PLACE: Doubletree by Hilton
120 S. Los Angeles St., Thousand Cranes
Los Angeles, Ca. 90010

PARKING: \$12.00 self-parking

This training is one of five in a series of trainings identified as meeting core trainings for Social Recovery Specialist (SRS) staff who are defined as non-clinical staff that deliver case management services: Community Worker, Senior Community Worker, Medical Case Worker I and II, Substance Abuse Counselor and Community Services Counselor. The purpose of this full-day training is to introduce participants to evidence-based strategies to identify substance use and mental health disorders and develop behavioral intervention strategies for those with co-occurring substance use and mental health disorders. Key topics will include: an overview of the evolving field of co-occurring disorders; identification and treatment of co-occurring disorders across the lifespan; the impact of alcohol and other drugs on the brain; common mental health disorders that frequently co-occur with substance use.

An overview of the use of motivational interviewing with a COD population encompasses the fundamental MI principles, micro-skills and experiential MI skill development. The MI tools will assist individuals engage in change talk and commitment to behavioral changes based on goals they have identified. Ample time will be devoted to role play, group discussion and activities to enable training participants to gain skills necessary to elicit change talk from individuals with low levels of readiness for change.

TARGET AUDIENCE: SRS DMH and contract providers (Community Worker, Senior Community Worker, Medical Case Worker I and II, Substance Abuse Counselor and Community Services Counselor)

OBJECTIVES: As a result of attending this training, participants should be able to:

- 1) Describe the prevalence of co-occurring substance use and mental health disorders in the U.S.
- 2) Explain at least two ways that alcohol and other drugs impact the user's brain
- 3) Identify three evidence-based methods for identifying and treating co-occurring disorders across the lifespan.
- 4) List at least two mental health disorders across the lifespan.
- 5) Define at least three (3) key principles of motivational interviewing
- 6) Describe and demonstrate the effective delivery of at least three MI micro-skills used to help individuals increase motivation for substance use related changes.
