PLANT PALETTE FOR RESTORED COASTAL SALT MARSH

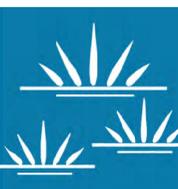

Plant Species	Container Size	Spacing
Low-Marsh		
California Cord Grass (<i>Spartina foliosa</i>)	1 gal	3 foot o.c. (clumped)
Saltwort (<i>Batis maritima</i>)	1 gal	6 foot o.c. (scattered)
Saltmarsh bulrush (<i>Bolboschoenus maritimus</i>)	1 gal	12 foot o.c. (clumped)
Olney's bulrush (<i>Schoenoplectus americanus</i>)	1 gal	12 foot o.c. (clumped)
Mid-Marsh		
Pacific Pickleweed (<i>Sarcocornia pacifica</i>)	1 gal	3 foot o.c. (scattered)
Alkali Heath (<i>Frankenia salina</i>)	1 gal	3 foot o.c. (scattered)
Fleshy Jaumea (<i>Jaumea carnosa</i>)	1 gal	3 foot o.c. (scattered)
Saltmarsh Rosemary (<i>Limonium californicum</i>)	1 gal	Small groupings
Saltgrass (<i>Distichlis spicata</i>)	1 gal	3 foot o.c. (clumped)
Saltmarsh seablie (<i>Suaeda esteroa</i>)	1 gal	12 foot o.c. (scattered)
Upper-Marsh		
Parish' Saltwort (<i>Arthrocnemum subterminale</i>)	1 gal	3 foot o.c. (scattered)
Clustered Field sedge (<i>Carex praegracilis</i>)	1 gal	12 foot o.c. (clumped)
Woolly Seablie (<i>Suaeda taxifolia</i>)	1 gal	12 foot o.c. (scattered)
Willow Dock (<i>Rumex salicifolius</i>)	Seed	Scattered (perimeter)
Southwestern Spiny Rush (<i>Juncus acutus leopoldi</i>)	1 gal	3 foot o.c. (perimeter)
Shore grass (<i>Monanthochloe littoralis</i>)	1 gal	3 foot o.c. (perimeter)
Coulter's goldfields (<i>Lasthenia glabrata coulteri</i>)	Seed	Scattered (perimeter)
Saltmarsh Heliotrope (<i>Heliotropium curassavicum</i>)	Seed	Scattered (perimeter)
Saltmarsh Sand Spurrey (<i>Spergularia marina</i>)	Seed	Scattered (perimeter)
Alkali weed (<i>Cressa truxillensis</i>)	Seed	Scattered (throughout)

PLANT PALETTE FOR COASTAL PRAIRIE

Plant Species	Container Size	Spacing
Container Plants		
Wild hyacinth (<i>Dichelostema capitatum</i>)	Rosepots	3 foot o.c. (scattered)
Coast goldenbush (<i>Isocoma menziesii</i>)	1 gal	8 foot o.c. (scattered)
Mesa horkelia (<i>Horkelia cuneata</i>)	1 gal	3 foot o.c. (scattered)
Wishbone bush (<i>Mirabilis californica</i>)	1 gal	10 foot o.c. (scattered)
Coast range melic (<i>Melica californica</i>)	Liners	2 foot o.c. (clumped)
Purple needlegrass (<i>Nassella pulchra</i>)	Liners	2 foot o.c. (clumped)
Blue eyed grass (<i>Sisyrinchium bellum</i>)	Rosepots	2 foot o.c. (clumped)
Seed Mix		
Bentgrass (<i>Agrostis pallens</i>)	seed	
Common goldenstar (<i>Bloomeria crocea</i>)	seed	
California goldfields (<i>Lasthenia californica</i>)	seed	
Foothill needlegrass (<i>Nassella lepida</i>)	seed	
Dot seed plantain (<i>Plantago erecta</i>)	seed	
Blue eyed grass (<i>Sisyrinchium bellum</i>)	seed	
Orcutt's pincushion (<i>Chaenactis glabruicula orcuttiana</i>)	seed	

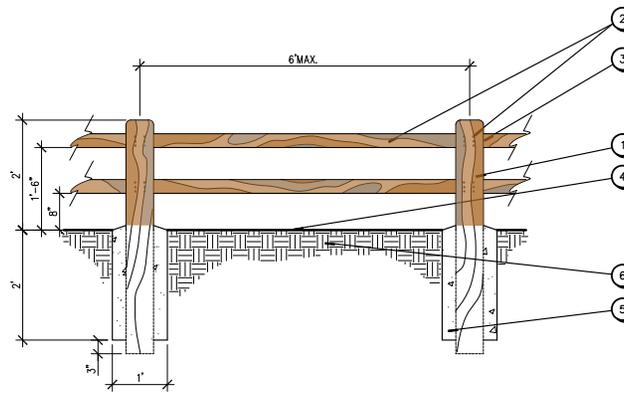

PLANT PALETTE FOR COASTAL SAGE SCRUB

Plant Species	Container Size	Spacing
Container Plants		
California sagebrush (<i>Artemisia californica</i>)	1 gal	5 foot o.c. (scattered)
Coast goldenbush (<i>Isocoma menziesii</i>)	1 gal	8 foot o.c. (scattered)
Encelia californica (<i>Encelia californica</i>)	1 gal	5 foot o.c. (scattered)
Sea cliff buckwheat (<i>Eriogonum parvifolium</i>)	1 gal	6 foot o.c. (scattered)
Purple needlegrass (<i>Nassella pulchra</i>)	Liners	2 foot o.c. (clumped)
Coyote bush (<i>Baccharis pilularis</i>)	1 gal	20 foot o.c. (clumped)
Seed Mix		
Wild hyacinth (<i>Dichelostema capitatum</i>)	seed	
Foothill needlegrass (<i>Nassella lepida</i>)	seed	
Purple needlegrass (<i>Nassella pulchra</i>)	seed	
Blue eyed grass (<i>Sisyrinchium bellum</i>)	seed

COASTAL SALT MARSH A UNIQUE PART OF THE COASTAL ENVIRONMENT

The Marina Del Rey Wetland Park includes a 0.75 - acre restored tidal salt marsh that supports a full suite of plant species adapted for life in wetlands that are submerged up to twice a day by the tides. The restored wetland exhibits characteristics typical of southern California salt marshes with four zones: subtidal (permanently submerged), low-marsh, mid-marsh and upper-marsh. Saltmarshes are among the most productive habitats in the world, rivalling rainforests in levels of productivity.

COMMON BIRDS WITHIN THE COASTAL SALT MARSH

The high levels of productivity within the salt marsh allow this habitat to support a diverse fauna including shorebirds (sandpipers and plovers), waterfowl (ducks and geese), wading birds (herons and egrets) and songbirds. The subtidal areas support fish and a diversity of invertebrates that live in the mud and upon which many of the birds feed.

The tidal water enters the wetland through pipes connected directly to the Marina.

HISTORY OF THE WETLAND PARK

1928

NATURAL MARSH/WETLAND

Historically, this site was part of the Ballona Wetland complex. This area was rich with wildlife such as ducks, fish, and birds, making it a popular destination for hunters and fisherman.

1936

PRE-MARINA DEVELOPMENT

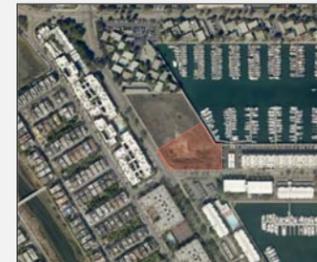

Beginning in the late 1920s and early 1930s, development occurred on the site, which remained generally unchanged until the development of Marina Del Rey two decades later.

1962

POST-MARINA DEVELOPMENT

Development of Marina del Rey Harbor occurred in the late 1950s and early 1960s and included the construction of a seawall with backfill to create a pad for future building construction. The aerial above depicts a sewer vent on the site that was removed as part of the wetland restoration project.

2014

PARTIAL SITE DEVELOPMENT

The site was excavated in 1984 for a hotel development project. The project was halted well before completion, leaving up to two feet of fill overlaying the natural surface in the lowest portions of the excavated depression. The site was left with I-beam pilings installed as part of the construction operations, along with a concrete foundation.

2016

PARTIAL SITE DEVELOPMENT

Due to rainfall collecting on the site over time, areas within the site began to indicate the presence of wetland characteristics. The County of Los Angeles had worked toward restoring the site as a functioning tidal wetland since 2006.

Development of the Marina del Rey Wetland Park converted the 0.22-acre seasonal wetland on the site to a tidal coastal saltmarsh covering 0.75 acre of the 1.46 acre park. The goal of the restoration program was to create a coastal salt marsh habitat with a "muted" tidal regime that supports a suite of native salt marsh plants, and enhanced functions for wildlife.
