	Dr. Jai is interim Pharmacy Chief – currently the audit criteria is being finalized as they will begin with "desk audits" of 15 pharmacies to ensure proper refills, prescriptions, documentation → Then "on-site" audits will probably follow. They are choosing pharmacies based on: high volume, controlled substances, total volume, OID list (pharmacies with known issues), but they are open to suggestions as well.  Eligibility process is not ideal as-is. Process is being reviewed. Process reflected in data that is pulled into system 2x per week – currently they are working with CIOB (site staff may be used as work group) for tech/process on sending Magellan information for "just in time eligibility"  Performance Management & Quality Improvement piece of PBM looking at: Consumer Experience, Clinical Aspects, Cost (member per month), Safety and regulatory (prescribing controlled substances, schedules of prescriptions, lab vendors (pros/cons) contract to address, Clinic administered drugs (how ordered, administered; ex: clinical connect)  Member discussed issue with Order Connect Vs. Avatar access issue. May be Dr. training issue as there is a way to right click in Avatar to easily drag order connect into the avatar notes the prescription list. PBM is looking into creating sheet or webinar/video. October brings new functions (inbed order connect and avatar) and ease of workflows	as pre are vol selli per con sel
