Trauma Mechanisms and Surgical Outcomes in the Elderly Patient with Chronic Subdural Hematoma

Jimmy Sundblom, MD, PhD[1], Elisabeth Sandberg, MD[1,2], Elisabeth Ronne-Engström MD, PhD[1]

[1]Department of Medical Sciences, Section of Neurosurgery, Uppsala University Hospital, Uppsala;
[2]Departement of Radiology, Karolinska University Hospital, Stockholm, Sweden

https://doi.org/10.5770/cgj.25.519

ABSTRACT

Background
Chronic subdural hematoma is the preeminent neurosurgical condition in the older population. This retrospective single-centre study focuses on outcome after surgery of chronic subdural hematoma in patients over 70 years.

Methods
Patients treated at a single neurosurgical referral centre between 2010 and 2014 were screened. Included patients were assessed for comorbid conditions, lifestyle factors, and outcomes including recurrence, mortality, and postoperative complications.

Results
A total of 511 patients (70–97 yrs) were identified. 50.7% of patients were treated with anticoagulants and/or antiplatelet therapy. A known probable cause for the hematoma was found in 68.1% of patient's histories. Mortality rate was 3.1% and recurrence was seen in 49 patients (9.6%). Postoperative complications were more common in patients with excessive use of alcohol (p value = .02). Neurological function was improved

INTRODUCTION

Chronic subdural hematoma (CSDH) is a collection of blood and degraded blood products located between the dura and arachnoid.[1,2] CSDH occurs more often in the elderly.[3,4] The yearly incidence of CSDH ranges from 8.2–14/100.000 in the general population[2,5,6] and is expected to be increasing as a consequence of an aging population.[4] The cause of CSDH has been explained by head trauma which leads to tearing of the bridging veins.[7] Subsequent inflammation and neovascularization of hematoma capsule, creating small vessels susceptible further tearing, are also important factors for the development of CSDH.[1]

Surgical evacuation of CSDH is one of the most common procedures in neurosurgical practice. Several different types of surgical techniques have been described and are currently used, including twist-drill craniotomy, burr-hole craniostomy with closed drainage system, and craniotomy.[2,8-10] Non-surgical treatment regimes have been suggested, with medical options such as corticosteroids, atorvastatin, tranexamic acid, and ACE-inhibitors being subjected to trials[1,11-13] with no clinically relevant effect proven.

Symptoms of CSDH are heterogenous, with the most

Reference List Basic Rules-Journal Article

Invert names so that the last name comes first, followed by a comma and the initials. Leave a space between initials. Retain the order of authors' names.

Capitalize only the first letter of the first word. For a two-part title, capitalize the first word of the second part of the title. Also capitalize proper nouns. Do not italicize. End with a period.

Follow APA guidelines when using the cite tool.

Place the year in parentheses. End with a period.

Author, A. A., & Author, B. B. (Year). Title of the article.

Name of the Periodical, *volume*(issue), #–#. https://doi.org/xxxx

Capitalize all major words in the periodical name. Follow with a comma. Italicize the periodical name (but not the comma after).

Italicize the volume number. Do not put a space between the volume number and the parentheses around the issue number.

Include the article page range. Use an en dash; do not put spaces around the en dash. End with a period.

Do not italicize the issue number or parentheses. Follow the parentheses with a comma. **No issue number?** That's okay. Follow the volume number with a comma.

Does the article have a DOI? Include a DOI for all works that have one. Do not put a period after the DOI.

EBSCOhost Research Databases

EBSCO*host* is a powerful online reference system accessible via the Internet. It offers a variety of proprietary full text databases and popular databases from leading information providers.

The comprehensive databases range from general reference collections to specially designed, subject-specific databases for public, academic, medical, corporate and school libraries.

[View A Tutorial On This Topic »]

EBSCO Connect

EBSCO Connect is available 24 hours a day, 7 days a week. Our FAQ database, tutorials, and user guides can provide answers to your technical questions.

- **Library Staff/Administrators**: EBSCO Customer Support Representatives are also available by e-mail 24 hours a day, 7 days a week.

- **Library Patrons/Students**: For additional assistance, please contact your library staff/administrators.

How to Use Help

- When the Help icon ❷ appears, you can click the icon and help for the screen you are on will display.

- To obtain help for the database(s) you are searching, click the Help icon ❷ to the right of the **Find** field and click on the Database name at the bottom of the left-hand side of the Help window. Database help is also available from the Choose Databases window.

- To view the entire Help System, click the Help link at the top right-hand corner of the screen.

Note: The recommended screen resolution for EBSCOhost is 1024 x 768.
