1. LA County represents 70 designated 9-1-1 receiving hospitals

Source: CDPH/CHA COVID Tracking Tool
1. LA County represents 70 designated 9-1-1 receiving hospitals. **COVID Confirmed**: The number of observation patients and inpatients in the hospital who have laboratory-confirmed COVID-19. **Suspected COVID**: The number of observation patients and inpatients in adult beds who are currently under investigation or suspected to have COVID-19. Suspected is defined as a person who is being managed as though he/she has COVID-19 because of signs and symptoms suggestive of COVID-19 as described by CDC’s guidance but does not have a laboratory positive COVID-19 test result. This may include patients who have not been tested or those with pending test results. The count may also include patients with negative test results but who continue to show signs/symptoms suggestive of COVID-19. This should exclude patients for whom the test was sent only as part of routine screening (e.g., for patients being admitted for other diagnoses, prior to diagnostic procedures, or prior to surgery).
