited free movement by not allowing people to go to work or enter into a public place for basic human needs without a vaccine. what you are suggesting to those that choose to be unvaccinated that they will not be allowed the basic necessities or to be able to keep their job to make money unless they do what the government says is not what America is all about. As a mom of five I cannot stand by any longer and watch as our free country goes under. What my grandparents fought for, when my grandfather's plane went down in WWII I guarantee you this is not what he joined and fought for. If you do this there is no going back. Restricting someones ability to work unless they do what the government wants (get a vaccine) or not allowing someone to shop at a grocery store unless they do what the government wants (get a vaccine) is unconstitutional and inhumane. Think long and hard before you make these decisions unless you are willing to take that step and become a government we as Americans have only heard about or read about that can watch their people starve to death unless they do what the government wants them to do. We are still America and we are still a free country don't change that today. I urge you to vote no on this matter.
			Alicia Toth

			Amie Greenberg	
			Amierre L Santos	
			Amir Mahmud	These vaccines are only approved under EUA and are not fully FDA approved. They have completely skipped proper animal trials. They have now been unblinded by the manufacturers so we will never know the long term side effects. Based on VAERS data ( this is a CDC and FDA run website to track vaccine adverse events) the short term side effects are catastrophic. To mandate these experimental vaccines is a direct violation of the Nuremberg code. To top it off, under the PREP act, no one is held liable when injuries happen as a result of these experimental jabs. Please, think of your kids and grandkids futures. This mandate will be a disaster for our community.  Thank you!

			Personal medical decisions are just that; "personal...decisions." Here in the United States they cannot be forced onto anyone. Every individual has the right AND duty to make the best decisions for themselves, as well as the right AND duty to take responsibility for those decisions. Over the past 30+ years I have been a public servant/emergency worker in the State of California and the County of Los Angeles and during that service I have taken several sworn oaths to uphold the Constitution of the US and the State against all threats, foreign and domestic. I have a sworn obligation to not only denounce any "orders" or "laws" that are in violation of those Constitutions, but directly challenge them. Every other individual who has taken those oaths also has the same obligation and duty. You DO NOT have the authority to force this onto anyone as a term of employment...especially to those who are already dedicated employees. Let them make this personal medical decision for themselves, based on their own determination as what is best for them.

			Anny Safarian	
			anon anon	
			ANONYMOUS ANONYMOUS	
			Anonymous Anonymous	
			Anonymous Anonymous	Freedom over tyranny
			Anonymous Anonymous	We oppose vaccine mandates
			Anonymous Constituent	Authoritarian measure not based on the actual science with outcomes that disproportionately affect non-white minorities that are justifiably skeptical of govt. If the govt actually cares about the people they claim to represent, why not pass UBI and m4a? Otherwise, FOH. My choice, my body.
			Anonymous Submission	The vaccines are not FDA approved. Also, they are incomplete and therefore increase the virulent strain rather than attacking and killing the host. That's how the Delta Variant was formed. Further, the vaccines (since they have not been approved and are not designed to prevent or kill the coronavirus) work to destroy the immune system of the carrier. They also allow transmission and this is why fully vaccinated persons are still being diagnosed with and transmitting COVID-19 to others. It is not safe.

Agenda #	Relate To	Position	Name	Comments
21.		<b>Oppose</b>	Anya Jensen	The vaccine is a medical experiment and should never be mandated as a condition of employment. This is totalitarianism and unacceptable.
			Aouie Goodnis	
			April Boyer	
			April Gingras	
			April Graves	
			April Mayfield	
			April Mckay	Remember the Nuremberg Code. Remember My Body, My Choice. Remember the Unvaccinated are the much needed CONTROL GROUP in the experiment. Remember over 50,000 deaths after the shot in USA (law suit underway on that) & over 500,000 death in Europe & a horrifically high number of injuries including Myocarditis in young men under 30. Remember 4 out of 5 pregnant women that took the shot LOST their pregnancy... their baby. Remember the magnetic graphene oxide is traveling throughout the body, brain, organs & much of it likes to settle on women's ovaries with unknown effects on fertility at this point. Remember the Nobel prize winner Vacinologist says the vaccinated are created MORE deadly strains & begs you to stop vaccinating during an outbreak as it is only creating more virulent strains.  No masks, no vaccine, no vaccine passport, no vaccine certificate - Honor home of the FREE. Remdesivir CAUSES organ damage, organ failure & death & it was the only treatment Fauci allowed in the hospitals from Jan to Oct 2020. Hydroxychloroquine works like a charm and made my covid19 flu the easiest flu ever, and I am immunocompromised. Ivermectin worked beautifully on my friends covid 19 flu and she is even worse immunocompromised friends covid19.
			April Pratt	
			April Reardon	
			April Woodward

rights. Rights cannot be taken from you.

4. This board is perpetrating fraud, and fraud is a felony and a felony carries a prison sentence. You are hereby notified that if you engage in harassment, intimidation and/or retaliation against any member of the public including me, for this statement of truth, such actions will be reported to the FBI.

It doesn't matter whether vaccines work or not.

It doesn't matter whether this is even a vaccine or not.

What matters is that each individual has sovereignty and authority over their own body.

We know what this board is doing.

We know exactly what this board is doing.

Here's the real truth:

These so-called vaccine can never be required as a condition for commerce.

Among many laws that protect individuals from the excess power of government tyrants, here are three...

1. EMERGENCY USE AUTHORIZATION LIMITATIONS on All COVID-19 vaccines , which are under an Emergency Use Authorization (EUA) and cannot be made mandatory.

On its website, the U.S. Food and Drug Administration (FDA) notes the following: "...Recipients must be informed... that they have the option to accept or refuse the vaccine ."

2. Forced vaccination violates the right to privacy, which is protected, secured and guaranteed by the 4th Amendment of the US and the constitution of this state.

3. Forced vaccination is unlawful DISCRIMINATION, discriminating against those who have cell phones or want to participate in AI.

Further, forced vaccination is a violation of:

- CA GOV Code 51, which protects FREE AND EQUAL access to ALL PUBLIC ACCOMMODATIONS.

Public Accommodations are "private businesses engaged in commerce." That means retails stores, banks, restaurants, recreation, transportation – and entity, location or establishment that is open to the public is prohibited from discriminating against the entry of a member of the public.

- CA GOV CODE 12926 (q) protects one's religious liberty and practice, including the ability to NOT PARTICIPATE in practices that violate one's sincerely held religious beliefs

- CA GOV CODE 37100 – prevents any creation, application or enforcement of a law or policy that violates the California Constitution or the Constitution of the United States.

-- CA HSC 24171 and 24172 declare that individuals have the right to determine what is done to their own bodies and to refuse consent to medical experimentation without duress, coercion or influence

**WARNING TO ALL GOVERNMENTAL, PUBLIC AND PRIVATE ENTITIES AND PERSONS**

Based on the above, and on behalf of all those named and referenced herein:

(a) No business or organization, including any governmental agency has the authority to force me or anyone else to take any and all COVID-19 vaccines, as well as any other vaccine;

(b) No business or organization, including any governmental agency, has the authority to deny me any and all services provided to COVID-19 vaccinated individuals;

(c) Denial of any such services, will be a violation of our God-given, Natural, Common Law, state and federal constitutional and international rights not to be vaccinated in any way or form without our consent, this includes our right not to be tracked based on our vaccination status; and

(d) Any such government agency, business or organization, person's acting as offices of such entities, man and/or woman, violating our right not to vaccinate against COVID-19 will be liable under tort law and for deprivation of rights under color of law, and will be subject to lawsuits, accordingly.

A tort, in common law jurisdiction and otherwise, is a civil wrong that causes a claimant to suffer loss or harm, resulting in legal liability for the person who commits the tortious act. It can include intentional infliction of emotional distress, negligence, financial losses, injuries, invasion of privacy, and many other things. In summary, no COVID-19 vaccination can be required in order to operate in community and social life, whether it is to go shopping, to work, to visit recreational areas, to visit persons in medical establishments, to travel, to visit restaurants or any business, or to enjoy are God-given right to go about our lives without government or corporate interference.

Failure to respect this, and any intent to violate anyone's right not to receive any vaccine for COVID-19 or any other disease may and will result in legal action against those involved:

(1) In the case of government officials, coercing and forcing any person to take such vaccines is a violation of your Oath of Office, your obligation to protect our constitutional rights, and will strip you of any and all governmental immunity for acting outside of your authority; and

(2) In the case of any business and organization, man or woman, coercing and forcing any person to take such vaccination in order to provide any services or to provide access to your establishment, will be considered a violation of constitutional rights, subjecting your business or entity, and you as a private citizen, a man or a woman, to legal action against all of your assets. Business and organization policies are not above the law.

LEGAL NOTICE: If I am compelled or forced to vaccinate to receive your services and I am injured, it will be considered coercion, duress and against our will, and you will be held liable for any such injury. I note here that we are not refusing vaccination, we are simply declining such vaccination for the reasons noted herein, and as mandated by God, the highest legal authority.

Bobby Lemus	well. Don't infringe on our rights, everyone is informed of the risk, no need to make this a "mandatory" thing, don't be ridiculous.
Bobby McGee	
Bonita Loewy	
Bonita Wilson	Citizens have a right to their own health meadures
Bonnie Drury	
Bonnie Granger	This should not even be a discussion. If the vaccine works people who are vaccinated and want to be- choose to be- should not have to worry about those who are not. If it doesn't work that way you should be questioning why. You want abortion to be a choice but not a vaccine? Unbelievable!
Bonnie Zimmerman	
Bonnie & Parrish	
BONNIE J PHIPPEN	
Bonniet Castillo	
Bonny N	
Bopha Pinchokchay	
Boris Elkis	
Brad Hartman	<p>Mandating Vaccination to reduce the spread of Covid is misguided. Israel has one of the highest vaccination rates in the world and the Health Ministry has discovered that the infection rate of vaccinated individuals is the same as unvaccinated individuals. The vaccines are not stopping the Delta variant. See the chart on the uploaded document.</p> <p>Forcing an experimental Vaccine on individuals that will not reduce the spread of Covid is unconscionable, considering that increasing individual's immune systems using Vitamin D, C, Zinc and Quercetin, would do more to protect the population. Ivermectin has successfully prevented and treated Covid infections throughout the world including a 93% reduction in cases in India during their recent surge. See FLCCC.net for more details and protocol specifics and Ivermectin study results.</p> <p>Do not require vaccination for County Employees or the general public as it will cause more harm than good. See the CDC VAERS database showing 12,000 deaths due the Vaccine and thousands of heart and circulatory problems in young men.</p>
Brad Hartman	<p>Successful Treatments including Ivermectin exist to prevent and treat Covid without mandating minimally tested vaccines that cause irreperable harm.The CDC VAERS reports between 12,000 and 45,000 deaths and many more side effects including disability. Younger people are 25 times more likely to have a side effect than get seriously ill with Cvoid. Recovery rate is greater</p>

	than 99% even without vaccination. Individuals who have already had Covid will be harmed getting vaccinated as it hyper sensitizes their immune system.
Brad Hartman	<p>This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely "may be effective." Federal law states: Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:</p> <p>individuals to whom the product is administered are informed—</p> <p>(I) that the Secretary has authorized the emergency use of the product;</p> <p>(II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and</p> <p>(III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.</p> <p>EUA products are by definition experimental and thus require the right to refuse.</p> <p>Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. Doe #1 v. Rumsfeld, 297 F.Supp.2d 119 (2003). The court held: "...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs." Id. at 135. No court has ever upheld a mandate for an EUA vaccine.</p> <p>The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children's Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.</p>
Brad Jerzykowski	
Brad Johnsen	<p>The "science" is showing vaxed people can still get and spread the virus just as easily. We still live in a free country. There should be no forcing anyone to put a synthetic treatment in their body just to comply with a tyrannical order.</p>

Brianna Essaghlian	
brianna gassman	
Brianna Ladapo	<p>The right of each sovereign person to make choices about his/her personal health is unalienable, and can never be mandated. Even if we were in possession of a vaccine that had passed all safety trials, allowing citizens to exercise informed consent--which we do not--it would still be well beyond your right to require any sovereign person to receive it (and this overreach makes even less sense in the context of a) the thousands of individuals who have already recovered from COVID-19 and now have natural immunity, which offers far more protection than anything created in a lab, and b) the thousands of severe adverse events and deaths attributed to the COVID-19 vaccines, as recorded in the CDC's own VAERS database, which is projected to represents only 1-10% of the true number of adverse events).</p> <p>It astonishes me that so many of you who have valiantly fought to protect the health freedoms of women, children, and underrepresented minorities now casually abandon your principles simply because you are fearful and/or feel political pressure. Health and wellness are NOT political issues, and whether you agree or disagree with the health choices of another is irrelevant. You should be ashamed for even considering taking away the constitutional rights of your constituency; it constitutes serious overreach, and will not stand.</p>

Caron Strong	
Caron Strong	My friend raced out and took the first Moderna and her doctor won't let her take the second because her throat and tongue swelled. I have two friends currently in the hospital after their second dose. One is fighting for his life now. He was fine all through this until his second shot. My daughter's father figure has three brand new health issues since his second shot. This is scaring a lot of people who are generally not speaking out. What provisions will be made for people who's doctor won't allow them to take it? We can't afford to risk permanent injury and death. Will you take responsibility for these health issues? Can we afford mass class action lawsuits? Please consider these things.
	It should be their choice what they put in their own bodies.

Cassie McGrath	
Catherine Allbee	This is an experimental drug that has caused many serious injuries. As of July 9th, over a month ago, the VAERS reporting system reported 9,048 deaths along with many injuries including heart attack, miscarriages, and other injuries. It is understood that the VAERS system is greatly underreported. Currently, there is a whistleblower who receives the reporting information who has sworn under penalty of perjury that there have been 45,000 deaths within 3 days after receiving the "vaccine". She is part of a lawsuit against the federal government. With so many problems, including a high number of deaths, vaccine by force is inhumane. Those who insist on these measures are taking a risk of liability, which I'm sure will be pursued. The drug companies are exempt from liability but companies and organizations are not.
Catherine Beyerle	
Catherine Bybee	This is a personal choice and should stay that way.

Allow employees to decide for themselves and their families what should be put into their own bodies, not the state/county etc. especially considering that the death rate (which is what ultimately matters) is far less than 1%. Stop the forced vaccinations as it is also obvious and scientifically proven that just as many people with the vaccine fall ill due to covid as those who are without a vaccine.

			Christina Huntington	I 100% believe in vaccines. I also 100% believe that they cannot and should not be government mandated. As an adult woman who has a history of deadly allergic reactions to vaccines and regular pharmaceuticals that do not adversely affect most other people, I can speak for those of us who this kind of mandate would be detrimental to our health and wellbeing. In a free democratic country, adults should be able to decide what they do with their bodies and if they are able to undergo a medical procedure based on their unique medical history. If someone was allergic to peanuts, the government should not be able to force them to eat peanuts in order to get to work. It is the same exact thing with any pharmaceutical or vaccine. No one should be forced to take it in order to exist in society if their particular body is not a good medical candidate for it. Not all bodies are the same and not all bodies react the same way to outside substances and that needs to be accounted for. People with allergies need to be CONSIDERED and PROTECTED by the government, just as much as anyone else.
			Christina Linhardt	This would create discrimination on multiple levels
			Christina Main

Craig Eatherly	
Craig Pedersen	Recent studies and reports have demonstrated that vaccinated individuals are just as capable of "shedding" the novel Coronavirus and passing it along to others as those who have not yet received the vaccine. Keep in mind that positivity rate trends in L.A County already suggest that the current Delta variant outbreak has peaked and is on the decline. Please do not be tempted to overreact to the current situation and set dangerous precedent regarding balancing individual freedoms and public health. Do not set the axis point in balancing those things at the wrong point. We are fortunate that in L.A. County the vaccine is available to all who want it and once you have yourself made the decision to be vaccinated, that along with making elections as far as social distancing/mask wearing is all you really can do and all you can control. Let L.A. County's employees choose for themselves and do not make taking the vaccine mandatory and potentially either lose valuable employees or, alternatively, make them resentful of their employer (which will manifest itself in things such as a lesser degree of attention to the job and lessened service to the County's population in the long run).
Craig Strazzeri

Cynthia Taylor	
Cynthia Thayer	<p>This order is written so that there are no exemptions for those that have religious, personal or health reasons not to receive an experimental vaccine. Should an employee have an adverse reaction, will the County be liable for injury and damages to that employee? There are hundreds of health conditions and reasons why an individual may decide with their healthcare provider that they should not receive this experimental vaccine which is currently in clinical trials. Will pregnant women be mandated to receive the vaccine, despite warnings by medical experts that this has not been determined to be safe? Has the vaccine been proven safe and effective for individuals with sickle cell? What about those with copd or blood clotting disorders. What is the purpose of mandating the vaccine? Vaccinated persons carry the same viral load and are equally capable of catching and spreading the virus. Why does the order not allow for exemptions? Why does the order not allow for alternatives to the vaccine, such as maintaining distancing, masks and frequent testing? The County does not have the right to make heath decisions for its employees. Citizens do not throw their rights away just by being employed by Los Angeles County. We have the right to make our own decisions about our bodies. The science tells us that natural immunity is much more robust than a vaccine induced immunity. Will those that have natural immunity be forced to receive an injection as well. Will other vaccines be mandated as well? Who determines which illnesses are dangerous enough to warrant a vaccine mandate? The health professionals all agree that vaccination does not prevent infection. The only promise of the vaccine is that when you do contract the virus, you will probably not have serious symptoms. Why would you force thousands of citizens to receive a vaccine against their will, when it will not stop the spread of a virus? While it has been assumed that those who oppose mandated vaccines are ignorant anti-science, anti-vaccine people, I do regularly receive vaccines for the flu, tetanus and any other prescribed by my doctor, that are not in clinical trials. I do not participate in drug trials. This vaccine has not been given enough time for review and analysis of the data. There have been deaths associated with</p>

Dave Severijn	
Dave Smith	People who have had previous infection of Covid-19 have natural immunity antibody responses. There is no protocol in place to provide documentation to allow the Covid Recovered to demonstrate their natural immunity as sufficient and a non-threat to the public good. I'm afraid prohibiting them basic amenities and as well as work opportunities could be a form of exclusion and discrimination. Antibody tests can show robust antibody protection that they are protected from Covid-19. Natural immunity is acknowledged by the World Health Organisation and many in the scientific community.

David Shem	
David St Pierre	
David Stepanyan	
David Stringer	
David Susman	People are dying from the vaccine. This is an inconvenient truth, even if it's not one that's being reported broadly. People are getting maimed by the vaccine. They are suffering from myocarditis, pericarditis, severe menstrual disruption, bleeding, neurological disorders, heart attacks, strokes -- and death. J&J, Pfizer, and Moderna have no liability whatsoever for any of this. 100% of the medical costs are absorbed by individuals -- and 100% of the pain and suffering, too. Do not mandate this shot. It's dangerous. And to make someone choose between a potentially dangerous procedure and their livelihood -- is cruelty on every level.

Diana Regan	You can't force anyone to get a shot to keep their jobs. It's unconstitutional.
Diana Rivera	The request is inherently dangerous as it breaks an individual's federal right to privacy of medical records and ability to choose medical procedures. Individuals of all stripes have stated that there has been no informed consent, which is imperative for any medical prevention especially those that are considered experimental. The vaccine is an experimental, genetic enhancement injection (see CDC) and many are not clear about the long-term effects that could be dangerous on their health. Further, the intervention is based on a virus and other viral strands that have not been appropriately isolated in clinical studies.

Dinoah G Maya	I should have a saying in what I inject into my body. I will wear a mask for the safety of others but I have already had covid 19 and I survived it. If I contract it again and die is a choice I have made and the consequences are mine and mine alone. If you mandate I get injected and I die from this vaccine then that would be your fault and I will make sure my family sues evert single one of you all for mandating something that has been proven not to work from me contracting Covid 19 again. People that have been vaccinated have contracted Covid 19 and they can spread the disease as much as an unvaccinated person. Follow the science people.
Dionne Muller	
Dionte Marquard	
Dishan Jayasinha	
Dmitry Vakhlis	
Do Mick	
Doctor Lopez	<p>I am a healthcare professional. I have seen vaccine injured patients in my practice, including patients who lost family members to vaccine injury. Vaccines, like any other medication or treatment, carry potential adverse effects. Therefore, it should be up to each person to weigh the risks and benefits of engaging in ANY and ALL kinds of treatments or medication courses along with their health care provider(s).</p> <p>It is also standard ethical practice in the field of research that experimental subjects should always be given the choice to refuse to participate in the experiment or leave at any time without any coercion or negative repercussions. Since this vaccine is only approved for emergency use, in essence anyone receiving it is an experimental subject and should have the right to accept or refuse. Why would the Local Health Department endorse basic ethical violations that go against the Nuremberg Code?</p> <p>In addition, the CDC recently shared research showing that this vaccine DOES NOT prevent transmission and that vaccinated and unvaccinated individuals have similar viral loads when ill with Covid-19. I understand the goal of mandatory vaccination would be to help protect people in contact with others but, If this vaccine does not prevent transmission, what is the logic in mandating it? Individuals should have the right to decide whether they want to minimize the risk of illness, hospitalization or death since it is something that affects them exclusively. There is no harm to others.</p> <p>There is additionally the issue of social justice. If the local health department passes this law, it will be engaging in discriminatory, segregationist practices. How is discriminating on the basis of medical choice and providing unvaccinated individuals with differential treatment any different that discriminating on the basis of color, sexual orientation, nationality, etc.?</p>
Dolly Buchanan	Violates medical freedom. I'm vaccinated and now I have to be tested weekly

Elida Rodas	
Elisa Jimenez	
ELisa Lesaguis	MEDICAL FREEDOM AND A CHOICE! requiring this is Unconstitutional & discriminatory across the board. This is another way to segregate and in the name of "health".
Elisa Stern	Our bodies our choice. Illegal to force a non FDA approved vaccine on anyone. Was not a condition of hire. You can't change the rules in the middle of the game. You will lose half the County workforce if you push this. Everyone is ready to walk out and leave County. There are more deaths and adverse effects from this injection than all other vaccines combined to date. Other vaccine trials are halted after 25 deaths. VAERS has over 12,000 deaths reported and the study that Harvard just did states they believe the reported number to VAERS represents 1%. Do you want more deaths on your hands?

Elizabeth B Newstrom	
Elizabeth J Interrante	
Elizabeth J Verniere	
Elizabeth M Copas	
Elizabeth M Zacharias	Vaccination mandates and all other forms of coercion are unconstitutional, against the Nuremberg code, and a violation of each citizen's God given rights to bodily autonomy and personal sovereignty. It is foolish to think that if we hand these rights over to government authority instead of leaving them in the hands of individuals, that government medical overreach will be limited to the Covid-19 vaccines. Additionally, many of the individuals who choose not to receive the shots have robust, long-term natural immunity due to previous infection and so forcing shots is unscientific. Many others have valid medical contraindications and philosophical or religious objections, making these mandates discriminatory.
Elizabeth z Mcdonnell	
Elle C	Choice is important. The COVID-19 Vaccines have caused severe adverse side effects, life altering problems, and death. I absolutely understand the concern, but this is a person's medical decision and should not be a condition of his/her/their employment where other safety measures can be implemented such as commonly known safety protocols (handwashing, multi layered masking, cleaning, social distancing, etc.), periodic testing within reason, and self-attestations/having candid conversations about matters before/after travel. There is no liability for side effects-the liability is on the person and may mean that person is unable to work. I have safety procedures in place and know others that are doing the same. Thank you
Ellen Davis

Elsia Flores	
Elsie Ramos	
elsie C Hughes	
Elva Coats	
Elvia Amesquita	
Elvin Apelian	
Elvir Sosa	Absolutely oppose this over reach of the BOS. There is too much evidence showing the dangers of the vaccine and its side effects. The deaths related to this vaccine within the last 6months far exceeds any vaccine used over the last 4 years. I didn't serve this great country in the Marine Corps so this BOS can violate my Constitutional Rights as a human being.
Elvir Sosa	Forcing people to do things against their will is called dictatorship. I didn't serve in the Marine Corps to have my personal freedoms trampled on by a board of individuals. There is too much evidence/ research showing the harms of this Emergency Use vaccine & even if you choose to get it you can still spread it and infect others. Natural immunization is a better option compared to the amount of deaths related to this vaccine.

Eric Cohn	This would be unconstitutional if you pass and you know this!!!!
Eric Deutsch	
Eric Fonoimoana	
Eric Grodan	<p>Out of all the vaccines I have had in my life....tetanus, measles, polio. I have never witnessed the indecisiveness over a vaccine that says I would have to wear a mask and socially distance even when fully vaccinated. Or that I could still contract or spread the virus even when fully vaccinated and that it needs a booster after 3-6 months. I've never been bribed with beer, donuts, lotteries, gift cards or cash to take a vaccine. I was never judged if I didn't take it. I WAS NEVER DISCRIMINATED AGAINST FOR REGULAR SERVICES. Of the vaccines I listed above, I was never told I was a bad person for not taking it.....or taking it for that matter. I have never seen a vaccine that threatened the relationship between a family member and/or a close friend. I HAVE NEVER SEEN IT USED FOR POLITICAL GAIN. I have never seen a vaccine that I had to worry about mix and matching and yet told it's ok to do it one day and then told the next day not to do it...then on and off, on and off, again and again. I HAVE NEVER SEEN A VACCINE THAT THREATENED SOMEONE'S LIVELIHOOD, TRAVEL, SCHOOL, JOB ETC. I have never seen a vaccine that allows a minors consent to supersede his/her parent's consent! So, after all I have shared, can someone tell me I am a conspiracy theorist, selfish, uneducated, non researched, not following the "science" for not willing to take this vaccine UNTIL the clinical trials are over at least two years from now?? Finally, after all the vaccines (shots) I listed above, I have never seen a vaccine like this one that discriminates, divides, and judges a society such as this one. This is one powerful vaccine! It does all these things that I mentioned and yet, It doesn't do what all the other vaccines (shots) that I mentioned earlier were designed to do (and successfully achieved, I might add) which is.....fight off Covid 19 that you have an extremely high chance (99.8%) of recovery from. I Understand this is not about my health! If it was, they would not censor professionals and scientists who have contrary opinions. If it was, they would investigate thoroughly the over 11k deaths reported and over 500k adverse events following the shot If it was about your health, they would not be censoring world renowned doctors who have developed treatment protocols with great success for Covid positive patients. In fact one was nominated for a Nobel Prize. If it was about health they would not be sacrificing our young people( no risk) to protect others. If it was about health, informed consent, individual choice and privacy would</p>

	<p>be important. If it was about health, then freedoms would not be suspended for choosing to put off the shot. If it was about health why are college students taking the shot because they are being coerced with threats of limited freedoms and inconveniences and NOT for better health. If it was about health they would stop using the faulty PCR to measure infection NOW and not wait until the end of the year. Please do not pass this ordinance that obviously is not about health. If you pass this you will be on the wrong side of history. You will be responsible for more Angelinos being out of work. More people spending their money outside of LA County. And you will also be responsible for any injury or death that is the result of people taking this vaccine because they have no other choice.</p>

Erin DiMaggio	Covid-19 is a seasonal virus like other respiratory viruses - the SARS-CoV-2 virus is not stable and will require ongoing boosters - Covid-19 is a personal health issue due to chronic inflammatory issues mostly due to lifestyle change bruce's diseases. The vaccine has not been proven to be effective in immune comprised individuals - the CDC has stated that vaccinated individuals can carry the same viral load as unvaccinated-Coercing and forcing people to be vaccinated for a virus that is seasonal is blatant fraud and medical coercion to receive a drug that has been proven to not stop transmission- stop the fraud!
Erin Dyer	Adamantly oppose!

Garrett Branch	We all worked the last year with little regard for our safety from the county. None of us should have to be forced to take a vaccine that doesn't stop you from getting covid but also makes you more likely to be a carrier of the delta variant. It should be our personal choice.
Garrett Horton	
Garrett LaRue	I apposed this unconstitutional forced mandate of the covid vaccination.
Garrett Lilley	The Sars Covid-2 corona virus (Covid) is spread by aerosol particles which are small enough to go through every mask that is available according to three studies conducted by the NIH and are worthless at stopping the spread of Covid. Much like the common cold, influenza, and respiratory syncytial

virus, Covid has animal reservoirs, meaning that it cannot be eliminated by way of vaccine and it will continue to circulate throughout the year regardless of how many people are vaccinated. Vaccination changes nothing about the transmission of the virus. Why are we doing things for Covid that we did not do for the common cold, influenza, and respiratory syncytial virus? Typically, respiratory viral syndromes breakout during the winter months when individuals have low vitamin D levels and their immune systems are lower. If the vaccine is so effective, why are we having a respirator viral breakout during the middle of the summer when respiratory viruses don't do that? It's because of antibody mediated viral enhancement. This is a condition that happens when a vaccine is created and used incorrectly and causes the immune system to fight the virus the wrong way and makes the individual to be more susceptible to infection. This causes the infection to be worse than it would have been with native infection. That is why we are starting to see an outbreak happen in the middle of summer. That is why 75% of the people that were infected in the Barnstable County, Massachusetts outbreak were fully vaccinated. Therefore, there is no reason to treat anyone vaccinated differently than anyone who is unvaccinated from a medical perspective. No vaccine, even more common non-experimental ones, ever stops infection. It merely reduces symptoms for the vaccinated individuals. You can learn more about this topic from Dr. Dan Stock practicing in Indiana. Furthermore, you are creating a system that is illegal, immoral, and unethical. The system clearly discriminates against minority groups who have lower uptake for vaccination, against individuals who cannot take the vaccine for medical or religious reasons, and against those who are morally opposed to the vaccine. The Covid vaccine is currently only under an emergency use authorization and has no long term studies that show long-term side effects. The Nuremberg Code clearly states on experimental treatments, "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision." I emphasize the follow, "without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion." These laws are a form of coercion of the worst kind. You are taking away people's abilities to living and work in a free society. Thank you.

Gary W Brown	Freedom of choice is an integral part of our Constitutional rights. Never before has a government so blatantly considered abrogating those rights! Where does it end? Not well, I can assure you. Fear has a way of separating the weak from the strong. A dog, sometimes, bites from fear. Lack of clear science is obvious, creating confusion and doubt. The FDA has only conditionally approved these vaccines, to date, based on emergency status. Forcing people to get vaccinated or lose their job is heartless and unconstitutional, in my opinion. If they are allowed to get a weekly Covid test, who pays that cost? We now have "therapeutics", that appear to work even if exposed to the virus. Monoclonal antibody's is just one of many. It's time to get politics out medicine.
GAUDENCIO T LONTOK	
Gavin Calder	
Gavin Robinson	
Gavin Starr	Protect the job of people who can't/don't want the vaccine. People should have freedom and liberty to make that choice themselves.

	people. What if someone you love, such as your son or daughter, parent, siblings or spouse be the next to die or have a severe negative reaction to the vaccine, because they felt forced to vaccinate. With if they were not giving a choice and happen to be that 1 out of 100.. How would you feel then mandating this? Let people decide for themselves what they choose to inject in their bodies, not by governmental money hungry, power driving evil people. Do what is right and oppose the mandate!! The economy will be worse in California if you mandate this, a lot of people have already left California. Hold up the state by doing what is right..

CDC: 11,940 DEAD 618,648 Injuries And 1,175 Unborn Babies DEAD Following COVID-19 Shots

European-Unions-Database-of-Adverse-Drug-Reactions-for-COVID-19-Shots-20595-DEAD-and-1.9-Million-Injured-50-SERIOUS

CDC Director Tells CNN The COVID Vaccines Can't Prevent Transmission

A study published by the Centers for Disease Control and Prevention (CDC) on July 30 found that 397 children between the ages of 12 and 17 were diagnosed with heart inflammation called myocarditis after receiving the Pfizer-BioNTech coronavirus (COVID-19) vaccine.

In spite of these U.S. Government CDC-verified facts regarding the experimental COVID-19 shots, not only are they continuing to administer them, but the big push now is to MANDATE them as a requirement for employment in both government and private sector jobs.

And so far, at least, it seems that the majority of the U.S. public is willing to comply and participate in what can only be labeled mass genocide.

- I know that if someone is not a licensed physician, such as a legislator, employer, bureaucrat, school administrator or other, they may not administer medicine at all, much less "mandate" medical treatments for the general population or any group.
- Your ignorance of vaccine hazards and medical rights and your inability to understand the facts above do not give you any immunity or any license to commit the crime of forced or non-consensual medication.
- I know that in many cases vaccines cause more harm than the disease they are intended to prevent.
- Anyone who claims privilege to inject materials in my body without my consent is wrong, is my enemy and is criminal and is subject to deterrence by any means necessary.
- I will treat anyone who threatens to violate my body as a criminal assailant.

Your inferred or stated "requirement" that employees accept medical treatment as a condition of employment is unlawful and constitute grounds for major remedy to employees wrongly coerced.

International law, Geneva conventions and the Nuremberg Codes, to which USA is a signator, prohibit coerced and forced medical treatments and any non-consensual medical treatment/s specifically including "vaccinations." This is especially true of experimental vaccines and vaccines that have not had full testing processes and have thereby not been proven safe. "Covid-19" vaccines are not vaccines, are experimental, are untested, have not had standard FDA process of approval, and are not shown to be safe. Various other Constitutional and Statutory authorities also support public protection

Jason R White	Mandating an experimental medication is a strict violation of the Nuremberg Code section 1. It requires test subjects to volunteer. Mandating an experimental medication or taking away the option of employment should the subject declines involves you in the act of coercion. Enough VAERS reports have come in to also invalidate the continued vaccination of any subject based upon the Nuremberg code section 5. Treatments that have for over a year been made available by only a fragment of medical professional have proven to substantially lessened the risk of fatality due to the CV-19 disease. Mandating the experimental medication thus violates the Nuremberg Code section 6. Nuremberg Code attached for reference.

Jean Escalera	
Jean Gilliam	
Jean Leigh	Many employers are trying to deny employees' right to choose their right to bodily integrity by requiring EUA Covid-19 vaccines and testing as a mandated condition of employment. Under EUA, however, such requirements are in a violation of the law. Mandates are also a violation of fundamental human rights. The provisions of the 2005 Public Readiness and Emergency Preparedness (PREP) Act and a February 2020 declaration by HHS mean that pharmaceutical companies cannot be held liable for injuries or deaths caused by EUA Covid-19 injections. However, other companies, institutions, and individuals can be held liable. Is LA County prepared for this liability? There have been deaths caused by the Covid 19 as well as other serious reactions compiled on the CDC VAERS website. When there is any risk to a persons health from a medical intervention, there should always be a choice. LA County is working on taking this choice away and it is wrong.
Jean Maddox	Too many health risks to force people to take the vaccine. It is against their rights to be force to take an experimental drug. Everyone needs the choice for their body without fear of losing their job.

Jen Ho	
Jen Lave	Why is the city not letting people gather their own information and trust their own intuition on this non FDA approved experimental vaccine. Where there is risk, there must be choice. The city of LA is setting a precedent that may trickle to other cities or businesses and pretty soon there will be no place to work in the city for us who cannot take the vaccine.

Jenifer Arizaga	
Jenifer Rooke	No mandatory vaccines ever!!!
Jenifer V Johnson	
Jenn Abdelmessehe	I have had many vaccines. But this vaccine or gene therapy which you should call it is a new technology. NO LONG TERM STUDIES EXIST. When they tried to create MRNA vaccines in the past they never made it out of animal trials. I do not believe it is right to mandate a new vaccine with no LONG TERM STUDIES. You must uphold personal and religious beliefs for this. Half the population does not feel comfortable taking it yet. This kind of overreaching mandates will have devastating effects.

Julie Merckell	
Julie Muer	
Julie Perkins	Data clearly shows that the COVID vaccines are not effective against preventing the disease. They are only effective in lessening the severity of the symptoms. Therefore, mandating vaccinations will NOT reduce the spread of COVID-19 or its variants. As such, it should be up to the individual to assess their own health risks when deciding whether or not to get vaccinated. In addition, those who have already had the disease should count as being vaccinated as they have acquired the desired immunity naturally.

	I believe other vaccines in their early stages (similar to the Covid-19 vaccines) were actually pulled from availability due to small numbers of deaths and deemed unsafe. This should be no different and with so much more still to learn on these vaccines, mandatory vaccination is a tremendously irresponsible decision. If the vaccines are effective, it should not matter if vaccinated people are around unvaccinated people. It should be individual choice until all risks and personal safety can be thoroughly known. period.

Justin S Shakoori	Respect peoples rights, you tyrants. We should not even need to be talking about this. Stay out of my business and life. It is my body my choice. This goes against my religious beliefs respect that right. You mean to tell me to get a mandatory vaccine, while you guy's try to censor people and take our guns away get lost and resign. The vaccine went from safe and effective to now it is the better choice. There have been many who have died form this vaccine. Democrat's and the CDC keep messing around with facts and data. I will not take a shot for something that was created in a lab. California was such a nice place and you guys really had to try to screw it up. But now you have a chance to try and head in the right direction of respecting peoples rights but it does not seem like you are after having this meeting secretly and the fact that we have to talk about this. Lets face it you bastards already have your mind made up. Why are you guys okay with discrimination. I believe people who have not taken the vaccine have been treated worst than slaves have. You all need to wake up and stop playing these dangerous political games.

Kaitlin Packer	THIS IS NOT OK! We have rights! Everyone is my body my choice until it comes to this. Magically now people don't think we should have the right to decide what goes in our body?? Over a vaccine that is causing more harm than good?! People being hospitalized after taking the vaccine in so much pain saying "good thing I got the vaccine who knows how much worse it would have been " when in reality the vaccine is most definitely the very thing putting them in the hospital! Literally almost every person I know who has had the vaccine has been sick with COVID! We are NOT a communist country but with this it's the start and dangerous path to one. If our country is telling people they have to do something to their body in order to work is insane and is anti American! You guys struggle enough getting people to get off their high horse to actually go and work. Imagine this. Good luck getting ANYONE to work. I know people who would rather die than get this vaccine. DO NOT FORCE THE AMERICAN PEOPLE TO GIVE UP THEIR OWN RIGHTS TO HAVE TO WORK FOR YOU PEOPLE!

Kameron Moise	
Kami Lawrence	
Kamilah Davis	
Kamilah Harris	When it comes to vaccines, it should be by choice even for government employees. Mandating people to get jabbed with emergency rushed experimental vaccines that mainly benefit the pockets of big pharma is ridiculous. If people choose to not be vaccinated because they do not trust the government and/or big pharma, then that should stand. Shot mandates are authoritarian, fascist, and Un-American when it comes to rights to body autonomy. Mask mandates are better. Just let us live with that. Do not go extremist. This is supposed to be a democracy and mandating vaccines are also undemocratic. People have gotten Covid, been hospitalized, and/or died even in the case of being fully vaccinated so mandating vaccines will cause more people to not trust the government on anything. This will include this Board of Supervisors.

	<p>Further, both Pfizer and Moderna's own SEC filings with the government state that all mRNA products are currently classified and considered gene therapies by the FDA. This has not been properly disclosed to the public, which is an egregious violation as the Pfizer and Moderna cannot even be considered vaccines in that respect; they are gene therapies. You cannot mandate experimental gene therapies. See especially pg. 21 of the Pfizer SEC filing: <a href="https://sec.gov/Archives/edgar/data/1776985/000119312519241112/d635330df1.htm">sec.gov/Archives/edgar/data/1776985/000119312519241112/d635330df1.htm</a> And pgs. 69 and 70 of the Moderna SEC filing: <a href="https://sec.gov/Archives/edgar/data/1682852/000168285220000017/mrna-20200630.htm">sec.gov/Archives/edgar/data/1682852/000168285220000017/mrna-20200630.htm</a></p> <p>Further, data is emerging demonstrating that these injections may not prevent transmission or spread of Covid and therefore mandating them may prove futile as vaccinated people can still carry the same viral load as an unvaccinated person (Dr. Fauci) and therefore would pose the same risk of spreading it as an unvaccinated individual.</p> <p>I am vehemently opposed to all Covid-19 vaccine mandates.</p>

	It is a violation of laws requiring my medical information. In the 33 years of county service I have never had such anxiety to report to work as during covid 19 and even more so with the suggestion of LA County requiring the vaccine. It is hard enough with the Board of Supervisors defunding our Department and increasing our workloads with less supplies and less people to accomplish the same service, but to require us to have a vaccine that has not been studied to see what the long term effects on us are is mind boggling. If I take the vaccine and I have a bad reaction or die from an allergic reaction to this vaccine will the Board of Supervisors take care of my family in my absence? I PRAY that the Board of Supervisors will actually follow the science and not mandate that all employees have to take the covid19 vaccine. Even if you allow medical excuses the covid 19 vaccine is SO politicized that many Doctors are refusing to get that note even when it is warranted.

Lauren Eden	I oppose this employee vaccine mandate. Many county employees have been on the frontline of the covid19 pandemic from day 1. While we all stayed home, they sacrificed, worked harder than anyone else, quarantined away from their families, and were exposed time and time again. Yet, how are you planning to thank them...by demanding they vaccinate to keep their jobs? Unbelievable! You propose that this mandate will protect the employees from transmitting the virus to each other and to the public, yet we know that vaccinated individuals are still transmitting the virus! Also, where are you accounting for those who already have natural immunity from infection? Will you be offering alternatives to vaccination? Science is proving that natural immunity is just as effective, if not better, at preventing infection! Vaccines are not a one size fits all! An employee should weigh the risks and benefits of

Lora A Johnson	
Loralee Padilla	We should all be free to choose what medical procedures we want to participate in. Coercion is not consent. This virus is not going to be eradicated from our planet by way of vaccine use when the vaccine doesn't prevent transmission. It is impossible to achieve herd immunity, without actual immunity, the vaccine doesn't provide immunity. Mandates are dividing this country.
Loren C Brooks	
Lorena Duran	
Lorena Duran	Every person should have freedom to choose what is put into their body. Mandates are dictatorial especially when there hasn't been clarity or transparency regarding "all" the science! If county employees have serious adverse reactions to these vaccines will the county compensate them for life???
Lorena Martinez	Vaccinated are responsible for more variants, not helpful
Lorena Tassi	
Lorenzo Arnold	Its a personal choice
Loretta Ferem	
Loretta Gardea	
Loretta Victoria	
Lori Brockman	
Lori Carrizosa	
lori dennis	The vaccinated are still catching and transmitting, so forcing to vaccine to stop transmission does not work.
Lori Elmore	Let us decide what goes into our bodies!
Lori Farmer	
Lori Gabbard	
Lori Hibbard	
Lori Hurley	
Lori Martin	No vaccine
Lori OBryan	1. Vaccinations will not keep people from getting Covid 19 or any of its variants. 2. Many have had Covid and have a better, safer immune response than any vaccine can provide. 3. They have had their chance to vaccinate if they need it. Let them live with the consequences.

Maile Hanoian	
Mais Agajanyan	
Maisie L Gutierrez	
Maja Nuoffer	
Maja Trochimczyk	It is proven that Covid-19 "vaccine" does not protect from Covid-19 infection, more than 75% of newly hospitalized with Covid-19 have been fully vaccinated (data from various states, Israel among others, and Gibraltar where 100% residents were "vaccinated" and infections rose recently by something like 2500% among the vaccinated. It is a betrayal of the citizens living in L.A. County to put this motion forward, something on a par with apartheid, or other incredibly evil segregation and coercion "rules". There are major lawsuits proceeding now against "emergency authorization" of this genetic experimental injection to modify human DNA - e.g. by Frontline doctors, a group of physicians faithful to their oath, doctors with wisdom and conscience. I hope that LA County BOS shows that they are not corrupt, not bought by big Pharma, and that they will not betray citizens that voted for them, so they will stop this and any other mandatory "vaccines". It is well known that mandatory medical procedures under coercion and duress were done in Nazi German concentration camps. My mother's uncle, a Catholic priest, Father Wajszczuk was murdered in one of these experiments in Dachau. None of the Supervisors individually have a right to conduct medical experiments on county employees leading potentially to murder or manslaughter of employees of the county of Los Angeles. VAERS shows that over 12,000 people died; swine flu vaccination was stopped when 46 died. If the Supervisors proceed, they will put themselves on a par with the worst criminals of last century. Please note that the Nuremberg 2 trials have also began in the Hague, with CDC, WHO, FDA, Gates and GAVI as defendants in this global genocidal crime.

	are not dying from this. End the tyranny. This is not based on what this country was founded.
Mandi Bennett	This is not Nazi Germany, history repeating itself in the form of show me your papers. Everyone is entitled to make their own decision what to put in their bodies or not to. How dare you publicly praise them during the height of the pandemic for working with only a mask and now telling them a mask is not enough and now you want to require a vaccine that does not even protect them from getting covid. Newsflash! The ones getting covid right now are fully vaccinated!! And who cares if they are. We need to treat it as the flu because Fauci was part of releasing it to the public and it's here to stay so let's stop with the totalitarian methods of enforcement.
Mandi Lewis	
Mandy Black	It's experimental!! It's unconstitutional!! It's medical tyranny!
Mandy Christensen	I support medical freedom, especially for a vaccine that has not gone through extensive trials and has caused thousands of injuries and deaths.
Mandy Dofflow	
Mandy Herrera	
Mandy Lovelace	Let everyone make the decision about what is best for themselves. Absolutely no mandates. The liability you opine yourself to with this is going to be extremely expensive and not worth it in the end. Don't use mandates, people have many different backgrounds and reasons they say yes or no to these things, and that should be respected. You will be forcing many people out of their jobs, it's just not right, you guys are not doctors, you do not know what is best for every single person.

Manijeh Abt	
Manny Barrios	<p>This is inviolation of Civil Rights Act of 1964, in violation of HIPPA regulations, and is also in violation of the right to consent.</p> <p>COVID-19 is incorrectly identified as a vaccine, it is better identified as a therapeutic. It does not prevent COVID but rather treats COVID symptoms so they are less severe.</p> <p>You can still catch COVID if you are vaccinated by any of the three vaccines currently in circulation in the US.</p> <p>Natural immunity to COVID is 99%....the best vaccine effectiveness is 95%. The vaccine would then suppress our body's natural ability to fight off this</p>

virus if taken.

You quarantine the sick, not the healthy.

Masks cause more longterm harm than the short term affects of COVID. You are forcing the population to breathe in their own waste (CO2) which deprives our brain of the oxygen it relies on to function properly. The best 3M N95 mask on the market discloses on its packages that it does not protect against viruses, so why are we forced to wear masks for prolonged period of time? They protect no one but isolate everyone and spread fear into the general population.

The current spike in COVID can be attributed to the Southern border crisis that no one is covering. Hundreds of thousands of immigrants are being allowed to enter our country without being tested for COVID and released into the general population.

The US citizen and its residents are not science experiments for government officials to gamble their lives away. You all are our employees, you work for us and answer to us...not the other way around. This is tyranny.

Have the courage to stand against this course of action and allow people their inherent rights to freedom.

If people who want the vaccines are free to choose that option without infringement, then those who do not wish to be vaccinated should be free to choose their option without infringement.

People who are vaccinated have nothing to worry about because they received the vaccine. Those who choose not to be vaccinated only affect themselves.

Freedom of choice applies in this instance as well.

Lopez	CONSIDERED FOR A DISEASE WITH A NEAR 100% RECOVERY RATE. People have a right to chose how to care for their own bodies... STOP THE TYRANNY AND OPPRESSION NOW! Have we NOT LEARNED from History at all? Nuremberg Code 1947...the right to Informed Consent and to reject UNWANTED MEDICAL PROCEDURES. The County WILL BE LIABLE for injury or death.
Margarit Gabrielyan	
Margarita Bedoy	
Margarita Chambers	
Margarita Malia	Violation of basic human rights
Margarita Rizo	It should be a choice not forced. NUREMBERG violation
margarita romero	
Margarita Sarkisian	
Margarita Skuratovsky	<p>The vaccine should be provided on a voluntary basis. There is no reason why people who have been ill with Covid or who have natural immunity to it need to be forced to be vaccinated.</p> <p>The Vaccines are unapproved, inadequately tested, experimental and dangerous biological agents that have the potential to cause substantially greater harm than the SARS-CoV-2 virus and the COVID-19 disease itself. According to data extracted from the Defendants' Vaccine Adverse Events Reporting System ("VAERS"), 99% of all deaths attributed to vaccines in the first quarter of 2021 are attributed to the COVID-19 Vaccines, and only 1% are attributed to all other vaccines. The number of vaccine deaths reported in the same period constitutes a 12,000% to 25,000% increase in vaccine deaths, year-on-year. The Vaccines appear to be linked to a range of profoundly serious medical complications, among them myocarditis, miscarriage, irregular vaginal bleeding, clotting disorders, strokes, vascular damage and autoimmune disease. Meanwhile, Pfizer, Moderna and Janssen enjoy statutorily conferred immunity from liability for any harm caused by their experimental products.</p> <p>Additionally there has never has been, a bona fide "public health emergency" due to the SARS-Cov-2 virus or the disease COVID-19. Virtually all of the PCR tests were calibrated to produce false positive results, which has enabled the Federal, state and local governments to publish daily reports containing seriously inflated COVID-19 "case" and "death" counts that grossly exaggerate the public health threat. Even assuming the accuracy of these counts, we now know that COVID-19 has a fatality rate far below that originally anticipated - 0.2% globally, and 0.03% for persons under the age of 70. According to the CDC, 95% of "COVID-19" deaths involve at least four additional co-morbidities. The benefits of the Vaccines when used to diagnose, prevent or treat COVID-19, do not outweigh the risks of these experimental agents. There are multiple adequate, approved and available</p>

Maricar G Trinidad	
Maricela Castillo	<p>The first basic principle stated in the Nuremberg Code of 1947 says as follows: The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment.... It is primarily for this basic principle that I firmly oppose any forced mandate to be vaccinated against my will as a human being fully capable of making independent decisions, free from coercion in any form, about what to allow in my body. Voluntary consent to participate in experiments affecting the human body is a must. My moral conviction about voluntary consent is strong and non-negotiable. Thank you for your sincere consideration on this important human rights matter.</p> <p>Sincerely, Maricela L. Castillo</p>

Mario Cruz	
Mario Currado	I absolutely oppose mandated vaccination in any form. It is discriminatory as well as LEGALLY and MORALLY wrong. Forcing or coercing anyone to be vaccinated is a violation of human dignity and freedom. Every person and every employee should be free to decide IF and when they want the new covid vaccines. We demand that you rescind the emergency order immediately!
Mario De Santiago	
Mario Garcia	
Mario Gutierrez	LA County shall not mandate the Covid vaccine for their employees. Employees have a right to medical privacy and protection of private health information.
Mario Gutierrez	Los Angeles County shall not mandate the covid vaccine for employees. Employees have a right to religious freedoms, medical privacy, and protection of private personal health information.
Mario Martini	
MARIO NATIVIDAD	<p>I have been on the front lines for over 20 years. I work hard to treat each patient like family. Furthermore I am willing to risk my life daily to take care of the public of Los Angeles County. Many healthcare workers in the County of Los Angeles feel exactly as I do. Over the last year and a half we have been the first contact in many covid patients. Many of us have contracted covid and recovered. I contracted Covid and recovered. My wife and family contracted Covid and recovered. I have been in contact with hundreds of Covid positive patients since then.</p> <p>After all that I have sacrificed I am placed in a position where I feel I am being discriminated against by my employer. Why? Because I do not want to take an unnecessary medical treatment. I am one of thousands who will not receive this vaccine. The vaccine does not prevent infection nor transmission. Within our Fire stations we have already had fully vaccinated Firefighters infecting others</p>

	<p>around them. Why do I need to get vaccinated if it does not stop transmission? Furthermore, recent studies have shown that people who have recovered from Covid get no benefit from vaccination at all, no reduction of symptoms or hospitalizations. Besides not benefitting from vaccination, there is more we dont know because we have not had enough time. Whats the risk for long term adverse affects? We dont know. Whats the risk for cancer after the shot? We dont know. Whats the risk for auto immune disease after the shot? We dont know. What are the long term reproductive affects? We dont know.</p> <p>Please do not discriminate against those who have natural immunity. Please do not force me to take an unnecessary vaccine. It is my body and should be my choice. I urge you to oppose this vaccine mandate, and instead return to a common sense, public awareness approach, informing employees and residents of the pros and cons, and letting individuals make the best decision for themselves.</p>

Marta E Pena	I oppose any vaccine mandates on anyone. Medical freedom is essential and a right in our country.
Marta L Guzman-Garcia	Mandating Covid vaccine for LA county workers would violate the Equal Employment opportunity guidance stating that employees may be exempt from the employer vaccination mandate under the Americans with Disability Act if the employer does not consider reasonable accommodations for its employees. Under Title VII employers are required to accommodate an employees sincerely held religious belief practices or observances which includes declining a vaccine that uses cells of aborted fetuses for research and development. Requiring a Covid vaccine for L A county employees would create a working caste where those who aren't able to take the vaccine for medical or religious reasons would be limited and possibly discriminated in the long run.

	standing in hospitals waiting to unload them. I always knew there was a risk in my job, I always knew I could get sick from a patient. Covid was just another cough or fever call for us. After 9 months I finally caught covid and had very minor symptoms like the vast majority of other fire fighters. Never once in the year and now more of covid did you, the state, or the medical director offer any advice for life style changes. No calls for healthy lifestyle choices, no Zinc, no Vitamin C or D. Some of the easiest and cheapest prophylactic treatments for covid known early on from the beginning. But now, now you are about to stampede our medical rights to force an experimental MRNA treatment (not a vaccine) onto me and my fellow first responders. We are saying NO. NOT NOW. NOT after FDA approval. We are adults and have deep understanding of our rights as humans. Thank you for the offer but NO.
Matthew Nazarians	
Matthew Onda	
Matthew Paul	I am vaccinated and believe it is every persons right to choose!
Matthew Prasch	
Matthew Roberts	No individual should be forced to take any pharmacological product, particularly one which the manufacturers have no legal liability for. There is always some risk associated with vaccines, no matter how small, so on that basis it has to be individual choice
Matthew Ryan	Strongly oppose
Matthew Samuel	
Matthew Sardisco	
Matthew Sims	This is wrong, against all pre-existing civil liberties and American's with disabilities!! This cannot stand and you should be ashamed this is even on the docket!
Matthew Thompson	
Matthew Torres	
Matthew Wachtfogel	
Matthew Walsh	Pro choice
Matthew D Reeves	
Matthew J Prasch	
Matthew L Ahmadi	Mandating this vaccine is equivalent to taking away humans rights to decide what is best for themselves and their family.

Megan Trott	
Megan Waugh	<p>1) The vaccine is not FDA-approved.</p> <p>2) Long-term side effects of the COVID-19 vaccine are unknown.</p> <p>3) Short-term side effects of the COVID-19 vaccine are disregarded, dismissed, downplayed, or censored.</p> <p>4) Presently, the effectiveness of the vaccine is unknown in stopping the spread, or contamination of COVID-19. Vaccinated individuals contract and spread COVID-19. It seems that the COVID-19 vaccine decreases the likelihood of death, but the likelihood of death upon contracting COVID-19 is low regardless (2%-3%) so it is hard to determine whether the low death count is the result of the COVID-19 vaccine, or because the virus already has a low death rate.</p> <p>5) COVID-19 and its variants are mild viruses with a death rate of 2%-3%. Presently, it is unknown whether the risks of the vaccine outweigh the risks of COVID-19 and its variants.</p> <p>6) Concerned regarding social unrest and violations of First Amendment rights. Information suggesting that the vaccine may not be effective, may be harmful, or that there may be other alternatives are often censored. This lack of information and subsequent censorship breeds mistrust.</p> <p>7) Concerned that this is driven by financial incentives/motivations for the Pharmaceutical companies producing the COVID-19 vaccine.</p> <p>8) Concerned that there is essentially no liability upon the government or the Pharmaceutical companies for injuries resulting from the COVID-19 vaccine. Currently, there is no liability for the long-term negative side effects from the COVID-19 vaccine for the government, or the Pharmaceutical companies. This is especially concerning in light of the opioid epidemic which has resulted in 841,000 deaths since 1999, and has resulted in billions of dollars in punitive lawsuits against Pharmaceutical companies.</p> <p>9) Concerned that there is no religious exemption.</p> <p>10) Concerned that there is no medical exemption for individuals at-risk.</p> <p>11) Concerned that this will begin to close the door to "my body, my choice", and how the mandated vaccine may be subsequently be used to justify infringement upon rights related to abortion and birth control, or other health care decision rights.</p>

Michael Delgado	
Michael Deschamps	
Michael Diaz	
Michael Fernandez	
Michael Fisher	The CDC has announced that the covid 19 vaccines do not help with transmission thus making a mandate have no basis and is a discriminatory basic violation of human rights! It's experimental, and has many 1000s of deaths with a fraction reported by VAERS. Ivermectin has 70+ studies showing effectiveness, more effective than the "vaccines". Don't commit this fraud and become a criminal, please.
Michael Garibay	
Michael Genazzani	
Michael Goodrich	Should be individuals free choice.
Michael Green	
Michael Green	<p>There are lots of medical &amp; scientific reasons not to take the Covid-19 vaccines:</p> <p>Inventor of mRNA vax technology Dr Robert Malone MD said he wished he did not take the Covid-19 vaccine. He blows the whistle and says the Covid-1984 vaxes should be stopped. As I predicted Google/Youtube deleted this important video. Please watch on bitchute via this link below while you still can. Google co-founder Sergey Brin was born in the Communist Soviet Union: he should know better.</p> <p>URL of video:</p> <p><a href="https://bitchute.com/video/SjOH3w7AVXFq/">bitchute.com/video/SjOH3w7AVXFq/</a></p> <p>MDs &amp; scientists have said the deaths were already going down before many people had the Covid-19 vaccines. The lower Covid case &amp; death counts are not a result of the vaccines according to many scientists &amp; MDs: the lower counts are from herd immunity already reached by early this year &amp; by effective &amp; better treatments being used on patients more often by Jan of this year which brought deaths down. Also, warmer weather starting in the spring brought deaths down by the time a lot of people took the vaccines.</p> <p>Very credible video testimony including a biologist with a background in immunology and an entrepreneur who has been funding scientists studying repurposed drugs to end the pandemic. They show evidence of the vaxes causing many more than the 7000+ deaths reported by the CDC's chaotic VAERS, lack of safety review &amp; testing of the Covid-1984 vaxes, how the gene therapy in the vaxes dangerously moves throughout the body, masks, positive evidence on low cost treatments. &amp; censorship of credentialed</p>

Michelle R Rodriguez	
michelle s van arendonk	What have we become? Grandparents all over the world sent their children to almost certain death to fight in wars just to preserve the IDEA of freedom. It was worth every risk. Even death. Now a miniscule risk, a 0.04 chance of getting hospitalized, is an excuse to take away those very freedoms we died for. You want to remove body autonomy and segregate the "undesirables" from the population? Anyone with common sense can see how absurd and divisive this is. Your soul is at stake if you come for the kids next...especially since we know that the vaccine is a risk to them, whereas the virus is not. Not one child should be sacrificed so adults can feel safer. If we do that, if we put children at risk so that adults can feel less fearful, then we are not a species worth saving. It goes against nature. So does removing autonomy over our own bodies. What kind of society would agree to not allow people to make decisions as to what they want to inject into their own bodies. A person knows their own health, should take their own risks. If the vax worked as planned, we can let people decide if they want to risk their health in taking this experimental vax.

Mike S	Front line workers like myself have made it their lives work to provide high quality care for patients, and provide quick effective emergency services. We are patient advocates and are willing to risk our lives daily to take care of the public of Los Angeles County. Over the last year and a half we have been the first contact in many covid patients. Many of us have contracted covid and recovered. One thing is certain, when we were called, we did not shy away from the call. Now I am being discriminated against by my employer, the government, for not wanting to take an unnecessary medical treatment. I have seen covid first hand. I have over 500 covid patient contacts. I have contracted covid myself. I, and hundreds of others will not receive this vaccine. The vaccine does not prevent infection nor transmission. If anything, it most likely increases transmission of the virus, as vaccinated people exhibiting lesser symptoms will be unaware they are infected and in turn, not be quarantining. I have contracted and recovered from covid, and have participated in the UCLA study for nearly a year showing my continued antibody presence. I also don't believe in employers or government mandating medical procedures. It is an individuals choice what they are going to put into their body. I would never expect another individual to do something against their will to work with me. I urge you to oppose this vaccine mandate, and instead return to a common sense, public awareness approach, informing employees and residents of the pros and cons, and letting individuals make the best decision for themselves.

Mindy Schinnerer	I am 100% in opposition of a mandatory medical procedure as a requirement for employment. And an employer cannot possibly know what is in the best medical interest of an employee. This is a personal decision between patient and doctor. If an employer requires vaccination and an employee should have medical issues, such as heart issues or seizures or death as a result, is that company or county then going to take financial responsibility for that employees life altering condition or death? We cannot start a precedent that discriminates & divides people at any county, business, corporation or school because of a personal medical choice, especially one that is still under evaluation for efficacy. Those that have already had covid in my family and have natural immunity would have no need for such a vaccine. I am not anti-anything, but I do believe medical mandates have no place in a free society & people should not be coerced or forced.
Mindy Sue	No. You have no right to mandate vaccines! How close are we to herd immunity? Why now vaccinate so forcefully? Please reconsider. You may lose many good employees. No one should have the power to force the employees to vaccinate. Furthermore, who is liable for any problems with the vaccine? There's something wrong with this picture. There appear to be powers here that need to be balanced. To bring this up with so little time to address it seems like another manipulation for demanding the vaccine.
Minerva Juarez	Freedom of choice You don't know how it's going to hit you.
Minerva A Tabangcura	I'm not a robot

		Miry Rabinovitch	We need to respect people's right to chose. It is agains the constitution to mandate a drug especially one that we have no knowledge of long term side effects. Another issue is what is being exposed now, which is that the new wave of cases are mostly "vaccinated" people. Young people survive COVID without any health effect yet we will force them to have the jab without having any idea what this will do to their body in a year, 2 years, 3 years etc. This vote is a crime.

Pascal Roberts	
Pat Carr	
Pat Kelly	Astonishing that in this country we can even begin to contemplate a society in which one's employment is predicated upon injecting foreign substances into an employee's body without giving that employee a choice. Especially considering the substances in the injection are in the trial stages without wide testing, a history of adverse reactions, even death, with no repercussions available to the employee, nor his survivors, of legal options against the pharmaceutical companies and the government who is pushing mandatory injections.
Pat Lopez	
Pat Lopez

Sam G	Aside from being unconstitutional, it's a great liability to the county to mandate vaccine. Are you ready to pay out worker's comp and disability claims when things go south? Recent studies have shown that vaccinated folks are not able to stop the virus, but make it stronger and is able to pass it along. The benefits of the vaccine does not outweigh the risks involved. This is a far reaching violation of one's medical freedom protected by the constitution.

Scott M Ferguson	Having had COVID 19 in March 2020, I survived after three days of dizziness and a dry cough. The vaccines and shots have a worse record than the disease. Science has been corrupted by the gain-if-function research and the rush released vaccines and mRNA shots, vaccines/shots, masks, social distancing and have proven to be ineffective in protecting against transmission. Fauci did the same scam in the late 80' with AZT and the AIDS/HIV crisis: bad medicine, toxic and expensive and zero benefit. The actions instituted to create and then treat CV 19 amount to crimes against humanity.

Sharon Curtis	This will disproportionately harm minorities!
Sharon Eshaghoff	
Sharon Goodberry	
Sharon Hernandez	
Sharon Kotas	I have worked closely with the public throughout all of last year until now and I strongly oppose this order. I do not think it is right to force an experimental product on people, when actual data that shows the harms of this vaccine are being covered up. There are over 500,000 adverse reactions, including deaths, from the Covid-19 vaccine on VAERS(Vaccine Adverse Event Reporting System) that is used by the CDC. Where there is risk there must be choice, as with previous vaccines it should be a choice whether someone wants to get it or not. Private medical information should not be given out, this applies with people who are HIV-positive they do not need to disclose this information, so why is vaccine status any different? Federal law, 21 Unites States Code 360bbb-3 demands that employees are given the option to accept or refuse administration of a product, which includes the Covid-19 vaccine. These vaccines are not FDA approved, and the clinical trials are not over until 2023 so this is still in the experimental phase. What happened to my body my choice? The CDC has admitted that vaccinated people are super spreaders, and countries with the most vaccinations such as Israel, Iceland, and Gibraltar have the highest case per capita rates in the world. So this shows that vaccines are not reducing the number of cases or deaths. When an employee suffers an adverse reaction will the County be responsible for paying their bills? Because the vaccine manufacturers have no liability if you're injured or die. The County has no right to force an experimental product on people and should honor medical freedom for people to choose whether they want it or not, without being coerced.
Sharon Len	Medical freedom. Lawsuits. Are you insane?

	that it is not a fda approved vaccine. And that there is no FDA approved vaccine to prevent Covid. In MA 79% of those with Covid were vaccinated. Same findings in Israel, 9 vaccinated Dodgers test + for Covid, 5 Dems from TX on private jet filled with other in masked Dems, tested + too. The list goes on. Religious concerns need to be respected. Covered under 14th amendment. There are therapeutics that work. Ivermectin is just one of them. HEPA privacy laws will be violated and business could be sued. Under 40% of the African American community is vaccinated. Why because of the history this community has with the government injecting them with syphilis. The lack of sensitivity in your mandates is astonishing. Stop this government over reach. Our bodies, or choice. Thank you for your time, and for opposing these measures.
Sharon C Rodriguez

Stacy J Cole	The inoculations for ALL is unwarranted, and evolving science does not support EUA inoculations being pushed on all. Preventions and treatments have proven themselves and should be just as readily available for citizens. Experts speak out internationally on this. The recent article out of Washington University School of Medicine discusses the added fact that mild & asymptomatic cases show long-term antibodies. It was noted that they will expand study to more severe cases experienced from those who recovered. This can easily be looked up online by an online search of Washington University School of Medicine covid antibodies.

Suzy Way	I'm sorry, something is seriously wrong with the mandate. Massachusetts 75% vaccinated spreading covid proves this vaccine is not preventing it, the viral load is the same as unvaccinated in vaxxed. Natural antibodies lasting 6 month+ vaccine 3 months , source CDC. 98% will survive this, this does not justify a mandate, why all the fear over the 2% I have the antibodies why isn't this considered as immunity, scientists know it, I know it. I absolutely do not trust what is being forced here. You should not be able to tell me what to inject into my body, especially being experimental and opposed by medical doctors and scientists who disagree with Fauci and the media's censored information. Research, be your own advocate, please do not vote our medical freedom away. How do believe this vaccine works when cdc showed Massachusetts proved otherwise. Mandate does not make sense, vaxxed spread covid PERIOD. I OPPOSE ...

			Tami A Olenik	
			Tami L Arevalos	
			Tamie Posnick	
			Tamkanat Qamar	
			Tammi Furnas	
			Tammy Blomsterberg	I oppose all mandates for employees or anyone. This is causing more harm and separation. Also there are many people who cannot take vaccines due to previous injuries so you risk the chance of causing people to lose their jobs. Studies are now showing that the vaccinated are the ones getting sick with the new variant in high percentages.
			Tammy Cass	
			Tammy CavanaghCoward	It's not a vaccine because it does not contain the isolated Corona virus. The covid shot is a clinical trial " as stated on all the website for Pfizer, Moderna and Johnson. Unconstitutional to require Americans to participate in a clinical trial or genetic experiment.
			Tammy Gardner	
			Tammy Ross	
			Tammy A Sack	Forcing someone to be vaccinated is not the American way. We are taking another step towards communism. As the liberals platform for years "my body my choice" was a lie? What's next arm bands for those not vaccinated. I'm vaccinated but I strongly believe in the Constitution and a right to choose.

Tiffany Hume	MANY PEOPLE ARE ALREADY VACCINE INJURED, LIKE MYSELF, HAVE ALLERGIES TO MULTIPLE INGREDIENTS IN THE VACCINE. IT IS NOT SAFE, NOR EFFECTIVE, NOR APPROVED; IT IS EXPERIMENTAL AND THE SAFETY TRIALS WILL NOT BE COMPLETED FOR AT LEAST 2 YEARS. THERE HAVE ALREADY BEEN THOUSANDS OF DEATHS FROM THIS VACCINE AND COUNTLESS ADVERSE REACTIONS, SOME SEVERE AND LIFE ALTERING. THE CURE CANNOT BE WORSE THAN THE DISEASE WHICH HAS A 99.75-.99% SURVIVAL RATE. SINCE THERE ARE MANY KNOWN TREATMENTS AND CURES FOR COVID, IT IS NEITHER NECESSARY NOR LEGAL TO MANDATE VACCINES. IT IS UNCONSTITUTIONAL, ILLEGAL, IMMORAL AND INHUMANE TO FORCE ANYONE TO PUT ANYTHING IN THEIR BODY AGAINST THEIR WILL. VOTE FROM YOUR HEART AND YOUR HUMANITY AND END THIS INSANITY!
Tiffany Johnson	Employment should not be conditional on vaccination status. If these employees have adverse reactions, who will be held responsible?
Tiffany Kuhar	
Tiffany Lebel	Individuals should be able to make their own choices based on the knowledge of their health and genetic background. This should not be mandated by the government.

	<p>studies further found that for those that were previously infected, the vaccination does NOTHING to improve their immunity (&amp; actually carries greater risk).</p> <p>During the H1N1 outbreak, the FDA put a halt to the vaccine trials when 25 people died. The "official" numbers of vaccine-related deaths from the CDC now exceed 11,000 &amp; a recent disclosure from a whistleblower at the CDC indicate that his former agency has routinely been purging the database of valid deaths to keep the numbers low. How many people need to needlessly die before we put a halt to this madness?</p> <p>Ask yourself this question, why would doctors, nurses, cops and firefighters (who have seen more deaths in the last 12 months than at any time in their careers STILL be choosing not to get vaccinated if there was no risk involved?</p>

alarming news—new data indicates that people who have taken the Pfizer and Moderna vaccines are at greater risk of getting Covid than someone who is not vaccinated.

Dr. Malone has warned of this risk for several months. What are we to do? Malone says that instead of relying on the flawed vaccines, Doctors should use drugs for treating Covid that have proved effective, such as Ivermectin , is neutralizing Covid:

What should scare the hell out of you is the extraordinary efforts being taken to silence and discredit Dr. Malone. I encourage you to read Michael Haynes piece from July 5, which details Malone's Kafkaesque ordeal.

This is the kind of authoritarian censorship carried out by Adolf Hitler, Josef Stalin and Pol Pot. When the media and the Government conspire to quash dissenting opinions and legitimate, provable facts, we have crossed the threshold of fascism.

The same effort to discredit Dr. Malone also has been unleashed against non-vaccine treatment methods. Remember what happened to anyone who dared suggest using Hydroxychloroquine or Ivermectin?

And do you remember the news stories in May about how Covid was devastating India? I bet you have heard little about the efficacy of Ivermectin in stopping Covid in Dehli.

?

It is your duty as an American to challenge and question everything the Government represents as true. We now have concrete evidence that Dr. Anthony Fauci has taken diametrically opposed positions without blinking an eye. Some call that "lying." The same with the CDC (as I pointed out in my last article). Perhaps the CDC should be renamed the Center for Disinformation & Confusion in light of the contradictory guidance issued regarding masks and vaccines.

**Subject:** 8/10/21 LA County Board of Supervisors Meeting  
**Date:** Tuesday, August 10, 2021 11:00:39 AM

---

To Whom It May Concern,

Please add to the public record for this meeting today, that I, Michael A. Kander, am a registered voter in LA County, and I am OPPOSED to the following three agenda items scheduled for vote in the meeting today. I believe the Board of Supervisors should know and understand that the Constitution of the United States and the State of California support an individual's right to choose for themselves whether or not they should have a vaccination, and that their employment should not be subject to termination should they choose not to be vaccinated. I would urge all of those on the Board of Supervisors to follow the science as they make these decisions. There are more than just a few thoughtful, intelligent, well qualified and lettered medical doctors and scientists that have contributed to the research in order to provide a deeper understanding of COVID-19 and how to fight it. These are physicians and scientists who have grave concerns about the vaccines. I urge you to follow-up with them, review their work, interview them before you make decisions that will have a profound impact on those of us in the general population.

Thank you.

21. COVID-19 Vaccine for Los Angeles County Employees

73-A. Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

Respectfully,  
Michael A. and Pamela J. Kander

**Subject:** 8/10/2021 Board Meeting

Dear Board Members:

The LAC web site seemed to not be working on my end, so I am emailing you instead. I hope that YOU have have integrity to count this email as an opposition to the following:  
S1 / 21 / 73a and 73b

Just a few reasons being:

Covid is grossly over exaggerated and mostly lies.

It's 98% of older people (average 75+) and those with underlying health issues - obesity/diabetes/heart etc. are the ones that are dying or get it bad enough to be hospitalized

Hospitals are 'being paid' to put Covid down as c.o.d or any other hospital stays.

Over the last 18 months - the rich have got richer by far while others fall behind on their rent/mortgages etc.

Drug lords - Pfizer / Monderno etc. are making a killing too = \$billions

The vaccinations are NOT free - someone pays somewhere = us!!

1000's of millionaires received a stimulus of an average of \$1.6million each while others only got approx. \$2K in total. Do the math!!

Covid WILL be blamed for the coming financial collapse of the US and yes it's-a-coming.

Population control via a "herd" mentality per lamestream news aka presstitues - Don't forget to say baa baa when you speak.

Feel free check all the facts above. But these are just a few reasons ( I could list many more reasons) why Covid is a load of BS for the best part.

Thank you,  
Dawn Elliott

**Subject:** AGENDA ITEMS for 8/10 S-1, 21, 73A and 73B - voicing my opposition

I'm and many I know are in in opposition of the agenda items listed in the subject line.  
Mandating shots is against the law and civil rights of US and California.

1. The covid 19 shots are NOT FDA approved
  2. Covid 19 shots are NOT safe and not effective VAERS shows over 5,000 deaths and over 500,000 severe adverse reaction (and this is old data)
  3. there is a NUMBER of breakthrough cases of those who have already been vaccinated and they are spreading
  4. it has never been proven that any of hte covid19 shots are able to stop the spread nor stop a "vaccinated" person from being infected covid19
  5. there is much successful treatment and protection for COVID 19 Ivermectin, Zinc, adequate hydroxy-25 (D3 levels)
  6. *Microbiology & Infectious Diseases*, January 2021, veteran immunologist J. Bart Classen: "RNA-based COVID vaccines have the potential to cause more disease than the epidemic of COVID-19." <https://scivisionpub.com/pdfs/covid19-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf>
  7. CDC: Best estimate for survival rates by age group are in most cases over 99% (birth to 19: 99.997%; age 20-49: 99.98%; age 50-69: 99.5%; age 70 and over: 95%) <https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>
  8. Someone who has already have been infected by COVID 19, has a stronger immunity then any vaccinated person against all its variants thats how the immune system work and has worked since man has been created.
  9. mandating proof is a violation of medical privacy and violation of ADA
- OPPOSE THESE AGEND ITEMS - do real research i'm also happy to send you more research

**To:** ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>  
**Subject:** August 10 meeting - opposition to S-1, 21, 73A, 73B

I write to voice strong opposition to the following items on the August 10 agenda: S-1, 21, 73A, 73B.

S-1 Public Health Order S-1, which would BAN THE UNVACCINATED FROM RESTAURANTS, GYMS, ENTERTAINMENT VENUES, ETC.

21 COVID-19 Vaccine for Los Angeles County Employees

73A Ratifying 8/4/21 order establishing a Mandatory COVID-19 Vaccination Policy for County Employees

73B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

The government should NOT require anyone to be injected with anything in order to live and work freely in the society. This is a violation of human rights, and is also discrimination. Whatever a person's view is on the current covid vaccines, it is a PERSONAL choice what goes into a person's body. The government cannot mandate this. And must not create rules that restrict his normal citizen freedoms to try to enforce this (i.e., now you can't go to restaurant or gym or public entertainment venues...what next, can't go shopping for life necessities and food????).

And county employees should not be forced to get the vaccine in order to serve LA County.

This is the United States of America. We're supposed to be free citizens here.

**Subject:** Board Meeting Public Comment

I am writing to **OPPOSE the following: S1, 21, 73A & 73B**, for the following reasons. I don't believe there should be any mandatory Covid-19 vaccines for any employee or Citizen due to the fact that the Covid-19 vaccine has not worked the way the so-called experts said it would. The vaccinated are now causing the unvaccinated to become infected and each other. This is still an experimental use approved vaccine and there has **never been a successful mRNA animal trial and now the quinea pigs, rats, ferrets and monkeys are people**. There are proven data from other Countries where the way to get better was to open up and not require masks or vaccination. We are our worse enemy by not following the true science.

I hope you'll consider these words and vote to oppose the aforementioned agendas.

Sincerely,

Claude Richardson

I want to send in my vote to OPPOSE the Agenda Items for your meeting today which are Items 21, 73A, 73B

You all need to educate yourself about the Vaccines which are not REAL Vaccines only experimental therapeutics which have never been approved by the FDA as a MRNA. Please look at these short presentations <https://videopress.com/v/p8R7ebPy> and see for yourself. This is no joke and so many people have already died from the vaccines.

Also see what Dr. Dan Stock has to say in his presentation about the misinformation of the so called vaccines.

**Subject:** Cannot get onto your LA County Comment site to Oppose Mandatory Covid shots under Agenda Items 21, 73A, & 73B

Hello, LA County Board of Supervisors,

Many of us have not been able to get onto your website to vote in opposition to Agenda Items 21, 73A, and 73B which would mandate experimental Covid shots upon LA County employees and all residents in order to go about our daily lives. I called your 213 # and they admitted your site was down. I see the clear attempt to silence the community who will be harmed by your mandated experimental vaccines.

Mandating these shots is not only unconstitutional but also violates all of our HIPPA rights and opens doors for lawsuits based on discrimination.

I am opposed to these mandates for many reasons, but for starters I just had a family member pass away and it was confirmed it was from the vaccine. Mandating myself and my family get this experimental shot after we just buried our loved one from the shot is grotesque. I also just recovered from Covid myself and had no issues. With already having Covid I am a prime candidate to have an adverse reaction to this experimental shot. This is not a one size fits all issue. The other issue is you are blatantly lying to the public saying mandating vaccines will end this pandemic which is completely false. I got Covid from a fully vaccinated person. I currently know 10 people who have Covid and all are fully "vaccinated". The "vaccine" does not stop the spread of Covid and requiring the "vaccine" for all will not do anything to stop the spread. How about encouraging people to get healthy, check their vitamin D levels, exercise and eat clean?

The other issue is since this experimental drug is not FDA approved you are mandating all residents voluntarily sign up for these experimental drug trials without providing everyone with the proper waivers and paperwork required when someone signs up for a vaccine trial. You are infringing on our constitutional rights and violating our civil liberties while trying to silence our voices.

You have not heard from all in opposition to this mandatory imposition of vaccines in violation of People's constitutional and HIPAA privacy rights. You will be responsible for the future negative health consequences of our future generations. The known and unknown consequences of these experimental Covid shots where we, the public, are the guinea pigs are the reasons why you cannot mandate these experimental shots.

Please take note that many in the community have been silenced by your site conveniently crashing.

Respectfully,

Brittany Calvillo

**Subject:** Comments on 21 and 73A

To the Board of Supervisors,

I am writing to say no to 21 and 73A.

The science shows that none symptomatic people do not transmit disease and proves that it is not the pathogen, but the terrain that is the cause of any disease.

This vaccine, we should not call it vaccine, was supposed to be for emergency use only for those people who were at risk. Vaccines should be a choice and not forced on people. We are becoming a communistic country where no one has any freedom of choice. But let me remind you that we live in United States of America. We have a constitution that protects our rights.

This is not a vaccine but experimental gene therapy. People with comorbidity should not be getting this gene therapy and you should not pass any law to forcefully give this gene therapy to people. Instead of forcing people to get this needle, force them to not put chemicals on and inside their bodies.

I say no to forced vaccination. And it must be a choice. You need to spend time reading the TRUE science.

Thank you,

Raya Shanazarian

**Sent:** Thursday, August 5, 2021 1:44 PM  
**To:** ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>  
**Subject:** Fully implement and fully fund Measure J!

Dear Executive Office,

As your constituent, I'm grateful for your leadership in pushing L.A. County toward a Care First future. With your guidance, the Board has enacted some powerful policies that provide much-needed care and resources for our most vulnerable community members.

I'm writing to you today because, in November, LA voters like me made our voices heard by casting our ballots and passing Measure J, and we continued to show our support for a Care First Budget by participating in the weeks-long Measure J implementation process. Time and time again, we affirmed our desire for investment in community counseling, mental health services, youth development programs, small businesses, jobs-creation, and affordable housing.

Now, the will of the voters—of your constituents—is under attack by the recent tentative judiciary ruling, and by law enforcement special interest groups like the Association for Los Angeles Deputy Sheriffs (ALADS). These groups are attempting to undermine the will of more than 2.1 million LA voters who said yes on Measure J to prioritize investments in services, not incarceration.

I am urging you and your colleagues to:

- Exercise your full power to appeal the tentative ruling.
- Fully implement and fully fund Measure J.

I know that L.A. County currently spends 42% of our taxpayer money on law enforcement and the legal system, and that LASD spent \$862 million on the LA County jail system in 2020 alone. Angelenos were clear when we casted our ballots that it's beyond time to shift away from the decades of harm caused by the LA carceral system—the largest jail system in the world—and into resources, opportunities, jobs, and care.

ALADS is protecting a status quo budget because they benefit and profit from a carceral system that criminalizes and dehumanizes our most vulnerable communities. They do not provide protections to our community, they provide protection to the carceral state and officers who perpetuate violence,

racism and white supremacy. ALADS claims to protect police in support of public safety, but the facts and statistics say the opposite, and you have the power to push back. Regardless of any interference from special interest groups, you and your fellow Supervisors have the authority to direct funds to community investments and alternatives to incarceration without the mandate of Measure J.

People in L.A. County—especially Black, Brown, and Indigenous people, those working minimum wage jobs, seniors, young people trying to learn new skills, people without access to mental health care services, and those who are excluded from stable housing—are being crushed by the judiciary's and ALADS' attempts to maintain a status quo budget that continues to deny them resources and opportunities.

Measure J was meant to set a baseline for investment, and the Board maintains the authority to implement the community-based solutions that were generated through the Measure J community engagement process. To achieve a Care First Vision for L.A. County requires your leadership to fully implement and fully fund Measure J, as this investment is the true will of the voters that you must uphold.

Sincerely,  
Yolie Anguiano

**Subject:** NO on Vaccine madates/vaccine passports

Attention LA County Board of Supervisors,

As you begin to review data regarding mandating vaccines and vaccine passports, as a voting citizen of LA county, I am writing to express that I am 100% AGAINST any mandating of vaccines and 100% AGAINST any vaccine passports at any time, now or in the future.

There is an overwhelming amount of data proving that vaccines are NOT sufficient to block transmission of C-19 and variants. (I can provide you credible resources on this if you are lacking such information).

Additionally, every American citizen must have the freedom to decide what they want to eat, drink and inject or not inject into their body - pandemic or no pandemic. I am PRO freedom and pro-choice in all aspects of personal health choices.

Vote NO to any vaccine mandates and/or vaccine passports of any kind (S-1, 21, 73A, 73B)

Sincerely,

Britt-Marie Gustafsson  
LA County resident

**Subject:** Re: Opponents to Agenda 21, 73A, and 73B Cannot Get onto your Public Comment Site to vote in opposition to Mandatory Experimental Covid shots

Not the public comment line. Your WEBSITE WHERE THE PUBLIC CAN show opposition or support for certain agenda items. We could not click on the boxes for Agenda Items 21, 73A, & 73B. I called the main # 213-974-1411 and they confirmed the site CRASHED. They were trying to get it back up and running. I used Google Chrome as suggested and other web engines to no avail. I am not the only one who was prevented from voting on your site as to this issue. And I was not called on during public comment at the hearing.

I am a testament to the success of hydroxychloroquine, ivermectin, azithromycin, and key supplements that helped me conquer Covid. They are also effective in preventing the infection of COVID. We have seen that those with the shots are still getting COVID. Look at what is happening IN ISRAEL CURRENTLY. I also know 2 people who have been detrimentally affected by Covid experimental shots - one went blind, the other died. This is happening to good people because the Big Pharma and politicians are not following the science and silencing those with safe, alternative methods of preventing and fighting COVID.

The community in opposition to these experimental shots have been silenced.

On Tue, Aug 10, 2021 at 10:28 AM Supervisor Janice Hahn (Fourth District) <[fourthdistrict@bos.lacounty.gov](mailto:fourthdistrict@bos.lacounty.gov)> wrote:

Good morning,

Thank you for reaching out to our office. I just checked and the public comment line is open and working fine. Who did you speak to that said it was not working?

Thank you,

**Kelly Cross**

**Subject:** Opponents to Agenda 21, 73A, and 73B Cannot Get onto your Public Comment Site to vote in opposition to Mandatory Experimental Covid shots

Please be advised that I and many other LA County residents have been shut out from making public comment on your County website in opposition to Agenda Items 21, 73A, and 73B in opposition to mandatory Covid vaccines.

There are still too many unanswered questions about the long-term health consequences of Covid 19 experimental shots. To force these experimental shots upon LA County employees is in violation of our Constitutional rights and HIPAA privacy rights.

I called your main # and learned the site has been down. That is a great way to silence the community. I also cannot get in to publicly comment at the live meeting.

You need to know that People's voices have been silenced by your site's failure to work properly. You need to provide People more opportunity to comment on the mandatory experimental shots.

REspectfully,  
Nicole Flood

**Cc:** Barger, Kathryn <Kathryn@bos.lacounty.gov>  
**Subject:** OPPOSE Agenda items 21, 73A, and 73B

Dear Board of Supervisors,

**Your public comment server is going down.**

## **I OPPOSE the following proposals.**

### **21**

You do not own the bodies of your employees. Under EUA and just pure informed consent we have the right to refuse medical procedures people do not want.

### **73A**

Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

Its also incredibly unethical to tell others what to do with their bodies. They have the right to demand transparency on what are the long term implication for this medical treatment. There are also other treatments available and people (public health and hospitals) refuse simply because they are being advocated by "republicans" . Its terrible. If we want to tackle this issue long term then we have to address the poor metabolic health of Angelenos and obesity rates that were made worse by the lockdowns. People have emerged in worse health due to being shut in. Consequently, science showed that most transmissions occurred in family homes and not public spaces.

### **73B Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces**

This is so unconstitutional. You are punishing people who made a choice about their health. People like myself spend several hours during the week looking at data, hearing different points of view, and searching PUB MED articles. You know what is the overarching theme? Obesity and Diabetes are big factors in Covid related problems and people are well enough to respond to this crisis. And we need incentives to better everyone's health not mandate something a lot people are not comfortable with. Its also against The Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, *religion*, sex or national origin. Provisions of this civil rights act forbade discrimination on the basis of sex, as well as, race in hiring, promoting, and firing. *The Act prohibited discrimination in public accommodations and federally funded programs.*

**You are discriminating against peoples beliefs/religion/philosophical objections against mandated**

**interventions. The science is not settled on this matter. Not by a longshot.** Further proof is how other fully vaccinated countries like England, Israel, Iceland, etc. are dealing with new surges of cases because at the end of the day, the vaccine **does not stop transmission.**

Thank you.

Sonia

**Sent:** Tuesday, August 10, 2021 12:09 PM  
**To:** ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>  
**Subject:** Opposition

I oppose these items on the Agenda for August 10, 2021:  
21, 73A and 73B

I have tried over five times to voice my opinion on these items through the online form provided for public comment but, to no avail. I would like a better way than through email to be heard before you vote on items affecting the well-being of the citizens of LA County. I've wasted an entire morning on this so far.

Here are my concerns regarding these items:

21 OPPOSE

This should be an individual choice on the advice of one's personal physician. My own doctor has advised me NOT TO GET THE VAX as I suffer from an autoimmune condition. This would set into motion a cascade of events that could adversely affect my health. I spend thousands of dollars a year on medications and supplements so that I can live as healthily as possible given my circumstances. Please do your own research and look at the facts. Here is the VAERS website to visit to find out how many people have died or have suffered serious adverse reactions after receiving the vaccines. <https://vaers.hhs.gov/> This is our own government's website that tries to track adverse events. If you do a deep dive, you will see that the reactions from the covid vax have outnumbered ALL VACCINES IN PREVIOUS YEARS TO DATE!

73A OPPOSE

This is against the Nuremberg code. This injection is an experimental gene therapy shot. It has not been approved, it has only been authorized. The pharmaceutical companies have no liability at all for any adverse reactions. See the 1986 act here. <https://www.congress.gov/bill/99th-congress/house-bill/5546> Are you willing to bankrupt the County due to potential lawsuits?

73B OPPOSE

There is no basis for discriminating against an individual due to health concerns. Have you looked at any data that reports those that have been injected carry as much viral load and can transmit the disease just as easily as one who has not received the vax? See the report of the patients in Massachusetts here. <https://www.cnn.com/2021/07/30/cdc-study-shows-74percent-of-people-infected-in-massachusetts-covid-outbreak-were-fully-vaccinated.html> The CDC reported a study

that showed 74% of the people infected in the outbreak were fully vaccinated. Furthermore, my son was fully vaccinated in April. Since that time he has been sick twice with various “flu-like symptoms.” Last week (first week in August 2021) he tested positive for covid. He still does not have his sense of smell nor can he taste anything after this last illness.

Read the science! There are countless doctors across the United States successfully treating individuals on an out-patient basis with a protocol that keeps them out of the hospital. It is not hard to understand why ivermectin is receiving a bad rap. It is out of patent and therefore of no use to the bottom line on the pharmaceutical company's profit and loss statement. Out of patent drugs can be manufactured by other companies which means there is no money in it. There are ongoing clinical trials now set up to test the efficacy of this drug. There are other items within the protocol used and I advise each and every one of you Board members to do your homework. Please let's approach this subject with common sense.

Jeanne OBrien

**Subject:** Public comment submission for 8/10/2021 agenda items #21, #73-A, and #73-B

My name is Chase Bruno, resident of Los Angeles County. Please submit the following text in its entirety as my public comment to items #21, #73-A, and #73-B on the Board of Supervisors Agenda for 08/10/2021, since the website to do so is not functioning properly:

That this is even being discussed by the board is outrageous. No person, much less an elected official has domain over another person's body. By considering this action, you are implying that you are qualified to make medical decisions on behalf of every single person in Los Angeles County, and your opinions supersede that of every primary care provider of your constituents. The board's decision making abilities and leadership over this past year hardly reflect the notion that you are qualified to perform the basic functions of supervisors, much less the basic functions of a healthcare professional, a job none of you remotely meet the requirement for.

If your goal is to get the entirety of Los Angeles County Vaccinated, perhaps you should address the issues that make people weary of vaccination in the first place, before defaulting to tyrannical and far-overreaching measures such as mandating medical procedures for your constituents in order for them to participate in society. Perhaps, instead of attending a dinner at a restaurant shortly after voting to ban outdoor dining, Sheila Kuehl could have ordered GrubHub and had her actions reflect her words, instead of blatantly contradicting them. Perhaps, in doing so, you could earn back the trust of the public. Sheila Kuehl is just one example of this, I don't know that I need to name more elected who's actions have contradicted their decisions affecting the public, but we can also talk about Supervisor Hilda Solis' constant habit of deleting negative or critical comments from her Instagram page, almost as if she would rather pretend critics don't exist rather than answer for her actions. On March 4<sup>th</sup>, when the Trump Administration barred abortion providers from receiving federal funding, Solis stated "The Trump Administration's latest attack on women's health diminishes the sanctity of the doctor-patient relationship and impacts the quality of healthcare accessed by four million people throughout the country". Yet she wishes to do the very same (diminish the sanctity of the doctor-patient relationship) by imposing herself as the chief medical decision maker for LA County Employees and residents by requiring them to undergo a medical procedure, the COVID-19 vaccine by way of coercion.

What is further contradictory is that the LA County Board of Supervisor's "Policy of Equity", which can be found on the County Equity Oversight Panel website states the following: "The County WILL NOT tolerate unlawful discrimination on the basis of age; ancestry; color; ethnicity; religious creed; ...; disability; marital status; MEDICAL CONDITION; ...; or any other characteristic protected by state or federal law." Further, "as a preventive measure, the County also will not tolerate inappropriate

conduct toward others based on a protected status even if the conduct does not meet the legal definition of discrimination or unlawful harassment. All County employees are responsible for conducting themselves in accordance with this Policy and its associated Procedures." This section is preceded by the statement "The Los Angeles County Policy of Equity reflects and builds upon our MISSION, VISION, and VALUES, which each employee is responsible for demonstrating in both ACTIONS AND WORDS".

The very fact that the board is considering requiring individuals to be vaccinated in order to participate in society displays that the Board is willing to act contradictory to its MISSION, VISION, and VALUES, and does in fact condone discrimination- discrimination against those who have decided for themselves that the COVID-19 vaccine is not the right medical choice for themselves. The Board is willing to discriminate against grown, functioning, free Americans, who have decided that the repeated contradictions surrounding the vaccine have caused them not to trust it enough to let it enter their body. The county is willing to discriminate against those who wonder why, after being told repeatedly by government and public health officials, large corporations, big tech, and countless other bodies that the vaccine is ONLY "Safe and Effective", they are simultaneously being told "the virus can still spread, masks must still be worn", what benefit remains to outrisk a blood clot, unknown reaction, or the unknown long-term effects. The governor of California has called this "A Pandemic of the Unvaccinated", yet the unvaccinated seem to be no better off than the vaccinated at this point. At this point, it now appears that there is no benefit to being vaccinated besides being free from threat, not from the virus but from tyrannical policy. Any foreign substance being introduced into the body can present a risk, whether small or large. If those who are otherwise healthy and have little chance of infection by the virus, and now have a wide range of treatments available to them to treat an infection, and have a high likelihood of getting through any infection by the virus without great harm to themselves decide that they'd rather not introduce a new substance into their body from a manufacturer that has a history of lawsuits (and one of those manufacturers holding the record for the largest criminal settlement ever awarded in history), developed under a presidential administration many did not trust in record time for the chance that it may avert what turns out for them to be a little worse than the flu they had before, is that outrageous? If their risk to transmit to others is at the same level of those who have already taken the shot(s), as we've discovered in the previous weeks, is it honest to say that forcing them to receive the same shot is for the best interest of the public? This very agenda item displays that this is not a pandemic of the unvaccinated, but a pandemic of bad leadership- a pandemic of policymakers who recklessly, and without suffering consequence of their own policy, demand control over the sanctity of their constituents' own bodies under the veil of "saving lives". How can anyone on this board think you are uniquely qualified to "save lives" when you haven't even demonstrated your ability to save money, electricity, or a small business?

This state has not learned from any bad decision it has made during this pandemic. It has demonstrated that it is not careful, nor considerate to the rights of its Citizens by any measure of the imagination. You have locked our children out of schools and inside their homes for a year, while allowing adult-appearing children to destroy parts of our cities for days on end, and while law abiding citizens were locked in their homes under curfew. You have kept healthy people out of fitness facilities while allowing liquor stores and smoke shops to remain open. You closed small businesses from serving their customers without proving anywhere near beyond a reasonable doubt that they were a danger to them, while allowing the homeless to setup shop on sidewalks, riverbeds, and parks. You arrested people for going to the beach while you released dangerous criminals from

prisons, and now you are considering requiring County employees to take a vaccine that does not inhibit the risk of infecting others, and considering banning otherwise healthy people from utilizing indoor public spaces for the same.

Above all else, the board simply lacks the authority, moral or otherwise, to require someone to put something into their body against their will, in addition to lacking the authority to retaliate, segregate, or discriminate against them by withholding access to indoor facilities, or any right by any means for their refusal to do so.

The decision to take a vaccine should not be made under duress, threat or fear, because everyone is telling you to get it, or that you won't be able to participate in certain things without it, that you will not have the same rights as others without it. It should simply be, as with any other medical procedure, that the person freely and willfully chooses to because they believe or are convinced that it is the best decision for themselves.

Good Morning,

I would like to add to the public comments for the Board of Supervisors and would like to vote in opposition of items 21, 73A and 73B. Again, I OPPOSE items 21, 73A and 73B. I respectfully ask that these comments be conveyed to the Board of Supervisors and heard, not silenced. I'm sure you would appreciate the same if you were in my shoes. Thank you for your time.

Respectfully Submitted,  
Cody Crowley  
LA County Citizen

So many of us were on the phone to oppose Agenda 21, 73A, and 73B and we were not given a chance. You should not ask us our stance, only our names. Then you cannot pick and choose who you will listen to.

Disgraceful!

I tried to leave an e-mail comment and it would not send.

I was on the phone about 1:40 and not heard.

Paget

**Subject:** Right to Health Freedom (Oppose S-1, 21, 73A, and 73B)

Hello to whom it may concern,

I whole heartedly apposed the ban on unvaccinated from having the right to live and take care of their health and life how they see fit. I OPPOSE passing S-1, 21, 73A, and 73B!!!!!!!!!!!!!!

The action to ban a certain group of individuals based on personal choice to care for their health in alternative methods is a sincere impeadment on the human rights our country is known to offer its residents. I am appalled at such an action being considered. What right does the government have to tell me how to care for myself? They do not know my implications nor my family history. They fo not have a right to control me nor deny me the pursuit of happiness and health in ways suited to my life and well being. This disease does impact others and they have the right to do as they see fit, vaccinated or unvaccinated.

With power as a US citizen and with love that we can care for one another without controlling one another,

Christa Irene Ostdiek

My name is Rosalie Aranda,

I'm sending this to show opposition to the following agendas I'm opposing 21, 73A, 73B I'm opposing these agendas because it's unconstitutional, unethical, and bias, natural medicine is being silenced, and this not right. And unless the "underlying diseases" are addressed as well then this just does not make sense. On a side note, why if the delta variant is so intense... why isn't our southern boarder closed?

I hope you would consider these comments. Thank you for your time.

I could not leave comments for the record, because the system kept crashing; you must have such a great online attendance to voice opposition that the system could not support it.

I AM SENDING THIS EMAIL TO REGISTER MY STRONG OPPOSITION TO THESE NEW MANDATES!  
SOME OF THE MOST DETRIMENTAL ACTIONS AGAINST THE CITIZENS OF LOS ANGELES COUNTY!

I STRONGLY OPPOSE ITEMS: 16, S-1, 21, 73A and 73B.

PLEASE HEAR THE VOICES OF YOUR CONSTITUENTS AND VOTE NO on these unconstitutional efforts.  
We are a nation of laws, and by breaking your oath to upholding laws, because you have a different opinion, you are making it a nation of men (in this case women) Either way, you are not the legislators and even they can not pass laws that are unconstitutional. We the people are tired of being ignored and ruled like this is your little kingdom.

Lastly: Give funding back to the police and sheriff! We are scared, violent crime is up! We can't all afford private security, or live in gated communities.

Thank you,

Lars Rottler

**Subject:** Vote No to Vaccine passports, mandates or any other name you want to call it.

I strongly oppose 21, 73A & 73B. We all know the evil you're trying to pull. If you were truly concerned you would mandate vitamin D testing. You would also make Ivermectin and Hydroxychloroquin a protocol for early intervention or prevention. But then how would you control us?

If you are not evil, you will start promoting exercise, nutrition and start promoting the known remedies. Ivermectin and Hydroxychloroquin have saved numerous lives.

Jesus is still on the throne. Heaven and hell are real. I'd give up this evil agenda. I will pray for you.

Cindy Russo

Subject: Voting

Hello!

I was having a lot of trouble voting on the gov website so was told I can e mail my vote.

I vote to oppose agenda item s-1 , 21, 73A, and 73B.

My name is Amanda Fernandez  
7135 Geyser Ave  
Reseda, CA 91335

Thank you!

Blessings,  
Amanda

Subject: Written comments for 8/10/21 Board meeting

Hi,

I tried to submit written comments for the board meeting, but the online form gave an authentication error. I also tried to call in and it said the code was invalid.

I'd like to oppose 21, 73A, and 73B.

Thank you,

Melissa Lomenzo  
LA County Resident

**Subject:** OPPOSE Item #'s S1, 21, 73A & 73B  
**Date:** Tuesday, August 10, 2021 1:20:03 PM

---

I want to make sure you know the opinion of one of your constituents on the topics you will be discussing tonight.

I am adamantly opposed to taking people's rights away - period. We have HIPPA laws in place for very good reason and it is not ok to start mandating an Emergency Use Authorized Vaccine that is in stage 3 clinical trials and that has not been approved by the FDA.

To be clear, I am OPPOSED to any sort of Covid Vaccine Passport/Mandate/Proof - whatever you want to call it.

I DO NOT agree with any sort of segregation based on whether or not you got a covid vaccine. As of now, people with the vaccine are still catching covid. As of now, vaccinated people are still able to shed the covid virus. So, the vaccine is not protecting people the way it was sold to us. It is not working. And now to make it mandatory is against all I stand for and all I thought this country stood for....freedom. Freedom to my body. What else will you start mandating if we all let this happen?

PLEASE VOTE NO on any sort of Covid Vaccine Mandate.

**Kelly Evans**

**From:** [David Ibershoff](#)  
**To:** [PublicComments](#)  
**Subject:** Please Oppose Mandatory Experimental Vaccines  
**Date:** Tuesday, August 10, 2021 11:27:34 AM

---

10 August 2021

Gentlepersons;

I oppose S-1, Item21, and 73 A&B.

I support informed medical decisions made by the individual. Mandatory experimental, unapproved Vaccines with dangerous side-effects are not the way to go.

Most Cordially Yours, D. Ibershoff

## What Are The Medicines for COVID-19?

Tired of wearing two or three masks and want to go back to regular life, without being bribed with a Krispy Kreme donut and threatened with peer pressure to get an experimental “vaccine”, thus rolling the dice of joining the 491,218 Americans injured or killed by it? Continue reading about these “alternatives” to

the Quack-ciene the mainstream media **deliberately** hid from you... By the way, ETHICAL medical experiments usually **PAY** participants **\$400** to **\$2,000** ...Ask the sign-in workers, “Where's MY money!?” Better yet, ask your State & US Congress Rep. & Senator...or is a \$3 Krispy Kreme all your life is worth...

As of 7/30/2021 VAERS data Found **545,338** adverse reactions where “vaccine” is COVID19

<https://www.medicare.gov/medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=CAT&EVENTS=ON&VAX=COVID19>

**HYDROXYCHLOROQUINE** (sulfate) **FDA adult use approved on 04/18/1955** : A World Health Org. “essential” medicine <https://list.essentialmeds.org/medicines/276> Average cost: about \$149.19 for 60 generic 200mg tablets.

<https://americasfrontlinedoctors.org/treatments/hydroxychloroquine/treatment-protocols/>

<https://americasfrontlinedoctors.org/treatments/hydroxychloroquine/science-of-hcq/>

**REMEDSIVIR** **FDA adult use approved on 10/22/2020** : Average cost: \$520 a vial, or \$3120 per patient

**IVERMECTIN** **FDA adult use approved on 11/22/1996** : A World Health Org. “essential” medicine

<https://list.essentialmeds.org/medicines/58> Average cost: around \$45 for eight 3mg generic tablets

<https://americasfrontlinedoctors.org/treatments/ivermectin/>

<https://americasfrontlinedoctors.org/files/the-science-of-ivermectin/>

**BUDESONIDE** **FDA adult use approved on 08/08/2000** : Average cost: about \$197.99 for 30 Plas Cont(s) nebulized 2ml of 0.5mg/2ml doses

[https://www.thelancet.com/journals/lanres/article/PIIS2213-2600\(21\)00160-0/fulltext#seccestitle150](https://www.thelancet.com/journals/lanres/article/PIIS2213-2600(21)00160-0/fulltext#seccestitle150)

**FLUVOXAMINE** **FDA adult use approved on 12/5/1994** : [www.skirsch.io/](http://www.skirsch.io/) Average cost: around \$79 for 100 oral 25 mg tablets <https://www.skirsch.io/why-the-fda-should-grant-an-eua-for-fluvoxamine/>

<https://www.skirsch.io/fluvoxamine-and-ivermectin-100-success/>

**Prophylaxis** is an action taken to prevent or protect against a specified disease. Greek in origin, from the word “phylax”, meaning “to guard” and “watching.”

### Prophylactic HCQ Protocol

Dr. Simone Gold [info@aflids.com](mailto:info@aflids.com)

This is NOT medical advice. Every situation is unique, and every person must check with his or her own physician, especially if you are taking any other medication.

- Hydroxychloroquine 400 mg. twice a day on the first day + elemental zinc 50 mg. daily then
- Hydroxychloroquine 400 mg. weekly + zinc 50 mg. daily

Hydroxychloroquine tablets in the USA are 200 mg. Two can be taken together at the same time or separated by hours-days, as long as a person takes 400 mg. weekly. Currently there are studies underway to see if 200 mg weekly is sufficient.

This protocol is used across the world. For example, see the country of India in the White Paper (reference 19). In this example, the National Task for the COVID-19 constituted by Indian Council of Medical Research recommendations for HCQ for prophylaxis of SARS-CoV-2 infection for selected individuals.

### **Zelenko Covid-19 Prophylaxis Protocol**

(Opinions Are Dr. Zelenko's; Shared In The Public Interest)

*Dannielle Blumenthal, Ph.D.      Twitter: @zev\_dr*

#### **Low Risk Patients**

Young healthy people do not need prophylaxis against Covid 19. In young and healthy people, this infection causes mild cold-like symptoms. It is advantageous for these patients to be exposed to Covid-19, build up their antibodies and have their immune system clear the virus. This will facilitate the development of herd immunity and help prevent future Covid-19 pandemics. However, if these patients desire prophylaxis against Covid-19, then they should take the protocol noted below.

#### **Moderate Risk Patients**

Patients from this category are healthy but have high potential viral-load exposure. This group includes medical personnel, caregivers of high-risk patients, people who use public transportation, first responders and other essential personnel who are crucial to the continued functioning of society. These patients should be encouraged to take prophylaxis against Covid-19 in accordance with the protocol noted below.

#### **High Risk Patients**

Patients are considered high risk if they are over the age of 45, or if they are younger than 45 but they have comorbidities, that is, they have other health conditions that put them at risk. These patients have between a 5 to 10% mortality rate if they are infected with Covid-19. These patients should be strongly encouraged to take prophylaxis against Covid-19 in accordance with the protocol noted below.

#### **Protocol for Low and Moderate Risk Patients:**

Elemental Zinc 25mg 2x time a day (2)

Vitamin D 5000iu 2x time a day (2) (10,000 IU)

Vitamin C 1000mg 1 time a day (2)

Quercetin 500mg 1 time a day until a **SAFE** and efficacious vaccine becomes available

If Quercetin is unavailable, then use Epigallocatechin-gallate (EGCG) 400mg 1 time a day (3)

#### **Protocol for High Risk Patients:**

Elemental Zinc 50mg once a day

Vitamin D 5000iu 2x time a day (10,000 IU)

Hydroxychloroquine (HCQ) 200mg 1 time a day for 5 days, then 1 time a week until a **SAFE** and efficacious vaccine becomes available

*If HCQ is unavailable, then use the Protocol for Low and Moderate Risk Patients.*

# COVID-19 Vaccine Breakthrough Case Investigation and Reporting

This page provides information and resources to help public health departments and laboratories investigate and report COVID-19 vaccine breakthrough cases.

- **Vaccine breakthrough cases** are expected. COVID-19 vaccines are effective and are a critical tool to bring the pandemic under control. However, no vaccines are 100% effective at preventing illness in vaccinated people. There will be a small percentage of fully vaccinated people who still get sick, are hospitalized, or die from COVID-19.
- More than 164 million people in the United States have been fully vaccinated as of August 2, 2021. Like with other vaccines, vaccine breakthrough cases will occur, even though the vaccines are working as expected. Asymptomatic infections among vaccinated people will also occur.
- There is some evidence that vaccination may make illness less severe for those who are vaccinated and still get sick.
- Current data suggest that COVID-19 vaccines authorized for use in the United States offer protection against most SARS-CoV-2 variants currently circulating in the United States. However, variants will cause some vaccine breakthrough cases.

## What CDC is doing

CDC is leading multiple vaccine effectiveness studies to ensure COVID-19 vaccines are working as expected. In addition, CDC is coordinating with state and local health departments to investigate SARS-CoV-2 infections among people who received COVID-19 vaccine (called “vaccine breakthrough cases”) and identify patterns or trends in:

- Patients’ characteristics, such as age or underlying medical conditions
- The specific vaccine that patients received
- Whether a specific SARS-CoV-2 variant caused the infections

## Defining a vaccine breakthrough infection

For the purpose of this surveillance, a vaccine breakthrough infection is defined as the detection of SARS-CoV-2 RNA or antigen in a respiratory specimen collected from a person  $\geq 14$  days after they have completed all recommended doses of a U.S. Food and Drug Administration (FDA)-authorized COVID-19 vaccine.

## Identifying and investigating hospitalized or fatal vaccine breakthrough cases

As of May 1, 2021, CDC transitioned from monitoring all reported vaccine breakthrough cases to focus on identifying and investigating only hospitalized or fatal cases due to any cause. This shift will help maximize the quality of the data collected on cases of greatest clinical and public health importance.

Previous data on all vaccine breakthrough cases reported to CDC from January–April 2021 are [available](#).

State health departments report vaccine breakthrough cases to CDC. CDC now monitors reported hospitalized or fatal vaccine breakthrough cases for clustering by patient demographics, geographic location, time since vaccination, vaccine type, and SARS-CoV-2 lineage. Reported data include hospitalized or fatal breakthrough cases due to any cause, including causes not related to COVID-19.

To the fullest extent possible, respiratory specimens that test positive for SARS-CoV-2 RNA are collected for genomic sequencing to identify the virus lineage that caused the infection.

Some health departments may continue to report all vaccine breakthrough cases to the national database and can continue to submit specimens to CDC for sequencing. However, CDC will focus its monitoring on reported hospitalized and fatal cases.

## Developing a data access and management system for reporting COVID-19 vaccine breakthrough cases

CDC developed a national COVID-19 vaccine breakthrough REDCap database where designated state health department investigators can enter, store, and manage data for cases in their jurisdiction. State health departments have full access to data for cases reported from their jurisdiction.

Ultimately, CDC will use the [National Notifiable Diseases Surveillance System \(NNDSS\)](#) to identify vaccine breakthrough cases. Once CDC has confirmed that a state can report vaccination history data to NNDSS, CDC will identify vaccine breakthrough cases through that system. At that time, the state health departments can stop reporting cases directly into the REDCap database. After this change, CDC will upload the available data reported to NNDSS into REDCap database for further review and confirmation by the state health department.

## Hospitalized or fatal COVID-19 vaccine breakthrough cases reported to CDC as of August 2, 2021

As of August 2, 2021, [more than 164 million people](#) in the United States had been fully vaccinated against COVID-19.

During the same time, CDC received reports from 49 U.S. states and territories of 7,525 patients with COVID-19 vaccine breakthrough infection who were hospitalized or died.

Hospitalized or fatal vaccine breakthrough cases reported to CDC	7,525	
Female	3,615	(48%)
People aged ≥65 years	5,557	(74%)
Asymptomatic infections	1,347	(18%)
Hospitalizations*	7,101	(94%)
Deaths†	1,507	(20%)

\*1,816 (26%) of 7,101 hospitalizations reported as asymptomatic or not related to COVID-19.

†316 (21%) of 1,507 fatal cases reported as asymptomatic or not related to COVID-19.

Previous data on all vaccine breakthrough cases reported to CDC from January–April 2021 are [available](#).

## How to interpret these data

The number of COVID-19 vaccine breakthrough infections reported to CDC likely are an undercount of all SARS-CoV-2 infections among fully vaccinated persons. National surveillance relies on passive and voluntary reporting, and data might not be complete or representative. These surveillance data are a snapshot and help identify patterns and look for signals among vaccine breakthrough cases.

Data on patients with vaccine breakthrough infection who were hospitalized or died will be updated regularly. Studies are being conducted in multiple U.S. sites that will include information on all vaccine breakthrough infections regardless of clinical status to supplement the national surveillance.

## Case Details

VAERS ID: 1505250 [\(history\)](#) Vaccinated: 2021-07-01  
Form: Version 2.0 Onset: 2021-07-27  
Age: 13.0 Days after vaccination: 26  
Sex: Female Submitted: 0000-00-00  
Location: Maryland Entered: 2021-07-27

To All:

We are properly constituted and have sufficient States of the Union populated and able to conduct business for The United States of America, our Federation of States, and also The United States, our unincorporated Union of republican states. The remaining States are in the process of assembly.

We issue this Decree Over Mandate to exercise our Lawful Government and to remove all presumption of Agency, Emergency, or Absence related to The United States of America.

We declare with full competency that we are Lawful American States and Lawful Persons to whom the Original Equity Contract known as The Constitution for the united States of America is owed. We further declare that we are owed the Good Faith and Service of the Municipal United States Government and the British Territorial United States Government.

### Declaration of Absolute Jurisdiction

The United States of America is an unincorporated Federation of Sovereign States organized as a Holding Company on 9 September 1776 to hold and to wield all Mutual Non-Domestic Powers of the separate States. The United States of America is the Delegator-in-Fact of all Powers ever delegated under any Federal, Territorial, or Municipal Constitution, and is the Final Arbiter of all contracts, obligations, and prerogatives exercised internationally by this country.

As our American Government is a Living Government and its sovereignty is firmly vested in the living people of The United States and exercised by the Lawful Persons of The United States of America, there can be no offer of contradictory authority from any foreign subcontractor nor any incorporated entity or agency working on a For Hire basis nor on a Voluntary basis nor acting upon Assumption of any prior contractual relationship. All foreign subcontractors — unincorporated, corporate, and incorporated — and all federal subcontractors, federal, territorial, and municipal, together with all franchises and agencies thereof, are obligated to stand subject to our authority while proposing any action whatsoever in our behalf.

With this acceptance and acknowledgement of the Absolute Jurisdiction of The United States of America non-domestic to The United States, all Parties to all agreements, all treaties, and all service contracts established by The United States of America, held in trust for The United States of America, or creating any contractual obligation related to The United States of America, agree to Honor their obligations and to abide by the Public and Organic Law of this country without evasion, obfuscation, or constructive fraud. We, Lawful Persons born on the land and soil of our respective States of the Union, are not subject to any foreign federal citizenship obligation, being neither British United States Citizens nor Municipal citizens of the United States, two capacities created by the three constitutional agreements known as: The Constitution of the united States of America (1787), The Constitution of the United States of America (1789) and The Constitution of the United States (1790). We do not accept, nor do we adopt any foreign citizenship at all. We are not members of any religious cult and not party to any consecration invoked by Franklin Delano Roosevelt.

We, American People, are American state nationals as recognized by the Territorial Federal Code at: 8 USC 1101 (a) 21 by birth, and also may choose to serve in the capacity of State Citizens, as further recognized at: 8 USC 1101 (a) 22 (B).

We, States and People of this country, are today faced with the necessity of addressing numerous misunderstandings, usurpations, and criminal activities including Gross Breach of Trust and Fraud on the part of our Foreign Service Providers.

Our States of the Union, all unincorporated members of the Federation of States doing business as The United States of America, which is itself an unincorporated Holding Company formed September 9, 1776, were never involved in the so-called American Civil War, which was a Mercenary Conflict among members of the Confederation of States of States formed under The Articles of Confederation issued March 1, 1781.

That is, business organizations chartered by our States to act as Service Providers, went to war on our soil. The original Confederation was split into Northern States of States and Southern States of States. The Northern Confederation was joined by the British Territorial Government doing business under our name and operating under our delegated power as the United States of America. The Southern Confederation was joined by the Municipal United States Government doing business under our name and operating under our delegated power as the United States.

None of this has ever had anything to do with us, our Federation doing business as The United States of America, nor with our individual States, nor with the civilian populace occupying the land and soil of this country. This was a squabble between Federal Service Providers on our soil — all run amok — and continuing to stage a cold mercenary war on our soil, as a means to profit themselves for the past 150 years. If these Federal Service Providers were in fact under some separate hegemony there might be an excuse for their behavior in the absence of an official Peace Accord settling the American Civil War, however, a closer examination of the circumstance shows that in fact:

The Queen acts as the Pope's Overseer and Administrator over the British Territorial United States which is a Commonwealth, and the Pope's Municipal Administrators function in the same role over the Municipal United States; thus, we are treated to the spectacle of two Roman Catholic corporations in the business of providing governmental services pretending to be at war with each other, while in fact being under the same ultimate ownership.

This is your Notice of International and Global Fraud on an unimaginable scale; we, as an entire country, have suffered a national level identity theft, at the hands of Federal Service Providers acting under contract and treaty, and receiving their paychecks from our largesse. It would be bad enough if we were the only country impacted by this fraud, but we find that many other national governments have been similarly undermined by the same players — the British Monarchs and the Popes.

### Declaration of International Bankruptcy

An interlocking trust directorate scheme involving more than 150 major corporations worldwide has been employed to establish what can only be described as Corporate Feudalism, a control system that enslaves

the population of this planet and serves the same purposes as Colonialism, that is, to rob resources from less developed countries for the benefit of criminal activities and control mechanisms established via illegal patents and trademarks.

.These corporations stand forfeit and in liquidation for cause as crime syndicates and we insist that this system of oppression, like its Colonial predecessor, be shut down as a repugnant criminal enterprise serving to undermine national self-determination and individual freewill.

This is a Declaration for the Insolvent Debtors which are the United States (Incorporated)— a Municipal Corporation, and also for the United States of America (Incorporated), their actual Secondaries which are insurance companies and banks and foreign governments, their Heirs which are governmental services corporations, and their Assigns, which are various international organizations including the United Nations and the UN Corporation. This Declaration is issued by the Priority Creditors in fact.

These insolvencies and attendant procedures create a state of continuing reckless endangerment of the American people and results in criminal obstruction of their rights as Creditors and also results in various improper claims and impediments being imposed upon their assets. Action to reform the operations of these incorporated entities and to restructure and resolve this State of Emergency are required.

Bankruptcy and probate fraud are serious crimes. So is identity theft and impersonation. Making false claims or statements under penalty of perjury, concealing property, unlawful conversion of assets, obstruction of justice, improper securitization, false claims in commerce, counterfeiting, or obtaining money, resources, or property assets by means of fraud in connection with these insolvencies will result in severe punishment to the full extent of the American Common Law. Any of these or similar acts seeking to improperly encumber or convey or convert American assets will be considered crimes of piracy against the American people and their rightful living government.

This is not a declaration of any bankruptcy related to our Federation of States: The United States of America. The United States of America claims Gold Bonus 3392-181 along with all other actual lawful and legal assets owed to the American States and People and enforces its position as Primary Creditor, for Cause.

### Decree Cancelling Fraudulent Awards and Improper Probate

Most recently, Americans are being offered Arbitration Awards via the Municipal United States Government and large amounts of military script are being promised. These awards are thinly veiled bribes to those who agree to stand under the King's Law and adopt British Territorial United States Citizenship.

Those promoting this Arbitration Award scheme are advertising themselves as Americans and as Patriots when in fact any settlement of British Territorial debts owed to British Territorial Citizens has nothing to do with us, and receipt of any such settlement results in Americans surrendering their claim to be Americans and obliges them to accept British Territorial Citizenship instead.

The Arbitration Award Scheme not only fails to describe the situation accurately and does not disclose the source of the funds nor the basis of eligibility to receive the funds, but also fails to disclose the fact that the Innocents accepting this bribe will lose their claim to be American State Nationals, will lose their right to own land and soil in their own country, will lose their constitutional rights and guarantees, and will become obligated as chattel backing the debts of the British Monarch and the Pope.

This is, in effect, a form of press-ganging, as it offers monetary inducement under undisclosed conditions, and results in the victims entering into unconscionable contracts that effectively kidnap them off the land and soil of this country and into the international jurisdiction of the sea, without any disclosure of the losses which will attend their acceptance of any such offer.

It is additionally inequitable and criminal in nature, because the military script being offered as a reward for accepting this Arbitration Award is in fact being generated from the victim's own property assets, which will be considered donated as gifts to the British Monarch — and through the British Monarch to the Pope — upon their acceptance. Thus, the offer is a false offer to begin with. They are, in effect, offering to pay the victims using the victim's own assets.

A similar condition exists with respect to what we shall call The Dead Baby Scam.

The British Territorial Service Providers set up a Public Charitable Trust for the welfare relief of American Negro Plantation Workers who were displaced by the American Civil War.

They conscripted American doctors, nurses, and dentists under Color of Law and imposed licensing regulations on them as if they were legitimately British Territorial Citizens, using their own Uniformed Officers Code, and coercing civilians to comply under false pretenses.

Next, they required these conscripts to falsify hospital records in such a way as to make it appear that all the women giving birth were unwed Mothers. According to them, all the babies born in America, are born without Fathers--- which would amount to millions of illegitimate children and not a married woman in the whole country, including Catholics.

Next, they imposed upon these women to unknowingly donate their babies as wards of the British Territorial Government franchises operating as States of States organizations. This is done by importuning them to sign undisclosed private contracts, making it appear that all these purportedly unwed mothers were voluntarily surrendering unwanted children to the mercy of the British King.

Like the Arbitration Award Scam, this results in the victims being trafficked off their native soil and into the international jurisdiction of the sea, where they are misidentified as wards of the British United States Territorial commonwealth administered by the British Monarch. The British Monarch then splits the take with the Pope's other business operation, the Municipal United States Government.

In this manner, both the British Monarch and Pope got their hooks into Americans who are owed their Good Faith Service, instead of their malicious chicanery.

The victim's assets are then dumped into the Public Charitable Trust (PCT) created for the welfare relief of displaced plantation workers—and administered under Dead Letters of Administration issued by Territorial Courts to members of the British Bar Association. So the Pope hires the King and the King hires the Bar Associations to do the dirty work in the field, and all this criminality runs rampant in the international jurisdiction of the sea without a single hand or voice being raised in behalf of the suffering people of this planet, most of whom have been mis-represented in the same manner.

A third example of the depravity, criminality, Bad Faith, and incompetence of these erstwhile Federal Service Providers is found in the so-called Internal Revenue Service established by the British Territorial United States Government doing business in our names as "the" United States of America, and the IRS, a municipal corporation established by the Municipal United States Government, ostensibly to collect taxes from persons who were legitimately either United States Citizens or Municipal citizens of the United States.

The operations of these two separate but similarly named entities exist to collect taxes on income earned by actual Municipal and Territorial Corporations and Federal Employees, both British Territorial United States Citizens and their dependents in the military, and Municipal United States citizens and their dependents operating in various capacities.

No American State National or American State Citizen was ever legitimately subject to an income tax on their earnings, wages, salaries, business profits, or other gain from honest employment of any kind, but by various means of constructive fraud and undisclosed contracting processes the offending Federal Service Providers contrived to evidence false claims and extort income taxes from American State Nationals and American State Citizens under color of law and pretense of valid private contract.

In the case of the Territorial United States Government, the basis for these false claims were primarily established via The Dead Baby Scam. In the case of the Municipal United States, the basis for these false claims were based on purportedly "voluntary" participation in Federal Social Security programs that are not supposed to be available to the Public, and upon hidden novation contracts embedded in the 1040 Tax Forms people filled out and also upon their innocent participation in The Victory Tax Program adopted by the Municipal United States Congress during World War II.

Suffice it to say that average Americans are not organized as Personal Corporations and do not accrue federal corporate income, did not voluntarily nor knowingly create any intestate infant decedent estate nor donate any such thing to any Public Charitable Trust, did not willingly participate in the Municipal Government's pension program known as Social Security, were not the Parties being addressed when Franklin Delano Roosevelt "consecrated" the Municipal United States Government as a religious cult during his First Inaugural Address, and are not rendered "citizens" of either one of these foreign Federal Service Providers as a result of obeying what they believed were legitimate demands made upon them by Undeclared Foreign Agents improperly exercising positions of delegated authority and trust.

As a result, both these organizations, the Internal Revenue Service and the IRS, have been collecting billions of dollars-worth of taxes under False Pretenses and under Color of Law, from people who are actually their Employers and who are not subject to any such tax.

Again, we find that the Pope and the Roman Curia and their gross misadministration of Government Services Corporations, both Territorial and Municipal, are responsible for this criminality.

Even upon a diligent review of the circumstance we can find no plausible excuse for this behavior and these viciously enforced legal presumptions, beyond criminal and self-interested motives. Millions of innocent Americans have been preyed upon by these Territorial and Municipal corporations, both ultimately operated by the Roman Catholic Church— which has been grotesquely misusing the powers delegated and entrusted to these Principals under the terms of the Constitutions allowing them to be on our soil in the first place.

Mr. Charles Rettig, Commissioner in charge of these foreign tax agencies, is hereby served Notice that no debts are to be alleged and no income taxes are to be collected from any American State National or American State Citizen. No liens against our property assets public nor private are to be established or maintained against our names or any abbreviation, permutation, ordering, punctuation, variation or combination of names, now or at any time in the future. American State Nationals and American State Citizens are exempt from all such non-domestic (with respect to us) taxes, tariffs, and fees. All improper collection processes must immediately cease and desist, and all fraudulent liens, garnishments, and similar actions must be released. Living people and Lawful Persons are exempt and corporations issued in our Names/NAMES are tax pre-paid.

The only persons subject to Federal Income Taxes are actual Federal Employees and their Dependents, and that is a private obligation resulting from their employment with these Foreign Service Providers.

No unconscionable contract resulting from The Dead Baby Scam, and no other contracts lacking full disclosure, such as the Arbitration Award Scam, will be honored anywhere in these United States. Any attempt to improperly allege or collect Federal taxes or State of State franchise taxes so as to seize upon the property assets of American State Nationals or American State Citizens will be recognized as criminal trespass upon private property, racketeering, attempted unlawful conversion of assets, and attempted inland piracy. We hold the Pope and the Queen ethically and commercially responsible for properly directing and informing their employees to avoid all such criminal trespasses and criminal activities

Constructive foreclosure fraud by the municipal commercial banks is yet another example of lawless predatory behavior on the part of our Service Providers and their interlocking trust directorate. Millions of Americans have been evicted from their homes and other properties as a result of non-disclosed contracts and deceitfully misrepresented lending practices. Many more Americans have paid mortgages that they never owed.

We, The United States of America, bring our Decree Over Mandate before the face of Pope Francis, as he and his Predecessors are the owners of and have oversight as the actual operators of both the British Territorial Commonwealth and the Municipal United States Government. Clearly, they have colluded in conspiracy to overturn and make a mockery of our Constitutional Agreements and have evaded their own settled obligations and moral duties.

We, The United States of America, bring these issues before the face of the Vatican Chancery Court in the Person of Cardinal H.E. Cardinal Dominique Mamberti and before Pope Francis in the presence of these Witnesses and issue our Decree Over Mandate established by the various Constitutions and international treaties owed to us: we demand that these afore-described and all similar criminal activities, misrepresentations, and self-serving Legal Presumptions and Practices executed under the Rule of Law in avoidance of the Law, immediately and permanently — cease. By so doing, we do not offer to subject ourselves to the Vatican Chancery Court and are instead forcing it to observe its own duty in public.

We, The United States of America, want the world to know what kind of Business Partners and Allies the Popes and the British Monarchs have proven to be, and we want them exposed as the driving forces behind enslavement of our people, manipulation of world commodity markets, and perpetual war for profit. Obviously, the Popes and the British Monarchs have been secretly acting as criminals and playing both ends against the middle for decades while the rest of us slept on, trusting them to do the right thing.

We, The United States of America, bring these issues before the face of the Prosecutor of the International Criminal Court and before the faces of the Justices of the International Court of Justice and we publish our Decree Over Mandate before these Witnesses; again, not to subject ourselves to these Courts, but to force their action and deny them any plausible deniability otherwise. They either do their jobs with honor or they stand bankrupt of any law or moral code.

We, The United States of America, bring our demand for remedy for all those Americans who have been mistreated, misled, defrauded, robbed and misrepresented as a result of the described criminality, including mischaracterization of their political status and improper probate of their estates. We, The United States of America, similarly Decree Over Mandate and demand the return of all right, title, and interest owed to the American States and to the American People and furthermore demand restoration of all right, title, and interest owed to our unincorporated Federation of States: The United States of America —free and clear of Odious Debt and Encumbrances.

We, The United States of America, bring our information before the face of the United Nations organization in the Person of Antonio Guterres, and call upon the nations of the world to address this criminality and put an end to these plots to undermine the national governments that are members of the United Nations organization.

### Decree Concerning Delegation of Powers Imposed

All members of the Armed Forces who are loyal to the actual Government of this country properly known as The United States of America and to the Constitutions established by The United States of America and its member States, are authorized and obligated to protect the American States and People and to use any necessary force to do so. They have our authorization and the duty and the obligation to arrest international criminals on our shores, including illegal immigrants, foreign diplomats, kidnappers, pirates, securities agents engaged in the bonding of living flesh, other human traffickers, members of the Bar Associations engaged in unlawful conversion and barratry, members of the Bar Associations engaged in the creation or enforcement of fraudulent or criminal patents, trademarks, and copyrights, Roman

Catholic priests and administrators operating in Breach of Trust, persons engaged in unlawful contracting processes, and anyone else who offers to do our country and our people harm. And no member of any military force of the United States nor of the United States of America is in any way empowered to attack, undermine, mis-characterize, misidentify, or unreasonably inconvenience any State of the Union nor are they nor any foreign subcontractors in their employ, enabled to attack, undermine, mis-characterize, misidentify, or unreasonably inconvenience any Lawful American Person, which would be and is in violation of their Constitutional Service Contracts, Geneva Conventions and Hague Conventions governing their operations here and abroad.

We, The United States of America, issue and publish and serve this Decree Over Mandate without apology. This outrageous circumstance has gone on for over two decades without meaningful correction.

We, as people, are not deceived nor are we deceiving. These Evils have been practiced in the sight of The Living God by those pretending to represent Him in the same way that they have practiced Evils in our names. We, the living people, who are formed by an Act of The Living God and who belong to Him only, who are not property of any earth-bound Father or Mother, who inherit the Earth and The Kingdom of Heaven, who are not subject to any religion, are here and now.

We affirm that what we have said herein is true, complete, correct, and not misleading under the penalty of perjury under the Public Law of The United States of America:

By:  James Clinton Belcher, Head of State  
The United States of America

By:  Anna Maria Riezinger, Fiduciary  
The United States of America

Notice to Principals is Notice to Agents; Notice to Agents is Notice to Principals under International Declaration; not subject to Representation nor Power of Attorney; not subject to Alteration, not a British Copyright, not a Municipal Trademark.

Witnessed by: Notary Jurat and Living Witnesses

Notary Jurat

Alaska  
Matanuska Susitna County

I, a duly commissioned Public Notary, was visited this 14 day of October in the year 2019 by the living man known to me as James Clinton Belcher and the living woman known to me as Anna Maria Riezinger

Page 9 of 10

and they did sign and seal this Decree Over Mandate in multiple original copies in my presence and I do thus affirm that this action took place at Big Lake, Alaska, on this day; and, I so affirm the same under penalty of perjury under the laws of the United States of America: so signed and sealed:

Jo G. Cassidy Notary; my commission expires on: Oct. 12. 2021

To: Paul Stramer at EurekaDSL.net <pstramer@eurekadsl.net>

### Decree Over Mandate

When we established the Constitutions --- Federal, Territorial, and Municipal, we delegated some of our established "Powers" to be exercised "for" us by others.

So, naturally, there had to be a "Delegator" of these "Powers" and there had to be stipulated "Delegates" receiving and exercising these "Powers" in our behalf.

As the Preambles of the Constitutions clearly state, the Delegation is made by the "People" of this country. The People are defined as the State Citizens and their State Governments. The State Governments in turn function together in international jurisdiction through their unincorporated Federation of States, doing business as The United States of America.

The United States of America is a Holding Company, and what it holds are all the rights and prerogatives of the sovereign states/States that they exercise in common in international and global jurisdiction.

Thus, The United States of America is the "Delegator" of the "Powers" shared out under the Constitutions.

Who are the "Delegates"?

The first Constitution (1787) called the Federal Constitution and/or "Original Equity Contract", delegates Powers to the Confederation of States formed March 1, 1781 and doing business as the States of America. The Powers assigned ran a gamut of responsibilities related to international business affairs, law enforcement, military operations, tax collection, and oversight.

The second Constitution (1789) called the Territorial Constitution delegates Powers to the British Territorial United States Government to exercise for us in the International Jurisdiction of the Sea. The Powers assigned relate largely to Naval Operations and international tariffs and trade policies.

The third Constitution (1790) called the Municipal Constitution delegates Powers to the Pope's Municipal (City-State) Government to exercise for us in the Global Jurisdiction of the Air. The Powers assigned relate to Postal Service, Patents, Trademarks, and similar functions.

So: Delegator: The United States of America -- our unincorporated Federation of States.

Delegates: (1) the Confederation of States formed March 1, 1781 doing business as the States of America -- - which has been inoperative since 1860; (2) the British Territorial United States Government --- a British Commonwealth Government doing business under our name as "the" United States of America; (3) the Pontiff's Roman Municipal Government doing business under our name as "the" United States.

When the States of America confederation ceased operations, the Delegated Powers assigned to it immediately reverted to the Delegator -- The United States of America, but, conveniently, nobody told us what was going on in the chaos and confusion after the Civil War.

The Grand Army of the Republic came in and began "administrating" everything under Admiralty Law on the Sea and General Order 100 -- The Lieber Code -- on the land, pending the Reconstruction of the States of America organization. And that is where it has remained -- in limbo -- for over 150 years, waiting for the Reconstruction to be completed.

Because we were operating in this offbeat fashion and other countries had to interact with us, they began operating in the same way. The Hague Conventions and the Geneva Conventions were adopted to facilitate this new organizational scheme in which countries were presumed to be occupied by Armed Forces awaiting the "return" of civilian government.

The Perpetrators of this circumstance --- Generals and Admirals who benefited from the exercise of political power not vouchsafed to them, and foreign governments that gained economic advantages by preying upon people and the assets belonging to the people of each country began a conspiracy of silence and collusion and formatted their operations through commercial corporations.

The Central Banks were established to expedite this process and various institutionalized fraud schemes were set up to make "harvesting" the value of our labor and other resources efficient. These have included the IRS/Internal Revenue Service, the fraudulent Land Titles schemes, the bogus Foreclosures, the

Conscription via military drafts and Uniformed Officers Codes, The Dead Baby Scam, and many more automated schemes controlled by patents and trademarks and other control systems.

And they are all kaput as of 14 October 2019.

We pulled the plug and issued our Decree Over Mandate on that day.

So what is a "Decree Over Mandate"?

Each Constitution creates a "Public Mandate" that granted sweeping powers to each of the Delegates --- all to be exercised under conditions of strictest International Treaty and Trust Obligation. Such a Mandate is very powerful in keeping with the extensive Powers granted, but it remains Subject to Decree by the Delegator: The United States of America -- unincorporated.

The United States of America -- our unincorporated Federation of States -- summoned the States of the Union to Assemble and has overcome the obstacles placed in the way of Americans seeking to exercise their lawful authority. A majority of properly constituted States have now Assembled and The United States of America has issued a Decree Over Mandate ordering relief and directing the financial affairs of the country for the first time since the Civil War.

The first order of business beyond declaring the proper authority has been to bust the physical human trafficking and pedophile rings operating in our formerly defenseless international land jurisdiction.

The second order of business has been to set our financial affairs in order, locate and organize our assets, and declare all these foreign corporations bankrupt and subject to the Primary Creditors --- the People of this country and every other country on Earth.

The third order of business is to begin the process of securing remedy and relief for all those who have been enslaved --- specifically, an end to the false claims of debt, "protective" asset seizures, phony loans and mortgages, forced registration of assets and similar usurpation and oppression carried out against the living people of this country and this planet.

We have also nipped all threats of "Civil War" in the bud; both the Territorial and Municipal Corporations are ultimately under the Pope's control and ownership, and he cannot fight against himself. So we no longer have to put up with that threat and all the associated garbage. We know who is accountable and we will hold them accountable.

This action made possible by the tireless efforts of The American States Assembly organizers marks the onset of the Re-Venue of all physical assets to the possession of living people, the end of Corporate Feudalism, and the end of Martial Law being imposed on civilians in this country. The Reconstruction necessary to restore our fully functioning Federal Government will not be far behind.

If you have not yet declared your proper political status and stepped forward to serve your country, go to: [www.TheAmericanStatesAssembly.net](http://www.TheAmericanStatesAssembly.net).

A complete jpeg copy of the Decree Over Mandate is now published and available (or soon will be) at: [www.TheAmericanStatesAssembly.net](http://www.TheAmericanStatesAssembly.net) and [www.annavonreitz.com](http://www.annavonreitz.com) websites.

# HEALTH FREEDOM

## DEFENSE FUND

### NOTICE TO EMPLOYERS

March 11, 2021

This serves as notice that any compulsory COVID-19 testing requirement imposed upon an employee violates federal law.<sup>1</sup> Title 21, Section 360bbb-3 of the Federal Food, Drug, and Cosmetic Act (the “FD&C Act”) vests the Secretary of Health and Human Services with the permissive authority to grant Emergency Use Authorizations (“EUAs”). However, the statute requires that:

**individuals to whom the product is administered are informed—**

- (I) that the Secretary has authorized the emergency use of the product;
- (II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

On February 4, 2020, the Food and Drug Administration (“FDA”) issued an EUA authorizing the Centers for Disease Control and Prevention (“CDC”) emergency use for the first Real-Time Reverse Transcriptase (RT) -PCR Diagnostic Panel. The EUA was issued under and is subject to the statute noted above. Accordingly, any individual to whom the RT-PCR test is administered has the right under federal law to refuse administration of the test.

Since the EUA for the CDC’s RT-PCR test, an additional 345 testing kits manufactured by various companies or organizations have received emergency use authorization. Each and every one of these tests has been authorized for emergency use under the statute quoted above. Accordingly, in each instance, no one can be forced to take the test. To do so would violate both the federal statute noted above, and the emergency authorization allowing the use of the test. This information can be verified at the following link: [Emergency Use Authorization | FDA](#).

Each of the 346 EUA letters references its reliance on 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III), stating:

This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of SARS-CoV-2 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

The FDA has also recognized in each of the 346 EUAs issued to date that no alternative to the tests issued under 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) exists. Accordingly, no COVID-19 tests exist that may be used in a mandatory fashion.

We at the Health Freedom Defense Fund urge U.S. employers to comply with the FD&C Act and the terms of the 346 EUAs listed at the above referenced link, and advise all employees that they have the right to refuse to take any COVID-19 tests. Any other course of action is contrary to federal law.

---

<sup>1</sup> Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III).

# Emergency Use Authorization for Vaccines Explained

Español (<https://www.fda.gov/vaccines-blood-biologics/vaccines/explicacion-de-la-autorizacion-de-uso-de-emergencia-para-las-vacunas>)

FDA is globally respected for its scientific standards of vaccine safety, effectiveness and quality. The agency provides scientific and regulatory advice to vaccine developers and undertakes a rigorous evaluation of the scientific information through all phases of clinical trials, which continues after a vaccine has been approved by FDA or authorized for emergency use.

FDA recognizes the gravity of the current public health emergency and the importance of facilitating availability, as soon as possible, of vaccines to prevent COVID-19 - vaccines that the public will trust and have confidence in receiving.

## What is an Emergency Use Authorization (EUA)?

An Emergency Use Authorization (EUA) is a mechanism to facilitate the availability and use of medical countermeasures, including vaccines, during public health emergencies, such as the current COVID-19 pandemic. Under an EUA, FDA may allow the use of unapproved medical products, or unapproved uses of approved medical products in an emergency to diagnose, treat, or prevent serious or life-threatening diseases or conditions when certain statutory criteria have been met, including that there are no adequate, approved, and available alternatives. Taking into consideration input from the FDA, manufacturers decide whether and when to submit an EUA request to FDA.

Once submitted, FDA will evaluate an EUA request and determine whether the relevant statutory criteria are met, taking into account the totality of the scientific evidence about the vaccine that is available to FDA.

## Are the COVID-19 vaccines rigorously tested?

Yes. Clinical trials are evaluating investigational COVID-19 vaccines in tens of thousands of study participants to generate the scientific data and other information needed by FDA to determine safety and effectiveness. These clinical trials are being conducted according to the rigorous standards set forth by the FDA.

Initially, in phase 1, the vaccine is given to a small number of generally healthy people to assess its safety at increasing doses and to gain early information about how well the vaccine works to induce an immune response in people. In the absence of safety concerns from phase 1 studies, phase 2 studies include more people, where various dosages are tested on hundreds of people with typically varying health statuses and from different demographic groups, in randomized-controlled studies. These studies provide additional safety information on common short-term side effects and risks, examine the relationship between the dose administered and the immune response, and may provide initial information regarding the effectiveness of the vaccine. In phase 3, the vaccine is generally administered to thousands of people in randomized, controlled studies involving broad demographic groups (i.e., the population intended for use of the vaccine) and generates critical information on effectiveness and additional important safety data. This phase provides additional information about the immune response in people who receive the vaccine compared to those who receive a control, such as a placebo.

## What safety and effectiveness data are required to be submitted to FDA for an EUA request for a vaccine intended to prevent COVID-19?

COVID-19 vaccines are undergoing a rigorous development process that includes tens of thousands of study participants to generate the needed non-clinical, clinical, and manufacturing data. FDA will undertake a comprehensive evaluation of this information submitted by a vaccine manufacturer.

For an EUA to be issued for a vaccine, for which there is adequate manufacturing information to ensure quality and consistency, FDA must determine that the known and potential benefits outweigh the known and potential risks of the vaccine. An EUA request for a COVID-19 vaccine can be submitted to FDA based on a final analysis of a phase 3 clinical efficacy trial or an interim analysis of such trial, i.e., an analysis performed before the planned end of the trial once the data have met the pre-specified success criteria for the study's primary efficacy endpoint.

From a safety perspective, FDA expects an EUA submission will include all safety data accumulated from phase 1 and 2 studies conducted with the vaccine, with an expectation that phase 3 data will include a median follow-up of at least 2-months (meaning that at least half of vaccine recipients in phase 3 clinical trials have at least 2 months of follow-up) after completion of the full vaccination regimen. In

addition, FDA expects that an EUA request will include a phase 3 safety database of well over 3,000 vaccine recipients, representing a high proportion of participants enrolled in the phase 3 study, who have been followed for serious adverse events and adverse events of special interest for at least one month after completion of the full vaccination regimen.

Part of FDA's evaluation of an EUA request for a COVID-19 vaccine includes evaluation of the chemistry, manufacturing, and controls information for the vaccine. Sufficient data should be submitted to ensure the quality and consistency of the vaccine product. FDA will use all available tools and information, including records reviews, site visits, and previous compliance history, to assess compliance with current good manufacturing practices.

## What is the process that manufacturers are following to potentially make a COVID-19 vaccine available by EUA?

- Vaccine manufacturers are undertaking a development process that includes tens of thousands of study participants to generate non-clinical, clinical, and manufacturing information needed by FDA for the agency to determine whether the known and potential benefits outweigh the known and potential risks of a vaccine for the prevention of COVID-19.
- When the phase 3 portion of the human clinical trial reaches a predetermined point that informs how well a vaccine prevents COVID-19, as discussed and agreed to in advance with FDA, an independent group (called a data safety monitoring board) will review the data and inform the manufacturer of the results. Based on the data and the interpretation of the data by this group, manufacturers decide whether and when to submit an EUA request to FDA, taking into consideration input from FDA.
- After FDA receives an EUA request, our career scientists and physicians will evaluate all of the information included in the manufacturer's submission.
- While FDA's evaluation is ongoing, we will also schedule a public meeting of our Vaccines and Related Biological Products Advisory Committee, which is made up of external scientific and public health experts from throughout the country. During the meeting, these experts, who are carefully screened for any potential conflicts of interest, will discuss the safety and effectiveness data so that the public and scientific community will have a clear understanding of the data and information that FDA is evaluating to make a decision whether to authorize a COVID-19 vaccine for emergency use.
- Following the advisory committee meeting, FDA's career professional staff will consider the input of the advisory committee members and continue their evaluation of the submission to determine whether the available safety and effectiveness and manufacturing data support an emergency use authorization of the specific COVID-19 vaccine in the United States.

## Who are the FDA career professionals evaluating EUAs for vaccines?

The FDA staff are career scientists and physicians who have globally recognized expertise in the complexity of vaccine development and in evaluating the safety and effectiveness of all vaccines intended to prevent infectious diseases. These FDA professionals are committed to decision-making based on scientifically driven evaluation of data. FDA staff are like your family - they are fathers, mothers, daughters, sons, sisters, brothers and more. They and their families are also directly impacted by the work that they do, and are exactly who you want making these important public health decisions for the United States.

## What are the plans for continued monitoring of COVID-19 vaccines authorized by FDA for emergency use?

FDA expects vaccine manufacturers to include in their EUA requests a plan for active follow-up for safety, including deaths, hospitalizations, and other serious or clinically significant adverse events, among individuals who receive the vaccine under an EUA, to inform ongoing benefit-risk determinations to support continuation of the EUA.

FDA also expects manufacturers who receive an EUA to continue their clinical trials to obtain additional safety and effectiveness information and pursue licensure (approval).

Post-authorization vaccine safety monitoring is a federal government responsibility shared primarily by FDA and the U.S. Centers for Disease Control and Prevention (CDC), along with other agencies involved in healthcare delivery. Post-authorization safety monitoring during the COVID-19 pandemic vaccination program will aim to continuously monitor the safety of COVID-19 vaccines to rapidly detect safety problems if they exist. There will be multiple, complementary systems in place with validated analytic methods that can rapidly detect signals for possible vaccine safety problems. The U.S. government has a well-established post-authorization/post-approval vaccine safety monitoring infrastructure that will be scaled up to meet the needs of a large-scale COVID-19 vaccination program. The U.S. government – in partnership with health systems, academic centers, and private sector partners – will use multiple existing vaccine safety

monitoring systems to monitor COVID-19 vaccines in the post-authorization/approval period. Some of these systems are the Vaccine Adverse Event Reporting System (VAERS), the Vaccine Safety Datalink (VSD), the Biologics Effectiveness and Safety (BEST) Initiative, and Medicare claims data.

## How will vaccine recipients be informed about the benefits and risks of any vaccine that receives an EUA?

FDA must ensure that recipients of the vaccine under an EUA are informed, to the extent practicable given the applicable circumstances, that FDA has authorized the emergency use of the vaccine, of the known and potential benefits and risks, the extent to which such benefits and risks are unknown, that they have the option to accept or refuse the vaccine, and of any available alternatives to the product. Typically, this information is communicated in a patient "fact sheet." The FDA posts these fact sheets on our website.

## How is it that COVID-19 vaccines have been developed so quickly?

In public health emergencies, such as a pandemic, the development process may be atypical. For example, as demonstrated by the response to the COVID-19 pandemic, the U.S. government has coalesced government agencies, international counterparts, academia, nonprofit organizations and pharmaceutical companies to develop a coordinated strategy for prioritizing and speeding development of the most promising vaccines. In addition, the federal government has made investments in the necessary manufacturing capacity at its own risk, giving companies confidence that they can invest aggressively in development and allowing faster distribution of an eventual vaccine. However, efforts to speed vaccine development to address the ongoing COVID-19 pandemic have not sacrificed scientific standards, integrity of the vaccine review process, or safety.

Recognizing the urgent need for safe and effective vaccines, FDA is utilizing its various authorities and expertise to facilitate the expeditious development and availability of vaccines that have met the agency's rigorous and science-based standards for quality, safety, and effectiveness. Early in a public health crisis, FDA provides clear communication to the pharmaceutical industry pertaining to the scientific data and information needed to ensure development of vaccines and works quickly to provide advice on their proposed development plans and assessment of the data that are generated.

## 20 MECHANISMS OF INJURY (MOI)

Compiled by Dr. Sherri Tenpenny

[www.DrTenpenny.com](http://www.DrTenpenny.com)

**The 20 MOI can be aggregated into 4 groups**

1. Acute reactions (anaphylaxis, cardiac arrest)
2. Illness/Damage caused by spike proteins
3. Illness/Damage caused by anti-S-antibody
4. Illness/Damage to immune system (macrophage damage, ADE, original antigenic sin, etc)

### ACUTE REACTIONS

**MOI #1** anaphylaxis/PEG:

<https://www.sciencedirect.com/science/article/pii/S2451945619300352>

### INJURY RELATED TO SPIKE PROTEIN

**MOI #2** - spike protein - immobilize M2 macrophages:

<https://insight.jci.org/articles/view/123158>

**MOI #3** - spike proteins - cardiac damage:

<https://www.salk.edu/news-release/the-novel-coronavirus-spike-protein-plays-additional-key-role-in-illness>

## NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS MANDATING COVID-19 VACCINES

*Revised 6/4/21*

This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely “may be effective.” Federal law states:

Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:

**individuals to whom the product is administered are informed—**

- (I)** that the Secretary has authorized the emergency use of the product;
- (II)** of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). The court held: “...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs.” *Id.* at 135. No court has ever upheld a mandate for an EUA vaccine.

The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.

This notice is adapted from materials at Health Freedom Defense Fund, <https://healthfreedomdefense.org/>

Dear County Board of Supervisors

**Mandating Vaccination to reduce the spread of Covid is misguided. Israel has one of the highest vaccination rates in the world and the Health Ministry has discovered that the infection rate of vaccinated individuals is the same as unvaccinated individuals.** The vaccines are not stopping the Delta variant. See the chart below.

Forcing an experimental Vaccine on individuals that will not reduce the spread of Covid is unconscionable, considering that increasing individual's immune systems using Vitamin D, C, Zinc and Quercetin, would do more to protect the population. Ivermectin has successfully prevented and treated Covid infections throughout the world including a 93% reduction in cases in India during their recent surge. See **www.FLCCC.net** for more details and protocol specifics and Ivermectin study results.

Do not require vaccination for County Employees or the general public as it will cause more harm than good. See the CDC VAERS database showing 12,000 deaths due the Vaccine and thousands of heart and circulatory problems in young men.

Israel Confirmed Cases, June 27 <sup>th</sup> – July 3 <sup>rd</sup> , Vaccinated vs. Unvaccinated				
Age Group	Cases, Vaccinated	Cases, Unvaccinated	Percent of Cases Vaccinated	Percent of Population Vaccinated
20-29	95	25	79%	78%
30-39	133	33	80%	83%
40-49	175	33	84%	86%
50-59	127	18	88%	89%
60-69	134	16	89%	91%
70-79	90	7	93%	95%

# THE NUREMBERG CODE

## Permissible Medical Experiments

The great weight of the evidence before us is to the effect that certain types of medical experiments on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human experimentation justify their views on the basis that such experiments yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probably cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Of the ten principles which have been enumerated our judicial concern, of course, is with those requirements which are purely legal in nature — or which at least are so clearly related to matters legal that they assist us in determining criminal culpability and punishment. To go beyond that point would lead us into a field that would be beyond our sphere of competence. However, the point need not be labored. We find from the evidence that in the medical experiments which have been proved, these ten principles were much more frequently honored in their breach than in their observance. Many of the concentration camp inmates who were the victims of these atrocities were citizens of countries other than the German Reich. They were non-German nationals, including Jews and "asocial persons", both prisoners of war and civilians, who had been imprisoned and forced to submit to these tortures and barbarities without so much as a semblance of trial. In every single instance appearing in the record, subjects were used who did not consent to the experiments; indeed, as to some of the experiments, it is not even contended by the defendants that the subjects occupied the status of volunteers. In no case was the experimental subject at liberty of his own free choice to withdraw from any experiment. In many cases experiments were performed by unqualified persons; were conducted at random for no adequate scientific reason, and under revolting physical conditions. All of the experiments were conducted with unnecessary suffering and injury and but very little, if any, precautions were taken to protect or safeguard the human subjects from the possibilities of injury, disability, or death. In every one of the experiments the subjects experienced extreme pain or torture, and in most of them they suffered permanent injury, mutilation, or death, either as a direct result of the experiments or because of lack of adequate follow-up care.

Obviously all of these experiments involving brutalities, tortures, disabling injury, and death were performed in complete disregard of international conventions, the laws and customs of war, the general principles of criminal law as derived from the criminal laws of all civilized nations, and Control Council Law No. 10. Manifestly human experiments under such conditions are contrary to "the principles of the law of nations as they result from the usages established among civilized peoples, from the laws of humanity, and from the dictates of public conscience."

Whether any of the defendants in the dock are guilty of these atrocities is, of course, another question. Under the Anglo-Saxon system of jurisprudence every defendant in a criminal case is presumed to be innocent of an offense charged until the prosecution, by competent, credible proof, has shown his guilt to the exclusion of every reasonable doubt. And this presumption abides with the defendant through each stage of his trial until such degree of proof has been adduced. A "reasonable doubt" as the name implies is one conformable to reason — a doubt which a reasonable man would entertain. Stated differently, it is that state of a case which, after a full and complete comparison and consideration of all the evidence, would leave an unbiased,

unprejudiced, reflective person, charged with the responsibility for decision, in the state of mind that he could not say that he felt an abiding conviction amounting to a moral certainty of the truth of the charge.

If any of the defendants are to be found guilty under counts two or three of the indictment it must be because the evidence has shown beyond a reasonable doubt that such defendant, without regard to nationality or the capacity in which he acted, participated as a principal in, accessory to, ordered, abetted, took a consenting part in, or was connected with plans or enterprises involving the commission of at least some of the medical experiments and other atrocities which are the subject matter of these counts. Under no other circumstances may he be convicted.

Before examining the evidence to which we must look in order to determine individual culpability, a brief statement concerning some of the official agencies of the German Government and Nazi Party which will be referred to in this judgment seems desirable.

THE NUREMBERG CODE [from *Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law No. 10*. Nuremberg, October 1946–April 1949. Washington, D.C.: U.S. G.P.O, 1949–1953.]

## The COVID Freedom Act

---

AN ACT prohibiting the requirement of vaccinations by certain public and private entities, keeping the Capitol and legislative proceedings open to the public, protecting the freedom of worship, protecting the operation of private businesses, and prohibiting stay-at-home orders and curfews.

*Be it enacted by the Legislature of the State of [State]:*

### **Sec. 1. Definitions.** As used in this act:

(a) “Business entity” means any person or group of persons performing or engaging in any activity, enterprise, profession or occupation for gain, benefit, advantage or livelihood, whether for profit or not-for-profit. “Business entity” shall include, but not be limited to:

(1) Self-employed individuals, business entities filing articles of incorporation, partnerships, limited partnerships, limited liability companies, foreign corporations, foreign limited partnerships, foreign limited liability companies authorized to transact business in this state, business trusts and any business entity that registers with the secretary of state.

(2) Any business entity that possesses a business license, permit, certificate, approval, registration, charter or similar form of authorization issued by the state, any business entity that is exempt by law from obtaining such a business license, and any business entity that is operating unlawfully without such a business license.

(b) “Vaccination” means the introduction of a vaccine into the body to produce immunity to a specific disease or virus.

(c) “Ticket issuer” means an individual or entity providing tickets to an entertainment event, including any of the following:

(1) The operator of the venue where the entertainment event occurs.

(2) The sponsor or promoter of an entertainment event.

(3) A sports team participating in an entertainment event or a league whose teams are participating in an entertainment event.

(4) A theatre company, musical group, or similar participant in an entertainment event.

(5) An agent of any individual or entity described in subsections (1) through (4).

### **Sec. 2. Vaccination requirements prohibited.**

(a) A business entity doing business in the State of [State] shall not refuse to provide any service, product, admission to a venue, or transportation to a person because that person has or has not received a vaccination.

(b) A ticket issuer shall not penalize, discriminate against, or deny access to an entertainment event to a ticket holder because the ticket holder has or has not received a vaccination.

(c) No state, county, or local government entity or official in this state may require any person to receive a vaccination, with the following excepted persons:

(1) Employees of a hospital or other medical facility;

(2) Employees of a long-term elder care or nursing home facility; and

(3) Students or faculty of a public primary or secondary school, unless in the case of a student, the student’s parent or guardian is opposed to vaccinations and objects by a written sworn statement to the vaccination based on religious grounds or conscientiously held beliefs.

(d) No state, county, or local government entity or official in this state may require any to receive a vaccination as a condition for:

- (1) receipt of any government benefit;
- (2) receipt of any government services;
- (3) receipt of any government-issued license or permit;
- (4) entrance into any public building; or
- (5) use of public transportation.

(e) No state, county, or local government entity or official in this state shall provide any special privilege, financial benefit, or other incentive to any person for receiving a vaccination.

(f) Violation of any provision of this section is a severity level [7], nonperson felony.

(g) On a finding of the violation of subsection (a) or subsection (b) by a business entity, the court shall order the suspension of all licenses issued by the state or any subdivision of the state that are held by the business entity for a minimum of thirty days and a maximum of one year.

### **Sec. 3. Freedom of worship.**

(a) No state, county, or local government entity or official may in any way restrict the manner of any worship service or activity in this state.

(b) No state, county, or local government entity or official may suspend, regulate, or prohibit the conduct of any worship service or activity in this state, regardless of whether the worship service or activity is conducted inside a building, inside a temporary structure, or outdoors.

(c) No state, county, or local government entity or official may limit the number of participants of any worship service or activity in this state, other than by enforcing limitations on the number of persons in a building imposed by fire codes.

### **Sec. 4. The Capitol building open to the public.**

(a) The Capitol building of this state shall be open to the public between the hours of [8:00] A.M. and [5:00] P.M. on all weekdays, with the exception of public holidays.

(b) All meetings of all legislative committees shall be open to the public, and no restriction on the number of members of the public present in any meeting room shall operate to restrict the number of members of the public to less than [fifteen] persons.

(c) All meetings of the House of Representatives in the House Chamber shall be open to the public, and no restriction on the number of members of the public present in the House gallery shall operate to restrict the number of members of the public to less than [fifty] persons.

(d) All meetings of the Senate in the Senate Chamber shall be open to the public, and no restriction on the number of members of the public present in the Senate gallery shall operate to restrict the number of members of the public to less than [fifty] persons.

### **Sec. 5. Business activities protected.**

(a) No state, county, or local government entity or official may restrict any business activity in this state in a manner that prevents a business entity from providing its products or services to the public, provided that the business entity possesses all applicable licenses and permits to do business in this state. This provision supersedes any emergency powers exercised by the governor pursuant to [statutory location].

(b) No regulation of business activity imposed by the governor pursuant to the governor's emergency powers in [statutory location] shall have a duration of more than thirty days.

(c) Any regulation of business activity imposed by the governor pursuant to the governor's emergency powers in [statutory location] may be terminated by a majority vote of either chamber of the legislature.

**Sec. 6. Stay-at-home orders and curfews prohibited.**

(a) No state, county, or local government entity or official may require that a United States citizen remain at home. This provision supersedes any emergency powers exercised by the governor pursuant to *[statutory location]*.

(b) No state, county, or local government entity or official may impose upon a United States citizen any curfew based on an epidemic or other public health reason. This provision supersedes any emergency powers exercised by the governor pursuant to *[statutory location]*.

**Sec. 7. Severability.**

The provisions of this act are severable. If any part of this act is declared invalid or unconstitutional, that declaration shall not affect the part which remains.

## ABSTRACT

**Background** Vitamin D has an immunomodulatory role but the effect of therapeutic vitamin D supplementation in SARS-CoV-2 infection is not known.

**Aim** Effect of high dose, oral cholecalciferol supplementation on SARS-CoV-2 viral clearance.

**Design** Randomised, placebo-controlled.

**Participants** Asymptomatic or mildly symptomatic SARS-CoV-2 RNA positive vitamin D deficient (25(OH)D <20 ng/ml) individuals.

**Intervention** Participants were randomised to receive daily 60 000 IU of cholecalciferol (oral nano-liquid droplets) for 7 days with therapeutic target 25(OH)D >50 ng/ml (intervention group) or placebo (control group). Patients requiring invasive ventilation or with significant comorbidities were excluded. 25(OH)D levels were assessed at day 7, and cholecalciferol supplementation was continued for those with 25(OH)D <50 ng/ml in the intervention arm. SARS-CoV-2 RNA and inflammatory markers fibrinogen, D-dimer, procalcitonin and (CRP), ferritin were measured periodically.

**Outcome measure** Proportion of patients with SARS-CoV-2 RNA negative before day-21 and change in inflammatory markers.

**Results** Forty SARS-CoV-2 RNA positive individuals were randomised to intervention (n=16) or control (n=24) group. Baseline serum 25(OH)D was 8.6 (7.1 to 13.1) and 9.54 (8.1 to 12.5) ng/ml (p=0.730), in the intervention and control group, respectively. 10 out of 16 patients could achieve 25(OH)D >50 ng/ml by day-7 and another two by day-14 [day-14 25(OH)D levels 51.7 (48.9 to 59.5) ng/ml and 15.2 (12.7 to 19.5) ng/ml (p<0.001) in intervention and control group, respectively]. 10 (62.5%) participants in the intervention group and 5 (20.8%) participants in the control arm (p<0.018) became SARS-CoV-2 RNA negative. Fibrinogen levels significantly decreased with cholecalciferol supplementation (intergroup difference 0.70 ng/ml; P=0.007) unlike other inflammatory biomarkers.

**Conclusion** Greater proportion of vitamin D-deficient individuals with SARS-CoV-2 infection turned SARS-CoV-2 RNA negative with a significant decrease in fibrinogen on high-dose cholecalciferol supplementation.

**Trial register number** NCT04459247.

## INTRODUCTION

Coronavirus-2019 (COVID-19) caused by severe acute respiratory syndrome-associated coronavirus-2 (SARS-CoV-2) has affected the lives of

millions of individuals globally and severely strained the medical community. Pre-symptomatic and asymptomatic SARS-CoV-2 positive individuals far outnumber the symptomatic ones or those with severe disease.<sup>1 2</sup> The transmission potential of SARS CoV-2 is potentially greater than earlier viral outbreaks of SARS-CoV and MERS-CoV because of its high transmissibility even from asymptomatic SARS-CoV-2 RNA positive individuals.<sup>3</sup> Routine measures of social distancing, personal hand hygiene and limited outdoor contact activities have shown benefits to limit corona virus infection. But identification of asymptomatic carriers of SARS-CoV-2 infection is paramount to contain viral infection.<sup>2</sup> Anti-viral, anti-inflammatory drugs and convalescent plasma therapy have been used for COVID-19 with variable results.<sup>4</sup>

It has been observed that vitamin D-deficient individuals have increased COVID-19 risk and mortality.<sup>5-7</sup> The role of vitamin D in SARS-CoV-2 infection is not explored in intervention studies despite the knowledge of an immunomodulatory role and protective effect of vitamin D against other viral infections.<sup>8</sup> An intervention study with calcifediol noticed a reduction in requirement for intensive care among hospitalised patients for COVID19.<sup>9</sup> However, vitamin D levels were neither available at baseline nor during follow up in the study. It is noticed that those receiving vitamin D supplementation have fewer respiratory tract infections.<sup>8</sup> However, the immune-modulatory effect of vitamin D is likely to be observed at 25(OH)D levels, which are considered higher than that required for its skeletal effects.<sup>10-12</sup>

The role of therapeutic vitamin D supplementation in asymptomatic individuals with vitamin-D deficiency and SARS-CoV-2 infection is not known. A PCR-confirmed SARS-COV-2 infection from nasopharyngeal swab pertains to relevant clinical outcome in intervention trials<sup>10</sup> especially for asymptomatic individuals as an earlier SARS-CoV-2 negativity would have significant public health benefits in limiting the spread of the disease. Therefore, we hypothesise that high-dose cholecalciferol supplementation in patients with SARS-CoV-2 infection and vitamin D deficiency may lead to SARS-CoV-2 negativity in greater proportions of patients with a decrease in serological markers of inflammation.

## METHODS

Consecutive individuals with SARS-CoV-2 infection who were mildly symptomatic or asymptomatic without comorbidities (hypertension, diabetes mellitus, chronic obstructive airway disease, chronic liver disease, chronic kidney disease) admitted to tertiary care hospital in north India were invited for the study. A written consent was obtained from all patients included in the study and protocol was approved by the Institute Ethics Committee.

Patients with vitamin D deficiency defined as 25 (OH)D level <20 ng/ml were randomised to receive daily 60000 IU of cholecalciferol (5 ml oral solution in nano droplet form) for 7 days in the 'intervention arm' with the aim to achieve 25 (OH)D level >50 ng/ml or placebo (5 ml distilled water) for 7 days (control group). Patients unable to take oral supplementation like those requiring invasive ventilation or with significant comorbidities like uncontrolled hyperglycaemia or hypertension were excluded. Subsequently, 25(OH)D levels were assessed at day 7 and a weekly supplementation of 60000IU provided to those with 25(OH)D >50 ng/ml or else continued on daily vitamin D 60,000 IU supplementation for another 7 days up until day-14 in participants with 25(OH)D <50 ng/ml in the intervention arm. No cholecalciferol supplementation was provided in the control arm.

25 (OH)D, serum calcium, phosphorus, fibrinogen, D-dimer, ferritin, procalcitonin, renal and liver function tests were performed periodically up until day-21 or virus negativity, whichever occurred earlier. Oro-pharyngeal swabs were obtained for SARS-CoV-2 RNA detection at day-5, 7, 10, 14, 18 and 21 and detection was performed by real-time PCR (RT-PCR), CFX-96 IVD, Bio-Rad. 25 (OH)D was analysed by electrochemiluminescence immunoassay (ECLIA) (Roche Cobas E 801 Analyser; Roche Diagnostics), using the kit supplied by the same manufacturer (Elecsys Total Vitamin D, version 2.0). Serum calcium (N, 8.5–10.2 mg/dl) and C-reactive protein (N, 0–5 mg/l) were processed by ECLIA method using Roche Cobas 8000, Roche Diagnostics. D dimer (N, 0–240 ng/ml) & fibrinogen (N, 2–4 g/l) were analyzed using StagoCompact/StagoSTA R model, DiagnosticaStago, Inc, USA, respectively.

All the participants received standard care for the SARS-CoV-2 infection and pre-existing co-morbidities as per institute protocol. The primary outcome measure was proportions of participants who turn SARS-CoV-2 negative (confirmed twice at 24-hour interval) before week 3 in the two groups. Other outcome measure was the change in the level of inflammatory markers with treatment.

## Sample size estimation

Serum level of inflammatory marker decrease with the duration of SARS-CoV-2 infection.<sup>13</sup> An anticipated additional decline in level of inflammatory marker by 20% with intervention was used for sample size calculation. Sample size came to be 16 participants in each group with power of 80% (beta error 0.2) and at 95% level of significance (alpha error 0.05).

## Statistical analysis

A modified intention-to-treat analysis was performed. Normality of the data was assessed by Kolmogorov–Smirnov test and mean  $\pm$  SD is used to depict data following normal gaussian pattern and median and inter-quartile range for skewed data. Student T-test was used to compare the means of two groups for parametric variables and Mann–Whitney U-test for non-parametric variables. Proportion of participants achieving SARS-CoV-2 RNA negativity in the two groups was compared with Fischer Exact (2 by 2 tailed) test. SPSS version 22 was used for data analysis and a p-value <0.05 was considered significant.

## RESULTS

Eighty-nine SARS-CoV-2 RNA positive individuals were evaluated. Six patients requiring invasive ventilation, four with prior co-morbidities and four with 25(OH)D >20 ng/ml were excluded. Thirty-five individuals denied consent; therefore, 40 participants were subsequently randomised (16 in intervention arm and 24 to the control arm) as shown in CONSORT diagram (figure 1). Median 25(OH)D levels and other parameters in the two groups at study inclusion are shown in table 1. Ten participants in intervention arm could achieve 25(OH)D levels >50 ng/ml at day-7 of intervention and two more participants by day-14. The 25(OH)D levels at day-14 were 51.7 (48.9 to 59.5) ng/ml and 15.2 (12.7 to 19.5) ng/ml,  $p < 0.001$  with a median increase of 42.4 (39 to 48.8) ng/ml and 5.1 (0 to 12.3) ng/ml ( $p < 0.01$ ) in the intervention and control group, respectively (online supplemental table 1S). 10 out of 16 (62.5%) participants in the intervention group achieved SARS-CoV-2 negativity compared to 5 out of 24 (20.8%) participants ( $p = 0.018$ ) in the control arm. The mean duration to SARS-CoV-2 negativity was  $17.6 \pm 6.1$  and  $17.6 \pm 6.4$  days ( $p = 0.283$ ) in the intervention and control arm, respectively.

There was a significant decrease in fibrinogen ( $p < 0.01$ ) in the intervention arm compared to control arm as shown in table 2. However, no intergroup difference in the change in D-dimer, CRP, ferritin and procalcitonin were observed during follow up (online supplemental table 2S–6S). There was no significant difference in calcium and phosphorus level in the two groups during the study period (online supplemental table 7S).

Adverse events: No episodes of hypercalcaemia were observed in either group.

## DISCUSSION

In this first cholecalciferol intervention study for asymptomatic and mildly symptomatic SARS-CoV-2 positive individuals, we found that a greater proportion of patients could attain SARS CoV-2 RNA negativity on high-dose vitamin D supplementation at 25(OH)D >50 ng/ml compared to vitamin D-deficient individuals. The newer recommendations by CDC and other

regulatory bodies including ICMR do not mandate repeat SARS CoV-2 RNA testing to document SARS CoV-2 negative before discharge of asymptomatic individuals, hence achieving SARS-CoV-2 negativity in greater proportions is likely to be beneficial.

The immunomodulatory effect of vitamin D has been previously studied in bacterial as well as viral infections, but not in SARS-CoV-2 infection. Vitamin D influences the expression of various genes involved in the immune system (innate immunity, adaptive immunity) and the downstream inflammatory cascade, thus affecting the susceptibility to and severity of bacterial and viral infections.<sup>14 15</sup> Vitamin D can induce anti-microbial peptide cathelicidin (LL-37) in neutrophils, NK cells and monocytes to cause reduction of Herpes-Simplex virus titre.<sup>11</sup> In a recent meta-analysis of intervention trials, vitamin D supplementation was observed to reduce the incidence of acute respiratory tract infections [incidence rate ratio 0.96 (0.92–0.997), p=0.04].<sup>8</sup> Similarly in SARS-CoV-2 infection vitamin D deficiency may lead to a pro-inflammatory cytokine milieu, thus augmenting the disease severity.<sup>7 12</sup> SARS CoV-2 is known to bind to ubiquitously expressed ACE-2 (ACE-2) receptor on the cell surface and subsequent ingress into the cell. Vitamin D may downregulate the ACE-2 expression and prevent the viral entry into cell.<sup>16 17</sup> It is plausible that vitamin D supplementation may decrease the likelihood of SARS CoV-2 infection or cause an early viral clearance. It is noticed that vitamin D levels>30 ng/ml are associated with a significant decrease in the SARS-CoV-2 infection severity and mortality.<sup>12</sup> Therefore, we studied the effect of high doses of vitamin D supplementation on the likelihood of viral clearance in SARS CoV-2 positive individuals.

Though India is a subtropical country with adequate sunlight, vitamin D deficiency is prevalent.<sup>18</sup> However, there remain two

concerns regarding vitamin D supplementation and disease outcomes. First, the appropriate levels of 25 (OH)D for its immunomodulatory effects are not known. Secondly, these effects may not be observed on bolus administration of vitamin D and may be more pronounced only on long-term maintenance of higher levels of 25 (OH)D levels. Therefore, we chose an arbitrary cut-off of 25 (OH)D levels>50 ng/ml to render immunomodulatory effect unlike 30 ng/ml that are purported to be adequate for bone metabolism. Moreover, it was imperative to achieve the desired levels [25 (OH)D levels>50 ng/ml] early, considering the outcome measure of SARS CoV-2 negativity. It was observed that following a single bolus dose of 540 000 IU of vitamin D<sub>3</sub>, mean serum 25(OH)D concentrations in those with vitamin D deficiency increased to >20 ng/mL by day 1 and peaked at 38.2 ±16.5 ng/mL at 1 week.<sup>19</sup> Also, in another study a single dose of 600 000 IU of vitamin D<sub>3</sub> raised serum 25(OH)D to >30 ng/mL early in elderly individuals and maintained for at least 4 weeks without any adverse event.<sup>20</sup> However, a systematic review regarding high dose of vitamin D supplementation in the doses of 1,00,000IU suggested an inability to increase 25(OH)D >30 ng/mL.<sup>21</sup> Therefore, we provided cholecalciferol supplementation of 60,000 IU daily (420 000 IU in the first week) in the present study that are higher than existing recommendations but were found to be safe as no episodes of hypercalcaemia were observed in the present study asserting the safety of short-term high doses of vitamin D supplementation.

COVID-19 is associated with a rise in the inflammatory markers like D-dimer, fibrinogen and pro-inflammatory cytokines. A serial evaluation of inflammatory markers might help in evaluating and monitoring the severity of COVID-19 disease. It is noticed that certain serological markers like IL-6, CRP, ferritin, ESR are increased to a greater extent in people with severe disease than those with less severe disease.<sup>22</sup> Also, D-dimer >1µg/l was an independent predictor of mortality in COVID-19 disease.<sup>23</sup> We found a significant difference in level of fibrinogen in patients achieving 25 (OH)D >50 ng/ml as compared to vitamin-D deficient individuals, suggesting a possible immuno-modulatory effect of vitamin D. However, the changes in the fibrinogen level though statistically significant was modest and may not be clinically meaningful; moreover, other inflammatory marker levels were not significantly different between the two groups. Inflammatory cytokines (IL-6, TNF-a, IL-1b) were not measured and any effect of vitamin D supplementation on cytokine levels could not be assessed in the present study.

The strengths include being the first study to demonstrate the role of therapeutic high dose, daily, oral vitamin D supplementation to attain 25(OH)D >50 ng/ml levels and its effect on COVID-19. We perceive certain limitations including that only mildly symptomatic and asymptomatic individuals were enrolled in the study which limits the generalisability of the results to symptomatic or severe cases of COVID-19. Placebo used in the study was not exactly matched with regards to the taste and consistency with the cholecalciferol nano formulation. Also, the dose of cholecalciferol used in the present study is high compared to conventional treatment, that warrants close follow up to look for vitamin D toxicity, though we did not observe the same. Clinical role of a decrease in inflammatory markers in the asymptomatic SARS-CoV-2-infected population with vitamin D supplementation as observed in the present study is contentious. Inflammatory cytokines (IL-6, TNF-a) were not measured in the present study. Parenteral vitamin D administration could be contemplated in future studies as four patients could not achieve 25 (OH)D >50 ng/ml after oral, high-dose vitamin D supplementation and malabsorption disorders could not be ruled out.

## Original research

In conclusion, a high dose, oral vitamin D supplementation to augment 25(OH)D >50 ng/ml helped to achieve SARS-CoV-2 RNA negativity in greater proportion of asymptomatic vitamin D-deficient individuals with SARS-CoV-2 infection along with a significant decrease in inflammatory marker. SARS-CoV-2 RNA negativity by cholecalciferol supplementation may help in reducing transmission rates of the highly contagious SARS-CoV-2 infection. A reassurance for public health workers regarding greater likelihood of SARS CoV-2 RNA negativity in individuals receiving therapeutic cholecalciferol supplementation will be encouraging.

## Current research questions

- What levels of 25 (OH)D3 have immunomodulatory functions in viral diseases particularly SARS-CoV-2 infection?
- Role of therapeutic vitamin D supplementation in severe COVID-19 disease for quantitative viral clearance?
- Vitamin D effect on 'cytokine storm' in patients with severe COVID-19 disease
- Can high-dose vitamin D reduce ICU/hospital stay and mortality in severe COVID-19 disease over and above standard care?

## What is already known on the subject

- Vitamin-D has immunomodulatory effect and may reduce susceptibility and severity of viral infections but its role in SARS-CoV-2 infection is not known.

## What we have found

- Daily cholecalciferol supplementation of 60,000 IU helps in achieving 25(OH)D>50 ng/ml in 75% of participants by day-14.
- Therapeutic, high-dose cholecalciferol supplementation led to SARS-CoV-2 RNA negative in additional 41.7% participants ( $p<0.001$ ) and was useful for viral SARS-CoV-2 RNA clearance.

## ABSTRACT

*Development of new vaccine technology has been plagued with problems in the past. The current RNA based SARS-CoV-2 vaccines were approved in the US using an emergency order without extensive long term safety testing. In this paper the Pfizer COVID-19 vaccine was evaluated for the potential to induce prion-based disease in vaccine recipients. The RNA sequence of the vaccine as well as the spike protein target interaction were analyzed for the potential to convert intracellular RNA binding proteins TAR DNA binding protein (TDP-43) and Fused in Sarcoma (FUS) into their pathologic prion conformations. The results indicate that the vaccine RNA has specific sequences that may induce TDP-43 and FUS to fold into their pathologic prion conformations. In the current analysis a total of sixteen UG tandem repeats (ΨGΨG) were identified and additional UG (ΨG) rich sequences were identified. Two GGΨA sequences were found. Potential G Quadruplex sequences are possibly present but a more sophisticated computer program is needed to verify these. Furthermore, the spike protein, created by the translation of the vaccine RNA, binds angiotensin converting enzyme 2 (ACE2), a zinc containing enzyme. This interaction has the potential to increase intracellular zinc. Zinc ions have been shown to cause the transformation of TDP-43 to its pathologic prion configuration. The folding of TDP-43 and FUS into their pathologic prion conformations is known to cause ALS, front temporal lobar degeneration, Alzheimer's disease and other neurological degenerative diseases. The enclosed finding as well as additional potential risks leads the author to believe that regulatory approval of the RNA based vaccines for SARS-CoV-2 was premature and that the vaccine may cause much more harm than benefit.*

## Keywords

COVID-19, Vaccines, Diabetes, Immunity.

## Introduction

Vaccines have been found to cause a host of chronic, late developing adverse events. Some adverse events like type 1 diabetes may not occur until 3-4 years after a vaccine is administered [1]. In the example of type 1 diabetes the frequency of cases of adverse events may surpass the frequency of cases of severe infectious disease the vaccine was designed to prevent. Given that type 1 diabetes is only one of many immune mediated diseases potentially caused by vaccines, chronic late occurring adverse events are a serious public health issue.

The advent of new vaccine technology creates new potential mechanisms of vaccine adverse events. For example, the first killed polio vaccine actually caused polio in recipients because the up scaled manufacturing process did not effectively kill

the polio virus before it was injected into patients. RNA based vaccines offers special risks of inducing specific adverse events. One such potential adverse event is prion based diseases caused by activation of intrinsic proteins to form prions. A wealth of knowledge has been published on a class of RNA binding proteins shown to participating in causing a number of neurological diseases including Alzheimer's disease and ALS. TDP-43 and FUS are among the best studied of these proteins [2].

The Pfizer RNA based COVID-19 vaccine was approved by the US FDA under an emergency use authorization without long term safety data. Because of concerns about the safety of this vaccine a study was performed to determine if the vaccine could potentially induce prion based disease.

## Methods

Pfizer's RNA based vaccine against COVID-19 was evaluated for the potential to convert TDP-43 and or FUS to their prion based

disease causing states. The vaccine RNA was analyzed for the presence of sequences that can activate TDP-43 and FUS. The interaction of the transcribed spike protein with its target was analyzed to determine if this action could also activate TDP-43 and FUS.

## Results

Analysis of the Pfizer vaccine against COVID-19 identified two potential risk factors for inducing prion disease in humans. The RNA sequence in the vaccine [3] contains sequences believed to induce TDP-43 and FUS to aggregate in their prion based conformation leading to the development of common neurodegenerative diseases. In particular it has been shown that RNA sequences GGUA [4], UG rich sequences [5], UG tandem repeats [6], and G Quadruplex sequences [7], have increased affinity to bind TDP-43 and or FUS and may cause TDP-43 or FUS to take their pathologic configurations in the cytoplasm. In the current analysis a total of sixteen UG tandem repeats (ΨGΨG) were identified and additional UG (ΨG) rich sequences were identified. Two GGΨA sequences were found. G Quadruplex sequences are possibly present but sophisticated computer programs are needed to verify these.

The spike protein encoded by the vaccine binds angiotensin converting enzyme 2 (ACE2), an enzyme which contains zinc molecules [8]. The binding of spike protein to ACE2 has the potential to release the zinc molecule, an ion that causes TDP-43 to assume its pathologic prion transformation [9].

## Discussion

There is an old saying in medicine that “the cure may be worse than the disease.” The phrase can be applied to vaccines. In the current paper the concern is raised that the RNA based COVID vaccines have the potential to cause more disease than the epidemic of COVID-19. This paper focuses on a novel potential adverse event mechanism causing prion disease which could be even more common and debilitating than the viral infection the vaccine is designed to prevent. While this paper focuses on one potential adverse event there are multiple other potential fatal adverse events as discussed below.

Over the last two decades there has been a concern among certain scientists that prions could be used as bioweapons. More recently there has been a concern that ubiquitous intracellular molecules could be activated to cause prion disease including Alzheimer’s disease, ALS and other neurodegenerative diseases. This concern originates due to potential for misuse of research data on the mechanisms by which certain RNA binding proteins like TDP-43, FUS and others can be activated to form disease causing prions. The fact that this research, which could be used for bioweapons development, is funded by private organizations including the Bill and Melinda Gates Foundation, and Ellison Medical Foundation [2] without national/international oversight is also a concern. In the past, for example, there were prohibitions for publishing information pertaining to construction of nuclear bombs.

Published data has shown that there are several different factors that can contribute to the conversion of certain RNA binding proteins including TDP-43, FUS and related molecules to their pathologic states. These RNA binding proteins have many functions and are found in both the nucleus and the cytoplasm. These binding proteins have amino acid regions, binding motifs that bind specific RNA sequences. Binding to certain RNA sequences when the proteins are in the cytoplasm is believed to cause the molecules to fold in certain ways leading to pathologic aggregation and prion formation in the cytoplasm [2]. The current analysis indicates Pfizer’s RNA based COVID-19 vaccine contains many of these RNA sequences that have been shown to have high affinity for TDP-43 or FUS and have the potential to induce chronic degenerative neurological diseases.

Zinc binding to the RNA recognition motif of TDP-43 is another mechanism leading to formation of amyloid like aggregations [9]. The viral spike protein, coded by the vaccine RNA sequence, binds ACE2 an enzyme containing zinc molecules [8]. This interaction has the potential to increase intracellular zinc levels leading to prion disease. The initial binding could be between spike proteins on the surface of the cell transfected by the vaccine and ACE2 on the surface of an adjacent cell. The resulting complex may become internalized. Alternatively, the interaction could initially take place in the cytoplasm of a cell that makes ACE2 and has been transfected with the vaccine RNA coding for the spike protein. The interaction is quite concerning given the belief that the virus causing COVID-19, SARS-CoV-2, is a bioweapon [10,11] and it is possible that the viral spike protein may have been designed to cause prion disease.

Another related concern is that the Pfizer vaccine uses a unique RNA nucleoside 1-methyl-3'-pseudouridylyl (Ψ). According to FDA briefing documents, this nucleoside was chosen to reduce activation of the innate immune system [12]. RNA molecules containing this nucleoside will undoubtedly have altered binding [13]. Unfortunately, the effect on TDP-43, FUS and other RNA binding proteins is not published. The use of this nucleoside in a vaccine can potentially enhance the binding affinity of RNA sequences capable of causing TDP-43 and FUS to assume toxic configurations.

There are many other potential adverse events that can be induced by the novel RNA based vaccines against COVID-19. The vaccine places a novel molecule, spike protein, in/on the surface of host cells. This spike protein is a potential receptor for another possibly novel infectious agent. If those who argue that the COVID-19 is actually a bioweapon are correct, then a second potentially more dangerous virus may be released that binds spike protein found on the host cells of vaccine recipients. Data is not publicly available to provide information on how long the vaccine RNA is translated in the vaccine recipient and how long after translation the spike protein will be present in the recipient’s cells. Such studies pertaining to in vivo expression will be complex and challenging. Genetic diversity protects species from mass casualties caused by infectious agents. One individual may be killed by a virus while

another may have no ill effects from the same virus. By placing the identical receptor, the spike protein, on cells of everyone in a population, the genetic diversity for at least one potential receptor disappears. Everyone in the population now becomes potentially susceptible to binding with the same infectious agent.

Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines [14]. COVID-19 infections are associated with the induction of autoantibodies and autoimmune disease [15,16] making it more than plausible a vaccine could do the same. One author has found amino acid sequences coded by the spike protein to be identical to sequences in human proteins including proteins found in the CNS [17]. Autoimmunity can also be induced by epitope spreading when a foreign antigen, like the spike protein, is presented by an antigen presenting cell that also has self molecules attached to its MHC molecules.

Finally, others working in the field have published additional support that COVID-19 vaccines could potentially induce prion disease. Authors [18] found prion related sequences in the COVID-19 spike protein which were not found in related coronaviruses. Others [19] have reported a case of prion disease, Creutzfeldt-Jakob disease, initially occurring in a man with COVID-19.

Many have raised the warning that the current epidemic of COVID-19 is actually the result of a bioweapons attack released in part by individuals in the United States government [10,11]. Such a theory is not far fetched given that the 2001 anthrax attack in the US originated at Fort Detrick, a US army bioweapon facility. Because the FBI's anthrax investigation was closed against the advice of the lead FBI agent in the case, there are likely conspirators still working in the US government. In such a scenario the primary focus of stopping a bioweapons attack must be to apprehend the conspirators or the attacks will never cease. Approving a vaccine, utilizing novel RNA technology without extensive testing is extremely dangerous. The vaccine could be a bioweapon and even more dangerous than the original infection.

### **Abstract**

Worldwide shortage of vaccination against SARS-CoV-2 infection while the pandemic is still uncontrolled leads many states to the dilemma whether or not to vaccinate previously infected persons. Understanding the level of protection of previous infection compared to that of vaccination is critical for policy making. We analyze an updated individual-level database of the entire population of Israel to assess the protection efficacy of both prior infection and vaccination in preventing subsequent SARS-CoV-2 infection, hospitalization with COVID-19, severe disease, and death due to COVID-19. Vaccination was highly effective with overall estimated efficacy for documented infection of 92.8% (CI:[92.6, 93.0]); hospitalization 94.2% (CI:[93.6, 94.7]); severe illness 94.4% (CI:[93.6, 95.0]); and death 93.7% (CI:[92.5, 94.7]). Similarly, the overall estimated level of protection from prior SARS-CoV-2 infection for documented infection is 94.8% (CI:[94.4, 95.1]); hospitalization 94.1% (CI:[91.9, 95.7]); and severe illness 96.4% (CI:[92.5, 98.3]). Our results question the need to vaccinate previously-infected individuals.

**Keywords:** vaccine efficacy, COVID-19, SARS-CoV-2, previous infection, protection from reinfection

## Introduction

Israel is currently in the later stages of a vaccination campaign to reduce both SARS-CoV-2 infection and the number of COVID-19 cases. Israel is administering the BNT162b2 vaccine, developed by BioNTech in cooperation with Pfizer,<sup>1</sup> for which an Emergency Use Authorization (EUA) was issued by the Food and Drug Administration (FDA).<sup>2</sup> The vaccine is administered in two doses, with a 21-day interval between doses. Israel launched its COVID-19 vaccination program on December 20, 2020. The vaccine became available, free of charge, to different risk groups in stages: first to those older than 60 years old, nursing home residents, healthcare workers, and patients with severe comorbidities, and then gradually to younger age groups. As of February 6, 2021, the vaccine was made available to all individuals aged 16 or older not previously infected by SARS-CoV-2. As of March 20, 2021, 77% of the eligible population is vaccinated. Due to the high caseload and the local detection of viral mutants such as B.1.1.7, Israel went into a third nationwide lockdown during the vaccination campaign. A light lockdown began on December 24, 2020, and was tightened on January 5, 2021. Restrictions were eased in stages starting February 7, 2021. The dynamics of the epidemic as well as the vaccination campaign appear in Figure 1.

SARS-CoV-2 testing in Israel is carried out according to the following policy: individuals may request testing due to either symptoms or contact with an individual who tested positive. These PCR tests are given free of charge. Individuals who have come into contact with an individual who tested positive are required to self-quarantine for 14 days. This quarantine period may be shortened to 10 days if the individual is tested twice during the first 10 days, and both test results are negative. Individuals who have received both vaccine doses, and had the second dose seven days or more before a contact with a positive individual, and do not have symptoms, are not required to self-quarantine, and thus have

less motivation to get tested. In addition to voluntary testing, Israel conducts routine testing of all nursing-home workers.

Recent results based on aggregated data<sup>3-5</sup> and individual level data<sup>6-10</sup> have shown that the vaccine substantially reduces the number of severe COVID-19 cases. Two studies also indicate that the viral load of vaccinated individuals is significantly reduced.<sup>11,12</sup> These encouraging initial results are based on a short follow-up of vaccinated individuals. Results on previous COVID-19 infection<sup>13-16</sup> suggest protection against reinfection compared to uninfected unvaccinated individuals.

In this study, we estimate the efficacy of the vaccine in the reduction of documented SARS-CoV-2 infection and severe COVID-19 disease. We focus on four cohorts: unvaccinated individuals; vaccinated individuals followed from first dose to a week after the second dose; vaccinated individuals followed from a week after the second dose onwards, and the Recovered Cohort of unvaccinated individuals previously infected with SARS-CoV-2. For more details, see the Methods section. All efficacies, of vaccine or previous infection, are compared to the unvaccinated cohort.

The prospective observational analysis that we present faced several challenges. The first challenge was self-selection of treatment, which implies differences in potential risk factors between vaccinated and non-vaccinated individuals. These include age, sex, socio-demographic level,<sup>17</sup> level of infection in the immediate environment, and possibly other behavioral variables that could affect level of exposure to the virus. The second challenge was detection bias: willingness to undergo vaccination can be associated with trust in the healthcare system, which may also imply a tendency to comply with testing regulations. On the other hand, vaccinated individuals may feel more protected and may ignore mild symptoms indicative of the disease, and have less motivation to get tested as they are not required to self-quarantine after a contact with a positive individual. The third challenge was the variation in infection risk throughout the vaccination campaign, mainly due to varying lockdown levels, relative prevalence of viral mutants, and local outbreaks. Lastly, the status of individuals (i.e., unvaccinated, partially vaccinated, or fully vaccinated) was

dynamic: with time, individuals move from one cohort to another, and between risk groups. In the Methods Section we explain how we designed the analysis to address these challenges.

## Methods

### *Data*

The database included two main tables. The first table was of all 1373 municipalities in Israel, with data on the number of residents, the daily count of PCR tests, and the daily positive results. This table was constructed based on data from the Israel Ministry of Health and the Israel Central Bureau of Statistics.

The second table was an individual-level table on persons aged 16 and above collected by the Israeli Ministry of Health based on data received routinely from all HMOs and hospitals and linked using the person's identity number. This table contained basic demographic data and information on dates of first and second vaccinations, if received, and dates and results of all PCR tests performed from March 1, 2020, up to March 20, 2021. For individuals with a positive PCR test, the table contained information on symptoms, as well as the maximum severity status throughout the course of the disease (hospitalization, severe disease, death). The definition of hospitalization, severe disease, and death due to COVID-19 is based on international recommendations.<sup>18</sup> Specifically, hospitalization is defined as being admitted due to COVID-19. Disease is considered severe when a patient has  $>30$  breaths per minute, oxygen saturation on room air  $<94\%$ , or ratio of arterial 148 partial pressure of oxygen to fraction of inspired oxygen  $<300$ mm mercury. Data on symptoms were also available but we found them less reliable and thus did not include symptomatic COVID-19 as an outcome.

Thus, the table contained an entry for every adult (age  $\geq 16$ ) in Israel who had at least one PCR test or had received at least the first dose of the vaccine (with a total of 5,682,928 entries). Adults with no PCR test and no vaccination (668,975) were added to the table using data from the Israel Central Bureau of Statistics. Thus, this second table included

6,351,903 entries with basic demographic data of the total adult population in Israel, as well as their PCR tests and vaccination dates. Individuals under age 16 are not eligible for vaccination and were excluded from this study. A summary of the data appears in Table 1.

To account for environmental risk, we calculated a municipality daily risk index by the number of cases newly confirmed in the past seven days per 10,000 residents. We used a 7-day moving average since the number of PCR tests typically drops at weekends. The index was categorized into four risk levels (up to one, one to four, four to ten, and more than ten daily cases per 10,000) to yield the municipality daily risk category, and was used as a covariate in the risk model.

Behavioral differences among people may result in different levels of exposure to infection and compliance with PCR testing guidelines. We partially accounted for this by counting the number of PCR-test clusters that an individual underwent from March 1, 2020, to December 20, 2020 (i.e., prior to the vaccination program). Here, a PCR-test cluster comprised all consecutive tests performed within 10 days of each other. We then defined three individualized background risk levels: no PCR tests, one cluster, and two or more clusters, and this covariate was also included in the risk model. For previously-infected individuals, we set the level to one cluster and checked sensitivity to this value. Note that the time interval for defining this variable (up to December 20, 2020) did not overlap with the follow-up period.

In addition to estimating vaccine efficacy, we estimated the protection of prior SARS-CoV-2 infection against a recurrent infection. Thus, we also included in the dataset individuals who had recovered from COVID-19. Recovery from SARS-CoV-2 infection is not well-defined, and individuals may continue to show traces of the virus weeks and sometimes even months after the infection.<sup>14</sup> We defined as a recurrent infection only cases occurring three months or more after the first diagnosis. We also considered only individuals for whom the first infection was diagnosed between June 1 and September 30, 2020, as the PCR results before June 1 are considered less reliable. Hence, individuals infected before

June 1, 2020 or between October 1, 2020 and December 20, 2020 were excluded from the analysis.

### *Statistical Modeling*

To estimate the efficacy of the Pfizer BNT162b2 vaccine in reducing documented SARS-CoV-2 infection and other COVID-19 events, we considered four dynamic sub-populations or cohorts:

- Cohort 0: Unvaccinated and not previously infected with SARS-CoV-2;
- Cohort 1: Vaccinated and followed from the day of first vaccination to 6 days after the second dose;
- Cohort 2: Vaccinated and followed from a week after the second dose onwards;
- Recovered: Unvaccinated and previously diagnosed with SARS-CoV-2 between June 1 and September 30, 2020.

On any given calendar day, each individual included in the analysis belongs to a single cohort, but cohort membership is dynamic. Moreover, individuals may not only move between cohorts over time (for example, from cohort 0 to cohort 1 after first vaccination, or from cohort 1 to cohort 2 at 7 days after the second vaccination), but also exit from the follow-up (for example, on infection with SARS-CoV-2 or death). The outcomes hospitalization, severe disease, and death, were attributed to the date on which COVID-19 was documented.

We modeled the daily risk of each individual from December 20, 2020 to March 20, 2021, as a function of calendar time, the cohort to which the individual currently belonged, and the individual's current risk factors, which included fixed covariates: age group (16-39, 40-49, 50-59, 60-69, 70-79, and 80+), sex, and background risk level (0,1, and 2+ past PCR tests), and the time-dependent variable: municipality risk level(low, medium, medium-high,

and high). We refer to each combination of possible covariate values (age group, sex, background risk level, and municipality risk level) as the risk profile.

Our analysis model falls within the framework of multi-state survival models, where each cohort represents a separate state;<sup>19</sup> see Figure S1. Similar to the study of mRNA-1273, the vaccine developed by Moderna,<sup>20</sup> we defined the efficacy of the vaccine in terms of hazard ratios, where the main interest is in comparing the hazard of a non-vaccinated individual (Cohort 0) to that of an individual who had completed the recommended protocol (Cohort 2). Hazard ratios between cohorts and for each adjusting covariate were estimated via a generalized linear model with a Poisson distribution and logarithmic link function, and an offset for each risk profile.<sup>21</sup>

Our model assumes that for a given cohort and risk profile, the hazard was constant and did not depend on the time from the second dose (Cohort 2). Obviously, the hazard of individuals who have never received the first dose (Cohort 0) cannot depend on the time of the first dose, but we also assumed that the time elapsed from the second vaccination did not affect the hazard in Cohort 2. In other words, we assumed that the protection level did not change with time after the “completion” of the vaccination protocol. While protection by vaccination is expected to decrease in the long run, our assumption is reasonable given the time frame of only three months after first vaccination, where waning immunity is not expected to play a role. We split Cohort 1 into two sub-cohorts: Cohort 1A from the first dose to two weeks after the first dose, and Cohort 1B from 15 days after the first dose to six days after the second dose. Following Skowronski and De Serres,<sup>22</sup> we considered, as a crude approximation, a constant hazard for each of these two sub-cohorts for every risk profile. To estimate the level of protection among the Recovered Cohort, we made a similar assumption, that the time elapsed from SARS-CoV-2 infection did not affect the hazard ratio.

The formal definition of vaccine efficacy adopted was as follows. Consider any particular risk profile. Let  $h_i$  denote the hazard of an individual in one of the vaccinated cohorts 1A, 1B, 2, or Recovered, and let  $h_0$  be the hazard of an individual having the identical risk

profile in the unvaccinated group. Efficacy of the vaccine in that cohort for that risk profile is defined as  $1 - h_i/h_0$ . Note that the calendar time affects the hazards of the different cohorts only via the time-dependence of the municipality risk level. From the model assumptions, the ratio  $h_i/h_0$  is the same for each risk profile, so the estimate of vaccine efficacy may be combined over all the risk profiles. For more details about the model, see Appendix. We analyzed efficacy separately for each of the following outcomes: documented infection, hospitalization, severe disease, and death.

## Results

The data are based on follow-up of the four cohorts from December 20, 2020 up to March 20, 2021, with over 573 million person-days of follow-up. The lengths of follow-up for the fully vaccinated and the recovered cohorts appear in Figures S2 and S3, respectively. During this time 4,606,247 PCR tests were performed (8,040 per million person-days), and 306,712 individuals tested positive (5.4 infections per 10,000 person-days). Of those testing positive, 14,019 (4.6%) required hospitalization, 8,463 (2.8%) were defined as severe cases, and 2,727 (0.9%) died. Table 2 presents these numbers by cohort and age group. The numbers of PCR tests performed per million person-days appear in Table 3. There is a decrease in the rate of PCR testing in both Cohort 2 and the Recovered Cohort compared to the other cohorts. This is likely since fully vaccinated or recovered individuals (Cohorts 2 & Recovered) are more protected against SARS-CoV-2 infection. Additionally, people in Israel need to self-quarantine for 14 days after contacting SARS-CoV-2 infected persons, which can be shortened to ten days if they present two negative PCR tests. This is not required for fully vaccinated and recovered persons unless they develop symptoms.

We first investigated the dynamics of the vaccination program, disease outcomes, PCR testing, and municipality risk as a function of calendar time. Figures S4 and S5 present the proportion of vaccinated over time among different age and municipality risk groups, respectively. As can be seen from Figure S4, the Israeli vaccination policy was initially to immunize the older population, and as time progressed, younger age groups. Figure S5 shows the association between environmental risk and vaccination. Figure S6 shows the

rates over time of the different age groups among those tested, infected, hospitalized, having severe disease, and dying. Table 4 shows, by age group, the estimated vaccine efficacy for the main outcomes for Cohort 2 (fully vaccinated) adjusted for sex, municipality risk, and past PCR. Note that for age groups below 60 years, there were, fortunately, none or very few events of severe illness and death, and thus estimates were omitted for these groups. The table shows that vaccine efficacy was quite similar in all age groups with some decrease in efficacy for the 80+ age category. Fitting a model without age-group/cohort interaction yielded overall vaccine efficacy for documented infection of 92.8% (CI: [92.6, 93.0]); hospitalization 94.2% (CI: [93.6, 94.7]); severe illness 94.4% (CI: [93.6, 95.0]); and death 93.7% (CI: [92.5, 94.7]). We repeated the analysis with full vaccination defined as 15 days or more after the second dose. The results are similar (not shown).

Table 5 presents the results for the Recovered Cohort when the past PCR-based individualized risk was set to one PCR cluster. Again, the protection was quite similar in all age groups with some decrease in efficacy for the 80+ age category, and quite similar to the results in Table 4. The overall estimated protection of prior SARS-CoV-2 infection for documented recurrent infection was 94.8% (CI: [94.4, 95.1]); hospitalization 94.1% (CI: [91.9, 95.7]); and severe illness 96.4% (CI: [92.5, 98.3]). As there were only 1 death cases in the Recovered Cohort, protection against death was not estimated.

As described above, we assigned the recovered individuals to the middle PCR risk group, so that the estimated protection of a prior infection is compared to unvaccinated individuals having a single PCR cluster in the past. The protection levels afforded by a prior infection compared to unvaccinated persons who had no or 2+ past PCR tests are given in a sensitivity analysis shown in Table S1. In addition, Table S1 presents results of a model without PCR, which can be interpreted as the overall protection of a prior infection. As expected, the protection of a prior infection compared to unvaccinated persons who did not have past PCR tests is estimated to be smaller and compared to those who had 2+ tests is larger. The results when omitting the PCR variable are very similar to the figures in Table 5.

The results for Cohorts 1A and 1B appear in Tables S2 and S3, respectively. The results up to two weeks after the first dose (Cohort 1A) suggest low but statistically significant efficacy. For Cohort 1B that comprises individuals at more than two weeks after the first dose, the efficacy is higher, being 57.7% (CI: [57.1, 58.4]) for documented infection; 69.4% (CI: [67.5, 71.2]) for hospitalization; 65.9% (CI: [63.1, 68.5]) for severe illness; and 62.7% (CI: [58.0, 66.8]) for death. The coefficients of all four models used for analyzing the data appear in Tables S4-S7.

## Discussion

This population-based observational study demonstrates the high efficacy of the BNT162b2 vaccine and prior SARS-CoV-2 infection against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. There are a few characteristics that make this study unique. First, it was a nationwide study and thus represented the real-world effectiveness of vaccination and prior infection on the full population. Second, it used individual-level data that enabled, at least to some degree, to mitigate biases caused by selection to get vaccinated, selection to undergo PCR testing, and time-changing level of risk, via adjustment for between-cohort differences in individuals' characteristics and municipality risk level. Third, the study included follow-up of the population for a period of three months, allowing follow-up of the fully vaccinated cohort over an extended duration. Fourth, this is the first large-scale study that has explored the protection due to prior SARS-CoV-2 infection compared to the Pfizer BNT162b2 vaccine.

There are some limitations to this observational study. One major source of confounding is related to possible population differences between individuals who were vaccinated compare to those who were not. This confounding is partially addressed by controlling for risk factors. Specifically, for each individual we adjusted for sex, age group, number of past PCR tests and the time-dependent environmental exposure. Another major source of potential bias is related to detection of SARS-CoV-2 infection. As apparent from the PCR test counts in Table 3, individuals who are fully vaccinated or were previously infected get tested less often than the unvaccinated cohort. Our results for the outcomes of

hospitalization, severe disease, and death do not suffer from this bias and thus are more reliable. The vaccine protection against infection might be biased upward as explained above, nevertheless the remarkable curtailing of the outbreak in Israel which followed the high vaccine uptake by the Israeli population further suggest that the vaccine is efficient in blocking transmission, see Figure 1.

The efficacy estimates of the BNT162b2 vaccine in this study are similar to those reported by previous large-scale studies. For the severe disease outcome, the randomized trial of BNT162b2<sup>1</sup> reported 89% efficacy for severe disease. A study by the Israeli Ministry of Health using aggregated data<sup>5</sup> reported 96% efficacy for people as defined in our Cohort 2. A study on data from Israel's largest HMO<sup>6</sup> split people as defined in our Cohort 1B and reported an efficacy of 62% and 80% for the third and fourth weeks after the first vaccine, respectively, and of 92% for their Cohort 2. In comparison, our analysis showed efficacy of 66% for Cohort 1B and 94% for Cohort 2. For other outcomes, the estimated vaccine efficacy for Cohort 2 in our study were 93% and 94%, for documented infection and hospitalization, respectively. These estimates are similar to previous studies<sup>5,6</sup> that estimated efficacy of 92% and 96% for documented infection, and of 87% and 96% for hospitalization. Our findings are based on a longer follow-up and a larger number of event than in the previous individual-level data reports. For example, the analysis of severe cases in the randomized clinical trial is based on only 10 cases, and that of Israel's largest HMO on 229.<sup>6</sup> In comparison, the analysis in our study is based on 8,463 cases, including 2,240 cases from Cohort 1 and 319 cases from Cohort 2. On the other hand, the other two studies<sup>1,6</sup> have the respective advantages of randomization and a detailed matching process which help in bias reduction.

The estimated protection against reinfection in this study is similar to that of the BNT162b2 vaccine. For documented SARS-CoV-2 reinfection, these results are similar to the results obtained in a large study from Qatar of 95% protection,<sup>13</sup> and suggest higher protection than reported by other previous studies. A large study from Denmark<sup>14</sup> suggested 80% protection against reinfection. A study on healthcare workers in the United Kingdom<sup>16</sup> reported that previous infection was associated with an 83% lower risk of infection. These

two studies are based on 11,727 and 6,614 previously infected individuals, with 72 and 44 reinfections, respectively. In comparison, the Recovered cohort in our study comprised 187,549 individuals, with 894 reinfections. One possible reason for the differences in the estimated protection against reinfection could be related to detection bias of SARS-CoV-2 infection. However, our estimated high levels of protection against hospitalization and serious disease after reinfection are unlikely to be affected by detection bias, and are reassuring.

An important assumption made here is that rates of infection or hazards are independent of time from vaccination. However, the rate of infection is expected to depend on time from vaccination or on time from first infection. Studying the hazard as a function of time is crucial for understanding waning immunity and for the need for additional booster vaccinations. Follow-up is currently too short to answer time-dependent questions, but this is a crucial and required next step that can be answered using the national Israeli data in the future. The hazard may also depend on calendar time, not only via environmental exposure, but also because of new variants appearing, against which, the vaccine may have different efficacy. During the period over which the data were collected, the COVID-19 variant B.1.1.7 was by far the most prevalent variant, and accounted for most of the documented cases, hence the approximation of a constant hazard is justified. Yet, it is of great importance to repeat this study in other populations in order to estimate the efficacy for other variants and vaccines.

This study suggests that both the BNT162b2 vaccine and prior SARS-CoV-2 infection are effective against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. Moreover, the effectiveness seems similar for both cohorts. This puts into question the need to vaccinate recent (up to six month) previously-infected individuals.

**Table 4: Vaccination efficacy.** Vaccination efficacy for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe and Death outcomes for the lowest age groups due to very low case numbers in the vaccinated cohorts.

Age	Positive	Hospitalized	Severe	Death
16-39	95.1% [94.8, 95.4]	96.5% [93.8, 98.0]	—	—
40-49	92.5% [92.0, 93.0]	94.4% [91.7, 96.2]	—	—
50-59	92.7% [92.2, 93.1]	95.0% [93.3, 96.3]	—	—
60-69	92.4% [91.9, 92.9]	96.1% [95.1, 97.0]	96.4% [95.1, 97.3]	94.0% [90.4, 96.2]
70-79	92.2% [91.6, 92.8]	94.8% [93.8, 95.6]	95.5% [94.5, 96.4]	95.4% [93.5, 96.7]
80+	85.6% [84.3, 86.7]	91.2% [89.8, 92.4]	91.9% [90.4, 93.2]	92.6% [90.6, 94.1]
Overall	92.8% [92.6, 93.0]	94.2% [93.6, 94.7]	94.4% [93.6, 95.0]	93.7% [92.5, 94.7]

**Table 5: Protection of prior SARS-CoV-2 infection.** Protection of prior SARS-CoV-2 infection for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe outcomes for the lowest age groups and for Death for all age groups due to very low case numbers in the previously-infected cohorts.

Age	Positive	Hospitalized	Severe
16-39	94.5% [94.1, 94.9]	92.8% [87.3, 95.9]	—
40-49	95.1% [94.2, 95.9]	95.4% [87.7, 98.3]	—
50-59	95.2% [94.1, 96.1]	93.9% [87.1, 97.1]	—
60-69	96.1% [94.6, 97.2]	95.7% [89.6, 98.2]	96.1% [87.8, 98.7]
70-79	97.0% [94.7, 98.3]	94.1% [86.8, 97.3]	98.7% [90.5, 99.8]
80+	91.4% [85.5, 94.9]	94.2% [84.5, 97.8]	94.2% [81.9, 98.1]
Overall	94.8% [94.4, 95.1]	94.1% [91.9, 95.7]	96.4% [92.5, 98.3]

**Figure 1: Population dynamics.** Documented new infections and cumulative vaccinated persons by date. The study period and the infection period of the recovered cohorts are marked by vertical lines.

## Web Appendix: The Statistical Model

We define the efficacy of the vaccine in terms of hazard ratios. We use the following constant hazard models to describe the dynamics of an uninfected individual risk over time (calendar time and time from vaccination), where, in the most general model, each cohort has different coefficients:

$$h_i(x) = \exp\{\alpha_i + \beta_i^T x\} \quad i = 0, 1A, 1B, 2, \text{Recovered}.$$

Here  $x$  indicates a set of risk factors of an individual, including time dependent variables (municipality risk). While the model above is quite general, enabling different coefficients for the different cohorts, our basic model restricts the coefficients of sex, past PCR tests and municipality risk to be equal among the cohorts. Specifically, let

$$\beta_i^T x = \beta_{i,age} \times \text{Age} + \beta_{i,sex} \times \text{Sex} + \beta_{i,ppcr} \times \text{Past PCR} + \beta_{i,risk} \times \text{Municipal risk},$$

We assume that for  $i = 0, 1A, 1B, 2, \text{Recovered}$ ,

$$\beta_{i,sex} = \beta_{sex}, \quad \beta_{i,ppcr} = \beta_{ppcr}, \quad \text{and} \quad \beta_{i,risk} = \beta_{risk}.$$

Thus, the effect of sex, past PCR test, and municipal risk on efficacy is multiplicative and identical among cohorts. However, efficacy may vary between different age groups.

The constant hazard assumption implies underlying exponential event-free models for these cohorts, with time-dependent covariates. The analysis can be carried out by performing Poisson regression with offsets for each risk profile. Specifically, consider a group of individuals' days in Cohort  $i$  with a certain risk profile  $x_0$  (here the profile also includes time-dependent covariates, so only days satisfying  $x_0$  count). The response variable is 'case count' – the number of cases among these individuals' days, and the exposure is the sum of all at-risk days for individuals with cohort and risk-profile combination  $(i, x_0)$ . Thus, the model implies

$$\frac{E(\text{case count} \mid x_0, \text{at-risk days})}{\text{at-risk days}} = \exp\{\beta_i^T x_0\}.$$

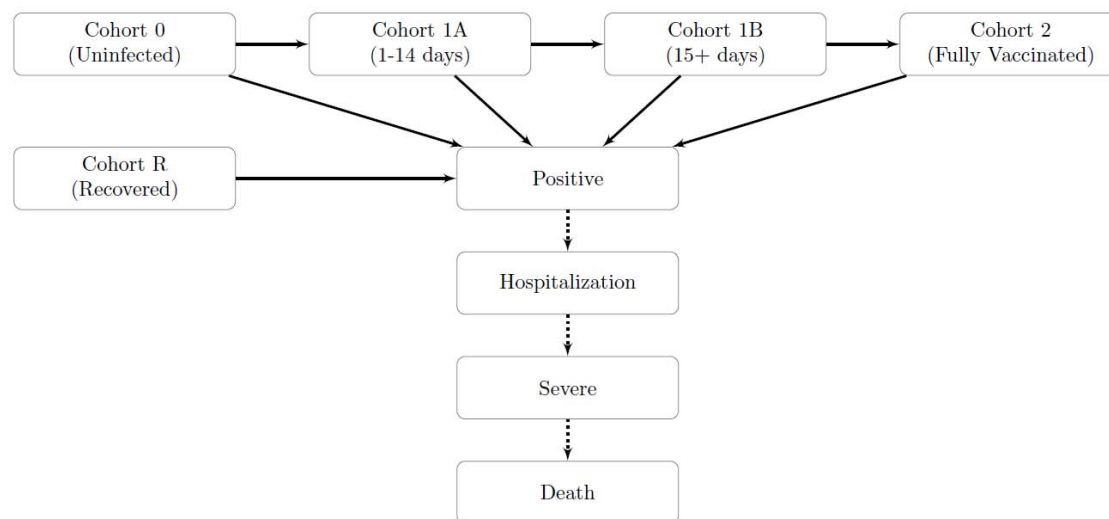

In other words, the daily hazard for an event for an individual in Cohort  $i$  and risk profile  $x$ , denoted by  $h_{i,x}$ , is  $e^{\beta_i^T x}$ . The relative risk for Cohort  $i = 2$  with risk profile  $x$  is defined as  $h_{2,x}/h_{0,x}$ , and the efficacy is defined as  $1 - h_{2,x}/h_{0,x}$ . Under the assumption of equal coefficients for sex, past PCR tests and municipality risk, the relative efficacy depends only on the age group.

Technically, in order to estimate the coefficients in the model, we create a working dataset as follows. For each combination of cohort, age group, sex, municipality risk level, and individualized risk level, we count the number of COVID-19 events and the number of at-risk days. Consider, for example, a 56-year-old male who lives in Tel Aviv, had 1 negative PCR test before December 20, 2020, received his first dose on January 1, 2021, and his second dose on January 23, 2020, and tested positive on February 8, 2021. Assume that the Tel Aviv risk level was category 1 during the period December 20, 2020 to January 20, 2021, category 2 from January 21, 2021 until the end of follow-up on February 8, 2021. This person contributes:

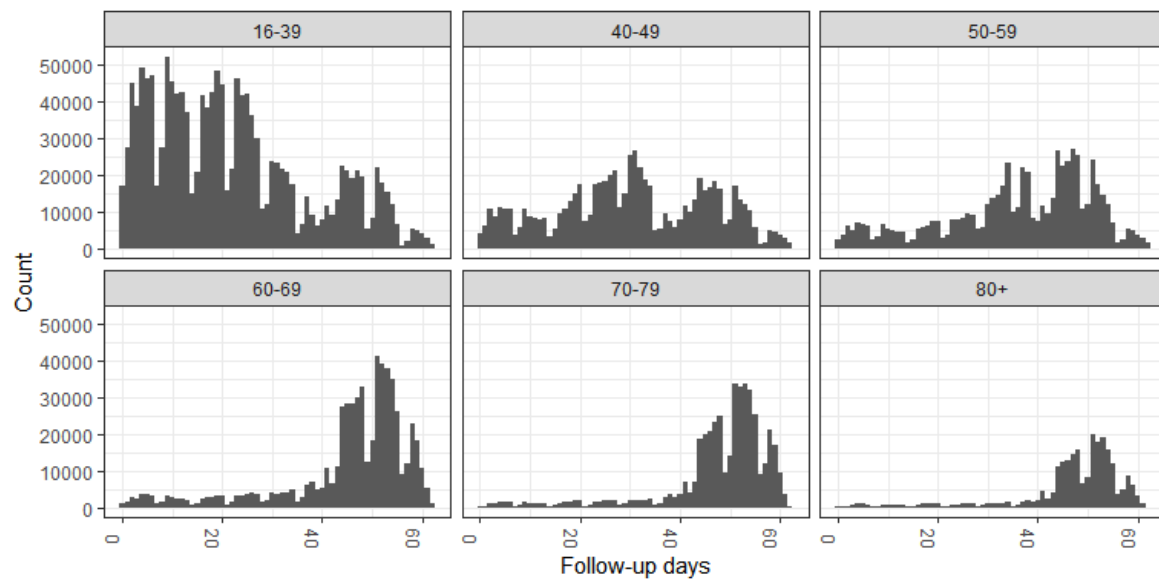

1. 11 days (Dec-20 to Dec-31) and 0 events to the group:  
cohort\_0/50-60/male/mun\_risk=1/past\_pcr=1
2. 14 days (Jan-1 to Jan-14) and 0 events to the group:  
cohort\_1A/50-60/male/mun\_risk=1/past\_pcr=1
3. 6 days (Jan-15 to Jan-20) and 0 events to the group:  
cohort\_1B/50-60/male/mun\_risk=1/past\_pcr=1
4. 9 days (Jan-21 to Jan-29) and 0 events to the group:  
cohort\_1B/50-60/male/mun\_risk=2/past\_pcr=1
5. 10 days (Jan-30 to Feb-8) and 1 event to the group:  
cohort\_2/50-60/male/mun\_risk=2/past\_pcr=1

**Figure S1: The dynamics of the cohort model.** Solid arrows indicate possible transitions between cohorts. Dashed arrows indicate possible disease outcomes.

**Figure S2: Length of follow-up for Cohort 2.** Length of follow-up for Cohort 2 of the fully vaccinated, according to age group. Vaccination became available first to the 60+ age groups and then gradually to younger age groups as can be seen from the follow-up counts.

**Figure S3: Length of follow-up for the Recovered Cohort.** Length of follow-up from first positive PCR test for the Recovered Cohort, according to age group. This cohort included individuals that had a positive PCR test between June 1 and September 30, 2020. Note the sharp decrease in counts as a function of the follow-up. Note that each subfigure has a different scale.

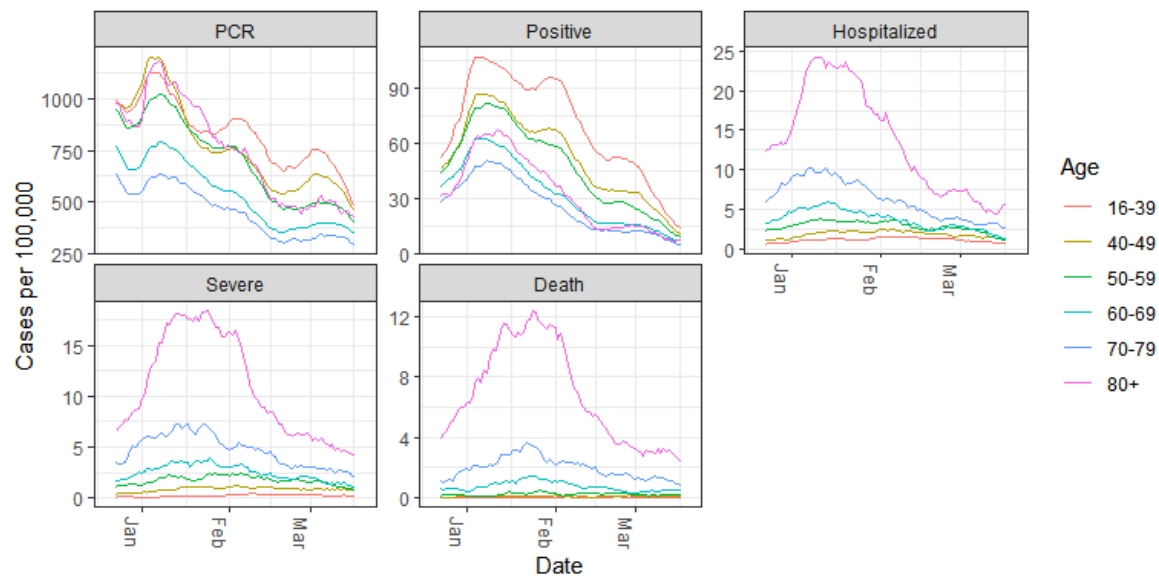

**Figure S4: Vaccination by age.** Percent of individuals vaccinated with the first and the second dose, by age group. The vaccination initiated in the 60+ age group. See text for details.

**Figure S5: Vaccination by municipality risk.** Percent of individuals vaccinated with the first and the second dose, by municipality risk group. The municipality risk was calculated as the median of the daily risk over the research period . Note that there is a negative correlation between vaccine coverage and risk group.

**Figure S6: Events over time.** Cases per 100,000, smoothed using seven-day moving average for the different age groups and the outcomes: PCR tests, documented infection cases, hospitalized cases, severe cases, and deaths.

**Table S1: Sensitivity analysis of past PCR on prior SARS-CoV-2 infection.** Protection of prior SARS-CoV-2 infection for the different age groups. The model was fitted when the number of PCR clusters is assigned to be 0, 1, 2+, and omitted.

Analysis	Age	Positive	Hospitalized	Severe
PCR 0	16-39	91.9% [91.3, 92.6]	89.5% [81.5, 94.1]	—
PCR 0	40-49	92.8% [91.4, 93.9]	93.3% [82.0, 97.5]	—

Sharing of PHI with public health authorities is addressed in §164.512, “Uses and disclosures for which consent, an authorization, or an opportunity to agree or object is not required.” §164.512(a) permits disclosures that are required by law, which may be applicable to certain public health activities. §164.512(b) explicitly permits disclosures to public health authorities for public health activities:

“(1) Permitted disclosures. A covered entity may disclose protected health information for the public health activities and purposes described in this paragraph [§164.512(b)(1)] to:

(i) A public health authority that is authorized by law to collect or receive such information for the purpose of preventing or controlling disease, injury, or disability, including but not limited to, the reporting of disease, injury, vital events such as birth or death, and the conduct of public health surveillance, public health investigations, and public health interventions; or at the direction of a public health authority, to an official of a foreign government agency that is acting in collaboration with a public health authority;

(ii) A public health authority... authorized by law to receive reports of child abuse or neglect;

(iv) A person who may have been exposed to a communicable disease or may otherwise be at risk of contracting or spreading a disease or condition, if the necessary for the stated purpose(s); ...” (See §164.514(d)(3)(iii), 65 F. R. p. 82819 for complete requirements)

**Mandated vaccination is a violation of the freedom of religious, spiritual, and personal beliefs as protected by law.**

- The First Amendment of The Constitution of The United States of America states:

*Congress shall make no law* respecting an establishment of religion, or *prohibiting the free exercise thereof*.

Any law that denies parents a religious vaccine exemption is a violation of The First Amendment protected right of Americans to freely exercise their religious beliefs as they see fit for themselves and their family.

- Article 7 of the 1966 *International Covenant on Civil and Political Rights* as put forth by The Geneva Convention states:

No one shall be subjected without his free consent to medical or scientific experimentation.

Vaccines are not subjected to long-term safety studies, nor are they subjected to proper randomized, double-blind, placebo-controlled studies. Some vaccines, such as the HPV Gardasil vaccine, are “fast-tracked” for immediate use ***without*** any kind of clinical trials. The flu vaccine changes from year to year, and therefore cannot undergo any kind of adequate safety and efficiency trials. ***This technically renders all vaccines as medically experimental***, thereby making any mandated vaccines a violation of The Geneva Convention.

- *The Universal Declaration of Human Rights*, put forth by The United Nations,

states:

1. Article 12: *No one shall be subjected to arbitrary interference with his privacy, family, [or] home. ... Everyone has the right to the protection of the law against such interference.*

Mandated vaccines are a direct interference with families by forcing medical treatment without consent, and are thereby a violation of Article 12 of *The Universal Declaration of Human Rights*.

2. Article 18: Everyone has the right to *freedom of thought, conscience, and religion; this right includes freedom...either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship, and observance.*

Similar to The First Amendment of The US Constitution, any law that denies parents a vaccine exemption for religious reasons is a violation of the protected right of Americans to freely exercise their religious beliefs as they see fit for themselves and their family. Denying a philosophical exemption is also a violation of personal

beliefs and philosophy as described by Article 18. *In addition, any law mandating vaccines that calls for the quarantine or banishment of “the unvaccinated” from a public space, such as a school or market, simply for exercising their right to practice their religious or personal beliefs through use of a vaccine exemption is a violation of Article 18.*

3. Article 25: (1). *Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing, and medical care.*

The health and well-being of a family is determined *by the family*. It is not subject to the interference of the government. This includes decisions about what medical care would be most appropriate for the individuals in question. *In addition, a family cannot interfere with the health wishes of another family;* they are only responsible for themselves. *A parent cannot demand the vaccination of a child that is not their own.* To allow so is a violation of Article 25 (1).

## 2. Mandated vaccination is a violation of medical ethics.

- The Hippocratic Oath states:

1. Traditional translation: *I will keep them [patients] from harm and injustice.*
2. Traditional translation: *I will neither give a deadly drug to anybody who asked for it, nor will I make a suggestion to this effect.*

Vaccines have known risks, including severe permanent injury and death, which have been acknowledged by both the vaccine manufacturers and the federal government. To force a health care professional to administer a vaccine to a patient who does not want one is a violation of The Hippocratic Oath.

3. Modern translation: *I must not play at God.*

Many people who object to vaccines for religious and spiritual reasons see vaccines as an affront to God, whom they believe to be perfect and incapable of making mistakes. Vaccine theory believes that the human immune system is defective and must be corrected **by man**, therefore claiming that God “made a mistake” in creating the human race. Mandating vaccines allows health care professionals to “play God,” thereby violating both The Hippocratic Oath and the above mentioned laws that protect religious freedom.

- The American Medical Association's Code of Medical Ethics states:

Informed Consent: The patient should make his or her own determination about treatment. ... *Informed consent is a basic policy in both ethics and law that physicians must honor*, unless the patient is unconscious or otherwise incapable of consenting, and harm from failure to treat is imminent.

The AMA's Code of Medical Ethics specifically states that physicians must honor the patient's wishes regarding their treatment; *it is not optional*.

Furthermore, Merriam-Webster's defines *imminent* as follows:

Ready to take place; ... impending

Merriam-Webster's defines *impending* as follows:

That is about to occur

*There is no imminent, impending, or otherwise immediate threat of bodily harm that would result from declining vaccination.*

### 3. Mandated vaccination is a violation of legal accountability and medical science.

In addition to the above cited protected freedoms, we also object to being denied our right to decline a medical procedure or product in which:

- *The manufacturer cannot be held liable for any injury or death* occurring from the use of their product (The National Childhood Vaccine Act of 1986)
- The government recognizes that *the product and procedure is “unavoidably unsafe”* (US Supreme Court ruling, 2011)
- *The manufacturer admits* in the package inserts that the product:
  1. Has not been tested for *carcinogenic or mutagenic potential*
  2. Has not been tested for safety *in the populations targeted for product use*
  3. Can cause *serious permanent injury and death*
  4. Can cause *the very illness and disease the product is designed to prevent*
- Product safety and efficiency studies are *funded and conducted by the product*

*manufacturer and/or the federal government* instead of by an independent and neutral third-party which has no stake in potential profits from product sales.

- The product:

1. Has been “fast-tracked” for approval *without* undergoing basic safety and efficiency studies (HPV vaccines)
2. *Has not undergone proper randomized, double-blind, placebo-controlled safety and efficiency studies*
3. Has not undergone *long-term* safety and efficiency studies

- *The manufacturer is facing multiple federal charges of scientific fraud in regards to product efficiency* (Merck’s MMR vaccine)
- *The Centers for Disease Control and Prevention (CDC) is facing allegations of scientific fraud in regards to product safety* (Merck’s MMR vaccine)

Los Angeles, CA 90012

Dear whom it may concern,

May this letter find you all in good health and spirit. Greetings, my name is Erica Singsay and I am writing this letter in regards to opposing these bills that you all are trying to pass. I am opposing bill number 21, 73A, and 73B. If this bill passes it is stating that we are still living up to the  $\frac{3}{5}$  compromise which falls under the 13 Amendment. In hence, stating that we as a human being have no rights and we are still own and are properties to your governmental biological warfare experiments. While having rights in America as human beings, we then should have rights to our body and choices. So this is why I am opposing these bills, because you guys are contradicting yourself with the law taking off the 13 Amendment of  $\frac{3}{5}$  compromise. Instead, your governmental officials and politicians are still enforcing the  $\frac{3}{5}$  compromise by being secretive and using tricknology on humankind by trying to pass the 21, 73A, and 73B bills.

Sincerely,

*Erica Singsay*

**Erica Singsay**

I, Rebecca Reeves, would like to resend my vote. I accidently voted in favor for the following items.

Items 21, 73A, 73 B I pressed acknowledge before realizing I had submitted a vote of in favor. I would like to correct my vote as the following

Item 21 OPPOSE

73A OPPOSE

73B OPPOSE

Thank you,

Rebecca Reeves

## RESEARCH LETTER

## SARS-CoV-2 Spike Protein Impairs Endothelial Function via Downregulation of ACE 2

Yuyang Lei,\* Jiao Zhang,\* Cara R. Schiavon<sup>1</sup>, Ming He, Lili Chen, Hui Shen, Yichi Zhang, Qian Yin, Yoshitake Cho, Leonardo Andrade, Gerald S. Shadel, Mark Hepokoski, Ting Lei, Hongliang Wang, Jin Zhang, Jason X.-J. Yuan, Atul Malhotra, Uri Manor<sup>1</sup>,†, Shengpeng Wang,† Zu-Yi Yuan,† John Y.-J. Shyy<sup>1</sup>†

**S**ARS-CoV-2 (severe acute respiratory syndrome coronavirus 2) infection relies on the binding of S protein (Spike glycoprotein) to ACE (angiotensin-converting enzyme) 2 in the host cells. Vascular endothelium can be infected by SARS-CoV-2,<sup>1</sup> which triggers mitochondrial reactive oxygen species production and glycolytic shift.<sup>2</sup> Paradoxically, ACE2 is protective in the cardiovascular system, and SARS-CoV-1 S protein promotes lung injury by decreasing the level of ACE2 in the infected lungs.<sup>3</sup> In the current study, we show that S protein alone can damage vascular endothelial cells (ECs) by downregulating ACE2 and consequently inhibiting mitochondrial function.

We administered a pseudovirus expressing S protein (Pseu-Spike) to Syrian hamsters intratracheally. Lung damage was apparent in animals receiving Pseu-Spike, revealed by thickening of the alveolar septa and increased infiltration of mononuclear cells (Figure [A]). AMPK (AMP-activated protein kinase) phosphorylates ACE2 Ser-680, MDM2 (murine double minute 2) ubiquitinates ACE2 Lys-788, and crosstalk between AMPK and MDM2 determines the ACE2 level.<sup>4</sup> In the damaged lungs, levels of pAMPK (phospho-AMPK), pACE2 (phospho-ACE2), and ACE2 decreased but those of MDM2 increased (Figure [B], i). Furthermore, complementary increased and decreased phosphorylation of eNOS (endothelial NO synthase) Thr-494 and Ser-1176

indicated impaired eNOS activity. These changes of pACE2, ACE2, MDM2 expression, and AMPK activity in endothelium were recapitulated by in vitro experiments using pulmonary arterial ECs infected with Pseu-Spike which was rescued by treatment with N-acetyl-L-cysteine, a reactive oxygen species inhibitor (Figure [B], ii).

We next studied the impact of S protein on mitochondrial function. Confocal images of ECs treated with S1 protein revealed increased mitochondrial fragmentation, indicating altered mitochondrial dynamics (Figure [C], i). To examine whether these mitochondrial changes were due, in part, to the decreased amount of ACE2, we overexpressed ACE2 S680D (ACE2-D, a phospho-mimetic ACE2 with increased stability) or S680L (ACE2-L, a dephospho-mimetic with decreased stability)<sup>4</sup> in ECs. As shown in Figure [C], ii, ECs with ACE2-L had a higher number of fragmented mitochondria when compared to those with ACE2-D. Performing oxygen consumption rate and extracellular acidification rate assays, we found that ECs overexpressing ACE2-L had reduced basal mitochondrial respiration, ATP production, and maximal respiration compared to ECs overexpressing ACE2-D (Figure [D], i). Moreover, ACE2-L overexpression caused increased basal acidification rate, glucose-induced glycolysis, maximal glycolytic capacity, and glycolytic reserve (Figure [D], ii). Also, ECs incubated with S1 protein had attenuated mitochondrial function but increased

## Nonstandard Abbreviation and Acronyms

<b>ACE</b>	angiotensin-converting enzyme
<b>ECs</b>	endothelial cells
<b>eNOS</b>	endothelial NO synthase
<b>pACE2</b>	phospho-ACE2
<b>pAMPK</b>	phospho-AMPK
<b>S protein</b>	Spike glycoprotein

glycolysis, when compared with control cells treated with IgG (Figure [D], iii and iv). We also compared the expressions of mitochondria- and glycolysis-related genes in lung ECs isolated from ACE2-D or ACE2-L knock-in mice.<sup>4</sup> Shown in Figure [E], the mRNA levels of *NRF1*, *HO1*, and *TFAM* (mitochondria biogenesis-related genes) were increased, whereas those of *HK2*, *PFKFB3*, and *ENO2* (glycolysis-related genes) were decreased in lung ECs in ACE2-D mice, as compared to those in ACE2-L mice.

SARS-CoV-2 infection induces EC inflammation, leading to endotheliitis.<sup>1,5</sup> Because S protein decreased ACE2 level and impaired NO bioavailability, we examined whether S protein entry is indispensable for dysfunctional endothelium. As shown in Figure [F], i, the endothelium-dependent vasodilation induced by acetylcholine was impaired in pulmonary arteries isolated from Pseu-Spike-administered hamsters, whereas the endothelium-independent vasodilation induced by sodium nitroprusside was not affected. We also compared the acetylcholine- and sodium nitroprusside-induced vasodilation of pulmonary vessels from ACE2-D or ACE2-L mice. As anticipated, acetylcholine-induced vasodilation was hindered in pulmonary arteries isolated from ACE2-L mice in comparison to ACE2-D mice (Figure [F], ii). There was, however, little difference in sodium nitroprusside-induced vasodilation between ACE2-D and ACE-L animals.

Although the use of a noninfectious pseudovirus is a limitation to this study, our data reveals that S protein alone can damage endothelium, manifested by impaired mitochondrial function and eNOS activity but increased glycolysis. It appears that S protein in ECs increases redox stress which may lead to AMPK deactivation, MDM2 upregulation, and ultimately ACE2 destabilization.<sup>4</sup> Although these findings need to be confirmed with the SARS-CoV-2 virus in the future study, it seems paradoxical that ACE2 reduction by S protein would decrease the virus infectivity, thereby protecting endothelium. However, a dysregulated renin-angiotensin system due

to ACE2 reduction may exacerbate endothelial dysfunction, leading to endotheliitis. Collectively, our results suggest that the S protein-exerted EC damage overrides the decreased virus infectivity. This conclusion suggests that vaccination-generated antibody and/or exogenous antibody against S protein not only protects the host from SARS-CoV-2 infectivity but also inhibits S protein-imposed endothelial injury.

### ABSTRACT

#### BACKGROUND

The efficacy of public health measures to control the transmission of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) has not been well studied in young adults.

#### METHODS

We investigated SARS-CoV-2 infections among U.S. Marine Corps recruits who underwent a 2-week quarantine at home followed by a second supervised 2-week quarantine at a closed college campus that involved mask wearing, social distancing, and daily temperature and symptom monitoring. Study volunteers were tested for SARS-CoV-2 by means of quantitative polymerase-chain-reaction (qPCR) assay of nares swab specimens obtained between the time of arrival and the second day of supervised quarantine and on days 7 and 14. Recruits who did not volunteer for the study underwent qPCR testing only on day 14, at the end of the quarantine period. We performed phylogenetic analysis of viral genomes obtained from infected study volunteers to identify clusters and to assess the epidemiologic features of infections.

#### RESULTS

A total of 1848 recruits volunteered to participate in the study; within 2 days after arrival on campus, 16 (0.9%) tested positive for SARS-CoV-2, 15 of whom were asymptomatic. An additional 35 participants (1.9%) tested positive on day 7 or on day 14. Five of the 51 participants (9.8%) who tested positive at any time had symptoms in the week before a positive qPCR test. Of the recruits who declined to participate in the study, 26 (1.7%) of the 1554 recruits with available qPCR results tested positive on day 14. No SARS-CoV-2 infections were identified through clinical qPCR testing performed as a result of daily symptom monitoring. Analysis of 36 SARS-CoV-2 genomes obtained from 32 participants revealed six transmission clusters among 18 participants. Epidemiologic analysis supported multiple local transmission events, including transmission between roommates and among recruits within the same platoon.

#### CONCLUSIONS

Among Marine Corps recruits, approximately 2% who had previously had negative results for SARS-CoV-2 at the beginning of supervised quarantine, and less than 2% of recruits with unknown previous status, tested positive by day 14. Most recruits who tested positive were asymptomatic, and no infections were detected through daily symptom monitoring. Transmission clusters occurred within platoons. (Funded by the Defense Health Agency and others.)

**P**ROSPECTIVE STUDIES MAY BE USEFUL TO inform strategies to mitigate the transmission of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), particularly in group settings among young adults.<sup>1-4</sup> U.S. Department of Defense installations have implemented recommended public health interventions.<sup>5</sup> However, confined living spaces, close contact among persons during training regimens and other activities, shared dining facilities, and mixing of persons from across the United States place military populations at risk for contracting contagious respiratory infections such as coronavirus disease 2019 (Covid-19).<sup>6-9</sup> The transmission of SARS-CoV-2 and Covid-19 in military settings has not been well studied.

The public health program implemented by the U.S. Marine Corps for all new recruits includes a period of home quarantine followed by a 2-week, strictly supervised quarantine at a closed campus, with the objective of mitigating infection among recruits. To evaluate the effectiveness of these measures, we monitored SARS-CoV-2 infections with serial real-time quantitative polymerase-chain-reaction (qPCR) assays and assessed events of virus transmission by means of phylogenetic analysis of viral genomes obtained from infected participants.

## METHODS

### STUDY DESIGN AND PARTICIPANTS

To reduce the risk of introducing SARS-CoV-2 into basic training at Marine Corps Recruit Depot, Parris Island, in South Carolina, the Marine Corps established a 14-day supervised quarantine period at a college campus used exclusively for this purpose. Potential recruits were instructed to quarantine at home for 2 weeks immediately before they traveled to campus. At the end of the second, supervised quarantine on campus, all recruits were required to have a negative qPCR result before they could enter Parris Island. Recruits were asked to participate in the COVID-19 Health Action Response for Marines (CHARM) study, which included weekly qPCR testing and blood sampling for IgG antibody assessment.

After potential recruits had completed the 14-day home quarantine, they presented to a local Military Entrance Processing Station, where a medical history was taken and a physical exami-

nation was performed. If potential recruits were deemed to be physically and mentally fit for enlistment, they were instructed to wear masks at all times and maintain social distancing of at least 6 feet during travel to the quarantine campus. Classes of 350 to 450 recruits arrived on campus nearly weekly. New classes were divided into platoons of 50 to 60 recruits, and roommates were assigned independently of participation in the CHARM study. Overlapping classes were housed in different dormitories and had different dining times and training schedules.

During the supervised quarantine, public health measures were enforced to suppress SARS-CoV-2 transmission (Table S1 in the Supplementary Appendix, available with the full text of this article at NEJM.org). All recruits wore double-layered cloth masks at all times indoors and outdoors, except when sleeping or eating; practiced social distancing of at least 6 feet; were not allowed to leave campus; did not have access to personal electronics and other items that might contribute to surface transmission; and routinely washed their hands. They slept in double-occupancy rooms with sinks, ate in shared dining facilities, and used shared bathrooms. All recruits cleaned their rooms daily, sanitized bathrooms after each use with bleach wipes, and ate preplated meals in a dining hall that was cleaned with bleach after each platoon had eaten. Most instruction and exercises were conducted outdoors. All movement of recruits was supervised, and unidirectional flow was implemented, with designated building entry and exit points to minimize contact among persons. All recruits, regardless of participation in the study, underwent daily temperature and symptom screening. Six instructors who were assigned to each platoon worked in 8-hour shifts and enforced the quarantine measures. If recruits reported any signs or symptoms consistent with Covid-19, they reported to sick call, underwent rapid qPCR testing for SARS-CoV-2, and were placed in isolation pending the results of testing.

Instructors were also restricted to campus, were required to wear masks, were provided with preplated meals, and underwent daily temperature checks and symptom screening. Instructors who were assigned to a platoon in which a positive case was diagnosed underwent rapid

qPCR testing for SARS-CoV-2, and, if the result was positive, the instructor was removed from duty. Recruits and instructors were prohibited from interacting with campus support staff, such as janitorial and food-service personnel. After each class completed quarantine, a deep bleach cleaning of surfaces was performed in the bathrooms, showers, bedrooms, and hallways in the dormitories, and the dormitory remained unoccupied for at least 72 hours before reoccupancy.

Within 2 days after arrival at the campus, after recruits had received assignments to platoons and roommates, they were offered the opportunity to participate in the longitudinal CHARM study. Recruits were eligible if they were 18 years of age or older and if they would be available for follow-up. The study was approved by the institutional review board of the Naval Medical Research Center and complied with all applicable federal regulations governing the protection of human subjects. All participants provided written informed consent.

#### PROCEDURES

At the time of enrollment, participants answered a questionnaire regarding demographic characteristics, risk factors for SARS-CoV-2 infection, symptoms within the previous 14 days, and a brief medical history; blood samples and mid-turbinate nares swab specimens were obtained for qPCR testing to detect SARS-CoV-2. Demographic information included sex, age, ethnic group, race, place of birth, and U.S. state or country of residence; information regarding risk factors included whether participants had used masks, whether they had adhered to self-quarantine before arrival, their recent travel history, their known exposure to someone with Covid-19, whether they had flulike symptoms or other respiratory illness, and whether they had any of 14 specific symptoms characteristic of Covid-19 or any other symptoms associated with an unspecified condition within the previous 14 days.

Study participants were followed up on days 7 and 14, at which time they reported any symptoms that had occurred within the past 7 days. Nares swab specimens for repeat qPCR assays were also obtained. Participants who had positive qPCR results were placed in isolation and were approached for participation in a related but separate study of infected recruits, which involved

more frequent testing during isolation. All recruits who did not participate in the current study were tested for SARS-CoV-2 only at the end of the 2-week quarantine, unless clinically indicated (in accordance with the public health procedures of the Marine Corps). Serum specimens obtained at enrollment were tested for SARS-CoV-2-specific IgG antibodies with the use of the methods described below and in the Supplementary Appendix.

Participants who tested positive on the day of enrollment (day 0) or on day 7 or day 14 were separated from their roommates and were placed in isolation. Otherwise, participants and non-participants were not treated differently: they followed the same safety protocols, were assigned to rooms and platoons regardless of participation in the study, and received the same formal instruction.

#### LABORATORY METHODS

The qPCR testing of mid-turbinate nares swab specimens for SARS-CoV-2 was performed within 48 hours after collection by Lab24 (Boca Raton, FL) with the use of the TaqPath COVID-19 Combo Kit (Thermo Fisher Scientific), which is authorized by the Food and Drug Administration. Specimens obtained from nonparticipants were tested by the Naval Medical Research Center (Silver Spring, MD). Specimens were stored in viral transport medium at 4°C. The presence of IgG antibodies specific to the SARS-CoV-2 receptor-binding (spike) domain in serum specimens was evaluated with the use of an enzyme-linked immunosorbent assay, as previously described,<sup>10</sup> with some modifications. At least two positive controls, eight negative controls (serum specimens obtained before July 2019), and four blanks (no serum) were included in every plate. Serum specimens were first screened at a 1:50 dilution, followed by full dilution series if the specimens were initially found to be positive.

#### WHOLE-GENOME SEQUENCING AND ASSEMBLY

SARS-CoV-2 sequencing was performed with the use of two sequencing protocols (an Illumina sequencing protocol and an Ion Torrent sequencing protocol) to increase the likelihood of obtaining complete genome sequences. A custom reference-based analysis pipeline ([https://github.com/mjsull/COVID\\_pipe](https://github.com/mjsull/COVID_pipe)) was used to assemble

SARS-CoV-2 genomes with the use of data from Illumina, Ion Torrent, or both.<sup>11</sup>

#### PHYLOGENETIC ANALYSIS

SARS-CoV-2 genomes obtained from patients worldwide and associated metadata were downloaded from the Global Initiative on Sharing All Influenza Data EpiCoV database<sup>12</sup> on August 11, 2020 (79,840 sequences), and a subset of sequences was selected from this database with the use of the default subsampling scheme of Nextstrain software<sup>13</sup> with the aim of maximizing representation of genomes obtained from patients in the United States. Phylogenetic analyses of the specimens obtained from participants were performed with the v1.0-292-ga9de690 Nextstrain build for SARS-CoV-2 genomes with the use of default parameters. Transmission and outbreak events were identified on the basis of clustering of the SARS-CoV-2 genomes obtained from study participants within the Nextstrain phylogenetic tree, visualized with TreeTime.<sup>14</sup> A comparative analysis of mutation profiles relative to the SARS-CoV-2 Wuhan reference genome was performed with the use of Nextclade software, version 0.3.6 (<https://clades.nextstrain.org/>).

#### DATA ANALYSIS

The denominator for calculating the percentage of recruits who had a first positive result for SARS-CoV-2 by qPCR assay on each day of testing excluded recruits who had previously tested positive, had dropped out of the study, were administratively separated from the Marine Corps, or had missing data. The denominator for calculating the cumulative positivity rates included all recruits who had undergone testing at previous time points, including those who were no longer participating in the study. Only descriptive numerical results and percentages are reported, with no formal statistical analysis.

## RESULTS

#### STUDY POPULATION

From May 12 to July 15, 2020, a total of 1848 of 3143 eligible recruits (58.8%) across nine recruit classes were enrolled in the CHARM study; 324 recruits were ineligible because they were 17 years of age. A total of 40 study participants (24 participants on day 7 and 16 participants on day 14)

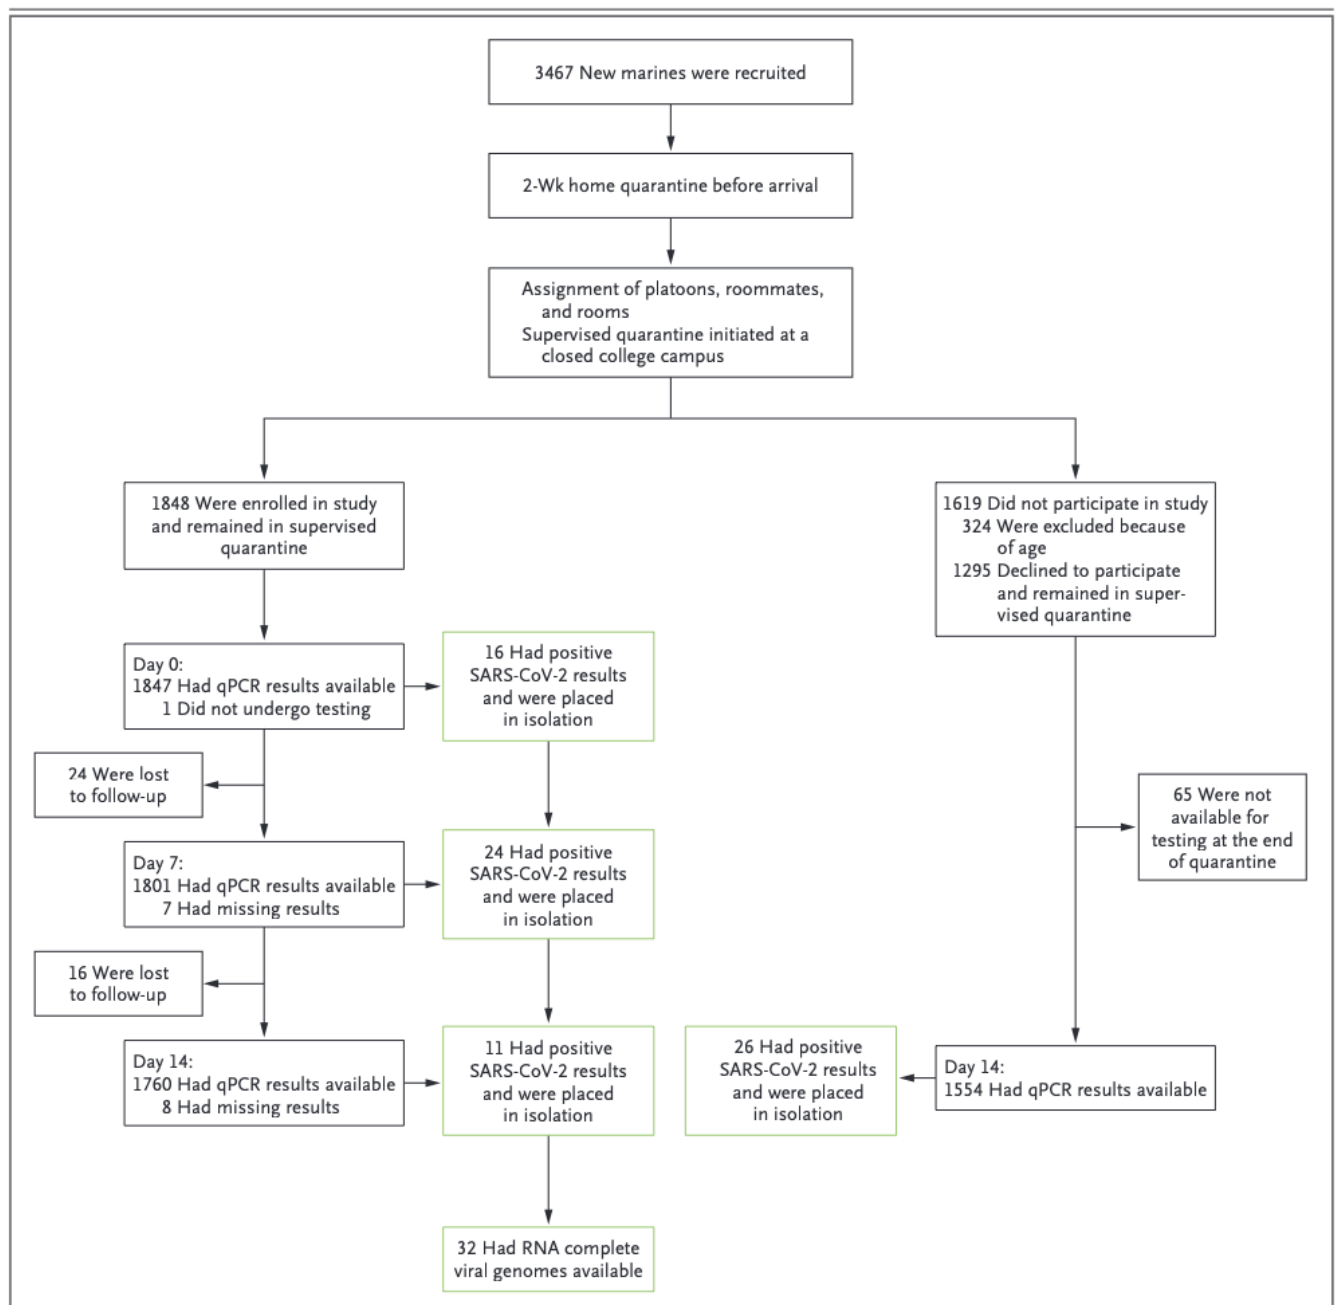

did not return for follow-up (Fig. 1). These participants either dropped out of the study, were removed from the quarantine campus for medical or administrative reasons, or were separated from the Marine Corps. Participants were from 45 states, mostly from the eastern United States and particularly from states with larger populations. A total of 133 participants (7.2%) were born outside the United States (in 1 of 64 foreign countries), 1672 (90.5%) were male, 176 (9.5%) were female, 463 (25.1%) identified as Hispanic, and 271 (14.7%) identified as Black. The mean age of the participants was 19 years (range, 18 to 31), and 1544 (83.5%) were 18 to 20 years of age. Of the 1813 participants who underwent serologic testing at enrollment, 105 (5.8%) had serum specimens that were positive for SARS-CoV-2-specific antibodies.

At the time of enrollment, 16 of 1847 participants (0.9%) tested by means of qPCR were positive for SARS-CoV-2; 5 of these participants also had positive IgG serologic results (Table 1). The 16 participants with positive qPCR results reported that they had self-quarantined at home for 14 days before their arrival, had had no exposure to anyone with flulike symptoms, had had no respiratory distress or known SARS-CoV-2 infection, and had not visited a health care facility during the previous 2 weeks.

#### POSITIVE RESULTS AND SYMPTOMS

Of the 1801 participants who had negative qPCR results at enrollment, 24 (1.3%) were positive on day 7; of these participants, 4 had positive IgG serologic results on day 0. On day 14, a total of 11 of 1760 (0.6%) of the previously negative participants tested positive; none of these participants were seropositive on day 0. Therefore, 35 participants who had had negative qPCR results within the first 2 days after arrival at the campus became positive during the supervised quarantine. Of the 51 total participants who had at least one positive qPCR test, 22 had positive tests on more than 1 day.

Symptoms in the week before or on the day of the first positive qPCR result were reported in 5 of these 51 (9.8%) positive participants on the formal study questionnaires (Table 1). The symptoms in these 5 participants were runny nose; runny nose, chills, and cough; cough and sore throat; fever and headache; and fever, chills, sore

**Figure 1. Study Design for SARS-CoV-2 Testing during Quarantine.**

Marine Corps recruits entering a strict, supervised 2-week quarantine from May 15 to July 15, 2020, at a closed college campus were recruited for the COVID-19 Health Action Response for Marines (CHARM) longitudinal study for monitoring the transmission of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) infection. Recruits who were not enrolled in the study were tested by means of quantitative polymerase-chain-reaction (qPCR) assay, as required by the Marine Corps, after 14 days of quarantine.

throat, and headache. The viral load at diagnosis, estimated on the basis of the qPCR cycle threshold, was on average approximately 4 times as high in the 5 symptomatic participants as in the 46 participants who were asymptomatic (Ta-

ble S2). However, some asymptomatic participants had high viral loads estimated on the basis of the cycle threshold (Fig. S1).

A total of 26 of the 1554 nonparticipants (1.7%) were found to be positive on day 14 as a

**Table 1. SARS-CoV-2 Positivity, Presence of Symptoms, and Infected Roommates.\***

Variable	Day 0	Day 7 number/total number (percent)	Day 14
Study participants			
First positive qPCR result†	16/1847 (0.9)	24/1801 (1.3)	11/1760 (0.6)
Cumulative no. of recruits with positive qPCR results‡	16/1847 (0.9)	40/1848 (2.2)	51/1848 (2.8)
Cumulative no. of symptomatic recruits§	1/16 (6.3)	4/40 (10.0)	5/51 (9.8)
Nonparticipants¶			
Positive qPCR result	Not tested	Not tested	26/1554 (1.7)
All recruits, including study participants and nonparticipants			
Cumulative no. of recruits with positive qPCR results	16/1847 (0.9)	40/1848 (2.2)	77/3402 (2.3)
Cumulative no. of recruits with a positive roommate	0/16 (0.0)	4/40 (10.0)	24/77 (31.2)

\* The abbreviation qPCR denotes quantitative polymerase chain reaction, and SARS-CoV-2 severe acute respiratory syndrome coronavirus 2.

† The total number on day 0 does not include 1 participant who was enrolled on day 7. The total number on day 7 includes 1 participant who was first tested on day 7 and excludes participants whose test results were missing (7 participants), who were lost to follow-up (24 participants), or who were previously positive (16 participants). The total number on day 14 includes 1 participant who was first tested on day 7 and excludes participants whose test results were missing (8 participants), who were lost to follow up (40 participants [including 24 who did not return on day 7 or day 14 and an additional 16 participants who did not return on day 14]), or who were previously positive (40 participants).

‡ The cumulative total number includes all recruits who underwent testing up to and including the relevant test day.

§ Symptomatic recruits had a fever or any symptoms within the 7 days before the positive test result. The total number is the cumulative number of study participants with positive qPCR results.

¶ Information regarding the symptoms of nonparticipants is not available. Recruits who did not participate in the study underwent testing only on day 14, as mandated by the Marine Corps. A total of 1619 recruits were categorized as nonparticipants because of ineligibility or because they declined to participate in the study. The total number of 1554 recruits on day 14 includes previous study participants who dropped out of the study but remained at the quarantine site and does not include nonparticipants who were removed from the quarantine site or separated from the Marine Corps; the number of recruits in each of these categories is not known.

|| The number of recruits indicates the number of positive recruits with a roommate who had a first positive test on or before the given test day, and the total number is the cumulative qPCR positivity for all recruits in this category.

result of qPCR testing at the end of quarantine, which was mandated by the Marine Corps. A total of 24 of 77 (31.2%) infected participants and nonparticipants had an infected roommate (Table 1). All study participants and nonparticipants underwent daily screening that included temperature checks and oral reporting of symptoms; follow-up qPCR testing was performed if indicated by the surveillance check. The results of the mandated symptom screening, which was independent of the study questionnaires regarding symptoms, was not known to the study investigators; however, no recruit with SARS-CoV-2 infection was identified as a result of this clinically indicated testing. During the study period, one instructor was found to be positive in a test that was conducted as part of contact tracing related to an infected platoon member.

#### EPIDEMIOLOGIC ANALYSIS

To assess the epidemiologic features and transmission of SARS-CoV-2 in the context of this

study, we obtained more than 95% complete viral genomes from 36 specimens obtained from 32 of 51 participants (62.7%) who had positive qPCR results for SARS-CoV-2; for 3 of these participants, genomes were recovered from samples obtained on more than one test day. Complete genomes could not be recovered from the other samples. Phylogenetic analyses that compared the recovered sequences with those recovered from patients in the United States and in other countries (a sample of 11,434 sequences) showed that most of the clades circulating in the United States were represented in SARS-CoV-2 isolates detected among recruits, a finding consistent with the geographic diversity of the participants (Fig. S2).

Six independent monophyletic transmission clusters defined by distinct mutations relative to the sampled data from U.S. and global data sets were identified — a result consistent with local transmission during the supervised quarantine. These strains were found in 18 participants; 1 par-

**Table 2.** Phylogenetic Analysis and Epidemiologically Inferred Transmission Clusters.

Phylogenetic Cluster	Sequenced Strains* <i>no. of strains (no. in same platoon)</i>	No. of Infected Recruits in the Same Platoon without Sequenced Isolate†	No. of Genomes in Cluster	No. of Infected Recruits with an Infected Roommate
Cluster 1	2 (0)	3	5	0
Cluster 2	6 (6)	3	9	6
Cluster 3	2 (2)	0	2	2
Cluster 4	2 (2)	0	2	0
Cluster 5	5 (4)	4	9	4
Cluster 6	2 (NA)‡	0	2	0
Total	19 (14)	10	29	12

\* A total of 19 genomes belonging to 6 cluster strains were obtained from 18 participants. One participant had 2 different virus strains identified in samples obtained at different times.

† Values indicate the number of infected study participants or nonparticipants who were assigned to the platoon most associated with the phylogenetically defined transmission cluster. The transmission cluster was defined according to the SARS-CoV-2 strain sequence. Infected recruits in each platoon with the highest proportion of participants infected with a sequenced cluster strain were tentatively assigned to that cluster if no sequenced isolate was obtained from that recruit.

‡ The platoon assignments of these participants were not available.

participant had two different cluster strains isolated from samples obtained on different days. Two participants who had had positive qPCR results on day 0 were each infected with different cluster strains (Tables S3 and S4). Epidemiologic data showing infected roommate pairs and the relationship of cluster strains to platoon assignments supported the phylogenetic evidence for transmission of these strains at the supervised quarantine location. Among the participants infected with one of the six cluster strains of SARS-CoV-2, a total of 14 participants shared platoon assignments with other members who were in the same cluster. In addition, 10 infected recruits without sequenced SARS-CoV-2 isolates were assigned to the same platoons as the participants in transmission clusters defined by viral sequencing. There were three different clusters among six pairs of infected roommates (Table 2).

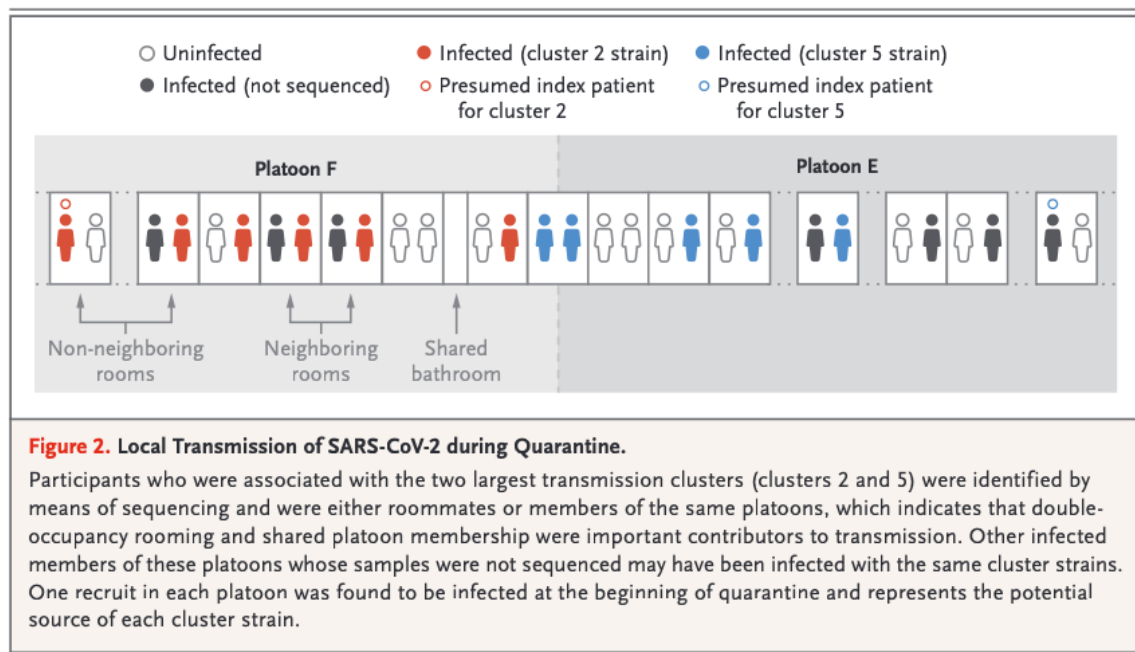

The infected participants with sequenced isolates belonging to phylogenetically identified cluster 2 or 5 had room assignments in the same hallway (Fig. 2). Cluster 2 was composed of recruits in platoon F. Cluster 5 was composed of recruits in platoon E, with the exception of a single recruit in platoon F, whose roommate was an infected recruit in platoon E. Aside from this

one event, we did not find evidence for transmission events across these platoons, even though recruits in each platoon were staying in rooms in the same hallway and shared a bathroom.

## DISCUSSION

We describe the results of a quarantine of nine Marine Corps recruit classes (a population of 3402 recruits) that participated in a public health mitigation program for Covid-19; recruits were under the constant supervision of Marine Corps instructors. Other settings in which young adults congregate are unlikely to reflect similar adherence to measures intended to reduce transmission. At the time of enrollment, after 2 weeks of home quarantine, approximately 1% of study participants had positive qPCR results, and approximately 2% subsequently became infected during the 2-week supervised quarantine period.

Study participants completed a detailed symptom questionnaire on each day of the scheduled qPCR testing. Approximately 10% of the infected study participants reported that they had had symptoms during the week before a positive qPCR result or on the day that testing occurred. Independent of the study, all participants and

nonparticipants underwent a daily temperature check and brief symptom screening, as mandated by the Marine Corps; follow-up clinical qPCR testing was performed only if indicated by this screening. During the supervised quarantine period, no SARS-CoV-2 infections were identified as a result of clinical testing performed because of symptom screening. All cases of infection in recruits were diagnosed as a result of the scheduled qPCR testing performed on days 0, 7, and 14 (in study participants) and on day 14 (in nonparticipants).

Viral genomes were recovered from almost two thirds of infected study participants. Phylogenetic analysis of these genomes identified six independent monophyletic transmission clusters indicative of local transmission during the supervised quarantine. Most clusters predominantly included members of the same platoon, and many infected recruits had an infected roommate. The two largest sequence-defined clusters occurred in the same class of recruits, and each cluster occurred within a platoon, with the exception of one recruit, who was roomed with an infected recruit from another platoon and was infected with a strain that belonged to the same cluster as that found in other members of that platoon. Although many infected recruits in both clusters had nearby room assignments and shared a bathroom, the epidemiologic analysis suggests

that platoon membership and double-occupancy rooming were risk factors for infection, but room proximity and shared bathrooms were not (Fig. 2).

The index patient for each cluster strain could have been a study participant, a nonparticipant among the 26 found to be infected when tested at the end of quarantine, a nonparticipant who was infected at the time of arrival on campus but cleared the virus by the end of quarantine, or other personnel. During the study, only one instructor tested positive after rapid qPCR SARS-CoV-2 testing, indicating that instructors were an unlikely source of infection. Although campus service workers cannot be excluded as sources for virus introduction, they were separated from the recruits and instructors. Overall, the recruits are the most likely source of introduction and transmission of the cluster strains.

Two recruits who had positive qPCR results on day 0 may have been the index patients for the strains involved in the two largest clusters that spread among members of their platoons. A third recruit who may have been the index patient for a cluster had a positive qPCR result on day 0, and his roommate, infected with the same strain, received a diagnosis on day 14. None of the three potential index patients reported symptoms, which is consistent with asymptomatic transmission. We could not reconstruct the chain of infection for each cluster because complete

viral genomes could not be recovered from all study participants, and samples from infected non-participants were unavailable for analysis. A limitation of this study is that the infection rate during the supervised quarantine period could not be estimated accurately because of possible false negative qPCR tests and because infection may have been acquired during the first self-quarantine at home or during travel to the campus but was not yet detectable on day 0 by means of qPCR assay.

Our study showed that in a group of predominantly young male military recruits, approximately 2% became positive for SARS-CoV-2, as determined by qPCR assay, during a 2-week, strictly enforced quarantine. Multiple, independent virus strain transmission clusters were identified. Shared rooms and shared platoon membership were risk factors for transmission. Most study participants with positive qPCR tests were asymptomatic, and all cases among participants and nonparticipants were identified as the result of scheduled testing rather than clinical qPCR testing performed as a result of daily screening.
