Why It's Important:

Planned power outages give us the opportunity to complete ongoing maintenance or upgrade the grid with newer materials and technologies. It is part of our long-term plan to help revitalize Southern California's power grid.

We also take these opportunities to install smart grid technology that makes the power grid better able to handle the increasing demand that a growing population requires.

How to prepare:

- Make sure food stays as cold as possible by keeping refrigerator and freezer doors closed and placing blocks of ice inside. For more information, visit sce.com/foodsafety.
- Unplug sensitive electronic equipment, such as computers and televisions.
- Learn how to manually open security gates and garage doors.
- Notify any security companies you use to monitor your home or business.
- Business customers without a backup power supply should rent one, if needed.
- If you use a backup generator and have not registered the information with SCE, let us know before the outage so we can protect our employees from electrical backfeed.

*About scheduled time:

Power outages may not begin or end at exactly the stated times. In order to cause you the least amount of inconvenience, SCE isolates the outages down to the smallest area possible and completes the work safely and as quickly as we can. Please be aware that your power may be turned on and off again more than once during the time period listed.
