

Prescribers – Assessing / Planning / Prescribing / Treating

- ✓ Medical Necessity
- ✓ Initial Medication Evaluation / Diagnosis
- ✓ Medication Consent & MSS Treatment Plan
- ✓ Prescribing Medications / Ordering Labs
- ✓ Vitals Entry – Vitals Graph & Growth Chart
- ✓ Medication Service Progress Note

Standard Course of Action

1. Assessing

- Complete a mental health assessment and establish medical necessity;
- Complete an initial medication evaluation (if needed)

2. Planning

- Develop a client treatment plan (and if applicable, obtain medication consent) with the client; then

3. Treating

- Provide treatment services to address the identified mental health condition and assist the client in reaching his/her objectives.

Assessing

Mental Health Assessment

(Psychiatric Diagnostic Interview)

Purpose

- Learn the client's story by evaluating his/her current status and history of mental, emotional, and behavioral health
- Develop a conceptualization, formulate a diagnosis, and determine if the client meets medical necessity
- Determine what the client's needs are and what services that best address those needs

Who typically conducts the Mental Health Assessment?

Psychologist

Social Worker

Marriage & Family Therapist

(students of these disciplines)

NOTE: For some unique programs, the psychiatrist conducts the mental health assessment. If applicable to you and your program, then contact your supervisor regarding workflow, documentation & claiming.

Who is eligible to receive outpatient SMHS?

(medical necessity criteria)

Based on a mental health assessment, the client must meet the following criteria to be eligible for treatment services:

- ✓ **Included** primary diagnosis – covered primary diagnosis under outpatient SMHS
- ✓ **Impairment(s)** – at least one of the following impairments as a result of that dx:
 - A significant impairment(s) in an important area of life functioning
 - A probability of significant deterioration in an important area of life functioning
 - A probability that the child will not progress developmentally as individually appropriate
- ✓ **Interventions** – proposed intervention(s) to address the mental health condition and is expected to:
 - Significantly diminish the impairment OR
 - Prevent significant deterioration in an important area of life functioning OR
 - Allow the child to progress developmentally as individually appropriate

Note: If the client is under the age of 21 with the Medi-Cal benefit **Early and Periodic Screening, Diagnosis, & Treatment (EPSDT)** and does not meet criteria for impairment or intervention above, medical necessity can be met if SMHS are needed to correct or ameliorate a mental illness/condition.

What are the Included Diagnoses?

Pause the video
if you want to
review this list

Categories of Medi-Cal Included Diagnoses for Outpatient Services

- Schizophrenia Spectrum and Other Psychotic Disorders
- Bipolar and Related Disorders
- Depressive Disorders
- Anxiety Disorders
- Obsessive Compulsive and Related Disorders
- Trauma and Stressor Related Disorders
- Dissociative Disorders
- Somatic Symptom and Related Disorders

- Feeding and Eating Disorders
- Gender Dysphoria
- Disruptive, Impulse-Control, and Conduct Disorders
- Personality Disorders, *except Antisocial*
- Paraphilic Disorders
- Attention-Deficit/Hyperactivity Disorder
- Autism Spectrum Disorders, *except Autistic Disorder*

Refer to the [Organizational Providers Manual](#) for the complete list of included diagnoses

Initial Medication Evaluation (IME)

When

At any point after medical necessity has been established

Purpose

Evaluate and manage the need for medication
and/or

Evaluate clinical effectiveness & side effects of medication

Who conducts the Initial Medication Evaluation?

Psychiatrist (MD/DO)

Nurse Practitioner

(students of these disciplines)

For more detailed information regarding the disciplines listed, refer to the [Guide to Procedure Codes for Specialty Mental Health Services](#)

Update Diagnosis

Based on your IME (or at any point in treatment), you may or may not need to update the Diagnosis

To update the Diagnosis, go to the **Current ICD-10 Diagnoses** widget on your MD Home View

Diagnosis search term	ICD-10 Diagnosis	Date of Diagnosis	Medi-Cal Allowable?
[PRIMARY] Schizoaffective disorder	Schizoaffective disorder, unspecified (F25.9)	2018-01-11 13:52	Included

Launch Diagnosis form

Add Edit Cancel

Type Of Diagnosis

Admission Discharge Update

Diagnosing Practitioner

SUSAN COZOLINO (056573)

Remarks

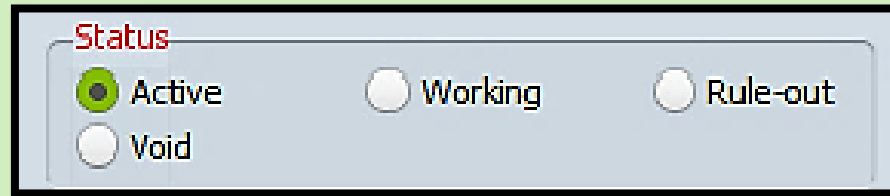

Refer to the IME progress note dated xx/xx/xxxx

- Add a reference in the **Remarks** on where to find information to support the diagnosis update
- Make sure to inform treatment team of updated diagnosis

NOTE: AP Pharmacists are not within scope to diagnose and should consult with others if the diagnosis may need to be updated

Diagnosis Form – Status

Status

The image shows a screenshot of a form titled "Status". It contains four radio button options: "Active" (which is selected), "Working", "Rule-out", and "Void". The "Active" option is highlighted with a green dot, while the others are white circles.

- **Active** = current primary diagnosis that is the focus of treatment
= current secondary/tertiary diagnoses
- **Working** = diagnosis that is being considered
- **Rule Out** = diagnosis to be considered after more information is obtained
- **Void** = diagnosis entered in error

IME determination

Based on your IME, you may or may not prescribe medication(s)

Prescribing Medication

Requires:

Medication Consent
Treatment Plan

- Complete the Medication Consent & MSS Treatment Plan with client
- Prescribe medication
- Complete a Medication Service Progress Note

NOT Prescribing Medication

IME is an evaluation (i.e. not a treatment service) so it does NOT need a Treatment Plan or Med Consent

- Complete a Medication Service Progress Note

NOTE: Procedure codes for the progress note will be discussed later in this module

Planning

Medication Consent

Purpose

To provide the client/legal representative with a full explanation of the proposed course of treatment and obtain his/her consent prior to prescribing /furnishing medication.

- The prescriber shall inform the client of all elements on the Medication Consent & MSS Treatment Plan form.

Requirements

The prescribing practitioner must complete a medication consent with the client or legal representative when:

- A new medication is prescribed;
- At least annually even in the absence of medication changes; and
- The client resumes taking medication following documented withdrawal of consent for treatment.

For more information, refer to [LACDMH Policy 306.02 – Standards for Prescribing and Furnishing of Psychoactive Medications](#)

Medication Consent section

Medication Consent Section

Current Medications:

Name Only of ALL meds that you are prescribing

Right Click – Widget Templates – (CWS) – “Prescribed Medication(s) – Name Only”

Select all medication consent options below: Yes

Yes No The reasons for taking the medications, including the likelihood of improving or not improving without such medications, were discussed with the client/legal representative and are documented in the Clinical Record.

Yes No The dosage, frequency, method of administration and duration of the above medication(s), have been discussed with the client/legal representative. Any changes in medication dosage and/or frequency during the course of treatment will be discussed with the client/legal representative.

Yes No Reasonable alternatives, if any, were discussed with the client/legal representative.

Yes No The client/legal representative has been informed of possible side-effects including those that may be present after 3 months and, if applicable, notified that with some anti-psychotics there is a possible side-effect of tardive dyskinesia, which may cause involuntary movement of the tongue, face, neck, limb or torso and may persist even after stopping the medication.

Yes No Written notification (e.g., OrderConnect leaflet) regarding the medication(s) and its side-effects was offered to the client/legal representative.

Yes No The client/legal representative has been notified that he/she should promptly inform his/her treating provider about changes in his/her condition (e.g., dizziness, severe sedation, rash), if she becomes pregnant, any decision to discontinue a medication and/or if any new medication(s) are prescribed/taker for other conditions.

Yes No The client/legal representative has been informed that he/she may withdraw consent at any time.

If applicable

Yes No The JV 220 was completed and entered in the Clinical Record in addition to this medication consent

JV-223 Order Date T Y

If the client is a minor and the **JV220** has also been completed, select **Yes**, and enter the **Order Date**.

Otherwise, it may be left blank

Make sure to review each of these items with the client – as you are attesting to having done so

Treatment Plan

Purpose

- ✓ Ensure a client's care is goal directed and outcome focused
- ✓ Guide treatment
- ✓ Ensure all payer requirements are met

Requirements

- **When should it be completed?**
 - Prior to initiating treatment services and minimally, every 365 days
 - Treatment services = services that address a client's mental health needs and are NOT primarily for the purpose of:
 - ✓ Assessment (**including the IME**)
 - ✓ Plan Development
 - ✓ Crisis Intervention or
 - ✓ Linkage and referral if a need of immediate concern exists
- **What should it address?**
 - Symptoms, behaviors, and/or impairments from the assessment / IME
- **Who is involved?**
 - Client / legal representative (as evidenced by the client's signature)
 - Significant support person, if applicable (as evidenced by their signature)
 - Practitioner (AMHD signature & signature of staff within scope of interventions)

Service Components that MUST be on a Treatment Plan Prior to Providing

Service Type	Service Type Definition	Service Components
Mental Health Services (MHS)	Individual, group, collateral or family-based interventions to restore a client’s functioning and ability to remain in the community with goals of recovery and resiliency	<ul style="list-style-type: none"> ✓ Assessment ✓ Plan Development ✓ Therapy ✓ Rehabilitation ✓ Collateral
Intensive Home Based Services (IHBS)	An intensive form of MHS that is predominantly delivered in the home, school or community. IHBS is specifically intended for children/youth who are already receiving Intensive Care Coordination.	<ul style="list-style-type: none"> ✓ Rehabilitation ✓ Collateral
Targeted Case Management (TCM)	Services that assist a client in accessing needed ancillary resources (e.g. medical, alcohol/drug treatment, vocational)	<ul style="list-style-type: none"> ✓ Assessment ✓ Plan Development ✓ Referral and Related Activities ✓ Monitoring & Follow-Up
Intensive Care Coordination (ICC)	An intensive form of TCM that facilitates the assessment, planning and coordination of services. ICC is specifically intended for children/youth who are involved in multiple child serving systems and require cross-agency collaboration through a Child and Family Team	<ul style="list-style-type: none"> ✓ Planning & Assessment of Strengths & Needs ✓ Reassessment of Strengths & Needs ✓ Referral, Monitoring, and Follow-Up Activities ✓ Transition
Medication Support Services (MSS)	Prescribing/furnishing, administering and monitoring psychiatric medications to reduce a client’s mental health symptoms	<ul style="list-style-type: none"> ✓ Evaluation of the Need for Meds ✓ Evaluation of Clinical Effectiveness & Side Effects of Meds ✓ Obtaining Information Consent ✓ Plan Development ✓ Medication Education ✓ Collateral
Crisis Intervention (CI)	Never needs a treatment plan

Draft Final

NOTE: AP Pharmacists are required to route the Medication Consent & MSS Treatment Plan to the psychiatrist of record because they are not considered an AMHD and cannot direct treatment

DMH Client Treatment Plan (MHS, IHBS, TCM, ICC)

*Long-Term Goal

What the client wants in his/her own words
(e.g., "I want to feel better")

Problem

Identified mental health need that you will be addressing in treatment
(e.g., Generalized Anxiety Disorder)

*Goal

The broad intent of treatment
(e.g., reduce anxiety)

Objective

How you and the client will know if the intent of treatment is happening
(e.g., Client will reduce anxious symptoms from a GAD-7 score of 18 (severe) to 8 or less (mild))

1. Is it related to the client's mental health needs?
2. Is it measurable?
3. Does it make sense to the client?

Intervention

This is what will you do to help the client attain their Objective
(e.g., Provide individual therapy to identify and modify his anxiety-provoking cognitive distortions)

*these elements are not on the Medication Consent & MSS Treatment Plan

Treatment Services & Writing Notes

Service Components that MUST be on a Treatment Plan Prior to Providing

Service Type	Service Type Definition	Service Components
Mental Health Services (MHS)	Individual, group, collateral or family-based interventions to restore a client’s functioning and ability to remain in the community with goals of recovery and resiliency	<ul style="list-style-type: none"> ✓ Assessment ✓ Plan Development ✓ Therapy ✓ Rehabilitation ✓ Collateral
Intensive Home Based Services (IHBS)	An intensive form of MHS that is predominantly delivered in the home, school or community. IHBS is specifically intended for children/youth who are already receiving Intensive Care Coordination.	<ul style="list-style-type: none"> ✓ Rehabilitation ✓ Collateral
Targeted Case Management (TCM)	Services that assist a client in accessing needed ancillary resources (e.g. medical, alcohol/drug treatment, vocational)	<ul style="list-style-type: none"> ✓ Assessment ✓ Plan Development ✓ Referral and Related Activities ✓ Monitoring & Follow-Up

Crisis Intervention (CI)	Never needs a treatment plan	

Provide & Document a Treatment Service

For the intervention/service to be reimbursable it must:

1. Represent a covered service (service component),

AND

2. Reduce impairment, restore functioning, or prevent significant deterioration in functioning

AND

3. Must be on a current Treatment Plan

Medication Support Services (MSS)

Prescribing/furnishing, administering
and monitoring psychiatric medications
to reduce a client's mental health
symptoms

✓ Evaluation of the Need for Meds

✓ Evaluation of Clinical Effectiveness & Side Effects of Meds

✓ Obtaining Information Consent

✓ Plan Development

✓ Medication Education

✓ Collateral

Tips for Writing Progress Notes

Pause the video
if you want to
review these
examples

BE CLEAR & CONCISE

Document all necessary information but avoid extraneous details

INSTEAD OF:

“Patient moved to Kansas at age 4. Her parents separated when she was 6 and they moved back to Chicago, then reunited and moved to Indiana, where father took a job as a shoe salesman. When he lost that job, they moved back to Chicago and divorced for good. Mother remarried a fireman, who was an alcoholic; they stayed together for 2 years until ...”

SIMPLY WRITE:

“Patient’s childhood was chaotic with many moves; her mother remarried x 3. No physical or sexual abuse ...”

Tips for Writing Progress Notes

Pause the video
if you want to
review these
examples

INCLUDE ADEQUATE DETAILS

Do not exclude information critical to explaining treatment decisions

INSUFFICIENT:

“Patient’s parents told her that they just bought a new car. She recalled the first car they had gotten when she was little, and how that made her happy. She talked about the first car she owned. Plan: Add lithium ...”

SUFFICIENT:

“Patient reports her mood is much improved. She cannot recall what made her feel so depressed last week. She is hyper-verbal, talking rapidly, gesticulating as she talks—much more animated, as compared to psychomotor-retarded presentation of last week, when SSRI was started. Assess: Bipolar switch. Plan: Add lithium, 300 mg bid, and titrate.”

AVOID USING PSYCHOTHERAPEUTIC JARGON
(technical sounding, non-specific, clinical terms)

Jargon	Specific Behaviors
Impulsive	Acts without anticipating consequences as exhibited by blurting out remarks during group.
Hostile	He shouted, "Shut up! No one wants to hear what you have to say!" when his mother began talking during session.
Psychotic	Appears preoccupied with listening to internal voices. Frequently shouts in response to what she hears.
Non compliant	Has not taken her medications for the past week due to concerns regarding side effects
Poor ADLs	Client is odorous and dirty. Client reports that she has not showered in a week.

Medication Service Progress Note

Widget Templates

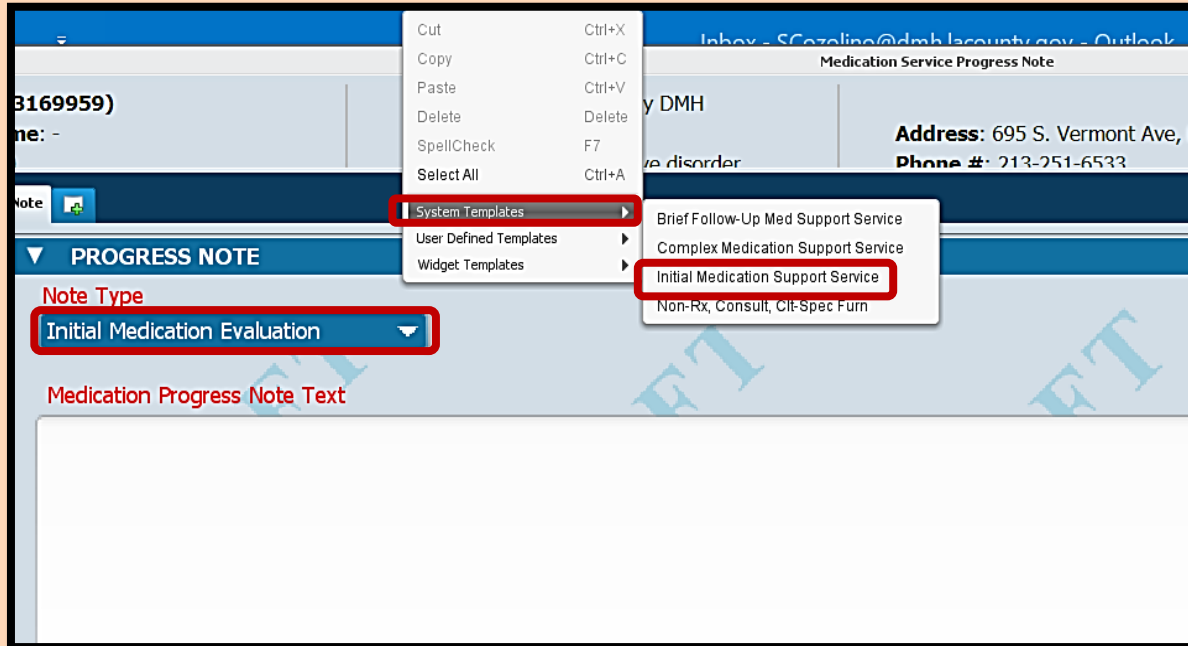

Widget Templates are a quick and easy way to pull information found within IBHIS/OrderConnect into your progress note
(e.g., recent vitals, recent labs, diagnosis, med support tx plan, a complete list of current medications)

The screenshot shows the 'Medications Prescribed?' widget interface. At the top, there is a question 'Medications Prescribed?' with two radio buttons: 'Yes' (selected) and 'No'. Below this, the text 'If yes, medications prescribed' is followed by a large empty text area. A context menu is open over the text area, listing standard editing actions (Cut, Copy, Paste, Delete, SpellCheck, Select All) and a 'Widget Templates' option at the bottom, which is highlighted with a red box. A secondary menu is open from 'Widget Templates', listing 'System Templates', 'User Defined Templates', and 'Widget Templates' (highlighted with a red box). A third menu is open from 'Widget Templates', listing 'Client', 'Template on Demand (CWS)' (highlighted with a red box), and 'Template on Demand (PM)'. A fourth menu is open from 'Template on Demand (CWS)', listing 'Prescribed Medication(s) - Name Only', 'Clinical Symptom Measure Scores (Last 5)', 'Med Support Tx Plan', 'Complete List of Current Medications' (highlighted with a red box), and 'Most Recent Medication Objective'.

If yes, medications prescribed

```

Procedure Codes & Claiming

SMHS provided via Telephone or Telehealth

Telephone

- Not considered face-to-face activities and, therefore, **no “face-to-face” time** will be documented (i.e. face-to-face time will always be zero).
- The **SC** modifier must be added to the procedure code for all telephone services

Telehealth

- Telehealth services with the client are considered **face-to-face** because the client is visually present via videoconferencing platform
- The **GT** modifier must be added to the procedure code for all telehealth services

Evaluation & Management (E&M) Criteria

E&M Procedure Codes

- **Used when:**

- providing face-to-face Medication Support Services for the purpose of medication evaluation and prescription
 - ❖ REMINDER: Telehealth (visual video-conferencing) with client is considered face-to-face 

- **Selected based on:**

- Location of service**

1. Office / Other Outpatient Services
2. Home (client's home) 
3. Domiciliary / Rest Home / Custodial Care Service

- Type of client**

1. New (someone who has not been seen by a directly-operated MD/DO/NP within the past three years) 
2. Established

- Components of evaluation**

1. History
2. Examination
3. Medical Decision Making 

For more information, refer to the [Guide to Procedure Codes for Specialty Mental Health Services](#)

E&M Components / Factors / Types

Pause the video
to review

E&M Components	Determining Factors	Types & Elements of each Type
History	Refers to the amount of history that is gathered which is dependent upon clinical judgment and on the nature of the presenting problem(s)	<p>Problem focused - chief complaint, brief history of present illness or problem</p> <p>Expanded problem focused – chief complaint, brief history of present illness, problem pertinent system review</p> <p>Detailed – chief complaint, extended history of present illness, problem pertinent system review extended to include a review of a limited number of additional systems, pertinent past/family/and or social history directly related to the client’s problems</p> <p>Comprehensive – chief complaint, extended history of present illness, review of systems that is directly related to the problem(s) identified in the history of the present illness plus a review of all additional body systems, complete past/family/social history</p>
Exam	Refers to the body and/or organ systems that are examined (“psychiatric” is considered an organ system) which is dependent upon clinical judgment and on the nature of the presenting problem(s)	<p>Problem focused – a limited examination of the affected body area or organ system</p> <p>Expanded problem focused – a limited examination of the affected body area or organ system and other symptomatic or related organ system(s)</p> <p>Detailed – an extended examination of the affected body area(s) and other symptomatic or related organ system(s)</p> <p>Comprehensive – a general multisystem examination or a complete examination of a single organ system</p>
Medical Decision Making	<p>Refers to the complexity of establishing a diagnosis and/or selecting a management option based on:</p> <ol style="list-style-type: none"> 1) the number of diagnoses and/or management options 2) the amount and/or complexity of medical records, diagnostic tests and/or other information that must be obtained, reviewed, analyzed 3) the risk of significant complications, morbidity, and/or mortality associated with the presenting problem(s), diagnostic procedure(s) and/or possible management options 	<p>Straightforward – minimal diagnoses and/or management options, minimal or no data to be reviewed, minimal risk of complications</p> <p>Low complexity - limited diagnoses and/or management options, limited data to be reviewed, low risk of complications</p> <p>Moderate complexity - multiple diagnoses and/or management options, moderate data to be reviewed, moderate risk of complications</p> <p>High complexity - extensive diagnoses and/or management options, extensive data to be reviewed, high risk of complications</p>
