

ReddiNet®

Objectives

Identify ReddiNet® functions during a Mass/Multi Casualty Incident (MCI)

Objectives

- **MCI**
 - General Notifications
 - Ambulance Arrivals
 - Patient Tracking
- **Polls**
 - ED Capacity
 - HAvBED
 - Assessment
 - Service Level
- **Resource Requests**

About ReddiNet®

- **What is ReddiNet?**
 - Communication Tool
 - Web & Satellite Based
- **Who uses ReddiNet?**
 - Medical Alert Center (MAC)
 - Public Health
 - Hospitals
 - Surgical Centers, LTC & Clinics
 - Fire Departments
 - Police Departments

Medical Alert Center (MAC)

- **What is MAC?**

- The Operations & Communications arm of Los Angeles County Department of Health Services (DHS).

- **Why does MAC use ReddiNet®?**

- Gather and relay information from field operations to hospitals and vice versa.
 - Obtain number of patients involved in MCI and their acuity level.(Immediate, Delayed, Minor)
 - Obtain and communicate bed availability
- Assist with patient distribution and notifications of incoming patients to hospitals.

General Notification

MCI General Notification

A mass casualty incident has occurred. You may be required to participate in this MCI.
Information about this MCI is shown below.

MCI Information

Traffic Collision (Drill)

Location: Los Angeles, CA

Patients: 23 (Immediate:0 | Delayed:0 | Minor:0 | Treated on Site: 0 | Fatalities: 2)

Initiated by San Francisco County EMS Agency

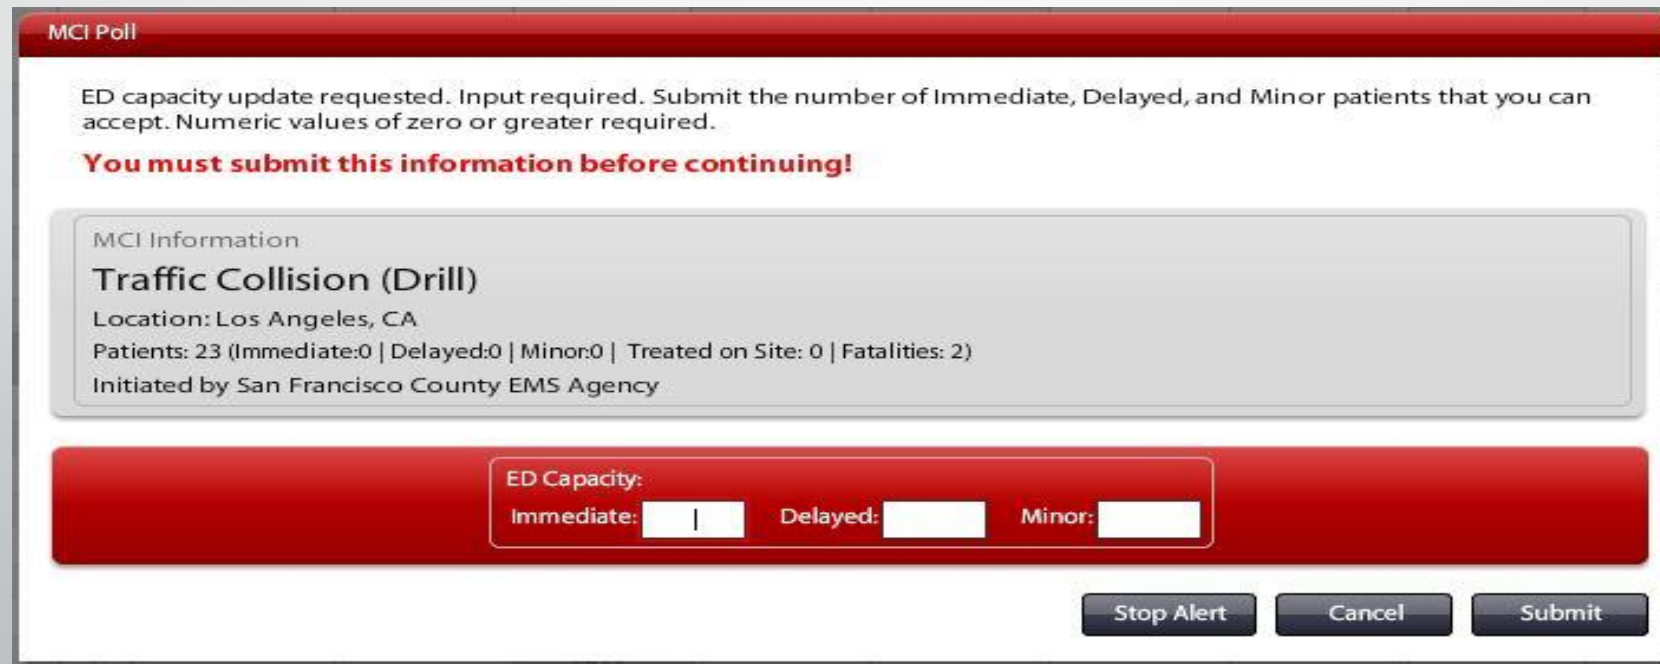

Additional Information

Stop Alert

OK

ED Bed Capacity Poll

- Initial ED Bed Capacity Poll (MCI Poll) is sent to all hospitals within geographic proximity to the incident
 - Done within minutes of initial notification
 - Hospitals should respond to the poll as soon as possible

MCI Poll

ED capacity update requested. Input required. Submit the number of Immediate, Delayed, and Minor patients that you can accept. Numeric values of zero or greater required.

You must submit this information before continuing!

MCI Information

Traffic Collision (Drill)

Location: Los Angeles, CA

Patients: 23 (Immediate:0 | Delayed:0 | Minor:0 | Treated on Site: 0 | Fatalities: 2)

Initiated by San Francisco County EMS Agency

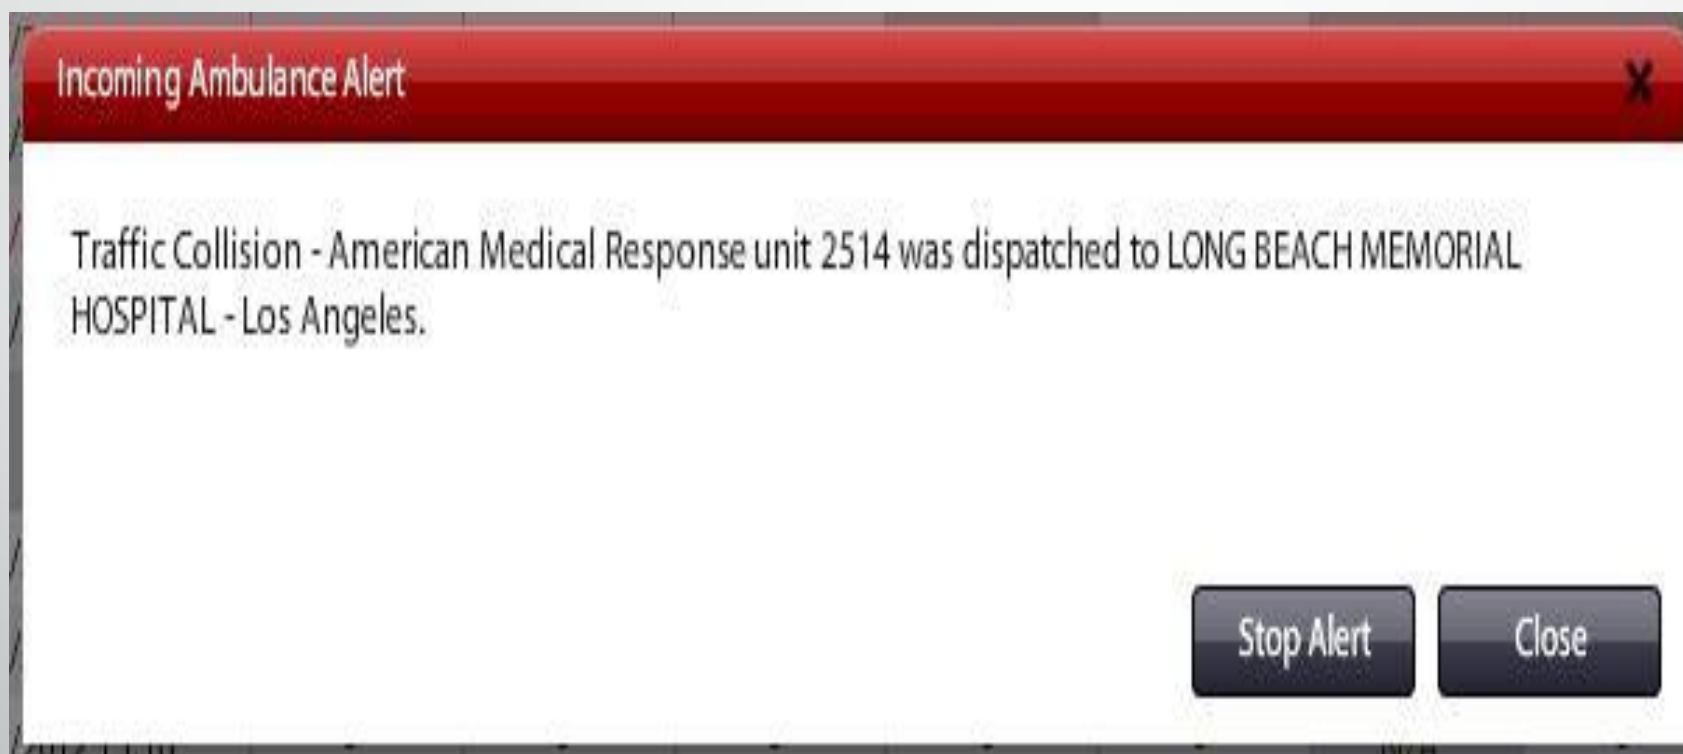

ED Capacity:

Immediate: | Delayed: Minor:

Field Medical Communications

- Results of hospital bed poll given to Field Medical Communications
 - Victims are triaged for transportation according to acuity, available beds and nearest appropriate facility
 - Patients are assigned to a specific ambulance/rescue/ squad number
- Field Medical Communications notifies MAC of patient destination
- MAC then notifies the receiving hospital

Hospital Role

- Respond to the ED Bed Capacity poll with the number of Immediate, Delayed, and Minor patients that can be accepted within 1-2 minutes
- Monitor ReddiNet for MAC notification of the number of Immediate, Delayed, and Minor patients assigned that are en route
- Notify MAC via the ReddiNet when victims arrive
- Report victim information to MAC within 72 hours via ReddiNet

Service Level Poll

- A Service Level Poll is used to obtain real time facility operational status during an event or incident.
- Status is color coded

- Respond to Assessment Poll within 60 min.
