

MOTION BY SUPERVISOR DON KNABE

July 13, 2010

Item 23 on today's agenda will bring a lot of money - \$25 million - to the County for continued efforts to improve preparedness to respond to bioterrorism, infectious disease outbreaks and other threats to the public health. Before I vote to approve it I would like to get answers to questions which give this Board and the taxpayer's greater assurance that this money will be well spent.

Specifically:

1. What are the measurable goals for improving preparedness that the Department plans to achieve for the County as a whole and for each of its Service Planning Areas and/or communities?
2. How will the results be measured, monitored and reported to this Board?
3. How, in line-item detail, will the money be spent?

I THEREFORE MOVE TO:

1. Continue this item for one week;
2. Direct the CEO and Director of Public Health to provide each Board office with answers to the above questions within three days
