ANNUAL EMS PLAN UPDATE
(Fiscal Year 2020-2021)

EXECUTIVE SUMMARY

Health and Safety Code, Division 2.5, Section 1797.254, requires the Emergency Medical Services (EMS) Agency to submit an EMS Plan to the State EMS Authority and follow it with annual updates thereafter. Attached is the Los Angeles County Fiscal Year (FY) 2020-2021 Annual Update which provides the required information on the status of our system and the EMS Agency's progress toward meeting long-range goals.

Communications:

The EMS Agency continues to be an active participant and voting member of the governing body of the Los Angeles Regional Interoperable Communications System (LA-RICS) Board of Directors. LA-RICS' mission is to provide the finest mission-critical communication system with unwavering focus on the needs of the public safety professional. It is being designed and built to serve law enforcement and fire service first responders, along with health service professionals throughout Los Angeles County.

With over 80 public safety agencies with approximately 34,000 first-responders and encompassing a sprawling terrain of over 4,060 square miles that approximately 10 million people call home, the Los Angeles region seeks a modern interoperable public safety broadband network that allows multiple agencies to respond to the widest possible variety of emergencies. LA-RICS has transferred operation and ownership of its 700MHz broadband network to ATT/First-Net, which is based on 4G/5G wireless data technology. The network would enable computer-aided dispatch, rapid law-enforcement queries, real-time video streaming, medical telemetry, patient tracking, geographic information systems services for first responders, and many other broadband-specific applications.

LA-RICS is partnered with AT&T/First-Net, a nationwide first responder network authority to ensure coordination with the broadband network on a national level for public safety and first responders.

EMS System Data Report:

Efforts to incorporate the STEMI and stroke databases into a combined database with the three (3) core EMS Agency databases (EMS, Base Hospital, and Trauma Center) continue. To further enhance reporting and access capability, the EMS Agency continues to explore opportunities to improve TEMIS, such as a web-based solution.

Of the ~700,000 EMS responses in the County, 100% of patient care records from public EMS providers are now collected through an electronic patient care report (ePCR).

NEMSIS Compliance (100% of system data for the end of reporting period FY 2020-2021):

Los Angeles County Fire District – (46% of system data) utilize ImageTrend.

City of Los Angeles Fire Department – (31% of system data) utilize Stryker.

Cities of Torrance and Redondo Beach Fire Department's (2% of system data) – utilize W.A.T.E.R.

Remaining 25 Fire Departments (21% of system data) utilize Digital EMS. Digital EMS became compliant for NEMSIS 3.5 to both collect and send data on April 28, 2021.

During FY 2020-2021, the EMS Agency submitted 100% records to CEMSIS-Trauma; however, did not export EMS related data to CEMSIS.

Sidewalk CPR:

The EMS Agency Sidewalk CPR is an annual program that traditionally provides in-person “hands-only” CPR training throughout Los Angeles County during National CPR & AED Awareness Week (June1-7). The Sidewalk CPR program was suspended in 2020 due to COVID-19.

Early 2021, the EMS Agency produced and published an instructional hands-only CPR video with techniques for reducing COVID transmission <https://youtu.be/jHaicno95sk>. This training video is posted on our website and shared with community partners to allow for a broader distribution. Our goal is to continue improving bystander CPR response during the pandemic. The views can be tracked when viewed on YouTube.

Message from the Director and Medical Director

We are dedicating this issue of the EMS System Report to Michelle Williams, Chief, Data Systems Management for our agency. Michelle has worked with the EMS Agency for the past 9 years. She has served as the lead of our Data Management Section since 2018. Michelle has been instrumental in moving the EMS Agency and our system to electronic data collection, ensuring data quality and consistency, and educating our providers and hospitals on the importance of quality data to direct our system and patient care.

Cathy Chidester
Director

Michelle worked tirelessly, starting from scratch, to evolve our system from a predominantly pen and paper system to the 100% electronic system we have today. She has worked with each provider agency, hospital and digital system to convert LA County over to an entirely new platform. Her understanding of data management has enabled us to utilize this critical information to make vital decisions and conduct quality improvement and research on behalf of the over 10 million people

who live in and visit our county. She dedicated countless hours this past year collecting and verifying COVID hospital assessment data which was critical to the county's understanding of the pandemic and provided support to policy decisions.

Michelle has recently left our EMS Agency to pursue personal goals. Her talent and drive will be sorely missed. I hope you will join us in wishing Michelle the best in her new endeavors and thanking her for instilling excellence in our EMS program and systems.

This last year has been a challenging one for all of EMS. As the pandemic wanes we honor all those who participated in the response locally and regionally. Data played a critical role in the management of the pandemic and allowed for opportunities for the system to predict surge. Thanks to all for their dedication in caring for our EMS community this last year.

Dr. Marianne Gausche-Hill
Medical Director

Emergency Department Volume

■ 9-1-1 Transports
 ■ Walk-In
 ◆ Reported Annual ED Visits

ED Patient Type (walk-in and 9-1-1)

■ Critical ■ Urgent ■ Non-Urgent

Critical—a patient presents an acute injury or illness that could result in permanent damage, injury or death (head injury, vehicular accident, shooting). Applicable Current Procedural Terminology (CPT) codes for this level of service would be 99284 (detailed history, detailed physical, and medical decision making of moderate complexity) or 99285 (medical decision making of high complexity) or 99291 (critical care, evaluation and management).

Urgent—a patient with an acute injury or illness, loss of life or limb is not an immediate threat to their well-being, or a patient who needs timely evaluation (fracture or laceration). Applicable CPT codes for this level of service would be 99282 (medical decision making of low complexity) or 99283 (medical decision making of moderate complexity).

Non-Urgent—a patient with a non-emergent injury, illness or condition; sometimes chronic; that can be treated in a non-emergency setting and not necessarily on the same day they are seen in the ED (pregnancy tests, toothache, minor cold, ingrown toenail). An applicable CPT code for this level of service would be 99281 (straight forward medical decision making).

ED Patient Disposition (walk-in and 9-1-1)

■ Admitted to Intensive Care Unit
■ Admitted to Non-Intensive Care Unit Area
■ Discharged from ED/24 hr Observation

Trauma Center Volume

*2012: LA County adopted the Centers for Disease Control and Prevention Guidelines for Field Triage of Injured Patients

**2015: Trauma Center Registry inclusion criteria was reduced.

Injury Severity Score by Mechanism of Injury

Injury Severity Score (ISS): Is an established medical score to assess trauma severity. It correlates with mortality, morbidity and hospitalization time after trauma. It is used to define the term major trauma. A major trauma (or polytrauma) is defined as the ISS being greater than 15.

Quality Improvement Plan
2020-2021

I. Introduction

Los Angeles County EMS Agency Mission Statement

To advance the health of our communities by ensuring quality emergency and disaster medical services

The Los Angeles County (LAC) Emergency Medical Services (EMS) Agency is responsible for monitoring and implementing regulatory oversight over for one of the largest multijurisdictional EMS systems in the nation. The LAC system utilizes more than 18,000 certified EMS personnel employed by public and private organizations, fire departments, ambulance companies, hospitals, and law enforcement agencies to provide emergency and non-emergency prehospital care to over 10 million residents and visitors.

LAC requires a comprehensive quality improvement (QI) program to provide ongoing system evaluation to maintain quality in day-to-day operations while implementing process improvement strategies to advance patient care delivery that are consistent with best practices and evidence-based medicine. The QI plan provides the written framework for the QI program.

Our system utilizes a multidisciplinary collaborative approach to drive improvement. It is educational, not punitive by design to encourage the exchange of information to enhance patient safety and minimize adverse events. Quality patient care delivery is sustained through ongoing evaluation, timely system feedback and education, in addition to, providing opportunities to acknowledge performance excellence within the system.

The EMS Agency and QI program supports the California EMS Authority (EMSA) in the development, implementation, and reporting of statewide Core Measures.

The LAC EMS QI plan is written in accordance with the California Code of Regulations, Title 22, Division 9, Chapter 12: *Emergency Medical Services System Quality Improvement* and is consistent with the State of California *Emergency Medical Services System Quality Improvement Program Model Guidelines* and *EMSA 166, Appendix E, EMS Core Quality Measures*.

III. **Data Management**

A. **Data Collection**

The EMS Agency obtains information through a variety of methods that include the following sources: electronic data exchange, hard copy review, internal and external customer surveys, and program reviews (audits). Data collection is primarily conducted via the Trauma and Emergency Medicine Information System (TEMIS), Lancet Technology Innovative Data Solutions by ESO. The TEMIS database assists the EMS Agency in evaluating, monitoring, and coordinating all EMS system components, as well as meet state data collection requirements.

All public 9-1-1 and Exclusive Operating Area provider agencies utilize an electronic patient care record (ePCR) platform. Private (non-9-1-1) provider agencies, paramedic base hospitals and trauma centers utilizing paper PCR capture the required data elements using an approved electronic platform and standard paper forms (EMS Report Form, Base Hospital Form and Trauma Patient Summary Form). All paramedic base hospitals and trauma centers conduct data entry on site. The data is uploaded automatically to a dedicated File Transfer Protocol (FTP) site every 24 hours.

Other mechanisms by which the EMS Agency obtains data include, direct data input to the LA STEMI and LA Stroke databases by the designated SRC and stroke hospitals. Stroke data is also downloaded from the *Get With The Guidelines (GWTG)* Patient Management Tool. Helicopter EMS (HEMS) data is submitted to the EMS Agency on a quarterly basis from the three HEMS providers in LA County. The EMS Agency continues to work on the process of incorporating the STEMI, Stroke and HEMS data into TEMIS. Systemwide data collection on hospital diversion, bed availability, and surge capacity are collected via ReddiNet.

The Public Safety Agency Data Registry allows public safety agencies approved for naloxone administration to enter data directly into the data registry. Each public safety agency may utilize the data registry to generate reports on their own agency to assist in the quality improvement process required for program approval. The EMS Agency oversees the data and is able to provide aggregate system reports.

B. Data Validation

Data submitted to the EMS Agency databases undergoes an extensive data quality review and clean up through the following mechanisms:

1. EMS Agency data entry personnel conduct monthly peer review data audits. Identified errors are corrected and overall data entry performance is included in the data entry personnel's periodic performance evaluation report.
2. EMS provider agencies utilizing electronic data collection are required to validate their data using the EMS Agency's published EMS Data Validator before submission to the FTP site. The EMS Agency conducts a secondary validation before final upload to TEMIS. Data that fails validation is rejected and sent back to the EMS Provider for correction.
3. Annual data audits are conducted by the EMS Agency for each EMS Provider Agency. A corrective action plan is required for data elements that fall below a 90% compliance rate for accuracy and completeness.
4. Data clean up reports are generated by the EMS Agency on a quarterly basis for Paramedic Base Hospitals and Trauma Centers. In general, a corrective action plan is required for data elements that fall below a 90% compliance rate for accuracy and completeness.
5. Documentation reports are routinely developed and disseminated in the quality improvement committees for evaluation and education on the application of the data dictionary and data standards to improve reliability.

C. Data Submission

1. The EMS Agency ensures timely data collection and submission from base and trauma hospitals through written agreements.
2. Data collection requirements for other specialty care centers are prescribed in the specific specialty care center standards and local policies.

3. EMS provider agency data collection requirements are governed by local policies. Submission of required data to the EMS Agency is highly dependent upon organizational resources (method of data collection/ ePCR vendor) and size (personnel/volume of EMS responses). The EMS Agency has established policies and procedures specific to submission of electronic patient care data. However, provider agencies can experience vendor-related problems that cause significant delays in data submission to the EMS Agency. The EMS Agency and EMS community continue to work together on improving data collection and submission as the system transitions to the CEMISIS data requirements.
4. The LA County Trauma Center Programs participate in the American College of Surgeons Trauma Quality Improvement Program (TQIP) and are members of the LA County TQIP Collaborative. Collaborative system-level TQIP reports allow us to compare our system performance to national results and impart opportunities for systemwide QI projects.
5. EMS providers may be required to submit self-reported data utilizing Excel spreadsheets for the following reasons:
 - a. Non-911 (interfacility) transports are not entered into TEMIS.
 - b. Base hospitals and public 911 provider agencies may be required to submit data on prospective QI projects when the required data cannot be accessed through the EMS Agency databases.
 - c. Provider agencies approved for a pilot project with an expanded local scope of practice requiring data not captured in the EMS Agency databases.
 - d. The EMS Agency joined the Cardiac Arrest Registry to Enhance Survival (CARES) with data entry into CARES database beginning January 2021 for system benchmarking.

D. Data Utilization

1. The EMS Agency utilizes the TEMIS, LA STEMI, LA Stroke, and GWTG databases for both statewide core measures and local system reports. The local reports are utilized for daily operations such as performance and contract monitoring, system audits, policy revision, and QI activities. The databases are also used to provide the information needed to analyze the potential impact of hospital diversions and closures.
2. Self-reported data utilizing Excel spreadsheets are utilized, when needed for private non-9-1-1 provider agency QI projects and evaluating performance and ensuring patient safety when new medications, treatment and/or devices are implemented in the system.

3. Public Safety Data Registry was implemented in May 2020 and will initially be utilized to evaluate the utilization of naloxone administered by approved public safety agencies. The plan is to expand the data registry to collect additional data regarding other field care provided by public safety agencies (i.e., tourniquet application and AED).

E. Limitations

1. Separate Databases: the existence of multiple databases is not ideal for timely reporting. Multiple data entry and data abstraction are conducted on the same patient. Data analysis is resource-intensive when data elements are found in the various databases.
2. Multiple System Participants: data validation and transmission are complex as more EMS provider agencies move toward utilizing various ePCR software applications. Changes to the reporting standards often require additional time and expense.
3. Data Quality: current methods of data capture require extensive data audits. Cleanup is needed to ensure valid and reliable data.
4. Data Use Agreement (DUA): meaningful evaluation of system performance is highly dependent on the collaboration amongst the participants, consensus on how data will be collected and utilized. Currently, the EMS Agency is only able to share a limited dataset with the EMS Authority without a DUA in place. A DUA would allow for an open and full exchange of data that can be used to expand the evaluation of system performance and improve delivery of care.

IV. Quality Measures

A. Utilization of Provider Impression/New Treatment Protocols

The revised adult and pediatric Treatment Protocols (TP) utilizing Provider Impression(PI) codes were implemented in 2018 with systemwide transition complete in April 2019. The EMS Public 9-1-1 Provider Agency and Base Hospital QI Committee assist the EMS Agency in evaluating the transition. Reference 1373, Medical Control Guideline: [Medical Control Guideline: Treatment Protocol Quality Improvement Fallout Data Dictionary](#) is a comprehensive tool developed to assist with standardizing the QI process. In March 2020 the systemwide QI moved from evaluating the new TPs to COVID-19 related Provider Impressions of concern and introduced [Treatment Protocol: Reference No. 1245, Potential COVID-19 Patients](#) to serve as a guidance for treatment.

Ambulance Patient Offload Time (APOT)

The EMS Agency continues to work with the system participants to collect data using the Standardize Methods for Collecting and Reporting APOT data adopted by the EMS Authority. A workgroup has been convened to assist the EMS Agency in policy development to provide guidance in reducing 911 patient offload time. Members include representatives from the following organizations: Hospital Association of Southern California, Los Angeles County Ambulance Association,

Emergency Nurses Association, Los Angeles County Professional Fire Fighter's union, public (9-1-1) and private (non-911) provider agencies, and base hospitals. Private non-911 provider agencies who routinely transport to the emergency department and in-patient hospital collect and self-report APOT data to the EMS Agency for tracking and trending purposes.

B. EMSA Core Quality Measures

The EMS Agency historically has participated in statewide data submission to CEMSIS and continues to actively participate in statewide data collection through the submission of core measure data outlined in EMSA #166, EMS Quality Improvement Program Guidelines/Core Quality Measures. To ensure reliable and valid data, the EMS Agency will continue to update our data dictionary and provide training/feedback to EMS personnel on documentation of the core measure data elements with the exception of ambulance response times by zones. The LAC EMS system is not designed to collect data by zones. Alternatively, systemwide ambulance response times are collected and reported.

C. COVID-19

The EMS Agency implemented [Reference No. 845, Treat and Refer for Mild Respiratory Illness During the COVID-19 Outbreak](#) to provide additional guidance to Reference 1245 regarding treatment in place and transport decisions during the pandemic. A dedicated webpage was established to enable timely access to current information on COVID-19 related hospital and prehospital data, PPE and educational resources. Furthermore, the EMS Agency implemented weekly Zoom conference calls led by the Medical Director to provide the EMS community with information and updates on clinical and operational aspects that impact the delivery of prehospital care.

D. Pediatric Readiness Project – LA Peds Ready

The [National Pediatric Readiness Project](#) (NPRP) is a multi-phase quality improvement initiative to ensure all emergency departments have the essential resources in place to provide effective emergency care to sick and injured children. The NPRP is partnership with the federal EMS for Children program, the American Academy of Pediatrics, the American College of Emergency Physicians, and Emergency Nurses Association. [LA Peds Ready](#) was developed to assist the Los Angeles County emergency departments with access to the NPRP assessment tools, resources, and on-line educational activities designed to improve delivery of pediatric emergency care. Participation in the NPRP assessment has been added to the EDAP standards. The 2020 national assessment was postponed to 2021 due to the pandemic.

V. Prehospital Research

Research provides an evidence base to support prehospital medical treatments and interventions. The EMS Agency actively supports prehospital research through the Research Data Collaboratives [Link to EMS System Publications](#).

VI. Evaluation of System Indicators

- A. The System EMS QI Coordinator and designated staff prepare reports on system performance indicators to be utilized by the QI Team, Advisory Committees, and EMS Commission to ensure systemwide evaluation.
- B. Under the direction of the EMS Agency Medical Director, the EMS Agency QI Team will analyze system reports generated by each EMS Agency section responsible for reporting on current performance indicators and EMS Authority Core Measures.
- C. Presentations on performance indicators will be prepared in the most appropriate format to allow for ease of interpretation of data. Formats most commonly utilized include line charts, bar graphs, flowcharts, and data tables.

VII. Action to Improve

- A. The EMS Agency, under the direction of the Los Angeles County Department of Health Services, utilizes the FOCUS PDSA model for performance improvement.

1. **F**ind a process to improve; improvement needs are identified by the EMS Agency QI Team in collaboration with the TAG, QI and Advisory groups.
2. **O**rganize the process utilizing the team most familiar with the process related to the system process identified.
3. **C**larify current knowledge of the process by collecting information and reviewing current trends.
4. **U**nderstand capabilities and causes for variations in processes by utilizing brainstorming techniques and fishbone diagrams or flowcharts.
5. **S**elect a strategy or process for improvement that will most likely reduce or eliminate the causes for variation in performance.
6. **P**lan, determine objectives and develop plan in agreement with system participants.

7. **D**o, carry out the action according to established plan.
8. **S**tudy findings, the EMS QI Team with system input will analyze the findings, compare with hypothesis, and prepare a summary for a trend report.
9. **A**ct on findings, the EMS QI Team in collaboration with the QI and Advisory groups will determine performance improvement needs. A quality task force may be chartered if needed, to carry out specific performance improvement plans.

VIII. Training and Education

- A. The effectiveness of the QI process is related to the efficacy of training and educational activities. Due the size and complexity of our system, training and education is accomplished through a variety of mechanisms:
 1. **Quality Improvement Committees/Advisory Meetings**
Information needed for improving local system and statewide performance is disseminated to committee members for training and education of providers responsible for direct patient care.
 2. **EMS Update**
Under the direction of Dr. Denise Whitfield, designated EMS Agency staff, Paramedic Training Institute, and system stakeholders develop and implement the mandatory annual EMS Update that address educational and training needs related to system need and performance improvement. The EMS Update 2020 format was changed to an on-line format utilizing a learningmanagement system for ease of access and tracking compliance.
 3. **EMS System Data Report**
The EMS Agency publishes an [Los Angeles County EMS System Report](#) that provides valuablefeedback to the EMS community and citizens of Los Angeles on demographics and performance.
 4. 
The [Emergi-Press](#) is a web-based EMS educational forum located on the EMS Agency website. Educational material includes, ECG of the month video learning modules, and cases from the field that are posted monthly with availability to earn continuing education credit. Additionally, the Emergi-Press utilizes Updates from The Medical Director to communicate pertinent information to EMS personnel and stakeholders regarding system issues.
- B. The EMS Agency QI Team and other advisory groups review policies and procedures to insure consistency with the EMSA and LAC EMS QI plan.
- C. Once a performance improvement plan has been successfully implemented, the EMS Agency will post all policies and system updates to its website to allow timely access by all EMS participants.

VIII. Update/Summary

The QI plan is updated to reflect the changes in our plan and performance measures. Year 2020 required the EMS Agency to focus efforts on evaluating COVID- 19 related Provider Impressions, utilization of Treatment Protocol Reference 1245, Potential COVID-19 Patient, Reference 834, Patient Refusal of Treatment or Transport, and Reference 845, Treat and Refer for Mild Respiratory Illness During the COVID-19 Outbreak. An ad hoc committee with community partners was convened to evaluate the EMS Agency data and improve prehospital care for patients not transported. The QI plan is submitted to EMSA for review and published on the EMS Agency website for review by the EMS participants and system stakeholders.
