TREATMENT PROTOCOL: GENERAL ALS *

1. Basic airway
2. Spinal motion restriction prn
3. Control major bleeding prn
4. Pulse oximetry
5. Oxygen prn
6. Advanced airway prn
   - **Pediatric:** ETT 12 years of age or older or height greater than the length of the pediatric resuscitation tape
7. Cardiac monitor prn: document rhythm, attach ECG strip if dysrhythmia identified and refer to appropriate treatment protocol
8. Venous access prn;
   - If indicated:
     - **Normal Saline** 10mL/kg, reassess for pulmonary edema at 250mL increments
     - **Pediatric:** 20mL/kg, reassess for improved vital signs; may repeat one time
9. Perform blood glucose test prn, if blood glucose less than 60mg/dl:
   - Consider oral glucose preparation if patient awake and alert
10. If indicated:
    - **Dextrose 10% 250mL IV**
      - Infuse 125mL, and reassess
      - If positive response, stop infusion
      - If minimal or no response, infuse the remaining 125mL for a total of 250mL
    - **Pediatric:** Dextrose 10% IV per Color Code Drug Doses LA County Kids
      - 1mL/kg increments up to 5mL/kg
    - If unable to obtain venous access
    - **Glucagon 1mg IM**
      - **Pediatric:** Glucagon per Color Code Drug Doses LA County Kids
      - 0.5mg (0.5mL) IM <1year
      - 1mg (1mL) IM 1year or older
11. If nausea/vomiting/morphine administration
    - **Ondansetron**
      - 4mg slow IV push, IM or ODT (Orally Disintegrating Tablet)
    - **Pediatric:**
      - **4yrs of age and older:** 4mg ODT one time
      - Do not administer to children less than 4yrs of age
      - Maximum pediatric dose 4mg
12. **CONTINUE SFTP or BASE CONTACT**
13. If blood glucose remains less than 60mg/dl:
    - **Dextrose 10% 250mL IV**
      - Infuse 125mL, and reassess
      - If positive response, stop infusion
      - If minimal or no response, infuse the remaining 125mL for a total of 250mL
    - **Pediatric:** Dextrose 10% IV per Color Code Drug Doses LA County Kids
      - 1mL/kg increments up to 5mL/kg
    - If unable to obtain venous access
    - **Glucagon 1mg IM**
      - **Pediatric:** Glucagon per Color Code Drug Doses LA County Kids
      - 0.5mg (0.5mL) IM <1year
      - 1mg (1mL) IM 1year or older
14. Reassess for deterioration and refer to the appropriate treatment protocol, if applicable
15. If fluid challenge is indicated, obtain base hospital order
16. If nausea and/or vomiting persists 10 minutes after initial dose:
TREATMENT PROTOCOL: GENERAL ALS *

Ondansetron 1
4mg slow IV push, IM or ODT
Maximum adult dose 8mg all routes

This protocol includes, but is not limited to, vague complaints such as:
- General weakness/dizziness
- Nausea and vomiting
- Palpitations without dysrhythmia
- Vaginal bleeding (less than 20wks gestation, no pain, normal vital signs)
- Malaise
- Near syncope

SPECIAL CONSIDERATIONS

- Avoid in pregnancy
