1. Basic airway
2. Pulse oximetry
3. Oxygen prn
4. If narcotic overdose, consider
   **Naloxone** 2mg IM or IN prior to venous access or advanced airway
5. Advanced airway prn
6. Cardiac monitor prn: document rhythm; attach ECG strip if dysrhythmia identified and refer to appropriate treatment protocol
7. Venous access prn
8. Perform blood glucose test, if blood glucose is less than 60mg/dl:
   Consider oral glucose preparation if patient is awake and alert
   **Dextrose 10% 250mL IV**
   - Infuse 125mL, and reassess
   - If positive response, stop infusion
   - If minimal or no response, infuse the remaining 125mL for a total of 250mL
   **Pediatric: Dextrose 10% per Color Code Drug Doses LA County Kids**
   1mL/kg increments up to 5mL/kg
   If unable to obtain venous access:
   **Glucagon 1mg IM**
   **Pediatric: Glucagon per Color Code Drug Doses LA County Kids**
   0.5mg (0.5mL) IM < 1 year
   1mg (1mL) IM 1 year or older
9. If hypotension, use Ref. No. 1246, Non-Traumatic Hypotension Treatment Protocol
10. If alert and oriented, reassess for potential deterioration
11. If altered level of consciousness
   **Naloxone**
   0.8-2mg IVP
   - Titrate to adequate respiratory rate and tidal volume
   - If unable to obtain venous access, hypoventilation or suspicion of narcotic overdose, 2mg IM or IN (1mg per nostril for a total dose of 2mg)
   **Pediatric: See Color Code Drug Doses/L.A. County Kids**
12. **CONTINUE SFTP or BASE CONTACT**
13. If strong suspicion of narcotic overdose or partial response noted:
   **Naloxone**
   0.8-2mg IVP
   - Titrate to adequate respiratory rate and tidal volume
   - If unable to obtain venous access, hypoventilation or suspicion of narcotic overdose, 2mg IM or IN (1mg per nostril for a total dose of 2mg)
   **Pediatric: See Color Code Drug Doses/L.A. County Kids**
14. If blood glucose remains less than 60ml/dl:
   **Dextrose 10% 250mL IV**
   - Infuse 125mL, and reassess
   - If positive response, stop infusion
   - If minimal or no response, infuse the remaining 125mL for a total of 250mL
   **Pediatric: Dextrose 10% per Color Code Drug Doses LA County Kids**
   1mL/kg increments up to 5mL/kg
   If unable to obtain venous access:
   **Glucagon 1mg IM**
   **Pediatric: Glucagon per Color Code Drug Doses LA County Kids**
   0.5mg (0.5mL) IM < 1 year
   1mg (1mL) IM 1 year or older
15. Consider drugs of specific history. SFTP providers must contact base for order
   • Calcium channel blocker: Calcium chloride 500-1000mg slow IV push
   Tricyclic overdose with dysrhythmia or hypotension: Sodium bicarbonate
   1mEq/kg IV push and refer to appropriate dysrhythmia treatment protocol
