Fire/Evacuation Safety TEST

Name: _____ **Date:** _____ **Unit/Shift:** _____

Circle the Correct Answer

Passing Score 80% **Score:** _____

True False 1. ABC fire extinguishers are used at Rancho.

- A= Ordinary combustibles (e.g., paper, cloth, wood, rubber, many plastics)
- B= Flammable Liquids (e.g., oils, paints, grease, solvent)
- C= Electrical Equipment (e.g., wiring, computers)

True False 2. The acronym P.A.S.S. stands for: Pull, Aim, Squeeze, Sweep.

True False 3. A vertical evacuation is performed when there is no safe place for patients to be moved to on the same floor.

True False 4. The extension for reporting a fire at Rancho is 522.

True False 5. When removing a patient from a specialty bed, securely place a pillow under the patient's feet to cushion them.

True False 6. Patients who can ambulate are always the first to be evacuated.

True False 7. Patients in electric wheelchairs can be removed from the wheelchair and evacuated using the "blanket drag."

True False 8. The acronym R.A.C.E. stands for: Run, Accuse, Contain, Evacuate.

True False 9. A horizontal evacuation performed during an emergency is used when patients can safely be moved from imminent danger to a protected area on a different floor.

True False 10. The nozzle on the ABC fire extinguishers used at Rancho will burn your hand because it gets very cold when discharged.
