Conference Goals

The 13th Annual Statewide Integrated Care Conference will be held in Universal City, California, at the Hilton Universal Hotel on October 19-20, 2016. This year's conference theme is **"Integrating Substance Use, Mental Health, and Primary Care Services: Courageous and Compassionate Care."**

The neighborhoods we live in influence our behaviors and affect our health in profound ways. Social and economic factors in our communities are linked to mortality, chronic conditions, health behaviors, mental health status, and substance use. Through the conference, we hope to bring together physical health, mental health, and substance use disorder treatment providers to strengthen partnerships and inform innovative services across our diverse communities.

For our opening plenary, we are honored to welcome the CEO of HealthRIGHT 360, Dr. Vitka Eisen, who transformed her life after recovering from a heroin addiction and now runs the very organization that once provided her treatment. Other plenary sessions will explore integrated behavioral health, cultural considerations in evidence-based practices, and the current state of homelessness policies in Los Angeles County.

This year, we have created thematic tracks that recognize the importance of addressing the needs of specific populations and of system transformation. Attendees may follow tracks (including LGBT issues, primary healthcare, children and transition-age youth, and criminal justice, among others) through the breakout sessions, or mix and match content to meet their own needs. All workshop presenters will address how their specific topic area relates to the theme of integration from the ground up.

Meeting the needs of our communities means providing safe, effective, well-coordinated services that address the unique needs, values and cultures of those served. In this 13th Statewide Conference, we seek to further this goal within the context of the enormous transformation in health care delivery taking place statewide, and nationally, as we implement the Affordable Care Act. We seek to help providers to improve access to and coordination of care among mental health, substance use, health, criminal justice, education, child welfare, and other providers.

To this end, the conference goals are as follows:

- To facilitate attendees' ability to coordinate services to improve healthcare integration and collaboration for mental health, primary care, and substance use disorder services.
- To help attendees identify the characteristics of services and providers that best support health, wellness, and recovery.
- To assist attendees in identifying emerging best practices for treating the complex needs of those with co-morbidities and strategies for implementation.
- To provide attendees with valuable "take-home" skills that can be implemented immediately.

The 2016 Statewide Conference is, again, a 'green event.' All planning and execution efforts have been done with mindfulness toward our environment and resource sustainability. Conference planning, marketing, publicity, invitations and registration were created with this standard at the forefront. Attendees and Speakers are strongly encouraged to utilize electronic media for viewing hand-outs and materials.
