Agenda #	Relate To	Position	Name	Comments
			The following individuals submitted comments on agenda item:	
73-B.		Favor	Beatrice Schuster-Smith	
			BERT RIVERA	A vaccine passport creates medical "apartheid" creating 2 classes of people. This is not life and liberty in the USA, this is communism. Creating 2 classes of citizens based on any medical injection is illegal according to the Unruh Civil Rights Act. Other treatments are available. Medical choice is an individual choice, not a choice made by government for the individual. Any form of coercion via medical mandates, vaccine passports, QR does or any type of verification to show proof of vaccination violates Health & Safety codes #24171 "right of individuals to determine what is done to their own bodies" and #24172(J) "Be given the opportunity to decide to consent or not to consent to a medical experiment without the intervention of any element of force, fraud, deceit, duress, coercion, or undue influence on the subject's decision". Universally accepted codes of medical ethics including the Nuremberg Code and the Declaration of Helsinki absolutely prohibit any form of coercion to force individuals participate in a medical experiment. Big Pharma states the vaccines are voluntary and for Emergency Use Authorized only. There are many individuals who are already immune from Covid 19 as they have had the virus and recovered. There are not exceptions for these individuals further violating their rights. The manufacturers of the vaccines are exempt from liability and many individuals are getting sick and dying after being injected with the unknown substances in their drug cocktails.
			Brian Lafond	This is the only way to keep our communities safe. The rise of the Delta variant proves that people cannot be trusted on the honor system and that those who refuse to be vaccinated are spreading this deadly disease.
			Bridgette Smith	Freedom of choice
			Bruce Lewis	
			Bryan Cranston	
			Bryce Rankin	
			C Mcc	Oppose. Discrimination!!!
			Cara Hackett	
			Carmen Halit	
			Catherine MacGillivray	Masks don't do a single thing - they do the exact opposite and spread different viruses and bacterial infections. WORST decision ever to be made. This is about control and not about the health and safety of the people
			Catherine Sarah S Fullmer

73-B.		Favor	Eric Garcia	
			Erica Streelman	
			Fernando M Ferreyra	
			Gabriel Lefebvre	
			Geanne Murphy	
			Genevieve M Clavreul	
			George Bozic	My body, my choice. Not FDA approved emergency use only in a free society we would never force individuals anything against their will. Are we still the land of the free where if under 60 you have a 99% percent chance of recovery if you contract SARS-Cov2. Focus on nutrition, exercise, sunlight, vitamins and minerals.
			George Morales	We do not live in a communist country this should not be mandatory
			Gina lee	
			Guillermo Rios	
			Guy Grant	
			Haley Mcdonald	
			HaleyRae C Porwoll	
			Hank Fung	I support requiring the vaccine, but only when the FDA officially authorizes a vaccine under regular procedures. Currently all vaccine takers have to sign a disclaimer that there is no FDA approved vaccine. There are a small percentage of people that are reluctant to take the vaccine while it is still under emergency authorization. I am vaccinated for COVID but recognize that all other vaccines, like for polio, measles, flu, shingles, etc. have been fully FDA approved and COVID should be no different. In the meantime private businesses should be able to choose whether or not to require the vaccine on entry, until full FDA authorization is obtained.

			lakeva Gill	
			Lakshmi Srinivasan	
			Laura Fishman	
			laurel S stearns	
			Leeann Trevino	
Leigh Hart	Covid is a medical reality, but for many people, being forced to take a vaccine is an undue infringement on our medical rights. I am not the typical "anti-vaxxer." I am weighing my decision based on my discussions with my medical physician, my state of health, and my concerns regarding the vaccine. If elected authorities (5 county sups) feel that they can mandate the vaccine, I feel that you are over-stepping your authority. Please vote "No" on mandating Covid vaccines in the L.A. County. You will be opening a "Pandora's Box" of problems.

			Abigail Reagan	
			Abigail L Johnson	
			Abraham Bethel	
			ABRIL L PEREZ	
			Adam Ambruso	
			Adam Brubaker	
			Adam Campbell	
			Adam Fish	This is a bad idea. Currently in Los Angeles, the lowest percentage of people that are vaccinated are people of color. Dead last are black people at 46% with one shot per LA County COVID-19 Vaccine Dashboard. Creating this ordinance will create medical segregation and upset. I'm vaccinated and am not opposed to vaccinations. I, along with the majority of Los Angeles, by survey results, are against mandatory vaccinations to go about our daily lives. Everyone has the opportunity now to get vaccinated. If you are not, that is your choice. Banning the unvaccinated from eating inside will not create an impetus to get vaccinated, rather upset. Please look at what is currently happening in France and Italy. Protests every weekend with hundreds of thousands of people against mandating vaccines. I highly recommend we do not go down this path. It will only lead to destructive outcomes - hurt businesses, medical segregation, protests and unrest.
			Adam Gottfried	
			Adam Granzberg	
			Adam Hallimen

			Adrian Olmos	
			Adrian Rodriguez	
			Adrian A Bonilla	
			Adrian C Valdes	
			Adriana Estrada	
			Adriana Fourcher	It is unethical for the government to discriminate based upon disabilities, religion, race, sex or gender. Certain faith traditions prohibit administering of vaccines or restrict to those health practitioners that share their faith tradition. Certain chronic health disorders create a disability or a high probability of experiencing a disability. (Ex. Blood clotting) A patient and their doctor should discuss their specific health risks associated with the Covid19 vaccine. Public surveys on vaccine hesitancy shows that minorities are apprehensive and therefore a requirement to show proof of a vaccine could be construed as leading to racially segregation. Young women who are concerned about fertility may choose to not be vaccinated for C19. A woman's gender characteristics and unique concerns should not be dismissed in public health policy. Discrimination is just that.

Agenda #	Relate To	Position	Name	Comments
73-B.		Oppose	Ahsram Williams	<p>The following individuals submitted comments on agenda item:</p> <p>Do you know what it's like as a dependent, to have a sole parent go into a hospital walking and talking for a minor routine procedure and be sent back on a stretcher paralyzed and unable to speak for more than a decade until death because of medical malpractice? I doubt you do. And do you know the impact and trauma of going to the hospital to be treated for a health issue that flared up only to have a medical professional improperly administer the needle and medicine which resulted in necrosis to that part of the body and necessitated prosthetic replacements? Somehow, I doubt any of you do. These are traumatic events and represent some of the things people are grappling with before making a decision.</p> <p>And it really doesn't help to say that whatever adverse reactions there may be are rare. Nobody wants to be that "rare" case—the exception to what normally happens, especially when there is no recourse, relief or help with whatever that rarity turns out to be. If you are your sole support for yourself or your children, it is not a risk to take lightly because you, as that rare victim, and those children, are stuck with that outcome for the rest of your life. Will you be left a virtual vegetable? Will you be left requiring some sort of assisted care for the rest of your life? Where will the money for any medical attention to address it come from? These are not things to take lightly or rush headlong into simply because other people want you to do it. What one person can risk, another cannot. No one can decide for another person, what that other person can risk or not risk for his/her life.</p> <p>Other people aren't going to take care of you, and no one has the right to demand through coercion what someone else must have injected into them under penalty of the loss of their job, their housing, their livelihood. That is wrong!</p> <p>This item represents a cruel and beastly direction the Board wants to take and it will inflict great and inequitable harm on those communities of color who are doing the best they can just to survive. If you take away their ability to work, their liberty to go about doing things they need, to do freely, and their ability to enjoy the simple pleasures of life, you leave them with no way to live and no way out. It will result in unnecessary additional mental anguish, depression and suicides because you have taken away all hope. In effect you have taken from them their right to life, liberty and the pursuit of happiness.</p>

73-B.		Oppose	Aidan Gonzalez	
			Aiko Lambert	
			Aileen Porter	
			Aileen J Gonzalez	
			Aimee Banzali	
			Aislinn S Gleeson	It is unethical to force someone to inject medicine into their body in order to participate in society. Many people already have natural immunity, some people can not take the vaccine bc of their medical history. This would be a very dangerous policy for the people. Everyone that wants to vaccinate has the opportunity to take it. We need to continue to allow people to have autonomy over their own body!
			Ajani Jimenez	
			Ajioni Geary	This is not right this goes against freedom and humanity to require this.
			AK Sherfa	Forcing people to take something that's not FDA approved makes no sense. Even if the vaccines actually were FDA approved, the Food and Drug Administration has a long history of malpractice. They don't even independently test drugs that are trying to be approved, they just count on the testing their parent company does. Also, this reminds me of apartheid or Nazi times where people were asked to "show their papers" when they wanted to enter certain areas. Covid has a 99.6% survival rate. You guys just want more control. Shame on you.
			Akane Takei	
			Akopian Ester	
			Al Chin	
			Al Negrete	BIPOC, REMEMBER TUSKEGEE SYPHILIS EXPERIMENT, FORCED STERILIZATION
			Al Private	
			Alaendu Okiyefa	I'm not a robot
Alain Carpenter				
Alain Gutierrez	New Centers for Disease Control and Prevention data show that in breakthrough cases of the highly transmissible delta variant, the answer is no. Mandating the vaccine could be more detrimental to someones health than getting the vaccine. The vaccine would be taking away the rights to our health, our body, our freedom of choice.

73-B.		Oppose	Alex Bowers	Requiring "papers" for people, no matter how you slice it, is a repetition of Nazi, Germany. Labeling people further divides them, and takes away their "human" quality. I have driven across the country back and forth twice this year with my family. Almost everywhere else in the country is living life and everyone has accepted responsibility for their actions and their own health. Why do LA and California insist on making things more difficult for their citizens?

73-B.		Oppose	Alex Wahnsiedler	As a business owner with diverse customers across many diverse neighborhoods this will turn away many low income and disabled customers. Labor is at an all time high in terms of expense and finding workers. \$15 minimum wage means workers cost almost \$20 per hour with taxes, insurance, bonuses and paid time off. We cannot afford to have employees policing hundreds of customers per day per location. Many customers are very confrontational and homeless/transient customers will get very agitated and we can not handle this negative impact they attack employees and customers and upset a calm store environment. When employees get assaulted and attacked the police response is slow and the employee fear is hard to fix after an assault. As business owners we have to pay for all these issues without end and half of the city is already empty/for lease/abandoned this will just get worse. Please read the newest science from England and see why they reopened the whole country without limit since it is impossible to vaccinate or stop respiratory virus spread. The plan should be how to protect and help those affected recover we cannot close and control the entire public. Los Angeles County is composed of up and successful because of the large diverse business community and opportunities, any additional regulations on private business never end in any positive benefit for our community. We have endless exposure to lawsuits, losses, vandalism, homeless cleanup meanwhile taxes, fees, utility costs and labor are at an all time high. Without independent business thriving in Los Angeles we will end up with no city, no community and take the city into a decade long downtrend. Thank you for reading this and please make a realistic decision that respects business, employers and taxpayers as well.

Agenda #	Relate To	Position	Name	Comments
			The following individuals submitted comments on agenda item:	
73-B.		Oppose	Alicia Royce	When the government is requiring you to have a vaccination to “allow” you to enter public place for basic human needs like a grocery store, for a vaccine that is not even FDA approved, which has a death toll in the last 8 months of 6,490 after taking the vaccine per the CDC website. This information can be found by anyone on the CDC website with a simple Google Search. By the city government requiring a vaccine to be able to make a living and feed your family as well as to move freely about for basic needs means we are no longer a free country, but have entered in totalitarian government. Totalitarian regimes are often characterized by extensive political repression, dictatorship or highly undemocratic government, widespread personality cultism, absolute control over the economy, censorship, mass surveillance, limited freedom of movement, you are taking absolute control over the economy, mass surveillance by asking for a vaccine passport just to go to work, and limited free movement by not allowing people to go to work or enter into a public place for basic human needs without a vaccine. what you are suggesting to those that choose to be unvaccinated that they will not be allowed the basic necessities or to be able to keep their job to make money to feed thei families unless they do what the government wants is not what America is all about. As a mom of five I cannot stand by any longer and watch as our free country goes under. This is not what my grandparents fought for, when my grandfather’s plane went down in WWII I guarantee you this is not what he joined and fought for. If you do this there is no going back. Restricting someones ability to work unless they do what the government wants (get a vaccine) or not allowing someone to shop at a grocery store unless they do what the government wants (get a vaccine) is unconstitutional and inhumane. Think long and hard before you make these decisions unless you are willing to take that step and become a government we as Americans have only heard about or read about that can watch their people starve to death unless they do what the government wants them to do. We are still America and we are still a free country don’t change that today. I urge you to vote no on this matter.
			Alicia Toth	
			Alicia Urbano	
			Alicia Viscount	I’m vaccinated and I do NOT care if anyone around me is vaccinated. I also will NOT frequent any establishment requiring proof. We live in a free society.

			Amie Greenberg	
			Amierre L Santos	
			Amir Mahmud	These vaccines are only approved under EUA and are not fully FDA approved. They have completely skipped proper animal trials. They have now been unblinded by the manufacturers so we will never know the long term side effects. Based on VAERS data (this is a CDC and FDA run website to track vaccine adverse events) the short term side effects are catastrophic. To mandate these experimental vaccines is a direct violation of the Nuremberg code. To top it off, under the PREP act, no one is held liable when injuries happen as a result of these experimental jabs. Please, think of your kids and grandkids futures. This mandate will be a disaster for our community. Thank you!
			Amir (Mohammed	Please do not create a mandate that will cause serious CONFLICT. More and more people will get vaccinated as time goes on, Put a greater focus on economic business recovery and supporting employers who have made unreasonable sacrifices to keep their people employed and stay open. Keep strict control of COVID VARIANTS by prohibiting travel to places with bad variants.

73-B.		Oppose	Angela A Tunison	The government gets to stay out of our health choices and choices over our bodies. This is one of our basic FREEDOMS!! Enough with your tyrannical mandates and the insidious attempt to strip us of our constitutional rights.
			Angela D Massarotti	
			Angela E Campolla-Sanders	I take all precautions to protect myself and others. I'm for mandatory masks in public indoor and out in public and back to only outdoor dining is fine with me. But it should up to the business owner to decide, not the government.
			Angela E Iribe	
			Angela J Fontana	
			Angela M Kavanaugh	
			Angela M Marsden	
			Angela M Schleuniger	This violates the ethical principle of bodily autonomy. I am a vaccinated registered nurse, and while I believe in Health and wellness, and ENCOURAGE those who are eligible to be so get vaccinated, I also strongly believe in a persons fundamental right to their own person. Restriction of movement, restricting access to PUBLIC areas IS the same as removing this right. Forcing businesses to mandate this puts their employees at risk, employees who are often paid minimum wage and are not trained to handle confrontation. I am ashamed to be a resident of Los Angeles County, and if this is pushed through my family WILL be relocating, and we are not alone. I am a registered Democrat, and this is the furthest from democracy. This is government control. You are moving in the WRONG direction.

Agenda #	Relate To	Position	Name	Comments
			The following individuals submitted comments on agenda item:	
73-B.		Oppose	Anna Hill Hill	<p>I am not anti-vaccine. I am deeply appreciative of the technology that has led to the eradication of especially dangerous diseases. But that does not mean that I have unqualified confidence in any vaccine; rational people can ask questions about cost/benefit analysis. Low hanging fruit example: children shouldn't get the vaccine, because ostensibly, for them, the risks associated with taking the vaccine are probably greater than than the danger of the disease itself. For much older adults, who are clearly at much greater risk of serious disease, this analysis is, perhaps different. Rational people can be interested in:</p> <ul style="list-style-type: none"> *The categorically novel technology of m-RNA vaccines (relatively new) *The extent of testing (no especially long term studies completed yet) *Adverse reactions (appears to be rare, but sometimes very serious) *Effectiveness of the protection (breakthrough cases appear to be rare and mild) <p>The stakes are high. Some (very few, proportionally) seem to have experienced life changing adverse reactions to taking the vaccines. Others who have not been vaccinated have died from contracting Covid. Individuals and families are faced with difficult decisions about how best to protect the health of themselves, their families, and their communities.</p> <p>I am trying to make the best decisions I can. I am try to be well informed, and think critically. I want to be humble about what we think we know (often less than we like to let on).</p> <p>All this to say, please oppose any vaccine mandates for LA County. Instead, encourage honest dialogue and promote the positive and informed decision making of my neighbors and I.</p>
			Anna Maria Hatamian	
			Anna R Lundgren	
			Annabel Renn	
			Annabelle Penarubia	
			Annaka Telles	
			Annalee R Webb	
			Annalisa I Ruiz	
			Anne Allegretti	
			Anne Brown	Choice matters. The vaccines do not prevent transmission and only possibly lower symptoms. No need for mandates. Choice is crucial.

history.

THE THALIDOMIDE TRAGEDY

In the 1960's, thousands were born with phocomelia as a side effect of the drug thalidomide, resulting in the shortening or absence of limbs. The drug was not approved in the United States in the 1960s, but as many as 20,000 Americans were given thalidomide in the 1950s and 1960s as part of two clinical trials operated by the American drug makers Richardson-Merrell and Smith, Kline & French.

THE TUSKEGEE STUDY

Starting in 1932, 600 African American men from Macon County, Alabama were enlisted to partake in a scientific experiment on syphilis. The "Tuskegee Study of Untreated Syphilis in the Negro Male," was conducted by the United States Public Health Service (USPHS) and involved blood tests, x-rays, spinal taps and autopsies of the subjects. The goal was to "observe the natural history of untreated syphilis" in black populations. But the subjects were unaware of this and were simply told they were receiving treatment for bad blood. Actually, they received no treatment at all. Even after penicillin was discovered as a safe and reliable cure for syphilis, the majority of men did not receive it.

THE SWINE FLU LESSONS

In 1976, Federal officials urged widespread vaccinations after swine flu broke out among soldiers at Fort Dix, New Jersey, killing one of the 14 diagnosed with the illness. But the program was suspended after at least 25 people died from vaccine reactions. Other estimates put the death toll at 32 people, while about 500 others later suffered from Guillain-Barre syndrome, which damages nerves and can lead to paralysis. In the aftermath, the government was criticized for pushing Americans to get unnecessary vaccinations.

According to Richard Fisher of BBC, "The swine flu affair, the New York Times concluded, had been a "sorry debacle" and fiasco marked by political expediency and unwarranted confidence."

Why the Hell is There Arsenic in Our Baby Food?

A February 2021 report from the US House Committee on Oversight and Reform says that commercial baby foods are tainted with dangerous levels of arsenic, lead, cadmium, and mercury. The report was based on information from just four companies that make baby food: Nurture, Beech-Nut, Hain, and Gerber. Arsenic, lead, and cadmium were found in baby foods from all of the companies; mercury was found in the food from the only company that tested for it (Nurture). Yet the FDA has failed to pull these products off shelves.

Its also violates the 10th amendment. Furthermore they are not being transparent to the public as to the fact individuals with medical exemptions to the COVID19 vaccine HAVE TO BE PERMITTED in the establishment - which violates the American Disability Act.

ILLEGAL. Furthermore according to ADA you cannot discriminate against those that have a medical exemption. Denying entry to an unvaccinated individual who has proof of exemption without providing reasonable accommodations is illegal. The fact that so many people, including the City Attorney are okay with " Jim Crow" south style laws , denying one group their constitutional right or " separate but equal"and Nazi Germany (with blaming the Jews for the reason the country wasn't doing financially well and having to show papers etc ,having a scapegoat for hate and blame) in 2021 proves discrimination is alive and well.

I want to know what this board will do in the face of this blatant discrimination.In the wake of George Floyds death this board should be vocal in addressing this rampant discrimination .In addition ,there becomes a violation of privacy to having to show medical records if having an exemption to do normal activities.This kind of illegal behavior being allowed further perpetrates and shows this group of bars and restaurants taking the illegal stance that the "unvaccinated" are responsible for spreading Covid19 or that the "unvaccinated individual is the carrier and spreading and has the virus" without proof.

This is abhorrent ,when in fact the CDC has recently shown studies that not only can a vaccinated individual spread the variant virus (while still being vaccinated) but also when infected with Covid19 carries as much of the virus in their nostrils as an unvaccinated person who becomes infected. So there is no difference .Only biased, prejudice behavior against one group which is the unvaccinated. This violates and targets a groups civil rights.

These businesses should immediately be fined and penalized immediately to the full extent.Their illegal entry policies can be found on their Facebook page or Instagram page. In addition many have their policies posted outside their establishment on a sign. By posting the sign,the act of discrimination has already taken place.And the posting of the sign/notice deters anyone unvaccinated and those under the protected class(disability, religious)

	<p>and tons of lawsuits. There is a difference between FDA authorized and FDA approved. The vaccines are FDA AUTHORIZED NOT APPROVED. All of the attempts to violate individuals' rights and discriminatory treatment is occurring when the vaccines haven't met the highest standards put in place by the FDA to be approved. In addition, not all the trials /test groups have been completed or met. Groups such as the immusuppressed,immunocompromised (these test groups are starting NOW) will be left in a vulnerable position if theses mandates take place. What about pregnant women and possible birth defects from the vaccines? The vaccines haven't been around long enough to see if pregnant women takes the vaccine and experiences any complications ,be it reaching full term or giving birth or birth defects caused by the vaccine. This is why the vaccine is emergency authorized. Normal FDA trials encompass all of these variables and take anywhere from three to seven years to approve a drug. With this being said to deny individuals their rights when there are too many concerns that haven't been addressed or will take time to develop is irrational and unethical. So, if it becomes mandatory- you will have people who have autoimmune issues ,amongst other groups with health issues where the CDC hasn't fully tested subjects, potentially die or suffer massive complications just from taking a vaccine that hasn't been thoroughly researched. All to enter a restaurant or gym???</p> <p>CDC has stated fully vaccinated individuals can still have "breakthrough"cases which spread the virus.They are still able to spread the virus regardless of being fully vaccinated. Furthermore there have been vaccinated only cruises(Royal Caribbean) , where all employees and guests had to be fully vaccinated and only fully vaccinated were allowed on board and these individuals STILL CONTRACTED COVID19. Many people who have had Covid prior to vaccination, get vaccinated and still contract Covid ,There's too many cases of fully vaccinated individuals from all walks of life contracting Covid19 after being fully vaccinated. Which means the vaccines are not as effective or not effective enough to put mandates in place and further discriminate against those who cant be vaccinated or don't want to. These vaccines are not preventing the spread of COVID19 as everyone was lead to believe and the "unvaccinated" should not be used as the proximate cause as to why the pandemic continues . Blame science.</p>
Ashley Ladd	Due to essential activities (i.e grocery shopping) being indoors, it is ridiculous to require people to present a vaccine passport to enter. If people cannot get the vaccine, or have chosen not to, they should still have the same opportunities for activities as those who did receive the vaccine. Those who have gotten the vaccine should also have the ability to keep their information private, without having to tell anyone they received the vaccine.

Here's the real truth:

These so-called vaccine can never be required as a condition for commerce.

Among many laws that protect individuals from the excess power of government tyrants, here are three...

1. EMERGENCY USE AUTHORIZATION LIMITATIONS on All COVID-19 vaccines , which are under an Emergency Use Authorization (EUA) and cannot be made mandatory.

On its website, the U.S. Food and Drug Administration (FDA) notes the following: "...Recipients must be informed... that they have the option to accept or refuse the vaccine ."

2. Forced vaccination violates the right to privacy, which is protected, secured and guaranteed by the 4th Amendment of the US and the constitution of this state.

3. Forced vaccination is unlawful DISCRIMINATION, discriminating against those who have cell phones or want to participate in AI.

Further, forced vaccination is a violation of:

- CA GOV Code 51, which protects FREE AND EQUAL access to ALL PUBLIC ACCOMMODATIONS.

Public Accommodations are "private businesses engaged in commerce." That means retails stores, banks, restaurants, recreation, transportation – and entity, location or establishment that is open to the public is prohibited from discriminating against the entry of a member of the public.

- CA GOV CODE 12926 (q) protects one's religious liberty and practice, including the ability to NOT PARTICIPATE in practices that violate one's sincerely held religious beliefs

- CA GOV CODE 37100 – prevents any creation, application or enforcement of a law or policy that violates the California Constitution or the Constitution of the United States.

-- CA HSC 24171 and 24172 declare that individuals have the right to determine what is done to their own bodies and to refuse consent to medical experimentation without duress, coercion or influence

**WARNING TO ALL GOVERNMENTAL, PUBLIC AND PRIVATE ENTITIES
AND PERSONS**

(a) No business or organization, including any governmental agency has the authority to force me or anyone else to take any and all COVID-19 vaccines, as well as any other vaccine;

(b) No business or organization, including any governmental agency, has the authority to deny me any and all services provided to COVID-19 vaccinated individuals;

(c) Denial of any such services, will be a violation of our God-given, Natural, Common Law, state and federal constitutional and international rights not to be vaccinated in any way or form without our consent, this includes our right not to be tracked based on our vaccination status; and

(d) Any such government agency, business or organization, person's acting as offices of such entities, man and/or woman, violating our right not to vaccinate against COVID-19 will be liable under tort law and for deprivation of rights under color of law, and will be subject to lawsuits, accordingly.

A tort, in common law jurisdiction and otherwise, is a civil wrong that causes a claimant to suffer loss or harm, resulting in legal liability for the person who commits the tortious act. It can include intentional infliction of emotional distress, negligence, financial losses, injuries, invasion of privacy, and many other things. In summary, no COVID-19 vaccination can be required in order to operate in community and social life, whether it is to go shopping, to work, to visit recreational areas, to visit persons in medical establishments, to travel, to visit restaurants or any business, or to enjoy are God-given right to go about our lives without government or corporate interference.

Failure to respect this, and any intent to violate anyone's right not to receive any vaccine for COVID-19 or any other disease may and will result in legal action against those involved:

(1) In the case of government officials, coercing and forcing any person to take such vaccines is a violation of your Oath of Office, your obligation to protect our constitutional rights, and will strip you of any and all governmental immunity for acting outside of your authority; and

(2) In the case of any business and organization, man or woman, coercing and forcing any person to take such vaccination in order to provide any services or to provide access to your establishment, will be considered a violation of constitutional rights, subjecting your business or entity, and you as a private citizen, a man or a woman, to legal action against all of your assets. Business and organization policies are not above the law.

LEGAL NOTICE: If I am compelled or forced to vaccinate to receive your services and I am injured, it will be considered coercion, duress and against our will, and you will be held liable for any such injury. I note here that we are not refusing vaccination, we are simply declining such vaccination for the

	<p>have a side effect than get seriously ill with Cvoid. Recovery rate is greater than 99% even without vaccination. Individuals who have already had Covid will be harmed getting vaccinated as it hyper sensitizes their immune system. Vaccination should be a personal medical choice. Do not create a tiered system that discriminates!!!</p>
Brad Hartman	<p>This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely "may be effective." Federal law states: Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states: individuals to whom the product is administered are informed— (I) that the Secretary has authorized the emergency use of the product; (II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and (III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks. EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. Doe #1 v. Rumsfeld, 297 F.Supp.2d 119 (2003). The court held: "...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs." Id. at 135. No court has ever upheld a mandate for an EUA vaccine. The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children's Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.</p>
Brad Jerzykowski	
Brad Lyddon	<p>You are segregating our city by mandating this. Our black and Latino community have the lowest vaccination rate. This mandate will segregate the</p>

Briana D Corado	
Briana R Mendoza Polintan	Medical Freedom, it should be our choice ask free people of this country to choose what we put into our bodies. It should no force us to do something that could cause more harm than the actual virus.This is a violation of our human rights. We take risks everyday and are more likely to die in a car accident or drug overdose than from C19. This are facts, not feelings. You do not have the authority to tell us what to do with our lives and the lives of our children.
Brianna Avila	Strongly Oppose.
Brianna Brodine	Strongly oppose
Brianna Canales	
Brianna Essagholian	
brianna gassman	
Brianna Ladapo	The right of each sovereign person to make choices about his/her personal health is unalienable, and can never be mandated. Even if we were in possession of a vaccine that had passed all safety trials, allowing citizens to exercise informed consent--which we do not--it would still be well beyond your right to require any sovereign person to receive it (and this overreach makes even less sense in the context of a) the thousands of individuals who have already recovered from COVID-19 and now have natural immunity, which offers far more protection than anything created in a lab, and b) the thousands of severe adverse events and deaths attributed to the COVID-19 vaccines, as recorded in the CDC's own VAERS database, which is projected to represents only 1-10% of the true number of adverse events). It astonishes me that so many of you who have valiantly fought to protect the health freedoms of women, children, and underrepresented minorities now casually abandon your principles simply because you are fearful and/or feel political pressure. Health and wellness are NOT political issues, and whether you agree or disagree with the health choices of another is irrelevant. You should be ashamed for even considering taking away the constitutional rights of your constituency; it constitutes serious overreach, and will not stand.

Celia Green	What about people with natural antibodies?? The government does not know better when it comes to personal medical decisions, and the government does not have jurisdiction over what people do with their own body. There is too much conflicting information to know what is even true about COVID or the vaccines. Forcing mandates of a dubious possibly dangerous vaccine to be able to live a normal life is a total violation of peoples right to liberty and the pursuit of happiness. Why is there such a big push for these vaccines? Again, what about people with natural antibodies? Why don't we test for those?? None of this even makes any sense. This is not thought through and is wrong!

chad smith	This treatment/mandate for an emergency order vaccine that has not studies on long term effects is inhumane for force on the unwilling population without their consent. failure to provide choice of bodily injections will lead to decrease in workforce, malicious treatment between opposing sides creating Human Resources burdens amongst many other morale related workplace issues. Allow employees to decide for themselves and their families what should be put into their own bodies, not the state/county etc. especially considering that the death rate (which is what ultimately matters) is far less than 1%. Stop the forced vaccinations as it is also obvious and scientifically proven that just as many people with the vaccine fall ill due to covid as those who are without a vaccine. If nothing else, allow to 1-5 years time to pass to study side effects of a quickly generated vaccine before mandating.

Charlie Barakat	It is completely Un-American to coerce citizens of this great Nation to undertake a treatment that they are against. If they are taking the risk of being unvaccinated, it is their prerogative and their choice as a free citizens of the United States of America. This will also create public discourse and segregation, which has already begun. Vaccinated individuals are not only blaming the unvaccinated but are wishing harm towards them and their families. A requirement like this would only further negative sentiment and violence towards individuals who have chosen what they want to do with their bodies.

Christi Allen	Vaccines should not be required in order to participate in everyday activities. This is medical discrimination and segregation. By doing this, you are causing a divide among the people of Los Angeles. Also, the CDC has stated that the vaccine does not stop transmission and that it only protects the person that got the vaccine, so there's not reason to discriminate against those that have made a medical decision to not get the shot. Time for all mandates to stop and people be responsible for themselves

Christian A Meadows	<p>I oppose this motion. There is strong evidence from CDC the vaccinated are more likely to fall ill. Additionally, there is no test which identifies covid from any other virus. There is definitely not a "Delta" test. This is from the CDC. Additionally, a 5% drop in employees will trigger a public safety crisis, with firefighters, deputies, nurses and doctors leaving county employment. Overtime and the cost to replace scorned employees will be the financial topic soon, just as the defunding the police concept was a dismal failure.</p> <p>leginfo.legislature.ca.gov/faces/codes_displayText.xhtml?lawCode=HSC&division=20.&title=&part=&chapter=1.3.&article=</p> <p>California Laws on Human Experimentation biotech.law.lsu.edu/research/ca/ca.htm</p> <p>Outbreak of SARS-CoV-2 Infections, Including COVID-19 Vaccine Breakthrough Infections, Associated with Large Public Gatherings — Barnstable County, Massachusetts, July 2021 MMWR cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w</p>

Christina Huntington	I 100% believe in vaccines. I also 100% believe that they cannot and should not be government mandated. As an adult woman who has a history of deadly allergic reactions to vaccines and regular pharmaceuticals that do not adversely affect most other people, I can speak for those of us who this kind of mandate would be detrimental to our health and wellbeing. In a free democratic country, adults should be able to decide what they do with their bodies and if they are able to undergo a medical procedure based on their unique medical history. If someone was allergic to peanuts, the government should not be able to force them to eat peanuts in order to get to work. It is the same exact thing with any pharmaceutical or vaccine. No one should be forced to take it in order to exist in society if their particular body is not a good medical candidate for it. Not all bodies are the same and not all bodies react the same way to outside substances and that needs to be accounted for. People with allergies need to be CONSIDERED and PROTECTED by the government, just as much as anyone else.
Christina Linhardt	Not everyone is able to receive the injection. This would discriminate against individuals for their medical history, as well as their religious beliefs. not to mention the probable backlash could cause the county

Christina Murillo	Even vaccinated people are against this. This is a choice and you can't cut society off from normal life if they don't choose to take an experimental treatment. Many people HAVE consulted with their doctors and are not even candidates for the vaccine and you want to cut them off from society? What the hell is wrong with you? Punishing people because their chances of death from the experiment are greater than their chances of dying from the virus so they make a logical decision for their own lives? You're insane, and you'll all get what's coming to you.

Dallas Malloy	<p>I am writing on agenda item 73-B-Evaluation of Covid-19 Vaccine Requirements for Indoor Public Spaces. I strongly OPPOSE.</p> <p>There are multiple legitimate reasons for a person to choose not to be injected, including religious and medical. This is absolute and must be protected. Violating personal choice is a line that cannot be crossed.</p> <p>Forcing people to be injected with experimental substances that may have negative side effects including death, as documented on VAERS, is a violation of civil rights and would cause far more harm than good. These are not traditional vaccines and there are no long term studies that warrant determining them "safe" at this time.</p> <p>This measure would have a terrible impact on business and the county's overall economy. It could force many to shut down, particularly small business many of which are barely hanging on since the lockdowns. Placing an increased burden on show owners could easily stop them from being able to function, forcing many to move elsewhere.</p> <p>The data has shown from the beginning that the survival rate is nearly 100%, and that the overwhelming majority of cases are mild and don't require hospitalization. The data shows there are underlying conditions present in nearly all Covid deaths.</p> <p>Of course I have sympathy for any person that dies for any reason. This includes the massive increase in suicides, since the lockdowns began, particularly among teenagers. Also massive increases in domestic violence, child abuse, depression, anxiety, alcohol and drug overdose, and alcohol and drug related injury. These are likely to increase with further mandates violating an individual's civil rights to their own body and freedom of choice. I hear nothing about health, only about "the vaccine". There are safe and effective treatments available to treat Covid, and many preventative measures that can be taken. The real solution is readily available information</p>

Any medical procedure with a possible side effect of "death" should not be mandated. Those requiring this vaccine should be held medically liable for any complications. But since no one is responsible for complications, the burden of the decision to vaccinate or not should be left entirely up to the individual.

	antibody responses. There is no protocol in place to provide documentation to allow the Covid Recovered to demonstrate their natural immunity as sufficient and a non-threat to the public good. I'm afraid prohibiting them basic amenities and as well as work opportunities could be a form of exclusion and discrimination. Antibody tests can show robust antibody protection that they are protected from Covid-19. Natural immunity is acknowledged by the World Health Organisation and many in the scientific community.

Davina Oconnor	
Davis Alldredge	Fuck you and your totalitarian gov. And Fuck newsome.
Dawn Arthur	I vehemently oppose instituting a vaccine mandate/passport in LA county. This will divide people even further. It will probably crush the businesses that are just now getting back on their feet. It will make it difficult for people who are unable to take the "vaccine" to live a normal life as proscribed in our Constitution. I do not consider this jab to be a vaccine and neither do thousands of doctors and other health care professionals and due to its newness and emergency use authorization is still considered experimental. Several years ago there was a vaccine for the swine flu I believe. About 50 people died due to the vaccine and it was therefore pulled off the market immediately. Now we have tens of thousands of deaths and adverse reactions but are continually told it is "safel. There is no way to know if that is in fact true. Early last year(late February,early March), prior to the inaccurate PCR tests being administered I got very ill. Symptoms that are described as COVID-19. (My daughter, who is disabled brought it home from her day program. Thank God she didn't get that sick) I got over it after a total of about 2 weeks. And I as 61 at the time. I now have natural antibodies and if I take this "vaccine" it will kill off that natural protection. Aside from that I totally disagree with implementing any sort of restrictions on people's movement n society-shopping, going to restaurants and the movies or sporting events. And according to all the numbers I've seen this is 99%+ survivable if you get it! Sounds like pretty good odds to me! I'll take my chances since I believe it is not the government's job to try to reduce my risk to zero. I might be able to get the cold again but it will be a much reduced version of what I had last year.

Diana Limon	Government cannot force free citizens to take medicine or medical procedures.
Diana Mejia	
Diana Nadjarian	
Diana Ohanjanian	
Diana Regan	
Diana Regan	It's a waste of money. It's unconstitutional to demand people get vaccinated to enter places. It will cause business to close.
Diana Rivera	<p>This is a horrifying perspective that the city of LA would permit segregation of differing health choices. From the perspective of an LA native, this is the most discriminatory act that would greatly divide the city in ways that could cause social upheaval and violence. This will impact small business' as they will be forced to impose a civil rights issue (see Unruh Act of the state of CA) that will likely turn legal as many LA citizens would file suits of discrimination.</p> <p>Furthermore, you would be making business discriminate on behalf of the city and it goes without saying that many business' will not survive. They are not proxies of the state. As business' have been open to all, people have used their own judgement to monitor participation and act in a cautious, protective way. Allow LA citizens to be independent, at this point, to make decisions and live in a free manner. To not to do so, it would create a crisis of the constitution of CA, spawning legal challenges from all perspectives, especially against those who will vote into effect. All those would be merited. LA denizens will be sure to note who votes in favor of this and will be quick to vote out members as soon as possible.</p>

	<p>right to accept or refuse. Why would the Local Health Department endorse basic ethical violations that go against the Nuremberg Code?</p> <p>In addition, the CDC recently shared research showing that this vaccine DOES NOT prevent transmission and that vaccinated and unvaccinated individuals have similar viral loads when ill with Covid-19. I understand the goal of mandatory vaccination would be to help protect people in contact with others but, If this vaccine does not prevent transmission, what is the logic in mandating it? Individuals should have the right to decide whether they want to minimize the risk of illness, hospitalization or death since it is something that affects them exclusively. There is no harm to others.</p> <p>There is additionally the issue of social justice. If the local health department passes this law, it will be engaging in discriminatory, segregationist practices. How is discriminating on the basis of medical choice and providing unvaccinated individuals with differential treatment any different that discriminating on the basis of color, sexual orientation, nationality, etc.?</p>
Dolly Buchanan	No. The goal appears to destroy businesses in this state.
Dolly Singh	
dolly wilson	
Dominic E Montelongo	People have had the opportunity for months to receive information regarding the availability of vaccines and received numerous of information outlets. Since the treatment is voluntary it doesn't make sense to limit the free will of individuals. I oppose restrictions on my freedom to move around freely. I expect the non vaccinated to receive prorated tax rates based off the public space these people can use if my opposition isn't effective.
dominique Coe	
Dominique Garcia	Illegal and unconstitutional
Dominique Lafleur	
Don Favia	I strongly oppose "vaccine passports". Vaccinating oneself is a individual health decision that should never be mandated. Furthermore, the pharma companies are not liable for any side effects from the vaccine, which in many cases have been severe. For this vaccine to be mandated is beyond irresponsible.

Elizabeth M Zacharias	Vaccination mandates and all other forms of coercion are unconstitutional, against the Nuremberg code, and a violation of each citizen's God given rights to bodily autonomy and personal sovereignty. It is foolish to think that if we hand these rights over to government authority instead of leaving them in the hands of individuals, that government medical overreach will be limited to the Covid-19 vaccines. Additionally, many of the individuals who choose not to receive the shots have robust, long-term natural immunity due to previous infection and so forcing shots is unscientific. Many others have valid medical contraindications and philosophical or religious objections, making these mandates discriminatory. If such measures pass it will prevent hard working, healthy, law abiding, and productive citizens from participating in many essential areas of society - grocery shopping for themselves and their children, participating in cultural and civic events, and on and on. It would also result in enormous losses of revenue for local businesses that are struggling to survive, and I would imagine loss of tax revenue for local government at many levels, as a significant portion of the population would transition their shopping to online and businesses in adjacent counties.
Elizabeth z McDonnell	Complete unconstitutional

	<p>vaccine like this one that discriminates, divides, and judges a society such as this one. This is one powerful vaccine! It does all these things that I mentioned and yet, It doesn't do what all the other vaccines (shots) that I mentioned earlier were designed to do (and successfully achieved, I might add) which is....fight off Covid 19 that you have an extremely high chance (99.8%) of recovery from. I Understand this is not about my health! If it was, they would not censor professionals and scientists who have contrary opinions. If it was, they would investigate thoroughly the over 11k deaths reported and over 500k adverse events following the shot If it was about your health, they would not be censoring world renowned doctors who have developed treatment protocols with great success for Covid positive patients. In fact one was nominated for a Nobel Prize. If it was about health they would not be sacrificing our young people(no risk) to protect others. If it was about health, informed consent, individual choice and privacy would be important. If it was about health, then freedoms would not be suspended for choosing to put off the shot. If it was about health why are college students taking the shot because they are being coerced with threats of limited freedoms and inconveniences and NOT for better health. If it was about health they would stop using the faulty PCR to measure infection NOW and not wait until the end of the year. Please do not pass this ordinance that obviously is not about health. If you pass this you will be on the wrong side of history. You will be responsible for more Angelinos being out of work. More people spending their money outside of LA County. And you will also be responsible for any injury or death that is the result of people taking this vaccine because they have no other choice.</p>
Eric Grodan	<p>This regulation is discriminatory and violates due process and the equal protection clause of the 14th amendment to the US constitution. Liberty is a fundamental right. The police state may only pass health laws for the common good that are reasonable and narrowly crafted to achieve a health goal. This proposal goes too far because it does not prevent the spread of C-19. It allows for no accommodation for those who test negative for c-19. It also does not make reasonable accommodations for previously infected people with natural antibodies.</p>

Erik Whitmyre	Do not force your employees to vaccinate whatever their reason as there are many reasons not to. For example - I had Covid and now have natural immunity which has always been better and longer lasting than vaccine induced immunity. In fact least 45% of the unvaccinated have this natural 'gold standard' immunity. Also they may have family members who have been vaccine injured and died from a vaccine - like at least 10,000 of our citizens have who took this poorly tested experimental vaccine - they died for the greater good and the number is probably far higher. Lastly, many of us do not trust the industry that brought us the opioid crisis and who is fully exempt from any 'problems' - deaths, short or long term damage - NO LIABILITY. If their product is so great why not stand behind it. They won't and you want us to trust them? How many of your employees need to die before you see you made a terrible mistake. Also, know that if your employees become debilitated due to blood clots or seizure disorder created by vaccination there will be no help for them as insurance and the medical profession will not recognize them as true victims... this is the reality of those injured by Covid vaccines - GET THE VACCINE BUT IF YOU ARE INJURED... WE DON'T KNOW YOU AND WE DON'T CARE.
Erika Alanis	This is absolutely unacceptable. This is segregation and we will not stand for

Fredric Renaud	<p>I am vaccinated and oppose this measure. If the aim is to create a safe / healthy space for vaccinated individuals then how does one reconcile the fact that this population of people can still contract and spread the delta variant? If that is the case, then this measure is at its core a "reward with access" to those that get vaccinated? What does this say to a population of people that have a difference of opinion, a disability or chose to manage their health in their own way? That they are less than and are refused access based on their situation or personal views? This is a slippery slope that we all need to be worried about.</p> <p>We further open the door to creating discriminatory policies in the name of public health. Money, time and energy would be better spent on educating the public on living a healthier lifestyle through diet and supplements that boost the immune system. In addition, providing the public with free at home testing kits would allow people to monitor their health during the pandemic.</p>
Fredrick Kong	
Fredy Paniagua	
Freedom Wins	<p>The public has lived with this for over a year, and has the common sense to adhere to safe practices when entering public spaces. It is an insult to their intelligence to suggest that the County is doing this to protect everyone, not the government's job. Stop using fear as a means of coercing law-abiding citizens to comply with dictatorial unconstitutional measures. Enough is enough.</p>

Garrett Lilley	The Sars Covid-2 corona virus (Covid) is spread by aerosol particles which are small enough to go through every mask that is available according to three studies conducted by the NIH and are worthless at stopping the spread of Covid. Much like the common cold, influenza, and respiratory syncytial virus, Covid has animal reservoirs, meaning that it cannot be eliminated by way of vaccine and it will continue to circulate throughout the year regardless

	<p>of how many people are vaccinated. Vaccination changes nothing about the transmission of the virus. Why are we doing things for Covid that we did not do for the common cold, influenza, and respiratory syncytial virus? Typically, respiratory viral syndromes breakout during the winter months when individuals have low vitamin D levels and their immune systems are lower. If the vaccine is so effective, why are we having a respirator viral breakout during the middle of the summer when respiratory viruses don't do that? It's because of antibody mediated viral enhancement. This is a condition that happens when a vaccine is created and used incorrectly and causes the immune system to fight the virus the wrong way and makes the individual to be more susceptible to infection. This causes the infection to be worse than it would have been with native infection. That is why we are starting to see an outbreak happen in the middle of summer. That is why 75% of the people that were infected in the Barnstable County, Massachusetts outbreak were fully vaccinated. Therefore, there is no reason to treat anyone vaccinated differently than anyone who is unvaccinated from a medical perspective. No vaccine, even more common non-experimental ones, ever stops infection. It merely reduces symptoms for the vaccinated individuals. You can learn more about this topic from Dr. Dan Stock practicing in Indiana.</p> <p>Furthermore, you are creating a system that is illegal, immoral, and unethical. The system clearly discriminates against minority groups who have lower uptake for vaccination, against individuals who cannot take the vaccine for medical or religious reasons, and against those who are morally opposed to the vaccine. The Covid vaccine is currently only under an emergency use authorization and has no long term studies that show long-term side effects. The Nuremberg Code clearly states on experimental treatments, "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision." I emphasize the follow, "without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion." These laws are a form of coercion of the worst kind. You are taking away people's abilities to living and work in a free society. Thank you.</p>
Garrett L Childers	
Garrett M Kelly	
Garry Dolley	
Garth D Wilson	<p>The COVID shots are not even FDA-approved, and have killed tens of thousands of people in the US. It is especially unnecessary and harmful to those who have already had, and recovered from, COVID-19. However, the all-cause mortality rate in the US last year (2020) was lower than every single year up through 1976. So where's the emergency?! There is so much wrong with this agenda!!</p>

Accordingly, there is no public safety benefit to limit freedom of movement based upon vaccination status. However, there are significant costs.</p> <p>A vaccine passport would be coercive, as it would require vaccination for freedom of movement, including potentially for the provision of basic goods and services.</p> <p>A vaccine passport would violate medical ethics and possibly international law, as it is inconsistent with the well established principles of voluntary, informed consent (see Nuremberg Code and Declaration of Helsinki).</p> <p>A vaccine passport would have a disproportionate, adverse impact on lower income, ethnic communities with relatively low vaccination rates (see "Latest Data on COVID-19 Vaccinations by Race/Ethnicity," KFF, 8/4/21). It would also have a disproportionate, adverse impact on cohorts not yet able to take the vaccine (e.g., kids under 12).</p> <p>Finally, a vaccine passport would discriminate against those with natural immunity based upon prior infection (see "Had COVID? You'll probably make antibodies for a lifetime," Nature, 5/26/21).</p>

Greyson James	
Gricelda Munguia	The covid vaccine has risks. There is proof of that in the testing data collected and documented done on the animals before this experimental vaccine was offered as a choice to humans. Therefore, it should remain as a choice for our bodies and not mandated. Our medical choice to take that risk needs to remain. Our body our choice. Stop selling out to politics and being afraid to do what is right and constitutional. The rise of covid cases has increased after the covid vaccine came out.. a lot of the new covid cases are fully vaccinated people. What if someone you love, such as your son or daughter, parent, siblings or spouse be the next to die or have a severe negative reaction to the vaccine, because they felt forced to vaccinate. With if they were not giving a choice and happen to be that 1 out of 100.. How would you feel then mandating this? Let people decide for themselves what they choose to inject in their bodies, not by governmental money hungry, power driving evil people.

Hyla Cass	
Hyland Murphy	This is modern day segregation. No one should be denied access to a space because of medical status. This also disproportionately impacts black residents as black people currently have much lower vaccination rates than other racial groups. That is institutionalized systemic racism. There are many reasons why someone cannot receive the vaccine and saying they can never eat in a restaurant indoors again because of a medical condition is despicable.

James Bertin	
James Boling	This form of segregation, discrimination is appalling
James Casebeer	
james crowder	
James Engeseth	
James Gentry	
James Ginther	Such a requirement would constitute the mechanics of apartheid and it is unconscionable that we are even being presented with the notion that this is worthy of consideration. Vaccination is not the only option here. There are many other options that have been sidelined in favor of a public discussion that lacks all nuance. Meanwhile, we all look on as those who are choosing (for whatever reason might be applicable to them) to remain unvaccinated become further and further ostracized from society and treated like walking vectors of disease. Might we not express curiosity as to their reasons? Might we not wrestle with the cognitive dissonance that arises upon realizing that it is preposterous to believe that the entirety of a population should be coerced into partaking in a medical intervention, lest they become second-class citizens? This isn't even truly a question of scientific veracity. It is a matter of human rights. History tells us that measures taken to segregate society by any characteristic do not end well. It is incredibly disheartening for me to watch as so many people who used to proudly proclaim, "my body, my choice!" now invert their own logic when they disagree with the free choice of another. Rather than suggest that medical apartheid is something we may have to accept for reasons of practicality, let's put our focus on emboldening individuals to take responsibility for their personal health choices and encouraging the innate robust wellness that puts an end to the proliferation of disease by raising public health to a level that renders that disease impotent.
James Gregory	
James Hardy	
James Helble	
JAMES HERNANDEZ	Covid is not a deadly pathogen and can not be shown to exist outside of a lab. It's been 18 months. It's time to declare this endemic and no more than a cold or flu.
James Horst	When most people of color have chosen not to get it, I don't believe segregation is the answer. It's extremely racist.
James Jaitley	Vaccination passport is creating an apartheid in the great city of Los Angeles. We have no proof that this will end the pandemic. We do have historical evidence that this will create deep resentment, discord, and more division amongst our communities. Our communities need to heal. We need to find a way to come together. Segregation has never been good for society, and we

Mandating an experimental medication or taking away the option of employment should the subject declines involves you in the act of coercion. Enough VAERS reports have come in to also invalidate the continued vaccination of any subject based upon the Nuremberg code section 5. Treatments that have for over a year been made available by only a fragment of medical professional have proven to substantially lessened the risk of fatality due to the CV-19 disease. Mandating the experimental medication thus violates the Nuremberg Code section 6. Nuremberg Code attached for reference.

Jennifer Camposeco	
Jennifer Carrillo	
Jennifer Cervantes	
Jennifer Charm Jacobson	We live in a free country where people have a right to their own health. Even vaccinated people are getting Covid so besides being untested and causing more deaths than are being reported, people have a right to refuse what they consider a dangerous vaccine. We don't live in a fascist state! I will NEVER require them in my place of business!
Jennifer Cheeley	Roe v. Wade My body my choice
Jennifer Chrisman	
Jennifer Cobabe	
jennifer coito	
Jennifer Cooke	
Jennifer Cooney	
Jennifer Daniels	
Jennifer De Clark	I DO NOT OPPOSE VACCINES, I OPPOSE VACCINE "PASSPORTS". THE VACCINATED ARE NOT EXEMPT FROM CONTRACTING OR SPREADING COVID. SO BASED ON SCIENCE, REQUIRING PEOPLE TO SHOW PROOF WOULD BE INEQUITABLE IF BOTH GROUPS CAN CONTRACT AND SPREAD THE VIRUS. PLUS, THIS IS GOVERNMENT OVER-REACH. WE THE PEOPLE DO NOT WANT TO BE TRACKED AND THIS COULD LEAD TO MORE BASELESS GOVERNMENT CONTROL. WE ARE FOR FREEDOM OF MOVEMENT AND OVER OUR BODIES.
Jennifer Dercole	
Jennifer Donnelly	Strongly oppose Covid vaccine!!!

Jennifer Gomez	
Jennifer Goodrich	It is unconstitutional to divide people like this. To punish people for using free will over their bodies. We love and live in a free country and need to uphold free choice. People should not suffer being unable to shop and go places due to not taking a vaccine. This is unconscionable and wrong. Please keep America and our city of Los Angeles free. Thank you.
Jennifer Himler	
Jennifer Jimenez	
Jennifer Jordison	Medical mandates have no place in a free society. This is America, not China. No vaccine mandates.
Jennifer Kaczor	
Jennifer Kadlec	Proof of vaccination or "Vaccine Passport" requirements are discriminatory toward unvaccinated individuals including children. Vaccination and all other medical procedures are personal decisions based on an individual's health history, known adverse reactions vs possible benefits, core values and beliefs and other factors. Vaccination should not be forced or coerced on anyone including children. I stand for medical freedom.
Jennifer Kalamon	This could not be more unconstitutional or discriminatory. Please consider those people who cannot receive it due to personal health or religious reasons.
Jennifer Kelly	
Jennifer Kempler	
Jennifer Kita	
Jennifer Klekas	
Jennifer Lastimosa	
Jennifer Lieberman	
Jennifer Mailian	Americans should have the right to choose what they put inside their body. No vaccine of any kind should be a requirement.

Therefore, mandating vaccinations will NOT reduce the spread of COVID-19 or its variants. As such, it should be up to the individual to assess their own health risks when deciding whether or not to get vaccinated. In addition, those who have already had the disease should count as being vaccinated as they have acquired the desired immunity naturally.

Justin Bailey	I believe other vaccines in their early stages (similar to the Covid-19 vaccines) were actually pulled from availability due to small numbers of deaths and deemed unsafe. This should be no different and with so much more still to learn on these vaccines, mandatory vaccination is a tremendously irresponsible decision. If the vaccines are effective, it should not matter if vaccinated people are around unvaccinated people. It should be individual choice until all risks and personal safety can be thoroughly known. period.

This goes against my religious beliefs respect that right. You mean to tell me to get a mandatory vaccine, while you guy's try to censor people and take our guns away get lost and resign. The vaccine went from safe and effective to now it is the better choice. There have been many who have died form this vaccine. Democrat's and the CDC keep messing around with facts and data. I will not take a shot for something that was created in a lab. California was such a nice place and you guys really had to try to screw it up. But now you have a chance to try and head in the right direction of respecting peoples rights but it does not seem like you are after having this meeting secretly and the fact that we have to talk about this. Lets face it you bastards already have your mind made up. Why are you guys okay with discrimination. I believe people who have not taken the vaccine have been treated worst than slaves have. You all need to wake up and stop playing these dangerous political games.</p>
Justine La Farge

K M	<p>As a veteran, I am deeply saddened that we have come to a place in history where in the USA we are even having this discussion</p> <p>This current experimental medical procedure, that is being asked of people in order to be a part of society again, HAS NOT been approved by the FDA. It has only been given Emergency Use Authorization (EUA) under the PREP act. Therefore, under this classification, anyone that agrees to take this experiment accepts all liability. The vaccine company, employer, private companies, schools are NOT liable. The individual alone accepts any and all liability, and will continue to do so once the FDA does give full approval (see</p>

	<p>1986 Vaccine Injury Law).</p> <p>The CDC continues to say that this experiment is safe and effective, but no medical intervention, procedure, or medication is completely safe and effective. There is always a risk. Read the inserts. Even by their own admission, this is only effective for 95% of the population (although there is debate on this still, please see BMJ editorial by Peter Doshi Jan 2, 2021). Medical decisions are to be made by the individual, not by the government or by private companies. Phase 3 of these experiments do not end until Oct 2022 for Modern and October 2023 for Pfizer.</p> <p>As of July 7, 2021, VARES reported the number of deaths from this experiment is 9,048, with 438,440 adverse reactions, 26,818 hospitalizations, 56,970 in urgent care, 90,269 office visits, 2,152 anaphylaxis, 2,486 Bell's palsy. Doctors in Lubbock gave testimony in Texas about seeing young adults, 18/19 with severe neurological issues after being given this experiment. Therefore, it is a false conclusion to say that this medical treatment safe and effective.</p> <p>Under the 14th Amendment, we have the right to equal protection of the law and our freedoms are not contingent on whether we decide to be a part of this ongoing experiment. I urge you to take a stand against tyranny and vote no on any legislation that would hinder our rights as free citizens in a free country. This is not China.</p> <p>Thank you for your time.</p>

Kamilah Harris	When it comes to vaccines, it should be by choice. Mandating people to get jabbed with emergency rushed experimental vaccines that mainly benefit the pockets of big pharma is ridiculous. If people choose to not be vaccinated because they do not trust the government and/or big pharma, then that should stand. Shot mandates are authoritarian, fascist, and Un-American when it comes to rights to body autonomy. Mask mandates are better. Just let us live with that. Do not go extremist. This is supposed to be a democracy and mandating vaccines are also undemocratic. People have gotten Covid, been hospitalized, and/or died even in the case of being fully vaccinated so mandating vaccines will cause more people to not trust the government on anything.

meeting notes and summary from the August 2020 meeting of the DHHS and CDC Advisory Committee on Immunization Practices where Dr. Cohn reminds everyone of this: "Dr. Cohn reminds everyone that under an EUA, vaccines are not allowed to be mandatory. Therefore, ...individuals must be consented and cannot be mandated to be vaccinated."

[cdc.gov/vaccines/acip/meetings/downloads/min-archive/min-2020-08-508.pdf?fbclid=IwAR03xYf0qfZFsZ0CJT-XZx-IW4y6KhFcw5_xnRmgXY26cbbspvDkbo5JxyP4](https://www.cdc.gov/vaccines/acip/meetings/downloads/min-archive/min-2020-08-508.pdf?fbclid=IwAR03xYf0qfZFsZ0CJT-XZx-IW4y6KhFcw5_xnRmgXY26cbbspvDkbo5JxyP4)

To attempt to mandate or coerce anyone into a medical treatment or procedure that is experimental violates the Nuremberg Code, the Declaration of Helsinki, and other international human rights edicts. To violate these codes, edicts, and declarations shall be considered crimes against humanity and those perpetuating these crimes shall be held accountable.

Further, both Pfizer and Moderna's own SEC filings with the government state that all mRNA products are currently classified and considered gene therapies by the FDA. This has not been properly disclosed to the public, which is an egregious violation as the Pfizer and Moderna cannot even be considered vaccines in that respect; they are gene therapies. You cannot mandate experimental gene therapies. See especially pg. 21 of the Pfizer SEC filing:

[sec.gov/Archives/edgar/data/1776985/000119312519241112/d635330df1.htm](https://www.sec.gov/Archives/edgar/data/1776985/000119312519241112/d635330df1.htm)

And pgs. 69 and 70 of the Moderna SEC filing:

[sec.gov/Archives/edgar/data/1682852/000168285220000017/mrna-20200630.htm](https://www.sec.gov/Archives/edgar/data/1682852/000168285220000017/mrna-20200630.htm)

Further, data is emerging demonstrating that these injections may not prevent transmission or spread of Covid and therefore mandating them may prove futile as vaccinated people can still carry the same viral load as an unvaccinated person (Dr. Fauci) and therefore would pose the same risk of spreading it as an unvaccinated individual.

I am vehemently opposed to all Covid-19 vaccine mandates.

Lauren Lakis	
Lauren Lippen	
Lauren Matheson	Vaccines absolutely should not be mandated for indoor spaces. There has not been enough discussion about how mandates will affect those with medical conditions whose doctors do not recommend vaccination. For those of us that have spoken to our doctors and they say absolutely do not get, what options do we have once mandates are in place? In CA doctors are fearful of their licenses after the fear put in them about vaccine mandates for schools and children. I've tried repeatedly to ask for a medical exemption and my doctor will not write it and cites his license each time. Vaccine mandates are unfair, discriminatory, and the government has no place making decisions that should be between me and my doctor.

			Lisa Howard	This is the United States. Not China. You cannot mandate what we put in our bodies. These shots have the worst side effects in vaccine history. They also are not stopping infection or transmission, according to the news this very week. How can you force a vaccine that doesn't stop infection? A vaccine that doesn't halt transmission? People who are Covid-recovered have better immunity than vax alone, according to several recent studies, and face worse side effects from the shots. Recent data from Israel, Iceland and the UK show drastically waning efficacy, and experts fear Antibody Dependent Enhancement could be happening. Please, please, don't mandate this shot. This will create a two-tiered society based on medical history. Again, this is America. We have freedom over our bodies! History will not look kindly on this action.
			Lisa Ianniri	
			Lisa Iverson	
			Lisa Kay	The last time I checked, we live in the United States of America, not Nazi Germany. Freedom of movement is essential. Freedom to move without government tracing is paramount. The majority of people in this country have decided not to take this experimental medication. Even people who have taken this treatment agree that the passport is wrong, look at people in Italy BURNING their green passes. Know that the CDC has admitted that vaccinated people contract and spread Covid at the same rate as non-vaccinated people, what is the point of this pass? Nothing but to bring us closer to a technocratic dictatorship. I DO NOT CONSENT AND I WILL NOT COMPLY.

Lora McHugh	This would be an oppressive measure to those who choose to protect their health by other means. This would also be a potentially dangerous precedent and could open the door to future mandated vaccines, drugs, etc. that are truly dangerous or harmful. It is a person's personal choice and these freedoms must be protected. If the scenario were reversed and people were legally prevented from taking the vaccine, it would be the same concept.

Lori Carrizosa	
lori dennis	This is unconstitutional. It creates an apartheid city where people who are unable to vaccinate, for whatever reason, are treated like second-class citizens. It will continue to harm small business in our community by placing another burden on them and cutting a large part of their revenue source. Most importantly vaccinated people are still contracting and transmitting the virus to other people,. There is no difference in the transmission of a non-vaccinated or vaccinated person. It is Racial segregation because of the high percentage of non vaccinators black people.
Lori Elmore	Isn't this still America that was founded on freedom? This is infringing on my rights and is a slippery slope. We must protect people's right to choose and not have the government chose for us!

Mais Agajanyan	
Maisie L Gutierrez	
Maja Nuoffer	
Maja Trochimczyk	It is proven that Covid-19 "vaccine" does not protect from Covid-19 infection, more than 75% of newly hospitalized with Covid-19 have been fully vaccinated (data from various states, Israel among others, and Gibraltar where 100% residents were "vaccinated" and infections rose recently by something like 2500% among the vaccinated. It is a betrayal of the citizens living in L.A. County to put this motion forward, something on a par with apartheid, or other incredibly evil segregation and coercion "rules". There are major lawsuits proceeding now against "emergency authorization" of this genetic experimental injection to modify human DNA - e.g. by Frontline doctors, a group of physicians faithful to their oath, doctors with wisdom and conscience. I hope that LA County BOS shows that they are not corrupt, not bought by big Pharma, and that they will not betray citizens that voted for them, so they will stop this and any other mandatory "vaccines". It is well known that mandatory medical procedures under coercion and duress were done in Nazi German concentration camps. My mother's uncle, a Catholic priest, Father Wajszczuk was murdered in one of these experiments in Dachau. None of the Supervisors individually have a right to conduct medical experiments on county employees leading potentially to murder or manslaughter of employees of the county of Los Angeles. VAERS shows that over 12,000 people died; swine flu vaccination was stopped when 46 died. If the Supervisors proceed, they will put themselves on a par with the worst criminals of last century. Please note that the Nuremberg 2 trials have also began in the Hague, with CDC, WHO, FDA, Gates and GAVI as defendants in this global genocidal crime.

	<p>first quarter of 2021 are attributed to the COVID-19 Vaccines, and only 1% are attributed to all other vaccines. The number of vaccine deaths reported in the same period constitutes a 12,000% to 25,000% increase in vaccine deaths, year-on-year. The Vaccines appear to be linked to a range of profoundly serious medical complications, among them myocarditis, miscarriage, irregular vaginal bleeding, clotting disorders, strokes, vascular damage and autoimmune disease. Meanwhile, Pfizer, Moderna and Janssen enjoy statutorily conferred immunity from liability for any harm caused by their experimental products.</p> <p>Additionally there has never has been, a bona fide "public health emergency" due to the SARS-Cov-2 virus or the disease COVID-19. Virtually all of the PCR tests were calibrated to produce false positive results, which has enabled the Federal, state and local governments to publish daily reports containing seriously inflated COVID-19 "case" and "death" counts that grossly exaggerate the public health threat. Even assuming the accuracy of these counts, we now know that COVID-19 has a fatality rate far below that originally anticipated - 0.2% globally, and 0.03% for persons under the age of 70. According to the CDC, 95% of "COVID-19" deaths involve at least four additional co-morbidities. The benefits of the Vaccines when used to diagnose, prevent or treat COVID-19, do not outweigh the risks of these experimental agents. There are multiple adequate, approved and available alternative products that have been used safely and effectively for decades.</p> <p>Between Biden's open borders policies and Obamas lavish parties that are being conducted without any restraint the public simply has lost trust in the government. If these measures are instituted of the public simply will not comply.</p>

	<p>consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment...</p> <p>It is primarily for this basic principle that I firmly oppose any forced mandate to be vaccinated against my will as a human being fully capable of making independent decisions, free from coercion in any form, about what to allow in my body. Voluntary consent to participate in experiments affecting the human body is a must. My moral conviction about voluntary consent is strong and non-negotiable.</p> <p>Thank you for your sincere consideration on this important human rights matter.</p> <p>Sincerely, Maricela L. Israel is one of the most highly vaccinated countries and the world and nonetheless 90% of hospitalizations are in vaccinated persons. deseret.com/coronavirus/2021/7/20/22584134/whats-going-on-in-israels-outbreak-among-vaccinated-people . The gamma variant affects fully vaccinated persons.
Marilyn Brown	This is not a true vaccine, but an experimental new version that is hoped to work as a vaccine, which failed in the animal trials. The human trial should be strictly voluntary, and this order is in violation of the decisions following the Nuremberg Trials, and the Declaration of Human Rights. There is no scientific proof of it's safety, much less it's efficacy. People with naturally acquired antibodies should be treated as even better than vaccinated, as their immunity lasts much longer.

Mario Currado	I absolutely oppose mandated vaccination. It is discriminatory as well as LEGALLY and MORALLY wrong. Forcing or coercing anyone to be vaccinated is a violation of human dignity and freedom. The same goes for mandatory testing. Every person and every employee should be free to decide IF and when they want the new covid vaccines and to manage and mitigate their own risk. We demand that you rescind the emergency order immediately!

There are 100s of thousands protesting in Europe. Do we hear of it here? No. It's suppressed. The truth of the 'dangers' is coming out. This vaccine is killing people. It is not working. A vaccine is meant to prevent future illness and transmission. This DOES NEITHER. bitchute.com/video/3ZKtbEIBiBS/ 25 people had adverse reactions (died)to the Swine flu vaccine and it was removed from market. Many bad reactions across the globe.

	<p>basic violation of human rights! It's experimental, and has many 1000s of deaths with a fraction reported by VAERS. Ivermectin has 70+ studies showing effectiveness, more effective than the "vaccines". Don't commit this fraud and become a criminal, please. Just a guess, if you want the city to erupt in protests, your homes threatened (just my guess how the public will react - see France), then commit this horrid genocidal nazism proposal.</p>
Michael Garibay	
Michael Genazzani	
Michael Goodrich	Should be individuals free choice.
Michael Green	
Michael Green	<p>There are lots of medical & scientific reasons not to take the Covid-19 vaccines:</p> <p>Inventor of mRNA vax technology Dr Robert Malone MD said he wished he did not take the Covid-19 vaccine. He blows the whistle and says the Covid-1984 vaxes should be stopped. As I predicted Google/Youtube deleted this important video. Please watch on bitchute via this link below while you still can. Google co-founder Sergey Brin was born in the Communist Soviet Union: he should know better.</p> <p>URL of video: bitchute.com/video/SjOH3w7AVXFq/</p> <p>MDs & scientists have said the deaths were already going down before many people had the Covid-19 vaccines. The lower Covid case & death counts are not a result of the vaccines according to many scientists & MDs: the lower counts are from herd immunity already reached by early this year & by effective & better treatments being used on patients more often by Jan of this year which brought deaths down. Also, warmer weather starting in the spring brought deaths down by the time a lot of people took the vaccines.</p> <p>Very credible video testimony including a biologist with a background in immunology and an entrepreneur who has been funding scientists studying repurposed drugs to end the pandemic. They show evidence of the vaxes causing many more than the 7000+ deaths reported by the CDC's chaotic VAERS, lack of safety review & testing of the Covid-1984 vaxes, how the gene therapy in the vaxes dangerously moves throughout the body, masks, positive evidence on low cost treatments. & censorship of credentialed scientists and MDs. They convincingly show how the Covid-1984 vax has probably already caused more death than all previous vaxes in the US in the last 30 years combined. Covid-911 vaxes easily could have killed over 60,000 in the US by now Dr Malone MD & other experts say.</p> <p>Dr. Robert Malone MD, the inventor of mRNA Vaccine technology, works with the FDA on regulation & has talked recently to high level people at the FDA</p>

Michelle Davis	
Michelle DeLand	
Michelle Durand	
Michelle Durham	<p>This would be unprecedented action that would make our city even less desirable to live and work in. Not to mention the cost burden that will be placed on each small business to implement this.</p> <p>LA is a proudly health conscious city and has always been a forerunner in health and wellness. By requiring proof of vaccination for entry we will be pitting our citizens against each other. The amount of upset and arguing that will inevitably ensue is not worth the tiny upside. I, for one, am perfectly happy with the protection provided to me by the vaccine. I don't need to know that everyone else in the store has had the vaccine too - it invalidates the science behind vaccines.</p> <p>LA County already has "mandate fatigue". Educate - don't enforce. We're all on the same side. Everyone would like to see Covid under control, but not at the cost of more restrictions.</p>

Michelle R Rodriguez	
michelle s van arendonk	What have we become? Grandparents all over the world sent their children to almost certain death to fight in wars just to preserve the IDEA of freedom. It was worth every risk. Even death. Now a miniscule risk, a 0.04 chance of getting hospitalized, is an excuse to take away those very freedoms we died for. You want to remove body autonomy and segregate the "undesirables" from the population? Anyone with common sense can see how absurd and divisive this is. Your soul is at stake if you come for the kids next...especially since we know that the vaccine is a risk to them, whereas the virus is not. Not one child should be sacrificed so adults can feel safer. If we do that, if we put children at risk so that adults can feel less fearful, then we are not a species worth saving. It goes against nature. So does removing autonomy over our own bodies. What kind of society would agree to not allow people to make decisions as to what they want to inject into their own bodies. A person knows their own health, should take their own risks. If the vax worked as planned, we can let people decide if they want to risk their health in taking this experimental vax.

Mindie Sun	I also strongly oppose - it is unfair and discriminates
Mindy Cole	
Mindy Schinnerer	Since this vaccination does not prevent infection nor transmission, vaccinated people in indoor public spaces can transmit the infection. We cannot start a precedent that discriminates & divides people because of a medical choice, especially one that is still under evaluation for efficacy. I am not anti-anything, but I do believe medical mandates have no place in a free society & people should not be coerced or forced. Those who have already had covid in my family & have natural immunity have no medical need for this vaccine & in fact, it could do more damage. We do not have the studies to prove it would be wise to vaccinate previously infected people. So are we to be excluded from living our life freely going to indoor public spaces. The unvaccinated are not a threat to others health.
Mindy Sue	No more emergency mandates. No more demands. We need to make our own health choices. Do not restrict people like this. The vaccinated are getting the bug too. Should they get tested before entering? This is another case of hurried emergency mandates with little public input. Or just one-sided input. Enough! The immunities from having the bug are something you should consider too. We can each manage our own risk levels.

Nancy Benning	
Nancy Brodersen	The covid-19 vaccine is experimental. The judgment by the war crimes tribunal at Nuremberg laid down standards to which physicians must conform when carrying out experiments on human subjects in a new code that is now accepted worldwide. Namely, the principle of voluntary informed consent protects the right of the individual to control his own body. Mandatory Covid-19 vaccines are unethical and violate the Nuremberg code if required by government.

Not Applicable	I and dozens of my friends are against the implementation of forceful experimental medical procedures! It is unlawful, immoral and violates bodily authority. We all say NO!
Not Relevant	DEFINITELY NO!!!
Nota Matosian	
Noteboom Justin	Mandates for vaccines/masks are not based on science. They also eliminate one's ability to use informed consent for medical procedures. This literally takes away a person's freedom and I am appalled to see this happening in America.
Nshan G Norashkharyan	
Nune Gipson	
Nury Tellez	
O Wilson	
Oceana F Christopher	This would be discriminatory in nature for a variety of reasons including the lack of benefit to those previously infected, as indicated by the recent study from the Cleveland Clinic. Additionally, several well documented incidences of outbreaks among fully vaccinated individuals have occurred, including onboard a fully vaccinated cruise ship and onboard a fully vaccinated Navy

Pam Williams	<p>In regards to agenda meeting -73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces The Unruh civil rights act prohibits what you are trying to allow businesses to do. Get ready for the lawsuits</p> <p>The Unruh Civil Rights Act (colloquially the "Unruh Act") is an expansive 1950s California law that prohibits any business in California from engaging in unlawful discrimination against all persons (consumers) within California's jurisdiction, where the unlawful discrimination is in part based on a person's sex, race, color, religion, ancestry, national origin, age, disability, medical condition, genetic information, marital status, sexual orientation, citizenship, primary language, or immigration status.[1][2][3]</p> <p>The Unruh Act applies to ALL businesses in California including: hotels and motels, restaurants, theaters, hospitals, barber and beauty shops, housing accommodations, and retail establishments.[4] The law was enacted in 1959 and was named for its author, Jesse M. Unruh. The Unruh Civil Rights Act is codified as California Civil Code section 51.[3][5]</p> <p>What do you think " medical condition " equates too?</p> <p>The California Supreme Court has repeatedly "interpreted the [law] as protecting classes other than those listed on its face".[6] For example, even prior to the 2005 addition of sexual orientation to the law's list of covered</p>

	classes, the Unruh Act had been "construed as protecting gays and lesbians from arbitrary discrimination",[6] such as in the case of Rolon v. Kulwitzky.[7]
Pam Wright	
Pamela Abramson-Levine	
Pamela Fletcher	
Pamela Gallagher	
Pamela Gregory	
Pamela Hymel	<p>I am very disappointed that Los Angeles County is even considering forcing customer vaccine mandates on public places against their will.</p> <p>Government should not be mandating this. Nothing even remotely close to such a mandate has ever been implemented during past pandemics, such as H1N1 in 2009.</p> <p>Cities could also end up forming their own public health departments in order to be exempted from county health officer jurisdiction, which would cripple and fragment public health in general as well as the response to future pandemics.</p> <p>Most concerning, I have not seen any indication as to when this mandate would be lifted - or if it ever would. Eradication of COVID-19 is an impossible goal. Normalcy must eventually return, because this pandemic, like all pandemics, will eventually end, and the virus will become endemic in the same manner that H1N1 did.</p> <p>LA County should definitely not be imposing permanent mandates, or for that matter any vaccine mandates for public places.</p> <p>If the county chooses to implement a mandate anyway, then before the mandate goes into place, there should be a clear and published roadmap for ending the mandate and returning to normalcy. As the saying goes, "Know when to stop before you start."</p> <p>Better yet, there should be no vaccine mandates for any public places in the first place. Businesses should be allowed to decide what is right for them and their guests and employees.</p>
Pamela Klock	Should be a personal choice

Patricia Varela	The covid vaccine is against my religious beliefs. The vaccines are made from aborted fetal stem cells. Not only that but I have a right to choose whether I want this vaccine or not. It is not for the government to choose for me. It is a vaccine that is not FDA approved and furthermore the vaccines have not been proven to be safe or effective against covid or the delta variant or other variants. LA County board members, please do not implement that this vaccine should be mandatory. Turn to God and have faith in Him who is your Creator. He alone will take care of you and all people. No need for this vaccine. I have not gotten covid because God is taking care of me. I pray for all of you! Please do not make this mandatory!

Patricia D Roach	
Patricia J Seymour	<p>Oppose. All discussed and proposed policies to date imposed the burden of current COVID transmissions as the fault of unvaccinated individuals. Previously-infected individuals are categorically imaged as "unvaccinated", and therefore subsequently marginalized to be at fault for transmission of COVID, especially the current "Variant of Concern-Delta". Yet published studies have identified that, "[...] results question the need to vaccinate previously-infected individuals." p. 1, see attached document.</p> <p>Additionally, the CDC, when referencing the Delta Variant, which is the most monitored variant in the United States at this moment, has ceased to state to the public that the available injection/vaccines will prevent infection within individuals, and are increasing including statements such as, "Fully vaccinated people with breakthrough infections from this variant appear to be infectious for a shorter period." [1]</p> <p>Historically, vaccination policies are constructed in order to inhibit the acquisition and the transmission of a disease. The current vaccinations are now associated with increased identifications of breakthrough infections in those who have received the injection(s), as well as identifications of periods during which vaccinated individuals who are also infected are transmitting the virus to those in their surrounding environments (regardless of vaccination status). *None* of the discussed and proposed policies to date require *all* employees, regardless of vaccination status, to undergo weekly testing. As a result and with certainty, cases will be missed of those who are vaccinated, infected with COVID, *and* transmitting COVID, passing that infection to others in the surrounding environment.</p> <p>[1] [CDS pagelet cdc.gov/coronavirus/2019-ncov/variants/variant-info.html?CDC_AA_refVal=https%3A%2F%2Fcdc.gov%2Fcoronavirus%2F2019-ncov%2Fcases-updates%2Fvariant-surveillance%2Fvariant-info.html]]</p>

Rita POSTAJIAN	
Rita Voronov	
Rita A Dever	
Rita M Medall	Forced or mandatory vaccines, in order to participate in the public square, violates a persons civil liberties, and constitutional rights. Especially since it has been proven that vaccinated persons are shedding ann thus also spreading the virus.
Rita M Sakamoto	
Rizaldy Reantaso	
Rizwanul Haq	This is highly problematic and puts the burden of vaccine verification on local businesses. County funds required to research and implement this effort should instead be re-directed to community outreach to increase vaccination numbers. Indoor masking and CDC recommended social distancing should be enough of a safeguard to allow citizen to utilize indoor spaces. If a plan of this nature is necessary, then it should include measures to verify if residents have a current negative Covid test, not just the vaccine.

Roberta Sponsler	No mandate on vaccine
Roberta Timario	
Roberta Weiss	First of all, mandating experimental shots or drugs - against the will of the people - is illegal according to the United States Constitution. Perhaps you've forgotten that we are "allegedly" a free people? This kind of mandate also violates international law - specifically The Nuremberg Code. Look it up!! Also by such extremist actions, you will create a whole new form of segregation. Is that what you really want to be responsible for? I strongly suggest you examine your hearts and minds and do some serious thinking before enacting such draconian and discriminatory measures.

Rosemary Rojas	
Rosemary Tolle	The states that are not requiring vaccines for anything have a lower death rate than 16 months ago and are NOT in crisis. No hospitals there are being overwhelmed. They have always protected the most most vulnerable which are the elderly who are already sick with a comorbidity. CA didn't protect our weakened elderly. Those free states are the courageous and honest example for all our country. They care about their people and protect their freedom and their health. Covid positive people are pouring over our border illegally and are helped to travel freely all over this country. Leaders obviously aren't scared about them. Obama allowed unvaccinated people to his birthday party. This is about tyranny and money. Not safety. I support freedom of choice for all concerning medicine. Especially for people who are opposed on religious grounds. There was aborted baby tissue used in the trials of all the vaccines. Detestable. No one should suffer any consequence for living in freedom of vaccines.
Rosemary A Smith	
Rosemary G Tolle	Take the good example of free states. They have no crisis. The media is lying. Faucci is lying. Why would people be fleeing CA to move to a state overrun with COVID-19? They wouldn't. Those free states aren't overrun with Covid. Their children are in school and not being harmed by masks either which trap unhealthy levels of carbon dioxide according to OCEA guidelines. They're fleeing CA to live in freedom with their families. All will flee who want to live in freedom if you refuse to follow the constitution and follow the science which has clinical proof and peer reviews that ivermectin and hydroxycloquine are extremely effective and safe against Covid 19 when correctly prescribed.

Sandra Luban	The county needs to respect that the safety and toxicology reports have not come out yet. People have the right to complete understanding and knowledge of the benefits and risks. All serious risks are currently unknown. There are only 2 choices for a vaccine which is not the traditional type of vaccine. mRNA's past track record was not good. The US is not offering other vaccine choices or even treatments fro people at hoe. I feel that force and exclusion of people from public places with create upheavals and lawsuits. Instead of taking the approach of understanding and listen to residence, you want to take a forceful approach that will not work. I am not against vaccines. I am against forcing people to take a new vaccine that lacks the studies required to prove they are safe. You have seen what happened in other countries. Thousands of people took to the streets against vaccine passports. It wont work. You will just create more tension than is needed.

Sean Durham	
Sean Gray	<p>1) The vaccine is not FDA-approved.</p> <p>2) Long-term side effects of the COVID-19 vaccine are unknown.</p> <p>3) Short-term side effects of the COVID-19 vaccine are disregarded, dismissed, downplayed, or censored.</p> <p>4) Presently, the effectiveness of the vaccine is unknown in stopping the spread, or contamination of COVID-19. Vaccinated individuals contract and spread COVID-19. It seems that the COVID-19 vaccine decreases the likelihood of death, but the likelihood of death upon contracting COVID-19 is low regardless (2%-3%) so it is hard to determine whether the low death count is the result of the COVID-19 vaccine, or because the virus already has a low death rate.</p> <p>5) COVID-19 and its variants are mild viruses with a death rate of 2%-3%. Presently, it is unknown whether the risks of the vaccine outweigh the risks of COVID-19 and its variants.</p> <p>6) Concerned regarding social unrest and violations of First Amendment rights. Information suggesting that the vaccine may not be effective, may be harmful, or that there may be other alternatives are often censored. This lack of information and subsequent censorship breeds mistrust.</p> <p>7) Concerned that this is driven by financial incentives/motivations for the Pharmaceutical companies producing the COVID-19 vaccine.</p> <p>8) Concerned that there is essentially no liability upon the government or the Pharmaceutical companies for injuries resulting from the COVID-19 vaccine. Currently, there is no liability for the long-term negative side effects from the COVID-19 vaccine for the government, or the Pharmaceutical companies. This is especially concerning in light of the opioid epidemic which has resulted in 841,000 deaths since 1999, and has resulted in billions of dollars in punitive lawsuits against Pharmaceutical companies.</p>

Susanna Drmandjian	
Susanna Morelli	Requiring vaccines to enter indoor public spaces would be discrimination. To require people to receive an experimental medical treatment that isn't even fully approved by the FDA is unthinkable. You would segregate society and harm businesses as customers would be forced to shop elsewhere. Stop working so hard to force and coerce healthy people (who have a 99% survival rate) to get the vaccine, and start focusing more on that small percent of people who are at the greatest risk of death. Let's protect them and let the rest of society go back to living life without new restrictions. This law would also violate medical freedom and confidentiality. PLEASE OPPOSE!!!
Susanna Safaryan	
Susanna Sahakian

Sydney Graus	This is nation is supposed to be free. You are trying to separate our society into vaccinated and non-vaccinated. You want to bar unvaccinated people from society and punish them as "unclean". I am vaccinated. But that was my choice. For the government to say "you are required to put this into your body to participate in society" is disgusting. People have preferences, concerns, and religious beliefs. All of which are valid. This is America. Do not start taking the right to make decisions about our bodies away.
Sydney Kostikov	
Sydney Madsen	This is an arbitrary mandate that denies our freedom to make Healthcare decisions for our own bodies and keep our medical records private.
Sydney R Nold	
sylvia alexander	oppose

Vicki Collier	It's in the constitution. My right to choose. It is emergency use only. Can not make one take it. Science proved ineffective and dangerous. Aborted fetal parts in vaccine. 99.997% cure rate. Why do we need a vaccine. Science proven effective drugs as ivermectin and HCQ to cure. Fauci and Gates are frauds and committed treason and should be in jail. Those who push this vaccine should be responsible and convicted for crimes against humanity. OUR BODY OUR CHOICE. It is the Flu not a deadly virus. WAKE UP!! SERIOUSLY WAKE UP! It's time we take a stand and remove ANY AND ALL who would vote for this.
Vicki Smith	In violation of our Constitutional rights.
Vicki Whitley-Earnest	
Vicki J Doughty	
Vicky Chen	
Vicky Hernandez	Absolutely NO
Vicky Palyan	
Vicky Saikali	
Vicky Tavitian	It is unethical to assume sovereignty as a governing body over ones physical body, without taking case by case consideration of each person as an individual with their own physical, physiological and personal limitations and mandate them or ostracize them for not getting vaccinated, especially against a virus with a 99.8% recovery rate. There is no science behind this and everything has been misinformation thus far from everyone we've trusted. As an individual with an inflammatory autoimmune condition it is not safe for me

	to be vaccinated without longer trials and data, and it is unfair to to prohibit me from entering a gym or restaurant or mandate I wear a mask 24/7. That should be an individual businesses decision.
Vicman Gutierrez	
Victor Barbosa	
Victor Jacobson	<p>Please don't do this for hospitals! As someone who is currently undergoing surgical treatment for colorectal cancer I need free and clear access to my county hospital and doctors without mandates.</p> <p>I'm going through enough as it is, I don't want to risk taking the vaccine when there is absolutely no guarantee that it will not negatively affect my health as I don't need to "add insult to injury"</p> <p>This is an extremely stressful thing to go through, I don't need anymore stressful things to add to it like getting a covid test every time I have to go to an appointment.</p> <p>Please just wait for the Novavax vaccine to pass clinical trials and enter the market. I truly believe more people will accept the Novavax vaccine.</p> <p>Additionally I've already had covid so there's the natural immunity issue as well. There are more and more Doctors and health professionals and institutions that agree that natural immunity is as good if not better than getting vaccinated. This is an issue that is being ignored like it is inconvenient.</p> <p>My hesitancy to get vaccinated is based on first hand experience, I lost my grandfather to the vaccine. He had covid and lived for a whole year until he got vaccinated and had a stroke and died.</p> <p>I have a DVT blood cloth that has yet to be treated and a condition called thrombocytopenia, it's too risky to take the types of vaccines that are available right now (mRNA and viral vector).</p> <p>Please do the right thing, you will be hurting more people than you will be helping. This will only create more divisiveness and hurt people like me who need access to health care.</p>

Victoria Goykhman	
Victoria Gray	
Victoria Langle	Referring to the Center for Disease Control & Prevention in it's 2019 Novel Coronavirus (nCoV) Real-Time RT-PCR Diagnostic Panel this "vaccine" is in an experimental emergency use phase. The emergence of the virus variants raises new concerns about the performance of these authorized experimental "vaccines", as well as therapeutics and diagnostics that FDA has authorized for COVID-19. Dr. Anthony Fauci Director of the US National Institute of Allergy & Infectious Disease recently remarked, ""We're looking at an orally administered, maybe 7-10 days given to a person who is early on in the course of the infection before you get to the cascade of events that lead to aberrant activation, inflammatory response that kills people. Because we know now from a lot of experience with the care of these individuals, that if you can keep that virus from going to the upper airway, to going down into the lung & other organ systems, you can change what could be a devastating disease and make it an upper airway, common cold type approach, which is really what we need to do, we only need to knock out that virus for about 7-10 days, rather than lifelong with what we have to do with HIV". Using fear & propaganda to do further harm to our society, economy & children based upon unscientific positions is criminal. Tying civil liberties to vaccination status is tyranny. I choose FREEDOM!

Hitler used fear of disease to justify the removal of Jewish peoples from their homes. He labeled them as spreaders of disease, even though that is not true. This requirement is very similar, as we now know that COVID vaccines do not stop transmission of the virus, and that vaccinated people can carry and spread the virus while being perfectly asymptomatic. If you want to make a real difference, impose a COVID patient capacity limit at each hospital and keep them in a separate location with a different air circulation system in place. This allows more patients to come in with issues that are not COVID-19, and receive treatment without fear of catching COVID-19. I staunchly oppose this requirement, and encourage you to listen to what Kim Janey (African American Mayor of Boston) had to say

Subject: Mike Feuer`s proposal

Hello,

I am a physician and live in Holly Mitchell`s district. Please vote IN FAVOR of Mike Feuer`s proposal to require proof of covid vaccination at indoor events such as restaurants and gyms. This covid situation is out of hand and this surge is unnecessary. If the vaccine refusers cannot participate in indoor events, that will encourage some of them to get vaccinated. We need to end this pandemic. The public assumes that healthcare workers are perfectly content working 12 – 16 hours a day for the past 16 months. We are not. Many physicians are retiring early. The Board of Supervisors should support us. Requiring proof of vaccination for indoor dining, gyms, etc. is a way that you can do this.

Thank you for your consideration.

Sincerely,
Maryann Zukin, M.D.

Subject: COVID-19 Vaccine Requirement for Indoor Space Entry
Date: Monday, August 9, 2021 4:05:02 PM

Dear Lauren and Supervisor Hahn,

My name is Kevin Hayakawa and I am the Division 4 Director for the Walnut Valley Water District's Board of Directors, representing 20,000 residents in portions of Diamond Bar, Rowland Heights, and Walnut. I wanted to start off by saying that I truly appreciate Lauren attending the monthly Rowland Heights Community Coordinating Council (RHCCC) meetings and providing us with valuable information from the County.

I am writing to you today to express my strong support for the motion requiring vaccinations for people to enter certain indoor spaces in the County. We know that the vaccine is safe and effective. The delta variant has proven itself to be a threat to both vaccinated and unvaccinated individuals, but is especially spreading like wildfire among unvaccinated individuals. As a result, those who refuse to get vaccinated are putting everyone at risk. If anyone is going to be put into lockdown, it should be those who refuse to get vaccinated.

Vaccination demand has skyrocketed in France ever since they put such a policy in place. I hope to see the same occur in LA County.

Sincerely,
Director Kevin Hayakawa

Sent: Tuesday, August 10, 2021 5:31 AM
To: Supervisor Janice Hahn (Fourth District) <fourthdistrict@bos.lacounty.gov>
Subject: Mandatory Vaccination

To Whom it May Concern:

I am writing regarding possibly requiring COVID-19 vaccination in order to enter certain public spaces within Rowland Heights. I am pro-vaccination and I am fully vaccinated against COVID-19. I also have natural antibodies after being infected during the surge in December 2020. When the vaccine was made available to me in March as an employee in education, I gladly received it which was my choice and mine alone.

This vaccine is under emergency use authorization and as we have seen, there are side effects for some people that we are still learning about. For some, the experimental phase of this vaccine plays a large role in the decision to put it in their body. The fear of the unknown is real for some people. It has been their choice and should remain their choice to receive it. This virus has a 98-99% survival rate yet the mass hysteria around it is astounding. We have let indecisive physicians like Dr. Fauci and the media control our beliefs and actions regarding the virus.

We are surrounded by many dangerous viruses daily and have been for years, yet nothing has caused as much panic as COVID-19. Sure, it is highly contagious. Sure, some have died. Sure, some get long COVID. However, the media and the government only highlight this small percentage and tout it as "one too many." They do not create the same mass chaos around the flu. The flu causes many deaths each year and for me, I have had what I could consider "long influenza." Flu symptoms for me have sometimes lasted a couple months and we're ten times worse than my experience with COVID-19. I choose the get the flu shot each year but have never been required to have it when entering a public space during flu season.

As I have emphasized, vaccination with a vaccine that is under emergency use authorization should never be

mandated. The Democrats have done everything but made the receiving of this vaccine mandatory through requiring mandatory vaccination in other areas. People are simply being bullied into making a choice they have not fully thought out. You're attempting to control people's own bodies which is downright wrong.

This vaccine should remain a choice. If I choose not to vaccinate then they are making a conscious choice to take a risk. This is a risk many are willing to take for the time being and should remain this way.

Stop trying to bully people to conform to the mass panic.

Thank you,
Stephanie Chen

From: [Jacqueline Smith](#)
To: [Yokomizo, Lauren](#); [Supervisor Janice Hahn \(Fourth District\)](#)
Subject: NO VACCINE MANDATES
Date: Monday, August 9, 2021 8:33:14 PM

I am writing in regards to possible vaccine mandates to enter into public buildings. Do we not still live in the United States of America? Are we now all considered to be sick until proven well? What about those who have had Covid and recovered and have natural immunity?

I oppose mandatory COVID injections, Vaccine Passports and tracking and tracing apps.

I should have the free choice to determine if I want a COVID shot. Neither government nor private corporations have the right to force me to have a so-called "Vaccine Passport." Nor should an app that contains my private medical information and that tracks and traces my movement be permitted.

The idea of a Vaccine Passport did not begin with COVID and will not end with COVID. Such a medical or health digital passport presents a serious threat to freedom. My private medical decisions regarding a COVID shot or other vaccine should not determine whether I can leave my home, work, shop, dine or worship.

I stand firmly opposed to any mandatory vaccines or so-called vaccine passports.

I urge you to fight against any direct or indirect effort to make COVID shots mandatory, to require a Vaccine Passport or to electronically track and trace my movements.

Sincerely,
Jacqueline Smith

Please let your voice be heard on this topic:

LYokomizo@bos.lacounty.gov
fourthdistrict@bos.lacounty.gov

The Supervisor will be introducing a motion tomorrow asking that county to report back in 2 weeks on requiring vaccinations in order for people to enter certain indoor public spaces in the County (would apply to our unincorporated areas.)

Feel free to let us know your feedback.

73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces
Recommendation as submitted by Supervisor Hahn: Instruct the Director of Public Health, in concert with the Director of Consumer and Business Affairs and County Counsel, to report back to the Board within 14 days on possible options for requiring vaccines in certain indoor public spaces in the County, with the report to look at other jurisdictions that have adopted similar mandates (i.e. New York City, France, possibly City of Los Angeles), consider whether a mandate should require one dose or full vaccination and whether the policy should apply to all indoor public spaces or certain non-essential businesses and events (i.e. should grocery stores be exempt); and instruct the Director of Public Health to report back to the Board in 14 days with the process for how people can prove their vaccination status and businesses can verify vaccination status using existing digital forms of records and/or paper records. Subject: Right to Health Freedom (Oppose S-1, 21, 73A, and 73B)

Hello to whom it may concern,

I whole heartedly apposed the ban on unvaccinated from having the right to live and take care of their health and life how they see fit. I OPPOSE passing S-1, 21, 73A, and 73B!!!!!!!!!!!!!!

The action to ban a certain group of individuals based on personal choice to care for their health in alternative methods is a sincere impeadment on the human rights our country is known to offer its residents. I am appalled at such an action being considered. What right does the government have to tell me how to care for myself? They do not know my implications nor my family history. They fo not have a right to control me nor deny me the pursuit of happiness and health in ways suited to my life and well being. This disease does impact others and they have the right to do as they see fit, vaccinated or unvaccinated.

With power as a US citizen and with love that we can care for one another without controlling one another,

Christa Irene Ostdiek

My name is Rosalie Aranda,

I'm sending this to show opposition to the following agendas I'm opposing 21, 73A,73B I'm opposing these agendas because it's unconstitutional, unethical, and bias, natural medicine is being silenced, and this not right. And unless the "underlying diseases" are addressed as well then this just does not make sense. On a side note, why if the delta variant is so intense... why isn't our southern boarder closed?

I hope you would consider these comments. Thank you for your time.

Not the public comment line. Your WEBSITE WHERE THE PUBLIC CAN show opposition or support for certain agenda items. We could not click on the boxes for Agenda Items 21, 73A, & 73B. I called the main # 213-974-1411 and they confirmed the site CRASHED. They were trying to get it back up and running. I used Google Chrome as suggested and other web engines to no avail. I am not the only one who was prevented from voting on your site as to this issue. And I was not called on during public comment at the hearing.

I am a testament to the success of hydroxychloroquine, ivermectin, azithromycin, and key supplements that helped me conquer Covid. They are also effective in preventing the infection of COVID. We have seen that those with the shots are still getting COVID. Look at what is happening IN ISRAEL CURRENTLY. I also know 2 people who have been detrimentally affected by Covid experimental shots - one went blind, the other died. This is happening to good people because the Big Pharma and politicians are not following the science and silencing those with safe, alternative methods of preventing and fighting COVID.

The community in opposition to these experimental shots have been silenced.

Please be advised that I and many other LA County residents have been shut out from making public comment on your County website in opposition to Agenda Items 21, 73A, and 73B in opposition to mandatory Covid vaccines.

There are still too many unanswered questions about the long-term health consequences of Covid 19 experimental shots. To force these experimental shots upon LA County employees is in violation of our Constitutional rights and HIPAA privacy rights.

I called your main # and learned the site has been down. That is a great way to silence the community. I also cannot get in to publicly comment at the live meeting.

You need to know that People's voices have been silenced by your site's failure to work properly. You need to provide People more opportunity to comment on the mandatory experimental shots.

REspectfully,
Nicole Flood

Subject: Sheriff employee - Mask mandate

Good afternoon,

I am reaching out to the BOS to request assistance in regards to the mask mandate. I have been a Los Angeles County employee for the last 20 years currently assigned to the Sheriff's Department and work out of the Hall of Justice building. I have a compromised immune system and am high risk of contracting the coronavirus. Unfortunately, nobody on the department is requiring that employees wear masks once they are in the building. I have brought this up on numerous occasions, and the only thing that was done was an email was sent out once. A letter was sent to my doctor from the department stating masks are mandated and that I would be fine coming back into the office and yet even employees sitting right beside me do not wear masks. I have plenty of photos demonstrating how employees walk around with no masks.

If the County Public Health is requiring indoor masks, why is the Sheriff's Department exempt and why am I having to jeopardize my health.

Subject: AGENDA ITEMS for 8/10 S-1, 21, 73A and 73B - voicing my opposition

I'm and many I know are in in opposition of the agenda items listed in the subject line. Mandating shots is against the law and civil rights of US and California.

1. The covid 19 shots are NOT FDA approved
 2. Covid 19 shots are NOT safe and not effective VAERS shows over 5,000 deaths and over 500,000 severe adverse reaction (and this is old data)
 3. there is a NUMBER of breakthrough cases of those who have already been vaccinated and they are spreading
 4. it has never been proven that any of hte covid19 shots are able to stop the spread nor stop a "vaccinated" person from being infected covid19
 5. there is much successful treatment and protection for COVID 19 Ivermectin, Zinc, adequate hydroxy-25 (D3 levels)
 6. *Microbiology & Infectious Diseases*, January 2021, veteran immunologist J. Bart Classen: "RNA-based COVID vaccines have the potential to cause more disease than the epidemic of COVID-19." <https://scivisionpub.com/pdfs/covid19-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf>
 7. CDC: Best estimate for survival rates by age group are in most cases over 99% (birth to 19: 99.997%; age 20-49: 99.98%; age 50-69: 99.5%; age 70 and over: 95%) <https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>
 8. Someone who has already have been infected by COVID 19, has a stronger immunity then any vaccinated person against all its variants thats how the immune system work and has worked since man has been created.
 9. mandating proof is a violation of medical privacy and violation of ADA
- OPPOSE THESE AGEND ITEMS - do real research i'm also happy to send you more research

Subject: OPPOSE Agenda items 21, 73A, and 73B

Dear Board of Supervisors,

Your public comment server is going down.

I OPPOSE the following proposals.

21

You do not own the bodies of your employees. Under EUA and just pure informed consent we have the right to refuse medical procedures people do not want.

73A

Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

Its also incredibly unethical to tell others what to do with their bodies. They have the right to demand transparency on what are the long term implication for this medical treatment. There are also other treatments available and people (public health and hospitals) refuse simply because they are being advocated by "republicans" . Its terrible. If we want to tackle this issue long term then we have to address the poor metabolic health of Angelenos and obesity rates that were made worse by the lockdowns. People have emerged in worse health due to being shut in. Consequently, science showed that most transmissions occurred in family homes and not public spaces.

73B Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

This is so unconstitutional. You are punishing people who made a choice about their health. People like myself spend several hours during the week looking at data, hearing different points of view, and searching PUB MED articles. You know what is the overarching theme? Obesity and Diabetes are big factors in Covid related problems and people are well enough to respond to this crisis. And we need incentives to better everyone's health not mandate something a lot people are not comfortable with. Its also against The Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, *religion*, sex or national origin. Provisions of this civil rights act forbade discrimination on the basis of sex, as well as, race in hiring, promoting, and firing. *The Act prohibited discrimination in public accommodations and federally funded programs.*

You are discriminating against peoples beliefs/religion/philosophical objections against mandated

interventions. The science is not settled on this matter. Not by a longshot. Further proof is how other fully vaccinated countries like England, Israel, Iceland, etc. are dealing with new surges of cases because at the end of the day, the vaccine **does not stop transmission.**

Thank you.

Sonia

Subject: Public comment submission for 8/10/2021 agenda items #21, #73-A, and #73-B

My name is Chase Bruno, resident of Los Angeles County. Please submit the following text in its entirety as my public comment to items #21, #73-A, and #73-B on the Board of Supervisors Agenda for 08/10/2021, since the website to do so is not functioning properly:

That this is even being discussed by the board is outrageous. No person, much less an elected official has domain over another person's body. By considering this action, you are implying that you are qualified to make medical decisions on behalf of every single person in Los Angeles County, and your opinions supersede that of every primary care provider of your constituents. The board's decision making abilities and leadership over this past year hardly reflect the notion that you are qualified to perform the basic functions of supervisors, much less the basic functions of a healthcare professional, a job none of you remotely meet the requirement for.

If your goal is to get the entirety of Los Angeles County Vaccinated, perhaps you should address the issues that make people weary of vaccination in the first place, before defaulting to tyrannical and far-overreaching measures such as mandating medical procedures for your constituents in order for them to participate in society. Perhaps, instead of attending a dinner at a restaurant shortly after voting to ban outdoor dining, Sheila Kuehl could have ordered GrubHub and had her actions reflect her words, instead of blatantly contradicting them. Perhaps, in doing so, you could earn back the trust of the public. Sheila Kuehl is just one example of this, I don't know that I need to name more elected who's actions have contradicted their decisions affecting the public, but we can also talk about Supervisor Hilda Solis' constant habit of deleting negative or critical comments from her Instagram page, almost as if she would rather pretend critics don't exist rather than answer for her actions. On March 4th, when the Trump Administration barred abortion providers from receiving federal funding, Solis stated "The Trump Administration's latest attack on women's health diminishes the sanctity of the doctor-patient relationship and impacts the quality of healthcare accessed by four million people throughout the country". Yet she wishes to do the very same (diminish the sanctity of the doctor-patient relationship) by imposing herself as the chief medical decision maker for LA County Employees and residents by requiring them to undergo a medical procedure, the COVID-19 vaccine by way of coercion.

What is further contradictory is that the LA County Board of Supervisor's "Policy of Equity", which can be found on the County Equity Oversight Panel website states the following: "The County WILL NOT tolerate unlawful discrimination on the basis of age; ancestry; color; ethnicity; religious creed; ...; disability; marital status; MEDICAL CONDITION; ...; or any other characteristic protected by state of federal law." Further, "as a preventive measure, the County also will not tolerate inappropriate

conduct toward others based on a protected status even if the conduct does not meet the legal definition of discrimination or unlawful harassment. All County employees are responsible for conducting themselves in accordance with this Policy and its associated Procedures." This section is preceded by the statement "The Los Angeles County Policy of Equity reflects and builds upon our MISSION, VISION, and VALUES, which each employee is responsible for demonstrating in both ACTIONS AND WORDS".

The very fact that the board is considering requiring individuals to be vaccinated in order to participate in society displays that the Board is willing to act contradictory to its MISSION, VISION, and VALUES, and does in fact condone discrimination- discrimination against those who have decided for themselves that the COVID-19 vaccine is not the right medical choice for themselves. The Board is willing to discriminate against grown, functioning, free Americans, who have decided that the repeated contradictions surrounding the vaccine have caused them not to trust it enough to let it enter their body. The county is willing to discriminate against those who wonder why, after being told repeatedly by government and public health officials, large corporations, big tech, and countless other bodies that the vaccine is ONLY "Safe and Effective", they are simultaneously being told "the virus can still spread, masks must still be worn", what benefit remains to outrisk a blood clot, unknown reaction, or the unknown long-term effects. The governor of California has called this "A Pandemic of the Unvaccinated", yet the unvaccinated seem to be no better off than the vaccinated at this point. At this point, it now appears that there is no benefit to being vaccinated besides being free from threat, not from the virus but from tyrannical policy. Any foreign substance being introduced into the body can present a risk, whether small or large. If those who are otherwise healthy and have little chance of infection by the virus, and now have a wide range of treatments available to them to treat an infection, and have a high likelihood of getting through any infection by the virus without great harm to themselves decide that they'd rather not introduce a new substance into their body from a manufacturer that has a history of lawsuits (and one of those manufacturers holding the record for the largest criminal settlement ever awarded in history), developed under a presidential administration many did not trust in record time for the chance that it may avert what turns out for them to be a little worse than the flu they had before, is that outrageous? If their risk to transmit to others is at the same level of those who have already taken the shot(s), as we've discovered in the previous weeks, is it honest to say that forcing them to receive the same shot is for the best interest of the public? This very agenda item displays that this is not a pandemic of the unvaccinated, but a pandemic of bad leadership- a pandemic of policymakers who recklessly, and without suffering consequence of their own policy, demand control over the sanctity of their constituents' own bodies under the veil of "saving lives". How can anyone on this board think you are uniquely qualified to "save lives" when you haven't even demonstrated your ability to save money, electricity, or a small business?

This state has not learned from any bad decision it has made during this pandemic. It has demonstrated that it is not careful, nor considerate to the rights of its Citizens by any measure of the imagination. You have locked our children out of schools and inside their homes for a year, while allowing adult-appearing children to destroy parts of our cities for days on end, and while law abiding citizens were locked in their homes under curfew. You have kept healthy people out of fitness facilities while allowing liquor stores and smoke shops to remain open. You closed small businesses from serving their customers without proving anywhere near beyond a reasonable doubt that they were a danger to them, while allowing the homeless to setup shop on sidewalks, riverbeds, and parks. You arrested people for going to the beach while you released dangerous criminals from

prisons, and now you are considering requiring County employees to take a vaccine that does not inhibit the risk of infecting others, and considering banning otherwise healthy people from utilizing indoor public spaces for the same.

Above all else, the board simply lacks the authority, moral or otherwise, to require someone to put something into their body against their will, in addition to lacking the authority to retaliate, segregate, or discriminate against them by withholding access to indoor facilities, or any right by any means for their refusal to do so.

The decision to take a vaccine should not be made under duress, threat or fear, because everyone is telling you to get it, or that you won't be able to participate in certain things without it, that you will not have the same rights as others without it. It should simply be, as with any other medical procedure, that the person freely and willfully chooses to because they believe or are convinced that it is the best decision for themselves.

Dear Members,

I attempted to go on site to put my concern and vote for the following measure that is being voted on today. the following Agenda items: 21, 73A, 73B.

I am completely opposed to all of these measures, especially the one that bans us from restaurants if unvaccinated.

I am an American Citizen and registered to vote. It will take my constitutional rights, if this passes.

Sincerely,
Patricia Souder

Subject: 8/10/21 LA County Board of Supervisors Meeting
Date: Tuesday, August 10, 2021 11:00:39 AM

To Whom It May Concern,

Please add to the public record for this meeting today, that I, Michael A. Kander, am a registered voter in LA County, and I am OPPOSED to the following three agenda items scheduled for vote in the meeting today. I believe the Board of Supervisors should know and understand that the Constitution of the United States and the State of California support an individual's right to choose for themselves whether or not they should have a vaccination, and that their employment should not be subject to termination should they choose not to be vaccinated. I would urge all of those on the Board of Supervisors to follow the science as they make these decisions. There are more than just a few thoughtful, intelligent, well qualified and lettered medical doctors and scientists that have contributed to the research in order to provide a deeper understanding of COVID-19 and how to fight it. These are physicians and scientists who have grave concerns about the vaccines. I urge you to follow-up with them, review their work, interview them before you make decisions that will have a profound impact on those of us in the general population.

Thank you.

21. COVID-19 Vaccine for Los Angeles County Employees

73-A. Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

Respectfully,
Michael A. and Pamela J. Kander

I am writing to **OPPOSE the following: S1, 21, 73A & 73B**, for the following reasons. I don't believe there should be any mandatory Covid-19 vaccines for any employee or Citizen due to the fact that the Covid-19 vaccine has not worked the way the so-called experts said it would. The vaccinated are now causing the unvaccinated to become infected and each other. This is still an experimental use approved vaccine and there has **never been a successful mRNA animal trial and now the quinea pigs, rats, ferrets and monkeys are people**. There are proven data from other Countries where the way to get better was to open up and not require masks or vaccination. We are our worse enemy by not following the true science.

I hope you'll consider these words and vote to oppose the aforementioned agendas.

Sincerely,

Claude Richardson

I want to send in my vote to OPPOSE the Agenda Items for your meeting today which are Items 21, 73A, 73B

You all need to educate yourself about the Vaccines which are not REAL Vaccines only experimental therapeutics which have never been approved by the FDA as a MRNA. Please look at these short presentations <https://videopress.com/v/p8R7ebPy> and see for yourself. This is no joke and so many people have already died from the vaccines.

Also see what Dr. Dan Stock has to say in his presentation about the misinformation of the so called vaccines.

Phone: (310) 472-5229

Zip Code: 90049

Message: I live in the 3rd District so this is primarily for Sheila Kuehl, with a copy to Janice Hahn. I read in the LA Times that you folks are looking into requiring proof of vaccination for entrance into public businesses and such, with limited exceptions such as grocery stores. Would you please just STOP! Stop trying to run every aspect of our lives. Whatever happened to "my body, my choice"? -- should we add "when it suits those in charge"? Two other considerations: it's racist (as is everything these days) since it would impact people of color by far the most (lower vaccine rates), and second, (though you can't talk about this one) if you don't think it would impact the upcoming recall negatively toward Newsom (even though he wouldn't be responsible) then you are really out of touch. By the way, I have both had the disease and am fully vaccinated -- we are tired of being penalized because others are either too foolish or too selfish to get the shots. I vote.

Thank you,
County of Los Angeles Board of Supervisors

Subject: FW: August 10 meeting - opposition to S-1, 21, 73A, 73B
Date: Tuesday, August 10, 2021 10:31:01 AM

The following correspondence is being forwarded to you for your review/information.

From: Naomi Poole <momnaomi@hotmail.com>
Sent: Monday, August 9, 2021 11:16 PM
To: ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>
Subject: August 10 meeting - opposition to S-1, 21, 73A, 73B

I write to voice strong opposition to the following items on the August 10 agenda: S-1, 21, 73A, 73B.

S-1 Public Health Order S-1, which would BAN THE UNVACCINATED FROM RESTAURANTS, GYMS, ENTERTAINMENT VENUES, ETC.

21 COVID-19 Vaccine for Los Angeles County Employees

73A Ratifying 8/4/21 order establishing a Mandatory COVID-19 Vaccination Policy for County Employees

73B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

The government should NOT require anyone to be injected with anything in order to live and work freely in the society. This is a violation of human rights, and is also discrimination. Whatever a person's view is on the current covid vaccines, it is a PERSONAL choice what goes into a person's body. The government cannot mandate this. And must not create rules that restrict his normal citizen freedoms to try to enforce this (i.e., now you can't go to restaurant or gym or public entertainment venues...what next, can't go shopping for life necessities and food????).

And county employees should not be forced to get the vaccine in order to serve LA County.

This is the United States of America. We're supposed to be free citizens here.

Date: Tuesday, August 10, 2021 1:20:03 PM

I want to make sure you know the opinion of one of your constituents on the topics you will be discussing tonight.

I am adamantly opposed to taking people's rights away - period. We have HIPPA laws in place for very good reason and it is not ok to start mandating an Emergency Use Authorized Vaccine that is in stage 3 clinical trials and that has not been approved by the FDA.

To be clear, I am OPPOSED to any sort of Covid Vaccine Passport/Mandate/Proof - whatever you want to call it.

I DO NOT agree with any sort of segregation based on whether or not you got a covid vaccine. As of now, people with the vaccine are still catching covid. As of now, vaccinated people are still able to shed the covid virus. So, the vaccine is not protecting people the way it was sold to us. It is not working. And now to make it mandatory is against all I stand for and all I thought this country stood for....freedom. Freedom to my body. What else will you start mandating if we all let this happen?

PLEASE VOTE NO on any sort of Covid Vaccine Mandate.

Kelly Evans

Subject: Re: Mandatory vaccines for indoor spaces

You know this is totally illegal and unconstitutional. It is also pushing a lie. The CDC recently admitted that the actual number of cases of people in the U.S. who've had COVID and recovered is likely at least *five times* the reported number. That's HALF THE POPULATION. And their natural immunity is better and longer lasting than that provided by *any* of the vaccines. But none of you power-mad Communists ever mention that, because all you want is control over other people. You are all traitors, all liars, all enemies of the people. All of you.

Subject: Cannot get onto your LA County Comment site to Oppose Mandatory Covid shots under Agenda Items 21, 73A, & 73B

Hello, LA County Board of Supervisors,

Many of us have not been able to get onto your website to vote in opposition to Agenda Items 21, 73A, and 73B which would mandate experimental Covid shots upon LA County employees and all residents in order to go about our daily lives. I called your 213 # and they admitted your site was down. I see the clear attempt to silence the community who will be harmed by your mandated experimental vaccines.

Mandating these shots is not only unconstitutional but also violates all of our HIPPA rights and opens doors for lawsuits based on discrimination.

I am opposed to these mandates for many reasons, but for starters I just had a family member pass away and it was confirmed it was from the vaccine. Mandating myself and my family get this experimental shot after we just buried our loved one from the shot is grotesque. I also just recovered from Covid myself and had no issues. With already having Covid I am a prime candidate to have an adverse reaction to this experimental shot. This is not a one size fits all issue. The other issue is you are blatantly lying to the public saying mandating vaccines will end this pandemic which is completely false. I got Covid from a fully vaccinated person. I currently know 10 people who have Covid and all are fully "vaccinated". The "vaccine" does not stop the spread of Covid and requiring the "vaccine" for all will not do anything to stop the spread. How about encouraging people to get healthy, check their vitamin D levels, exercise and eat clean?

The other issue is since this experimental drug is not FDA approved you are mandating all residents voluntarily sign up for these experimental drug trials without providing everyone with the proper waivers and paperwork required when someone signs up for a vaccine trial. You are infringing on our constitutional rights and violating our civil liberties while trying to silence our voices.

You have not heard from all in opposition to this mandatory imposition of vaccines in violation of People's constitutional and HIPAA privacy rights. You will be responsible for the future negative health consequences of our future generations. The known and unknown consequences of these experimental Covid shots where we, the public, are the guinea pigs are the reasons why you cannot mandate these experimental shots.

Please take note that many in the community have been silenced by your site conveniently crashing.

Respectfully,

Brittany Calvillo

Sent: Tuesday, August 10, 2021 12:09 PM
To: ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>
Subject: Opposition

I oppose these items on the Agenda for August 10, 2021:
21, 73A and 73B

I have tried over five times to voice my opinion on these items through the online form provided for public comment but, to no avail. I would like a better way than through email to be heard before you vote on items affecting the well-being of the citizens of LA County. I've wasted an entire morning on this so far.

Here are my concerns regarding these items:

21 OPPOSE

This should be an individual choice on the advice of one's personal physician. My own doctor has advised me NOT TO GET THE VAX as I suffer from an autoimmune condition. This would set into motion a cascade of events that could adversely affect my health. I spend thousands of dollars a year on medications and supplements so that I can live as healthily as possible given my circumstances. Please do your own research and look at the facts. Here is the VAERS website to visit to find out how many people have died or have suffered serious adverse reactions after receiving the vaccines. <https://vaers.hhs.gov/> This is our own government's website that tries to track adverse events. If you do a deep dive, you will see that the reactions from the covid vax have outnumbered ALL VACCINES IN PREVIOUS YEARS TO DATE!

73A OPPOSE

This is against the Nuremberg code. This injection is an experimental gene therapy shot. It has not been approved, it has only been authorized. The pharmaceutical companies have no liability at all for any adverse reactions. See the 1986 act here. <https://www.congress.gov/bill/99th-congress/house-bill/5546> Are you willing to bankrupt the County due to potential lawsuits?

73B OPPOSE

There is no basis for discriminating against an individual due to health concerns. Have you looked at any data that reports those that have been injected carry as much viral load and can transmit the disease just as easily as one who has not received the vax? See the report of the patients in Massachusetts here. <https://www.cnbc.com/2021/07/30/cdc-study-shows-74percent-of-people-infected-in-massachusetts-covid-outbreak-were-fully-vaccinated.html> The CDC reported a study

that showed 74% of the people infected in the outbreak were fully vaccinated. Furthermore, my son was fully vaccinated in April. Since that time he has been sick twice with various “flu-like symptoms.” Last week (first week in August 2021) he tested positive for covid. He still does not have his sense of smell nor can he taste anything after this last illness.

Read the science! There are countless doctors across the United States successfully treating individuals on an out-patient basis with a protocol that keeps them out of the hospital. It is not hard to understand why ivermectin is receiving a bad rap. It is out of patent and therefore of no use to the bottom line on the pharmaceutical company’s profit and loss statement. Out of patent drugs can be manufactured by other companies which means there is no money in it. There are ongoing clinical trials now set up to test the efficacy of this drug. There are other items within the protocol used and I advise each and every one of you Board members to do your homework. Please let’s approach this subject with common sense.

Jeanne OBrien

Subject: Please OPPOSE S-1 and 73-B

Dear Ms. Zavala,

I am a well-educated, liberal, queer person who is deeply opposed to vaccine mandates and restricting the unvaccinated from public life. This is un-American, medical apartheid, and reminiscent of oppressive governments. My wife and I are US citizens who just moved back to the US from Italy after 14 years because the government was not a democracy. When I returned to the US, I cried with relief. Now I am facing the same oppressive measures here that are being implemented in Italy.

I would like to ask you to oppose items S-1 and 73-B, which were discussed in your Board of Supervisors meeting this morning (August 10th).

Please allow each citizen to freely decide whether to get the Covid injection. This is a huge decision; this shot is still experimental, and people need to be able to freely choose whether they feel comfortable putting this inadequately tested and unprecedented gene technology into their bodies. On average, it takes 10-15 **years** to study and approve a vaccine, but these injections were trialed and authorized in a mere 7-9 months. During the testing phase, the researchers did not complete the animal trials before they started the human trials, and the people who are now getting this injection are the guinea pigs. The pharmaceutical companies have indemnity, meaning that they can not be held liable when a person becomes vaccine-damaged. If they are not liable, is SBCC willing to take the blame when people report vaccine injuries and deaths? The **long-term** consequences of the COVID-19 injections are also completely unknown. Every day the number of adverse reaction reports and vaccine-related deaths on VAERS (Vaccine Adverse Event Reporting System) is growing significantly, and 31,389 Covid-19 injection fatalities have been reported in the USA and UK this past year. VAERS is a government website: <https://vaers.hhs.gov/>

Even after these injections are approved for standard use, the decision to get them should still always be up to the individual. Informed consent is essential and must be protected! Forced vaccination is repressive and embodies totalitarianism, not liberty and justice for all. It is anti-American that private businesses and public places that are publicly funded with our tax dollars should not be open and available to ALL.

In September of 2020 the CDC statistic that the Covid-19 death rate is under 0.5% for everyone but people over 70. The death rate for the Delta variant is extremely low. I do not see that this statistic warrants the draconian implementation of mandatory vaccination. Furthermore, there are many **natural, alternative ways** of treating and preventing Covid, such as Ivermectin, Quercetin, high doses of Zinc and Vitamin C and D, healthy diet and exercise that are concealed by Big Pharma

because public knowledge of this would be a threat to their profits and a threat to their Emergency Use Authorization of the injection.

A lot of the statistics and studies being released about the injections in mainstream media and in the government are being funded by the pharmaceutical companies themselves, so they have a self-interest in the matter.

I have traveled in 14 states and 6 countries since the start of the pandemic and have always been healthy. I have been on planes, trains, in hotels, and with friends and family and have never noticed that anyone that I was with was sick. Let me ask you this: If we didn't constantly have the TV and news scaring us with Covid "asymptomatic" and "numbers" and "cases", would you even know there was a pandemic? How many people do you yourself personally know who have died of Covid who did not have co-morbidities? The real pandemic is the constant fear propaganda being pumped through our televisions and radios day and night.

My brother had Covid and was sick for 2 days. My aunt was sick for 5 days. My landlord was sick for 6 days. I have not met anyone who was sick for longer than 6 days. None of this warrants giving up the freedoms that our country was founded on!

The ingredients of the Pfizer injection include the following: mRNA, lipids ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N, N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3-phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose. Would you eat something that contained these ingredients?

I know that you are concerned that other people who are weak are in jeopardy. I don't want to hurt anyone. But if those people who are concerned about dying of Covid get the injection, then they should technically be protected, right? Science says that they are not likely to die or be hospitalised. So they are safe. And everyone else who does not have the shot and enters a public space is consenting that there is a risk, and it is a risk that we take with mutual consent. I would rather die of Covid than get the injection due to my religious and personal beliefs.

Please respect my beliefs and don't force me to get an injection or have to take a Covid test to participate in daily life if I don't have the injection.

The US is founded on freedom of religion, freedom of speech, and individuality. Let's preserve our powerful country.

Thanks for your consideration.

Kind regards,

Amy Balliet

Subject: NO on Vaccine madates/vaccine passports

Attention LA County Board of Supervisors,

As you begin to review data regarding mandating vaccines and vaccine passports, as a voting citizen of LA county, I am writing to express that I am 100% AGAINST any mandating of vaccines and 100% AGAINST any vaccine passports at any time, now or in the future.

There is an overwhelming amount of data proving that vaccines are NOT sufficient to block transmission of C-19 and variants. (I can provide you credible resources on this if you are lacking such information).

Additionally, every American citizen must have the freedom to decide what they want to eat, drink and inject or not inject into their body - pandemic or no pandemic. I am PRO freedom and pro-choice in all aspects of personal health choices.

Vote NO to any vaccine mandates and/or vaccine passports of any kind (S-1, 21, 73A, 73B)

Sincerely,

Britt-Marie Gustafsson
LA County resident

Hello,

Please note I am in direct opposition to discriminating unvaccinated people. We all are entitle to our preference, decisions and our freedom to choose, part of our inalienable rights.

We are asking you NOT TO APPROVE the following agenda as there are millions in the County that oppose it and I am against these agenda items:

S-1
21
73A
73B

Thank you,
Toby I.

So many of us were on the phone to oppose Agenda 21, 73A, and 73B and we were not given a chance. You should not ask us our stance, only our names. Then you cannot pick and choose who you will listen to.

Disgraceful!

I tried to leave an e-mail comment and it would not send.

I was on the phone about 1:40 and not heard.

Good Morning,

I would like to add to the public comments for the Board of Supervisors and would like to vote in opposition of items 21, 73A and 73B. Again, I OPPOSE items 21, 73A and 73B. I respectfully ask that these comments be conveyed to the Board of Supervisors and heard, not silenced. I'm sure you would appreciate the same if you were in my shoes. Thank you for your time.

Respectfully Submitted,
Cody Crowley

In regards to agenda meeting -73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

The Unruh civil rights act prohibits what you are trying to allow businesses to do. Get ready for the lawsuits

The Unruh Civil Rights Act (colloquially the "Unruh Act") is an expansive 1950s California law that prohibits any business in California from engaging in unlawful discrimination against all persons (consumers) within California's jurisdiction, where the unlawful discrimination is in part based on a person's sex, race, color, religion, ancestry, national origin, age, disability, medical condition, genetic information, marital status, sexual orientation, citizenship, primary language, or immigration status. [1][2][3]

The Unruh Act applies to ALL businesses in California including: hotels and motels, restaurants, theaters, hospitals, barber and beauty shops, housing accommodations, and retail establishments.[4] The law was enacted in 1959 and was named for its author, Jesse M. Unruh. The Unruh Civil Rights Act is codified as California Civil Code section 51.[3][5]

What do you think " medical condition " equates too?

The California Supreme Court has repeatedly "interpreted the [law] as protecting classes other than those listed on its face".[6] For example, even prior to the 2005 addition of sexual orientation to the law's list of covered classes, the Unruh Act had been "construed as protecting gays and lesbians from arbitrary discrimination",[6]

such as in the case of Rolon v. Kulwitzky.[7]

Subject: Cal Retailers Letter re: Indoor Vaccine Mandate

Hello --

Attached is a letter on behalf of the California Retailers Association regarding a potential indoor vaccine mandate. While the experts of the county examine best approaches over the next couple weeks on how to implement this mandate, CRA respectfully asks that the retail industry's perspective be taken into consideration during this process.

If you have any questions or would like to set up a meeting, please contact me.

Thank you,

Ryan Allain

Honorable Janice Hahn
Los Angeles County Board of Supervisors

Via email

Re: Motion to require vaccination checks before business entry; retail exemption

Dear Honorable Supervisor Hahn:

I am writing in response to your motion which would require vaccination checks at the point of entry at many private businesses, including retail and **respectfully request your consideration in removing all retail from the vaccine verification ordinance**. Unlike other industries such as restaurants or fitness centers, retail store customers and employees can always keep a mask on, and retailers will continue to strongly encourage and incentivize our employees and our customers to get vaccinated as well as wear a face covering while in the retail establishment.

The California Retailers Association is the only statewide trade association representing all segments of the retail industry including general merchandise, department stores, mass merchandisers, restaurants, convenience stores, supermarkets and grocery stores, chain drug, and specialty retail such as auto, vision, jewelry, hardware, and home stores. CRA works on behalf of California's retail industry, which operates over 400,000 retail establishments with a gross domestic product of billions of dollars annually and employs millions of Californians and many Angelenos as Los Angeles is the largest retail market in the state.

Our retail members have expressed significant concerns about the prospect of requiring their employees to "police" their customers for vaccine status at the doors of their businesses. Enforcing mask mandates has been difficult in many cases – checking vaccination cards will stir much more emotion among patrons. Placing our employees at the center of this conflict is not something most of our employees are trained to do and is worrisome for their personal well-being.

Retailers are strong supporters of the COVID-19 vaccinations and were some of the first to work with the County and City to help with the vaccination rollout - offering our services, facilities, and expertise to get the vaccine out as safely and effectively as possible. We certainly share concerns with the increased spread of the Delta variant and the number of people who are not yet vaccinated.

As to your motion requiring vaccination checks at business entry points, we have some immediate questions we would like clarified prior to the drafting and adoption of any ordinance:

- What constitutes "proof" of vaccination? Each vaccination facility provided different forms of confirmation, from vaccination cards (which can be easily forged) to QR codes. What should locations accept as satisfactory "proof" of vaccination?
- Is a copy acceptable, a photo on a phone? Will ID be required to prove the vaccination proof matches the individual?

- Are foreign vaccination cards acceptable?
- How can the city provide uniformity and consistency in enforcement? Who is responsible for enforcement – County Sherriff? Public Health?
- How do businesses treat individuals who are exempt for religious or medical reasons?
- At what level of vaccination county-wide will this requirement expire? 75% of LA residents vaccinated? 80%?
- What metric will measure ultimate success in county mitigation efforts? Will this be measured based on hospitalizations? Positivity rates?
- Who ultimately is enforcing the ordinance? What is considered a “violation” and what will be the penalties for violations?
- What liability protections will the County provide to employers in the event they are sued (by employees or customers?) for discrimination?
- Will the County include sentencing enhancements for assault and harassment, particularly in a retail setting, to protect workers enforcing masking or vaccination mandates? Will the District Attorney commit to enforcing these penalties?

I welcome the opportunity to discuss this with you in more detail and provide any assistance in stopping the spread of COVID while ensuring that our retail employees are not placed on the front lines of enforcing this ordinance and putting themselves in harm’s way – physically and mentally.

Thank you in advance for your consideration of our concerns. If you have any questions or would like to discuss in more detail, please do not hesitate to reach out to me directly at cra@calretailers.com or 916/443-1975.

Sincerely,

Rachel Michelin
President

Hello!

The website isn't working properly and I cannot submit my vote.

<https://publiccomment.bos.lacounty.gov>

I'd like to submit my votes for the following items:

S1 - OPPOSE
12 - OPPOSE
73A - OPPOSE
73B - OPPOSE

I am a resident of Los Angeles County and would like my vote to be counted!

Thank you.
Best,
Danielle Savka

I am writing on agenda item 73-B-Evaluation of Covid-19 Vaccine Requirements for Indoor Public Spaces. I strongly OPPOSE.

There are multiple legitimate reasons for a person to choose not to be injected, including religious and medical. This is absolute and must be protected. Violating personal choice is a line that cannot be crossed.

Forcing people to be injected with experimental substances that may have negative side effects including death, as documented on VAERS, is a violation of civil rights and would cause far more harm than good. These are not traditional vaccines and there are no long term studies that warrant determining them “safe” at this time.

This measure would have a terrible impact on business and the county’s overall economy. It could force many to shut down, particularly small business many of which are barely hanging on since the lockdowns. Placing an increased burden on show owners could easily stop them from being able to function, forcing many to move elsewhere.

The data has shown from the beginning that the survival rate is nearly 100%, and that the overwhelming majority of cases are mild and don’t require hospitalization. The data shows there are underlying conditions present in nearly all Covid deaths.

Of course I have sympathy for any person that dies for any reason. This includes the massive increase in suicides, since

the lockdowns began, particularly among teenagers. Also massive increases in domestic violence, child abuse, depression, anxiety, alcohol and drug overdose, and alcohol and drug related injury. These are likely to increase with further mandates violating an individual's civil rights to their own body and freedom of choice. I hear nothing about *health*, only about "the vaccine". There are safe and effective treatments available to treat Covid, and many preventative measures that can be taken. The real solution is readily available information about immune strengthening for creating good health. Telling healthy people they must inject themselves to simply be able to live and function, buy groceries and take care of their families, is a horror of unimaginable sorts. If you let this pass, it opens the door to other violations and more rights being taken away.

Memo on COVID Vaccination Mandates

Liberty Counsel is a national nonprofit litigation, education and public policy organization advancing religious freedom, the sanctity of human life, and family. We have engaged in extensive litigation regarding civil rights violations ostensibly justified by “COVID-19.” We have had great success on behalf of our many clients at circuit courts of appeal and at the United States Supreme Court. See, e.g., *Harvest Rock Church v. Newsom*, No. 20A137, 2021 WL 406257 (U.S. Feb. 5, 2021); *Harvest Rock Church v. Newsom, Gov. of CA*, No. 20A94, 2020 WL 7061630 (U.S. Dec. 3, 2020); *Elim Romanian Pentecostal Church v. Pritzker*, 962 F.3d 341 (7th Cir. 2020); *Maryville Baptist Church, Inc. v. Beshear*, 957 F.3d 610 (6th Cir. 2020). The existence of COVID-19 does not justify the numerous violations of fundamental individual, economic and religious liberties. These include the rights of personal autonomy and bodily integrity, and the right to accept or reject the various COVID vaccines based on religious belief or other grounds.

COVID Vaccines Cannot Be Mandatory Under Emergency Use Authorization

On the issue of the COVID vaccines: all of such have been released under an Emergency Use Authorization (“EUA”) and employers (religious and non-religious alike) may not condition continued employment on taking an EUA-authorized COVID vaccine.

The COVID vaccines are in a special category and cannot be treated like FDA licensed vaccines. None of the COVID vaccines are FDA licensed; nor have they received full FDA approval. Rather, their approval is under the special provision noted above as EUA. This means that there is not enough data (which includes duration of testing) for the FDA to render a final approval. More importantly, no one, including private employers, may coerce individuals (by threatening their employment or otherwise) to take an EUA vaccine. Federal law requires full and informed, voluntary consent.

All employees – whether employed by religious organizations, or not – are protected against mandated COVID-19 vaccines, under [21 U.S.C. §360bbb-3](#), which provides that EUA products (like all of these vaccines) require (as a condition of emergency approval) that **people have “the option to accept or refuse administration of the product.”** “FDA has an obligation to ensure that recipients of the vaccine under an EUA are informed... that **they have the option to accept or refuse the vaccine.**”¹ (emphasis added). There is no exception in the statute for “private employers” as opposed to government; or for religious or non-religious employers. All EUA vaccines are optional.

¹ <https://www.eeoc.gov/wysk/what-you-should-know-about-covid-19-and-ada-rehabilitation-act-and-other-eeo-laws>

Moreover, at the Centers for Disease Control Advisory Committee on Immunization Practices (ACIP) meeting held in August 2020, CDC-ACIP Executive Secretary Amanda Cohn, MD confirmed the non-mandatory nature of an EUA vaccine: “**under an Emergency Use Authorization, an EUA, vaccines are not allowed to be mandatory.** So, early in this vaccination phase, individuals will have to be consented and they won’t be able to be mandated.” (emphasis added).²

COVID Vaccines Cannot Be Mandatory Under Title VII

In general, employee vaccine religious exemption requests must be accommodated, where a reasonable accommodation exists without undue hardship to the employer, under Title VII of the Civil Rights Act of 1964.

Many people hold sincere religious beliefs against taking any vaccines, or taking those derived from aborted fetal cell lines, or taking those sold by companies that profit from the sale of vaccines and other products derived from abortion.

Title VII, as amended, prohibits two categories of employment practices. It is unlawful for an employer: “(1) to fail or refuse to hire or to **discharge any individual, or otherwise to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment**, because of such individual’s race, color, **religion**, sex, or national origin; or (2) to limit, segregate, or classify his employees or applicants for employment in any way which would deprive or tend to deprive any individual of employment opportunities **or otherwise adversely affect his status** as an employee, because of such individual’s race, color, **religion**, sex, or national origin.” 42 U.S.C. § 2000e–2(a). (Emphasis added).

By pattern and practice, virtually every employer in America has shown that reasonable accommodations and alternatives to vaccination indeed exist for employees, and these have been required all along since the inception of COVID: self-screening with temperature checks, wearing personal protective equipment (PPE), and complying with other safety protocols until the number of COVID infections work their way down to acceptable levels. Logically, if these measures are and were effective at preventing the spread of COVID, they will continue to be effective. Thus, no employer can claim an undue hardship by allowing employees to do what they have been doing for over a year, in the alternative to a vaccine.

Liberty Counsel’s interpretation of Title VII is also supported by the footnoted, linked press releases from the Equal Employment Opportunity Commission (EEOC)³ and the U.S. Department of Justice (US DOJ).⁴ It is unlawful for employers to force vaccinations on staff and employees holding religious convictions against a vaccine, and to refuse a reasonable accommodation. This goes for healthcare industry employers. In 2018, one hospital paid \$89,000 to settle a suit after refusing to accommodate and firing employees who declined flu vaccinations based on their religious beliefs. US DOJ sought compensatory damages on behalf of a nursing home employee against whom Ozaukee County, Wisconsin discriminated.

Singling Out Employees For Individual Questioning or Adverse Action Under the ADA, GINA and Title VII

In interpreting the Americans With Disabilities Act (“ADA”), the **EEOC** has opined that it

² <https://www.youtube.com/watch?v=p0zCEiGohJs&list=PLvvp9iOILTQb6D9e1YZWpbUvzfptNMKx2&index=43>. See Minute 1:14:40

³ <https://www1.eeoc.gov/eeoc/newsroom/release/1-12-18.cfm?renderforprint=1>

⁴ <https://www.justice.gov/opa/pr/justice-department-files-lawsuit-against-ozaukee-county-wisconsin-religious-discrimination>

is improper to “ask only one employee—as opposed to asking all employees—questions designed to determine if [he] has COVID-19, or require that this employee alone have [his] temperature taken or undergo other screening or testing[.]” “If an employer wishes to ask only a particular employee to answer such questions, or to have [his] temperature taken or undergo other screening or testing, the ADA requires the employer to have a reasonable belief based on objective evidence that this person might have the disease.”⁵ EEOC has also stated that an employer may not “**ask an employee who is physically coming into the workplace whether they have family members who have COVID-19 or symptoms associated with COVID-19,**” as such is a violation of the Genetic Information Nondiscrimination Act (GINA).⁶

The **Occupational Safety and Health Administration** (OSHA) has also recognized that there is “**not evidence that COVID-19 vaccines prevent transmission of the virus from person-to-person,**” and reiterated that employers should not improperly distinguish between employees.⁷ (Emphasis added). “The most effective COVID-19 prevention programs ... include the following elements:”

15. Not distinguishing between workers who are vaccinated and those who are not: Workers who are vaccinated must continue to follow protective measures, such as wearing a face covering and remaining physically distant, because at this time, there is not evidence that COVID-19 vaccines prevent transmission of the virus from person-to-person. The [CDC explains](#) that experts need to understand more about the protection that COVID-19 vaccines provide before deciding to change recommendations on steps everyone should take to slow the spread of the virus that causes COVID-19.⁸ (Emphasis original and added).

On May 22, 2021, OSHA’s reversed the following guidance regarding whether adverse reactions experienced by employees who take the shot under certain conditions or arrangements are recordable on OSHA’s recordkeeping log⁹:

If I require my employees to take the COVID-19 vaccine as a condition of their employment, are adverse reactions to the vaccine recordable?

If you require your employees to be vaccinated as a condition of employment (i.e., for work-related reasons), **then any adverse reaction to the COVID-19 vaccine is work-related.** The adverse reaction is recordable if it is a new case under 29 CFR 1904.6 and meets one or more of the general recording criteria in 29 CFR 1904.7.¹⁰ (Emphasis added).

I do not require my employees to get the COVID-19 vaccine. However, I do recommend that they receive the vaccine and may provide it to them or make arrangements for them to receive it offsite. If an employee has an adverse reaction to the vaccine, am I required to record it?

No. Although adverse reactions to recommended COVID-19 vaccines may be recordable under 29 CFR 1904.4(a) if the reaction is: (1) work-related, (2) a new case, and (3) meets one or more of the general recording criteria in 29 CFR 1904.7, OSHA is exercising its enforcement discretion to only require the recording of adverse effects to required vaccines at this time. **Therefore, you do not need to record adverse effects from COVID-19 vaccines that you recommend, but do**

⁸ *Id.*

⁹ <https://www.osha.gov/coronavirus/faqs#worker>

¹⁰ <https://www.osha.gov/coronavirus/faqs#vaccine>

not require. (Emphasis added).

Note that for this discretion to apply, the vaccine must be truly voluntary. For example, an employee's choice to accept or reject the vaccine cannot affect their performance rating or professional advancement. An employee who chooses not to receive the vaccine **cannot suffer any repercussions from this choice. If employees are not free to choose whether or not to receive the vaccine without fearing adverse action, then the vaccine is not merely "recommended"** and employers should consult the above FAQ regarding COVID-19 vaccines that are a condition of employment. (Emphasis added).¹¹

On May 22, 2021, OSHA's updated FAQ stated as follows:

[Are adverse reactions to the COVID-19 vaccine recordable on the OSHA recordkeeping log?](#)

DOL and OSHA, as well as other federal agencies, are working diligently to encourage COVID-19 vaccinations. OSHA does not wish to have any appearance of discouraging workers from receiving COVID-19 vaccination, and also does not wish to disincentivize employers' vaccination efforts. As a result, OSHA will not enforce 29 CFR 1904's recording requirements to require any employers to record worker side effects from COVID-19 vaccination through May 2022. We will reevaluate the agency's position at that time to determine the best course of action moving forward.¹²

Finally, questioning employees (much less taking adverse employment action against them) on the basis of church membership or church attendance potentially violates not only the ADA, but also Title VII, which prohibits discrimination based on religious worship or religious practices engaged in by the employee outside the workplace.

Conclusion

There are strong protections under federal law for persons who wish to decline the current EUA-authorized COVID vaccines. Neither government nor private employers may force anyone to receive any of the COVID injections.

August 9, 2021

To: The Los Angeles County Board of Supervisors

From: M. Williams, District 4

RE: Agenda Item 73-B for 8/10/2021 Meeting

This serves as written public comment concerning Agenda Item 73-B for the Board meeting of August 10, 2021.

With all due respect, this is a misguided motion. There are many reasons that are personal to each person for why they choose to forego the Pfizer, Moderna or J&J injection(s). To severely restrict those persons who have chosen to forego the injection(s) at this time is punitive and persecutorial, and it inflicts severe hardship on single and single-parent households especially.

The Board Members speak of using an equity lens, being inclusive and having an anti-racism policy, but I submit to you that these proposed severe restrictions will have the greatest negative impact on communities of color, who according to your own data are the least vaccinated population in the county. The people of these communities are without generational wealth, hard assets and trust funds. They don't make the six figure salaries that you do, and most don't have savings and pension funds, that you no doubt enjoy. They work mostly hourly and paycheck to paycheck. After the last year and a half that all of us have endured, many have already lost so much, and many anticipate the loss of their housing when the eviction moratorium ends. The people who will most be losing jobs, housing and businesses because of this motion will be these very same people you claim to care about.

I have listened to several of the Board Members calling people names, speaking negatively and derogatorily of those who have not been injected. You blame them for the increased spread of the disease. But you don't know their reasons. For instance, do you know what it's like to be victimized by medical error by medical professionals and there is no accountability, resources or recourse to address that. Do you know what it's like as a dependent, to have a sole parent go into a hospital walking and talking for a minor routine procedure and be sent back on a stretcher paralyzed and unable to speak for more than a decade until death because of medical malpractice. I doubt you do. And do you know the impact and trauma of going to the hospital to be treated for a health issue that flared up only to have a medical professional improperly administer the needle and medicine which resulted in necrosis to that part of the body and necessitated prosthetic replacements. Somehow, I doubt any of you do. These are traumatic events.

And it really doesn't help to say that whatever adverse reactions there may be are rare. Nobody wants to be that "rare" case—the exception to what normally happens, especially when there is no recourse, relief or help with whatever that rarity turns out to be. If you are

your sole support for yourself or your children, it is not a risk to take lightly because you, as that rare victim, and those children, are stuck with that outcome for the rest of your life. Will you be left a virtual vegetable? Will you be left requiring some sort of assisted care for the rest of your life? Where will the money for any medical attention to address it come from? These are not things to take lightly or rush headlong into simply because other people want you to do it. What one person can risk, another cannot. No one can decide for another person, what that other person can risk or not risk for his/her life.

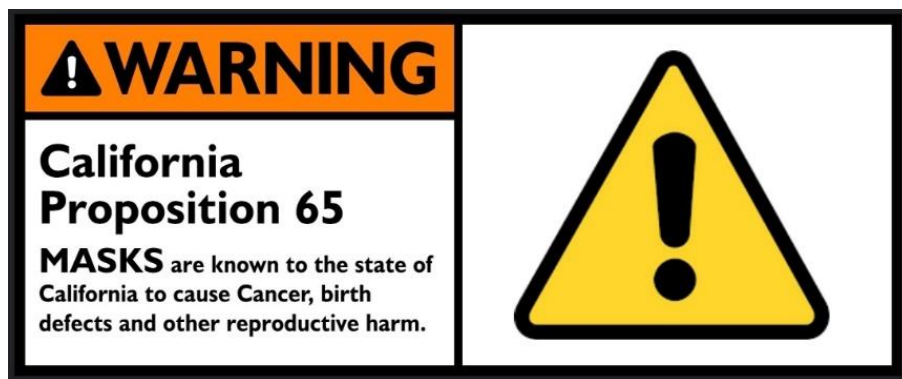

Other people aren't going to take care of you, and no one has the right to demand through coercion what someone else must have injected into them under penalty of the loss of their job, their housing, their livelihood. That is wrong! Those who are not injected do not value their lives any less than anyone else, but they are also not to blame for what is happening. And it is destructive, divisive and mentally traumatizing to blame them for what is happening. It's just plain wrong!

This item represents a cruel and beastly direction the Board is taking, and it will inflict great and inequitable harm on those communities of color who are doing the best they can just to survive. If you take away their ability to work, their liberty to go about doing things they need, to do freely, and their ability to enjoy the simple pleasures of life, you leave them with no way to live and no way out. It will result in unnecessary additional mental anguish, depression and suicides because you have taken away all hope. In effect you have taken from them their right to life, liberty and the pursuit of happiness. It is beastly cruel and heartless and all because those who are injected want to return to their life of eating, drinking, merrymaking and unmasking. This is wrong!

I will leave you with one last thought. At the start of the pandemic no one was injected—not patients nor medical professionals. Now, the same medical professionals who worked so hard and bore the greatest burden of this pandemic are given an ultimatum (from the governor). That is ungrateful, unappreciative and a slap in their face. More than that, it is shortsighted when long before the pandemic there was a shortage of nurses and other medical staff especially in the hard-hit communities of color. Now, with this move, the shortage will be greater and which community do you think will be the most negatively impacted by it. As Dr. Ghaly had said before, it's not a matter of not having the beds, but not having enough staffing for the beds. So, getting rid of badly needed and experienced medical staff is a very bad decision.

I urge you NOT to pass this motion but to unanimously vote No on it.

M. Williams
District 4

SMALL BUSINESS ALERT!!!

Dear Business owner, our group is increasingly concerned the State of CA and other government agencies are making illegal “orders” around masks, PCR testing, & vaccines--then passing liability down to businesses. This shifting of liability could cause businesses to break the law, and shut down many businesses for good!!

The following has come to our attention, which may impact your small business:

- **There is no legal “mask mandate” in California** (Law or Exec. Order, though an EO is not legal) [CA Govt Code (“GOVT”) §§ 8565 through 8474 (“ESA”); GOVT § 8567(d)]
- **Persons who are denied their civil rights accommodations (disability, religious, etc.) can SUE YOU** individually for denying them entry mask/shield free, and also your employees – creating a liability for business owners [CA Civil Rights Act aka UNRUH CIV § 51]
- **Businesses may be wrongly told to call the Sheriff or deny no mask/shield entry under “Trespass”**, when CA law specifically exempts customers entering a business open to the public (it is not private), and people exercising their civil rights, from Trespass. Should someone be arrested, you could be charged with “False Arrest” & also subjected to a wrongful arrest civil lawsuit. [CA Penal Code §602(o)]
- **Masks/shields/PCR/C-19 Vaccine are experimental medical procedures – you may not require them** under CA law; they require SIGNED informed consent of ALL known dangers & opting out. [FDA; California Health & Safety Code (“HSC”) §24172, §24173, §24175, § 26009-26010]
- **Chemicals in masks/shields/PCR are on the Prop 65 list¹**, and cause (at a minimum) the following: Cancer, birth defects, reproductive harm, and learning disabilities. If your business is asking or requiring people to wear masks/shields, giving out, or selling them--you MUST post a sign similar to the one above on your mask sign, & any place you give away or sell masks. You can be fined \$2,500 per day per incident, and also sued, for failing to do so. [Title II, Div. 4 CA Code of Regulations; HSC §25249.7(e) & (f)]

Become familiar with these laws, & post Prop 65 “warning” signs--protect your small business!!

NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS MANDATING COVID-19 VACCINES

Revised 6/4/21

This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely “may be effective.” Federal law states:

Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:

individuals to whom the product is administered are informed—

- (I)** that the Secretary has authorized the emergency use of the product;
- (II)** of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). The court held: “...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs.” *Id.* at 135. No court has ever upheld a mandate for an EUA vaccine.

The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.

LA County Government

CEO, Chief Executive Office
500 W. Temple St., Room #358
Los Angeles, CA 90012

Dear whom it may concern,

May this letter find you all in good health and spirit. Greetings, my name is Erica Singsay and I am writing this letter in regards to opposing these bills that you all are trying to pass. I am opposing bill number 21, 73A, and 73B. If this bill passes it is stating that we are still living up to the $\frac{3}{5}$ compromise which falls under the 13 Amendment. In hence, stating that we as a human being have no rights and we are still own and are properties to your governmental biological warfare experiments. While having rights in America as human beings, we then should have rights to our body and choices. So this is why I am opposing these bills, because you guys are contradicting yourself with the law taking off the 13 Amendment of $\frac{3}{5}$ compromise. Instead, your governmental officials and politicians are still enforcing the $\frac{3}{5}$ compromise by being secretive and using tricknology on humankind by trying to pass the 21, 73A, and 73B bills.

Sincerely,

Erica Singsay

Erica Singsay

Dear County Board of Supervisors

Mandating Vaccination to reduce the spread of Covid is misguided. Israel has one of the highest vaccination rates in the world and the Health Ministry has discovered that the infection rate of vaccinated individuals is the same as unvaccinated individuals. The vaccines are not stopping the Delta variant. See the chart below.

Forcing an experimental Vaccine on individuals that will not reduce the spread of Covid is unconscionable, considering that increasing individual's immune systems using Vitamin D, C, Zinc and Quercetin, would do more to protect the population. Ivermectin has successfully prevented and treated Covid infections throughout the world including a 93% reduction in cases in India during their recent surge. See www.FLCCC.net for more details and protocol specifics and Ivermectin study results.

Do not require vaccination for County Employees or the general public as it will cause more harm than good. See the CDC VAERS database showing 12,000 deaths due the Vaccine and thousands of heart and circulatory problems in young men.

Israel Confirmed Cases, June 27 th – July 3 rd , Vaccinated vs. Unvaccinated

As a veteran, I am deeply saddened that we have come to a place in history where in the USA we are even having this discussion

This current experimental medical procedure, that is being asked of people in order to be a part of society again, HAS NOT been approved by the FDA. It has only been given Emergency Use Authorization (EUA) under the PREP act. Therefore, under this classification, anyone that agrees to take this experiment accepts all liability. The vaccine company, employer, private companies, schools are NOT liable. The individual alone accepts any and all liability, and will continue to do so once the FDA does give full approval (see 1986 Vaccine Injury Law).

The CDC continues to say that this experiment is safe and effective, but no medical intervention, procedure, or medication is completely safe and effective. There is always a risk. Read the inserts. Even by their own admission, this is only effective for 95% of the population (although there is debate on this still, please see BMJ editorial by Peter Doshi Jan 2, 2021). Medical decisions are to be made by the individual, not by the government or by private companies. Phase 3 of these experiments do not end until Oct 2022 for Modern and October 2023 for Pfizer.

As of July 7, 2021, VARES reported the number of deaths from this experiment is 9,048, with 438,440 adverse reactions, 26,818 hospitalizations, 56,970 in urgent care, 90,269 office visits, 2,152 anaphylaxis, 2,486 Bell's palsy. Doctors in Lubbock gave testimony in Texas about seeing young adults, 18/19 with severe neurological issues after being given this experiment. Therefore, it is a false conclusion to say that this medical treatment safe and effective.

Under the 14th Amendment, we have the right to equal protection of the law and our freedoms are not contingent on whether we decide to be a part of this ongoing experiment. I urge you to take a stand against tyranny and vote no on any legislation that would hinder our rights as free citizens in a free country.

Thank you for your time.

Protection of previous SARS-CoV-2 infection is similar to that of BNT162b2 vaccine protection: A three-month nationwide experience from Israel

Abstract

Worldwide shortage of vaccination against SARS-CoV-2 infection while the pandemic is still uncontrolled leads many states to the dilemma whether or not to vaccinate previously infected persons. Understanding the level of protection of previous infection compared to that of vaccination is critical for policy making. We analyze an updated individual-level database of the entire population of Israel to assess the protection efficacy of both prior infection and vaccination in preventing subsequent SARS-CoV-2 infection, hospitalization with COVID-19, severe disease, and death due to COVID-19. Vaccination was highly effective with overall estimated efficacy for documented infection of 92.8% (CI:[92.6, 93.0]); hospitalization 94.2% (CI:[93.6, 94.7]); severe illness 94.4% (CI:[93.6, 95.0]); and death 93.7% (CI:[92.5, 94.7]). Similarly, the overall estimated level of protection from prior SARS-CoV-2 infection for documented infection is 94.8% (CI:[94.4, 95.1]); hospitalization 94.1% (CI:[91.9, 95.7]); and severe illness 96.4% (CI:[92.5, 98.3]). Our results question the need to vaccinate previously-infected individuals.

Keywords: vaccine efficacy, COVID-19, SARS-CoV-2, previous infection, protection from reinfection

Introduction

Israel is currently in the later stages of a vaccination campaign to reduce both SARS-CoV-2 infection and the number of COVID-19 cases. Israel is administering the BNT162b2 vaccine, developed by BioNTech in cooperation with Pfizer,¹ for which an Emergency Use Authorization (EUA) was issued by the Food and Drug Administration (FDA).² The vaccine is administered in two doses, with a 21-day interval between doses. Israel launched its COVID-19 vaccination program on December 20, 2020. The vaccine became available, free of charge, to different risk groups in stages: first to those older than 60 years old, nursing home residents, healthcare workers, and patients with severe comorbidities, and then gradually to younger age groups. As of February 6, 2021, the vaccine was made available to all individuals aged 16 or older not previously infected by SARS-CoV-2. As of March 20, 2021, 77% of the eligible population is vaccinated. Due to the high caseload and the local detection of viral mutants such as B.1.1.7, Israel went into a third nationwide lockdown during the vaccination campaign. A light lockdown began on December 24, 2020, and was tightened on January 5, 2021. Restrictions were eased in stages starting February 7, 2021. The dynamics of the epidemic as well as the vaccination campaign appear in Figure 1.

SARS-CoV-2 testing in Israel is carried out according to the following policy: individuals may request testing due to either symptoms or contact with an individual who tested positive. These PCR tests are given free of charge. Individuals who have come into contact with an individual who tested positive are required to self-quarantine for 14 days. This quarantine period may be shortened to 10 days if the individual is tested twice during the first 10 days, and both test results are negative. Individuals who have received both vaccine doses, and had the second dose seven days or more before a contact with a positive individual, and do not have symptoms, are not required to self-quarantine, and thus have

less motivation to get tested. In addition to voluntary testing, Israel conducts routine testing of all nursing-home workers.

Recent results based on aggregated data³⁻⁵ and individual level data⁶⁻¹⁰ have shown that the vaccine substantially reduces the number of severe COVID-19 cases. Two studies also indicate that the viral load of vaccinated individuals is significantly reduced.^{11,12} These encouraging initial results are based on a short follow-up of vaccinated individuals. Results on previous COVID-19 infection¹³⁻¹⁶ suggest protection against reinfection compared to uninfected unvaccinated individuals.

In this study, we estimate the efficacy of the vaccine in the reduction of documented SARS-CoV-2 infection and severe COVID-19 disease. We focus on four cohorts: unvaccinated individuals; vaccinated individuals followed from first dose to a week after the second dose; vaccinated individuals followed from a week after the second dose onwards, and the Recovered Cohort of unvaccinated individuals previously infected with SARS-CoV-2. For more details, see the Methods section. All efficacies, of vaccine or previous infection, are compared to the unvaccinated cohort.

The prospective observational analysis that we present faced several challenges. The first challenge was self-selection of treatment, which implies differences in potential risk factors between vaccinated and non-vaccinated individuals. These include age, sex, socio-demographic level,¹⁷ level of infection in the immediate environment, and possibly other behavioral variables that could affect level of exposure to the virus. The second challenge was detection bias: willingness to undergo vaccination can be associated with trust in the healthcare system, which may also imply a tendency to comply with testing regulations. On the other hand, vaccinated individuals may feel more protected and may ignore mild symptoms indicative of the disease, and have less motivation to get tested as they are not required to self-quarantine after a contact with a positive individual. The third challenge was the variation in infection risk throughout the vaccination campaign, mainly due to varying lockdown levels, relative prevalence of viral mutants, and local outbreaks. Lastly, the status of individuals (i.e., unvaccinated, partially vaccinated, or fully vaccinated) was

dynamic: with time, individuals move from one cohort to another, and between risk groups. In the Methods Section we explain how we designed the analysis to address these challenges.

Methods

Data

The database included two main tables. The first table was of all 1373 municipalities in Israel, with data on the number of residents, the daily count of PCR tests, and the daily positive results. This table was constructed based on data from the Israel Ministry of Health and the Israel Central Bureau of Statistics.

The second table was an individual-level table on persons aged 16 and above collected by the Israeli Ministry of Health based on data received routinely from all HMOs and hospitals and linked using the person's identity number. This table contained basic demographic data and information on dates of first and second vaccinations, if received, and dates and results of all PCR tests performed from March 1, 2020, up to March 20, 2021. For individuals with a positive PCR test, the table contained information on symptoms, as well as the maximum severity status throughout the course of the disease (hospitalization, severe disease, death). The definition of hospitalization, severe disease, and death due to COVID-19 is based on international recommendations.¹⁸ Specifically, hospitalization is defined as being admitted due to COVID-19. Disease is considered severe when a patient has >30 breaths per minute, oxygen saturation on room air $<94\%$, or ratio of arterial 148 partial pressure of oxygen to fraction of inspired oxygen <300 mm mercury. Data on symptoms were also available but we found them less reliable and thus did not include symptomatic COVID-19 as an outcome.

Thus, the table contained an entry for every adult (age ≥ 16) in Israel who had at least one PCR test or had received at least the first dose of the vaccine (with a total of 5,682,928 entries). Adults with no PCR test and no vaccination (668,975) were added to the table using data from the Israel Central Bureau of Statistics. Thus, this second table included

6,351,903 entries with basic demographic data of the total adult population in Israel, as well as their PCR tests and vaccination dates. Individuals under age 16 are not eligible for vaccination and were excluded from this study. A summary of the data appears in Table 1.

To account for environmental risk, we calculated a municipality daily risk index by the number of cases newly confirmed in the past seven days per 10,000 residents. We used a 7-day moving average since the number of PCR tests typically drops at weekends. The index was categorized into four risk levels (up to one, one to four, four to ten, and more than ten daily cases per 10,000) to yield the municipality daily risk category, and was used as a covariate in the risk model.

Behavioral differences among people may result in different levels of exposure to infection and compliance with PCR testing guidelines. We partially accounted for this by counting the number of PCR-test clusters that an individual underwent from March 1, 2020, to December 20, 2020 (i.e., prior to the vaccination program). Here, a PCR-test cluster comprised all consecutive tests performed within 10 days of each other. We then defined three individualized background risk levels: no PCR tests, one cluster, and two or more clusters, and this covariate was also included in the risk model. For previously-infected individuals, we set the level to one cluster and checked sensitivity to this value. Note that the time interval for defining this variable (up to December 20, 2020) did not overlap with the follow-up period.

In addition to estimating vaccine efficacy, we estimated the protection of prior SARS-CoV-2 infection against a recurrent infection. Thus, we also included in the dataset individuals who had recovered from COVID-19. Recovery from SARS-CoV-2 infection is not well-defined, and individuals may continue to show traces of the virus weeks and sometimes even months after the infection.¹⁴ We defined as a recurrent infection only cases occurring three months or more after the first diagnosis. We also considered only individuals for whom the first infection was diagnosed between June 1 and September 30, 2020, as the PCR results before June 1 are considered less reliable. Hence, individuals infected before

June 1, 2020 or between October 1, 2020 and December 20, 2020 were excluded from the analysis.

Statistical Modeling

To estimate the efficacy of the Pfizer BNT162b2 vaccine in reducing documented SARS-CoV-2 infection and other COVID-19 events, we considered four dynamic sub-populations or cohorts:

- Cohort 0: Unvaccinated and not previously infected with SARS-CoV-2;
- Cohort 1: Vaccinated and followed from the day of first vaccination to 6 days after the second dose;
- Cohort 2: Vaccinated and followed from a week after the second dose onwards;
- Recovered: Unvaccinated and previously diagnosed with SARS-CoV-2 between June 1 and September 30, 2020.

On any given calendar day, each individual included in the analysis belongs to a single cohort, but cohort membership is dynamic. Moreover, individuals may not only move between cohorts over time (for example, from cohort 0 to cohort 1 after first vaccination, or from cohort 1 to cohort 2 at 7 days after the second vaccination), but also exit from the follow-up (for example, on infection with SARS-CoV-2 or death). The outcomes hospitalization, severe disease, and death, were attributed to the date on which COVID-19 was documented.

We modeled the daily risk of each individual from December 20, 2020 to March 20, 2021, as a function of calendar time, the cohort to which the individual currently belonged, and the individual's current risk factors, which included fixed covariates: age group (16-39, 40-49, 50-59, 60-69, 70-79, and 80+), sex, and background risk level (0,1, and 2+ past PCR tests), and the time-dependent variable: municipality risk level(low, medium, medium-high,

and high). We refer to each combination of possible covariate values (age group, sex, background risk level, and municipality risk level) as the risk profile.

Our analysis model falls within the framework of multi-state survival models, where each cohort represents a separate state;¹⁹ see Figure S1. Similar to the study of mRNA-1273, the vaccine developed by Moderna,²⁰ we defined the efficacy of the vaccine in terms of hazard ratios, where the main interest is in comparing the hazard of a non-vaccinated individual (Cohort 0) to that of an individual who had completed the recommended protocol (Cohort 2). Hazard ratios between cohorts and for each adjusting covariate were estimated via a generalized linear model with a Poisson distribution and logarithmic link function, and an offset for each risk profile.²¹

Our model assumes that for a given cohort and risk profile, the hazard was constant and did not depend on the time from the second dose (Cohort 2). Obviously, the hazard of individuals who have never received the first dose (Cohort 0) cannot depend on the time of the first dose, but we also assumed that the time elapsed from the second vaccination did not affect the hazard in Cohort 2. In other words, we assumed that the protection level did not change with time after the “completion” of the vaccination protocol. While protection by vaccination is expected to decrease in the long run, our assumption is reasonable given the time frame of only three months after first vaccination, where waning immunity is not expected to play a role. We split Cohort 1 into two sub-cohorts: Cohort 1A from the first dose to two weeks after the first dose, and Cohort 1B from 15 days after the first dose to six days after the second dose. Following Skowronski and De Serres,²² we considered, as a crude approximation, a constant hazard for each of these two sub-cohorts for every risk profile. To estimate the level of protection among the Recovered Cohort, we made a similar assumption, that the time elapsed from SARS-CoV-2 infection did not affect the hazard ratio.

The formal definition of vaccine efficacy adopted was as follows. Consider any particular risk profile. Let h_i denote the hazard of an individual in one of the vaccinated cohorts 1A, 1B, 2, or Recovered, and let h_0 be the hazard of an individual having the identical risk

profile in the unvaccinated group. Efficacy of the vaccine in that cohort for that risk profile is defined as $1 - h_i/h_0$. Note that the calendar time affects the hazards of the different cohorts only via the time-dependence of the municipality risk level. From the model assumptions, the ratio h_i/h_0 is the same for each risk profile, so the estimate of vaccine efficacy may be combined over all the risk profiles. For more details about the model, see Appendix. We analyzed efficacy separately for each of the following outcomes: documented infection, hospitalization, severe disease, and death.

Results

The data are based on follow-up of the four cohorts from December 20, 2020 up to March 20, 2021, with over 573 million person-days of follow-up. The lengths of follow-up for the fully vaccinated and the recovered cohorts appear in Figures S2 and S3, respectively. During this time 4,606,247 PCR tests were performed (8,040 per million person-days), and 306,712 individuals tested positive (5.4 infections per 10,000 person-days). Of those testing positive, 14,019 (4.6%) required hospitalization, 8,463 (2.8%) were defined as severe cases, and 2,727 (0.9%) died. Table 2 presents these numbers by cohort and age group. The numbers of PCR tests performed per million person-days appear in Table 3. There is a decrease in the rate of PCR testing in both Cohort 2 and the Recovered Cohort compared to the other cohorts. This is likely since fully vaccinated or recovered individuals (Cohorts 2 & Recovered) are more protected against SARS-CoV-2 infection. Additionally, people in Israel need to self-quarantine for 14 days after contacting SARS-CoV-2 infected persons, which can be shortened to ten days if they present two negative PCR tests. This is not required for fully vaccinated and recovered persons unless they develop symptoms.

We first investigated the dynamics of the vaccination program, disease outcomes, PCR testing, and municipality risk as a function of calendar time. Figures S4 and S5 present the proportion of vaccinated over time among different age and municipality risk groups, respectively. As can be seen from Figure S4, the Israeli vaccination policy was initially to immunize the older population, and as time progressed, younger age groups. Figure S5 shows the association between environmental risk and vaccination. Figure S6 shows the

rates over time of the different age groups among those tested, infected, hospitalized, having severe disease, and dying. Table 4 shows, by age group, the estimated vaccine efficacy for the main outcomes for Cohort 2 (fully vaccinated) adjusted for sex, municipality risk, and past PCR. Note that for age groups below 60 years, there were, fortunately, none or very few events of severe illness and death, and thus estimates were omitted for these groups. The table shows that vaccine efficacy was quite similar in all age groups with some decrease in efficacy for the 80+ age category. Fitting a model without age-group/cohort interaction yielded overall vaccine efficacy for documented infection of 92.8% (CI: [92.6, 93.0]); hospitalization 94.2% (CI: [93.6, 94.7]); severe illness 94.4% (CI: [93.6, 95.0]); and death 93.7% (CI: [92.5, 94.7]). We repeated the analysis with full vaccination defined as 15 days or more after the second dose. The results are similar (not shown).

Table 5 presents the results for the Recovered Cohort when the past PCR-based individualized risk was set to one PCR cluster. Again, the protection was quite similar in all age groups with some decrease in efficacy for the 80+ age category, and quite similar to the results in Table 4. The overall estimated protection of prior SARS-CoV-2 infection for documented recurrent infection was 94.8% (CI: [94.4, 95.1]); hospitalization 94.1% (CI: [91.9, 95.7]); and severe illness 96.4% (CI: [92.5, 98.3]). As there were only 1 death cases in the Recovered Cohort, protection against death was not estimated.

As described above, we assigned the recovered individuals to the middle PCR risk group, so that the estimated protection of a prior infection is compared to unvaccinated individuals having a single PCR cluster in the past. The protection levels afforded by a prior infection compared to unvaccinated persons who had no or 2+ past PCR tests are given in a sensitivity analysis shown in Table S1. In addition, Table S1 presents results of a model without PCR, which can be interpreted as the overall protection of a prior infection. As expected, the protection of a prior infection compared to unvaccinated persons who did not have past PCR tests is estimated to be smaller and compared to those who had 2+ tests is larger. The results when omitting the PCR variable are very similar to the figures in Table 5.

The results for Cohorts 1A and 1B appear in Tables S2 and S3, respectively. The results up to two weeks after the first dose (Cohort 1A) suggest low but statistically significant efficacy. For Cohort 1B that comprises individuals at more than two weeks after the first dose, the efficacy is higher, being 57.7% (CI: [57.1, 58.4]) for documented infection; 69.4% (CI: [67.5, 71.2]) for hospitalization; 65.9% (CI: [63.1, 68.5]) for severe illness; and 62.7% (CI: [58.0, 66.8]) for death. The coefficients of all four models used for analyzing the data appear in Tables S4-S7.

Discussion

This population-based observational study demonstrates the high efficacy of the BNT162b2 vaccine and prior SARS-CoV-2 infection against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. There are a few characteristics that make this study unique. First, it was a nationwide study and thus represented the real-world effectiveness of vaccination and prior infection on the full population. Second, it used individual-level data that enabled, at least to some degree, to mitigate biases caused by selection to get vaccinated, selection to undergo PCR testing, and time-changing level of risk, via adjustment for between-cohort differences in individuals' characteristics and municipality risk level. Third, the study included follow-up of the population for a period of three months, allowing follow-up of the fully vaccinated cohort over an extended duration. Fourth, this is the first large-scale study that has explored the protection due to prior SARS-CoV-2 infection compared to the Pfizer BNT162b2 vaccine.

There are some limitations to this observational study. One major source of confounding is related to possible population differences between individuals who were vaccinated compare to those who were not. This confounding is partially addressed by controlling for risk factors. Specifically, for each individual we adjusted for sex, age group, number of past PCR tests and the time-dependent environmental exposure. Another major source of potential bias is related to detection of SARS-CoV-2 infection. As apparent from the PCR test counts in Table 3, individuals who are fully vaccinated or were previously infected get tested less often than the unvaccinated cohort. Our results for the outcomes of

hospitalization, severe disease, and death do not suffer from this bias and thus are more reliable. The vaccine protection against infection might be biased upward as explained above, nevertheless the remarkable curtailing of the outbreak in Israel which followed the high vaccine uptake by the Israeli population further suggest that the vaccine is efficient in blocking transmission, see Figure 1.

The efficacy estimates of the BNT162b2 vaccine in this study are similar to those reported by previous large-scale studies. For the severe disease outcome, the randomized trial of BNT162b2¹ reported 89% efficacy for severe disease. A study by the Israeli Ministry of Health using aggregated data⁵ reported 96% efficacy for people as defined in our Cohort 2. A study on data from Israel's largest HMO⁶ split people as defined in our Cohort 1B and reported an efficacy of 62% and 80% for the third and fourth weeks after the first vaccine, respectively, and of 92% for their Cohort 2. In comparison, our analysis showed efficacy of 66% for Cohort 1B and 94% for Cohort 2. For other outcomes, the estimated vaccine efficacy for Cohort 2 in our study were 93% and 94%, for documented infection and hospitalization, respectively. These estimates are similar to previous studies^{5,6} that estimated efficacy of 92% and 96% for documented infection, and of 87% and 96% for hospitalization. Our findings are based on a longer follow-up and a larger number of event than in the previous individual-level data reports. For example, the analysis of severe cases in the randomized clinical trial is based on only 10 cases, and that of Israel's largest HMO on 229.⁶ In comparison, the analysis in our study is based on 8,463 cases, including 2,240 cases from Cohort 1 and 319 cases from Cohort 2. On the other hand, the other two studies^{1,6} have the respective advantages of randomization and a detailed matching process which help in bias reduction.

The estimated protection against reinfection in this study is similar to that of the BNT162b2 vaccine. For documented SARS-CoV-2 reinfection, these results are similar to the results obtained in a large study from Qatar of 95% protection,¹³ and suggest higher protection than reported by other previous studies. A large study from Denmark¹⁴ suggested 80% protection against reinfection. A study on healthcare workers in the United Kingdom¹⁶ reported that previous infection was associated with an 83% lower risk of infection. These

two studies are based on 11,727 and 6,614 previously infected individuals, with 72 and 44 reinfections, respectively. In comparison, the Recovered cohort in our study comprised 187,549 individuals, with 894 reinfections. One possible reason for the differences in the estimated protection against reinfection could be related to detection bias of SARS-CoV-2 infection. However, our estimated high levels of protection against hospitalization and serious disease after reinfection are unlikely to be affected by detection bias, and are reassuring.

An important assumption made here is that rates of infection or hazards are independent of time from vaccination. However, the rate of infection is expected to depend on time from vaccination or on time from first infection. Studying the hazard as a function of time is crucial for understanding waning immunity and for the need for additional booster vaccinations. Follow-up is currently too short to answer time-dependent questions, but this is a crucial and required next step that can be answered using the national Israeli data in the future. The hazard may also depend on calendar time, not only via environmental exposure, but also because of new variants appearing, against which, the vaccine may have different efficacy. During the period over which the data were collected, the COVID-19 variant B.1.1.7 was by far the most prevalent variant, and accounted for most of the documented cases, hence the approximation of a constant hazard is justified. Yet, it is of great importance to repeat this study in other populations in order to estimate the efficacy for other variants and vaccines.

This study suggests that both the BNT162b2 vaccine and prior SARS-CoV-2 infection are effective against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. Moreover, the effectiveness seems similar for both cohorts. This puts into question the need to vaccinate recent (up to six month) previously-infected individuals.

Table 4: Vaccination efficacy. Vaccination efficacy for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe and Death outcomes for the lowest age groups due to very low case numbers in the vaccinated cohorts.

Age	Positive	Hospitalized	Severe	Death
16-39	95.1% [94.8, 95.4]	96.5% [93.8, 98.0]	—	—
40-49	92.5% [92.0, 93.0]	94.4% [91.7, 96.2]	—	—
50-59	92.7% [92.2, 93.1]	95.0% [93.3, 96.3]	—	—
60-69	92.4% [91.9, 92.9]	96.1% [95.1, 97.0]	96.4% [95.1, 97.3]	94.0% [90.4, 96.2]
70-79	92.2% [91.6, 92.8]	94.8% [93.8, 95.6]	95.5% [94.5, 96.4]	95.4% [93.5, 96.7]
80+	85.6% [84.3, 86.7]	91.2% [89.8, 92.4]	91.9% [90.4, 93.2]	92.6% [90.6, 94.1]
Overall	92.8% [92.6, 93.0]	94.2% [93.6, 94.7]	94.4% [93.6, 95.0]	93.7% [92.5, 94.7]

Table 5: Protection of prior SARS-CoV-2 infection. Protection of prior SARS-CoV-2 infection for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe outcomes for the lowest age groups and for Death for all age groups due to very low case numbers in the previously-infected cohorts.

Age	Positive	Hospitalized	Severe
16-39	94.5% [94.1, 94.9]	92.8% [87.3, 95.9]	—
40-49	95.1% [94.2, 95.9]	95.4% [87.7, 98.3]	—
50-59	95.2% [94.1, 96.1]	93.9% [87.1, 97.1]	—
60-69	96.1% [94.6, 97.2]	95.7% [89.6, 98.2]	96.1% [87.8, 98.7]
70-79	97.0% [94.7, 98.3]	94.1% [86.8, 97.3]	98.7% [90.5, 99.8]
80+	91.4% [85.5, 94.9]	94.2% [84.5, 97.8]	94.2% [81.9, 98.1]
Overall	94.8% [94.4, 95.1]	94.1% [91.9, 95.7]	96.4% [92.5, 98.3]

Figure 1: Population dynamics. Documented new infections and cumulative vaccinated persons by date. The study period and the infection period of the recovered cohorts are marked by vertical lines.

Web Appendix: The Statistical Model

We define the efficacy of the vaccine in terms of hazard ratios. We use the following constant hazard models to describe the dynamics of an uninfected individual risk over time (calendar time and time from vaccination), where, in the most general model, each cohort has different coefficients:

$$h_i(x) = \exp\{\alpha_i + \beta_i^T x\} \quad i = 0, 1A, 1B, 2, \text{Recovered}.$$

Here x indicates a set of risk factors of an individual, including time dependent variables (municipality risk). While the model above is quite general, enabling different coefficients for the different cohorts, our basic model restricts the coefficients of sex, past PCR tests and municipality risk to be equal among the cohorts. Specifically, let

$$\beta_i^T x = \beta_{i,age} \times \text{Age} + \beta_{i,sex} \times \text{Sex} + \beta_{i,ppcr} \times \text{Past PCR} + \beta_{i,risk} \times \text{Municipal risk},$$

We assume that for $i = 0, 1A, 1B, 2, \text{Recovered}$,

$$\beta_{i,sex} = \beta_{sex}, \quad \beta_{i,ppcr} = \beta_{ppcr}, \quad \text{and} \quad \beta_{i,risk} = \beta_{risk}.$$

Thus, the effect of sex, past PCR test, and municipal risk on efficacy is multiplicative and identical among cohorts. However, efficacy may vary between different age groups.

The constant hazard assumption implies underlying exponential event-free models for these cohorts, with time-dependent covariates. The analysis can be carried out by performing Poisson regression with offsets for each risk profile. Specifically, consider a group of individuals' days in Cohort i with a certain risk profile x_0 (here the profile also includes time-dependent covariates, so only days satisfying x_0 count). The response variable is 'case count' – the number of cases among these individuals' days, and the exposure is the sum of all at-risk days for individuals with cohort and risk-profile combination (i, x_0) . Thus, the model implies

$$\frac{E(\text{case count} \mid x_0, \text{at-risk days})}{\text{at-risk days}} = \exp\{\beta_i^T x_0\}.$$

In other words, the daily hazard for an event for an individual in Cohort i and risk profile x , denoted by $h_{i,x}$, is $e^{\beta_i^T x}$. The relative risk for Cohort $i = 2$ with risk profile x is defined as $h_{2,x}/h_{0,x}$, and the efficacy is defined as $1 - h_{2,x}/h_{0,x}$. Under the assumption of equal coefficients for sex, past PCR tests and municipality risk, the relative efficacy depends only on the age group.

Technically, in order to estimate the coefficients in the model, we create a working dataset as follows. For each combination of cohort, age group, sex, municipality risk level, and individualized risk level, we count the number of COVID-19 events and the number of at-risk days. Consider, for example, a 56-year-old male who lives in Tel Aviv, had 1 negative PCR test before December 20, 2020, received his first dose on January 1, 2021, and his second dose on January 23, 2020, and tested positive on February 8, 2021. Assume that the Tel Aviv risk level was category 1 during the period December 20, 2020 to January 20, 2021, category 2 from January 21, 2021 until the end of follow-up on February 8, 2021. This person contributes:

1. 11 days (Dec-20 to Dec-31) and 0 events to the group:
cohort_0/50-60/male/mun_risk=1/past_pcr=1
2. 14 days (Jan-1 to Jan-14) and 0 events to the group:
cohort_1A/50-60/male/mun_risk=1/past_pcr=1
3. 6 days (Jan-15 to Jan-20) and 0 events to the group:
cohort_1B/50-60/male/mun_risk=1/past_pcr=1
4. 9 days (Jan-21 to Jan-29) and 0 events to the group:
cohort_1B/50-60/male/mun_risk=2/past_pcr=1
5. 10 days (Jan-30 to Feb-8) and 1 event to the group:
cohort_2/50-60/male/mun_risk=2/past_pcr=1

Figure S1: The dynamics of the cohort model. Solid arrows indicate possible transitions between cohorts. Dashed arrows indicate possible disease outcomes.

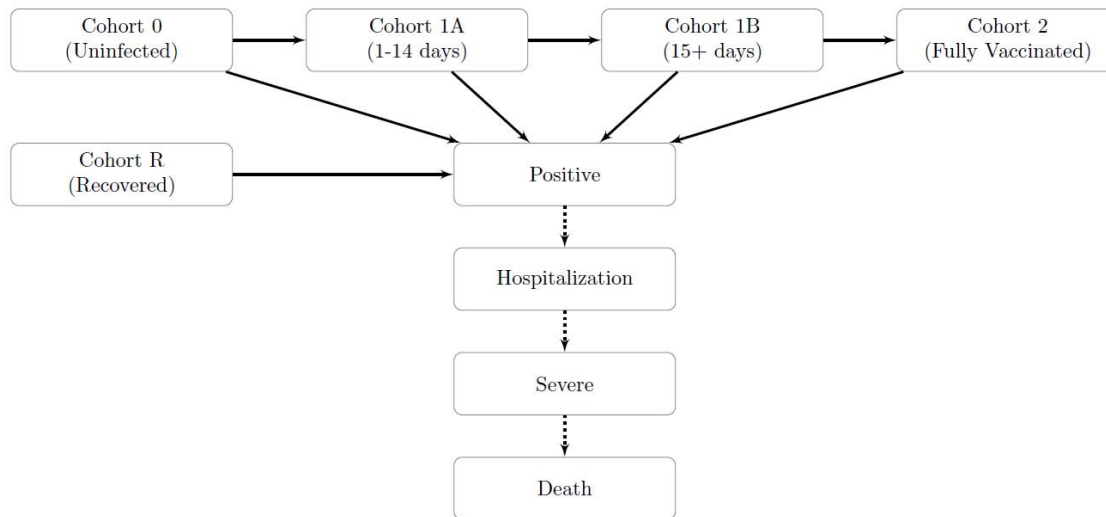

Figure S2: Length of follow-up for Cohort 2. Length of follow-up for Cohort 2 of the fully vaccinated, according to age group. Vaccination became available first to the 60+ age groups and then gradually to younger age groups as can be seen from the follow-up counts.

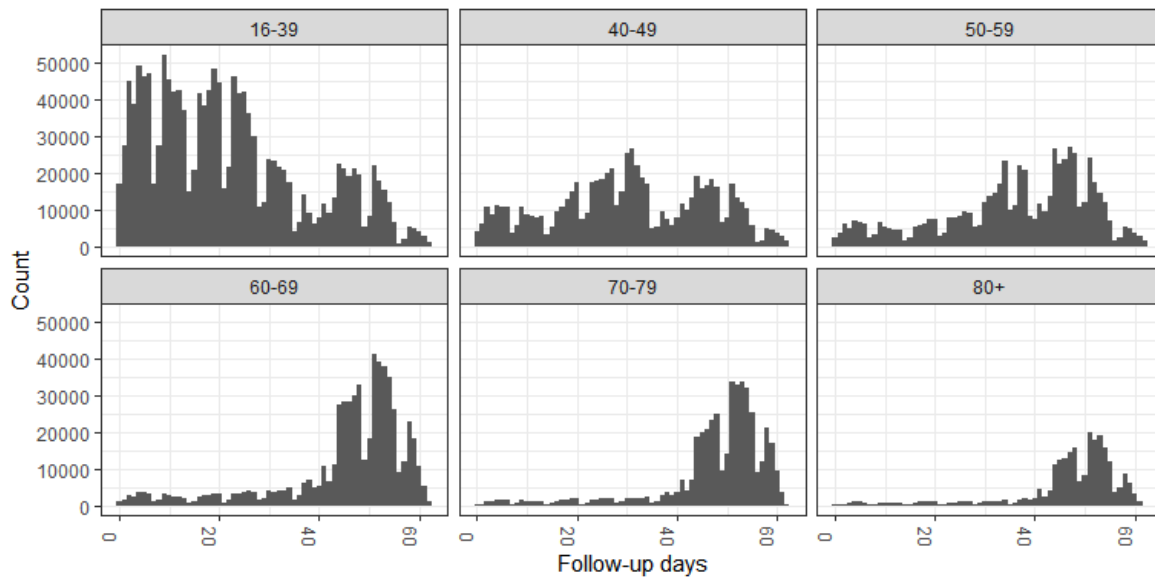

Figure S3: Length of follow-up for the Recovered Cohort. Length of follow-up from first positive PCR test for the Recovered Cohort, according to age group. This cohort included individuals that had a positive PCR test between June 1 and September 30, 2020. Note the sharp decrease in counts as a function of the follow-up. Note that each subfigure has a different scale.

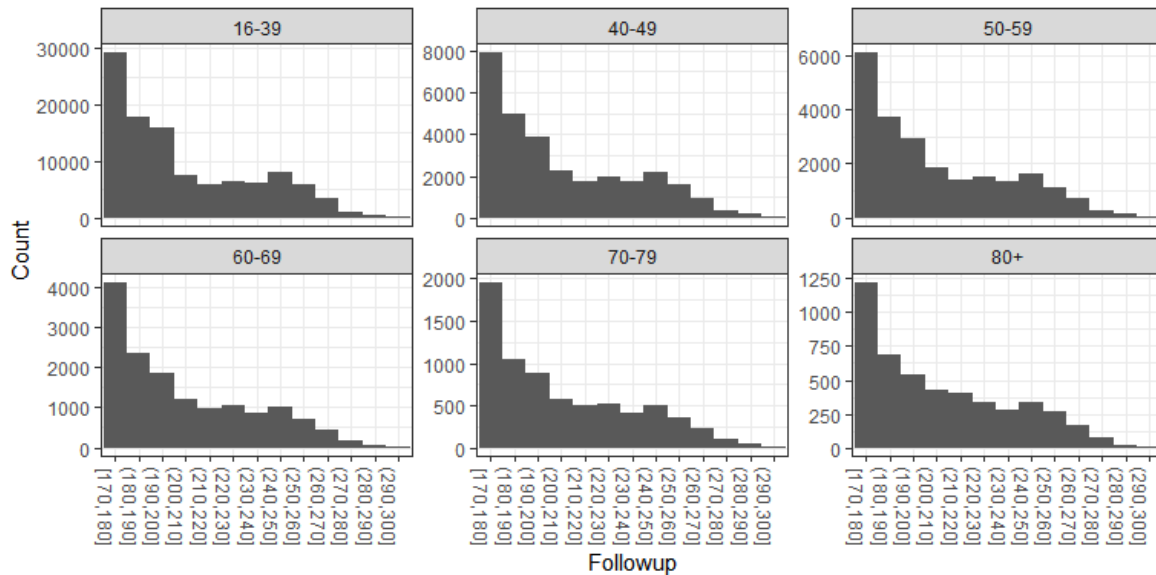

Figure S4: Vaccination by age. Percent of individuals vaccinated with the first and the second dose, by age group. The vaccination initiated in the 60+ age group. See text for details.

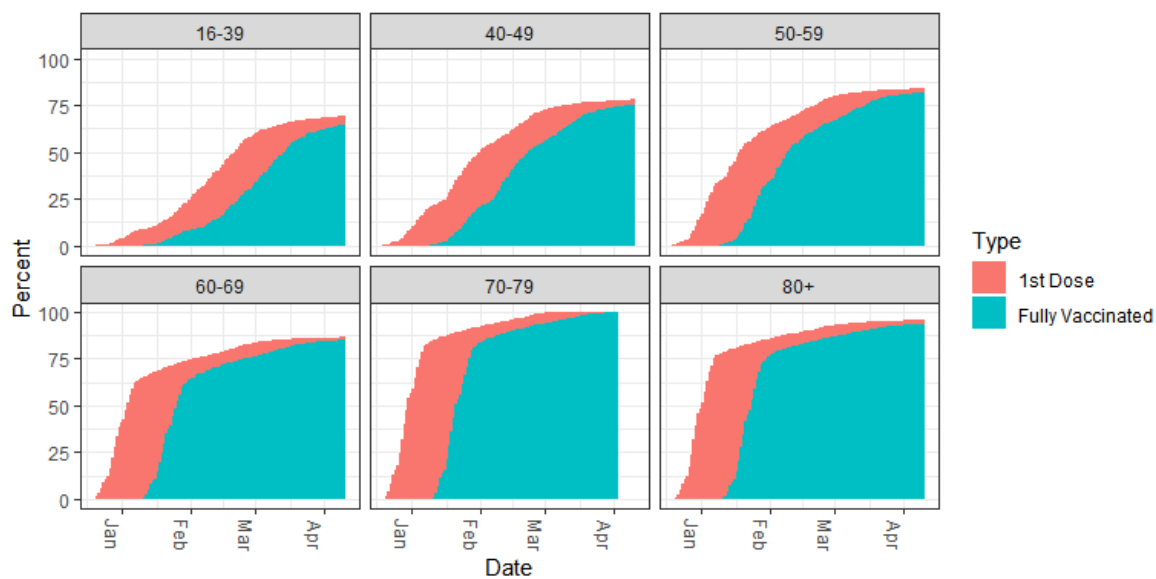

Figure S5: Vaccination by municipality risk. Percent of individuals vaccinated with the first and the second dose, by municipality risk group. The municipality risk was calculated as the median of the daily risk over the research period. Note that there is a negative correlation between vaccine coverage and risk group.

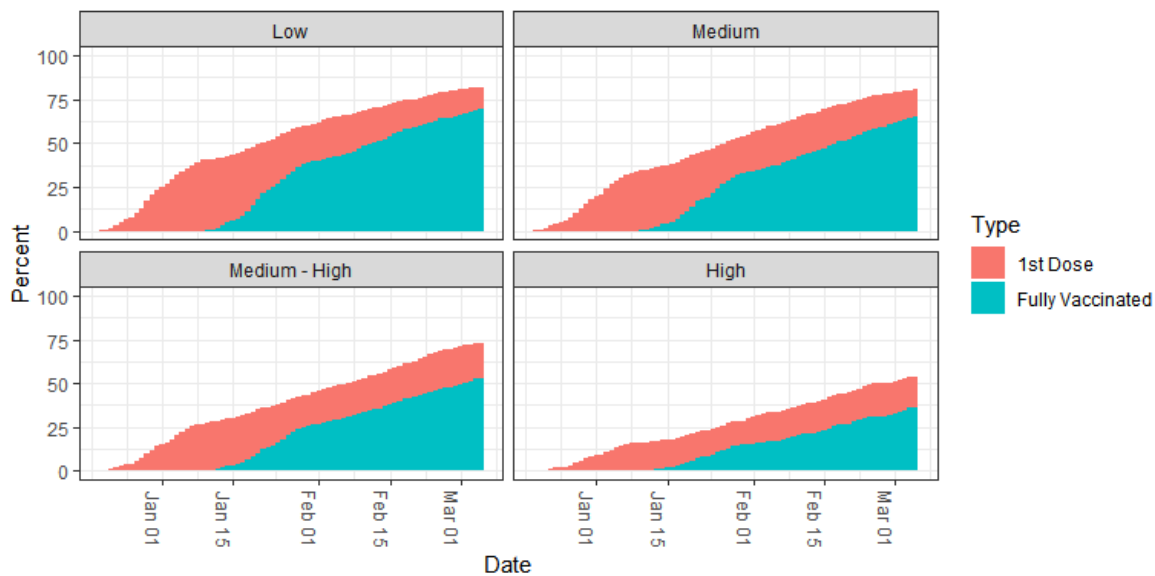

Figure S6: Events over time. Cases per 100,000, smoothed using seven-day moving average for the different age groups and the outcomes: PCR tests, documented infection cases, hospitalized cases, severe cases, and deaths.

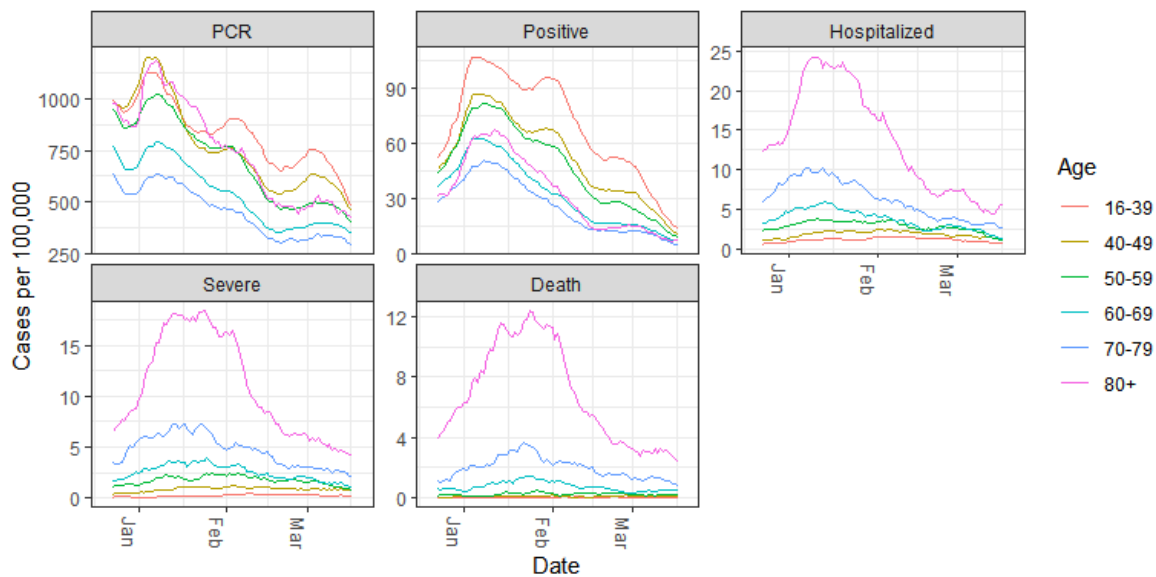

Table S1: Sensitivity analysis of past PCR on prior SARS-CoV-2 infection. Protection of prior SARS-CoV-2 infection for the different age groups. The model was fitted when the number of PCR clusters is assigned to be 0, 1, 2+, and omitted.

Recent Paper in the Journal of Infectious Diseases

<https://scivisionpub.com/pdfs/covid19-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf>

Paper accepted January 2021 to the Journal of Microbial Infectious Diseases

Summary of the paper:

- Synthetic mRNA vaccines can cause Neurodegenerative Diseases, but it won't be visible for many years.
- Synthetic mRNA of the vaccines converts normal body proteins into "**prions**" which are defectively configured proteins. Prions cause ALS (Lou Gehrig's disease), brain degeneration, Alzheimer's, and other neurological degenerative diseases.

Quote from the author: J. Bart Classen, MD*

- "Therefore the regulatory approval (a.k.a. emergency use authorization) of the mRNA based vaccines for SARS-CoV-2 was premature and the vaccine may cause much more harm than benefit."
- "Approving a vaccine, utilizing novel RNA [synthetic mRNA] technology without extensive testing is extremely dangerous. The vaccine could be a bioweapon and even more dangerous than the original infection."

Important Note:

- Prion disease incubation period is 5-40 years! Meaning it will take at least 5 years from the time the trigger (in this case the mRNA vaccine) is introduced into the body, until symptoms of disease appear. Vaccine trials were only 2 months long. It is impossible to see long term side effects from a 2 month long trial.
