Agenda #	Relate To	Position	Name	Comments
12.		Oppose	Jason Leslie	Overstepping your authority. You can not force your employees to take an unapproved by the CDC (emergency approval ONLY). Your actions are on record and you know that your actions could cause the tax payers millions in later settlements should the Board Found to have violated the rights of nearly 100 thousand employees. This is your moment! Are you trying to be a trend setter or think you are cutting edge with your decision. Step back and watch this play out before you endanger the taxpayers money and open Pandora's box with lawsuits that could end your career.

			W Onti	<p>No one should be forced, coerced, or pressured to inject the COVID shots. My body, my decision whether the shots are right for me.</p> <p>The federal Emergency Use Authorization law and the FDA, including the FDA Fact Sheets, state unequivocally that each person has the "option to accept or refuse" the shots. These shots are experimental and investigational and have not been licensed by the FDA. The Nuremberg Code also states that voluntary consent "is absolutely essential."</p> <p>Health care workers have run to the front lines. They are heroes. They should not be terminated for making a personal decision to refuse the shots.</p>
