Table List for LE Extract

Table	Description
Rpt_BillingProvider	Stores billing providers
Rpt_Claimlist	Stores the most recent claim submission record for each instance of a service that has been submitted for claiming. Does not contain claims that have been voided and/or resubmitted. Also does not contain services that have been deleted, provider is retired or due to errors basic data cannot be populated
Rpt_Client	Stores each client.
Rpt_ClientBenefit	Stores client benefits – does not include Medi-Cal benefits.
Rpt_CodeMaster	Stores various code values and their internal ids
Rpt_CommunityService	Stores a record for each community service
Rpt_CommunityServiceStaff	Stores a record for each additional staff for a community service
Rpt_CrosswalkProcedureCode	Stores crosswalk types for each procedure code
Rpt_DeletedService	Stores a record for each instance of a service that has been deleted
Rpt_DMHClaim	Stores a record for each instance of a service that has been submitted for claiming. Does not contain services that have been deleted, provider is retired or due to errors basic data cannot be populated.
Rpt_DMHClaimPlan	Stores the plans for each instance of a service. Does not include plans for services that are in 'Submitted' status.
Rpt_Episode	Store in/outpatient and day-treatment episodes for an enrolled client.
Rpt_GroupSessionStaff	Stores a record for each additional staff for a group session
Rpt_LegalEntity	Stores legal entity providers
Rpt_MediCalEligibility	Contains Client Medi-Cal eligibility request and response information
Rpt_PayerClaim	Stored information for the external payers of an inbound claim where an outbound claim has been sent to the external payer by the IS
Rpt_PayerAdjustment	Contains external payer adjustment and remark codes returned in their 835s for an outbound claim. There may be multiple adjustment and remark codes returned in an 835
Rpt_ProcedureCode	Stores each procedure code allowable by DMH.
Rpt_ProviderAltID	Stores alternate identification values for a provider
Rpt_ProviderContractedPlan	Stores the plans that a provider is assigned.
Rpt_ProviderLicense	Stores the taxonomy and corresponding license assigned to a provider
Rpt_RenderingProvider	Stores rendering providers
Rpt_RuleFailClaims	Stores claims that failed certain IS business rules. These claims include those that due to lack of sufficient data cannot be stored

Table	Description
	in rpt_DMHClaim.
Rpt_Service	Contains a record for each instance of a service that has been submitted or not submitted for claiming. Does not contain services that are voided, deleted or where the provider is retired.
Rpt_ServiceEBP	Contains non-deleted Evidence Based Practice information for an instance of a service. There may be many EBP records per service instance
Rpt_ServiceLocation	Stores service location providers
Rpt_ServiceStaff	Stored a record for each non-deleted additional staff recorded on an instance of a service. This does not contain the main rendering provider that the instance of the service is recorded against.
rpt_630BClaimUnits	Contains Monthly Reports of Units of Service, Admissions and Discharges by Report Unit, Mode/SFC
rpt_701ClaimUnits	Contains Claim Units Report by Report Unit, Mode/SFC
rpt_701UPClaimUnits	Contains Claim Units Report by Report Unit, Plan, Mode/SFC
rpt_Unbilled	Contains Unbilled Medi_Cal Report
rpt_FinClaimsList	
rpt_PostHospOPAccessDetail	Contains the detail records representing the STATS performance data for outpatient provider access to clients after their Inpatient stay.
rpt_PostHospOPAccessSummary	Contains the summary aggregated records representing the STATS performance data for outpatient provider access to clients after their Inpatient stay.
rpt_DCFS_Clients	Provides client information to providers for children who are Katie A class members and had a service in the past 6 months.

rpt_BillingProvider

Description	Contains records for providers set as Billing Providers Locations in the IS. Only the non-deleted records that have an association record to a legal entity provider are included.
Primary IS Repository Source Tables	hrp_Provider – where BillingFlag = 'Y' & PayToFlag = 'N' hrp_Contact hrp_ProviderInstance
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task: rpt_BillingProvider

Column Name	Type	Reqd	Foreign Key	Description
providerID	Int	Y		ID Internal ID for the legal entity provider
ProviderName	Vchar(62)	Y		Name of the Billing Provider Format: If Billing has a first name format is: 'Last Name, First Name' If Billing does not have a first name format is: '4 Digit Provider Numer, Last Name'
ProviderNameLast	Vchar(35)	Y		Last name of Billing Provider
ProviderNameFirst	Vchar(25)	N		First name of Billing Provider
ProviderType	Vchar(30)	N		Organization type of the Billing Provider Valid Values: FFS 1 FFS 2 INDIVIDUAL FFS 2 GROUP FFS 2 ORG LP CONTRACT LP DIRECTLY OP
ServiceArea	Int	N		Service area that provider is delivering services in
OPCode	Vchar(10)	N		Identifies agency type of provider.
Bureau	Vchar(20)	N		Identifies bureau within DMH that provider belongs to
MentalHealthDist	Vchar(20)	N		Identifies the mental health district of the provider
CensusTract	Vchar(15)	N		Identifies the census tract of the provider.

Column Name	Type	Reqd	Foreign Key	Description
SupervisoryDist	Vchar(15)	N		Identifies the supervisory district of the provider.
Medi-CalCertificationStart	DateTime	N		Start date that the provider was certified by Medi-Cal
Medi-CalCertificationEnd	DateTime	N		End date that the provider is certified by Medi-Cal
ProviderPIN	Vchar(30)	N		Provider PIN value.
FFSProviderID	Vchar(9)	N		Provide FFS ID. NOTE: FFS provider Ids are at the Service Location Level based on the locations association. Do not use this field for FFS provider Ids
MedicareProviderID	Vchar(15)	N		Provider's Medicare ID. NOTE: For outbound claims, IS uses Medicare ID at the Service Location and Rendering Provider levels. Therefore value in this field is not used
MedicareClinicID	Vchar(15)	N		Provider's Medicare ID. NOTE: For outbound claims, IS uses Medicare ID at the Service Location and Rendering Provider levels. Therefore value in this field is not used
FFSID	Vchar(10)	N		NOTE: FFS provider Ids are at the Service Location Level based on the locations association. Do not use this field for FFS provider Ids
FFSMedi-CalID	Vchar(6)	N		NOTE: FFS provider Ids are at the Service Location Level based on the locations association. Do not use this field for FFS provider Ids
ContactName	Vchar(50)	N		Contact Name for the pay to provider
Address1	Vchar(50)	N		Address1 of the Legal Entity
Address2	Vchar(50)	N		Address2 of the Legal Entity
City	Vchar(50)	N		City of the Legal Entity
State	Vchar(15)	N		State of the Legal Entity
PostalCode	Vchar(10)	N		Postal Code of the Legal Entity
Country	Vchar(10)	N		Country of the Legal Entity
Telephone	Vchar(10)	N		Telephone of the Legal Entity
Fax	Vchar(10)	N		Fax of the Legal Entity
Email	Vchar(30)	N		Email of the Legal Entity
ActiveDate	Date/time	Y		Starting date for the Pay To Provider's association to the legal entity. This date is the start date for with the most recent Inactive Date.
InactiveDate	Date/time	N		Most recent ending date for the Pay To Provider's association to the legal entity

Column Name	Type	Reqd	Foreign Key	Description
ServiceType	Char(1)	N		Identifies the service type of the provider
PayToProviderID	Int	Y	Rpt_PayToProvider.ProviderID	IS Internal ID for the Pay To Provider that the Billing Provider is associated to
PayToProviderName	Vchar(62)	Y		Name for the Pay To Provider that the Billing Provider is associated to Format: If Legal Entity has a first name format is: 'Last Name, First Name' If Legal Entity does not have a first name format is: 'Value entered in the Reporting Unit field in the IS Maintain Provider UI, First Name'
LegalEntityProviderID	Int	Y	Rpt_LegalEntity.ProviderID	IS Internal ID for the Legal Entity that the Pay To Provider is associated to
LegalEntityProviderName	Vchar(62)	Y		Name for the Legal Entity that the Pay To Provider is associated to Format: If Legal Entity has a first name format is: 'Last Name, First Name' If Legal Entity does not have a first name format is: 'Value entered in the Reporting Unit field in the IS Maintain Provider UI, First Name'
GenActiveDate	DateTime	N		Starting date when the Pay To Provider is authorized to provide service
GenInactiveDate	DateTime	N		Ending date when the Pay To Provider is authorized to provide service.
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_ClientBenefit

Description	Contains client benefits that have not been deleted. Does not include client Medi-Cal benefits (based on Medi-Cal eligibility) that were added in IS2.
Primary IS Repository Source Tables	Cln_ClientBenefit Cln_Client IS_Code
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Reporting_Stage_4 Transform Data Task:rpt_ClientBenefit

Column Name	Type	Reqd	FK	Description
ClientID	Char(35)	Y	Rpt_Client.Clien tID	The Client's DMHID.
NameLast	Vchar(50)	N		Last Name of the Client
NameFirst	Vchar(50)	N		First Name of Client
BenefitID	Vchar(50)	Y		ID value of the benefit
BenefitType	Int	Y		Client's benefit type Value is from is_Code table
Description	Vchar(100)	N		Description of the benefit
CardIssueDate	DateTime	N		Date a particular benefit type was issued. E.g. When the benefit is Medi-Cal CIN, this field is populated with the Medi-Cal card issue date
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_Client

Description	Contains clients that have a DMH ID and have not been deleted
Primary IS Repository Source Tables	Cln_Client IS_Code
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Reporting_Stage_4 Transform Data Task: rpt_client

Column Name	Type	Reqd	FK	Description
ClientID	Char(35)	Y		The Client's DMHID.
NameLast	Vchar(50)	N		Last Name of the Client
NameFirst	Vchar(50)	N		First Name of Client
NameMid	Vchar(50)	N		Middle Name of the Client
Gender	Vchar(255)	N		Gender of the client
BirthDate	DateTime	N		Date of birth of client
SSN	Char(11)	N		Client's social security number
LevelofCare	Char(255)	N		Level of care associated with a client. Value is id from is Code table
EnglishSpeaking	Bit	N		Indicates if the client can speak English Valid Values: 1 – Yes 0 - No
LanguagePrimary	Vchar(255)	N		Primary language of client Value is id from is_Code table
LanguagePreferred	Vchar(255)	N		Client's preferred language Value is id from is_Code table
APR	Vchar(255)	N		Client's APR
Veteran	Int	N		Identifies if client is a veteran

Column Name	Type	Reqd	FK	Description
Ethnicity	Vchar(255)	N		Client's ethnicity
Handicap	Vchar(255)	N		Identifies client's handicap
DateofDeath	DateTime	N		Client's date of death
Transient	Bit	N		Indicates client is a transient Valid Values: 1 – Yes 0 - No
TimeHomeless	Vchar(255)	N		Indicates how long the client has been a transient
Address1	Vchar(75)	N		Client's address
Address2	Vchar(75)	N		Client's address
City	Vchar(50)	N		Client's city
State	Char(2)	N		Client's State
PostalCode	Vchar(15)	N		
County	Int	N		Client's County Value is from IS_County table
PhoneHome	Vchar(25)	N		Client's home phone number
PhoneBusiness	Vchar(25)	N		Client's business phone number
AddressMemo	Vchar(250)	N		Free format text field of address information
UMDPDate	DateTime	N		Date the UMDAP was performed.
IncomeSource	Vchar(50)	N		Indicates the client's income source code.
UMDAPProviderInstanc eID	Int	N		Billing Provider Instance ID for the UMDAP. This is set to the Provider Context Service Location when the UMDPDate is entered.
UMDAPProviderID	Int	N		IS Internal ID for the Billing Provider
UMDAPProviderName	Vchar(62)			Name of the Billing Provider Format: If Billing has a first name format is: 'Last Name , First Name' If Billing does not have a first name format is: '4 digit Provider Number, First Name'
Dependents	Int	N		The client's number of dependents

Column Name	Type	Reqd	FK	Description
Family Income	Money	N		Client's family income
AnnualLiability	Money	N		Client's annual liability
BirthCounty	Vchar(50)	N		Client's birth county
BirthState	Char(2)	N		Client's birth state
BirthCountry	Char(2)	N		Client's birth country
SFPRProviderInstanceID	Int	N		Rendering Provider Instance ID for the Single Fixed point of Responsibility (SFPR) for the client. This is a rendering provider.
SFPRProviderID	Int	N		IS Internal ID for the SFPR (Rendering Provider)
SFPRProviderName	Vchar(62)	N		Name of the SFPR Provider Format: If SFPR Rendering Provider has a first name format is: 'Last Name , First Name' If SFPR Rendering Provider does not have a first name format is: '4 digit Provider Number, First Name'
SFPRTelephone			Vchar(10)	Not populated
ClinicalClientID	Vchar(50)	N		IS Internal ID for the client record
DateCreated	DateTime	N		Date the client record was created
DateUpdated	DateTime	N		Date the client record was last updated
NameMotherMaiden	Vchar(50)	N		Client's mother's maiden name
AkaNameFirst	Vchar(50)	N		AKA First name of client
AkaNameMid	Vchar(50)	N		AKA Middle name of client
AkaNameLast	Vchar(50)	N		AKA/Maiden Last name of client
Origin	Vchar(255)	N		Client's origin
Tribe	Vchar(255)	N		Client's tribe
SFPRSpecialProgram	Vchar(255)	N		SFPR Special Program name assigned to the client
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_CodeMaster

Description	Contains various code values
Primary IS Repository Source Tables	Is_Code IS_CodeList Hrp_IGCode is_drugcode Hrp_procedurecode Hrp_TarRejectCodes Is_NDCCode Is_ServiceArea Wpc_ClaimStatus Wpc_ClaimStatusCat Is_DMHPlan Hrp_Taxonomy
DTS Load Package	Name: IS_Repository_ReportingCodeMaster Connection: SQL Servicer Transform Data Task: rpt_CodeMaster

Column Name	Type	Reqd	Foreign Key	Description
GroupName	IVChar(50)	Y		Identifies the code type
CodeTitle	Vchar(50)	Y		IS Internal ID for the code
SourceDB	Vchar(15)	N		Identifies database of the source code table
SourceTable	Vchar(50)	N		Identifies the IS Repository source table for the code
GroupID	Vchar(15)	N		Identifies the IS internal id for the code type
CodeType	Char(1)	N		A secondary identifier for the code type. Not used for any functionality
CodeID	Vchar(50)	N		IS Internal ID for an individual code. This may not be a unique value as this field is populated from many source tables. Need to use combination of Group Name and Group ID as well to get a unique row
CodeDescription	Text	N		Description of an individual code
CodeCommentSource	Vchar(50)	N		Free format comment about the code
CodeComment	Text	N		Free format comment about the code

rpt_CommunityService

Description	Contains information for each non-deleted community service.
Primary IS Repository Source Tables	cln_CommunityService hrp_Provider hrp_ProviderInstance is_DMHPlan
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_3 Transform Data Task: rpt_CommunityService

Column Name	Type	Reqd	Foreign Key	Description
CommunityServiceID	GUID	Y		IS Internal ID for the community service record
BillingProviderID	GUID	Y	Rpt_BillingProvider.ProviderID	IS internal ID for the Billing Provider of the community service
BillingProviderName	Int	Y		Name for the Billing Provider Format: If provider has a first name format is: 'Last Name , First Name' If provider does not have a first name format is: 'Value in Reporting Unit field on UI, Last Name'
RenderingProviderInstanceID	Int	Y		IS internal ID for the rendering provider's association to the service location of the community service
RenderingProviderID	Int	Y	Rpt_RenderingProvider.ProviderID	IS internal ID for the rendering provider location of the community service
RenderingProviderName	Vchar(62)	Y		Name for the Rendering Provider Format: If provider has a first name format is: 'Last Name , First Name'
ServiceDate	DateTime	Y		Date the community service was performed
LocationInformation	Vchar(100)	N		Location information for the community service
ServiceCode	Vchar(50)	N		Service code and description for the community service

Column Name	Type	Reqd	Foreign Key	Description
ServiceCodeID	Int	N		Service ID for the community service
ServiceTime	Int	N		Time of the community service
RecipientType	Vchar(50)	N		Type of recipient for the community service
PeopleContacted	Int	Y		Identifies the people contacted for the service
ServiceDescription	Vchar(100)	N		Description of the service performed
AgeCategory	Vchar(50)	N		Age Category for the community service
PrimaryLanguage	Vchar(50)	N		Primary Language for the community service
Ethnicity	Vchar(50)	N		Ethnicity for the community service
Handicap	Vchar(50)	N		Handicap for the community service
ProgramArea	Vchar(50)	N		Program Area for the community service
FundingSource	Vchar(50)	N		Funding Source (plan) for the community service
ClinicalCommunityServiceID	GUID	Y		IS Internal id for the community service
DateCreated	Vchar(35)	Y		Date the community service record was created
DateUpdated	DateTime	Y		Date the community service record was last updated
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_CommunityServiceStaff

Description	Contains information for each non-deleted additional staff recorded for a community service. This does not contain the main rendering provider recorded for the community service. There may be multiple staff per community service
Primary IS Repository Source Tables	cln_CommunityServiceStaff cln_CommunityService hrp_Provider hrp_ProviderInstance
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_3 Transform Data Task: rpt_CommunityServiceStaff

Column Name	Type	Reqd	Foreign Key	Description
ClinicalCommunityServiceStaffID	GUID	Y		IS Internal ID for the community service additional staff record
CommunityServiceID	GUID	Y	Rpt_CommunityService.CommunityServiceID Rpt_CommunityService.ClinicalCommunityServiceID	IS internal ID for the community service that the additional staff is recorded against
RenderingProviderInstID	Int	Y	Rpt_RenderingProvider.ProviderInstanceID	IS internal ID for the additional staff's association to a service location
RenderingProviderID	Int	Y	Rpt_RenderingProvider.ProviderID	IS internal ID for the additional staff
RenderingProviderNameLast	Vchar(35)	Y		Last name of the additional staff
RenderingProviderNameFirst	Vchar(25)	N		First name of the additional staff
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_DeletedService

Description	Contains information for instances of a service that have been deleted.
Primary IS Repository Source Tables	cln_ServiceInstance cln_Service cln_Episode cln_Client hrp_Provider hrp_ProviderInstance is_Code
DTS Load Package	Name: IS_REPOSITORY_ServiceStaging Connection: SQL Server 3 Transform Data Task: rpt_DeletedService

Column Name	Type	Reqd	Foreign Key	Description
ClinicalServiceID	GUID	Y		IS Internal ID for the service instance record
ClientID	Vchar(35)	N	Rpt_Client.Client ID	DMH ID for the client of the service instance. Leading zeros are populated
NameLast	Vchar(50)	N		Last Name for the client of the service instance
NameFirst	Vchar(50)	N		First Name for the client of the service instance
ClaimNumber	Vchar(50)	N		Submitter claim ID for the service instance. This is the inbound claim id
ServiceDate	DateTime	Y		Starting service date of the service instance
ServiceEndDate	DateTime	N		Ending service date of the service instance
ProcedureCode	Vchar(50)	N		Code for the procedure of the service instance
ProcedureDescription	Vchar(255)	N		Description for the procedure of the service instance
CollateralFamily	Int	N		The number of collateral for the service instance
CollateralNonFamily	Int	N		The number of non-family collateral for the service instance. No longer populated
MinutesTotal	Int	N		Total units spent for the service instance. Depending on the procedure this may be in minutes, units or days
MinutesFaceToFace	Int	N		Face to face time for a service instance
MinutesOther	Int	N		Other time (non-face to face) time for a service instance

Column Name	Type	Reqd	Foreign Key	Description
TelephoneService	Bit	N		Indicates if the service instance was performed via telephone
Ward	Vchar(50)	N		Indicates the ward for the service instance.
RenderingProviderInstancelID	Int	N		IS internal ID for the Rendering Provider's association to the service location of the service instance
RenderingProviderID	Int	N	Rpt_Rendering Provider.ProviderID	IS internal ID for the Rendering Provider of the service instance
RenderingProviderNameLast	Vchar(35)	N		Last name for the Rendering Provider of the service instance
RenderingProviderNameFirst	Vchar(25)	N		First name for the Rendering Provider of the service instance
ServiceLocationID	Int	N	Rpt_ServiceLocation.ProviderID	IS internal ID for the Service Location of the service instance
ServiceLocationName	Vchat(62)	N		Name for the Service Location of the service instance. Format: If Service Location has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: 'RU, Last Name'
ClinicalEpisodeID	GUID	Y	Rpt_Episode.ClinicalEpisodeID	IS internal ID for the episode of the service instance
FacilityTypeCode	Vchar(255)	N		
SubmittingUser	Vchar(50)	N		User that submitted the service instance
GroupSessionID	GUID	N		IS internal ID for the group session that the service was performed
SubmissionStatus	Vchar(15)	N		Status of the service instance
DateUpdated	DateTime	N		Date the service instance was last updated
DateCreated	DateTime	N		Date the service instance was created
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_DMHCclaim

Description	Stores a record for each instance of a service that has been submitted for claiming. Does not contain services that have been deleted, provider is retired, or, due to errors, basic data cannot be populated. NOTE: A service may have multiple instances due to resubmission and/or voids
Primary IS Repository Source Tables	cln_Service cln_ServiceInstance cln_Client cln_Episode hrp_Provider hrp_ProviderInstance is_Code hrp_ProcedureCode Is_DTAAOverride
DTS Load Package	Name: IS_REPOSITORY_ServiceStaging Connection: SQL Server Transform Data Task: rpt_DMHCclaim lpc Claims

Column Name	Type	Reqd	Foreign Key	Description
ClaimNumber	Int	Y	Rpt_Service.ClaimNumber Rpt_PayerClaim.DMHCclaimNumber	IS internal ID for an inbound claim
SubmitDate	DateTime	Y		Date the claim was submitted to the IS. For EDI and FFS Admin claims this the date the inbound claim is initially recorded in the IS repository. For Clincial claims this is the date the service instance was submitted for claiming
ClaimType	Char(8)	N		Description of the type of claim (e.g Original, Resub, Void)
ClaimStatus	Vchar(25)	N		Status of the inbound claim
ReasonCode	Vchar(20)	N		Not Populated
PayToProviderID	Int	N	rpt_PayToProvider.ProviderID	IS Internal ID for the Pay to Provider of the inbound claim

Column Name	Type	Reqd	Foreign Key	Description
			D	
PayToProviderName	Vchar(62)	Y		Name for the Pay to Provider of the inbound claim Format: If First Name is not empty 'LastName, FirstName' If First Name is empty 'Value in DMHRptuUnit field LastName'
BillingProviderID	Int	N	Rpt_BillingProvider.ProviderID	IS Internal ID for the Billing Provider of the inbound claim
BillingProviderName	Vchar(62)	Y		Name for the Billing of the inbound claim Format: If First Name is not empty 'LastName, FirstName' If First Name is empty '4 digit Provider Number, LastName'
ClientID	Vchar(35)	N	Cln_Client.DMHID	DMH ID for the client of the inbound claimfor
HIC	Vchar(20)	N		Clients Medicare ID when the claim has Medicare as a payer. For FFS and EDI claims this is the value sent in the inbound claim. For Clinical claims this is the value in the client record at the time the claim was submitted
Medi-CalID	Vchar(20)	N		Clients Medi-Cal ID when the claim has Medi-Cal as a payer. For FFS and EDI claims this is the value sent in the inbound claim. For Clinical claims this is the value in the client record at the time the claim was submitted
AIDCode	Vchar(30)	N		Not Populated
PersonID	Int	N		Not Populated
NameLast	Vchar(35)	N		Last name of the client for the inbound claim that the payer record is for
NameFirst	Vchar(25)	N		First name of the client for the inbound claim that the payer record is for
NameMid	Vchar(25)	N		Middle name of the client for the inbound claim that the payer record is for
BirthDate	DateTime	N		Birthdate of the client for the inbound claim that the payer record is for
Gender	Char(1)	N		Gender of the client for the inbound claim that the payer record is for
SSN	Vchar(35)	N		SSN of the client for the inbound claim that the payer record is for
ServiceDateBegin	DateTime	N		Starting service date for the for the inbound claim that the payer record is for

Column Name	Type	Reqd	Foreign Key	Description
ServiceDatEnd	DateTime	N		Ending service date for the for the inbound claim that the payer record is for
TotalClaimChargeAmount	Money	N		Claim Amount for the for the inbound claim that the payer record is for
Minutes	Int	N		Total time for the inbound claim that the payer record is for
EmergencyIndicator	Char(1)	N		Not Populated
FacilityCodeValue	Vchar(50)	N		Place of service code for for the inbound claim that the payer record is for
ClaimFrequencyTypeCode	Char(1)	N		Code for the type of claim (e.g. 1 = Original, 7 = Resub, 8 = Void)
MedicareAssignmentCode	Vchar(50)	N		Medicare Assignment code for the inbound claim
DiagnosisCode	Vchar(50)	N		Primary Diagnosis code for the inbound claim
ProcedureCode	Vchar(50)	N		Code for the procedure of the inbound claim. May be empty if the procedure code cannot be populated
Modifier1	Vchar(10)	N		First modifier for the procedure of the inbound claim that the payer record is for
Modifier2	Vchar(10)	N		Second modifier for the procedure of the inbound claim that the payer record is for
Modifier3	Vchar(10)	N		Third modifier for the procedure of the inbound claim that the payer record is for
Modifier4	Vchar(10)	N		Fourth modifier for the procedure of the inbound claim that the payer record is for
ProcedureFFSMaxUnits	Int	N		Max FFS units for the for the procedure of the inbound claim that the payer record is for. NOTE: This field is not used by any functionality in the IS
ProcedureMinTime	Int	N		Minimum minutes for the procedure of the inbound claim that the payer record is for. If not populated, there is no minimum value
ProcedureMaxTime	Int	N		Maximum minutes for the procedure of the inbound claim that the payer record is for. If not populated, there is no minimum value
ContractedRate	Decimal(19,2)	N		Contract value for the claim (Service Location rate * claim units)
LocalAmount	Decimal(19,2)	N		Amount of claim that DMH is responsible for Lesser of (TotalClaimChargeAmount or ContractedRate) – (ClientPaidAmount + PrivateInsuranceAmount + MedicarePaidAmount + Medi-CalPaidAmount)
EPSDTAmt	Decimal(19,2)	N		Not populated
ClientPaidAmount	Decimal(19,2)	N		Amount that client has paid for the claim

Column Name	Type	Reqd	Foreign Key	Description
PrivatInsuranceAmount	Decimal(19,2)	N		Amount that private insurance has paid for the claim
MedicarePaidAmount	Decimal(19,2)	N		Amount that Medicare has paid for the claim
Medi-CalPaidAmount	Decimal(19,2)	N		Amount that Medi-Cal insurance has paid for the claim
PaidToProvider	Decimal(19,2)	N		Amount that DMH may pay to the provider LP Directly Operated: LocalAmount + MediCarePaidAmount + Medi-CalPaidAmount LP Contracted: LocalAmount + Medi-CalPaidAmount
PaymentDate	DateTime	N		Date a positive 835 was created for the provider.
AdjudicationDate	DateTime	N		Date the claim was adjudicated by DMh
PlanName	Vchar(30)	N		Name of the first plan on the claim
MediCalClaim	Bit	N		Indicates if Medi-Cal is a payer in the claim
MedicareClaim	Bit	N		Indicates if Medicare is a payer in the claim
InsuranceClaim	Bit	N		Indicates if Private insurance is a payer in the claim
DenySource	Vchar(15)	N		For denied claims indicates the source of the denial
DenyReason	Vchar(10)	N		For denied claims indicates the 835 adjustment reason code of the denial
DenyGroup	Vchar(4)	N		For denied claims indicates the 835 adjustment group code of the denial
DenyRuleFailure	Vchar(80)	N		Indicates the IS Rule failure description for claims that failed IS Business Rules or the MHMIS error message for claims that failed MHMIS business rules. Not populated for other types of denials (e.g. FFS legacy, Finance Adjudication)
PlanID	Int	N	Rpt_CodeMaster.CodeID Where rpt_CoseMaster.GroupName = 'DMH Plan'	IS internal Id for the first plan of the claim
OrgType	Vchar(30)	N		Organization type for the billing provider of the claim
RenderingProviderID	Int	N	Rpt_RenderingProvider.ProviderID	IS internal ID for the Rendering Provider of the inbound claim

Column Name	Type	Reqd	Foreign Key	Description
RenderingProviderName	Vchar(62)	N		Name for the Rendering Provider of the inbound claim Format: 'NameLast + NameFirst'
RenderingProviderNameLast	Vchar(35)	N		Last Name for the Rendering Provider of the inbound claim
RenderingProviderNameFirst	Vchar(25)	N		First Name for the Rendering Provider of the inbound claim
ServiceLocationProviderID	int	N	Rpt_ServiceLocation.ProviderID	IS internal ID for the Service Location of the inbound claim
ServiceLocationName	Vchar(62)	N		Name for the Service Location of the inbound claim Format: If First Name is not empty 'LastName, FirstName' If First Name is empty 'RU, LastName'
FFSProviderID	Vchar(9)	N		Not Populated
FFSClaimID	Vchar(13)	N		Not Populated
SubmitterID	Int	N		Is Internal ID for the submitter of the claim. This may be DDE, Clinical or the EDI submitter id
ClaimSubmittersIdentifier	Vchar(38)	Y		Claim ID sent on the inbound claim. For EDI and FFS DDE claims this is the value from CLM01 of the inbound claim. For Clinical claims this is assigned by the IS
ClaimStatusDataID	Int	Y		Set to zero. No longer used
ClaimKey	GUID	Y	Rpt_Service.ClinicalServiceID Rpt_PayerClaim.ClaimKey	IS internal ID for the inbound claim
RAKey	GUID	N		IS Internal ID for the outbound 835 send to the provider.
SubmittingUser	Vchar(50)	N		User that submitted the claim
ResubParentClaimKey	Vchar(38)	N		For claims that are resubs or voids, the IS Internal ID for the parent claim
ServiceUnitType	Vchar(4)	N		The unit type for the claim
ServiceUnitCount	Decimal(19,2)	N		The number of units billed for the claim
DDEVisible	Bit	N		Always set to 1

Column Name	Type	Reqd	Foreign Key	Description
PatientFileNumber	Vchar(50)	N		The Patient File Number for the episode of the inbound claim. Not populated for FFS claims
EpisodeReptUnit	Char(5)	N		The service location reporting unit code for the episode of the claim
EpisodeSeqNumber	Char(3)	N		The MHMIS sequence number for the episode of the claim
DMHActivityCode	Vchar(30)	N		The MHMIS Activity code for the procedure of the inbound claim
DMHSvcCode1	Vchar(30)	N		The CRDC Service Function Code of the claim
DMHSvcCode2	Vchar(30)	N		The CRDC Mode of the claim
UOFSRecSeq	Int	N		Set to zero
UOFSSegSeq	Int	N		The MHMIS segment sequence number for the inbound claim.
FFSServiceCode	Vchar(10)	N		For FFS claims, the FFS service code for the inbound claims. This is based on the FFS procedure code conversion tables
DateCreated	DateTime	N		The date the instance of the service record was created
DateUpdated	DateTime	N		The date the instance of the service record was last updated
FFSServiceQty	Int	N		For FFS claims, the FFS service quantity for the claim. This is based on the FFS procedure code conversion tables
ProcedureID	Int	N	Hrp_ProcedureCode.ProcedureID	IS internal ID for the procedure of the claim
VoidStatus	Vchar(20)	N		Indicates the void status of the claim
ResubmitDate	DateTime	N		The date that a resub was sent for the service
LateCode	Int	N		The HIPAA late code for the claim
HFFlag	Bit	N		Indicates if the claim is a healthy family claim
AuthCode	Vchar(50)	N		The authorization code for the claim. This is for LP inpatient claims only
BillingProviderNPI	VChar(35)	N	Rpt_ProviderAltID.AlternateID	NPI for the Billing Provider of the claim
ServiceLocationProviderNPI	VChar(35)	N	Rpt_ProviderAltID.AlternateID	NPI for the Service Location of the claim
RenderingProviderNPI	VChar(35)	N	Rpt_ProviderAltID.AlternateID	NPI for the Rendering Provider of the claim
SatelliteFlag	Char(1)	N		Indicates if the Service Location of the claim is a Satellite

Column Name	Type	Reqd	Foreign Key	Description
PublicSchoolFlag	Char(1)	N		Indicates if the Service Location of the claim is a Public School
CPETHresholdID	Integer	N		IS internal ID for the CPE Threshold applied against the inbound claim
CPEReleaseID	Integer	N		IS internal ID for the CPE Release applied against the inbound claim
CPEContractAmount	Decimal(9,2)	N		Contract amount for a claim processed using the CPE rate
CPEMCalOnlyFlag	Bit	N		When the claim is eligible for a CPE Threshold will indicates if Medi-Cal is the only payer Valid Values: 1 – Claim has a CPE Threshold and Medi-Cal is a billable payer and there are no other payers with a payment amount >0 0 - Claim does not have a CPE Threshold or Claim has a CPE Threshold and Medi-Cal is a billable payer and there are other payers with a payment amount >0
DTAOverrideID	Int	N		Indicates DTA override ID that was active for the claim's service location and service date, and was also applied to the claim
EPSDTFlag	Bit	N		Indicates if the claim was for EPSDT screening referral 0 - EPSDT was not indicated on the inbound claim 1 – EPSDT was indicated on the inbound claim
EmergencyFlag	Bit	N		Indicates if the claim was for emergency 0 - Emergency was not indicated on the inbound claim 1 – Emergency was indicated on the inbound claim
PregnancyFlag	Bit	N		Indicates if the client in the claim is pregnant 0 - Pregnancy was not indicated on the inbound claim 1 – Pregnancywas indicated on the inbound claim
DupOverrideFlag	Bit	N		Indicates the claim is a valid duplicate 0 – Duplicate Override was not indicated on the inbound claim 1 – Duplicate Override was indicated on the inbound claim
SDPhaseIIFlag	Int	N		Indicate if the claim is for SD phase II 0 – Phase I claim 1 – Phase II claim
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_DMHClaimPlan

Description	Contains information for plans attributed to an inbound claim. Only those plans for submitted claims not in 'Submitted' status are populated
Primary IS Repository Source Tables	cln_ServiceInstPlan cln_ServiceInstance is_DMHPlan is_Code
DTS Load Package	Name: IS_REPOSITORY_ServiceStaging Connection: SQL Server 3 Transform Data Task: rpt_DMHClaimPlan

Column Name	Type	Reqd	Foreign Key	Description
ID	Int	Y		Internal ID for the record. Identity field automatically populated by Reporting Repository
ClaimNumber	Int	Y	Rpt_DmhClaim.ClaimNumber	IS Internal ID for an outbound claim
ClaimPlanChargeSequence	Int	Y		Charge sequence number for the plan on an inbound claim
PlanID	Int	Y	Rpt_CodeMaster.CodeID where rpt_CodeMaster.GroupName = 'DMH Plan'	IS internal ID for the plan on an inbound claim
PlanName	Vchar(30)	Y		Name for the plan on an inbound claim
ClaimPlanStatus	Vchar(20)	Y		Status of the plan on an inbound claim
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_Episode

Description	Contains record of each episode that is not deleted and contains an MHMIS Sequence Number. Also does not contain episodes for retired providers or where the episode's service location is inactive for the episode Admit date Table contains inpatient, outpatient and day-treatment episodes.
Primary IS Repository Source Tables	Cln_Episode Cln_Client Hrp_provider Hrp_ProviderInstance Cln_Diagnosis IS_Code
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Reporting_Stage_4 Transform Data Task: rpt_Episode

Column Name	Type	Reqd	Foreign Key	Description
ClinicalEpisodeID	GUID	Y		IS Internal ID for the episode
ClientID	Vchar(35)	Y	rpt_Client.ClientID	DMH ID for the client
EpisodeType	Char(1)	Y		Identifies the type of episode Valid Values: O – Outpatient I – Inpatient D – Day Treatment
NameLast	Vchar(50)	N		Last Name of the Client
NameFirst	Vchar(50)	N		First Name of Client
NameMid	Vchar(50)	N		Middle Name of the Client
Gender	Vchar(255)	N		Gender of the client
BirthDate	DateTime	N		Date of birth of client
PhoneHome	Vchar(25)	N		Client's home phone number

Column Name	Type	Reqd	Foreign Key	Description
LevelofCare	Vchar(255)	N		Level of care associated with a client. Value is id from is_Code table
Transient	Bit	N		Indicates client is a transient Valid Values: 1 – Yes 0 - No
AdmitDate	DateTime	Y		Date the episode was created
DischargeDate	DateTime	N		Date the episode was closed
DischargeTime	Vchar(10)	N		Time the episode was closed. Required for inpatient episodes only
PrimaryDxAdmit	Vchar(50)	N	rpt_Diagnosis. PrimaryDx	Admit Primary diagnosis for the episode
PrimaryDxDescriptionAdmit	Vchar(255)	N		Description of the Admit Primary diagnosis for the episode
PrimaryDxDischarge	Vchar(50)	N	rpt_Diagnosis. PrimaryDx	Discharge Primary diagnosis for the episode
PrimaryDxDescriptionDischarge	Vchar(255)	N		Description of the Discharge Primary diagnosis for the episode
SecondaryDxAdmit	Vchar(50)	N	rpt_Diagnosis. SecondaryDx	Admit Secondary diagnosis for the episode
SecondaryDxDescriptionAdmit	Vchar(255)	N		Description of the Admit Secondary diagnosis for the episode
SecondaryDxDischarge	Vchar(50)	N	rpt_Diagnosis. SecondaryDx	Discharge Secondary diagnosis for the episode
SecondaryDxDescriptionDischarge	Vchar(255)	N		Description of the Discharge Secondary diagnosis for the episode
DualDxAdmit	Vchar(50)	N		Admit dual diagnosis
DualDxtDischarge	Vchar(50)	N		Discharge dual diagnosis. This is not populated.
GAFAdmit	Vchar(50)	N	Rpt_Diagnosis.Axis5	Admit GAF. This is Axis 5 diagnosis from the admission diagnosis record
GAFDischarge	Vchar(50)	N	Rpt_Diagnosis.Axis5	Discharge GAF. This is Axis 5 diagnosis from the discharge diagnosis record

Column Name	Type	Reqd	Foreign Key	Description
IntentofService	Vchar(255)	N		Intent of Service description for the episode
ReferralIN	Vchar(255)	N		Referral In code
ReferrallnContactID	Int(4)	N	Rpt_ServiceLocation.ProviderID	IS Internal ID for the Referral In Provider
ReferrallnContactNameLast	Vchar(35)	N		Referral In provider last name
ReferrallnContactNameFirst	Vchar(25)	N		Referral in provider first name
Ward	Vchar(50)	N		Ward for the episode
PhysicalDisabilityAdmit	Vchar(255)	N		Physical Disability code on episode admission
PhysicalDisabiityDischarge	Vchar(255)	N		Not populated
DevelopmentalDisabilityAdmit	Vchar(255)	N		Developmental Disability code on episode admission
DevelopmentalDisabilityDischarge	Vchar(255)	N		Not populated
ReferralOut	Vchar(255)	N		Referral Out code for the episode
ReferralOutContactID	Int(4)	N	Rpt_ServiceLocation.ProviderID	IS Internal id for the referral out provider
ReferralOutContactNameLast	Vchar(35)	N		Referral Out provider last name
ReferralOutContactNameFirst	Vchar(25)	N		Referral Out provider first name
LegalStatusAdmit	Vchar(255)	N		Legal Status code on episode admission
LegalStatusDischarge	Vchar(255)	N		Legal Status code on episode discharge
PrimaryProblemArea	Vchar(255)	Y		Primary Problem Area for the episode
PatientFileNumber	Vchar(50)	N		Patient File number for the episode
ServicePlanDue	DateTime	N		Date the Service plan for the episode is due
CoordinationPlanDue	DateTime	N		Date the Coordination plan for the episode is due
LastServiceDate	DateTime	N		Service date for the most recent successfully submitted non-voided claim for the episode.

Column Name	Type	Reqd	Foreign Key	Description
ClientStatus	Vchar(255)	N		Client status code for the episode
SFPRProviderID	Int	N	Rpt_RenderingP rovider.ProviderI D	IS Internal ID for the SFPR of the client
SFPRProviderInstance ID	Int	N		IS Internal association ID for the SFPR's association to the episode service location
SFPRProviderName	Vchar(62)	N		SFPR Name Format: If SFPR has a first name format is: 'Last Name , First Name' If SFPR does not have a first name format is: 'Last Name'
SFPRTelephone	Vchar(10)	N		Not Populated
RenderingProviderID	Int	N	Rpt_RenderingP rovider.ProviderI D	IS Internal ID for the Rendering Provider who is the Primary Contact for the episode.
RenderingProviderInst ancelID	Int	N		IS Internal association ID for the Primary Contact's (Rendering Provider) association to the episode service location
RenderingProviderNa meLast	Vchar(35)	N		Last Name for the Rendering Provider who is the Primary Contact for the episode.
RenderingProviderNa meFirst	Vchar(25)	N		First Name for the Rendering Provider who is the Primary Contact for the episode.
MedicalStaffID	Int	N	Rpt_RenderingP rovider.ProvdierI D	IS Internal ID for the Rendering Provider who is the assigned Medical staff for the episode
MedicalStaffInstanceID	Int	N		IS Internal association ID for the Rendering Provider who is the assigned Medical staff for the episode. The association is for the rendering Provider to the Service Location
MedicalStaffNameLast	Vchar(35)	N		Last Name of the Rendering Provider who is the assigned Medical staff for the episode
MedicalStaffNameFirst	VChar(25)	N		First Name of the Rendering Provider who is the assigned Medical staff for the episode
BillingProviderID	Int	N	Rpt_BillingProvi	IS Internal ID for the billing provider of the episode

Column Name	Type	Reqd	Foreign Key	Description
			der.ProviderID	
BillingProviderName	Vchar(62)	Y		Name of the Billing Provider for the episode Format: If Billing Provider has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: '4 digit Provider Number, Last Name'
ServiceLocationID	Int(4)	Y	Rpt_ServiceLocation.ProvdierID	IS internal ID for the Service Location of the episode
Service Location Name	Vchar(62)	Y		Name of the Service Location for the episode Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: '5 Character RU, Last Name'
ClinicalClientID	GUID	N	Rpt_Client.ClinicalClientID	IS Internal ID for the client record
SubmittingUser	Vchar(50)	N		
DateCreated	DateTime	N		Date & time that the client record was created
DateUpdated	DateTime	N		Date & time for the last update to the client record
EpisodeID	Vchar(225)	N		
MHMISSequenceNumber	Vchar(25)	N		MHMS Sequence number for the episode
EpisodeRowId	Int	N		
DDEDocumentEncounterID	Int	N		
EpisodeSeqID	Vchar(225)	N		
ProviderNo	Int	N		
IsOpenEpisode	Int	N		
IsOrphaned	Int	N		
DeleteFlag	Int	N		

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_GroupSessionStaff

Description	Contains information for each staff recorded on a group session. This is a direct copy from the IS Repository.
Primary IS Repository Source Tables	cln_GroupSessionStaff
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_3 Transform Data Task:cln_GroupSessionStaff

Column Name	Type	Reqd	Foreign Key	Description
ID	GUID	Y		IS Internal ID for the group session staff record
GroupSessionID	GUID	Y		IS internal ID for the group session
StaffID	Int	Y	Rpt_Rendering Provider.ProviderInstanceID	IS internal ID for the additional staff's association to the service
Minutes	Int	Y		Minutes assigned to each staff that participated in the group session
DateCreated	Vchar(35)	Y		Date the group session staff record was created
DateUpdated	DateTime	Y		Date the group session staff record was last updated
DeleteStatus	Bit	Y		Indicates if the staff was deleted from the session or not. Deleted staff are not part of the session.
LastUpdatedBy	Varchar(100)	Y		Last user that updated the group session staff record
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_LegalEntity

Description	Contains records for providers set as Legal Entities in the IS
Primary IS Repository Source Tables	hrp_Provider hrp_Contact
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task: rpt_LegalEntity

Column Name	Type	Reqd	Foreign Key	Description
ProviderID	Int	Y		ID Internal ID for the legal entity provider
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
ProviderType	Vchar(30)	N		Organization type of the Legal Entity Valid Values: FFS 1 FFS 2 INDIVIDUAL FFS 2 GROUP FFS 2 ORG LP CONTRACT LP DIRECTLY OP
ProviderName	Vchar(62)	Y		Name of the Legal Entity Format: If Legal Entity has a first name format is: 'Last Name , First Name' If Legal Entity does not have a first name format is: 'Value in Reporting Unit field on UI, Last Name'
ProviderNameLast	Vchar(35)	Y		Last name of Legal Entity
ProviderNameFirst	Vchar(25)	N		First name of Legal Entity
ProviderNameMid	Vchar(25)	N		Middle name of Legal Entity
OPCode	Vchar(10)	N		Identifies agency type of provider.
ActiveDate	Date/time	Y		Starting date when a provider is authorized to provide service
InactiveDate	Date/time	N		Ending date when a provider is authorized to provide service.
Address1	Vchar(50)	N		Address1 of the Legal Entity

Column Name	Type	Reqd	Foreign Key	Description
Address2	Vchar(50)	N		Address2 of the Legal Entity
City	Vchar(50)	N		City of the Legal Entity
State	Vchar(15)	N		State of the Legal Entity
PostalCode	Vchar(10)	N		Postal Code of the Legal Entity
Country	Vchar(10)	N		Country of the Legal Entity
Telephone	Vchar(10)	N		Telephone of the Legal Entity
Fax	Vchar(10)	N		Fax of the Legal Entity
Email	Vchar(30)	N		Email of the Legal Entity
GenActiveDate	DateTime	N		Starting date when a provider is authorized to provide service
GenInactiveDate	DateTime	N		Ending date when a provider is authorized to provide service.

rpt_MediCalEligibility

Description	Contains Client Medi-Cal eligibility request and response information
Primary IS Repository Source Tables	is_MCalEligibility hrp_EligRequest is_EligibilityPayer
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_6 Transform Data Task: rpt_MediCalEligibility

Column Name	Type	Reqd	Foreign Key	Description
MediCalClientID	GUID	Y		Client's Medi-Cal ID sent in the eligibility request
ProviderPIN	Vchar(30)	N		Provider PIN value sent in the eligibility request
ServiceDate	DateTime	Y		Service Date sent in the eligibility request
EVC	Vchar(30)	N		EVC value returned from Medi-Cal eligibility response
AidCode	Vchar(30)	N		Aid Code value returned from Medi-Cal eligibility response
Message	Text	N		Message returned from Medi-Cal eligibility response
DateCreated	DateTime	N		Date the Medi-cal eligibility response information was stored

Column Name	Type	Reqd	Foreign Key	Description
DMHID	INT	N		The clients DMHID for which the eligibility was performed for. Eligibility requests received by the IS from FFS DDE or EDI providers may not include a Client DMHID. In these circumstances the DMH ID will not be populated
ProvMCALNumber	Vchar(30)	N		Provider's Medi-Cal ID for the eligibility request. This is typically a 4-digit value

rpt_CrosswalkProcedureCode

Description	Contains various crosswalk values(e.g. MHMIS Activity Code, Medi-Cal outbound claim procedure code) for a procedure code. A procedure code may have multiple crosswalk values This is a direct copy from the IS Repository
Primary IS Repository Source Tables	hrp_CrosswalkProcedureCode
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_6 Transform Data Task: rpt_CrosswalkProcedureCode

Column Name	Type	Reqd	Foreign Key	Description
CodeKey	Int	Y		Unique IS internal ID for the crosswalk record
Entity	Vchar(35)	Y		Defines the type of crosswalk value for a procedure
ProcedureID	Int	Y	Rpt_Procedure Code.Procedure ID	Unique IS internal ID for the procedure
EntityCode	Vchar(20)	Y		Code values for the crosswalk type.
EntityQual1	Vchar(20)	N		Additional qualifier code for the crosswalk type
EntityQual2	Vchar(20)	N		Additional qualifier code for the crosswalk type
EntityQual3	Vchar(20)	N		Additional qualifier code for the crosswalk type
EntityQual4	Vchar(20)	N		Additional qualifier code for the crosswalk type
EntityPlaceofService	Vchar(20)	N		Place of service for the crosswalk type
ActiveDate	Date/time	Y		Earliest date crosswalk is valid

InactiveDate	Date/time	N		Latest date crosswalk is valid
DateCreated	Date/time	Y		Date and time the crosswalk record was created
DateUpdated	Date/time	Y		Date and time the crosswalk record was last updated

rpt_PayerAdjustment

Description	Contains external payer adjustment and remark codes returned in their 835s for an outbound claim. There may be multiple adjustment and remark codes returned in an 835
Primary IS Repository Source Tables	<ul style="list-style-type: none"> is_COBAAdjustment cln_ServiceInstPayer is_PayerClaim
DTS Load Package	<ul style="list-style-type: none"> Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_2 Transform Data Task: rpt_PayerAdjustments

Column Name	Type	Reqd	Foreign Key	Description
PayerClaimNumber	Int	Y		IS internal ID for the outbound claim to a payer (e.g. Medi-cal, Medicare)
Segment	Vchar(35)	Y		The 835 segment name that the adjustment or remark code was returned in
Element1	Vchar(25)	N		Contains the 835 the adjustment reason group code or remark qualifier code returned in the 835
Element2	Vchar(38)	N		Contains the 835 the adjustment reason code or remark code returned in the 835
Element3	Int	N		Contains the 835 the adjustment amount returned in the 835
DateCreated	DateTime	Y		Date the adjustment or reason was stored

Column Name	Type	Reqd	Foreign Key	Description
HIC	Vchar(20)	N		Identifies the client's Medicare ID if the record is for Medicare
Medi-CalID	Vchar(20)	N		Identifies the client's Medi-Cal ID if the record is for Medi-Cal
PersonID	Int	N		Not populated
NameLast	Vchar(35)	N		Last name of the client for the inbound claim that the payer record is for
NameFirst	Vchar(24)	N		First name of the client for the inbound claim that the payer record is for
NameMid	Vchar(25)	N		Middle name of the client for the inbound claim that the payer record is for
BirthDate	DateTime	N		Birthdate of the client for the inbound claim that the payer record is for
Gender	Char(1)	N		Gender of the client for the inbound claim that the payer record is for
SSN	Vchar(35)	N		SSN of the client for the inbound claim that the payer record is for
ServiceDateBegin	DateTime	N		Starting service date for the for the inbound claim that the payer record is for
ServiceDateEnd	DateTime	N		Ending service date for the for the inbound claim that the payer record is for
TotalClaimChargeAmount	Money	N		Claim Amount for the for the inbound claim that the payer record is for
Minutes	Int	N		Total time for the inbound claim that the payer record is for
EmergencyIndicator	Char(1)	N		Not populated
FacilityCodeValue	Vchar(50)	N		Place of service code for for the inbound claim that the payer record is for
ClaimFrequencyTypeCode	Vchar(50)	N		Code for the type of claim (e.g. 1 = Original, 7 = Resub, 8 = Void)
MedicareAssignmentCode	Vchar(50)	N		Not populated
InsuranceTypeCode	Vchar(50)	N		Not populated
ClaimFilingIndicatorCode	Vchar(50)	N		Not populated
COBAllowedAmount	Money	N		Not populated
ProcedureCode	Vchar(50)	N		Code for the procedure of the inbound claim that the payer record is for
Modifier1	Vchar(10)	N		First modifier for the procedure of the inbound claim that the payer record is for
Modifier2	Vchar(10)	N		Second modifier for the procedure of the inbound claim that the payer record is for

Column Name	Type	Reqd	Foreign Key	Description
Modifier3	Vchar(10)	N		Third modifier for the procedure of the inbound claim that the payer record is for
Modifier4	Vchar(10)	N		Fourth modifier for the procedure of the inbound claim that the payer record is for
ProcedureFFSMaxUnits	Int	N		Max FFS units for the for the procedure of the inbound claim that the payer record is for. NOTE: This field is not used by any functionality in the IS
ProcedureMinTime	Int	N		Minimum minutes for the procedure of the inbound claim that the payer record is for. If not populated, there is no minimum value
ProcedureMaxTime	Int	N		Maximum minutes for the procedure of the inbound claim that the payer record is for. If not populated, there is no minimum value
AuthorizationNumber	Vchar(30)	N		Authorization number for the external payer. (e.g. Medi-Cal EVC value)
DenySource	Vchar(15)	N		Source of the denial for the inbound claim that the payer record is for.
DenyReason	Vchar(10)	N		835 Adjustment Reason code of the denial for the inbound claim that the payer record is for.
DenyGroup	Vchar(4)	N		835 Adjustment Group code of the denial for the inbound claim that the payer record is for.
DenyRuleFailure	Vchar(80)	N		Not populated
RenderingProviderID	Int	N		IS Internal ID for the Rendering Provider of the inbound claim that the payer record is for
RenderingProviderName	Vchar(20)	N		Name for the Rendering Provider of the inbound claim that the payer record is for Format: 'LastName, FirstName'
RenderingProviderNameLast	Vchar(35)	N		First Name for the Rendering Provider of the inbound claim that the payer record is for
RenderingProviderNameFirst	Rchar(25)	N		Last Name for the Rendering Provider of the inbound claim that the payer record is for
ServiceLocationProviderID	Int	N		IS internal ID for the Service Location of the inbound claim that the payer record is for
ServiceLocationProviderName	Vchar(30)	N		Name for the Service Location of the inbound claim that the payer record is for Format: If First Name is not empty 'LastName, FirstName' If First Name is empty 'RU, LastName'

Column Name	Type	Reqd	Foreign Key	Description
PaidFlag	Char(1)	N		Indicates if the external payer pays DMH.
BillableFlag	Char(1)	N		Indicates if the external payer can be billed
AcutalPaidAmount	Money	N		Indicates the amount the external payer actually paid
PaymentTraceNumber	Vchar(30)	N		An identifier sent in the external payer's 835 for the outbound claim of the payer record
SettlementDate	DateTime	N		The settlement date sent in the external payer's 835 for the outbound claim of the payer record
ProductionDate	DateTime	N		The production date sent in the external payer's 835 for the outbound claim of the payer record
RATotalAcutalPayment	Decimal(19,2)	N		The external payer's total payment for the group of claims that the 835 for the outbound claim is contained in
FFSProviderID	Vchar(9)	N		Not populated
FFSClaimID	Vchar(13)	N		Not populated
SubmitterID	Int	N		IS internal ID for the submitter of the inbound claim that the payer record is for
ClaimSubmittersIdentifier	Vchar(38)	Y	Rpt_DMHClaim.SubmitterClaimID Rpt_Service.ClaimNumber	IS internal ID for the inbound claim that the payer record is for
ClaimKey	GUID	Y	Rpt_DmhCLaim.ClaimKey	IS Internal ID for the inbound claim that the payer record is for
835CLP02	Int	N		835 Remit Status returned by the external payer for the outbound claim
OutboundCLaimID	Vchar(38)	N		Outbound Claim ID sent in the outbound claim to the payer
DateCreated	DateTime	N		Date the payer record was created
DateUpdated	DateTime	N		Date the payer record was last updated
ServiceUnitType	Vchar(4)	N		Indicates the unit type for the unit quantity billed on the inbound claim that the payer record is for
ServiceUnitCount	Decimal(9,2)	N		Indicates the number of units billed on the inbound claim that the payer record is for
EOBProcessed	Char(1)	N		Not populated
AdjudicationDate	DateTime	N		The adjudication date of the other payer that is returned in the payers' 835 received & processed by the IS. Any claims that existed prior to implementation of SD II will not be populated except for the following:

Column Name	Type	Reqd	Foreign Key	Description
				For Medi-Medi claims that were still Forwarded to Medicare at time of implementation of SD II will have the Adjudication date set to the submit date of the inbound claim
PayerClaimID	VChar(80)			The internal claim id of the payer that is returned in the payers 835 received & processed in the IS. Any claims that existed prior to implementation of SD II will not be populated

rpt_ProcedureCode

Description	Contains list of procedure codes. This is a direct copy from the IS Repository
Primary IS Repository Source Tables	hrp_ProcedureCode
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_6 Transform Data Task: rpt_ProcedureCode

Column Name	Type	Reqd	Foreign Key	Description
ProcedureID	Int	Y		Unique IS internal ID for the procedure
Code	Vchar(50)	Y		Code for the procedure
Modifier1	Vchar(10)	N		First modifier for the procedure If the value is '*' any modifier can be used
Modifier2	Vchar(10)	N		Second modifier for the procedure If the value is '*' any modifier can be used
Modifier3	Vchar(10)	N		Third modifier for the procedure If the value is '*' any modifier can be used
Modifier4	Vchar(10)	N		Fourth modifier for the procedure If the value is '*' any modifier can be used
PlaceofService	Vchar(10)			Place of service for the procedure If the value is '*' any place of service can be used
Description	Vchar(100)	Y		Description of the procedure
HIPAA_Unit	Char(2)	Y		Defines the appropriate unit type accepted for procedure
MinuteConvQty	Int	N		Number of minutes equating to the unit type defined
FFSMaxUnits	Int	N		Maximum # of units allowed for the procedure. Applies to FFS claims only
MinTime	Int	N		Minimum time for the procedure
MaxTime	Int	N		Maximum time for the procedure
ActiveDate	DateTime	Y		Earliest date the procedure is active
InactiveDate	DateTime	N		Last date the procedure is active
DateCreated	DateTime	Y		Date and time the procedure record was created

Column Name	Type	Reqd	Foreign Key	Description
DateUpdated	DateTime	Y		Date and time the procedure record was last updated
ClaimBaseRate	Char(1)	N		Determines if the base rate should be used as the claim and contract amount. 'Y' – Claim/contract amount = rate 'N' – Claim/Contract amount = rate * units
DTAServiceType	VarChar(10)	N		Identifies the Day Treatment type. If populated the procedure code will be sent to DTA authorization system. If null, the procedure code is not sent to DTA
Medi-CalMaxTime	Integer	N		Indicates the maximum service time allowed by Medi-Cal. If null, there is no maximum

rpt_ProviderAltID

Description	Contains records for various Identifiers that a provider may have. All the records for the IS Repository are included
Primary IS Repository Source Tables	hrp_ProviderAltID
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task: rpt_ProviderAltID

Column Name	Type	Reqd	Foreign Key	Description
ID	Int	N		IS internal ID for the provider's alternate ID
ProviderID	Int	N	Rpt_LegalEntity.ProviderID Rpt_PayToProvider.ProviderID Rpt_BillingProvider.ProviderID Rpt_ServiceLocation.ProviderID Rpt_Rendering	IS internal ID for the Provider

Column Name	Type	Reqd	Foreign Key	Description
			Provider.ProviderID	
IDQualifier	Vchar(10)	N		<p>Valid Values:</p> <p>ID: Medicaid provider number SV: Service ID 46: Electronic Submission ID FI: Federal Taxpayers ID 34: SSN MC: Medicaid provider number HPI: HCFA National Provider ID UP: Provider UPIN Number N5: Provider Plan Network ID</p> <p>NOTE: Based on changing DMH business rules, not all of the values in these fields are used by the system or are valid at this level. For example 'MC' Medicaid provider number is not used for FFS Medi-Cal ID as the FFS values are based on service location association. However values remain as they may be added via Maintain Provider and they allow flexibility depending on DMH and/or HIPAA requirements</p>
AlternateID	Vchar(62)	N		Value associated with the ID qualifier.
ActiveDate	Date/time	N		Starting date that the alternate ID is valid.
InactiveDate	Date/time	N		Ending date that the alternate ID is valid.
LastUpdatedBy		N		User that last updated the record
DateCreated		N		Date & Time that the record was created
DateUpdated		N		Date & time that the record was last updated
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_ProviderContractedPlan

Description	Contains plans assigned to billing providers. Plans are by fiscal year
Primary IS Repository Source Tables	hrp_Provider is_ServiceRate is_ServiceRateDetail is_DMHPlan
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task:rpt_ProviderContractedPlan

Column Name	Type	Reqd	Foreign Key	Description
BillingProviderID	Int	Y	Rpt_BillingProvider.ProviderID	IS Internal ID for a billing provider
BillingProviderName	Vchar(62)	Y		Name for the billing provider Format: If provider has a first name format is: 'Last Name , First Name' If provider does not have a first name format is: 'Value in Reporting Unit field, Last Name'
BillingProviderType	Char(1)	N		Identifies the organization type for the billing provider
RptUnit	Char(5)	N		Identifies the provider number for the billing provider
PlanID	Int	Y		The identifier for the plan assigned to the billing provider
PlanName	VChar(30)	Y		The name of the plan assigned to the billing provider
PayerID	Int	Y		IS Internal ID for the payer of the plan.
PayerName	Vchar(35)	Y		Name for the payer of the plan
FiscalYear	Char(5)	Y		The fiscal year for which the plan has been assigned to the billing provider
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_ProviderLicense

Description	Contains taxonomy and license values for a provider. As a provider may have multiple taxonomies there is one record per taxonomy.
Primary IS Repository Source Tables	hrp_ProviderTaxonomy hrp_Provider hrp_ProviderInstance hrp_Taxonomy
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task:rpt_ProviderLicense

Column Name	Type	Reqd	Foreign Key	Description
ProviderLicenseID	Int			IS internal ID for the provider taxonomy record which contains the provider license value
RenderingProviderInstancelID	Int	Y		
RenderingProviderID	Int	Y	Rpt_Rendering Provider.ProviderID	IS Internal ID for a Rendering Provider
RenderingProviderNameLast	Vchar(35)	Y		Last name of the Rendering Provider
RenderingProviderNameFirst	Vchar(25)	N		First name of the Rendering Provider
RenderingProviderNameMid	Vchar(25)	N		Middle name of the Rendering Provider
Taxonomy	Vchar(15)	Y		Taxonomy code assigned to the Rendering Provider
TaxonomyDescription	Vchar(40)	Y		Taxonomy description assigned to the Rendering Provider
License	Vchar(20)	N		License value of the Rendering Provider
ActiveDate	DateTime	Y		Starting date that the provider's taxonomy and license are active
ExpirationDate	DateTime	N		Ending date that the provider's taxonomy and license are active
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_RenderingProvider

Description	Contains records for providers set as Rendering Providers in the IS. Only the non-deleted, non-retired providers that have an association to at least one service location are included. As a rendering provider may have associations to multiple service locations, there is one record per association.
Primary IS Repository Source Tables	hrp_Provider – where RenderingFlag = 'Y' hrp_Contact hrp_ProviderInstance hrp_ProviderInstanceAttributes
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task: rpt_renderingProvider

Column Name	Type	Reqd	Foreign Key	Description
ProviderInstanceID	Int	Y		IS internal ID for the rendering provider's association to a service location
ProviderID	Int	Y		IS internal ID for the Rendering Provider
StaffCode	Vchar(10)	N		DMH assigned ID for the Rendering Provider
ProviderName	Vchar(62)	Y		Name of the Rendering Provider Format: If Rendering Provider has a first name format is: 'Last Name , First Name' If Rendering Provider does not have a first name format is: 'Last Name'
ProviderNameLast	Vchar(35)	Y		Last name of provider
ProviderNameFirst	Vchar(25)	N		Last name of provider
ProviderNameMid	Vchar(25)	N		Last name of provider
AttendingFlag	Char(1)	N		Indicates if the provider is Attending or not. NOTE: This field is not maintained by the IS, therefore its setting should not be used
Language	Vchar(512)	N		Language of the provider
DEAId	Vchar(10)	N		DEA Identifier for the provider
DEAExpireDate	DateTime	N		DEA expiration date for the provider

Column Name	Type	Reqd	Foreign Key	Description
FTE	Vchar(10)	N		FTE for the provider
FfsID	Vchar(10)	N		FFS ID for the provider. This is the providers ID at the service location
FfsMedi-CalID	Vchar(6)	N		FFS Medi-Cal ID for the provider. This is the providers ID at the service location
ActiveDate	Date/time	Y		Starting date for the rendering provider's association to the service location.
InactiveDate	Date/time	N		Ending date for the rendering provider's association to the service location.
Address1	Vchar(50)	N		Address1 of the provider
Address2	Vchar(50)	N		Address2 of the provider
City	Vchar(50)	N		City of the provider
State	Vchar(15)	N		State of the provider
PostalCode	Vchar(10)	N		Postal Code of the provider
Country	Vchar(10)	N		Country of the provider
Telephone	Vchar(10)	N		Telephone of the provider
Fax	Vchar(10)	N		Fax of the provider
Email	Vchar(30)	N		Email of the provider
ServiceLocationProviderID	Int	Y	Rpt_ServiceLocation.ProviderID	IS Internal ID for the Service Location that the Rendering Provider is associated to
ServiceLocationName	Vchar(62)	Y		Name for the Service Location that the Rendering Provider is associated to Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'Value in Reporting Unit field on UI, Last Name'
BillingProviderID	Int	Y		Not populated (always set to 0)
BillingProviderName	Vchar(62)	Y		Not Populated (always set to 'BillingProviderName')
GenActiveDate	DateTime	N		Starting date when the Pay To Provider is authorized to provide service
GenInactiveDate	DateTime	N		Ending date when the Pay To Provider is authorized to provide service.
PPIN	Vchar(10)	N		Medicare PPIN for the Rendering Provider. This is the provider's ID at the service location
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_RuleFailClaims

Description	Contains inbound claims that failed IS Rules but are not in rpt_DMHClaim. These claims could not be populated in rpt_DMHClaim because basic data is invalid.
Primary IS Repository Source Tables	cln_ServiceInstance hrp_Provider hrp_ProviderInstance is_RulesErrorCode is_Code
DTS Load Package	Name: IS_REPOSITORY_LoadRpt_RuleFailClaims Connection: Hipaa Transform Data Task: rpt_RuleFailClaims

Column Name	Type	Reqd	Foreign Key	Description
ClaimKey	GUID	Y		IS Internal ID for the community service additional staff record
ClaimID	Vchar(38)	Y		Submitter Claim ID from 2300-CLM01 of the 837
SubscriberID	Vchar(50)	N		Subscriber's ID sent in 2010BA_NM109. This may be a DMH ID
SubscriberLastName	Vchar(35)	N		Subscriber's last name. Populated if the Subscriber ID is an existing client DMH ID
SubscriberFirstName	Vchar(35)	N		Subscriber's last name. Populated if the Subscriber ID is an existing client DMH ID
PayToProvID	Int	N		IS Internal ID for the Pay to Provider of the claim.
PayToProvName	Vchar(60)	N		Name of the Pay To provider. Populated if the Pay To Provider ID exists in the IS
BillingProvID	Int	Y		IS Internal ID for the Billing provider of the claim.
BillingProvName	Vchar(60)	N		Name of the Pay To provider. Populated if the Billing Provider ID exists in the IS
ServiceLocProvID	Int	N		IS Internal ID for the Service Location provider of the claim.
ServiceLocName	Vchar(60)	N		Name of the Service Location provider. Populated if the Service Location ID exists in the IS
RenderingProvID	Int	N		IS Internal ID for the Rendering provider of the claim.
RenderingProvName	Vchar(60)	N		Name of the Rendering provider. Populated if the Service Location ID exists in the IS
Status		Y		Status of the claim

Column Name	Type	Reqd	Foreign Key	Description
	Vchar(30)			
RuleFail	Vchar(30)	N		Code for the rule failure
RuleFailDesc	Vchar(150)	N		Description of the rule failure
SubmitDate	DateTime	Y		Date the claim was submitted. For claims submitted via EDI and Admin this is the date in BHT_04. For claims submitted from Clinical, this is the date the claim was submitted.
ServiceDateBegin	DateTime	Y		Starting service date of the claim
ServiceDateEnd	DateTime	Y		Ending service date of the claim
OrgType	Vchar(30)	N		Organization type of the claim
DateCreated	DateTime	Y		Date the service record was created.
DateUpdated	DateTime	Y		Date the service record was updated.
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_Service

Description	<p>Contains information for each instance of a service. Contain services that have and have not been submitted for claiming. Does not contain services that are voided, deleted or the provider is retired.</p> <p>NOTE: There are multiple instances for a service when the service is resubmitted/voided.</p>
Primary IS Repository Source Tables	<ul style="list-style-type: none"> cln_Service cln_ServiceInstance cln_Client cln_Episode hrp_Provider hrp_ProviderInstance is_Code hrp_ProcedureCode
DTS Load Package	<p>Name: IS_REPOSITORY_ServiceStaging</p> <p>Connection: SQL Server 3</p> <p>Transform Data Task: rpt_Service</p>

Column Name	Type	Reqd	Foreign Key	Description
ClinicalServiceID	GUID	Y		IS Internal ID for the service instance record
ClientID	Vchar(35)	N	Rpt_Client.Cient ID	DMH ID for the client of the service instance. Leading zeros are populated
NameLast	Vchar(50)	N		Last Name for the client of the service instance
NameFirst	Vchar(50)	N		First Name for the client of the service instance
ClaimNumber	Vchar(50)	N	Rpt_DMHClaim.SubmitterClaimID	Submitter claim ID for the service instance. This is the inbound claim id
ServiceDate	DateTime	Y		Starting service date of the service instance
ServiceEndDate	DateTlme	N		Ending service date of the service instance
ProcedureCode	Vchar(50)	N		Code for the procedure of the service instance
ProcedureDescription	Vchar(255)	N		Description for the procedure of the service instance
CollateralFamily	Int	N		The number of collateral for the service instance
CollateralNonFamily	Int	N		The number of non-family collateral for ther service instance No longer populated
MinutesTotal	Int	N		Total units spent for the service instance. Depending on the procedure this may be in minutes, units or days
MinutesFacetoFace	Int	N		Face to face time for a service instance
MinutesOther	Int	N		Other tme (non-face to face) time for a service instance
TelephoneService	Bit	N		Indicates if the service instance was performed via telephone
Ward	Vchar(50)	N		Indicates the ward for the service instance.
RenderingProviderInstancelID	Int	N		IS internal ID for the Rendering Provider's association to the service location of the service instance
RenderingProviderID	Int	N	Rpt_Rendering Provider.ProviderID	IS internal ID for the Rendering Provider of the service instance
RenderingProviderNameLast	Vchar(35)	N		Last name for the Rendering Provider of the service instance
RenderingProviderNameFirst	Vchar(25)	N		First name for the Rendering Provider of the service instance
ServiceLocationID	Int	N	Rpt_ServiceLocation.ProviderID	IS internal ID for the Service Location of the service instance
ServiceLocationName	Vchat(62)	N		Name for the Service Location of the service instance.

Column Name	Type	Reqd	Foreign Key	Description
				Format: If Service Location has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: 'RU, Last Name'
ClinicalEpisodeID	GUID	Y	Rpt_Episode.ClinicalEpisodeID	IS internal ID for the episode of the service instance
FacilityTypeCode	Vchar(255)	N		
SubmittingUser	Vchar(50)	N		User that submitted the service instance
GroupSessionID	GUID	N		IS internal ID for the group session that the service was performed
SubmissionStatus	Vchar(15)	N		Status of the service instance
DateCreated	DateTime	N		Date the service instance was created
DateUpdated	DateTime	N		Date the service instance was last updated
ProcedureID	Int	N	Rpt_ProcedureCode.ProcedureID	IS internal ID for the procedure of the service instance
SDPhaseIIFlag	Int	N		Indicate if the claim is for SD phase II 0 – Phase I claim 1 – Phase II claim

rpt_ServiceEBP

Description	Contains non-deleted Evidence Based Practice information for an instance of a service. There may be many EBP records per service instance
Primary IS Repository Source Tables	<ul style="list-style-type: none"> • cln_ServiceInstEBP • is_Code
DTS Load Package	<ul style="list-style-type: none"> • Name: IS_REPOSITORY_ServiceStaging • Connection: SQL Server 3 • Transform Data Task: rpt_serviceEBP

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
BillingProviderName	Vchar(62)	Y		Not Populated (always set to 'BillingProviderName')
ServiceLocationProviderName	Vchar(30)	N		Name for the Service Location of the inbound claim that the payer record is for Format: If First Name is not empty 'LastName, FirstName' If First Name is empty 'RU, LastName'
ID	GUID	N		IS internal ID for the service EBP record
ClinicalServiceID			<ul style="list-style-type: none"> • Rpt_Service.ClinicalServiceID • Rpt_DMHClaim.ClaimKey 	IS Internal ID for the service instance
EBP	Vchar(50)	N		Code for the EBP of the service instance
DateCreated	DateTime	N		Date the service instance was created
DateUpdated	DateTime	N		Date the service instance was last updated
LastUpdatedBy	Vchar(100)	N		User that last updated the service instance EBP record

rpt_ServiceLocation

Description	Contains records for providers set as Service Locations in the IS. Only the non-deleted records that have an association record to a billing provider are included.
Primary IS Repository Source Tables	hrp_Provider – where ServicLocFlag = 'Y' hrp_Contact hrp_ProviderInstance
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository (First connection) Transform Data Task: rpt_servicelocation

Column Name	Type	Reqd	Foreign Key	Description
ProviderID	Int	Y		ID Internal ID for the legal entity provider
ProviderName	Vchar(62)	Y		Name of the Pay To Provider Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'RU, Last Name'
ActiveDate	Date/time	Y		Starting date for the Service Location's association to the billing provider. This date is the start date set with the most recent Inactive Date.
InactiveDate	Date/time	N		Most recent ending date for the Service Location's association to the billing provider
ServiceType	Char(1)	N		Identifies the service tupe of the provider
RptUnit	Vchar(5)	N		Value assigned by DMH in the IS Reporting Unit Field on the Maintain Provider UI. For Service Location's this is typically a 5 character value (e.g. '1904A') where the first 4 digits identify the billing provider number
BusinessUnit	Vchar(20)	N		Identifies the business unit of the provider..
CensusTract	Vchar(15)	N		Identifies the census tract of the provider.
ContactName	Vchar(50)	N		Contact Name for the provider
Address1	Vchar(50)	N		Address1 of the provider
Address2	Vchar(50)	N		Address2 of the provider

Column Name	Type	Reqd	Foreign Key	Description
City	Vchar(50)	N		City of the provider
State	Vchar(15)	N		State of the provider
PostalCode	Vchar(10)	N		Postal Code of the provider
Country	Vchar(10)	N		Country of the provider
Telephone	Vchar(10)	N		Telephone of the provider
Fax	Vchar(10)	N		Fax of the provider
Email	Vchar(30)	N		Email of the provider
PublicSchool	Char(1)	N		Indicates of the provider is a Public School
Satellite	Char(1)	N		Indicates of the provider is a Satellite
BillingProviderID	Int	Y	Rpt_BillingProvider.ProviderID	IS Internal ID for the Billing Provider that the Service location is associated to
BillingProviderName	Vchar(62)	Y		Name for the Billing Provider that the Service location is associated to Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'Value in Reporting Unit field on UI, First Name'
GenActiveDate	DateTime	N		Starting date when the Pay To Provider is authorized to provide service
GenInactiveDate	DateTime	N		Ending date when the Pay To Provider is authorized to provide service.
Mode	Vchar(2)	N		
MCMMode	Vchar(2)	N		
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_ServiceStaff

Description	Contains information for each non-deleted additional staff recorded on an instance of a service. This does not contain the main rendering provider that the instance of the service is recorded against. Note that for each instance of a service, the additional staff may change.
Primary IS Repository Source Tables	cln_ServiceInstStaff cln_ServiceInstance hrp_Provider hrp_ProviderInstance
DTS Load Package	Name: IS_REPOSITORY_Staging Connection: Clinical_Repository_3 Transform Data Task: rpt_ServiceStaff

Column Name	Type	Reqd	Foreign Key	Description
ClinicalServiceStaffID	GUID	Y		IS Internal ID for the service staff record
ClinicalServiceID	GUID	Y	Rpt_Service.ClinicalServiceID	IS internal ID for the service instance
RenderingProviderInstID	Int	Y	Rpt_RenderingProvider.ProviderInstanceID	IS internal ID for the additional staff's association to a service location
RenderingProviderID	Int	Y	Rpt_RenderingProvider.ProviderID	IS internal ID for the additional staff
RenderingProviderNameLast	Vchar(35)	N		Last name of the additional staff
RenderingProviderNameFirst	Vchar(25)	N		First name of the additional staff
Minutes	Int	Y		The number of minutes that the additional staff spent on the service instance
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.

rpt_Diagnosis

Description	Diagnosis
--------------------	-----------

Column Name	Type	Reqd	Foreign Key	Description
ClinicalDiagnosisId		Y		
RenderingProviderInstID	Int	Y	Rpt_Rendering Provider.Pro viderInstance ID	IS internal ID for the additional staff's association to a service location

rpt_ServiceRate

Description	Service Rate
-------------	--------------

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Varchar(20)	Y		Value assigned by DMH/MHMIS to identify legal entities.
ID	GUID	Y		IS Internal ID for the group session staff record
ProviderID	Int	Y		ID Internal ID for the legal entity provider
FiscalYr	Vchar(5)	Y		Fsical Year
RateTable	Int	Y		
TerminationDate	DateTime	Y		
LastUpdatedBy	Varchar(100)	Y		Last user that updated the group session staff record
DateCreated	Vchar(35)	Y		Date the group session staff record was created

Column Name	Type	Reqd	Foreign Key	Description
DateUpdated	DateTime	Y		Date the group session staff record was last updated

rpt_ServiceRateDetails

Description	Service Rate
-------------	--------------

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Varchar(20)	Y		Value assigned by DMH/MHMIS to identify legal entities.
ID	GUID	Y		IS Internal ID for the group session staff record
SvcRateID	Int	Y		
ProcedureID	Int	Y		
DMHPlanID	Int	N		
LastUpdatedBy	Varchar(100)	Y		Last user that updated the group session staff record
DateCreated	Vchar(35)	Y		Date the group session staff record was created
DateUpdated	DateTime	Y		Date the group session staff record was last updated

rpt_630BClaimUnits

Description	630BClaimUnits
-------------	----------------

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Varchar(10)	Y		Value assigned by DMH/MHMIS to identify legal entities.
LegalEntityName	Varchar(62)	Y		Stores name of legal entity
Yr	Varchar(4)	Y		Year requested
Mo	Int	Y		Month of service
ProvNum	Varchar(4)	Y		The 4 digit provider number for the billing provider. Same value as hrp_Provider.DMHRptUnit for the billing provider
BillingProviderName	Varchar(62)	Y		Name for the Billing Provider that the Service location is

Column Name	Type	Reqd	Foreign Key	Description
				associated to Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'Value in Reporting Unit field on UI, First Name'
RU	Varchar(5)	Y		Value assigned by DMH in the IS Reporting Unit Field on the Maintain Provider UI. For Service Location's this is typically a 5 character value (e.g. '1904A') where the first 4 digits identify the billing provider number
ServiceLocationName	Varchar(62)	Y		Name for the Service Location of the service instance. Format: If Service Location has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: 'RU, Last Name'
Mode	Varchar(30)	Y		
SFC	Varchar(30)	Y		Type of service provided
MUOFS	Decimal	Y		Number of units of service per month
FYUOFS	Decimal	Y		Number of units of services year to date
MClients	Int	Y		Number of unduplicated client count for the month being requested
FYClients	Int	Y		Number of Unduplicated client count year to date
UpdateDate	Date/Time	N		Date of last update
FY	Char(6)	N		
FYMO	Int	N		

rpt_701ClaimUnits

Description	701ClaimUnits Contains Claim Units Report by Report Unit, Mode/SFC
--------------------	---

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
LegalEntityName	Char(62)	N		Value assigned by DMH/MHMIS to identify legal entities.
BillingProviderName	Char(62)	N		Stores name of legal entity
Payor	Char(50)	N		Name for the Billing Provider that the Service location is associated to Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'Value in Reporting Unit field on UI, First Name'
ServiceLocationName	Char(62)	Y		
Mode	Char(10)	Y		Name for the Service Location of the service instance. Format: If Service Location has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: 'RU, Last Name'
SFC	Char(10)	N		Category of Service
JUL	Int	N		Type of service provided within the category
AUG	Int	N		Number of Units Of Service for the month
SEP	Int	N		Number of Units Of Service for the month
OCT	Int	N		Number of Units Of Service for the month
DECE	Int	N		Number of Units Of Service for the month
Jan	Int	N		Number of Units Of Service for the month
FEB	Int	N		Number of Units Of Service for the month
MAR	Int	N		Number of Units Of Service for the month

Column Name	Type	Reqd	Foreign Key	Description
APR	Int	N		Number of Units Of Service for the month
MAY	Int	N		Number of Units Of Service for the month
JUN	Int	N		Number of Units Of Service for the month
YTD	Int	N		Year To Date
FY	Vchar(5)	N		Fiscal Year
LastUpdate	Date/Time	N		Last date record was updated

rpt_701UPClaimUnits

Description
701UP- Claim Units by Plan Report

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
LegalEntityName	Char(62)	N		Stores name of legal entity
BillingProviderName	Char(62)	N		Name for the Billing Provider that the Service location is associated to Format: If Service Location has a first name format is: 'Last Name , First Name' If Service Location does not have a first name format is: 'Value in Reporting Unit field on UI, First Name'
Payor	Char(50)	N		
ServiceLocationName	Char(62)	Y		Name for the Service Location of the service instance. Format: If Service Location has a first name format is: 'Last Name , First Name' If Billing Provider does not have a first name format is: 'RU, Last Name'
PlanName	Char(30)	N		Name of the first plan on the claim
Mode	Char(10)	Y		Category of Service
SFC	Char(10)	N		Type of service provided within the category

Column Name	Type	Reqd	Foreign Key	Description
JUL	Int	N		Number of Units Of Service for the month
AUG	Int	N		Number of Units Of Service for the month
SEP	Int	N		Number of Units Of Service for the month
OCT	Int	N		Number of Units Of Service for the month
DECE	Int	N		Number of Units Of Service for the month
Jan	Int	N		Number of Units Of Service for the month
FEB	Int	N		Number of Units Of Service for the month
MAR	Int	N		Number of Units Of Service for the month
APR	Int	N		Number of Units Of Service for the month
MAY	Int	N		Number of Units Of Service for the month
JUN	Int	N		Number of Units Of Service for the month
YTD	Int	N		Year To Date
FY	Char(5)	N		Fiscal Year
LastUpdate	Date/Time	N		Last date record was updated

rpt_DCFS_Alerts_to_DMH

Description
DCFS Alert to DMH

Column Name	Type	Reqd	Foreign Key	Description
LegalEntityNumber	Varchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
LegalEntityName	Varchar(62)	Y		Legal Entity Name
Billing_Provider	Varchar(100)	N		Billing Provider ID and Name
Rendering_Provider	Varchar(100)	N		Rendering Provider Name
ClientID	Int	N		DMH Client Identifier
Client_Name	Varchar(100)	N		DMH Client First and Last Name
DCFS_Case_Opened	DateTime	N		Date DCFS case was opened
Assigned_CSW	Varchar(100)	N		Children's Social Worker First and Last Name

Column Name	Type	Reqd	Foreign Key	Description
CSW_Email	Varchar(100)	N		CSW Email Address
Assigned_SCSW	Varchar(100)	N		Supervising children's Social Worker First and Last Name
SCSW_Email	Varchar(100)	N		SCSW Email Address
SCSW_Phone	Varchar(25)	N		SCSW Phone Number
DCFS_Assigned_Office	Varchar(100)	N		DCFS Office Location
Regional_Office_Phone	Varchar(25)	N		Regional Office Phone Number
Class_Flag	Varchar(2)	N		Class
Subclass_Flag	Varchar(2)	N		Subclass

rpt_FinClaimList

Description	FinClaimList
-------------	--------------

Column Name	Type	Reqd	Foreign Key	Description
ClaimNumber	Int	Y		
ClaimSubmittersIdentifier	Vchar(38)	N		Claim ID sent on the inbound claim. For EDI and FFS DDE claims this is the value from CLM01 of the inbound claim. For Clinical claims this is assigned by the IS
SubmitDate	DateTime	N		
ResubmitDate	DateTime	N		The date that a resub was sent for the service
ClaimStatus	Vchar(50)	N		Status of the inbound claim
DenySource	Vchar(15)	N		For denied claims indicates the source of the denial
VoidStatus	Vchar(50)	N		Indicates the void status of the claim
LateCode	Int	N		The HIPAA late code for the claim
PayToProviderID	Int	N		Rpt_PayToPro
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
LegalEntityName	Vchar(62)	N		
BillingProviderID	Int	Y	Rpt_BillingProvider.	
BillingProviderName	Vchar(62)	Y		

Column Name	Type	Reqd	Foreign Key	Description
ClientID	Int	N	Rpt_Client.Cie	DMH ID for the client of the service instance. Leading zeros are populated
BirthDate	DateTime	N		Birthdate of the client for the inbound claim
SSN	Vchar(11)	N		SSN of the client for the inbound claim
ServiceDateBegin	DateTime	N		Starting service date for the for the inbound claim
ServiceDateEnd	DateTime	N		Ending service date for the for the inbound claim
SvcYear	Vchar(4)	N		
SvcMo	Vchar(2)	N		
ProcedureID	Int	N	Hrp_ProcedureCode	IS internal ID for the procedure of the claim
ServiceUnitCount	Decimal(9,2)	N		Indicates the number of units billed on the inbound claim
TotalClaimChargeAmount	Decimal(19,2)	Y		Claim Amount for the for the inbound claim
ContractedRate	Decimal(19,2)	Y		Contract value for the claim (Service Location rate * claim units)
CPEContractedRate	Decimal(19,2)	Y		Amount that client has paid for the claim
ClientPaidAmount	Decimal(19,2)	Y		Amount that client has paid for the claim
PrivateInsuranceAmount	Decimal(19,2)	Y		
MedicarePaidAmount	Decimal(19,2)	Y		
MediCalPaidAmount	Decimal(19,2)	Y		
LocalAmt	Decimal(19,2)	Y		
PlanID	Int	Y	Rpt_CodeMaster.	IS internal Id for the first plan of the claim
PlanName	Vchar(50)	Y		Name of the first plan on the claim
MediCalClaim	Int	N		Indicates if Medi-Cal is a payer in the claim
MedicareClaim	Int	N		Indicates if Medicare is a payer in the claim
MCalApprovedAmt	Decimal(19,2)	Y		
MCalActualPaidAmt	Decimal(19,2)	Y		
MCal835CLP02	Int	N		
MCalOutboundClaimID	Vchar(41)	N		
MCalClaimStatus	Vchar(20)	N		
Mode	Vchar(50)	N		

Column Name	Type	Reqd	Foreign Key	Description
SFC	Vchar(50)	N		
ModeSFC	Vchar(50)	N		
ChargeConv	Decimal(19,2)	N		
MCApproved	Decimal(19,2)	N		
FFP	Decimal(19,2)	N		
SGF	Decimal(19,2)	N		
LocalMatch	Decimal(19,2)	N

FY	Vchar(10)	N		
Age	Int	N		
AgeGroup	Vchar(50)	N		
FinRptAgeGroup	Vchar(50)	N		
ApprvAidCode	Vchar(50)	N		
BatchID	Vchar(15)	N		
FileID	Int	N		
OBFileName	Vchar(100)	N		
ITWSFileStatus	Vchar(100)	N		
ITWSSubmitDate	Time/date	N		
CPEPaidDate	Time/daet	N		
PmtCode	Vchar(50)	N		
SubProgCode	Vchar(50)	N		
MediCalID	Vchar(20)	N		
MedsCheck	Int	N		
CVStatus	Vchar(250)	N		
PCStatus	Vchar(50)	N		
MCalStatus	Vchar(20)	N		
Payor	Vchar(50)	N		
SubFund	Vchar(50)	N		
DateCreated	Time/date	N		

Column Name	Type	Reqd	Foreign Key	Description
PATTYPE	Vchar(15)	N		
EpisodeReptUnit	Char(25)	N		The service location reporting unit code for the episode of the claim
EpisodeSeqNumber	Char(25)	N		The MHMIS sequence number for the episode of the claim
DateUpdated	Time/date	N		
ClaimType	Vchar(20)	N		
FacilityCodeValue	Vchar(50)	N		Place of service code for the inbound claim
RenderingProviderID	Int	N		IS Internal ID for the Rendering Provider to the inbound claim
RenderingProviderTaxonomy	Vchar(80)	N		
CPETHresholdID	Int	N		IS internal ID for the CPE Threshold applied against the inbound claim
CPETHresholdDate	Time/date	N		
CPEReleaseID	Int	N		IS internal ID for the CPE Release applied against the inbound claim
CPEReleaseDate	Time/date	N		
EOBID	Int	N		
RetroEOBID	Int	N		
RetroAmount	Decimal (15,2)	N		
MSOClaimNumber	Vchar(50)	N

MEDSCIN	Vchar(20)	N		

rpt_PostHospOPAccessDetail

Description	Post Hospitalization OP Access Detail
--------------------	---------------------------------------

Column Name	Type	Reqd	Foreign Key	Description
OpenLegalEntityNumber	Vchar(62)	N		Stores number of legal entity
OpenLegalEntityName	Vchar(50)	N		Stores name of legal entity
OpenBillingProviderName	Vchar(62)	N		Stores name of billing provider associated with legal entity who has the open episode with client
ClientID	Vchar(35)	N		IS ID of client
NameLast	Vchar(50)	N		Last name of client
NameFirst	Vchar(50)	N		First name of client
HospName	Vchar(62)	N		Name of hospital where client was admitted
HosAdmitDate	DateTime	N		Date of client inpatient admission to hospital
HospDischDate	DateTime	N		Date of client inpatient discharge from hospital
ISEpisodeCreationDate	DateTime	N		Date inpatient episode was created in the IS
ISvisibleDate	DateTime	N		The following day after date inpatient episode was created in the IS
FirstOPContact	Vchar(62)	N		First Outpatient Provider who contacted client
OPSvcDate	DateTime	N		Date outpatient service was provided to client
OPDaysFromIP	Int	N		Number of days from inpatient discharge client was served
OP7Cnt	Int	N		Calculation field to determine if client was seen within 7 days of hospital discharge
FiscalQuarter	Vchar(10)	N		Fiscal quarter in which client was admitted to the hospital as an inpatient
ExtractDate	DateTime	N		Date on which this data was pulled from the IS
ClinicalEpisodeID	Vchar(50)	N		IS clinical episode ID

rpt_PostHospOPAccessSummary

Description	Contains the summary aggregated records representing the STATS performance data for outpatient provider access to clients after their Inpatient stay.
--------------------	---

Column Name	Type	Reqd	Foreign Key	Description
FiscalQuarter	Vchar(10)	N		Fiscal quarter in which client was admitted to the hospital as an inpatient
OpenLegalEntityNumber	Vchar(62)	N		Stores number of legal entity
OpenLegalEntityName	Vchar(50)	N		Stores name of legal entity
OpenBillingProviderName	Vchar(62)	N		Stores name of billing provider associated with legal entity who has the open episode with client
NumberofEpisode	Int	N		Number of unique inpatient episodes for the given Fiscal Quarter, LE, and Billing Provider satisfying the criteria for the performance measure
NumberSeenIn7Days	Int	N		Number of instances of the given inpatient episodes for clients seen within 7 days of hospital discharge
PerformancePct	Decimal(19,2)	N		Percentage of clients seen within 7 days of hospital discharge
ExtractDate	DateTime	N		Date on which this data was pulled from the IS

rpt_DuplicateDenialError_20111027

Description	701UPClaimUnits
--------------------	-----------------

Column Name	Type	Reqd	Foreign Key	Description
ClaimNumber	Int	Y	Rpt_DmhClaim.ClaimNumber	IS Internal ID for an outbound claim
SubmitDate	DateTime	Y		Date the outbound claim was created
ClaimType	Char(8)	N		
ClaimStatus	Vchar(25)	N		
ReasonCode	Vchar(20)	N		

Column Name	Type	Req d	Foreign Key	Description
PayToProviderID	int	N		
PayToProviderName	Vchar(62)	Y		
ClientID	Vchar(35)	N		ClN_Client.ClientID
HIC	Vchar(20)	N		Identifies the client's Medicare ID if the record is for Medicare
Medi-CalID	Vchar(20)	N		Identifies the client's Medi-Cal ID if the record is for Medi-Cal
AIDcode	Vchar(20)	N		
PersonID	Int	N		Not populated
NameLast	Vchar(35)	N		Last name of the client for the inbound claim
NameFirst	Vchar(24)	N		First name of the client for the inbound claim
NameMid	Vchar(25)	N		Middle name of the client for the inbound claim
BirthDate	DateTime	N		Birth date of the client for the inbound claim
Gender	Char(1)	N		Gender of the client for the inbound claim
SSN	Vchar(35)	N		SSN of the client for the inbound claim
ServiceDateBegin	DateTime	N		Starting service date for the for the inbound claim
ServiceDateEnd	DateTime	N		Ending service date for the for the inbound claim
TotalClaimChargeAmount	Money	N		Claim Amount for the for the inbound claim
Minutes	Int	N		Total time for the inbound claim
EmergencyIndicator	Char(1)	N		Not populated
FacilityCodeValue	Vchar(50)	N		Place of service code for the inbound claim
ClaimFrequencyTypeCode	Vchar(50)	N		Code for the type of claim
MedicareAssignmentCode	Vchar(50)	N		Not populated
DiagnosisCode	Vchar(50)	N		Not populated
ProcedureCode	Vchar(50)	N		Code for the procedure of the inbound claim
Modifier1	Vchar(10)	N		First modifier for the procedure of the inbound claim
Modifier2	Vchar(10)	N		Second modifier for the procedure of the inbound claim
Modifier3	Vchar(10)	N		Third modifier for the procedure of the inbound claim
Modifier4	Vchar(10)	N		Fourth modifier for the procedure of the inbound claim
ProcedureFFSMaxUnits	Int	N		Max FFS units for the for the procedure of the inbound claim
ProcedureMinTime	Int	N		Minimum minutes for the procedure of the inbound claim. If not populated, there is no minimum value
ProcedureMaxTime	Int	N		Maximum minutes for the procedure of the inbound claim. If not

Column Name	Type	Reqd	Foreign Key	Description
				populated, there is no minimum value
ContractedRate	Decimal(19,2)	N		Contract value for the claim (Service Location rate * claim units)
LocalAmount	Decimal(19,2)	N		Amount of claim that DMH is responsible for
EPSDTAmt	Decimal(19,2)	N		Not populated
ClientPaidAmount	Decimal(19,2)	N		Amount that client has paid for the claim
PrivateInsuranceAmount	Decimal(19,2)	N		Amount that private insurance has paid for the claim
MedicarePaidAmount	Decimal(19,2)	N		Amount that Medicare has paid for the claim
Medi-CalPaidAmount	Decimal(19,2)	N		Amount that Medi-Cal insurance has paid for the claim
PaidtoProvider	Decimal(19,2)	N		Amount that DMH may pay to the provider
PaymentDate	DateTime	N		Date a positive 835 was created for the provider
AdjudicationDate	DateTime	N		Date the claim was adjudicated by DMH
PlanName	Vchar(30)	N		Name of the first plan on the claim
MediCalClaim	Bit	N		Indicates if Medi-Cal is a payer in the claim
MedicareClaim	Bit	N		Indicates if Medicare is a payer in the claim
InsuranceClaim	Bit	N		Indicates if Private insurance is a payer in the claim
DenySource	Vchar(15)	N		For denied claims indicates the source of the denial
DenyReason	Vchar(10)	N		For denied claims indicates the 835 adjustment reason code of the denial
DenyGroup	Vchar(4)	N		For denied claims indicates the 835 adjustment group code of the denial
DenyRuleFailure	Vchar(80)	N		Indicates the IS Rule failure description for claims that failed IS Business Rules or the MHMIS error message for claims that failed MHMIS business rules.
PlanID	Int	N	Rpt_CodeMaster.	IS internal Id for the first plan of the claim
OrgType	Vchar(30)	N		Organization type for the billing provider of the claim
RenderingProviderID	Int	N	Rpt_RenderingProvider.ProviderID	IS internal ID for the Rendering Provider of the inbound claim
RenderingProviderName	Vchar(62)	N		Name for the Rendering Provider of the inbound claim
RenderingProviderNameLast	Vchar(35)	N		Last Name for the Rendering Provider of the inbound claim
RenderingProviderNameFirst	Vchar(25)	N		First Name for the Rendering Provider of the inbound claim
ServiceLocationProviderID	int	N	Rpt_ServiceLocation.ProviderID	IS internal ID for the Service Location of the inbound claim

Column Name	Type	Reqd	Foreign Key	Description
FFSPProviderID	Vchar(9)	N		Not Populated
FFSClaimID	Vchar(13)	N		Not Populated
SubmitterID	Int	N		Is Internal ID for the submitter of the claim. This may be DDE, Clinical or the EDI
ClaimSubmittersIdentifier	Vchar(38)	Y		Claim ID sent on the inbound claim. For EDI and FFS DDE claims this is the value from CLM01 of the inbound claim. For Clinical claims this is assigned by the IS
ClaimStatusDataID	Int	Y		Set to zero. No longer used
ClaimKey	GUID	Y	Rpt_Service. ClinicalServiceID	IS internal ID for the inbound claim
RAKey	GUID	N		IS Internal ID for the outbound 835 send to the provider.
SubmittingUser	Vchar(50)	N		User that submitted the claim
ResubParentClaimKey	Vchar(38)	N		For claims that are resubs or voids, the IS Internal ID for the parent claim
ServiceUnitType	Vchar(4)	N		The unit type for the claim
ServiceUnitCount	Decimal(19,2)	N		The number of units billed for the claim
DDEVisible	Bit	N		Always set to 1
PatientFileNumber	Vchar(50)	N		The Patient File Number for the episode of the inbound claim. Not populated for FFS claims
EpisodeReptUnit	Char(5)	N		The service location reporting unit code for the episode of the claim
EpisodeSeqNumber	Char(3)	N		The MHMIS sequence number for the episode of the claim
DMHActivityCode	Vchar(30)	N		The MHMIS Activity code for the procedure of the inbound claim
DMHSvcCode1	Vchar(30)	N		The CRDC Service Function Code of the claim
DMHSvcCode2	Vchar(30)	N		The CRDC Mode of the claim
UOFSSecSeq	Int	N		Set to zero
UOFSSegSeq	Int	N		The MHMIS segment sequence number for the inbound claim.
FFSServiceCode	Vchar(10)	N		For FFS claims, the FFS service code for the inbound claims. This is based on the FFS procedure code conversion tables
DateCreated	DateTime	N		The date the instance of the service record was created
DateUpdated	DateTime	N		The date the instance of the service record was last updated
FFSServiceQty	Int	N		For FFS claims, the FFS service quantity for the claim. This is based on the FFS procedure code conversion tables
ProcedureID	Int	N	Hrp_ProcedureCode.	IS internal ID for the procedure of the claim

Column Name	Type	Reqd	Foreign Key	Description
VoidStatus	Vchar(20)	N		Indicates the void status of the claim
ResubmitDate	DateTime	N		The date that a resub was sent for the service
LateCode	Int	N		The HIPAA late code for the claim
HFFlag	Bit	N		Indicates if the claim is a healthy family claim
AuthCode	Vchar(50)	N		The authorization code for the claim. This is for LP inpatient claims only
BillingProviderNPI	VChar(35)	N	Rpt_Provider AltID.Alternat eID	NPI for the Billing Provider of the claim
ServiceLocationProviderNPI	VChar(35)	N	Rpt_Provider AltID.Alternat eID	NPI for the Service Location of the clam
RenderingProviderNPI	VChar(35)	N	Rpt_Provider AltID.Alternat e	NPI for the Rendering Provider of the claim
SatelliteFlag	Char(1)	N		Indicates if the Service Location of the claim is a Satellite
PublicSchoolFlag	Char(1)	N		Indicates if the Service Location of the claim is a Public School
CPETHresholdID	Integer	N		IS internal ID for the CPE Threshold applied against the inbound claim
CPEReleaseID	Integer	N		IS internal ID for the CPE Release applied against the inbound claim
CPEContractAmount	Decimal(9,2)	N		Contract amount for a claim processed using the CPE rate
CPEMCalOnlyFlag	Bit	N		When the claim is eligible for a CPE Threshold will indicates if Medi-Cal is the only payer
LegalEntityNumber	Vchar(10)	N		Value assigned by DMH/MHMIS to identify legal entities.
EPSDTFlag	Bit	N		Indicates if the claim was for EPSDT screening referral
EmergencyFlag	Bit	N		Indicates if the claim was for emergency
PregnancyFlag	Bit	N		Indicates if the client in the claim is pregnant
DupOverrideFlag	Bit	N		Indicates the claim is a valid duplicate
SDPhaseIIFlag	Int	N		Indicate if the claim is for SD phase II

rpt_IS410_HospitalizationReport

Description	IS 410 Hospitalization Report
