CHIEF INFORMATION OFFICER

County of Los Angeles

To enrich lives through effective & caring service.

THE COUNTY

The County of Los Angeles, listed as one of America's Best Employers 2015 by Forbes, has a demographically and geographically diverse population of more than 10 million residents. As the largest employer in Southern California, the County's 100,000 employees working in more than 35 Departments provide vital and wide-ranging public services. The County offers a unique position for an innovative information technology executive who can effect change without line authority, and can promote a vision for technology in Los Angeles County.

THE CHIEF EXECUTIVE OFFICE

In its role as the central executive, strategic, and administrative agency for the County, the Chief Executive Office is accountable for developing an information technology strategy that supports Board priorities and emergent requirements.

County information technology professionals are integral to improving and enhancing services for County residents. The scope of their work is broad: from offering mobile social services technology to those on public assistance, to meeting Affordable Care Act requirements in one of the nation's largest health care systems, to improving customer service within the County Assessor's office, to providing open data to constituents, and more

Current projects include development of state of the art voter technology systems and upgrading mobile access to residents and clients in a number of public service applications.

THE CHIEF INFORMATION OFFICER

The Chief Information Officer serves as an internal consultant to departments and agencies on information technology, and how best to leverage it. The CIO also facilitates technology improvements by identifying priorities, then developing to strategies required to fully implement them.

THE OPPORTUNITY

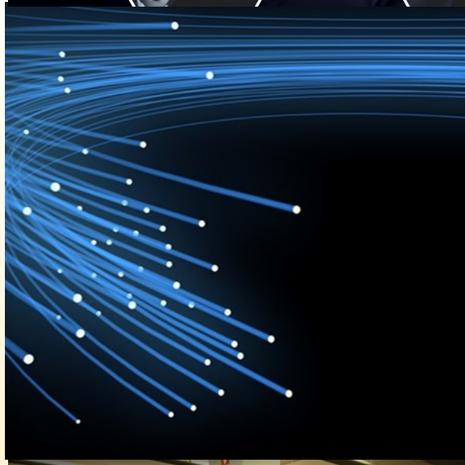
The Chief Information Officer provides strategic guidance and advice to departments and agencies within the County of Los Angeles, with a focus on improving overall service delivery using cutting edge technology to the greatest extent possible.

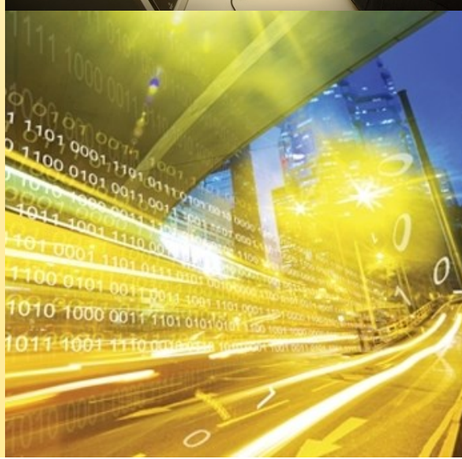
Reflecting direction from the Board of Supervisors, the Chief Information Officer is accountable for addressing Countywide systems requirements, as well as the service needs of County departments through coordinating and preparing long range strategic information technology planning, participating and developing County-private sector partnerships, and promoting Countywide efforts to introduce new technology.

In this role, the Chief Information Officer must strike a balance between providing direction and advice while also driving the vision and technology strategies that meets the County's needs for the present and the future.

THE QUALIFICATIONS

The successful candidate will have accomplishments in managing a large and complex information systems program for a diverse multi-service public or private sector organization. The individual will have had a leadership role in the planning, design, development, and implementation of information technology systems. Of equal importance, the individual selected must have demonstrated success in understanding the appropriate role of technology, communicating that role and applications to senior leaders, peers, and the entire organization.

Desirable qualifications include:




- A Master's degree or equivalent professional education in information technology or computer science.
- Demonstrated success working with public officials, industry representatives, civic groups, and technical experts.
- Strategic responsibility for outsourcing decisions, financing of large-scale technology projects, and an understanding of development resources required to develop and maintain complex technology systems.
- Successful experience in long range systems planning and need forecasting in a large, complex environment.
- Proficiency in communicating with both technical and non-technical stakeholders, capable of ensuring that all parties understand needs, costs, and solutions.
- State-of-the-art knowledge of information security practices and technology.
