chapter 1:
INTRODUCTION
chapter 1: INTRODUCTION

FOREWORD: THE NBC UNIVERSAL EVOLUTION PLAN
The NBC Universal Evolution Plan (the “Evolution Plan”) is a comprehensive planning and development effort to maintain Universal City’s status as a center of entertainment and tourism, to meet the future needs of Southern California’s entertainment industry, and to allow the site to grow in a way that is compatible with Los Angeles. The Evolution Plan includes additions to the existing studio, theme park, retail and entertainment uses including CityWalk, and the introduction of new hotels on approximately 391 acres in the Universal City area. The Evolution Plan Site is located within both the City of Los Angeles (“City”) and the County of Los Angeles (“County”) jurisdictions and is generally bounded by the Los Angeles River Flood Control Channel to the north, Barham Boulevard to the east (except in the area of the Hollywood Manor residential area), the Hollywood Freeway to the south (except for the southwest corner of the Evolution Plan Site which abuts hotel and office towers), and Lankershim Boulevard to the west.

The County Specific Plan is created for the portions of the Evolution Plan Site within the County and is known as the “Universal Studios Specific Plan” and allows for the expansion of existing facilities as well as the addition of new entertainment, studio, retail, hotel, and office uses. If fully built out as planned, up to approximately 1.89 million square feet of net new commercial development may be added including new studio, entertainment, retail, hotel, office and related space.

A second area encompasses those portions of the Evolution Plan Site within the City. This area of the project site consists of the development in the City including approximately 363,000 square feet of studio and studio office uses, and a 500 room hotel.

EXISTING UNIVERSAL FACILITIES
1 PURPOSE OF THE SPECIFIC PLAN
The Universal Studios Specific Plan (the “Specific Plan”) has two parts: the Universal Studios Specific Plan Guidelines describe the purpose of the Specific Plan, and contain text, drawings, plans, diagrams, tables and other information describing the Specific Plan policies in narrative form. The Universal Studios Specific Plan Guidelines also describe the issues addressed by the Specific Plan and the overall methodology undertaken to understand these issues. Generally, this methodology is described in Chapter 2: Plan Description and Chapter 3: Design Plan. The Universal Studios Specific Plan is the second part of the Specific Plan and contains the County ordinance and regulations that govern future development within the Specific Plan Area (as shown on page 4).

The Specific Plan is intended to be a comprehensive planning and regulatory tool which will guide development. It not only establishes the maximum Floor Area in square feet of development permitted, but also regulates building heights, requires landscaping and visual buffers, sets standards for signs and lighting, and provides for the design, construction and maintenance of public improvements, among other things. The Universal Studios Specific Plan provides a ministerial review and approval process for subject projects, as well as appropriate operational requirements, regulations and/or other criteria as requirements for implementation. As individual projects submit applications for development permits, each will be reviewed by the County to verify compliance with all regulations and operational requirements in the Universal Studios Specific Plan.

2 SPECIFIC PLAN GOALS
An important goal of the Specific Plan is to respond to the importance of film, video, television, music and family recreation businesses including Universal Studios Hollywood (Theme Park) and CityWalk as important economic drivers for Los Angeles County. To achieve this, the Specific Plan provides a positive link between the entertainment and tourism industries and the Southern California economy. In addition, the Specific Plan provides a higher level of certainty about anticipated development while retaining flexibility. Finally, the Specific Plan recognizes the important relationship between Universal Studios and its neighbors and the value of creating a desirable urban community. To meet these purposes, the Specific Plan establishes the following goals:

PROVIDE COMPREHENSIVE GUIDELINES FOR GROWTH
The Specific Plan provides for a clear set of guidelines under which anticipated development of the Specific Plan Area will occur and sets forth the implementation mechanisms for the development. These mechanisms include development regulations, development standards, and design guidelines.

EXPAND ENTERTAINMENT INDUSTRY AND COMPLEMENTARY USES
The Specific Plan includes a development strategy, which expands and contributes to the existing on-site motion picture, television production and entertainment facilities, while introducing new complementary uses. As the entertainment industry transitions to incorporate new technologies and operations, implementation of the Specific Plan will continue the Specific Plan Area’s important role in the entertainment industry by providing for studio, post-production, studio office and office uses to meet the growing and changing needs of the industry.

MAINTAIN AND ENHANCE THE SITE’S ROLE IN THE ENTERTAINMENT INDUSTRY
The Specific Plan seeks to maintain and embrace the existing studio and entertainment-
related facilities within the Specific Plan Area in order to continue its historic role in the
ever evolving entertainment industry. The Specific Plan Area is located in the heart of the
County’s entertainment industry, which is a major component of the regional economy.
Universal Studios is located close to Warner Brothers, Disney Studios and the Media District
in the City of Burbank. Despite significant competition from other states and areas, the
largest segment of the television, motion picture production and supporting industries is
still located in Los Angeles County. The County maintains its long-standing competitive
dge because of the high concentration of film, television, and commercial production
studios and their allied creative and technical businesses in the region. For nearly a
century, Universal City has been an important part of Southern California’s television,
motion picture production and entertainment industries.

CREATE A FULLY INTEGRATED SITE
By expanding existing uses while creating new entertainment facilities, the Specific Plan
allows for the creation of an integrated development where entertainment is both produced
and experienced. The Specific Plan aims to capitalize on the relationships between the
on-site studio production facilities, the entertainment and retail uses, and business office
uses, in order to create a coherent connection between these uses and to further advance
sustainable development within the Specific Plan Area.

CONTINUE THE TRADITION OF OUTDOOR USES
The Specific Plan continues the tradition of film and television production facilities
uniquely integrated with the Universal Studios Hollywood (Theme Park), CityWalk and
business uses, which utilize the Southern California environment in conjunction with
their businesses. Many of the entertainment uses take advantage of the pleasant weather
found in the region. Outdoor facilities play an important role for the on-site television and
movie production activities, as well as the Theme Park, Universal Studio Tour, and other
commercial attractions. This tradition of outdoor uses will continue as the Specific Plan
Area is developed.

ESTABLISH JURISDICTIONAL BOUNDARIES REFLECTING HISTORIC AND PLANNED
ON-SITE LAND USE PATTERNS
Portions of the Evolution Plan Site within the County are anticipated to be annexed into
the City of Los Angeles, while other areas may be detached from the City of Los Angeles
and returned to the jurisdiction of the County. The annexation/detachment actions achieve
the objectives to establish jurisdictional boundaries that follow historic and planned on-site
land use patterns. Implementation of the Evolution Plan is not dependent, however, on
these annexations/detachment actions.

FULFILL ADOPTED LAND USE AND TRANSPORTATION POLICIES
The Specific Plan implements a number of key County land use and transportation policies
by locating the Specific Plan’s growth at a regional transportation hub and in proximity to a
jobs-rich area.

MAXIMIZE OPPORTUNITIES FOR THE LOCAL AND REGIONAL ECONOMY
The Specific Plan aims to create a wide range of jobs and provide additional resources
for the development of Universal Studios, Universal Studios Hollywood (Theme Park),
CityWalk, retail and entertainment uses and assist in the implementation of a development
program that will contribute to the regional economy. The Specific Plan Area currently provides a variety of entertainment and tourism jobs, and implementation of the Specific Plan will create additional jobs in these important segments of the regional economy in close proximity to existing transit and housing opportunities. Because the Specific Plan Area is a uniquely large property located in the middle of Los Angeles County and nearby transportation systems, it is uniquely situated to maximize opportunities to accommodate anticipated regional needs for new jobs and economic growth.

**PROVIDE CERTAINTY FOR FUTURE DEVELOPMENT**
The Specific Plan provides regulatory mechanisms for the implementation of the Evolution Plan within the Specific Plan Area, as well as providing the particular planning controls needed to ensure that compatible future development will proceed with the necessary infrastructure being provided.

**ENHANCE THE IDENTITY OF THE SITE AS AN ENTERTAINMENT AND MEDIA-ORIENTED COMMERCIAL DISTRICT**
The Specific Plan aims to provide an architecturally distinct development that includes a signage program that contributes to the Specific Plan Area as an entertainment and media center.

**RECOGNIZE RELATIONSHIPS WITH NEIGHBORS**
A goal of the Specific Plan is to recognize and protect the neighboring off-site residential and commercial developments through implementation of specific zoning regulations that govern the development of the Specific Plan Area. In addition, improvements on-site and to the local and regional street systems will be implemented to accommodate future traffic growth through careful transportation planning.
3 REGIONAL LOCATION
The Specific Plan Area encompasses an approximately 323-acre portion of the 391-acre Project site, which is located two miles north of Hollywood and 10 miles northwest of downtown Los Angeles, in central Los Angeles County. The Specific Plan Area is located approximately 1.5 miles south and east of the junction of U.S. Route 101 (Hollywood Freeway) and State Route 134 (Ventura Freeway) in the east San Fernando Valley near the north end of the Cahuenga Pass. Hollywood is located south of the Specific Plan Area, starting at the south end of the Cahuenga Pass. The City of Burbank is located generally to the northeast. The Specific Plan Area is generally bounded by the Los Angeles River Flood Control Channel to the north, the portion of the project area in the City of Los Angeles and Hollywood Manor residential area to the east, the Hollywood Freeway to the south (except for the southwest corner of the Specific Plan Area, which abuts hotel and office towers), and the former Technicolor buildings and Lankershim Boulevard to the west.

4 EXISTING SETTING
As of the effective date of the Specific Plan, the Universal Studios Specific Plan will encompass the area generally bounded by the Los Angeles River Flood Control Channel on the north, the adjacent NBC Universal property and existing residential properties within the City of Los Angeles to the east, the Hollywood Freeway to the south (except for the southwest corner of the area, which abuts hotel and office properties in the City of Los Angeles), and Lankershim Boulevard to the west, as shown on Exhibit 1.2a within the heavy dashed lines. The full legal description of the boundaries of the Universal Studios
Specific Plan is set forth in the zone change ordinance (Ordinance No. ________). After the adoption of the Universal Studios Specific Plan, portions of the Universal Studios Specific Plan area existing within the County as of the effective date of the Specific Plan may be annexed into the City and areas of the NBC Universal properties within the City detached from City and made part of the Universal Studios Specific Plan area upon approval of the annexation and detachment actions by the Local Agency Formation Commission for the County of Los Angeles. If the proposed annexation and detachment actions are approved by the Local Agency Formation Commission, then the Universal Studios Specific Plan area shall encompass those areas shown within the heavy dashed lines on the Universal Studios Specific Plan Map shown on Exhibit No. 1.2b on the effective date of the annexation and detachment actions.

The Universal Studios Specific Plan addresses the pre-annexation and detachment and post-annexation and detachment conditions. Hereafter, the Universal Studios Specific Plan Guidelines will discuss only the post-annexation and detachment conditions since the post-annexation and detachment condition is the intended final configuration for the Specific Plan Area.

The Specific Plan Area consists of a unique collection of land uses involving movie and television production, offices, cinemas, amphitheater, restaurants, entertainment and themed attractions. For more than 90 years Universal Studios has been a motion picture and television studio, entertainment attraction, and business center. The Specific Plan Area is directly accessible from the Hollywood Freeway at Universal Studios Boulevard, as well as from the adjacent major arterials: Lankershim and Barham Boulevards. To the south, the Hollywood Freeway provides connections to the regional freeway network that connects the Specific Plan Area with all major areas of the Los Angeles basin. Directly north of the Specific Plan Area, the Ventura Freeway is accessible from Forest Lawn Drive, and from Lankershim and Barham Boulevards.

The Specific Plan Area is served by rail and bus lines and is located across Lankershim Boulevard from the Universal City MTA Red Line Station. This facility, located on the west side of Lankershim Boulevard, includes a bus transit center and is a major transit node providing transportation alternatives to the highway facilities in the area. The Universal City MTA multimodal facility is expected to accommodate significant growth in future transit ridership.

In general, the area located immediately adjacent to the Specific Plan Area is characterized by low to moderate intensity urban development, including a golf course and residential uses, and varying street types (local residential to commercial arterial). At a greater distance from the Specific Plan Area, the foothills of the Santa Monica Mountains can be seen, which are characterized by low density residential uses and widely varying topography, canyons and vegetated areas.

Primary artificial light sources in the vicinity of the Specific Plan Area include freeway and street lights, commercial/office buildings and signage, outdoor activity lights, parking lights, security lights and automobile headlights. These are generally located along the Hollywood Freeway and Lankershim, Ventura, Barham and Cahuenga Boulevards. Other light sources in the area include residential street lights and interior lights, generally located in the nearby residential neighborhoods.

The Specific Plan Area is located at the northern flank of the Santa Monica Mountains. Soils within the surrounding area are primarily comprised of young surficial deposits and include gravel, sand and silty-clay. Bedrock units within the Specific Plan Area are complex due to folding, faulting or tilting induced by the active geology of the Southern California region. The Specific Plan Area is located within the seismically active Los Angeles Basin in Southern California.

Major drainage courses and surface water features located near the Specific Plan Area
include the Los Angeles River Flood Control Channel, Toluca Lake (located approximately one-quarter mile to the north of the Specific Plan Area), and the Hollywood Reservoir (located approximately one-half mile east of the Specific Plan Area).

The Specific Plan Area is located within the densely populated San Fernando Valley, and is surrounded on all sides by urban development. Natural biological diversity and resources in the area have been greatly reduced due to urbanization, resulting in fragmented or isolated habitats. The most substantial natural area nearby is Griffith Park, which is located approximately 2.5 miles east of the Specific Plan Area.

As a large island of unincorporated Los Angeles County surrounded by the City of Los Angeles, the Specific Plan Area’s public services and infrastructure are provided by a variety of City, County, and private sector entities.

5 AUTHORITY AND SCOPE OF SPECIFIC PLAN
The authority to prepare, adopt and implement specific plans is provided by California Government Code Sections 65450 through 65457. Procedures for the adoption, implementation and amendment of specific plans are provided in Chapter 22.46 of the Los Angeles County Code. Specific plans may be adopted by ordinance or resolution by the Los Angeles County Board of Supervisors after the Los Angeles County Regional Planning Commission has made a recommendation to the Board of Supervisors. The Universal Studios Specific Plan Guidelines are adopted by resolution, and the Universal Studios Specific Plan is adopted by ordinance.

As required by the County of Los Angeles and the California Government Code, the Specific Plan includes text and diagrams which specify the following in detail:

- The nature, location and extent of existing and proposed land uses;
- Vehicular and pedestrian circulation within the boundaries of the Specific Plan Area and surrounding area;
- The provision of essential urban services including, but not limited to public safety, public utilities and similar services as may be required by the development anticipated by the Specific Plan;
- Pertinent land use regulations for implementation of the Specific Plan; and,
- A statement regarding the Specific Plan’s relationship to the County’s General Plan.

In addition, the Specific Plan addresses subjects, such as design, which are necessary for the implementation of the General Plan.

6 RELATIONSHIP TO COUNTY PLANNING DOCUMENTS AND REGULATIONS
This section describes the relationship of the Specific Plan to other relevant County planning documents.

UNIVERSAL STUDIOS SPECIFIC PLAN CONSISTENCY WITH COUNTY GENERAL PLAN
The Los Angeles County General Plan is a comprehensive long-range policy document that guides the growth and development of the unincorporated areas of Los Angeles County. The General Plan includes state-mandated elements related to land use, circulation, housing, conservation, open space, noise, and safety. Whereas the General Plan provides a broad general policy directive for the County, a specific plan is a policy statement and regulatory implementation tool that is used to address a single planning area. As stated in the General Plan Introduction: “the General Plan neither promises nor guarantees the
achievement of any goal or objective nor strict adherence to any single policy statement.” (General Plan Introduction, p.2 adopted November 25, 1980). Pursuant to California Government Code Section 65454, a specific plan must be consistent with the General Plan by furthering its objectives and policies while not obstructing their attainment, but also need not adhere to every goal and policy.

The Universal Studios Specific Plan Area was classified prior to the effective date of the Specific Plan in the Industrial and Commercial categories on the General Plan Land Use Policy Map, which allows a wide variety of uses including motion picture studio, office, restaurants, retail, and entertainment park. As of the effective date of the Specific Plan, the Specific Plan Area shall be SP (Specific Plan) on the General Plan Land Use Policy Map. The Specific Plan is consistent with the applicable goals and policies in the various elements of the Los Angeles County General Plan as more fully detailed in Appendix B.

The Specific Plan meets the goals of situating commercial activities in a viable cluster that conveniently serves the market area, encouraging design compatible with, and sensitive to, the natural and man-made environment, and coordinating land use with existing and proposed transportation networks. Provisions to implement these goals are provided below.

RELATIONSHIP TO THE COUNTY ZONING REGULATIONS
The Specific Plan includes regulations and development standards that will apply within the Specific Plan Area. Certain uses will require a ministerial review, provided the project or use meets the provisions and requirements of the Specific Plan.

The regulations of the Specific Plan are in addition to those set forth in Title 22 of the County Code (Zoning Code). The Specific Plan addresses a variety of issues, which are otherwise covered by various County Code provisions, in order to provide comprehensive planning for the Specific Plan Area. Where the Specific Plan contains provisions that establish regulations that are different from, more restrictive, or more permissive than would otherwise be allowed pursuant to the provisions contained in the Zoning Code, the Specific Plan shall prevail and supersede those applicable provisions of the Zoning Code. The Specific Plan modifies or replaces certain County regulations relating to signage, oak trees, alcoholic beverages, and parking, among others.

In cases where the Specific Plan does not address a particular topic or issue, the regulations and development standards contained within the Zoning Code shall apply. Where the Specific Plan differs from the Zoning Code, the Specific Plan's policies, design guidelines, regulations and development standards shall apply.

CEQA COMPLIANCE
Pursuant to local and state California Environmental Quality Act (CEQA) Guidelines, the City of Los Angeles was the lead agency and prepared an Initial Study, which determined that certain potentially significant environmental impacts may be associated with the development planned under the Evolution Plan as implemented by the Specific Plan and the portion of the project area located in the City of Los Angeles. Accordingly, an Environmental Impact Report (“EIR”) for the Evolution Plan, including the implementing County Specific Plan and City ordinances and related actions, was prepared in compliance with CEQA. The City and County entered into a Memorandum of Understanding concerning cooperative efforts to process the Project’s environmental documents and entitlements. The Memorandum of Understanding states that the City and the County shall work jointly and cooperate in the preparation of the EIR for the Project and that, notwithstanding the designation of lead agency, the City and County shall each be involved in the preparation and evaluation of the EIR, as set forth in the Memorandum of Understanding. The EIR (State Clearinghouse No. 2007071036) identified impacts which may result from implementation of the Evolution Plan by the applicable ordinances including the
Universal Studios Specific Plan ordinance, and includes recommended mitigation measures to address these impacts. The Final EIR was certified by the City on November 14, 2012. A Mitigation Monitoring and Reporting Program was developed, incorporating all of the approved project design features and mitigation measures. The Mitigation Monitoring and Reporting Program is to be implemented and monitored by the County to ensure completion and compliance with all of the County required project design features and mitigation measures. Additional detail can be found in Appendix C, Mitigation Monitoring and Reporting Program.

RELATIONSHIPS TO OTHER PLANNING EFFORTS IN NEARBY JURISDICTIONS

There are several adopted specific and redevelopment plans which regulate parcels near the boundaries of the Specific Plan Area.

- **Sherman Oaks-Studio City-Toluca Lake-Cahuenga Pass Community Plan**
  City of Los Angeles
  The Sherman Oaks-Studio City-Toluca Lake-Cahuenga Pass Community Plan is one of the 35 community plans that comprise the land use element of the City of Los Angeles General Plan, and it implements the applicable standards and policies of the City’s General Plan at the local level. The Community Plan is intended to guide the location and intensity of the private and public use of land and to promote an arrangement of land uses, streets, and services which will encourage and contribute to the economic, social and physical health, safety, welfare, and convenience of the people who live and work in the Community Plan area.

- **Ventura-Cahuenga Boulevard Corridor Specific Plan**
  City of Los Angeles
  The Ventura/Cahuenga Boulevard Specific Plan is a City planning effort that establishes entitlements, design standards and public improvements for the development of a 17-mile stretch of Ventura and Cahuenga Boulevards between Woodrow Wilson Drive on the east and the City limit in Woodland Hills on the west.
  Land use development intensity, vehicle trips generated, parking, setbacks, lot coverage and sign limitations are also governed by provisions of the Ventura-Cahuenga Boulevard Corridor Specific Plan.

- **Media District Specific Plan**
  City of Burbank
  The Media District Specific Plan is a planning effort in the City of Burbank that governs an area northeast of the Barham Boulevard/Forest Lawn Drive intersection. The studio-related properties encompassing Warner Brothers, Disney and NBC studios located within the Media District Specific Plan Area are designated as industrial uses. Main corridors are designated as commercial areas, including an area facing the river channel across from the northeast corner of the Specific Plan Area. The Media District Specific Plan imposes development intensity, height and development standards for all projects within its boundaries.

- **Mulholland Scenic Parkway Specific Plan**
  City of Los Angeles
  The Mulholland Scenic Parkway Specific Plan is a City planning effort that provides for the preservation and maintenance of a scenic corridor along Mulholland Drive. The Mulholland Specific Plan establishes three levels of requirements, one for Mulholland Drive right-of-way, one for properties located
within the “Inner Corridor” (500 feet from the right-of-way) and one for properties located within the “Outer Corridor” (500 feet to one-half mile from the right-of-way).

c Los Angeles River Plans
County of Los Angeles/ City of Los Angeles
The Los Angeles River Master Plan was approved by the Los Angeles County Board of Supervisors in June 1996. The intent of the River Master Plan is to “serve as a long-term guide for the coordinated use, enhancement, development, and management of all the resources within the Los Angeles River and Tujunga Wash including adjacent lands within one-half mile radius of the center line of the River.” The River Master Plan envisions certain improvements and enhancements adjacent to the River, including trail and aesthetic improvements and tree planting along the River.

A related planning effort led by the City is the Los Angeles River Revitalization Master Plan, approved in May 2007. The Los Angeles River Revitalization Master Plan includes recommendations for physical and green space improvements to the River corridor; public access, health and safety policies; river governance and management structure; and short- and long-term priority projects and potential funding strategies. The City Planning Commission has recommended the draft Los Angeles River Improvement Overlay (LA-RIO) District for approval. If approved by the City Council, the LA-RIO would help implement the Los Angeles River Revitalization Master Plan through development regulations for projects near the River, including landscaping, screening, lighting, and access regulations.

7 ORGANIZATION OF THE SPECIFIC PLAN
The Universal Studios Specific Plan Guidelines has five Chapters. Chapter 1 — Introduction — includes a brief overview of the Specific Plan, its purpose, the authority and scope of the Specific Plan, and its relationship to other planning documents and regulations. Chapter 2 — Plan Description — describes land uses and conditions within the Specific Plan Area and describes the Specific Plan. Chapter 3 — Design Plan — establishes the design goals and principles for the Specific Plan Area. Chapter 4 — Infrastructure — describes the infrastructure improvements to be completed to support the Specific Plan. Chapter 5 — Implementation — describes how the Universal Studios Specific Plan is to be implemented. The Universal Studios Specific Plan ordinance includes the detailed development standards that regulate development within the Specific Plan Area.
chapter 2: PLAN DESCRIPTION
chapter 2: PLAN DESCRIPTION

1 INTRODUCTION
This Chapter describes the Specific Plan, the principles and development requirements of the Universal Studios Specific Plan, and the Conceptual Plan illustrating one possible buildout of Universal Studios consistent with the Specific Plan. Because of the importance of the existing development patterns on-site, this Chapter first discusses background and existing conditions of Universal Studios. This preliminary discussion of conditions allows the reader to be introduced to the terminology and basis for the development of the Specific Plan.

2 SPECIFIC PLAN BACKGROUND
Since its beginnings, Universal Studios has grown to become one of Southern California's important employment and entertainment assets. The original 296-acre site served as the location for one of Southern California's first motion picture studios, and beginning in 1915, the studio began regular public tours. This practice, which was unique among motion picture studios when it began, has established Universal Studios as a catalyst for the development of a myriad of related entertainment and visitor facilities at the Universal Studios site.

Through the years, both the studio facilities and entertainment attractions have grown, and today Universal Studios is home to Universal Studios, Universal Studios Hollywood (Theme Park), Universal Studio Tour, Universal CityWalk, Universal Amphitheater, Universal Studios Cinemas, and offices. The evolution of Universal Studios into a mixed-use entertainment and motion picture production facility has been gradual and incremental, which accounts for much of the overall character of Universal Studios. Each new component has added its own contribution to the overall experience.

Now, the Universal Studios Specific Plan proposes to continue what began nearly 100 years ago—to enhance Universal Studios as one of Los Angeles' valuable entertainment resources and significant Southern California entertainment centers. As proposed, the Universal Studios Specific Plan will help meet Southern California's employment needs by directly creating more than an estimated 6,300 new jobs within the entertainment and tourism industries, as well as providing for thousands of construction jobs and indirectly, thousands of other jobs. Importantly, further development of Universal Studios will provide...
an entertainment center for the local community, Southern California residents, and visitors from around the world. Entertainment and tourism are two of Southern California’s most important growth industries, and continue to be vital to the economic health of the region.

3 EXISTING CONDITIONS

UNIVERSAL STUDIOS

For many years, those who have worked at or visited Universal Studios have recognized Universal Studios’ unique geography. Its physical location within the Hollywood Hills, Cahuenga Pass and the San Fernando Valley creates a sense of enclosure. The Hollywood Freeway separates Universal Studios on the south from other urbanized areas, further reinforcing this quality. The central hilltop, which is the location for Universal Studios Hollywood and Universal CityWalk, is a prominent feature of the Specific Plan Area, allowing it to be visible from both the surrounding hills and from afar.

The Specific Plan Area varies in character from low land adjacent to the Los Angeles River Flood Control Channel, to landscaped hillsides, to urban development on the central hilltop, which is a microcosm of the kind of geographical diversity one expects to find in a city. Like a city, Universal Studios grew incrementally over time, with an informal character that is reinforced by the variety of activities taking place at Universal Studios.
UNIVERSAL STUDIOS DISTRICTS

Universal Studios is like a city in another important way. The people who work and visit have come to recognize that there are identifiable districts within Universal Studios, which are generally differentiated by geography, dominant land uses, typical users and visual character.

The major districts at Universal Studios are distinguished by the difference in their typical uses. Currently, there are three main types of uses: motion picture and television production, entertainment and business.

In some instances, the distinctions between one district and another may be blurred—an area of Universal Studios that might appear to be part of Studio Production is, in fact, a visitor attraction. This condition is typical of the overlap that occurs between districts in any city. The intermingling of land uses between one district and another is integral to the character of Universal Studios.

This characteristic also reinforces another important feature of the districts at Universal Studios: the connectivity of one district to another. Universal CityWalk, the entertainment retail area adjacent to the entry plaza at Universal Studios Hollywood, has attracted much attention for its playful re-creation of an urban street. The retail shops and restaurants attract people from the surrounding area, as well as tourists and people

Exhibit 2.3a: Existing Districts

City of Los Angeles

Business District

Studio District

Entertainment District

Back Lot District

Universal Studios Specific Plan Area

Evolution Plan Project Site Boundary

City of Los Angeles
from all of Southern California. Universal CityWalk’s “street” begins or ends at the entry plaza to Universal Studios Hollywood, and its eclectic character is consistent with the entertainment facilities at Universal Studios Hollywood. More important is the pedestrian connection that Universal CityWalk provides between the parking structures of the Universal Studios Cinemas and Universal Studios Hollywood and the Universal Amphitheater. Universal CityWalk has enhanced the approach to Universal Studios Hollywood by establishing a seamless experience between the point of entry (e.g., a parking area) and the entry to the entertainment venue. This is a characteristic feature of Universal Studios, and the Specific Plan provides the means which will permit land uses to cross districts in the future.

The districts at Universal Studios are defined by:

- Their basic geography—location, topography and relationship to other districts;
- The land uses which occur primarily within the district—studio production, entertainment, retail, and office;
- The primary users—business people, entertainment industry employees and visitors;
- The visual character—industrial buildings, themed facades, outdoor sets, and office buildings; and,
- The connections to other neighboring districts.

Because of the intent of the Specific Plan to build upon what is already present, the districts provide a framework for the expansion of Universal Studios. For most of Universal Studios, new development will be consistent with the established character of the district while maintaining the opportunity of intermingling of land uses between districts.

**UNIVERSAL STUDIOS EDGES**

The Universal Studios Specific Plan Area has well-defined edges, which enclose it and make it easy to identify from the outside. Universal Studios' edges consist of both Perimeter Edges and Visual Edges. Perimeter Edges occur at the physical edge of the property. Visual Edges are edges which can be seen from outside Universal Studios because of topography, but which are not necessarily located at the property’s physical edge.

The Perimeter Edges of Universal Studios consist of the Freeway Edge to the south, the Urban Edge adjacent to Lankershim Boulevard on the west, the Channel Edge to the north, and the Back Lot Edge to the east.

The Freeway Edge currently consists of areas of dense landscaping planted on the hillside. Along the Urban Edge, the visual character is established by the architecture of the existing office buildings and the several entries into Universal Studios. The Channel Edge is much like the edge of a “backyard” with varying conditions and fencing, and is separated from the concrete flood control channel by an access road adjacent to the Los Angeles River Flood Control Channel. The Back Lot edge borders the City of Los Angeles portions of the project area adjacent to Barham Boulevard and the Hollywood Manor neighborhood to the east and is primarily characterized by steep topography and landscaping.

The natural topography at Universal Studios defines another type of edge. Because of the plateau in the middle of the Universal Studios Specific Plan Area and the location of residential neighborhoods on the hills, which surround Universal Studios on two
sides, it is possible to see Universal Studios in a way which would be impossible if it were located on flat terrain. As a result, Visual Edges may extend into the Specific Plan Area, beyond its perimeter, at the hilltop. These Visual Edges can be seen from surrounding hillside neighborhoods, the Hollywood Freeway and some areas of the San Fernando Valley north of the Los Angeles River Flood Control Channel. As much as the Perimeter Edges, the Visual Edges create a recognizable identity for Universal Studios. Universal City’s Visual Edges provide both an opportunity and constraint to the future development of Universal Studios. In a positive sense, the Visual Edges help establish Universal Studios’ distinct image and provide a means to visually communicate the identity and location of Universal Studios. However, some of the same means could potentially be unappealing to the neighbors on surrounding hillsides who can see Universal Studios from their homes.

Because of this, the Specific Plan contains measures to ensure that future development within Universal Studios will be visually compatible with the surrounding community. The particular measures required vary depending upon topography, location within Universal Studios, relationship to surrounding neighbors and the type of development intended. These measures include, but are not limited to: building height, lighting restrictions, restrictions upon use of glare-producing building materials, and screening requirements. Together, these measures will help guide future development in a way that is compatible with the surrounding neighborhoods.

UNIVERSAL STUDIOS ENTRIES
Universal Studios currently has two major entries and six private entry gates. As the Specific Plan is implemented, this will increase to seven private studio gates and three public entries into the area. All entries have signs, landscaping and/or access control gates which help visually define Universal Studios’ identity and establish arrival points.

The existing entries to Universal Studios fall into two general categories. The first category includes the Universal Hollywood Drive and Universal Studios Boulevard Gateways, which provide access to Universal Studios from Lankershim Boulevard and the Hollywood Freeway, respectively. Both of these gateways are accessible to visitors and together serve as the main access to Universal Studios’ Entertainment and Business Districts. These gateways have a character that is intended to welcome visitors. Signs at each gateway identify each as an entry to Universal Studios, while landscaping at the entry and along arrival drives helps create a positive initial impression on visitors. Directional signs within the gateway guide visitors to their destination. Traffic is controlled with a variety of devices, including stop signs, traffic signals, changeable directional signs and special turn lanes. Pedestrian paths connect
Universal Studios to surrounding streets at these gateways.

The second category of existing entry includes the four private entry gates along Lankershim Boulevard, one off of Universal Studios Boulevard, and one at Lakeside Plaza Drive. These gates provide access to Universal Studios' production and studio areas. Each gate has staffed control stations and only studio employees, authorized visitors and delivery persons may enter Universal Studios through these gates. Generally, they have a more functional appearance than the visitor-serving gateways.

4 DEVELOPMENT PRINCIPLES
The Development Principles are the basic planning and development concepts influencing the Universal Studios Specific Plan, which will guide future development at Universal Studios. They are a direct outgrowth of both existing conditions and the development goals, and describe the overall intent of the Specific Plan. These Development Principles are supplemented by Design Principles discussed in the following Chapter, Design Plan.

BUILD UPON UNIVERSAL STUDIOS’ EXISTING DISTRICT SYSTEM
The existing recognizable system of districts at Universal Studios makes it the logical method on which to plan future development. Existing districts are identified and described, including a description of how each district's land use overlaps and interacts with the adjacent districts. Each district has its own typical uses, which are particular to the needs and characteristics of that district.
ENHANCE UNIVERSAL STUDIOS’ EDGES AND ENTRIES
Universal Studios’ edges and entries are an important part of the way Universal Studios connects to the local community and the larger Southern California region. The Specific Plan proposes ways in which these edges can be enhanced and reinforced to improve the site’s appearance and function. The Specific Plan includes circulation improvements at major entries, the addition of a new private entry gate on Universal Hollywood Drive and a new public entry at the intersection of W. C. Fields Drive (formerly Buddy Holly Drive) and Donald O’Connor Drive, and design guidelines that will improve the overall visual character of Universal Studios, including landscaping in highly visible edges.

ESTABLISH DESIGN PRINCIPLES FOR NEIGHBORHOOD COMPATIBILITY
Universal Studios desires continued compatibility with adjacent neighborhoods. The Specific Plan recognizes the important role that future development at Universal Studios plays by providing standards and guidelines, which will help improve the quality of the overall neighborhood environment. Among the provisions of the Specific Plan which address this need are:

- Development standards that regulate building height, which are not regulated in the Industrial zone;
- Limits to the total developable floor area as compared to the 13:1 allowed under the M1½ Industrial zone;
- Incorporation of green building and landscape standards for appropriate areas;
- A vehicular circulation plan, which directs traffic away from local streets by improving accessibility to the freeways;
- Lighting requirements, which are compatible with nearby residential areas;
- Limitations on operational sound generation;
- Limits to the amount and type of signage visible outside the Specific Plan Area;
- Restrictions upon use of glare-producing building materials, and screening requirements for parking structures, mechanical rooftop equipment, and outdoor storage areas; and
- Limits on permitted uses as compared to the M1½ Industrial zone.

ESTABLISH A CIRCULATION SYSTEM WHICH INTEGRATES TRANSIT, VEHICULAR, PEDESTRIAN AND BICYCLE SYSTEMS
The Specific Plan Area’s location near the Hollywood Freeway, the Ventura Freeway and the Universal City Metro Red Line Station provides Universal Studios with excellent connections to the surrounding region. The Specific Plan proposes a number of improvements, which will enhance Universal Studios’ connections to these regional systems, as well as internal systems, which will improve on-site visitor and employee circulation while encouraging pedestrian rather than vehicular access. These include: expanded use of a shuttle system from Lankershim Boulevard up Universal Hollywood Drive to the Entertainment District (and to the areas of the project site in the City of Los Angeles beyond), improvements at Universal Studios Boulevard, a vehicle parking system that minimizes traffic on-site while addressing potential impacts in adjoining communities, and creation of a pedestrian network, which connects the districts and surrounding community.

ESTABLISH DEVELOPMENT STANDARDS TO PROPERLY SIZE INFRASTRUCTURE AND PROVIDE FLEXIBILITY FOR THE FUTURE
The Specific Plan establishes a total permitted amount of development so that infrastructure—such as roads, sewers, water service—can be coordinated with future
development to meet Universal Studios' needs. Maintaining flexibility to meet future business needs is an important part of the Specific Plan. As such, it includes Equivalency Program regulations that permit land uses to be exchanged with other permitted land uses, based on their potential for environmental impacts. (For further discussion of the Equivalency Program, see Section 5 in the Specific Plan Guidelines Implementation Chapter.)

5 REGULATING FUTURE DEVELOPMENT

The Specific Plan provides a framework for the growth of Universal Studios by establishing general goals and principles, as well as specific requirements, which will regulate future development. The Specific Plan's goals and principles describe the intent of the Specific Plan and provide the conceptual basis for the overall development. The regulations established by the Specific Plan provide the overall limits and specific means by which future development can be measured.

The permitted uses are primarily those related to motion picture and TV production, music production, offices, entertainment and tourism. Because of the nature of motion picture and TV production, as well as the location of Universal Studios within an urban setting, the amount of development intensity in the Specific Plan Area is an important planning consideration. The availability and further coordinated development of infrastructure (such as vehicular access, water and sewer capacity and storm drainage facilities) is also a key consideration in the future development potential of the Specific Plan Area. Therefore, the Specific Plan establishes a maximum intensity of land uses, which will help assure that development of Universal Studios will be compatible with proposed infrastructure improvements, as well as with the surrounding business and residential community.

<td>5,769,610</td>
</tr>
</tbody>
</table>
The land uses listed above represent the primary uses allowed. These land uses are general categories and include related support and accessory uses. For example, the Specific Plan permits additional studio production uses. Included in these uses could be various support uses, such as a post office for studio employees. While a post office may represent a retail or service activity, it would be considered “Studio Use,” since its purpose is to serve studio activities in the Specific Plan Area.

6 DEVELOPMENT DISTRICTS
There are distinguishable existing districts within Universal Studios that can serve as a planning element of the overall Specific Plan. The following sections describe each of the existing districts with respect to the following topics:

- The geographic location of the district;
- The typical existing uses currently present within the district;
- The visual character of the district;
- Anticipated incremental new development within the district; and,
- The relationship of the district to surrounding areas.

While each district may be characterized by typical uses, which represent the dominant land use within a district, the Specific Plan allows most permitted land uses to be developed in any district and allows development of various mixes of land uses in each district. This is consistent with the existing blending of land uses across areas that is integral to the character of Universal Studios.

STUDIO DISTRICT
The Studio District is located along the majority of the northern portion of the Specific Plan Area, adjacent to the Los Angeles River Flood Control Channel. The Studio District currently comprises a portion of the television, motion picture, and video production facilities within the Specific Plan Area. Existing facilities in this District include production

Exhibit 2.6a: Universal Studios Specific Plan Districts
space, production facilities, live audience venues, studio office space, technical support/storage space and ancillary facilities. Portions of the Studio District are accessible to the general public through Universal Studios Hollywood facilities (e.g., Universal Studio Tour). Existing activities and related uses will continue in the Studio District. Based on the Conceptual Plan (see Section 11 in this chapter), new or refurbished facilities in the Studio District may include production offices, sound stages, tour attractions, film vaults, an expanded mill, support structures, and parking facilities.

The Studio District primarily includes production activities, production facilities and related uses. The Studio District contains sound stages, studio offices, parking areas, sets/facades and other facilities used primarily for motion picture and television production. Typical of other studios, the Studio District also contains several office buildings which have a character similar to the office buildings in the Business District. The Studio District is also home to two additional property types, sound stages and bungalows. It is expected that the majority of these will be retained as Universal Studios is developed in the future. The Specific Plan envisions that these activities continue in the future and that construction of new facilities be permitted. Demolition and renovation of some existing buildings will take place in order to accommodate new, updated facilities.

Unlike other Southern California studios, portions of the Studio District at Universal Studios are accessible to the public through Universal Studios Hollywood “Studio Center” facilities. Escalators bring visitors down the hill into a portion of the on-site motion picture production area, which currently includes entertainment attractions such as Revenge of the Mummy and Jurassic Park. The Specific Plan proposes that this mix of uses continue within the Studio District to maintain and enhance Universal Studios’ unique character of blended land uses.

BUSINESS DISTRICT
The Business District is located on the western portion of the Specific Plan District fronting Lankershim Boulevard, stretching from Universal Hollywood Drive to the Los Angeles River Flood Control Channel. This District currently provides office and production facilities, meeting rooms and other related facilities. With this range of uses, the Studio District and Entertainment District uses blend into the Business District. Existing office and production uses currently include low-rise, mid-rise and high-rise development along Lankershim Boulevard, such as the former Technicolor buildings, the Bank of America building, and the Lew R. Wasserman building.

Office uses will continue to be developed within the Business District. Based on the Conceptual Plan, new facilities in the Business District may include new offices, production facilities, a theater, and parking facilities.

ENTERTAINMENT DISTRICT
The Entertainment District contains the primary visitor attractions in the Specific Plan District and is located at the highest elevations within its central portions. There are currently two subareas within the Entertainment District: Universal Studios Hollywood and Universal CityWalk. The existing Universal Studios Hollywood is an admission-based entertainment venue, which includes the Universal Studio Tour passing through the existing Studio District and the Back Lot District, other enclosed and
outdoor attractions, merchandising, food services and administrative/support space. Universal CityWalk is an entertainment venue and entertainment retail venue, which provides retail, restaurant, and theater uses, including the Universal City Cinemas. Within Universal CityWalk, there are also several existing administrative and employee support offices, along with some office and studio uses. In this way, Business District uses blend into the Entertainment District. In addition, Universal CityWalk serves to connect the public parking areas and the Universal City Cinemas with the entry to Universal Studios Hollywood.

Based on the Conceptual Plan, Universal Studios Hollywood may be expanded and updated to include new and/or refurbished attractions, theaters, and administrative support facilities. Universal CityWalk is anticipated to provide improved pedestrian facilities and updated food and merchandising venues. In addition, the Gibson Amphitheater may be replaced by a smaller facility with reduced seating capacity. Universal Studios also anticipates that a new hotel, offering up to 500 guestrooms and related hotel facilities, will be developed in the Entertainment District. New parking facilities will be provided to support the new anticipated uses.

- **Universal Studios Hollywood**
  Universal Studios Hollywood is a major entertainment resource in Southern California. The Specific Plan permits expansion, enhancement, renovation and replacement of existing attractions in Universal Studios Hollywood.

  One of the attractions at Universal Studios Hollywood is the Universal Studio Tour, which permits visitors to see the working studio areas of Universal Studios. In recent years, attractions have been added in the Studio District. This enhances the connection between these districts and helps integrate Universal Studios Hollywood into the overall Universal Studios environment. The Specific Plan permits this kind of overlap within Universal Studios in order to preserve the existing character and enhance the connections between areas.

- **Entertainment Retail Venue**
  Universal CityWalk is a unique entertainment retail center in the region. Universal CityWalk’s location between existing and future parking areas, the Universal Studios Cinemas and the Gibson Amphitheater, and the entrance gates to Universal Studios Hollywood helps link these core areas together. The main entrance plaza to Universal Studios Hollywood is located adjacent to Universal CityWalk.

**BACK LOT DISTRICT**

The Back Lot District is an important part of the movie and television motion picture production facilities at Universal Studios and is used regularly in the production of movies, television shows and commercials. The Back Lot District is located south of the Los Angeles River Flood Control Channel, between the portion of the project site in the City of Los Angeles on the east, and the Entertainment District and the Studio District on the west.

The Back Lot District currently contains outdoor sets, outdoor storage areas, circulation and parking areas, production buildings, and other entertainment production uses. In
addition, attractions such as the Bates Motel and Earthquake, which are used both as sets as well as for the Universal Studio Tour, are located in this District.

The Back Lot District will continue to contain production facilities with its current character and provide set exhibits and attractions for the Universal Studio Tour. New production-related facilities will be constructed in the Back Lot District over time.

There is often overlap between the Studio and Back Lot Districts. The distinction between the two districts has changed through time, and is likely to change in the future as new production technology and needs are developed. This is typical within a studio and the intent of the Specific Plan is to continue to allow this kind of variation. There is also intermingling of uses between the Studio District and the Entertainment District since tours originating in the Entertainment District travel through the Studio District and attractions are intermixed with production facilities.

7  UNIVERSAL STUDIOS EDGES
Enhancement of its perimeter and visual edges and entries is an important part of Universal Studios’ development since each edge has a distinct character. Creating visually cohesive, attractive edges compatible with surrounding areas is desirable. This section describes the existing conditions of each edge and shows how they relate to the overall development of Universal Studios.

FREEWAY EDGE
The Freeway Edge is visible to both northbound and southbound vehicles traveling the Cahuenga Pass and to residents in the Studio City and Cahuenga Pass areas to the west and south. The Freeway Edge is visible from Cahuenga Boulevard, though the views are obstructed by Universal Studios buildings and other development along this major roadway. Visitors arriving from the north or departing to the south usually use Cahuenga Boulevard to approach the Universal Studios Boulevard entry to Universal Studios.

For northbound traffic, the first view of the Specific Plan Area occurs at the Cahuenga Pass, from which the central hilltop is visible. The existing Universal Studios sign is located on a parking garage at the top of this hill and is oriented south to visitors arriving via the Hollywood Freeway. Buffered by trees, vegetation, and a retaining wall, the Specific Plan Area is not substantively visible to southbound traffic on the Hollywood Freeway.

South of Cahuenga Boulevard, the residential neighborhoods of Studio City and Cahuenga Pass rise to Mulholland Drive. In contrast to the brief, close or midrange views experienced by those on the Hollywood Freeway or Cahuenga Boulevard, the residences have long-range views, which encompass much of the Freeway Edge. Because of the topography, Visual Edges are perceived on the perimeter of the site and central hilltop.

The primary visitor entry to Universal Studios along the Freeway Edge is the Universal Studios Boulevard Gateway. On-site circulation improvements may include additional
parking facilities and will be designed to prevent traffic congestion on local streets. The landscape treatment of this entry may be renovated as part of the development of the new vehicular circulation improvements. Additional signs may add to the entertainment character of the entry, and help direct arriving guests and provide place-making identity. West of the Universal Studios Boulevard Gateway, W. C. Fields Drive (formerly Buddy Holly Drive) will continue to function as a frontage and access road parallel to the Hollywood Freeway.

HILLSIDE EDGE
The UHD Hillside Edge is comprised of the areas along and adjacent to Universal Hollywood Drive, starting at the main Universal Hollywood Drive gateway and dropping down the hill to the Lankershim intersection.

This edge almost exclusively faces the existing hotels on the south and west sides of the street. Any new development in this area will primarily be visible by hotel guests and those travelling on Universal Hollywood Drive. Implementation of the Specific Plan includes the re-grading of Universal Hollywood Drive to have a gentler slope, as well as a re-alignment to create additional room for a new hotel or entertainment use. The realignment will also bring streetscape improvements, including pedestrian and bicycle facilities.

URBAN EDGE
Lankershim Boulevard has the most defined urban character among the Specific Plan Edges. The location of the MTA Red Line Station across Lankershim Boulevard from Universal Hollywood Drive and the continued presence of mid- and high-rise office buildings reinforces this image.

As new development takes place along Lankershim Boulevard, it is anticipated the area will take on a more defined studio identity, stronger urban character, and a greater level of pedestrian friendliness. In this area, new buildings, with trees, shrubs, and ground cover, and pedestrian amenities are anticipated to help further define the urban character of this Edge. New signage will enhance the studio and entertainment identity of the Urban Edge.

Within this Edge, the four existing controlled-access gates on Lankershim Boulevard will continue to serve Universal Studios. Their primary purpose is providing access to the Business District’s offices and to the production facilities of the Studio District. Generally, visitors to the Entertainment District will not use these gates.

CHANNEL EDGE
The Los Angeles River Flood Control Channel and adjacent County road border the entire northern edge of Universal Studios. The Channel and road are under the jurisdiction of the Los Angeles River Flood Control District. On the north side of the Los Angeles River Flood Control Channel is a portion of the Toluca Estates single-family neighborhood and the private Lakeside Golf Course.

Within Universal Studios, the existing character of the Channel Edge varies depending on the adjacent use. Next to the industrial-style support buildings of the Back Lot, the character is functional, while adjacent to office buildings, trees and other landscape have been planted. In the future, additional visual buffering will supplement the existing landscape to enhance the appearance for the neighborhood and golf course north of the Channel.
BACK LOT EDGE

This edge is home to both production activities and Universal Studio Tour attractions. With implementation of the Evolution Plan, the Back Lot Edge will be comprised of steep topography and landscaping. A greenspace area will be maintained along the portion of the Back Lot Edge adjacent to the existing off-site residential uses to the east.

VISUAL EDGES

The variable topography of Universal Studios makes development visible which would not otherwise be visible because of its location in the elevated center of the Specific Plan Area. The Specific Plan requires visual screening of future rooftop parking, outdoor storage areas, and rooftop equipment.

The Specific Plan allows a variety of treatments to buffer development such as parking structures. These treatments will vary depending upon the space available, the particular use to be screened and the visibility of the area to be screened from the outside. In some locations, minimum landscape areas may be planted with dense masses of evergreen trees; in other areas, structures may be planted with evergreen vines, or freestanding landscape structures may feature vines or other plant materials and/or painted scenic treatments.

8 HEIGHT ZONES

The Specific Plan provides for protection of the surrounding neighborhoods by establishing height limits consistent with similar urban development. The heights were established after considering the following issues:

- Existing building heights;
- Existing topography;
- View corridors of and from surrounding neighborhoods; and,
- The proposed development program.

For example, the height limit along the Los Angeles River Flood Control Channel considers the width of the River relative to potential shade/shadow impacts on its north side, as well as existing structures and future studio operational needs. Height limits along Lankershim are taller in recognition of their lessened potential for impacts and its existing urban character.

Because of the undulating topography and the wide architectural variation on-site (including sound stages, entertainment venues, office development and hotels), all building height requirements contained in the Universal Studios Specific Plan are defined by reference to the elevation above Mean Sea Level (MSL) to the top of the structure, including all building features such as penthouses and mechanical equipment.

For the purposes of measuring height, roof structures shall include rooftop equipment and architectural elements; however, roof structures shall not include Communication Facilities which are located on high-rise buildings containing ten or more stories. Existing buildings which exceed the height limitations may remain; however, most additions to existing buildings would be required to comply with the Specific Plan height limitations.

Following is a description of the nine Height Zones within the Universal Studios Specific Plan. For purposes of understanding what the height limits are intended to accomplish the description of the Height Zone includes a reference to the approximate maximum building height in feet. Typical office buildings consist of a 15- to 20-foot
high ground floor and 10- to 14-foot upper stories. Building story heights for other uses may vary. For example, retail uses may be 20 feet per floor, hotel uses may be 10 feet per floor, and studio uses may be 60 feet high. The Height Zone regulations are found in Section 6 of the Universal Studios Specific Plan.

625 HEIGHT ZONE
The 625-foot Height Zone corresponds to the northernmost portion of the Specific Plan Area that stretches along the Los Angeles River Flood Control Channel east of the former Technicolor buildings to the eastern boundary of the Universal Studios Specific Plan Area. This Height Zone encompasses portions of the Studio District. Existing ground elevations in this area are approximately 550 feet above MSL. Therefore, the tops of new buildings within this Height Zone would be up to 75 feet in height (relative to existing and proposed grade).

650 HEIGHT ZONE
The 650-foot Height Zone corresponds to the northeastern portion of the Specific Plan Area which encompasses approximately one-third of the Studio District. Existing ground elevations vary from 535 feet to approximately 595 feet above MSL. Depending on the specific location, the tops of new buildings within this Height Zone would range up to 115 feet in height (relative to existing and proposed grade).

720 HEIGHT ZONE
The 720-foot Height Zone corresponds to the northwest corner of the Business District along the western edge of the property. Existing grades range between 550 feet and 560 feet above mean sea level, and as such, would allow the tops of building development of approximately 160 feet in height above grade.

725 HEIGHT ZONE
The 725-foot Height Zone includes a small portion of the Business District within the western portion of the Specific Plan Area, between the existing Main Gate and the existing Producer’s Building, fronting Lankershim Boulevard. Existing ground elevations within this Height Zone are at approximately 570 feet above mean sea level, and as such, would allow the tops of building development of approximately 155 feet in height above grade.

745 HEIGHT ZONE
The 745-foot Height Zone corresponds to the northwest corner of the Business District along the western edge of the property just to the north of the 725 Height Zone and south of the 720 Height Zone. Existing grade is approximately 560 feet above mean sea level, and

</table>

*Note: ft = feet; MSL = mean sea level.*

*The 890-foot Height Zone includes Height Exception areas as shown on Exhibit 2.8b, which allows buildings to be developed up to a maximum height of 1,000 feet above MSL. Buildings constructed above 890 feet above MSL shall have a cumulative floorplate area of no more than 25,000 square feet.*

Table 2.8a: Height Zones

as such, would allow the tops of building development of approximately 185 feet in height above grade.

#### 750 HEIGHT ZONE

The 750-foot Height Zone corresponds to the north-central area of the Specific Plan Area which encompasses approximately two-thirds of the Studio District and small portions of the Business District, Entertainment District, and Back Lot District.

Existing ground elevations within this Zone vary between 560 and 700 feet above MSL within the Studio, Business, Back Lot, and Entertainment Districts. Therefore, new building heights within this Height Zone would range up to 180 feet above grade in the Entertainment District and 190 feet above grade in the Back Lot, Studio, and Business Districts.

#### 820 HEIGHT ZONE

The 820-foot Height Zone corresponds to the southern portion of the Back Lot District south of the 750-foot Height Zone. This portion of the property borders the Greenspace area to the east. Existing ground elevations within this Height Zone are between 700 ft. and 780 ft., and as such, would allow the tops of building to range between 40 and 120 feet above existing grade.

#### 850 HEIGHT ZONE

The 850-foot Height Zone corresponds to much of the Business District and the western-most portion of the Entertainment District. This portion of the 850-foot Height Zone fronts Lankershim Boulevard stretching from Universal Hollywood Drive to the southern edge of the 725 Height Zone at Gate 5. Existing ground elevations within this portion of the Height
Zone vary between 560 to 655 feet above MSL. Therefore, the tops of new buildings could attain a height of 290 feet (relative to existing and proposed grade).

890 HEIGHT ZONE
The 890-foot Height Zone corresponds to the majority of the Entertainment District within the central and southern areas of the Specific Plan Area, which includes Universal Studios Hollywood and Universal CityWalk. The 890-foot Height Zone abuts the Hollywood Freeway and neighboring hotel and office buildings. Existing ground elevations within this Height Zone vary between 700 feet and 800 feet above MSL. Therefore, this Height Zone allows the tops of buildings ranging up to approximately 190 feet in height (relative to existing and proposed grades).

The 890-foot Height Zone includes Height Exception areas that allow buildings to be developed up to a maximum height of 1,000 feet MSL. Buildings constructed pursuant to the Height Exception shall have a cumulative floor plate area of more than 25,000 square feet. (Floorplate is defined as that area in square feet of the single largest horizontal plane of a building above the Height Zone within the Height Exception.) In those instances where a single building contains two or more distinct building segments that extend into the Height Exception, the floorplate is the sum total of the single largest horizontal plane.
of each building segment. The tops of building(s) constructed under the Height Exception could range up to a maximum of approximately 200 feet to 300 feet in height relative to existing and proposed grades. The Height Exception only applies to the portions of the 890-foot Height Zone within the Entertainment District denoted on the height zone map.

The maximum number of stories of structures that use the Height Exception could be anywhere up to 20-30 stories, depending on several factors. First, topography varies up to 100 feet in elevation among the Height Exception areas. At the lowest point of ground elevation among these areas, a structure could potentially include up to 30 stories. In most Height Exception areas on the top of the hill, up to 20 stories is possible. Finally, building configurations may vary, and depending on individual programming, may or may not extend all the way up to 1,000 feet MSL, further varying the potential number of stories.

32 UNIVERSAL STUDIOS SPECIFIC PLAN GUIDELINES | DRAFT - APRIL 2013
9 CIRCULATION PLAN
The Circulation Plan consists of proposed improvements to Specific Plan Area access, enhanced internal/external circulation, and convenient parking opportunities necessary to support on-site activities and uses.

ENTRY POINTS
A total of 10 entry points (3 public and 7 studio) will be available, including upgrades to the existing gateways and studio gates.

GATEWAYS
The Specific Plan Area has two existing visitor-serving gateways, one at the intersection of Universal Studios Boulevard north of the Hollywood Freeway and one at the intersection of Universal Hollywood Drive and Lankershim Boulevard. Distinctive landscape and signage identity features will be added to these two existing public gateways. A third public entry point will be added at W. C. Fields Drive (formerly Buddy Holly Drive) near Barham Boulevard.

STUDIO GATES
The four existing Studio Gates along Lankershim Boulevard at James Stewart Avenue, Main Street, Jimi Hendrix Drive and the visitor gate south of the former Technicolor buildings will remain. Two existing Studio Gates entering off Lakeside Plaza Drive and Universal Studios Boulevard, and a new gate off of Universal Hollywood Drive would provide direct, controlled access for employees, authorized visitors and deliveries to the Specific Plan Area (see Exhibit 2.9).

VEHICULAR CIRCULATION
The proposed Circulation Plan, as shown in Exhibit 2.9, would serve to separate the types of traffic by destination and minimize co-mingling of visitor and service traffic. There are two levels of roadways under the Circulation Plan: (1) primary access roads; and (2) internal streets or service roads.

- Primary Access Roads
  Universal Hollywood Drive and Universal Studios Boulevard will continue to provide the primary east-west and north-south access to and within the Specific Plan Area, respectively. Universal Hollywood Drive, which extends between Lankershim Boulevard and Universal Studios Boulevard, providing access to parking structures within Universal Studios Hollywood and Universal CityWalk, will be realigned and widened to facilitate travel between these two roadways. Universal Studios Boulevard extends over the Hollywood Freeway between Cahuenga Boulevard and W. C. Fields Drive (formerly Buddy Holly Drive) and continues on to parking structures within Universal CityWalk. W. C. Fields Drive may also be widened to a two-way roadway. The main function of these primary access roads is to lead visitors into parking structures, where they leave their personal vehicles, and then move around the Entertainment District on foot or by the Universal shuttle system.

- Internal Streets
  Internal circulation roadways, consisting of private streets, will be developed in accordance with applicable design guidelines and emergency vehicle access requirements. The internal street system will continue to be restricted to authorized vehicles, as well as vendor-owned service vehicles and vehicles driven by studio employees and guests.
PEDESTRIAN CIRCULATION AND PUBLIC TRANSIT

Combined with the portions of the project area in the City of Los Angeles, the Universal Studios Specific Plan will be a transit-oriented development, generating greater pedestrian circulation than currently exists. The new development calls for the realignment of Universal Hollywood Drive to improve overall circulation both on-site and off-site. This provides opportunities for new shaded sidewalks and new bike routes. Connections from the MTA Red Line Rail Station at Lankershim Boulevard and Universal Hollywood Drive will encourage the use of transit for employees and visitors. The four existing pedestrian plazas within the Entertainment District will remain.

In areas of the property with substantial grade differentials (e.g., between Universal CityWalk and offices in the Studio District), shuttles, escalators, exterior stairways, moving sidewalks and/or elevators may be provided. Pedestrian access to the property will be maintained via sidewalks located along Universal Hollywood Drive, Universal Studios Boulevard, and Lakeside Plaza Drive. A tram currently operates along Universal Hollywood Drive that transports people from near its intersection with Lankershim Boulevard, up the hill to the Entertainment District in the center of the Specific Plan Area. This tram service...
will continue operating. In addition, a shuttle would provide connection between the MTA Red Line Station, the Entertainment District, and uses within the portions of the project site within the City of Los Angeles.

BICYCLE TRANSPORTATION
Bicycle transportation features including bicycle racks and lockers to secure personal property are currently provided within the Specific Plan Area. These features will be expanded with additional bike racks and lockers provided at various locations. As shown in the Circulation Plan provided in Exhibit 2.9, new bike routes will be introduced in the realigned Universal Hollywood Drive passing south of CityWalk, connecting to the portions of the project area within the City of Los Angeles. Long term County bikeway plans include the potential for a future Class I bike path along the existing L.A. River north of the project site. The existing River Road along the County right-of-way is currently leased to Universal Studios for internal circulation purposes.

PARKING
Existing parking facilities will be maintained, and expanded parking options added throughout the Specific Plan Area with several new parking facilities. The Specific Plan provides parking requirements for the proposed uses based on the following general objectives:

- Provide adequate and convenient parking for visitors and employees;
- Provide linkages to destination venues, parking facilities, and transit services with shuttles, trams, escalators, landscaped walkways, and pedestrian plazas;
- Clearly marked directions to parking facilities to provide adequate decision times for arriving vehicles;
- Wherever possible, locate parking facilities in places that allow visitors to park quickly and conveniently in order to lessen peripheral traffic impacts;
- Permit shared parking when it is demonstrated, based upon an analysis of parking demand, that parking spaces utilized by more than one use would not affect the availability of required parking for each use, taking into account their hours of operation; and
- Provide a coherent parking payment and wayfinding system that facilitates the flow of vehicles, thus minimizing potential traffic congestion and idling on access roads and within parking lots/structures.

To achieve these objectives, a site-wide parking strategy is proposed that provides a series of destination parking facilities which, where appropriate, may be capable of shared use during varied peak demand periods pursuant to the limitations and regulations of the Specific Plan. The locations of future parking facilities are not fixed under the Specific Plan, but facilities would be provided, as appropriate and necessary, to meet projected parking demand and Specific Plan goals. Entrances to parking facilities will be provided with an appropriate number of control lanes and adequate queuing area to avoid back-up or congestion onto public roadways.
10 CONCEPTUAL PLAN

The Conceptual Plan is an illustration of how development within the Universal Studios Specific Plan Area may occur and how such development would conform to the Specific Plan. The Conceptual Plan represents a reasonable scenario of how buildout of the Specific Plan Area may appear based on current market conditions and existing and planned primary uses. Actual development will be governed by the requirements of the Specific Plan and not by what is shown in the Conceptual Plan.

The Conceptual Plan is consistent with the overall allocation of land uses shown in Table 2.5a, and with all development limits and regulations of the Specific Plan. While the illustration of the Conceptual Plan presented in Exhibit 2.10 suggests how the future Specific Plan Area may appear, the precise location and orientation of actual future buildings has not been determined.
chapter 3:
DESIGN PLAN
chapter 3: DESIGN PLAN

1 INTRODUCTION
This Chapter describes the built and natural features influencing the Specific Plan Area, and establishes Design Goals that are the basis of physical and design-related Specific Plan regulations.

The purpose of the Design Plan is to establish a physical design framework for Universal Studios that improves the overall function and appearance of Universal Studios; and enhances Universal Studios’ relationship with existing and proposed surrounding neighborhoods.

The Design Plan addresses several areas of design: overall site layout, urban design and architecture, landscape, lighting and signs. The illustrations in this chapter show how these elements might be implemented to create the effects described by the Design Plan. They are intended to convey general design intent and represent one of many possible design solutions consistent with the Specific Plan, and final designs may change as the property is developed over time. The Specific Plan regulations contain the required design standards applicable to development of Universal Studios.

2 DESIGN INFLUENCES
The Design Plan of the Universal Studios Specific Plan has several important influences, which overlap to create the framework for the physical development of the Specific Plan Area. The height limits, total Permitted Floor Area, and sustainability measures of the Specific Plan are derived from the combination of these influences and factors.
ENTERTAINMENT IDENTITY
The primary influence of the Specific Plan Area is the identity of Universal Studios in the entertainment industry and its role as an “entertainment city”—a place where entertainment is conceived, created, produced, and enjoyed. Universal Studios was the first studio to open for visitors and this is an important element in the design framework for the Specific Plan Area.

OPERATIONAL COMPATIBILITY AND FLEXIBILITY
The production of entertainment such as film, television, and theme park venues, and the combination thereof, requires the physical and functional flexibility typically afforded industrial uses. From sound stages to outdoor filming locations to theme rides, Universal Studios requires flexibility in the siting, physical envelope, and circulation among its varied uses to remain competitive.
PHYSICAL CHARACTER
The Specific Plan Area’s physical character and, in particular, the prominent hill located in its center, adjacent to the Hollywood Freeway, also plays a role in the Design Plan. This hill is an important visual feature of the Specific Plan Area and represents an opportunity to enhance Universal Studios’ image as the Specific Plan is implemented.

Both on-site and adjacent off-site buildings play a role in the physical character of the Specific Plan Area, influencing the Design Plan in terms of the location and size of potential future structures. The existing circulation system also plays a substantial role in the Design Plan. This includes continuing to efficiently move visitors into, out of, and through the Theme Park, allowing general employee circulation, and transporting equipment around the Specific Plan Area as needed.

Discussed in greater detail in the Plan Description Chapter, the Specific Plan Area’s existing physical character can be portrayed by four overlapping districts: Entertainment, Studio, Back Lot and Business Districts. The Entertainment District includes CityWalk and Universal Studios Hollywood (Theme Park), and can primarily be identified by the imaginative, thematic, and iconic structures currently present. Large, pedestrian-oriented gathering spaces and plaza-like areas are important and valuable components of the Entertainment District. Parking structures and surface lots are also visible elements of this District.

Thematic structures and areas can also be found in the Studio District, which is also comprised of a wide variety of stage, production, post-production, and other structures, as well as open spaces for outdoor production. The Studio District may at any one time be home to several outdoor stages designed and built to represent any real or imagined location or time period.

The Back Lot District is primarily characterized by outdoor sets, outdoor storage areas, circulation and parking areas, production buildings, and other entertainment production
uses that are part of both the behind-the-scenes aspect of Universal Studios as well as the more public Universal Studio Tour. It is less densely developed than other districts on the property and is thus defined by its comparatively lower buildings and more ample open space.

The Business District primarily includes office and parking structures, with production, post-production, and theme park uses spilling in. It is important to note that despite these general characterizations, a diverse mix of uses is present across the entire Universal Studios Specific Plan Area. The Universal Studio Tour and the northern portion of the Theme Park offer examples of how Districts within the Universal Studios Specific Plan Area may overlap. Additionally, office structures may be present in either the Studio or Entertainment Districts.

DIVERSE PERIMETER CONDITIONS
The Universal Studios Specific Plan site is surrounded by a variety of uses and conditions. This necessitates unique design solutions that vary according to the specific situation and particular site requirements. For example, the design character of a prominent office building facing Lankershim Boulevard will likely be different from the design of a functional sound stage located internal to the site. Height limits and development standards related to character are influenced by the uses adjacent to the Specific Plan Area.

ENVIRONMENTAL SUSTAINABILITY
The Universal Studios Specific Plan recognizes the importance of environmental stewardship, and measures consistent with those implemented by the County of Los Angeles are part of the Design Plan. As applicable, new buildings will meet established sustainable design goals and landscaped areas will use drought-tolerant plants. These measures are more fully described below.

3 DESIGN GOALS
The Design Goals are general statements that establish the overall intent of the Design Plan. Additional text describes the rationale for each Design Goal and clarifies the purpose and meaning of each. An important aspect of the Design Goals is their interrelationship—each affects and influences the others, and is affected itself by the others. This interplay is intended to strengthen their overall effectiveness.

CREATE A VISUALLY COHERENT PLACE TO SERVE AS A MODEL FOR THE ENTERTAINMENT INDUSTRY AND THE GREATER LOS ANGELES REGION.
As a leading Southern California entertainment destination, it is important for Universal Studios to continue to create a memorable impression to both passersby and visitors. The existing CityWalk skyline treatment on the prominent central hilltop, for example, plays an important part in establishing Universal Studios’ image. In addition, iconic signs, architectural features, landscape treatments and other elements currently help establish Universal Studios’ image. This goal acknowledges the importance of a memorable image to Universal Studios’ long-term success.

CREATE AN ATTRACTIVE, APPEALING ENVIRONMENT FOR VISITORS, BUSINESSES, EMPLOYEES AND THE GREATER COMMUNITY
Universal Studios currently attracts local, regional, national, and international visitors, as well as innovative entertainment companies and their employees. To maintain its business position and improve visitor attendance at its attractions, Universal Studios will continuously be improved. Ongoing improvements to the Studio and Business Districts are intended to attract new entertainment business and their supporting services. New
entertainment venues and/or attractions will be added and older ones retired or renovated; and the appearance of the Specific Plan Area improved. A new hotel will allow visitors to stay for extended periods of time. Outdoor uses, including entertainment attractions and production activities, will continue to be enhanced. Maintaining and enhancing a visually exciting, attractive and appealing site will help Universal Studios maintain its role in the entertainment world.

**ENCOURAGE FLEXIBLE, IMAGINATIVE, SUSTAINABLE AND CREATIVE DESIGNS**

This goal recognizes the need for flexibility as development occurs in Universal Studios, balanced with the need for environmental responsibility. Flexibility is required not only because of the variety of uses, activities and existing conditions within the Specific Plan Area, but also because the Specific Plan will be implemented over a number of years, and situations are likely to occur that cannot be predicted today. In addition, the entertainment industry will likely undergo changes and improvements as a result of the development of new technology and changes in demographics. To achieve flexibility, the Design Plan describes the design concepts of the Specific Plan without specifying particular design solutions. The intent is to allow creative, imaginative design solutions within the limitations established in the Specific Plan.

**PROMOTE COMPATIBILITY WITH SURROUNDING NEIGHBORHOODS, INCLUDING PRESERVATION OF VIEWS AND VISUAL RESOURCES**

Because of its location on a hilltop and at the edge of the Hollywood Hills, Universal Studios is visible from surrounding streets and neighborhoods. The fourth goal acknowledges Universal Studios’ desire to be a good neighbor to those who live, work, or play near the Specific Plan Area. The Design Plan describes how future Universal Studios development will be compatible with surrounding uses and neighborhoods.
ACKNOWLEDGE AND BUILD ON THE INHERENT STRENGTHS OF THE SITE AND EXISTING DEVELOPMENT IN RESPONSE TO EXISTING SITE OPPORTUNITIES AND CONSTRAINTS

Although the Specific Plan proposes new development, much of what exists today will continue to be present through its lifespan. This goal of the Design Plan recognizes the need to incorporate future development into an existing context. It also acknowledges the varying physical character of the Specific Plan Area, which consists of a prominent central hilltop, gentle hillsides, and a flat valley bottom next to the Los Angeles River Flood Control Channel.

4 GENERAL DESIGN PRINCIPLES

The General Design Principles describe general concepts, which implement the Design Goals of the Specific Plan and are consistent with the definitions of the Universal Studios Specific Plan. They reflect design approaches that may be used to address aesthetic, environmental, and functional considerations.

AESTHETIC AND ENVIRONMENTAL PRINCIPLES

- **Create a “hilltop skyline” image that takes advantage of the site’s topography**
  The Specific Plan Area’s central hilltop is one of its most prominent features and is already an architectural focus of Universal Studios. This focus may be expanded and enhanced through the creation of a visible skyline (subject to height restrictions specified in the Specific Plan).

- **Encourage a variety of architectural character that responds to Universal Studios’ unique mix of uses and activities**
  An important element of Universal Studios’ existing visual character is the variety of building types and architectural characters found on-site. This variety is encouraged as a means to further Universal Studios’ diverse Entertainment, Studio, Back Lot, and Business uses.

- **Establish a unifying background of large-scale evergreen plants utilizing a traditional Southern California plant palette**
  The landscape of the Specific Plan Area can help visually unify its diverse uses, architecture, and varying terrain. A traditional Southern California plant palette should be used (see Section 7 in Chapter 5) to emphasize evergreen trees and shrubs, as well as exotic and colorful plants, which have contributed to Southern California’s reputation as a world-class garden environment.

- **Create special entries at each portal to Universal Studios**
  There are a limited number of access points into Universal Studios. These portals should be framed as special entries that are distinctive places in and of themselves. Designs which express Universal Studios’ image, and which include the imaginative landscape, hardscape, architecture, lighting, signs, and thematic elements of the Studio Tour, Theme Park, and City Walk are envisioned.

- **Identify Universal Studios as a unique place with imaginative signs and thematic elements**
  The entertainment industry has always utilized signs in imaginative and creative ways to create image, advertise, and identify its products. The continuing evolution of signs and thematic elements that help establish Universal Studios’ image as a unique entertainment experience is envisioned.
Permit creative signs, consistent with Universal Studios’ “entertainment city” image. Universal Studios’ large area, varied edges, and regionally prominent central hilltop enable placement of creative signs that identify the Specific Plan Area as an entertainment destination. Universal Studios’ identifying elements should be of a scale consistent with the site’s size.

Acknowledge the site’s hilltop location with visual buffers and other measures to enhance Universal Studios’ off-site image. To respond to the views of the Specific Plan Area from surrounding hillsides, visual buffers such as landscaping and otherscreening treatments should be provided to better integrate Universal Studios within its context.

Respond to the varying conditions of each of the site’s five edges. Each of Universal Studios’ edges has a different character and relationship to its surroundings. Each edge and its particular conditions should be considered as part of the design of development adjacent to that edge. For example, the urban streetscape character of Lankershim Boulevard, adjacent large-scale buildings and flat terrain, is qualitatively different than the high speed Hollywood Freeway edge, with its rolling terrain and landscaped hillside.

Integrate illumination and lighting effects with architecture, signs and landscape to reinforce and enhance Universal Studios’ “entertainment city” image. As a nighttime, as well as daytime attraction, lighting will continue to be an integral part of the Universal Studios experience. Lighting and its effects should be integrated into the design of other elements, such as buildings, signs, thematic elements, entries and landscapes. The intent is for lighting to reinforce these elements to create an expression of Universal Studios’ image while recognizing limitations required for adjacent uses.

Establish a hierarchy of lighting and lighting effects in which the most important elements have the most distinct illumination. Nighttime lighting should promote an organization that better reflects the hierarchy of importance of Universal Studios attractions or buildings. For example, the apparent importance of a parking garage should be reduced by screening its internal lighting so that a main entry Gateway would appear more visually prominent.

**FUNCTIONAL CONSIDERATIONS**

This group of Design Principles is intended to address the functional design needs of Universal Studios. These Design Principles are intended to provide for the safety and convenience of visitors and employees, as well as the flexibility in specific design solutions.

Allow flexibility in location and orientation of buildings. Although the Specific Plan regulates land uses, building heights, and other development standards, building orientation may vary according to the requirements of the particular building program. Accordingly, buildings may have an “outward” (towards the perimeter boundary), “inward” (towards the center of Universal Studios), or other orientation, independent of other considerations.

Signs that direct and inform visitors will be an integral part of Universal Studios development. Because of the size and location of uses within Universal Studios, signs will be required throughout the site to direct and inform visitors coming to Universal Studios. These signs should be visually appealing and consistent with the Universal Studios brand.
Studios, and to facilitate vehicular and pedestrian circulation; some signs will be regulatory (e.g., “no parking”). The design of these signs should be coordinated with other development within Universal Studios.

c **Minimize spill over of nighttime illumination off-site**

Although some lighting will be used to establish an entertainment studio image, lighting intended to serve more functional purposes, such as along roads, in parking areas, or within parking structures, should be reduced where appropriate. Such illumination will be at minimum safe levels, will be directed away from neighboring residential areas, and shielded to comply with the Universal Studios Specific Plan.

c **Establish a fence and wall hierarchy**

Fences and walls should be designed to observe a hierarchy in which the most visually prominent will be considered part of the overall design of the particular feature. For example, a security fence hidden from view may be a simple functional design, while a fence intended to be part of a major entry treatment may be more elaborate in design. Sound or retaining walls should be similarly considered.

5 EDGE DESIGN PRINCIPLES

To address considerations of off-site visibility, the Design Plan identifies two types of edges: Perimeter Edges and Visual Edges. As the name suggests, Perimeter Edges occur at the Specific Plan Area perimeter. The Specific Plan utilizes traditional means of addressing Perimeter Edges and promotes screening of parking lots, service areas, and blank walls. A Visual Edge is a portion of development, which is visible off-site, but which may occur away from the Perimeter Edge and which may be difficult to address with visual buffers within Perimeter Edge treatments. Because of the topography of the central hilltop and the hillsides surrounding Universal Studios, some interior development creates a Visual Edge. The Design Principles in this section are intended to address the need for screening from view development within the Universal Studios Specific Plan Area, which is not intended to enhance its overall image, but which would otherwise be visible. The intent is to provide visual cohesion to the overall image of Universal Studios and to focus opportunities for architectural design to enhance the hilltop skyline.

c **Visually buffer development not intended to enhance Universal Studios’ image**

Parking areas, parking structures, or service areas should be visually buffered when the facade of the development itself is not designed to enhance Universal Studios’ image. Visual buffers for signs, lighting, or thematic elements oriented inward, towards visitors at Universal Studios attractions, may also be appropriate. This Design Principle addresses the need for visual buffering on both Perimeter and Visual Edges.
c Permit a variety of approaches to visual buffers
Visual buffers may be created by a variety of means. Where there is sufficient
space, dense planting of large-scale evergreen trees are frequently an appropriate
screening method. Where space is limited or insufficient soil exists to allow trees
to reach their mature height, other screening methods may be used. They may
include screening by another building, a landscape structure (such as a trellis),
graphic treatment (i.e., painted surfaces which disguise the element), a thematic
element or a combination of these techniques.

6 EDGE DESIGN IMPLEMENTATION
This section describes potential design applications of the Specific Plan’s Design Principles
to four edge areas in the Universal Studios Specific Plan Area. These guidelines, which
follow the description of the relevant design considerations, are intended to describe how
the regulations contained in the Specific Plan will address existing design considerations,
as well as conditions likely to be created as new development occurs.

THE URBAN EDGE
The portion of Lankershim Boulevard between the Hollywood Freeway and the Los
Angeles River Flood Control Channel is the most urban in character among the edges.
The Universal Studios Specific Plan side of Lankershim includes the former Technicolor
buildings and Bank of America, as well as the Lew R. Wasserman and Jules Stein office
buildings. The CityView Lofts multifamily residential building, Campo de Cahuenga, and
an MTA Red Line subway station with existing surface parking. The 10 UCP office tower is
also on the south side of Universal Hollywood Drive in this area and is a significant visible
feature of the area.

Transit ridership at the MTA Red Line is expected to continue to increase over the life of
this Specific Plan, as the Specific Plan Area and its surroundings continue to mature and
develop.

c Lankershim Boulevard Streetscape
Future improvements to Lankershim Boulevard, combined with the anticipated
development of new offices and other facilities within Universal Studios, represent
an opportunity to create an integrated streetscape design. The streetscapes should
visually integrate public and private improvements so that the area between
the Hollywood Freeway and the Los Angeles River Flood Control Channel has a
distinct, individual character which uniquely defines Universal Studios. Proprietary
product signs featuring current productions or other attractions of Universal
Studios will continue to be part of the character of the Lankershim streetscape.

As new buildings are constructed along the Lankershim frontage, streetscape
improvements would be implemented on the east side of Lankershim Boulevard
according to the Conceptual Lankershim Streetscape Plan (Exhibit 3.6a). Proposed
improvements include a streetscape zone from the curb of Lankershim Boulevard
to the security fencing and walls along the Specific Plan Area, typically providing
an average sidewalk width of 8 feet, while narrowing to approximately 6 ½ feet
adjacent to street trees.

Street Trees & Sidewalk Plantings
A consistent street tree, such as Canary Island Palms, is proposed for the entire
Lankershim frontage adjacent to the Specific Plan Area (see Chapter 5, Section
7). The same tree species could also be used by the City of Los Angeles on the
southbound (west) side of the street to provide a unified treatment to both sides
of the boulevard. The street trees typically would be spaced at 35 feet on center,
with 4-foot square decomposed granite tree wells. Between each street tree, consistently sized and spaced planting areas adjacent to the curb would provide a low-height landscaping using a consistent plant palette.

Security Fencing

To maintain a level of security that meets existing and future studio needs, new fencing and vehicle barriers are planned adjacent to the sidewalk on the Specific Plan Area side of the streetscape zone. New security would include a planting area at the base of an approximately 3-foot high concrete vehicle barrier topped with a painted 7-foot high steel-bar fence. While providing important and necessary security for the Specific Plan Area, the design of the vertical steel bar fencing would be attractive and open, allowing views of the property instead of a solid wall.

Landscape Area Inside Security Fencing

The landscape areas inside the security fencing, wholly within the Specific Plan Area, would vary greatly in width and size. These areas would be landscaped in accordance with the general landscape requirements in the Specific Plan, and maintain consistency with a conceptual planting palette (see Chapter 5, Section 7).

Studio Gates

Lankershim Boulevard is the current and future location of the four main gates to the Studio District. Staffed gatehouse checkpoints at these gates will continue to control the flow of vehicles onto the Studio premises. As development of the Studio and Business Districts proceeds, enhancements will be made to the gates, which may include special architectural treatments, new landscape, gatehouse renovation, improved pedestrian access and development of image-enhancing signs and thematic elements.

THE UHD HILLSIDE EDGE

As previously mentioned, this edge is comprised of the areas along and adjacent to Universal Hollywood Drive, starting at the main Universal Hollywood Drive gateway and dropping down the hill to the Lankershim intersection. The edge includes a new vehicular entry to the studio.

Universal Hollywood Drive Gateway

The Universal Hollywood Drive Gateway may undergo changes as a result of improvements to Lankershim Boulevard. These changes may include new landscaping, signs, thematic elements, architectural and lighting treatments.

Universal Hollywood Drive Streetscape

Universal Hollywood Drive will be realigned as part of the Evolution Plan, and with this change, topographic grading is also proposed to make the hill less steep. Streetscape improvements along Universal Hollywood Drive will help define this edge. The street-facing facade of new buildings and new identity signage will also further define the character of the streetscape and the UHD Hillside Edge.
Exhibit 3.6a: Conceptual Lankershim Streetscape Plan
Exhibit 3.6b: Conceptual Lankershim Streetscape Plan Typical Detail
Exhibit 3.6c: Illustration of an enhanced Lankershim streetscape, which will contribute positively to the image of the studio and its surroundings.

Exhibit 3.6d: Conceptual section of Universal Hollywood Drive reconfiguration along UHD Hillside Edge.
THE FREEWAY EDGE
The Freeway Edge includes the portion of the Universal Studios Specific Plan Area adjacent to the Hollywood Freeway between Barham Boulevard and Lankershim Boulevard. It also includes portions of the Specific Plan Area’s central hilltop that are visible from Cahuenga Boulevard and the residential areas to the south.

- **Skyline silhouette**
  The prominence of the central hilltop and its location within the Entertainment District makes it suitable for a skyline silhouette treatment, which continues and extends the treatment already begun with the existing views of CityWalk. Within the height limits established by the Specific Plan, the architectural skyline treatment will evolve as development of the Entertainment District continues. Other elements of the skyline silhouette will include thematic elements, landscape, signs, illuminated surfaces, and lighting elements.

- **Landscaping**
  Landscaping will be established to create visual definition to screen views of certain parking structures and outdoor storage areas. Landscaping may consist of dense masses of tall-growing evergreen trees, trellis structures or frames, or other landscape treatments.

  New landscaping should supplement and enhance the existing landscape. Where new buildings displace existing landscape, new landscape and facade treatments should be planned to provide visual continuity.

- **Directional and information signs**
  Many of Universal Studios’ guests will arrive via the Hollywood Freeway. Since some visitors are not familiar with the area, directional and information signs will be needed to guide them to the appropriate Universal Studios entries.

- **Large-scale site thematic elements**
  Because of its central hilltop, the Freeway Edge is a prime location for iconic thematic elements which help create Universal Studios’ image. Thematic elements may include arches, gateways, sets, attraction icons, towers, spires, monuments, and sculptures. Special lighting of these elements will further enhance the distinct identity of Universal Studios’ skyline.

- **Universal Studios Boulevard Visitor Gateway**
  The Universal Studios Boulevard Visitor Gateway is one of Universal Studios’ major arrival points. It is particularly important to visitors at Universal Studios’ entertainment venues. The treatment of this entry should consist primarily of landscaping supplemented with thematic elements, entertainment, directional and informational signs. Special architectural treatments of buildings, which border the Visitor Gateway area may also occur, as well as special lighting treatments.

THE CHANNEL EDGE
The Los Angeles River Flood Control Channel and the County Flood Control District access road form the northern boundary of Universal Studios. Because of the limited public access, this edge is less visible than the Universal Studios Specific Plan Area’s other edges. The principal viewpoints are from private residences in the Toluca Lake area, a private golf course immediately north of the Channel, and from southbound
lanes of Barham Boulevard to the northeast. The Specific Plan Area's central hilltop and adjacent north-facing hillside forms the backdrop to the views of this edge of Universal Studios.

Existing on-site uses in the Back Lot District, such as sound stages and production facilities have an industrial character similar to other motion picture production facilities in Southern California. Future development will likely include more buildings with uses similar to the existing uses. Outdoor production sets may be also developed in this area.

- Property line buffers
  Existing and future uses immediately adjacent to the Channel Edge should be buffered from view by screening elements as development proceeds and where there is sufficient space. Landscaping in this area should consist of large-scale evergreen and deciduous trees.

THE BACK LOT EDGE
The Back Lot Edge consists of two areas: one portion adjacent to the portion of the project area in the City of Los Angeles adjacent to Barham Boulevard in the northeast corner of the property and the area bordering the Hollywood Manor neighborhood and the southeastern portion of the project area in the City of Los Angeles. Some of these edges are comprised of steep topography and landscaping and include sets/facades used in connection with production activities. A greenspace area will be maintained along the portion of the Back Lot Edge adjacent to the existing off-site residential uses to the east, as shown in Exhibit 2-C Universal Studios Specific Plan Greenspace Area, of the Universal Studios Specific Plan.
chapter 4: INFRASTRUCTURE
This chapter addresses infrastructure improvements other than transportation circulation improvements which are addressed in Chapter 5, ‘Specific Plan Implementation.’ The detailed sequence of the implementation of the Infrastructure Plan will be developed as projects are submitted for Substantial Conformance Review pursuant to the Universal Studios Specific Plan.

1 STORM DRAIN
The majority of the Specific Plan Area currently drains northerly to the Los Angeles River Flood Control Channel via an on-site storm drain system. Additionally, some storm water flows drain easterly towards Barham Boulevard and southerly towards the Hollywood Freeway. The on-site proposed improvements will include specific on-site flood control infrastructure as needed for new development. The remainder of the Specific Plan Area will continue to utilize existing storm drain lines. (See Exhibit 4.1.)

Implementation of the Universal Studios Specific Plan includes the potential construction and/or relocation of several outfalls to the Los Angeles River Flood Control Channel. These off-site improvements would be limited to the access road adjacent to the Los Angeles River Flood Control Channel and no changes will occur to the off-site storm drains.

Development within the Specific Plan Area requires the construction of development-specific minor flood control infrastructure to convey stormwater flows associated with each new project to the major stormwater infrastructure described above.
2 SANITARY SEWER

A sewer collection system is maintained and operated on-site within the Universal Studios Specific Plan Area. All collected wastewater flows to a central point located adjacent to the Los Angeles River Flood Control Channel where the wastewater discharges into the relief sewer operated by the City of Los Angeles. This wastewater is treated at the Hyperion Treatment Plant also owned and operated by the City of Los Angeles.

Development within the Specific Plan Area will provide new on-site sanitary sewer system improvements as needed to accommodate any additional development. Any additional on-site sanitary sewers will conform to the applicable standards of the Los Angeles County Department of Public Works.

Planned infrastructure improvements are illustrated in Exhibit 4.2, Conceptual sanitary sewer plan.

Exhibit 4.2: Conceptual sanitary sewer plan
3 WATER (POTABLE WATER AND RECLAIMED WATER)

Water service to the Specific Plan Area is provided by the Los Angeles Department of Water and Power (LADWP). Connections to the LADWP water system pipelines are at or within the Universal Studios Specific Plan Area. LADWP provides water for both domestic and fire service. Fire protection is maintained and operated on-site with domestic water system pipelines.

Implementation of the Universal Studios Specific Plan includes expansion of and improvements to the existing on-site water systems as needed to serve new buildings. Additional connections will be required for the potable water system and for the fire protection system, and the design and installation of new water lines will meet applicable County standards.

Planned potable water and recycled water infrastructure improvements are illustrated in Exhibit 4.3a, Conceptual water facilities plan and Exhibit 4.3b, Conceptual reclaimed water facilities plan. Exhibit 4.3c shows existing and proposed facilities for fire water.

Recycled water is provided to the Specific Plan Area by LADWP. A recycled water distribution system is used to irrigate most of its landscaped areas, and for other approved industrial uses within the Specific Plan Area. New recycled water mains and underground storage tanks to accommodate the increase in recycled water demand will be constructed within the Specific Plan Area.

Exhibit 4.3a: Conceptual water facilities plan
4 SOLID WASTE
Solid waste collection, reuse, recycling and disposal are regulated by the County of Los Angeles Sanitation District and the Department of Public Works. Currently both public and private refuse collection services and disposal facilities are used.

The Universal Studios Specific Plan Area will continue to implement conservation and recycling measures as part of its solid waste reduction program.

Exhibit 4.3b: Conceptual reclaimed water facilities plan
5 ELECTRICITY
The Universal Studios Specific Plan Area currently receives service from two electric utility suppliers. Southern California Edison (SCE) serves the County of Los Angeles portion of the property and the Department of Water and Power serves facilities on the property currently in the City of Los Angeles. SCE will continue to serve the Universal Studios Specific Plan Area. An electrical substation is maintained and operated on-site that receives bulk power directly from SCE, transforms it, and then provides it within the property with its own distribution system.

Additional electrical capacity will be provided in conjunction with future development as necessary to serve future on-site needs. The existing Edison Universal Substation has a capacity of 22 MVA and the existing Studio Master Substation has a capacity of 40 MVA. Planned improvements include expansion of the Studio Master Substation, connection to the Edison Universal Substation and installation of an additional 66kV transmission line to supply an additional 60 MVA for the Specific Plan Area. This additional 60 MVA would increase the total capacity of the Studio Master Substation to 100 MVA. The private on-site electrical system will have a new distribution substation as well as new electrical lines to serve new buildings constructed pursuant to the Specific Plan. Planned infrastructure improvements are illustrated in Exhibit 4.5a, Conceptual electrical facilities plan.
Exhibit 4.5: Conceptual electrical facilities plan
6 NATURAL GAS
The Southern California Gas Company currently provides natural gas service to the Specific Plan Area. Existing off-site mains connect to the on-site gas distribution system at the property boundary.

Natural gas will continue to be provided to the Specific Plan Area via the existing gas lines at the property boundaries from either Lankershim Boulevard or Barham Boulevard. The property owner will continue to own and maintain the gas distribution network within the Specific Plan Area.

The proposed improvements to the on-site system of natural gas distribution lines includes new gas lines to serve the portions of the project area in the City of Los Angeles. A portion of the existing gas main located in Universal Hollywood Drive would need to be relocated consistent with the proposed realignment of Universal Hollywood Drive. Additional gas lines may be added on-site to distribute natural gas. The natural gas infrastructure improvements which are planned to implement the Specific Plan are illustrated in Exhibit 4.6, Conceptual natural gas facilities plan.
chapter 5:
IMPLEMENTATION
chapter 5: IMPLEMENTATION

1 SPECIFIC PLAN ZONE
As part of the actions related to the Universal Studios Specific Plan, a single zone will be established over the entire Specific Plan Area. That zoning designation, “SP” (Specific Plan), refers to uniform and extensive land use development regulations contained in the Universal Studios Specific Plan, which will govern future development of the property. In cases where the Specific Plan does not address a particular situation, the regulations and development standards contained within the Los Angeles County Zoning Code (Title 22), as of the effective date of the Specific Plan, will apply. (See Appendix A for applicable County Code Title 22).

2 SUBSTANTIAL CONFORMANCE REVIEW
The Universal Studios Specific Plan establishes a procedure called Substantial Conformance Review to ensure the provisions of the Specific Plan are met. This Substantial Conformance Review procedure is a ministerial process that requires Projects within the Universal Studios Specific Plan boundary to be reviewed by the designated County Planning Department staff to verify compliance with the regulations of the Specific Plan. As part of the Substantial Conformance Review process, the applicant must demonstrate that the proposed Project complies with all requirements, including, but not necessarily limited to: maximum development restrictions, visual buffers, and building height limitations. The Specific Plan defines a “Project” for the Substantial Conformance Review procedure as the construction, erection, addition to, or structural alteration of, any building or structure, a use of building or land, or change of use of building or land, on a lot located in whole or in part within the Specific Plan area, which requires the issuance of a grading permit, foundation permit, building permit, or land use permit, and which results in a net increase of Floor Area or a change in Land Use Category. A Project does not include the following:
  • Sets/Facades (temporary or permanent)
  • Temporary Uses (as defined)
  • Signs (as defined)
  • Production Activities (as defined including outdoor production)
As a further assurance of compliance, an annual report will be prepared yearly by the property owner(s), which describes the progress of implementation of the Specific Plan in a number of areas, including the total Floor Area (square feet) developed in each land use category and information on completed Projects.
3 TRANSPORTATION AND CIRCULATION
A number of circulation improvements are planned in and around the Universal Studios Specific Plan Area. These include internal circulation improvements, and a Transportation Demand Management Program. These improvements will help improve circulation on-site, in the vicinity of Universal Studios, and regionally.

PLANNED INTERNAL CIRCULATION IMPROVEMENTS
As the Specific Plan Area is developed, internal circulation improvements will be implemented to adequately service the development areas. The following internal circulation improvements are planned for the Specific Plan Area:
- Improved connection of Universal Hollywood Drive from Lankershim Boulevard to Universal Studios Boulevard;
- Widening of Universal Hollywood Drive to three lanes in each direction from the Entertainment District to Lankershim Boulevard;
- New gate entrance from Universal Hollywood Drive;
- Improvement of internal service access roads.

TRANSPORTATION DEMAND MANAGEMENT PROGRAM
The proposed Transportation Demand Management Program will be implemented by the Universal Studios Specific Plan Area property owner. Prior to the issuance of the first Substantial Conformance Review for the first project developed under this Specific Plan, the Applicant shall provide documentation satisfactory to the Director that a Transportation Demand Management program has been prepared to the satisfaction of the City of Los
Angeles Department of Transportation. These strategies would generally help reduce employee and patron trips on the street and freeway system during the most congested time periods of the day. They include, but are not limited to, the following:

- Flexible work schedules and telecommuting programs;
- Alternative work schedules;
- Pedestrian-friendly environment;
- Bicycle amenities;
- Rideshare/carpool/vanpool promotion and support;
- Education and information on alternative transportation modes;
- Transportation Information Center;
- Guaranteed Ride Home Program;
- Join an existing or form a new Transportation Management Association;
- Participation in a flex cars program; and
- Discounted transit passes.

Exhibit 5.3b: Conceptual plan of Universal Hollywood Drive reconfiguration
4 PERMITTED USES
The uses and facilities allowed within the Studio, Business, and Entertainment Districts include the following:
- Production Activities (including outdoor production)
- Production Facilities
- Promotional activities
- Public dancing and live entertainment
- Public Services Facilities
- Pyrotechnic special effects and storage
- Recreational facilities
- Recycling facilities
- Research and development facilities
- Restaurants, cafes, coffee shops, bars, dinner theaters and nightclubs (indoor/outdoor)
- Retail uses, indoor and outdoor, including the display, rental and sale of new or second-hand goods in shops, retail facilities, carts, kiosks and other facilities.
- Roads
- Sale of alcoholic beverages for on-site and off-site consumption
- Seasonal uses
- Security facilities and short-term detention facilities for on-site security purposes
- Sets/Facades (permanent and temporary)
- Signs
- Special events
- Stockpiling/On-site storage of graded materials (less than 50,000 cubic yards)
- Storage, outdoor and indoor (ancillary to uses on-site)
- Storage tanks, underground and above ground (ancillary to uses on-site)
- Studio Offices
- Studio Support Facilities
- Studio Uses
- Temporary Uses
- Theaters, motion picture theaters, live performance theaters
- Thematic Elements
- Theme Park, Universal Studio Tour and related activities
- Trailers (non-residential)
- Transportation Facilities
- Utilities, underground and above ground
- Vehicle maintenance and repair facilities
- Wall Murals
- Warehouses
- Other uses which are similar, accessory or incidental to permitted uses, as determined by the Planning Director
The uses and facilities allowed within the Back Lot District include the following:

- Ancillary Support Facilities
- Animal care and boarding facilities
- Charitable events
- Civic events
- Communication Facilities
- Construction offices
- Emergency medical facilities (for on-site employees, guests and visitors)
- Entertainment Attractions
- Entertainment shows
- Entertainment Uses
- Entry facilities, including but not limited to parking payment booths
- Fences/walls
- Fueling stations (for businesses and activities conducted on-site and related activities)
- Fundraisers
- Landscape nurseries and related uses
- Offices
- Outdoor Special Light Effects
- Overnight sleeping quarters for security personnel, fire protection personnel, and on-site managers
- Parking structures and surface parking lots including but not limited to parking payment booths
- Pedestrian or vehicular tours
- Power facility (to provide power for on-site purposes)
- Premieres (film, television, audio, and other media events)
- Production Activities (including outdoor production)
- Production Facilities
- Promotional activities
- Pyrotechnic special effects and storage
- Recycling facilities
- Roads
- Seasonal uses
- Security facilities and short-term detention facilities for on-site security purposes
- Sets/Facades (permanent and temporary)
- Signs
- Special events
- Stockpiling/On-site storage of graded materials (less than 50,000 cubic yards)
- Storage, outdoor and indoor (ancillary to uses on-site)
- Storage tanks, underground and above ground (ancillary to uses on-site)
- Studio Offices
- Studio Support Facilities
- Studio Uses
- Temporary Uses
- Thematic Elements
- Theme Park, Universal Studio Tour and related activities
- Trailers (non-residential)
- Transportation Facilities
- Utilities, underground and above ground
- Vehicle maintenance and repair facilities
- Wall Murals
- Warehouses
- Other uses which are similar, accessory or incidental to permitted uses, as determined by the Director
- Wine shops
- Gaming establishments
- Medical Marijuana Dispensaries
- Tattoo Parlors
- Any other uses and facilities not listed as permitted uses or determined by the Director not to be similar to permitted uses and facilities.

The Specific Plan also includes special conditions and standards for some uses, including establishments that sell or serve alcohol, Communications Facilities, Hotels, and Temporary Uses.

PROHIBITED USES
The following uses and facilities are expressly prohibited by the Specific Plan:

- Adult Business Establishments
- Gun shops
- Gambling establishments
- Medical Marijuana Dispensaries
- Tattoo Parlors
- Any other uses and facilities not listed as permitted uses or determined by the Director not to be similar to permitted uses and facilities.
5 LAND USE EQUIVALENCY PROGRAM
The Specific Plan establishes the total Permitted Floor Area development in square feet in several land use categories including: Office, Studio Office, Studio, Hotel, Entertainment and Entertainment Retail, and Amphitheater uses. These amounts of development are based on projections of future need. They are, however, estimates, and it is reasonable to assume that some adjustments to the totals within each category will need to be made over the life of the Specific Plan. The Specific Plan permits such change pursuant to the Land Use Equivalency conversion rates in the Specific Plan.

6 ARCHITECTURE
The intent of the Specific Plan is to provide for a harmonious relationship between buildings within the Specific Plan Area without requiring a particular architectural theme. This can be achieved by careful attention to building massing, building materials and color in new construction and with the renovation of existing buildings. The intent is to promote building massing, which is visually rich, creates an exciting and varied urban landscape, in which each building positively contributes to the overall image of Universal Studios as a
singular place.
The Specific Plan primarily addresses massing through floor area and height limits. Roof materials and colors will be selected to complement the building design and create an attractive roofscape where visible from neighboring properties. Mirrored or highly reflective glass is prohibited. As discussed below, parking structures visible within 500 feet of the Specific Plan Area will be screened.

7 LANDSCAPE
Landscaping plays a large role in ensuring the aesthetic character of the Specific Plan Area. Landscaping is an integral part of the overall vision for the Specific Plan Area, as a natural feature of some of its steeply-sloped areas, as a means of welcoming visitors, as a feature that improves the aesthetic environment, and in absorbing stormwater and providing shade. The Design Plan Chapter discusses landscaping as it applies to specific edges of the Specific Plan Area in more detail.

REQUIRED LANDSCAPE
To maintain flexibility for studio production and entertainment uses, landscaping is only specifically required for screening and buffering of blank walls facing public rights-of-way, parking garages, or other uses that do not contribute to a positive site aesthetic, such as outdoor storage areas and rooftop equipment. All landscaping not associated with Entertainment Attractions, Sets/Facades, the Theme Park, Production Activities, or certain visitor entry points will be required to meet County standards for drought-tolerant plants.

CONCEPTUAL PLANT PALETTES
The following pages illustrate conceptual planting palettes for different districts and edges of the Universal Studios Specific Plan Area. The intent of the Conceptual Planting Palettes is to provide a general guide for future landscaping that should be considered when improvements are made, and not specific requirements for certain plant species.

8 BUILDING FACADES AND SCREENING
The Universal Studios Specific Plan establishes regulations which require visual buffers for certain types of new development likely to be visible from surrounding streets and neighborhoods. Because of the Specific Plan Area’s topography and the unique nature of proposed development, the regulations contained within the Universal Studios Specific Plan specially address its particular conditions.

INTENT OF BLANK FACADE AND SCREENING REGULATIONS
The screening regulations are intended to be easily implemented and measured, to ensure that a reasonable degree of visual buffering will be achieved. The regulations allow for a range of visual treatments, which can be used individually or in combination to flexibly address a wide variety of conditions. Building facades within 40 feet of and facing public rights-of-way are required to incorporate one or more visual treatments. The screening regulations are not intended to completely conceal all new development. Rather, they are intended to provide a means to create an attractive, appealing visual context for new development, which helps visually unify the Specific Plan Area.

PROJECTS REQUIRING SCREENING
The Specific Plan requires screening for certain kinds of development in more sensitive locations. Screening is required for the following:

1. Buildings adjacent to the Los Angeles River Flood Control Channel. Visual treatment of the portion of any new buildings located along and facing the Los Angeles River Flood Control Channel edge in the 625 MSL Height Zone is required.
2. Roof-top parking, when located within 500 feet of Existing Off-Site Residential Uses located outside the boundaries of this Specific Plan and the portions of the project area located in the City of Los Angeles.
3. All roof-top equipment, including communication facilities, from the view of public pedestrian locations within 500 feet of the combined boundaries of this Specific Plan and the portions of the project area located in the City of Los Angeles.
4. With the exceptions of sets/facades and production activities, outdoor storage areas from the view of public pedestrian locations within 500 feet of the boundaries of this Specific Plan and the portions of the project area located in the City of Los Angeles.

METHODS OF SCREENING AND VISUAL TREATMENT
Screening may be achieved in several ways, including: articulation of building plane; use of varying building materials; graphic facade treatments and thematic elements; or installation of landscaping. Blank facades may include visual treatments such as articulation of building planes, use of varying building materials to create visual interest, and the regular placement of windows.

9 STREETSCAPE
Lankershim Boulevard and Universal Hollywood Drive will be improved as development in the Specific Plan Area occurs. A conceptual streetscape design for Lankershim can be found in Chapter 3, Section 6. Final detailed streetscape designs are not included within this Specific Plan, but will be reviewed and approved by the appropriate agencies prior to their construction and installation. They may include the following elements:

• Street trees and landscaping;
• Street lights and banner poles;
• Signs;
• Sidewalks and parkways; and,
Street furniture.
The area between the edge of property lines at the street, up to and including building facades also plays a role in the character of streetscape. As buildings along Lankershim Boulevard are developed, the character of the street will become more urban and pedestrian friendly. New structures, and the elements separating them from the street, will carefully balance the need for security, contributing to an urban, pedestrian-friendly streetscape, and contributing towards a strong studio identity. This will be achieved through a variety of means, including visually interesting architecture, landscaping, and graphic treatments.

10 SIGNS
The Specific Plan includes a custom set of sign regulations for Universal Studios. The comprehensive sign regulations address the unique qualities of the Specific Plan Area’s edges, districts, and topography. They are intended to establish a clear, consistent and cohesive image, while meeting the need for identification, promotion, and providing information. The intent of the Specific Plan is to promote compatibility between signs and the environment, allow an appropriate amount of design flexibility, and enhance the visitor experience.

Five sign districts have been created to regulate the sign size, location, height and total number, as shown on the following exhibit. The Specific Plan introduces a concept of regulating different sign types according to their category, which could be defined as their purpose. For example, a wall sign could be used for area identification or for tenant identification. In this case, ‘area identification’ and ‘tenant identification’ are the sign categories; ‘wall sign’ is the sign type. Sign categories explain their purpose; sign types

---

Exhibit 5.10: Sign Districts

LEGEND

1. Lankershim Edge Sign District
2. Northern Edge Sign District
3. Studio & Entertainment Sign District
4. Visitor Gateway Sign District
5. Studio Back Lot Sign District
generally describe their physical form.

Each sign district limits and regulates the sign categories, sign types, sizes, and heights allowable. Signs which facilitate vehicular or pedestrian circulation have no limitations except for maximum size and height. Existing signs are allowed to remain and may be replaced. Internal Signs are a unique category regulated by the Specific Plan. Internal Signs may be any sign category and type, but unlike other signs, are unlimited in number so long as they meet the definition of an Internal Sign, which is based on its lack of visibility outside the Specific Plan Area. These requirements vary by district.

Sign types are defined and regulated within the Specific Plan according to their category and sign district. Permitted Sign Categories include:

- Internal Signs
- Area Identification
- Building Identification
- Tenant Identification
- On-Site Business Signs
- Information (Directional)
- Temporary
- Construction
- Real Estate Signs

The Specific Plan also includes sign illumination standards.

**11 LIGHTING CRITERIA**

The Specific Plan requires all new lighting improvements to meet specific lighting performance standards defined by the particular application and type of use. These lighting standards establish the brightness, direction, and shielding required for lighting installations. The Specific Plan restricts luminance (the visible brightness of a surface) and brightness contrast levels (the ratio of an illuminated surface to its surrounding space).

The Specific Plan provides for specific angular range of degrees which may not be exceeded (see diagram below).

There are several important exceptions to the lighting regulations, which include the following:

a. Production Activities and Outdoor Special Light Effects. These activities are critical to the ongoing operation of the studio.

b. Decorative lights temporarily installed between September 1 and January 15 of the next year other than those installed along the Lankershim Boulevard property boundary and the northern property boundary.

c. Emergency Light Sources or temporary Light Sources used for repair or construction as required by governmental agencies.

d. Light Sources owned or controlled by any public agency for the purpose of directing or controlling navigation, traffic or for highway or street illumination.

e. Lighting associated with Signs are exempt, and instead subject to the regulations contained in the Signage regulations in Section 17 of the Specific Plan.

f. Hotels. Roof-top lighting on hotels for sports/recreational uses, such as pools, tennis or paddle courts, which would not comply with other lighting standards in the Universal Studios Specific Plan, have special lighting standards. These uses shall be lighted by horizontally mounted, rectilinear-type, sharp-cut-off fixtures shielded such
that the bulb or lamp is not viewable from existing residential properties outside of the combined boundaries of the Universal Studios and the portions of the project area in the City of Los Angeles. These Light Sources shall be mounted at a height of 20 feet or less above the roof top surface.

12 SOUND GENERATION CRITERIA
The Universal Studios Specific Plan establishes sound generation limits on operational sound sources and establishes monitoring procedures to ensure compliance.

13 CONSTRUCTION AND GRADING
The Universal Studios Specific Plan has established standards for construction and grading activities to reduce impacts on adjacent neighborhoods. These standards include maximum cumulative cubic yards of earth import/export and other measures to reduce potential construction impacts.
