(3 VOTES)

### **SUBJECT**

Request adoption of a resolution approving Performance Contracts with the State of California Department of Health Care Services to allow the County of Los Angeles Department of Mental Health to continue to administer the Mental Health Services Act, Projects for Assistance in Transition from Homelessness, and Mental Health Block Grant Programs and oversee the provision of community mental health services provided with realignment and Mental Health Services Act funds for Fiscal Years 2013-14 and 2014-15. The resolution also delegates authority to the Director of Mental Health to approve and sign future Performance Contracts for Fiscal Years 2015-16, 2016-17, and 2017-18.

### IT IS RECOMMENDED THAT THE BOARD:

provision of community mental health services provided with realignment funds for FYs 2013-14 and 2014-15.

- 2. Authorize the Director of Mental Health (Director), or his designee, to execute two copies of Agreement No. 13-90313 and Agreement No. 14-90325 (collectively, Current Performance Contracts) and forward the originals to the State.
- 3. Delegate authority to the Director, or his designee, to approve and execute future Performance Contract Agreements for FYs 2015-16, 2016-17, and 2017-18 (collectively, Future Performance Contracts).
- 4. Delegate authority to the Director, or his designee, to approve and execute amendments to the Current Performance Contracts and the Future Performance Contracts, as necessary, upon review and approval as to form by County Counsel and notification to your Board and the Chief Executive Officer (CEO) at least ten days in advance of the execution of any such amendment or modification.

### PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

Adoption of the resolution and execution of the Current Performance Contracts and Future Performance Contracts are necessary for DMH to continue to administer the MHSA, PATH, and MHBG Programs; oversee community mental health services provided with realignment and MHSA funds; and receive reimbursement for these services for FYs 2013-14 through 2017-18. The State will fund these Agreements using funding sources in compliance with applicable statutes and regulations.

The Current Performance Contracts and Future Performance Contracts do not specify contract amounts. They are solely to authorize DMH to administer the programs. Accordingly, the delegated authority will enable the Director to approve and execute Future Performance Contracts for FYs 2015-16 through 2017-18 in a more timely manner.

### Implementation of Strategic Plan Goals

The recommended actions support the County Strategic Plan Goal 3, Integrated Services Delivery.

### FISCAL IMPACT/FINANCING

There is no dollar amount associated with these Agreements. Approval of the Agreements will allow DMH to administer the MHSA, PATH, and MHBG Programs; oversee the provision of community mental health services provided with realignment and MHSA funds; and receive funding for these programs for FYs 2013-14 through 2017-18.

Funding for the mental health programs required by these Agreements for FYs 2013-14 and 2014-15 were included in DMH's FY 2013-14 Final Adopted Budget and FY 2014-15 Adopted Budget.

There is no impact on net County cost associated with the recommended actions.

### FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The Honorable Board of Supervisors 10/21/2014 Page 3

Board approval is required to approve and execute the Current Performance Contracts and Future Performance Contracts between the State and DMH for FYs 2013-14 through 2017-18. A Performance Contract between the State and the Local Mental Health Plan (DMH in Los Angeles County) is required by California Welfare and Institutions Code Sections 5650 (a) and 5847 and Title 9 of the California Code of Regulations Section 3310. These sections set forth the conditions and requirements that the County must meet in order to administer the MHSA, PATH, and MHBG Programs; and oversee the community mental health services provided with realignment and MHSA funds. The Performance Contracts do not cover Federal Financial Participation or State General Funds as they relate to Medi-Cal services provided through the Mental Health Plan Contract. Clinical and administrative staff of DMH is assigned to ensure that the contract provisions and departmental policies are followed.

As a result of late submission of the Current Performance Contracts to the County by the State, Agreement No. 13-90313 is retroactive to July 1, 2013, for FY 2013-14, and Agreement No. 14-90325 is retroactive to July 1, 2014, for FY 2014-15. As the Current Performance Contracts were received around the same time, we are asking your Board to approve them concurrently. These types of contracts are excluded from the retroactive contracts policy established in 2000. Accordingly, they were not presented before the Retroactive Contract Review Committee.

The State is expected to prepare and send the Agreements for FYs 2015-16, 2016-17 and 2017-18 at the beginning of the respective fiscal years.

### **IMPACT ON CURRENT SERVICES (OR PROJECTS)**

The Current Performance Contracts and Future Performance Contracts will allow DMH to continue to administer the MHSA, PATH, and MHBG Programs; oversee the community mental health services provided with realignment and MHSA funds; and receive funding for these programs for FYs 2013-14 through 2017-18.

### **CONCLUSION**

Adoption of the resolution will enable DMH to continue to administer the MHSA, PATH, and MHBG Programs and oversee community mental health services provided with realignment and MHSA funds for FYs 2013-14 through 2017-18.

DMH will need one original executed resolution which will be submitted to the State. It is requested that the Executive Officer of the Board notify DMH Contracts Development and Administration Division at (213) 738-4684 when the document is available.

### B. THE MENTAL HEALTH SERVICES ACT PROGRAM

### 1) Program Description

Proposition 63, which created the Mental Health Services Act (MHSA), was approved by the voters of California on November 2, 2004. The Mental Health Services (MHS) Fund, which provides funds to counties for the implementation of its MHSA programs, was established pursuant to W&I section 5890. The MHSA was designed to expand California's public mental health programs and services through funding received by a one percent tax on incomes in excess of \$1 million. Counties use this funding for projects and programs for prevention and early intervention, community services and supports, workforce development and training, innovation, plus capital facilities and technological needs through mental health projects and programs. The State Controller distributes MHS Funds to the counties to plan for and provide mental health programs and other related activities outlined in a county's three-year program and expenditure plan or annual update. MHS Funds are distributed by the State Controller's Office to the counties on a monthly basis.

DHCS shall monitor County's use of MHS Funds to ensure that the county meets the MHSA and MHS Fund requirements. (W&I section 5651(c).)

### 2) Issue Resolution Process

County shall have an Issue Resolution Process (Process) to handle client disputes related to the provision of their mental health services. The Process shall be completed in an expedient and appropriate manner. County shall develop a log to record issues submitted as part of the Process. The log shall contain the date of the issue was received; a brief synopsis of the issue; the final issue resolution outcome; and the date the final issue resolution was reached.

The RER shall be certified by the mental health director and one of the following: County mental health department's chief financial officer (or equivalent), and individual who has delegated authority to sign for, and reports directly to the County mental health department's chief financial officer (or equivalent), or the County's auditor-controller (or equivalent), using the DHCS-issued certification form. Data submitted shall be full and complete. County shall also submit a reconciled RER certified by the mental health director and the county's auditor-controller as being true and correct, using the DHCS-issued certification form, no later than 18 months after the close of the following fiscal year.

If the RER is not timely submitted, or does not meet the requirements, DHCS may, after a hearing held with no less than 20 days- notice to the county mental health director (W&I § 5655), withhold payments from the MHS Fund until the County is in compliance with Title 9, CCR, sections 3505(d) and 3510(c).

Pursuant to Title 42, United State Code, sections 290cc-21 through 290cc-35, inclusive, the State of California has been awarded federal homeless funds through the federal McKinney Projects for Assistance in Transition from Homelessness (PATH) formula grant. The PATH grant funds community based outreach, mental health and substance abuse referral/treatment, case management and other support services, as well as a limited set of housing services for the homeless mentally ill.

While county mental health programs serve thousands of homeless persons with realignment funds and other local revenues, the PATH grant augments these programs by providing services to approximately 8,300 additional persons annually. The county determines its use of PATH funds based on county priorities and needs.

If County wants to receive PATH funds, it shall submit its RFA responses and required documentation specified in DHCS' Request for Application (RFA). County shall complete its RFA responses in accordance with the instructions, enclosures and attachments available on the DHCS website at:

# D. COMMUNITY MENTAL HEALTH SERVICES GRANT (MHBG) PROGRAM (Title 42, United States Code section 300x-1 et seq.)

DHCS awards federal Community Mental Health Services Block Grant funds (known as Mental Health Block Grant (MHBG)) to counties in California. These programs provide services to the following target populations: children and youth with serious emotional disturbances (SED), adults and older adults with serious mental illnesses (SMI).

The MHBG funds provide the counties with a stable, flexible, and non-categorical funding base that the counties can use to develop innovative programs or augment existing programs within their SOC. The MHBG funds also assist the counties in providing an appropriate level of community mental health services to the most needy individuals in the target populations who have a mental health diagnosis, and/or individuals who have a mental health diagnosis with a co-occurring substance abuse disorder.

If County wants to receive MHBG funds, it shall submit its RFA responses and required documentation specified in DHCS' RFA. County shall complete its RFA responses in accordance with the instructions, enclosures and attachments available on the DHCS website at:

http://www.dhcs.ca.gov/services/MH/Pages/MHBG.aspx.

If County applied for and DHCS approved its request to receive MHBG grant funds, the RFA, County's RFA responses and required documentation, and DHCS' approval constitute provisions of this Agreement and are incorporated by reference herein. County shall comply with all provisions of the RFA and the County's RFA responses in order to receive its MHBG grant funds.

DHCS reserves the right to participate in and/or control, at Contractor's expense, any such infringement action brought against DHCS.

- (2) Should any Intellectual Property licensed by the Contractor to DHCS under this Agreement become the subject of an Intellectual Property infringement claim, Contractor will exercise its authority reasonably and in good faith to preserve DHCS' right to use the licensed Intellectual Property in accordance with this Agreement at no expense to DHCS. DHCS shall have the right to monitor and appear through its own counsel (at Contractor's expense) in any such claim or action. If such remedies are not reasonably available, DHCS shall be entitled to a refund of all monies paid under this Agreement, without restriction or limitation of any other rights and remedies available at law or in equity.
- (3) Contractor agrees that damages alone would be inadequate to compensate DHCS for breach of any term of this Intellectual Property Exhibit by Contractor. If the problem cannot be resolved informally, the Contractor shall direct its grievance together with any evidence, in writing, to the program Branch Chief. The Branch Chief shall render a decision within ten (10) working days after receipt of the written grievance from the Contractor. # 16. Financial and Compliance Audit Requirements

- a. The definitions used in this provision are contained in Section 38040 of the Health and Safety Code, which by this reference is made a part hereof.
- b. Direct service contract means a contract or agreement for services contained in local assistance or subvention programs or both (see Health and Safety [H&S] Code Section 38020). - c. The Contractor, as indicated below, agrees to obtain one of the following audits:
  - (1) If the Contractor is a nonprofit organization (as defined in H&S Code Section 38040) and receives \$25,000 or more from any State agency under a direct service contract or agreement; the Contractor agrees to obtain an annual single, organization wide, financial and compliance audit. Said audit shall be conducted according to Generally Accepted Auditing Standards. This audit does not fulfill the audit requirements of Paragraph c(3) below. The audit shall be completed by the 15th day of the fifth month following the end of the Contractor's fiscal year, and/or
  - (2) If the Contractor is a nonprofit organization (as defined in H&S Code Section 38040) and receives less than \$25,000 per year from any State agency under a direct service contract or agreement, the Contractor agrees to obtain a biennial single, organization wide financial and compliance audit, unless there is evidence of fraud or other violation of state law in connection with this Agreement. This audit does not fulfill the audit requirements of Paragraph c(3) below. The audit shall be completed by the 15th day of the fifth month following the end of the Contractor's fiscal year, and/or
  - (3) If the Contractor is a State or Local Government entity or Nonprofit organization (as defined by the Federal Office of Management and Budget [OMB] Circular A-133) and expends \$500,000 or more in Federal awards, the Contractor agrees to obtain an annual single, organization wide, financial and compliance audit according to the requirements specified in OMB Circular A-133 entitled "Audits of States, Local Governments, and Non-Profit Organizations". DHCS-Exhibit DF (2/12) Page 15 of 26

- d. Two copies of the audit report shall be delivered to the DHCS program funding this Agreement. The audit report must identify the Contractor's legal name and the number assigned to this Agreement. The audit report shall be due within 30 days after the completion of the audit. Upon receipt of said audit report, the DHCS Program Contract Manager shall forward the audit report to DHCS' Audits and Investigations Unit if the audit report was submitted under Section 16.c(3), unless the audit report is from a City, County, or Special District within the State of California whereby the report will be retained by the funding program.
- e. The cost of the audits described herein may be included in the funding for this Agreement up to the proportionate amount this Agreement represents of the Contractor's total revenue. The DHCS program funding this Agreement must provide advance written approval of the specific amount allowed for said audit expenses.
- f. The State or its authorized designee, including the Bureau of State Audits, is responsible for conducting agreement performance audits which are not financial and compliance audits. Performance audits are defined by Generally Accepted Government Auditing Standards.
- g. Nothing in this Agreement limits the State's responsibility or authority to enforce State law or regulations, procedures, or reporting requirements arising thereto.
- h. Nothing in this provision limits the authority of the State to make audits of this Agreement, provided however, that if independent audits arranged for by the Contractor meet Generally Accepted Governmental Auditing Standards, the State shall rely on those audits and any additional audit work and shall build upon the work already done.
- The State may, at its option, direct its own auditors to perform either of the audits described above. The Contractor will be given advance written notification, if the State chooses to exercise its option to perform said audits.
- j. The Contractor shall include a clause in any agreement the Contractor enters into with the audit firm doing the single organization wide audit to provide access by the State or Federal Government to the working papers of the independent auditor who prepares the single organization wide audit for the Contractor.
- k. Federal or state auditors shall have "expanded scope auditing" authority to conduct specific program audits during the same period in which a single organization wide audit is being performed, but the audit report has not been issued. The federal or state auditors shall review and have access to the current audit work being conducted and will not apply any testing or review procedures which have not been satisfied by previous audit work that has been completed.

The term "expanded scope auditing" is applied and defined in the U.S. General Accounting Office (GAO) issued Standards for *Audit of Government Organizations, Programs, Activities and Functions*, better known as the "yellow book".

The Contractor warrants that no person or selling agency has been employed or retained to solicit/secure this Agreement upon an agreement of understanding for a commission, percentage, brokerage, or contingent fee, except bona fide employees or bona fide established commercial or selling agencies retained by the Contractor for the purpose of securing business. DHCS-Exhibit DF (2/12) Page 20 of 26

#### f. Earned/Accrued Compensation

- (1) Compensation for vacation, sick leave and holidays is limited to that amount earned/accrued within the agreement term. Unused vacation, sick leave and holidays earned from periods prior to the agreement term cannot be claimed as allowable costs. See Provision f (3)(a) for an example.
- (2) For multiple year agreements, vacation and sick leave compensation, which is earned/accrued but not paid, due to employee(s) not taking time off may be carried over and claimed within the overall term of the multiple years of the Agreement. Holidays cannot be carried over from one agreement year to the next. See Provision f (3)(b) for an example.
- (3) For single year agreements, vacation, sick leave and holiday compensation that is earned/accrued but not paid, due to employee(s) not taking time off within the term of the Agreement, <u>cannot</u> be claimed as an allowable cost. See Provision f (3)(c) for an example.

#### (a) Example No. 1:

If an employee, John Doe, earns/accrues three weeks of vacation and twelve days of sick leave each year, then that is the maximum amount that may be claimed during a one year agreement. If John Doe has five weeks of vacation and eighteen days of sick leave at the beginning of an agreement, the Contractor during a one-year budget period may only claim up to three weeks of vacation and twelve days of sick leave as actually used by the employee. Amounts earned/accrued in periods prior to the beginning of the Agreement are not an allowable cost.

# (b) Example No. 2:

If during a three-year (multiple year) agreement, John Doe does not use his three weeks of vacation in year one, or his three weeks in year two, but he does actually use nine weeks in year three; the Contractor would be allowed to claim all nine weeks paid for in year three. The total compensation over the three-year period cannot exceed 156 weeks (3 x 52 weeks).

#### (c) Example No. 3:

If during a single year agreement, John Doe works fifty weeks and used one week of vacation and one week of sick leave and all fifty-two weeks have been billed to DHCS, the remaining unused two weeks of vacation and seven days of sick leave may not be claimed as an allowable cost.

- b. Written confirmation of the suspension or stop work notification with directions as to what work (if not all) is to be suspended and how to proceed will be provided within 30 working days of the verbal notification. The suspension or stop work notification shall remain in effect until further written notice is received from DHCS. The resumption of work (in whole or part) will be at DHCS' discretion and upon receipt of written confirmation.
  - (1) Upon receipt of a suspension or stop work notification, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize or halt the incurrence of costs allocable to the performance covered by the notification during the period of work suspension or stoppage.
  - (2) Within 90 days of the issuance of a suspension or stop work notification, DHCS shall either:
    - (a) Cancel, extend, or modify the suspension or stop work notification; or
    - (b) Terminate the Agreement as provided for in the Cancellation / Termination clause of the Agreement.

DHCS-Exhibit DF (2/12) Page 21 of 26

- c. If a suspension or stop work notification issued under this clause is canceled or the period of suspension or any extension thereof is modified or expires, the Contractor may resume work only upon written concurrence of funding Program's Contract Manager.
- d. If the suspension or stop work notification is cancelled and the Agreement resumes, changes to the services, deliverables, performance dates, and/or contract terms resulting from the suspension or stop work notification shall require an amendment to the Agreement.
- e. If a suspension or stop work notification is not canceled and the Agreement is cancelled or terminated pursuant to the provision entitled Cancellation / Termination, DHCS shall allow reasonable costs resulting from the suspension or stop work notification in arriving at the settlement costs.
- f. DHCS shall not be liable to the Contractor for loss of profits because of any suspension or stop work notification issued under this clause.

The State Controller distributes MHS Funds to the counties to plan for and provide mental health programs and other related activities outlined in a county's three-year program and expenditure plan or annual update. MHS Funds are distributed by the State Controller's Office to the counties on a monthly basis.

These programs provide services to the following target populations: children and youth with serious emotional disturbances (SED), adults and older adults with serious mental illnesses (SMI).

The MHBG funds provide the counties with a stable, flexible, and non-categorical funding base that the counties can use to develop innovative programs or augment existing programs within their SOC. The MHBG funds also assist the counties in providing an appropriate level of community mental health services to the most needy individuals in the target populations who have a mental health diagnosis, and/or individuals who have a mental health diagnosis with a co-occurring substance abuse disorder.

If County wants to receive MHBG funds, it shall submit its RFA responses and required documentation specified in DHCS' RFA. County shall complete its RFA responses in accordance with the instructions, enclosures and attachments available on the DHCS website at:

The Department makes no warranty or representation that compliance by Contractor with this Exhibit G, HIPAA or the HIPAA regulations will be adequate or satisfactory for Contractor's own purposes or that any information in Contractor's possession or control, or transmitted or received by Contractor, is or will be secure from unauthorized use or disclosure. Contractor is solely responsible for all decisions made by Contractor regarding the safeguarding of the Department PHI, PI and PII.
- Amendment. The parties acknowledge that federal and state laws relating to electronic data security and privacy are rapidly evolving and that amendment of this Exhibit G may be required to provide for procedures to ensure compliance with such developments. The parties specifically agree to take such action as is necessary to implement the standards and requirements of HIPAA, the HITECH Act, and the HIPAA regulations, and other applicable state and federal laws. Upon either party's request, the other party agrees to promptly enter into negotiations concerning an amendment to this Exhibit G embodying written assurances consistent with the standards and requirements of HIPAA, the HITECH Act, and the HIPAA regulations, and other applicable state and federal laws. The Department may terminate this Agreement upon thirty (30) days written notice in the event:
  - a) Contractor does not promptly enter into negotiations to amend this Exhibit G when requested by the Department pursuant to this section; or
  - b) Contractor does not enter into an amendment providing assurances regarding the safeguarding of Department PHI that the Department deems is necessary to satisfy the standards and requirements of HIPAA and the HIPAA regulations.
- Judicial or Administrative Proceedings. Contractor will notify the Department if it is named as a defendant in a criminal proceeding for a violation of HIPAA or other security or privacy law. The Department may terminate this Agreement if Contractor is found guilty of a criminal violation of HIPAA. The Department may terminate this Agreement if a finding or stipulation that the Contractor has violated any standard or requirement of HIPAA, or other security or privacy laws is made in any administrative or civil proceeding in which the Contractor is a party or

- has been joined. DHCS will consider the nature and seriousness of the violation in deciding whether or not to terminate the Agreement.
- Assistance in Litigation or Administrative Proceedings. Contractor shall make itself and any subcontractors, employees or agents assisting Contractor in the performance of its obligations under this Agreement, available to the Department at no cost to the Department to testify as witnesses, or otherwise, in the event of litigation or administrative proceedings being commenced against the Department, its directors, officers or employees based upon claimed violation of HIPAA, or the HIPAA regulations, which involves inactions or actions by the Contractor, except where Contractor or its subcontractor, employee or agent is a named adverse party.
- No Third-Party Beneficiaries. Nothing express or implied in the terms and conditions of this Exhibit G is intended to confer, nor shall anything herein confer, upon any person other than the Department or Contractor and their respective successors or assignees, any rights, remedies, obligations or liabilities whatsoever.
- Interpretation. The terms and conditions in this Exhibit G shall be interpreted as broadly as necessary to implement and comply with HIPAA, the HITECH Act, and the HIPAA regulations. The parties agree that any ambiguity in the terms and conditions of this Exhibit G shall be resolved in favor of a meaning that complies and is consistent with HIPAA, the HITECH Act and the HIPAA regulations, and, if applicable, any other relevant state and federal laws.
- 7) Conflict. In case of a conflict between any applicable privacy or security rules, laws, regulations or standards the most stringent shall apply. From time to time, and subject to all applicable federal and state privacy and security laws and regulations, the Department may conduct a reasonable inspection of the facilities, systems, books and records of Contractor to monitor compliance with this Exhibit G. Contractor shall promptly remedy any violation of any provision of this Exhibit G. The fact that the Department inspects, or fails to inspect, or has the right to inspect, Contractor's facilities, systems and procedures does not relieve Contractor of its responsibility to comply with this Exhibit G. The Department's failure to detect a non-compliant practice, or a failure to report a detected non-compliant practice to Contractor does not constitute acceptance of such practice or a waiver of the Department's enforcement rights under this Agreement, including this Exhibit G.
- 12) Due Diligence. Contractor shall exercise due diligence and shall take reasonable steps to ensure that it remains in compliance with this Exhibit G and is in compliance with applicable provisions of HIPAA, the HITECH Act and the HIPAA regulations, and other applicable state and federal law, and that its agents, subcontractors and vendors are in compliance with their obligations as required by this Exhibit G.

The screening should be commensurate with the risk and magnitude of harm the employee could cause, with more thorough screening being done for those employees who are authorized to bypass significant technical and operational security controls. The Contractor shall retain each workforce member's background check documentation for a period of three (3) years.

# 2. Technical Security Controls

A. Workstation/Laptop encryption. All workstations and laptops that store Department PHI or PI either directly or temporarily must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as

Advanced Encryption Standard (AES). The encryption solution must be full disk unless approved by the Department Information Security Office.

- B. **Server Security**. Servers containing unencrypted Department PHI or PI must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review.
- C. Minimum Necessary. Only the minimum necessary amount of Department PHI or PI required to perform necessary business functions may be copied, downloaded, or exported.
- D. Removable media devices. All electronic files that contain Department PHI or PI data must be encrypted when stored on any removable media or portable device (i.e. USB thumb drives, floppies, CD/DVD, Blackberry, backup tapes etc.). Encryption must be a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES.
- E. **Antivirus software**. All workstations, laptops and other systems that process and/or store Department PHI or PI must install and actively use comprehensive anti-virus software solution with automatic updates scheduled at least daily.
- F. Patch Management. All workstations, laptops and other systems that process and/or store Department PHI or PI must have critical security patches applied, with system reboot if necessary. There must be a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a maximum, all applicable patches must be installed within 30 days of vendor release. Applications and systems that cannot be patched within this time frame due to significant operational reasons must have compensatory controls implemented to minimize risk until the patches can be installed. Applications and systems that cannot be patched must have compensatory controls implemented to minimize risk, where possible.
- G. User IDs and Password Controls. All users must be issued a unique user name for accessing Department PHI or PI. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee with knowledge of the password. Passwords are not to be shared. Passwords must be at least eight characters and must be a non-dictionary word. Passwords must not be stored in readable format on the computer. Passwords must be changed at least every 90 days, preferably every 60 days. Passwords must be changed if revealed or compromised. Passwords must be composed of characters from at least three of the following four groups from the standard keyboard:

Page 29

- 1) Upper case letters (A-Z)
- 2) Lower case letters (a-z)
- 3) Arabic numerals (0-9)
- 4) Non-alphanumeric characters (punctuation symbols)
- H. Data Destruction. When no longer needed, all Department PHI or PI must be wiped using the Gutmann or US Department of Defense (DoD) 5220.22-M (7 Pass) standard, or by degaussing. Media may also be physically destroyed in accordance with NIST Special Publication 800-88. Other methods require prior written permission of the Department Information Security Office.
- System Timeout. The system providing access to Department PHI or PI must provide an automatic timeout, requiring re-authentication of the user session after no more than 20 minutes of inactivity.
- J. Warning Banners. All systems providing access to Department PHI or PI must display a warning banner stating that data is confidential, systems are logged, and system use is for business purposes only by authorized users. User must be directed to log off the system if they do not agree with these requirements.
- K. System Logging. The system must maintain an automated audit trail which can identify the user or system process which initiates a request for Department PHI or PI, or which alters Department PHI or PI. The audit trail must be date and time stamped, must log both successful and failed accesses, must be read only, and must be restricted to authorized users. If Department PHI or PI is stored in a database, database logging functionality must be enabled. Audit trail data must be archived for at least 3 years after occurrence.
- L. Access Controls. The system providing access to Department PHI or PI must use role based access controls for all user authentications, enforcing the principle of least privilege.
- M. Transmission encryption. All data transmissions of Department PHI or PI outside the secure internal network must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES. Encryption can be end to end at the network level, or the data files containing Department PHI can be encrypted. This requirement pertains to any type of Department PHI or PI in motion such as website access, file transfer, and E-Mail.

Reviews should include vulnerability scanning tools.
- B. **Log Reviews**. All systems processing and/or storing Department PHI or PI must have a routine procedure in place to review system logs for unauthorized access.
- C. Change Control. All systems processing and/or storing Department PHI or PI must have a documented change control procedure that ensures separation of duties and protects the confidentiality, integrity and availability of data.

# 4. Business Continuity / Disaster Recovery Controls

- A. Emergency Mode Operation Plan. Contractor must establish a documented plan to enable continuation of critical business processes and protection of the security of Department PHI or PI held in an electronic format in the event of an emergency. Emergency means any circumstance or situation that causes normal computer operations to become unavailable for use in performing the work required under this Agreement for more than 24 hours.
- B. Data Backup Plan. Contractor must have established documented procedures to backup Department PHI to maintain retrievable exact copies of Department PHI or PI. The plan must include a regular schedule for making backups, storing backups offsite, an inventory of backup media, and an estimate of the amount of time needed to restore Department PHI or PI should it be lost. At a minimum, the schedule must be a weekly full backup and monthly offsite storage of Department data.

Mailings which include 500 or more individually identifiable records of Department PHI or PI in a single package shall be sent using a tracked mailing method which includes verification of delivery and receipt, unless the prior written permission of the Department to use another method is obtained.

# INFORMATION EXCHANGE AGREEMENT BETWEEN THE SOCIAL SECURITY ADMINISTRATION (SSA) AND

# THE CALIFORNIA DEPARTMENT OF HEALTH CARE SERVICES (STATE AGENCY)

- A. PURPOSE: The purpose of this Information Exchange Agreement ("IEA") is to establish terms, conditions, and safeguards under which SSA will disclose to the State Agency certain information, records, or data (herein "data") to assist the State Agency in administering certain federally funded state-administered benefit programs (including state-funded state supplementary payment programs under Title XVI of the Social Security Act) identified in this IEA. By entering into this IEA, the State Agency agrees to comply with:
  - the terms and conditions set forth in the Computer Matching and Privacy Protection Act Agreement ("CMPPA Agreement") attached as **Attachment 1**, governing the State Agency's use of the data disclosed from SSA's Privacy Act System of Records; and
  - all other terms and conditions set forth in this IEA.
- B. PROGRAMS AND DATA EXCHANGE SYSTEMS: (1) The State Agency will use the data received or accessed from SSA under this IBA for the purpose of administering the federally funded, state-administered programs identified in Table 1 below. In Table 1, the State Agency has identified: (a) each federally funded, state-administered program that it administers; and (b) each SSA data exchange system to which the State Agency needs access in order to administer the identified program. The list of SSA's data exchange systems is attached as Attachment 2:

- C. PROGRAM QUESTIONNAIRE: Prior to signing this IEA, the State Agency will complete and submit to SSA a program questionnaire for each of the federally funded, state-administered programs checked in Table 1 above. SSA will not disclose any data under this IEA until it has received and approved the completed program questionnaire for each of the programs identified in Table 1 above.

**D.** TRANSFER OF DATA: SSA will transmit the data to the State Agency under this IEA using the data transmission method identified in Table 2 below:

#### TABLE 2

TRANSFER OF DATA
Data will be transmitted directly between SSA and the State Agency.
[X] Data will be transmitted directly between SSA and the California Office of Technology (State Transmission/Transfer Component ("STC")) by the File Transfer Management System, a secure mechanism approved by SSA. The STC will serve as the conduit between SSA and the State Agency pursuant to the State STC Agreement.
Data will be transmitted directly between SSA and the Interstate Connection Network ("ICON"). ICON is a wide area telecommunications network connecting state agencies that administer the state unemployment insurance laws. When receiving data through ICON, the State Agency will comply with the "Systems Security Requirements for SSA Web Access to SSA Information Through the ICON," attached as Attachment 3.

This IRS Publication 1075 is incorporated by reference into this IEA.
- F. CONTRACTOR/AGENT RESPONSIBILITIES: The State Agency will restrict access to the data obtained from SSA to only those authorized State employees, contractors, and agents who need such data to perform their official duties in connection with purposes identified in this IEA. At SSA's request, the State Agency will obtain from each of its contractors and agents a current list of the employees of its contractors and agents who have access to SSA data disclosed under this IEA. The State Agency will require its contractors, agents, and all employees of such contractors or agents with authorized access to the SSA data disclosed under this IEA, to comply with the terms and conditions set forth in this IEA, and not to duplicate, disseminate, or disclose such data without obtaining SSA's prior written approval. In addition, the State Agency will comply with the limitations on use, duplication, and redisclosure of SSA data set forth in Section IX. of the CMPPA Agreement, especially with respect to its contractors and agents.

# G. SAFEGUARDING AND REPORTING RESPONSIBILITIES FOR PERSONALLY IDENTIFIABLE INFORMATION ("PII"):

- 1. The State Agency will ensure that its employees, contractors, and agents:

# COMPUTER MATCHING AND PRIVACY PROTECTION ACT AGREEMENT

# COMPUTER MATCHING AND PRIVACY PROTECTION ACT AGREEMENT BETWEEN THE SOCIAL SECURITY ADMINISTRATION AND THE HEALTH AND HUMAN SERVICES AGENCY OF CALIFORNIA

# I. Purpose and Legal Authority

# A. Purpose

This Computer Matching and Privacy Protection Act (CMPPA) Agreement between the Social Security Administration (SSA) and the California Health and Human Services Agency (State Agency), sets forth the terms and conditions governing disclosures of records, information, or data (collectively referred to herein "data") made by SSA to the State Agency that administers federally funded benefit programs under various provisions of the Social Security Act (Act), such as section 1137 (42 U.S.C. § 1320b-7), including the state-funded state supplementary payment programs under title XVI of the Act. The terms and conditions of this Agreement ensure that SSA makes such disclosures of data, and the State Agency uses such disclosed data, in accordance with the requirements of the Privacy Act of 1974, as amended by the Computer Matching and Privacy Protection Act of 1988, 5 U.S.C. § 552a.

Under section 1137 of the Act, the State Agency is required to use an income and eligibility verification system to administer specified federally funded benefit programs, including the state-funded state supplementary payment programs under title XVI of the Act. To assist the State Agency in determining entitlement to and eligibility for benefits under those programs, as well as other federally funded benefit programs, SSA discloses certain data about applicants for state benefits from SSA Privacy Act Systems of Records (SOR) and verifies the Social Security numbers (SSN) of the applicants.

## B. Legal Authority

SSA's authority to disclose data and the State Agency's authority to collect, maintain, and use data protected under SSA SORs for specified purposes is:

- Sections 1137, 453, and 1106(b) of the Act (42 U.S.C. §§ 1320b-7, 653, and 1306(b)) (income and eligibility verification data);
- 26 U.S.C. § 6103(l)(7) and (8) (tax return data);
- Section 202(x)(3)(B)(iv) of the Act (42 U.S.C. § 401(x)(3)(B)(iv)) (prisoner data);
- Section 1611(e)(1)(I)(iii) of the Act (42 U.S.C. § 1382(e)(1)(I)(iii) (SSI);

- Section 205(r)(3) of the Act (42 U.S.C. § 405(r)(3)) and the Intelligence Reform and Terrorism Prevention Act of 2004, Pub. L. 108-458, § 7213(a)(2) (death data);
- Sections 402, 412, 421, and 435 of Pub. L. 104-193 (8 U.S.C. §§ 1612, 1622, 1631, and 1645) (quarters of coverage data);
- Children's Health Insurance Program Reauthorization Act of 2009, Pub. L. 111-3 (citizenship data); and
- Routine use exception to the Privacy Act, 5 U.S.C. § 552a(b)(3) (data necessary to administer other programs compatible with SSA programs).

This Agreement further carries out section 1106(a) of the Act (42 U.S.C. § 1306), the regulations promulgated pursuant to that section (20 C.F.R. Part 401), the Privacy Act of 1974 (5 U.S.C. § 552a), as amended by the CMPPA, related Office of Management and Budget (OMB) guidelines, the Federal Information Security Management Act of 2002 (FISMA) (44 U.S.C. § 3541, et seq.), and related National Institute of Standards and Technology (NIST) guidelines, which provide the requirements that the State Agency must follow with regard to use, treatment, and safeguarding of data.

# II. Scope

- A. The State Agency will comply with the terms and conditions of this Agreement and the Privacy Act, as amended by the CMPPA.
- B. The State Agency will execute one or more Information Exchange Agreements (IEA) with SSA, documenting additional terms and conditions applicable to those specific data exchanges, including the particular benefit programs administered by the State Agency, the data elements that will be disclosed, and the data protection requirements implemented to assist the State Agency in the administration of those programs.
- C. The State Agency will use the SSA data governed by this Agreement to determine entitlement and eligibility of individuals for one or more of the following programs:
  - 1. Temporary Assistance to Needy Families (TANF) program under Part A of title IV of the Act;
  - 2. Medicaid provided under an approved State plan or an approved waiver under title XIX of the Act;
  - 3. State Children's Health Insurance Program (CHIP) under title XXI of the Act, as amended by the Children's Health Insurance Program Reauthorization Act of 2009:
  - 4. Supplemental Nutritional Assistance Program (SNAP) under the Food Stamp Act of 1977 (7 U.S.C. § 2011, et seq.);

- 5. Women, Infants and Children Program (WIC) under the Child Nutrition Act of 1966 (42 U.S.C. § 1771, et seq.);
- 6. Medicare Savings Programs (MSP) under 42 U.S.C. § 1396a(10)(E);
- 7. Unemployment Compensation programs provided under a state law described in section 3304 of the Internal Revenue Code of 1954;
- 8. Low Income Heating and Energy Assistance (LIHEAP or home energy grants) program under 42 U.S.C. § 8621;
- 9. State-administered supplementary payments of the type described in section 1616(a) of the Act;
- 10. Programs under a plan approved under titles I, X, XIV or XVI of the Act;
- 11. Foster Care and Adoption Assistance under title IV of the Act;
- 12. Child Support Enforcement programs under section 453 of the Act (42 U.S.C. § 653);
- 13. Other applicable federally funded programs administered by the State Agency under titles I, IV, X, XIV, XVI, XVIII, XIX, XX and XXI of the Act; and
- 14. Any other federally funded programs administered by the State Agency that are compatible with SSA's programs.
- D. The State Agency will ensure that SSA data disclosed for the specific purpose of administering a particular federally funded benefit program is used only to administer that program.

# III. Justification and Expected Results

#### A. Justification

This Agreement and related data exchanges with the State Agency are necessary for SSA to assist the State Agency in its administration of federally funded benefit programs by providing the data required to accurately determine entitlement and eligibility of individuals for benefits provided under these programs. SSA uses computer technology to transfer the data because it is more economical, efficient, and faster than using manual processes.

# B. Expected Results

The State Agency will use the data provided by SSA to improve public service and program efficiency and integrity. The use of SSA data expedites the application process and ensures that benefits are awarded only to applicants that satisfy the State Agency's program criteria. A cost-benefit analysis for the exchange made under this Agreement is not required in accordance with the determination by the SSA Data Integrity Board (DIB) to waive such analysis pursuant to 5 U.S.C. § 552a(u)(4)(B).

# IV. Record Description

# A. Systems of Records

SSA SORs used for purposes of the subject data exchanges include:

- 60-0058 -- Master Files of SSN Holders and SSN Applications (accessible through EVS, SVES, or Quarters of Coverage Ouery data systems):
- 60-0059 -- Earnings Recording and Self-Employment Income System (accessible through BENDEX, SVES, or Quarters of Coverage Ouery data systems);
- 60-0090 -- Master Beneficiary Record (accessible through BENDEX or SVES data systems);
- 60-0103 -- Supplemental Security Income Record (SSR) and Special Veterans Benefits (SVB) (accessible through SDX or SVES data systems);
- 60-0269 -- Prisoner Update Processing System (PUPS) (accessible through SVES or Prisoner Ouery data systems).
- 60-0321 -- Medicare Part D and Part D Subsidy File

The State Agency will only use the tax return data contained in SOR 60-0059 (Earnings Recording and Self-Employment Income System) in accordance with 26 U.S.C. § 6103.

#### B. Data Elements

Data elements disclosed in computer matching governed by this Agreement are Personally Identifiable Information (PII) from specified SSA SORs, including names, SSNs, addresses, amounts, and other information related to SSA benefits, and earnings information. Specific listings of data elements are available at:

## http://www.ssa.gov/gix/

# C. Number of Records Involved

The number of records for each program covered under this Agreement is equal to the number of title II, title XVI, or title XVIII recipients resident in the State as recorded in SSA's Annual Statistical Supplement found on the Internet at:

## http://www.ssa.gov/pollcv/docs/statcomps/

This number will fluctuate during the term of this Agreement, corresponding to the number of title II, title XVI, and title XVIII recipients added to, or deleted from, SSA databases during the term of this Agreement.

# V. Notice and Opportunity to Contest Procedures

# A. Notice to Applicants

The State Agency will notify all individuals who apply for federally funded, state-administered benefits under the Act that any data they provide are subject to verification through computer matching with SSA. The State Agency and SSA will provide such notice through appropriate language printed on application forms or separate handouts.

# B. Notice to Beneficiaries/Recipients/Annuitants

The State Agency will provide notice to beneficiaries, recipients, and annuitants under the programs covered by this Agreement informing them of ongoing computer matching with SSA. SSA will provide such notice through publication in the Federal Register and periodic mailings to all beneficiaries, recipients, and annuitants describing SSA's matching activities.

# C. Opportunity to Contest

The State Agency will not terminate, suspend, reduce, deny, or take other adverse action against an applicant for or recipient of federally funded, state-administered benefits based on data disclosed by SSA from its SORs until the individual is notified in writing of the potential adverse action and provided an opportunity to contest the planned action. "Adverse action" means any action that results in a termination, suspension, reduction, or final denial of eligibility, payment, or benefit. Such notices will:

- 1. Inform the individual of the match findings and the opportunity to contest these findings;
- 2. Give the individual until the expiration of any time period established for the relevant program by a statute or regulation for the individual to respond to the notice. If no such time period is established by a statute or regulation for the program, a 30-day period will be provided. The time period begins on the date on which notice is mailed or otherwise provided to the individual to respond; and
- 3. Clearly state that, unless the individual responds to the notice in the required time period, the State Agency will conclude that the SSA data are correct and will effectuate the threatened action or otherwise make the necessary adjustment to the individual's benefit or entitlement.

# VI. Records Accuracy Assessment and Verification Procedures

The State Agency may use SSA's benefit data without independent verification. SSA has independently assessed the accuracy of its benefits data to be more than 99 percent accurate when they are created.

Prisoner and death data, some of which is not independently verified by SSA, does not have the same degree of accuracy as SSA's benefit data. Therefore, the State Agency must independently verify these data through applicable State verification procedures and the notice and opportunity to contest procedures specified in Section V of this Agreement before taking any adverse action against any individual.

SSA's citizenship data may be less than 50 percent current. Applicants for SSNs report their citizenship status at the time they apply for their SSNs. There is no obligation for an individual to report to SSA a change in his or her immigration status until he or she files a claim for benefits.

# VII. Disposition and Records Retention of Matched Items

- A. The State Agency will retain all data received from SSA to administer programs governed by this Agreement only for the required processing times for the applicable federally funded benefit programs and will then destroy all such data.
- B. The State Agency may retain SSA data in hardcopy to meet evidentiary requirements, provided that they retire such data in accordance with applicable state laws governing the State Agency's retention of records.
- C. The State Agency may use any accretions, deletions, or changes to the SSA data governed by this Agreement to update their master files of federally funded, state-administered benefit program applicants and recipients and retain such master files in accordance with applicable state laws governing the State Agency's retention of records.
- D. The State Agency may not create separate files or records comprised solely of the data provided by SSA to administer programs governed by this Agreement.
- E. SSA will delete electronic data input files received from the State Agency after it processes the applicable match. SSA will retire its data in accordance with the Federal Records Retention Schedule (44 U.S.C. § 3303a).

## VIII. Security Procedures

The State Agency will comply with the security and safeguarding requirements of the Privacy Act, as amended by the CMPPA, related OMB guidelines, FISMA, related

NIST guidelines, and the current revision of IRS Publication 1075, Tax Information Security Guidelines for Federal, State and Local Agencies and Entities, available at <a href="http://www.irs.gov">http://www.irs.gov</a>. In addition, the State Agency will have in place administrative, technical, and physical safeguards for the matched data and results of such matches. Additional administrative, technical, and physical security requirements governing all data SSA provides electronically to the State Agency, including specific guidance on safeguarding and reporting responsibilities for PII, are set forth in the IEAs.

# IX. Records Usage, Duplication, and Redisclosure Restrictions

- A. The State Agency will use and access SSA data and the records created using that data only for the purpose of verifying eligibility for the specific federally funded benefit programs identified in the IEA.
- B. The State Agency will comply with the following limitations on use, duplication, and redisclosure of SSA data:
  - 1. The State Agency will not use or redisclose the data disclosed by SSA for any purpose other than to determine eligibility for, or the amount of, benefits under the state-administered income/health maintenance programs identified in this Agreement.
  - 2. The State Agency will not use the data disclosed by SSA to extract information concerning individuals who are neither applicants for, nor recipients of, benefits under the state-administered income/health maintenance programs identified in this Agreement.
  - 3. The State Agency will use the **Federal tax information (FTI)** disclosed by SSA only to determine individual eligibility for, or the amount of, assistance under a state plan pursuant to section 1137 programs and child support enforcement programs in accordance with 26 U.S.C. § 6103(I)(7) and (8). The State Agency receiving FTI will maintain all FTI from IRS in accordance with 26 U.S.C. § 6103(p)(4) and the IRS Publication 1075. Contractors and agents acting on behalf of the State Agency will only have access to tax return data where specifically authorized by 26 U.S.C. § 6103 and the IRS Publication 1075.
  - 4. The State Agency will use the citizenship status data disclosed by SSA under the Children's Health Insurance Program Reauthorization Act of 2009, Pub. L. 111-3, only for the purpose of determining entitlement to Medicaid and CHIP programs for new applicants.
  - 5. The State Agency will restrict access to the data disclosed by SSA to only those authorized State employees, contractors, and agents who need such data

to perform their official duties in connection with the purposes identified in this Agreement.

- 6. The State Agency will enter into a written agreement with each of its contractors and agents who need SSA data to perform their official duties whereby such contractor or agent agrees to abide by all relevant Federal laws, restrictions on access, use, and disclosure, and security requirements in this Agreement. The State Agency will provide its contractors and agents with copies of this Agreement, related IEAs, and all related attachments before initial disclosure of SSA data to such contractors and agents. Prior to signing this Agreement, and thereafter at SSA's request, the State Agency will obtain from its contractors and agents a current list of the employees of such contractors and agents with access to SSA data and provide such lists to SSA.
- 7. The State Agency's employees, contractors, and agents who access, use, or disclose SSA data in a manner or purpose not authorized by this Agreement may be subject to civil and criminal sanctions pursuant to applicable Federal statutes.
- C. The State Agency will not duplicate in a separate file or disseminate, without prior written permission from SSA, the data governed by this Agreement for any purpose other than to determine entitlement to, or eligibility for, federally funded benefits. The State Agency proposing the redisclosure must specify in writing to SSA what data are being disclosed, to whom, and the reasons that justify the redisclosure. SSA will not give permission for such redisclosure unless the redisclosure is required by law or essential to the conduct of the matching program and authorized under a routine use.

# X. Comptroller General Access

The Comptroller General (the Government Accountability Office) may have access to all records of the State Agency that the Comptroller General deems necessary to monitor and verify compliance with this Agreement in accordance with 5 U.S.C. § 552a(o)(l)(K).

# XI. Duration, Modification, and Termination of the Agreement

# A. Duration

- 1. This Agreement is effective from July 1, 2012 (Effective Date) through December 31, 2013 (Expiration Date).
- 2. In accordance with the CMPPA, SSA will: (a) publish a Computer Matching Notice in the Federal Register at least 30 days prior to the

Effective Date; (b) send required notices to the Congressional committees of jurisdiction under 5 U.S.C. § 552a(o)(2)(A)(i) at least 40 days prior to the Effective Date; and (c) send the required report to the OMB at least 40 days prior to the Effective Date.

- 3. Within 3 months prior the Expiration Date, the SSA DIB may, without additional review, renew this Agreement for a period not to exceed 12 months, pursuant to 5 U.S.C. § 552a(o)(2)(D), if:
  - the applicable data exchange will continue without any change; and
  - SSA and the State Agency certify to the DIB in writing that the applicable data exchange has been conducted in compliance with this Agreement.
- 4. If either SSA or the State Agency does not wish to renew this Agreement, it must notify the other party of its intent not to renew at least 3 months prior to the Expiration Date.

#### B. Modification

Any modification to this Agreement must be in writing, signed by both parties, and approved by the SSA DIB.

# C. Termination

The parties may terminate this Agreement at any time upon mutual written consent of both parties. Either party may unilaterally terminate this Agreement upon 90 days advance written notice to the other party; such unilateral termination will be effective 90 days after the date of the notice, or at a later date specified in the notice.

SSA may immediately and unilaterally suspend the data flow or terminate this Agreement if SSA determines, in its sole discretion, that the State Agency has violated or failed to comply with this Agreement.

# XII. Reimbursement

In accordance with section 1106(b) of the Act, the Commissioner of SSA has determined not to charge the State Agency the costs of furnishing the electronic data from the SSA SORs under this Agreement.

# XIII. Disclaimer

SSA is not liable for any damages or loss resulting from errors in the data provided to the State Agency under any IEAs governed by this Agreement. Furthermore, SSA is not liable for any damages or loss resulting from the destruction of any materials or data provided by the State Agency.

# ELECTRONIC INFORMATION EXCHANGE SECURITY REQUIREMENTS AND PROCEDURES FOR

# STATE AND LOCAL AGENCIES RECEIVING ELECTRONIC INFORMATION FROM THE SOCIAL SECURITY ADMINISTRATION

# 1. Introduction $\Omega$

The Social Security Administration (SSA) is required by law to maintain oversight and assure the protection of information it has provided to its 'electronic information exchange partners' (EIEP)s. EIEPs are entitles that have established an electronic information sharing agreement with the agency.

The overall aim of this document is twofold. First, to ensure that EIEPs are properly certified as compliant by SSA to SSA security requirements, standards, and procedures expressed in this document, prior to being granted access to SSA information in a production environment; second, to ensure that EIEPs adequately safeguard electronic information provided to them by SSA.

This document (which is considered SENSITIVE by SSA and must be handled accordingly), describes the security requirements which must be met including, SSA's standards and procedures which must be implemented by outside entities (state and local agencies) in order to obtain information from SSA electronically. This document assists outside entities in understanding the criteria that SSA will use when evaluating and certifying the system design, and security features used for electronic access to SSA-provided information. It also provides the framework and general procedures for SSA's security compliance review program intended to ensure, on a periodic basis, conformance to SSA's security requirements by outside entities.

The addition, elimination, and modification of security controls, etc. are predicated upon factors which impact the level of security and due diligence required for mitigating risks, e.g., the emergence of new threats and attack methods, the availability of new security technologies, etc. System security requirements (SSR) are, therefore, periodically reviewed and revised. Accordingly, over time, the SSRs may be subject to change.

The EIEP must comply with SSA's most current SSRs for access to SSA-provided data. However, SSA will work with its partners in the EIEPs' resolution of any deficiencies which occur subsequent to previous approval for access as the result of updated SSRs. Additionally, EIEPs may proactively ensure their ongoing compliance with the SSRs by periodically requesting the most current SSR package from their SSA contact and making such adjustments as may be necessary.

# 2. Electronic Information Exchange (EIE) Definition $\Omega$

For discussion purposes herein, EIE is any electronic process in which information under SSA control is disclosed to any third party for program or non-program purposes, without the specific consent of the owner of that information. EIE involves individual data transactions and data files that are processed within the programmatic systems of either or all parties to electronic information sharing agreements with SSA. This includes direct terminal access (DTA) to SSA systems, batch processing, and variations thereof (e.g., online query) regardless of the systematic method used to accomplish the activity or to interconnect SSA with the EIEP.

# 3. Roles and Responsibilities $\Omega$

The SSA *Office of Information Security (OIS)* has agency-wide responsibility for interpreting, developing, and implementing security policy; providing security and integrity review requirements for all major SSA systems; managing SSA's fraud monitoring and reporting activities, developing and disseminating security training and awareness materials, and providing consultation and support for a variety of agency initiatives. SSA's security reviews ensure that external systems receiving information from SSA are secure and operate in a manner that is consistent with SSA's Information Technology (IT) security policies and in compliance with the terms of electronic information sharing agreements executed by SSA and the outside entity. Within the context of SSA's security policies and the terms of electronic information sharing agreements with SSA's EIEPs, OIS exclusively conducts and brings to closure initial security certifications and periodic security compliance reviews of EIEPs that process, maintain, transmit, or store SSA-provided data in accordance with pertinent Federal requirements which include the following (refer to *References*):

- a. The Federal Information Security Management Act (FISMA) requires the protection of "Federal information in contractor systems, including those systems operated by state and local governments".
- b. SSA policies, standards, procedures, and directives.

Privacy information is information about an individual including, but not limited to, personal identifying information including the social security number (SSN).

The data (last 4 digits of the SSN) provided by SSA to its EIEPs for purposes of the Help America Vote Act (HAVA) does not identify a specific individual and, therefore, is not 'Privacy Information' as defined by the Act.

However, SSA is diligent in discharging its responsibility for establishing <u>appropriate</u> administrative, technical, and physical safeguards to ensure the security, confidentiality, and availability of its records and to protect against any anticipated threats or hazards to their security or integrity.

Therefore, although the information provided HAVA is not, by definition, 'Privacy Information' and as such, does not require that SSA conduct compliance reviews of entities to which it provides information for purposes of HAVA; SSA does require that those organizations adhere to the terms of their electronic information sharing agreements with SSA.

NOTE: Disclosure of Federal Tax Information (FTI) is limited to certain Federal agencies and state programs supported by federal statutes under section 1137 of the Social Security Act. For information regarding safeguards for protecting FTI, consult IRS Publication 1075, Tax Information Security Guidelines For Federal, State, and Local Agencies.

SSA regional *Data Exchange Coordinators* (DECs) are the bridge between SSA and state EIEPs. As such, in the security arena, DECs will assist OIS in coordinating data exchange security review activities with state and local EIEPs; e.g., providing points of contact with state agencies, assisting in setting up security reviews, etc. DECs are also the first points of contact for states if an employee of a state agency or an employee of a state agency's contractor or agent becomes aware of suspected or actual loss of SSA-provided personally identifiable information (PII).

# 4. General Systems Security Standards $\Omega$

EIEPs that request and receive information electronically from SSA must comply with the following general systems security standards concerning access to and control of SSA-provided information.

# NOTE: EIEPs may not create separate files or records comprised solely of the information provided by SSA.

- a. EIEPs must ensure that means, methods, and technology by which SSA-provided information is processed, maintained, transmitted, or stored neither prevent nor impede the EIEP's ability to:
  - safeguard the information in conformance to SSA requirements;
  - efficiently investigate fraud, breach, or security events that involve SSA-provided data, or instances of misuse of SSA-provided data.

For example, utilization of cloud computing may have the potential to jeopardize an EIEP's compliance with the terms of their agreement or SSA's associated system security requirements and procedures.

b. The electronic connection established between the EIEPs and SSA must be used only in support of the current agreement(s) between the EIEPs and SSA.

- c. The software and/or devices provided to the EIEPs by SSA must be used only in support of the current agreement(s) between the EIEPs and SSA.
- d. EIEPs are prohibited from modifying any software or devices provided to the EIEPs by SSA.
- e. EIEPs must ensure that SSA-provided data is not processed, maintained, transmitted, or stored in or by means of data communications channels, electronic devices, computers, computer networks, etc. that are located in geographic or virtual areas *not* subject to U.S. law.
- f. EIEPs must restrict access to the information to authorized users who need it to perform their official duties.

NOTE: Contractors and agents (hereafter referred to as contractors) of the EIEP who process, maintain, transmit, or store SSA-provided data are held to the same security requirements as are employees of the EIEP. Refer to the section 'Contractors of Electronic Information Exchange Partners' in the 'Systems Security Requirements' for additional information.

- g. Information received from SSA must be stored in a manner that, at all times, is physically and electronically secure from access by unauthorized persons.
- h. SSA-provided information must be processed under the immediate supervision and control of authorized personnel.
- EIEPs must employ both physical and technological safeguards to ensure against unauthorized retrieval of SSA-provided information by means of computer, remote terminal, or other means.
- j. EIEPs must have in place formal PII Incident response procedures. When faced with a security incident whether caused by malware, unauthorized access, software issues, or acts of nature, etc., EIEP must be able to respond in a manner that protects SSA-provided information affected by the incident.

- k. EIEPs must have an active and robust employee security awareness program that is mandatory for all employees who may have access to SSA-provided information.
- I. EIEP employees with access to SSA provided information must be advised of the confidentiality of the information, the safeguards required to protect the information, and the civil and criminal sanctions for non-compliance contained in the applicable Federal and state laws.
- m. At its discretion, SSA or its designee, must have the option to conduct onsite security reviews or make other provisions, to ensure that EIEPs maintain adequate security controls to safeguard the information we provide.

# 5. Systems Security Requirements 0

# 5.1 Overview 0

Following is a discussion of SSRs that must be met by its EIEPs. SSA must certify that controls to meet the requirements have been implemented and working as intended, before it will authorize initiating transactions to and from SSA through batch data exchange processes or online processes such as State Online Query (SOLQ) or Internet SOLQ.

The SSRs address management, operational, and technical aspects of security regarding the confidentiality, integrity, and availability of SSA-provided information used, maintained, transmitted, or stored by SSA's EIEPs.

SSRs are representative of the current state-of-the-practice security controls, safeguards, and countermeasures required for Federal Information systems by Federal regulations and statutes, congressional mandates, etc., including but not limited to the Privacy Act of 1974, the Federal Information Security Management Act (FISMA), etc. and recommended by standards and guidelines established by NIST, etc.

# 5.2 General System Security Design and Operating Environment $\ \underline{\mathbf{0}}$

The EIEP must provide descriptions and explanations of their overall system design, configuration, security features, and operational environment and include discussions of how they conform to SSA's requirements. Discussion must also include:

- Description of the operating environment(s) in which SSA-provided data is to be utilized, maintained, and transmitted
- Description of the business process(es) in which SSA-provided information is to be used
- Physical safeguards employed to ensure that unauthorized personnel cannot access SSA-provided data and that audit information pertaining to use of and access to SSA-provided information and the EIEP's associated applications is readily available
- Electronic safeguards, methods, and procedures for protecting the EIEP's network infrastructure and for protecting SSA-provided data while in transit, in use within a process or application, at rest (stored or not in use); preventing unauthorized retrieval of SSA-provided information by computer, remote terminal, or other means; including descriptions of security software other than access control software (e.g., security patch and anti-malware software installation and maintenance, etc.)

 Descriptions of how the configurations of devices (e.g., servers, workstations, portable devices) involving SSA-provided information is in compliance with recognized industry standards, SSA's SSRs, and implements adequate security controls (e.g., passwords enforcing sufficient construction strength to defeat or minimize risk-based identified vulnerabilities).

# 5.3 System Access Control 0

EIEPs must utilize and maintain technological (logical) access controls that limit access to SSA-provided information and associated transactions and functions to only those users, processes acting on behalf of authorized users, or devices (including other information systems) authorized for such access based on their official duties or purpose(s). EIEPs must employ a recognized user access security software package (e.g. RAC-F, ACF-2, TOP SECRET) or a security software design which is at minimum equivalent to such products. The access control software must utilize personal identification numbers (PIN) and passwords or biometric identifiers in combination with the user's system identification code (userID), etc. (e.g., the access control software must employ and enforce (1) PIN/password, and/or (2) PIN/biometric identifier, and/or (3) SmartCard/ biometric identifier, etc., for authentication of users).

Depending upon the computing platform (e.g., client/server (PC), mainframe) and the access software implementation, the terms "PIN" and "user system identification code (userID)" may be, for practical purposes, synonymous. For example, the PIN/password combination may be required for access to an individual's PC after which, the userID/password combination may be required for access to a mainframe application. (A biometric identifier may supplant one element in the pair of those combinations).

Implementation of the control software must be in compliance with recognized industry standards. For example, password policies should enforce sufficient construction strength (length and complexity) to defeat or minimize risk-based identified vulnerabilities, ensure limitations for password repetition; technical controls should enforce periodic password changes based on a risk-based standard (e.g., maximum password age of 30-45 days, minimum password age of 3-7 days), enforce automatic disabling of user accounts that have been inactive for a specified period of time (e.g., 45 days); etc.

The EIEP's password policies must also require more stringent password construction (e.g., passwords greater than eight characters in length requiring upper and lower case letters, numbers, and special characters; password phrases) for the user accounts of persons, processes, or devices whose functions require access privileges in excess of those of ordinary users.

EIEPs must have management control and oversight of the function of authorizing individual user access to SSA-provided information and over the process of issuing and managing access control PINs, passwords, blometric identifiers, etc. for access to the EIEP's system.

The EIEPs' systems access rules must cover such matters as least privilege and individual accountability regarding access to sensitive information and associated transactions and functions, control of transactions by permissions modules, the assignment and limitation of system privileges, disabling accounts of separated employees (e.g., within 24 hours), individual accountability, work at home, dial-up access, and connecting to the Internet.

# 5.4 Automated Audit Trail 0

EIEPs that receive information electronically from SSA are required to implement and maintain a fully automated audit trail system (ATS). The system must, at a minimum, be capable of creating, storing, protecting, and efficiently retrieving and collecting records identifying the individual user that initiates a request for information from SSA or accesses SSA-provided data. At a minimum, individual audit trail records must contain the data needed (including date and time stamps) to associate each query transaction or access to SSA-provided information with its initiator, their action, if any, and the relevant business purpose/process (e.g., SSN verification for driver license, etc.). Each entry in the audit file must be stored as a separate record, not overlaid by subsequent records. Transaction files must be created to capture all input from interactive internet applications which access or query SSA-provided data.

EIEPs whose transactions with SSA are handled AND audited by an STC (e.g., State Transmission Component) are responsible for ensuring that the STC's audit capabilities meet SSA's requirements for an automated audit trail system. The EIEP must also establish a process by which the EIEP is able to efficiently obtain audit information from the STC regarding the EIEP's SSA transactions.

Access to the audit file must be restricted to authorized users with a "need to know" and audit file data must be unalterable (read only) and maintained for a minimum of three (preferably seven) years. Information in the audit file must be retrievable by an automated method and capable of being made available to SSA upon request. Audit trail records must be backed up on a regular basis to ensure their availability. Backup audit files must have the same level of protection as that applied to the original files.

If SSA-provided information is retained by the EIEP (e.g., Access database, Share Point, etc.), or if certain data elements within the EIEP's system will indicate to users that the information has been verified by SSA, the EIEP's system must also capture an audit trail record of any user who views SSA-provided information stored within the EIEP's system. The audit trail requirements for these inquiry transactions are the same as those outlined above for the EIEP's transactions requesting or accessing information directly from SSA.

# 5.5 Personally Identifiable Information (PII) $\Omega$

**PII** is defined as any information which can be used to distinguish or trace an individual's identity, such as their name, social security number, biometric records, etc., alone or when combined with other personal or identifying information which is linked or linkable to a specific individual, such as date and place of birth, mother's maiden name, etc.

**PII loss** is defined as a circumstance wherein SSA has reason to believe that information on hard copy or in electronic format which contains PII provided by SSA to an EIEP, has left the EIEP's custody or has been disclosed by the EIEP to an unauthorized individual or entity. PII loss is a reportable incident (refer to **Incident Reporting**).

If a PII loss involving SSA-provided data occurs or is suspected, the EIEP must be able to quantify the extent of the loss and compile a complete list of the individuals potentially affected incident (refer to *Incident Reporting*).

# 5.6 Monitoring and Anomaly Detection $\Omega$

The EIEP must establish and/or maintain continuous monitoring of its network infrastructure and assets to ensure that:

- implemented security controls continue to be effective over time
- only authorized individuals, devices, and processes have access to SSA-provided information
- efforts by external and internal entities, devices, or processes to perform unauthorized actions (i.e., data breaches, malicious attacks, access to network assets, software/hardware installations, etc.) are detected as soon as they occur
- the necessary parties are immediately alerted to unauthorized actions performed by external and internal entities, devices, or processes
- upon detection of unauthorized actions, measures are immediately initiated to prevent or mitigate associated risk
- in the event of a data breach or security incident, the necessary remedial actions can be efficiently determined and initiated
- trends, patterns, or anomalous occurrences and behavior in user or network activity that may be indicative of potential security issues are more readily discernable

The EIEP's system must include the capability to prevent employees from browsing SSA records (e.g., utilize a permission module and/or employ a system design which is transaction-driven, whereby employees are unable to initiate transactions). If such a design is used, the EIEP then needs only minimal additional monitoring and anomaly detection (detect and monitor employees' attempts to gain access to SSA-provided data to which they are not authorized and attempts to obtain information from SSA for clients not in the EIEP's client system). However, measures must exist to prevent circumvention of the permission module (e.g., creation of a bogus case and subsequently deleting it in such a way that it goes undetected).

If the EIEP's design does not *currently* utilize a permission module *and* is not transaction-driven, until at least one of these security features is implemented, the EIEP must develop and implement compensating security controls to deter their employees from browsing SSA records. These controls must include monitoring and anomaly detection features, either systematic, manual, or a combination thereof. Such features must include the capability to detect anomalies in the volume and/or type of transactions or queries requested or initiated by individuals and include systematic or manual procedures for verifying that requests for and queries of SSA-provided information are in compliance with valid official business purposes. The system must also produce reports providing management and/or supervisors with the capability to appropriately monitor user activity, such as:

User ID Exception Reports:

This type of report captures information about users who enter incorrect user IDs when attempting to gain access to the system or to the transaction that initiates requests for information from SSA, including failed attempts to enter a password.

Inquiry Match Exception Reports:

This type of report captures information about users who may be initiating transactions for SSNs that have no client case association within the EIEP's system (100 percent of these cases must be reviewed by the EIEP's management).

System Error Exception Reports:

This type of report captures information about users who may not understand or be following proper procedures for access to SSA-provided information.

Inquiry Activity Statistical Reports:

This type of report captures information about transaction usage patterns among authorized users and is a tool which would enable the EIEP's management to monitor typical usage patterns in contrast to extraordinary usage.

The EIEP must have a process for distributing these monitoring and exception reports to appropriate local managers/supervisors or to local security officers to ensure that the reports are used by those whose responsibilities include monitoring anomalous activity of users including those who have been granted exceptional system rights and privileges.

# 5.7 Management Oversight and Quality Assurance O

The EIEP must establish and/or maintain ongoing management oversight and quality assurance capabilities to ensure that only authorized employees have access to SSA-provided information and to ensure that there is ongoing compliance with the terms of the EIEP's electronic information sharing agreement with SSA and the SSRs established by SSA for access to and use of SSA-provided data by EIEPs. The management oversight function must consist of one or more of the EIEP's management officials whose job functions include responsibility for assuring that access to and use of SSA-provided information is appropriate for each employee position type for which access is granted.

The EIEP must assure that employees granted access to SSA-provided information receive adequate training on the sensitivity of the information, associated safeguards, procedures that must be followed and the penalties for misuse.

Although not required, it is recommended that EIEPs establish the following functions and require that they be performed by employees whose job functions are separate from those who request or use information from SSA:

- Performing periodic self-reviews to monitor the EIEP's ongoing usage of SSA-provided information.
- Random sampling of work activity involving SSA-provided information to determine whether the access and usage comply with SSA's requirements.

# 5.8 Data and Communications Security $\underline{\mathbf{O}}$

EIEPs must encrypt all PII and SSA-provided information when it is transmitted across dedicated communications circuits between its systems, included in intrastate communications among its local office locations, and resident on the EIEP's mobile computers/devices and removable media, etc. The encryption method employed must meet

acceptable standards as designated by the National Institute of Standards and Technology (NIST). The recommended encryption method for securing SSA-provided data during transport is the Advanced Encryption Standard (AES) or triple DES (Data Encryption Standard 3) if AES is unavailable. Files encrypted for external users (when using tools such as Microsoft WORD encryption, etc.) require a key length of 9 characters. Although not required, it is recommended that the key (also referred to as a *password*) contain both a number and a special character. However, it is required that the key be delivered in a manner wherein the key does not accompany the media. Also, the key must be secured when unattended or not in use.

It is recommended that the public Internet not be used for transmission of SSA-provided information. If it is, however, Internet and all other electronic communications (e.g., emails and FAXes) containing SSA-provided information must, at minimum, utilize Secure Socket Layer (SSL) and 256-bit encryption protocols or more secure methods such as Virtual Private Network technology. Additionally, the data must be transmitted only to a secure address or device (i.e., an address or device to which access is controlled and limited to only specifically authorized individuals and/or processes).

EIEPs may retain SSA-provided data for only the business purpose(s) and period of time stipulated in the EIEP's Information Exchange Agreement with SSA. SSA-provided information is to be deleted, purged, destroyed, or returned to SSA when the purpose for which the information was obtained has been completed.

The EIEP may not save or create separate files comprised solely of information provided by SSA. The EIEP may, however, apply specific SSA-provided data to the EIEP's matched record (i.e., specified data obtained from SSA which matches that in the EIEP's preexisting record).

Duplication and redisclosure of SSA-provided information within or outside the EIEP without the written approval of SSA is prohibited.

EIEPs must prevent unauthorized disclosure of SSA-provided data after processing has been completed and also after the data is no longer required by the EIEP. The EIEP's operational processes must ensure that no residual SSA-provided data remains on the hard drives of users' workstations after the user has exited the application(s) in which SSA-provided data was utilized. In cases where a PC, hard drive, or other computing or storage device on which SSA-provided information resided will be sent offsite from the EIEP for repair and its information must be retrievable, the EIEP's repair contract must include a requirement for non-disclosure of SSA-provided data by the servicing vendor. SSA-provided information must be completely removed from, rendered unrecoverable, or destroyed on any electronic device or media (e.g., hard drives, removable storage devices, etc.) prior to the device or media being serviced by an external vendor (when the data need not be recovered), excessed, sold, or placed in the custody of another organization.

To sanitize media, one of the following methods must be used:

#### Overwriting

Overwrite utilities can only be used on working devices. The media to be overwritten must be designed for multiple reads and writes. This includes disk drives, magnetic tapes, floppies, USB flash drives, etc. The overwrite utility must completely overwrite the media by the *purging* type of media sanitization to make the data irretrievable by a laboratory attack or laboratory forensic procedures (refer to *Definitions* for more information regarding *Media Sanitization*). Reformatting the media does not overwrite the data.

## Degaussing

Degaussing is a sanitization method for magnetic media (e.g., disk drives, tapes, floppies, etc.). Degaussing is not effective for purging non-magnetic media (e.g., optical discs). Degaussing must be performed with a certified tool designed for the media being degaussed. Certification of the tool is required to ensure that the magnetic flux applied to the media is strong enough to render the information irretrievable. The degaussing process must render data on the media irretrievable by a laboratory attack or laboratory forensic procedures (refer to *Definitions* for more information regarding *Media Sanitization*).

## Physical destruction

Physical destruction is the method which must be used when degaussing or over-writing cannot be accomplished (for example, CDs, floppies, DVDs, damaged tapes, hard drives, damaged USB flash drives, etc.). Examples of physical destruction include shredding, pulverizing, and burning.

State agencies may retain SSA-provided data in hardcopy if it is required to fulfill evidentiary requirements, provided the agencies retire such data in accordance with applicable state laws governing state agencies' retention of records. The EIEP must ensure that print media containing SSA-provided data is controlled to restrict its access to only authorized employees who need such access to perform their official duties and must have in place secure processes by which print media containing SSA-provided data is destroyed when it is no longer required. Paper documents containing SSA-provided data must be destroyed by burning, pulping, shredding, macerating, or other similar means that ensures that the information cannot be recovered.

NOTE: Hand tearing or lining through documents to obscure information does not meet SSA's requirements for appropriate destruction of PII).

The EIEP must employ measures to ensure that communications and data furnished to SSA contain no viruses or other malware.

# 5.9 Incident Reporting 0

The EIEP must develop and implement policies and procedures for responding to the breach or loss of PII and explain how they conform to SSA's requirements. The procedures must include the following information:

If the EIEP experiences or suspects a breach or loss of PII or a security incident which includes SSA-provided data, they must notify the United States Computer Emergency Readiness Team (US-CERT) within one hour of discovering the incident. The EIEP must also notify the SSA Systems Security contact named in the agreement. If within 1 hour the EIEP has been unable to make contact with that person, the EIEP must call SSA's National Network Service Center (NNSC) toll free at 877-697-4889 (select "Security and PII Reporting" from the options list). The EIEP will provide updates as they become available to SSA contact, as appropriate. Refer to the worksheet provided in the agreement to facilitate gathering and organizing information about an incident.

The EIEP must agree that if SSA determines that the risk presented by the breach or security incident requires the notification of the individuals whose information is involved and/or remedial action, the EIEP will perform those actions without cost to SSA.

# 5.10 Security Awareness and Employee Sanctions $\Omega$

The EIEP must establish and/or maintain an ongoing function that is responsible for providing security awareness training for employees granted access to SSA-provided information. Training must include discussion of:

- The sensitivity of SSA-provided information and address the Privacy Act and other Federal and state laws governing its use and misuse
- Rules of behavior concerning use of and security in systems processing SSA-provided data
- Restrictions on viewing and/or copying SSA-provided information
- The employees' responsibility for proper use and protection of SSA-provided information including its proper disposal
- Security Incident reporting procedures
- The possible sanctions and penalties for misuse of SSA-provided information.

The EIEP must provide security awareness training periodically or. as needed, and have in place administrative procedures for sanctioning employees who violate laws governing the use and misuse of SSA-provided data through unauthorized or unlawful use or disclosure of SSA-provided information.

# 5.11 Contractors of Electronic Information Exchange Partners $\Omega$

As previously stated, in <u>The General Systems Security Standards</u>, contractors of the EIEP are held to the same security requirements as are employees of the EIEP. As such, the EIEP is responsible for oversight and compliance of their contractors with SSA's security requirements. The EIEP must be able to provide proof of the contractual agreement between itself and its contractors (e.g., copy of their contract, etc.) who are authorized by the EIEP to perform on its behalf and who have access to or are involved in the processing, handling, transmission, etc. of information provided to the EIEP by SSA. The EIEP must also explain the role of those contractors within the EIEP's operations.

The EIEP must also require that their contractors who will have access to or be involved in the processing, handling, transmission, etc. of information provided to the EIEP by SSA, sign an agreement with the EIEP that obligates the contractor to follow the terms of the EIEP's data exchange agreement with SSA. The EIEP must provide its contractors a copy of the data exchange agreement between the EIEP and SSA and related attachments before any disclosure by the EIEP of SSA-provided information to the EIEP's contractor/agent.

If the EIEP's contractor will be involved with the processing, handling, transmission, etc. of information provided to the EIEP by SSA offsite from the EIEP, the EIEP must have the contractual option to perform onsite reviews of that offsite facility to ensure that the following meet SSA's requirements:

- safeguards for sensitive information
- computer system safeguards
- security controls and measures to prevent, detect, and resolve unauthorized access to, use of, and redisclosure of SSA-provided information

 $\bigcirc$ 

• continuous monitoring of the EIEP contractors' network infrastructures and assets

# 6. General -- Security Certification and Compliance Review Programs $\Omega$

SSA's security certification and compliance review programs are two distinct programs with the same objective. The certification program is a one-time process associated exclusively with an EIEP's initial request for electronic access to SSA-provided information or an initial change to online access. The certification process entails two rigorous stages intended to ensure that technical, management, and operational security measures implemented by EIEPs fully conform to SSA's security requirements and are working as intended. EIEPs must satisfy both stages of the certification process before SSA will permit online access to its data in a production environment.

The compliance review program, however, is intended to ensure that the suite of security measures implemented by an EIEP to safeguard SSA-provided data remains in full compliance with SSA's security standards and requirements. The compliance review program is applicable to online access to SSA-provided data as well as batch processes. Under the compliance review program, EIEPs are subject to ongoing periodic security reviews by SSA that are regularly scheduled or ad hoc.

# 6.1 The Security Certification Program $\Omega$

The security certification process applies to EIEPs that seek online electronic access to SSA information and consists of two general phases:

 Phase One: The Security Design Plan (SDP) phase wherein a formal written plan is authored by the EIEP to comprehensively document its technical and non-technical security controls to safeguard SSA-provided information (refer to <u>Documenting Security</u> Controls in the Security Design Plan).

**NOTE:** SSA may have legacy EIEPs (EIEPs not certified under the current process) who have not prepared an SDP. OIS strongly recommends that these EIEPs prepare an SDP.

The EIEPs' preparation and maintenance of a current SDP will aid them in determining potential compliance issues prior to reviews, assuring continued compliance with SSA's security requirements, and providing for more efficient security reviews.

 Phase 2: SSA Onsite Certification phase wherein a formal onsite review is conducted by SSA to examine the full suite of technical and non-technical security controls implemented by the EIEP to safeguard data obtained from SSA electronically (refer to <u>The</u> <u>Certification Process</u>).

# 6.2 Documenting Security Controls in the Security Design Plan (SDP) $\underline{\mathbf{0}}$

# 6.2.1 When the SDP and RA are Required $\Omega$

EIEPs must submit to SSA an SDP and a security risk assessment (RA) for evaluation when one or more of the following circumstances apply. The RA must be in an electronic format

and include discussion of the measures planned or implemented to mitigate risks identified by the RA and (as applicable) risks associated with the circumstances below:

- to obtain approval for requested initial access to SSA-provided information for an initial agreement
- to obtain approval to reestablish previously terminated access to SSA-provided data
- when implementing a new operating or security platform in which SSA-provided data will be involved
- significant changes to the EIEP's organizational structure, technical processes, operational
  environment, data recovery capabilities, or security implementations are planned or have
  been made since approval of their most recent SDP or of their most recent successfully
  completed security review
- one or more security breaches or incidents involving SSA-provided data have occurred since approval of the EIEP's most recent SDP or of their most recent successfully completed security review
- to document descriptions and explanations of measures implemented as the result of a data breach or security incident
- to document descriptions and explanations of measures implemented to resolve noncompliancy issue(s)
- when approval of the SDP has been revoked

The RA may also be required if changes (other than those listed above) that may impact the terms of the EIEP's data sharing agreement with SSA have occurred.

## The SDP must be approved by SSA prior to the initiation of transactions and/or access to SSA-provided information by the EIEP.

An SDP must satisfactorily document the EIEP's compliance with all of SSA's SSRs in order to provide the minimum level of security acceptable to SSA for its EIEPs' access to SSA-provided information.

Deficiencies identified through the evaluation of the SDP must be corrected by the EIEP and a revised SDP which incorporates descriptions and explanations of the measures implemented to eliminate the deficiencies must be submitted. Until the deficiencies have been corrected and documented in its SDP, and the SDP is approved, the EIEP will not be granted access to SSA-provided information or certified for electronic receipt of the information. The progress of corrective implementation(s) must be communicated to SSA on a regular basis. If, within a reasonable time as determined by SSA, the EIEP is unable to rectify a deficiency determined by SSA to present an untenable risk to SSA-provided information or the agency, approval of the SDP will be withheld.

If, at any time subsequent to approval of its SDP the EIEP is found to be in non-compliance with one or more SSRs, SSA may revoke approval of the EIEP's access to SSA-provided data. A revised SDP which incorporates descriptions and explanations of the measures implemented to resolve the non-compliance issue(s) must be submitted. The progress of corrective implementation(s) must be communicated to SSA on a regular basis. Until resolution of the issue(s) has been accomplished and documented in its SDP, and the SDP is approved, the EIEP will be in non-compliance with SSA's SSRs. If, within a reasonable time as determined by SSA, the EIEP is unable to rectify a deficiency determined by SSA to present an untenable

risk to SSA-provided information or to SSA, approval of the SDP will be withheld and the flow of SSA-provided information to the EIEP may be discontinued.

NOTE: EIEPs that function only as an STC, transferring SSA-provided data to other EIEPs must, per the terms of their agreements with SSA, adhere to SSA's System Security Requirements (SSR) and exercise their responsibilities regarding protection of SSA-provided information.

#### 6.3 The Certification Process ①

Once the EIEP has successfully satisfied Phase 1, SSA will conduct an onsite certification review. The objective of the onsite review will be to ensure by SSA's examination and the EIEP's demonstration that the non-technical and technical controls implemented by the EIEP to safeguard Social Security-provided data from misuse and improper disclosure are fully functioning and working as intended.

At its discretion, SSA may request that the EIEP participate in an onsite review and compliance certification of their security infrastructure and implementation of SSA's security requirements.

The onsite review may address any or all of SSA's security requirements and include, where appropriate:

- a demonstration of the EIEP's implementation of each requirement
- random sampling of audit records and transactions submitted to SSA
- a walkthrough of the EIEP's data center to observe and document physical security safeguards
- a demonstration of the EIEP's implementation of electronic exchange of data with SSA
- discussions with managers/supervisors
- examination of management control procedures and reports (e.g., anomaly detection reports, etc.)
- demonstration of technical tools pertaining to user access control and, if appropriate, browsing prevention, specifically:
  - o If the design is based on a permission module or similar design, or is transaction driven, the EIEP will demonstrate how the system triggers requests for information from SSA.
  - o If the design is based on a permission module, the EIEP will demonstrate the process by which requests for SSA-provided information are prevented for SSNs not present in the EIEP's system (e.g.; by attempting to obtain information from SSA using at least one, randomly created, fictitious number not known to the EIEP's system).

During a certification or compliance review, SSA or a certifier acting on its behalf, may request a demonstration of the EIEP's audit trail system (ATS) and its record retrieval capability. The certifier may request a demonstration of the ATS' capability to track the activity of employees that have the potential to access SSA-supplied information within the EIEP's system. Additionally, the certifier may request those EIEPs whose transactions with

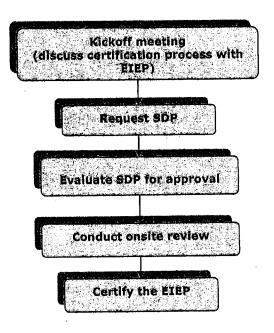

SSA are handled AND audited by an STC to demonstrate the process(es) by which the EIEP obtains audit information from the STC regarding the EIEP's SSA transactions.

EIEPs whose transactions with SSA are handled AND audited by an STC will be required to demonstrate both their own in-house audit capabilities AND the process(es) by which the EIEP obtains audit information from the STC regarding the EIEP's transactions with SSA.

If the EIEP employs a contractor who will be involved with the processing, handling, transmission, etc. of the EIEP's SSA-provided information offsite from the EIEP, SSA, at its discretion, may include in the onsite certification review an onsite inspection of the contractor's facility. The inspection may occur with or without a representative of the EIEP.

Upon successful completion of the onsite certification exercise, SSA will authorize electronic access to production data by the EIEP. SSA will provide written notification of its certification to the EIEP as well as all appropriate internal components.

The following is a high-level flow chart of the OIS Certification Process:  $\Omega$ 

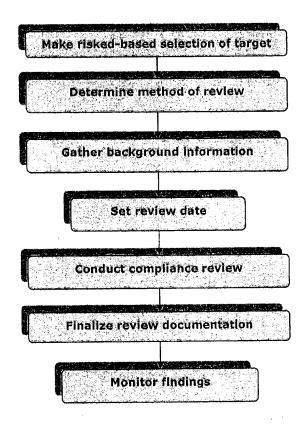

#### 6.5 The Compliance Review Program and Process $\Omega$

Similar to the certification process, the compliance review program entails a rigorous process intended to ensure that EIEPs currently receiving electronic information from SSA are in full compliance with the Agency's security requirements and standards. As a practice, SSA attempts to conduct compliance reviews following a 3 to 5 year periodic review schedule. However, as circumstances warrant, a review may take place at anytime. Three prominent examples that would trigger an ad hoc review are:

- a significant change in the outside EIEP's computing platform
- a violation of any of SSA's systems security requirements

an unauthorized disclosure of SSA information by the EIEP

The following is a high-level flow chart of the OIS Compliance Review Process:  $\Omega$ 

SSA may, at its discretion, conduct compliance reviews onsite at the EIEPs' site, including a field office location, if appropriate.

SSA may, also at its discretion, request that the EIEP participate in an onsite compliance review of their security infrastructure and implementation of SSA's security requirements.

The onsite review may address any or all of SSA's security requirements and include, where appropriate:

- a demonstration of the EIEP's Implementation of each requirement
- random sampling of audit records and transactions submitted to SSA
- a walkthrough of the EIEP's data center to observe and document physical security safeguards
- a demonstration of the EIEP's implementation of online exchange of data with SSA
- discussions with managers/supervisors

- examination of management control procedures and reports (e.g., anomaly detection reports, etc.)
- demonstration of technical tools pertaining to user access control and, if appropriate, browsing prevention, specifically:
  - o If the design is based on a permission module or similar design, or is transaction driven, the EIEP will demonstrate how the system triggers requests for information from SSA.
  - o If the design is based on a permission module, the EIEP will demonstrate the process by which requests for SSA-provided information are prevented for SSNs not present in the EIEP's system (e.g.; by attempting to obtain information from SSA using at least one, randomly created, fictitious number not known to the EIEP's system).

SSA may also, at its discretion, perform an ad hoc onsite or remote review for reasons including but not limited to the following:

- the EIEP has experienced a security breach or incident involving SSA-provided data
- the EIEP has unresolved non-compliancy issue(s)
- to review an EIEP's offsite (relative to the EIEP) contractor's facilities involving SSAprovided data
- the EIEP is a legacy organization that has not yet been through SSA's security certification and compliance review programs
- the EIEP has requested that an IV & V (Independent Verification and Validation review) be performed by SSA

During the compliance review, SSA, or a certifier acting on its behalf, may request a demonstration of the system's audit trail and retrieval capability. The certifier may request a demonstration of the system's capability for tracking the activity of employees that are permitted to view SSA-provided information within the EIEP's system. Additionally, the certifier may request those EIEPs whose transactions with SSA are handled AND audited by an STC to demonstrate the process(es) by which the EIEP obtains audit information from the STC regarding the EIEP's SSA transactions.

EIEPs whose transactions with SSA are handled AND audited by an STC may be required to demonstrate both their own in-house audit capabilities AND the process(es) by which the EIEP obtains audit information from the STC regarding the EIEP's transactions with SSA.

If the EIEP employs a contractor who will be involved with the processing, handling, transmission, etc. of the EIEP's SSA-provided information offsite from the EIEP, SSA, at its discretion, may include in the onsite compliance review an onsite inspection of the contractor's facility. The inspection may occur with or without a representative of the EIEP. However, manpower limitations or fiscal constraints could drive an alternative approach, such as teleconferencing. In any event, the format of the review in routine circumstances (i.e., the compliance review is not being conducted to address a special drcumstance, such as a disclosure violation, etc.) will generally consist of reviewing and updating the EIEP's compliance with the systems security requirements described above in this document. At the conclusion of the review, SSA will issue a formal report to appropriate EIEP personnel. Findings and recommendations from SSA's compliance review, if any, will be discussed in its report and monitored for closure.

NOTE: Documentation provided SSA by the EIEP for compliance reviews is considered sensitive and is, therefore, handled accordingly by SSA. E.g., the information is accessible to only authorized individuals who have a need for the information as it relates to compliance of the EIEP with its electronic information sharing agreement with SSA and SSA's associated system security requirements and procedures. Additionally, the EIEP's documentation is retained for only as long as required and is deleted, purged, or destroyed when the requirement for which the information was obtained has expired.

The following is a high-level example of the analysis that aids in making preliminary decisions as to which review format may be most appropriate. Various additional factors may also be factored in determining whether SSA performs an onsite or remote compliance review.

- High/Medium Risk Criteria
  - o undocumented closing of prior review finding(s)
  - o implementation of technical/operational controls that impact security of SSA provided data (e.g., implementation of new data access method, etc.)
  - o reported PII breach
- Low Risk Criteria
  - o no prior review finding(s) or prior finding(s) documented as closed
  - o no implementation of technical/operational controls that impact security of SSA provided data (e.g., implementation of new data access method, etc.)
  - o no reported PII breach

#### 6.5.1 EIEP Compliance Review Participation <u>0</u>

During the compliance review SSA may request to meet with the following:

- a sample of managers and/or supervisors responsible for enforcing and monitoring ongoing compliance to security requirements and procedures to assess their level of training to monitor their employee's use of SSA-provided information, and for reviewing reports and taking necessary action
- the individuals responsible for security awareness and employee sanction functions and request an explanation of how these responsibilities are performed
- a sample of the EIEP's employees to assess their level of training and understanding of the requirements and potential sanctions applicable to the use and misuse of SSA-provided information
- the individual(s) responsible for management oversight and quality assurance functions and request a description of how these responsibilities will be carried out
- additional individuals as deemed appropriate by SSA

#### 6.5.2 Verification of Audit Samples $\Omega$

Prior to or during the compliance review, SSA will present to the EIEP a sampling of transactions previously submitted to SSA for verification. The EIEP is required to

verify whether each transaction was, per the terms of their agreement with SSA, legitimately submitted by a user authorized to do so.

The EIEP must provide SSA a written attestation of the results of the EIEP's review of the transactions. The document must provide:

- confirmation for each sample transaction located in the EIEP's audit file(s) and determined to have been submitted by its employee(s) for legitimate and authorized business purposes
- an explanation for each sample transaction located in the EIEP's audit file(s) determined to have been unauthorized
- an explanation for each sample transaction not found in the EIEP's ATS

When the sample transactions are provided to the EIEP, detailed instructions will be included. Only an official responsible for the EIEP is to provide the attestation.

#### 6.6 Scheduling the Onsite Review 0

The SDP must be approved before its associated onsite review is scheduled. Notification of the approval of a plan will be sent via email. Although there is no prescribed time frame for arranging the subsequent onsite review (*certification review* for an EIEP requesting initial access to SSA-provided information for an initial agreement or *compliance review* for other EIEPs), unless there are compelling circumstances precluding it, the onsite review will follow as soon as reasonably possible.

However, the scheduling of the onsite review may depend on additional factors including:

- the reason for submission of a plan
- the severity of security issues if any
- circumstances of the previous review if any
- SSA workload considerations

Although the scheduling of the review is contingent upon approval of the SDP, in extreme circumstances, SSA may, at its discretion, perform an onsite review prior to approval if determined necessary by SSA for completion of the evaluation of a plan.

#### 7. Additional Definitions 0

#### **Back Button:**

Refers to a button on a web browser's toolbar, the *backspace button* on a computer keyboard, a programmed keyboard button or mouse button, etc., that returns a user to a previously visited web page or application screen.

#### Breach:

Refers to actual loss, loss of control, compromise, unauthorized disclosure, unauthorized acquisition, unauthorized access, or any similar term referring to situations where persons other than authorized users and for other than authorized purposes have access or potential access to PII or Covered Information, whether physical, electronic, or in spoken word or recording.

#### **Browsing:**

Requests for or queries of SSA-provided data for purposes not related to the performance of official job dutles.

#### **Choke Point:**

The firewall between a local network and the Internet is considered a choke point in network security, because any attacker would have to come through that channel, which is typically protected and monitored.

#### **Cloud Computing:**

The term refers to Internet-based computing and is derived from the cloud drawing representing the Internet in computer network diagrams. Cloud computing providers deliver on-demand online computing resources (e.g., services, software applications, data storage, and information) accessible to their customers by means of a web service or browser.

#### **Cloud Drive:**

A cloud drive is a Web-based service that provides storage space on a remote server.

#### CloudAudit:

CloudAudit is a specification that provides cloud computing service providers a standard way to present and share detailed, automated statistics about performance and security.

#### Commingling:

The process by which an EIEP adjoins specific SSA-provided data to specific preexisting EIEP information according to a particular data-matching scheme.

#### Degaussing:

Degaussing is the method of using a degausser (i.e., a device that generates a magnetic field) in order to disrupt magentically recorded information. Degaussing can be effective for purging damaged media and media with exceptionally large storage capacities. Degaussing is not effective for purging non-magnetic media (e.g., optical discs).

#### Dial-up:

Sometimes used synonymously with *dial-in*, refers to digital data transmission over the wires of a local telephone network.

#### **Function:**

One or more persons or organizational components assigned to serve a particular purpose, or perform a particular role. Also, the purpose, activity, or role assigned to one or more persons or organizational components.

#### Hub:

As it relates to electronic data exchange with SSA, a hub is an organization which performs as an electronic information distribution and/or collection point (and may also be referred to as a State Transmission Component or STC).

#### ICON:

Interstate Connection Network (various entities use 'Connectivity' rather than 'Connection')

#### **IV & V**

Independent Verification and Validation

#### Legacy System:

A term usually referring to a corporate or organizational computer system or network that utilizes outmoded programming languages, software, and/or hardware that typically no longer receive support from the original vendors or developers.

#### **Manual Transaction:**

An operation (also referred to as a 'user-initiated transaction') which is initiated at the volition of a user rather than system-generated within an automated process.

Example: A user enters a client's Information including the client's SSN on an input screen and presses the 'ENTER' key to acknowledge that input of data has been completed. A new screen appears with multiple options which include 'VERIFY SSN' and 'CONTINUE'. The user has the option to verify the client's SSN or perform alternative actions.

#### Media Sanitization:

- Disposal: Refers to the discarding (e.g., recycling) of media that contains no sensitive or confidential data.
- Clearing: This type of media sanitization is considered to be adequate for protecting
  information from a robust keyboard attack. Clearing must prevent retrieval of information by
  data, disk, or file recovery utilities. Clearing must be resistant to keystroke recovery attempts
  executed from standard input devices and from data scavenging tools. For example,
  overwriting is an acceptable method for clearing media. Deleting items, however, is not
  sufficient for clearing.

This process may include overwriting all addressable locations of the data, as well as its logical storage location (e.g., its file allocation table). The aim of the overwriting process is to replace or obfuscate existing information with random data. Most rewriteable media may be cleared by a single overwrite. This method of sanitization cannot be utilized on unwriteable or damaged media.

Purging: This type of media sanitization is a process that protects information from a
laboratory attack. The terms clearing and purging are sometimes considered synonymous.
However, for some media, clearing is not sufficient for purging (i.e., protecting data from a
laboratory attack). Although most rewriteable media may be cleared by a single overwrite,
purging may require multiple rewrites using different characters for each write cycle.

This is because a laboratory attack involves threats with the capability to employ non-standard assets (e.g., specialized hardware) to attempt data recovery on media outside of that media's normal operating environment.

Degaussing is also an example of an acceptable method for purging magnetic media. If purging media is not a viable method for sanitization, the media should be destroyed.

• Destruction: Physical destruction of media is the most effective form of sanitization. Methods of destruction include burning, pulverizing, and shredding. Any residual medium should be able to withstand a laboratory attack.

#### Permission module:

A utility or subprogram within an application which automatically enforces the relationship of a request for or query of SSA-provided data to an authorized process or transaction legitimately initiated; e.g., verification of an SSN for issuance of a driver license which can be triggered only automatically from within a state's driver license application, requests for information from SSA by an EIEP's employee which cannot be initiated unless the EIEP's client system has a record containing the SSN of the individual for which information is sought, etc.

#### Screen Scraping:

Screen scraping is normally associated with the programmatic collection of visual data from a source. Originally, screen scraping referred to the practice of reading text data from a computer display terminal's screen. This was generally done by reading the terminal's memory through its auxiliary port, or by connecting the terminal output port of one computer system to an input port on another. The term screen scraping is also commonly used to refer to the bidirectional exchange of data.

A screen scraper might connect to a legacy system via Telnet, emulate the keystrokes needed to navigate the legacy user interface, process the resulting display output, extract the desired data, and pass It on to a modern system.

More modern screen scraping techniques include capturing the bitmap data from a screen and running it through an optical character reader engine, or in the case of graphical user interface applications, querying the graphical controls by programmatically obtaining references to their underlying programming objects.

#### Security Breach:

An act from outside an organization that bypasses or contravenes security policies, practices, or procedures.

#### **Security Incident:**

A fact or event which signifies the possibility that a breach of security may be taking place, or may have taken place. All threats are security incidents, but not all security incidents are threats.

#### Security Violation:

An act from within an organization that bypasses or contravenes security policies, practices, or procedures.

#### Sensitive data:

Information such as PII and information provided by SSA to an EIEP, the loss, misuse, or unauthorized access to or modification of which, could adversely affect the national interest or the conduct of Federal programs, or the privacy to which individuals are entitled under 5 U.S.C. Section 552a (the Privacy Act), but that has not been specifically authorized under criteria established by an Executive Order or an Act of Congress to be kept classified in the interest of national defense or foreign policy but is to be protected in accordance with the requirements of the Computer Security Act of 1987 (P.L.100-235).

SMDS (Switched Multimegabit Data Service (SMDS):

SMDS is a telecommunications service that provides connectionless, high- performance, packet-switched data transport. Although not a protocol, it supports standard protocols and communications interfaces using current technology.

SSA-provided data/information:

Synonymous with 'SSA-supplied data/information', defines information under the control of SSA provided to an external entity under the terms of an information exchange agreement with SSA. The following are examples of SSA-provided data/information information:

- SSA's response to a request from an EIEP for information from SSA (e.g., date of death)
- SSA's response to a query from an EIEP for verification of an SSN

SSA data/information:

This is term, sometimes used interchangeably with 'SSA-provided data/information', denotes information under the control of SSA provided to an external entity under the terms of an information exchange agreement with SSA. However, 'SSA data/information' also includes information provided to the EIEP by a source other than SSA, but which is attested by the EIEP to have been verified by SSA, or is coupled with data from SSA as to the accuracy of the information. The following are examples of SSA information:

- SSA's response to a request from an EIEP for information from SSA (e.g., date of death)
- SSA's response to a query from an EIEP for verification of an SSN
- Display by the EIEP of SSA's response to a query for verification of an SSN and the associated SSN provided by SSA
- Display by the EIEP of SSA's response to a query for verification of an SSN and the associated SSN provided to the EIEP by a source other than SSA
- Electronic records that contain only SSA's response to a query for verification of an SSN and the associated SSN whether provided to the EIEP by SSA or a source other than SSA

#### SSN:

Social Security Number

#### STC:

A State Transmission Component is an organization which performs as an electronic information distribution and/or collection point for one or more other entities (and may also be referred to as a hub).

#### System-generated transaction:

A transaction automatically triggered by an automated system process.

Example: A user enters a client's information including the client's SSN on an input screen and presses the 'ENTER' key to acknowledge that input of data has been completed. An automated process then matches the SSN against the user's organization's database and when no match is found, automatically sends an electronic request for verification of the SSN to SSA.

Systems process:

Refers to a software program module that runs in the background within an automated batch, online, or other process.

#### Third Party:

This term pertains to an entity (person or organization) provided access to SSA-provided information by an EIEP or other SSA business partner for which one or more of the following apply:

- is not stipulated access to SSA-provided data by an information-sharing agreement between an EIEP and SSA
- has no information-sharing agreement with SSA
- is not directly authorized by SSA for access to SSA-provided data

#### Transaction-driven:

This term pertains to an automatically initiated online query of or request for SSA information by an automated transaction process (e.g., driver license issuance, etc.). The query or request will only occur if prescribed conditions are met within the automated process.

#### **Uncontrolled transaction:**

This term pertains to a transaction that is not controlled by a permission module (i.e., not subject to a systematically enforced relationship to an authorized process or application or an existing client record).

  - A: Refer to When the SDP and RA are Required.
- 7. Q: Does an SDP have to be submitted when the agreement is renewed?
  - A: The SDP does not have to be submitted **because** the agreement between the EIEP and SSA was renewed. There are, however, circumstances that require an SDP to be submitted. Refer to When the SDP and RA are Required.
- 8. Q: Is it acceptable to save SSA data with a verified indicator on a (EIEP) workstation as long as the hard drive is encrypted? If not, what options does the agency have?
  - A: There is no problem with an EIEP saving SSA-provided information to the encrypted hard drives of computers processing the data provided the information is retained only as provided for in the EIEP's data-sharing agreement with SSA. Refer to <u>Data and Communications Security</u>.
- 9. Q: Is caching of SSA-provided data on EIEP workstations allowed?
  - A: Caching during processing is not a problem. However, SSA-provided data must be cleared from the cache when the user exits the application in which the data was used or accessed. Refer to <u>Data and Communications Security</u>.
- 10. Q: What is meant by "Interconnections to other systems"?
  - A: As used in SSA's system security requirements document, the term "interconnections" is synonymous with "connections".
- 11. Q: Is it acceptable to submit the SDP as a PDF file?
  - A: No, it is not.
- 12. Q: Should the SDP be written from the standpoint of my agency's SVES access itself, or from the standpoint of access to all data provided to us by SSA?
  - A: The SDP is to encompass your agency's electronic access to SSA-provided data as per the electronic data sharing agreement between your agency and SSA. Refer to Developing the SDP.
- 15. Q: Does having a "transaction-driven" system mean that employees cannot initiate a query to SSA and that a permission module is not needed?
  - A: Not necessarily. "Transaction driven" basically means that queries, etc. are submitted automatically (and it might depend on the transaction). Depending on the system

implementation, queries might not be automatic or, if they are, manual transactions might still be permitted (for example, when something needs to be corrected). Also, even if a "transaction-driven" system is implemented in such a way that manual transactions cannot be performed, if the system does **not** require the user to be in a particular application and/or the query to be for an existing record in the EIEP's system **before** the system will allow a query to go through to SSA, it would still need a permission module.

- 16. Q: What is an Onsite Compliance Review?
  - A: The Onsite Compliance Review is the process wherein SSA performs periodic site visits to its Electronic Information Exchange Partners (EIEP) to certify whether the EIEP's technical, managerial, and operational security measures for protecting data obtained electronically from SSA continue to conform to the terms of the EIEPs' data sharing agreements with SSA and SSA's associated system security requirements and procedures. Refer to the Compliance Review Program and Process.
- 17. Q: What are the criteria for performing an Onsite Compliance Review?

  A: The following are criteria for performing the Onsite Compliance Review:
  - EIEP initiating new access or new access method for obtaining information from SSA
  - EIEP's cyclical review (previous review was performed remotely)
  - EIEP has made significant change(s) in its operating or security platform involving SSA-provided data
  - EIEP experienced a breach of SSA-provided personally identifying information (PII)
  - EIEP has been determined to be high-risk

Refer also to the Review Determination Matrix.

- 18. Q: What is a Remote Compilance Review?
  - A: The Remote Compliance Review is the process wherein SSA conducts periodic meetings remotely (e.g., via conference cails) with its EIEPs to determine whether the EIEP's technical, managerial, and operational security measures for protecting data obtained electronically from SSA continue to conform to the terms of the EIEPs' data sharing agreements with SSA and SSA's associated system security requirements and procedures. Refer to the Compliance Review Program and Process.
- 19. Q: What are the criteria for performing a Remote Compliance Review?
  - A: Each of the following criteria must be satisfied for performing the Remote Compliance Review:
    - EIEP's cyclical review (previous review was performed onsite without findings or issues for which findings were cited have been satisfactorily resolved).
    - EIEP has made no significant change(s) in its operating or security platform involving SSA-provided data.
    - EIEP has not experienced a breach of SSA-provided personally identifying information (PII) since its previous compliance review.
    - EIEP has been determined to be low-risk
