Data Source: American Community Survey (ACS), US Census Bureau and Hedderson Demographic Services, 2016. ¹Data reported only for LACDMH threshold languages. SA Threshold Languages are in bold. "Threshold Language" means a language that has been identified as the primary language, as indicated on the Medi-Cal Eligibility Data System (MEDS), of 3,000 beneficiaries or five percent of the beneficiary population, whichever is lower, in an identified geographic area. Arabic is a Countywide threshold language and does not meet the threshold language criteria at the SA level and therefore not reported in the above table.

Table 7 shows the estimated population living at or below 138% Federal Poverty Level (FPL) whose primary language met the criteria for a threshold language.

A total of 91% (N = 2,534,541) of the population (N = 2,789,462) living at or below 138% FPL spoke a LACDMH threshold language. Among these, 31.3% (N = 792,595) were English-speaking, 58.9% were Spanish-speaking (N = 1,493,224) and the remaining 9.8% spoke the other LACDMH threshold languages.

As applicable to LACDMH, below is a breakdown of the 138% FPL population's threshold languages:

SA 1 reported two (2) threshold languages: English (61.1%) and Spanish (36.4%).

SA 2 reported eight (8) threshold languages: Armenian (9.4%), English (30.5%), Farsi (1.6%), Korean (1.3%), Russian (1.3%), Spanish (51.6%), Tagalog (1.5%), and Vietnamese (0.6%).

SA 3 reported four (4) threshold languages: English (32.4%), Korean (1.2%), Spanish (51.4%), and Vietnamese (4.1%).

SA 4 reported six (6) threshold languages: Armenian (1.7%), English (23.5%), Korean (6.4%), Russian (1.3%), Spanish (62.0%), and Tagalog (1.5%).

SA 5 reported three (3) threshold languages: English (62.0%), Farsi (6.1%), and Spanish (21.4%).

SA 6 reported two (2) threshold languages: English (26.3%) and Spanish (72.4%).

SA 7 reported three (3) threshold languages: English (20.2%), Korean (1.0%), and Spanish (76.3%).

SA 8 reported five (5) threshold languages: Cambodian (1.7%), English (40.1%), Korean (1.1%), Spanish (53.4%), and Vietnamese (0.8%).

Another 31,845 consumers had primary languages that were "Unknown" or "Missing". Arabic is a Countywide threshold language and does not meet the threshold language criteria at the SA level and is not reported in the above table. A total of 146 Arabic speaking consumers were served in FY 15-16.

Data Source: LACDMH-IS-IBHIS, December 2016.

B. Needs Assessment/Analysis of Disparities

Demographic profile of Los Angeles County is presented in pages 1-33. This includes total population and population living at or below 138% FPL distribution by ethnicity, age-group and gender in CY 2015 and consumers served in FY 2015-2016. The needs assessment section further analyzes the demographic distribution of the outpatient consumers served in the County Service Areas for FY 2015-2016 and compares it with population enrolled in Medi-Cal estimated with SED & SMI to assess the unmet need for mental health services in the County.

Data Source: US Census Bureau, 2015. Prevalence estimates by ethnicity for 200% FPL population taken from FY 13-14 California Health Inventory Survey (CHIS) database

Figure 10 shows the estimated population below or at 200% FPL in need of services by Ethnicity. It is presented here to be compared with the proportion of CSS Consumers by Ethnicity in Figure 11.

FIGURE 11: CSS CONSUMER POPULATION BY ETHNICITY CY 2015

Data Source: County of Los Angeles Department of Mental Health, Mental Health Service Act Three-Year Program & Expenditure Plan Fiscal Year 2014-15 through 2016-17 DRAFT

Figure 11 shows the CSS enrolled population by Ethnicity. Latinos are the largest group at 41.8%, followed by African Americans at 25.3%, Whites at 19.7%, Asian/Pacific Islanders at 5.4%, and Native Americans at 0.7%.

Figures 10 and 11 indicate the following:

African Americans constitute 7.6% of the population in need of services at or below 200% FPL and constitute 25.3% of the CSS consumers.

Asian/Pacific Islanders constitute 6.1% of the population in need of services at or below 200% FPL and constitute 5.4% of the CSS consumers.

Latinos constitute 54.6% of the population in need of services at or below 200% FPL and constitute 41.8% of the CSS consumers.

Native Americans constitute 1.0% of the population in need of services at or below 200% FPL and constitute 0.7% of the CSS consumers.

Whites constitute 30.7% of the population in need of services at or below 200% FPL and constitute 19.7% of the CSS consumers.

FIGURE 12: NEEDS ASSESSMENT SUMMARY FOR CSS PROGRAMS: PERCENTAGE AMONG THOSE IN NEED OF SERVICES FOR THE POPULATION AT OR BELOW 200% FEDERAL POVERTY LEVEL (FPL) COMPARED WITH PERCENTAGE OF CONSUMERS SERVED BY CSS PROGRAMS BY ETHNICITY FY 2015-2016

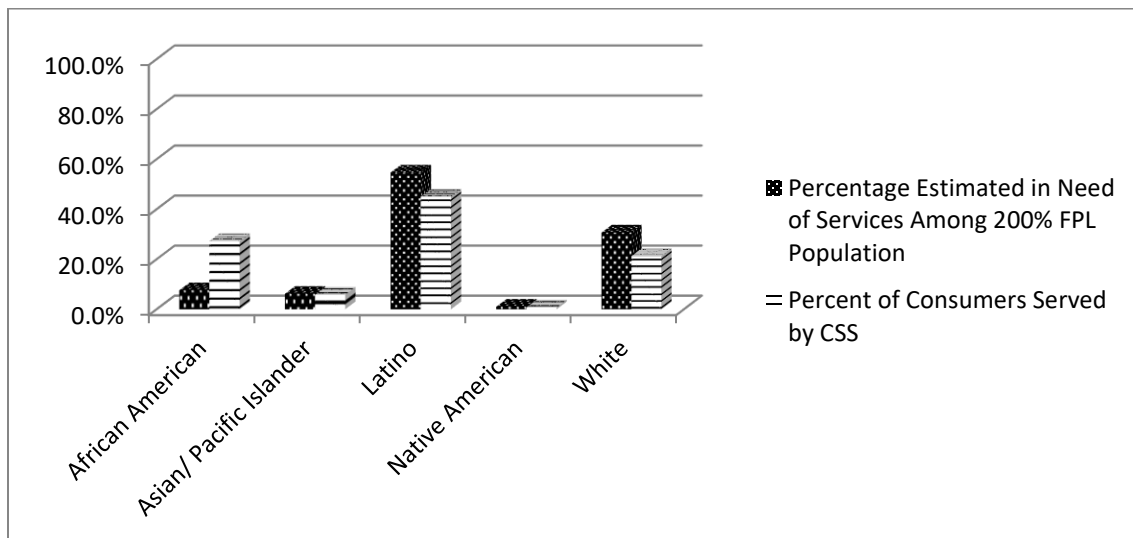

Figure 12 compares the information in Figures 10 and 11. Among those at or below 200% FPL, the African American population has the highest percentage receiving CSS services (25.3%) when compared to their estimated need of services (7.6%). The proportion of individuals receiving services was 3.3 times larger than the proportion of individuals estimated in need of services. Among those at or below

200% FPL, the Latino population was the most in need of services (54.6%) when compared to the CSS programs they received (41.8%). The proportion of individuals needing services was 1.3 times larger than the proportion of individuals receiving services. Both the Latino and White populations show a disparity in the proportion of those estimated in need of services with respect to those receiving services from CSS programs.
