Notice of Intent

COUNTY OF LOS ANGELES
DEPARTMENT OF PARKS AND RECREATION
"Parks Make Life Better!"
John Wicker, Director Norma E. Garcia, Chief Deputy Director

NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION FOR THE PROPOSED DESCANSO GARDENS MASTER PLAN

PROJECT TITLE: Descanso Gardens Master Plan

PROJECT LOCATION: The approximately 149-acre Descanso Gardens property, located at 1418 Descanso Drive in the City of La Cañada Flintridge, is the subject of the Master Plan. Descanso Gardens is located in the Fifth Supervisorial District of Los Angeles County, adjacent to the City of Glendale, approximately 11 miles north of the Los Angeles Civic Center. The property was originally developed as the Boddy family estate. It was deeded to the County of Los Angeles in 1952 and has been operated as a County Special Use Facility, administered by the County of Los Angeles Department of Parks and Recreation, since 1952. The Master Plan Area is in the San Rafael and La Cañada Land Grants of the U.S. Geological Survey 7.5-minute Pasadena topographic quadrangle in Township 1 North, Range 13 West, Section 2; and Township 2 North, Range 13 West, Section 35. Descanso Gardens is accessible from California State Route 2 (SR 2) and U.S. Interstate 210 (I-210). From SR 2, the Master Plan Area can be reached via Verdugo Boulevard and continuing south on Descanso Drive. From I-210, the Master Plan Area can be reached by exiting on La Cañada Boulevard, traveling northwest on Foothill Boulevard, continuing west on Verdugo Boulevard, and then south on Descanso Drive.

PROJECT DESCRIPTION: The proposed 15-year Master Plan proposes a framework to guide new development and recommend improvements to existing gardens, in particular, implementable projects that would sustain operations and enhance the experience of County residents and visitors. The capacity of Descanso Gardens is dictated by the size of the facility, which would remain the same. The Master Plan includes recommendations for improving the quality of Descanso Gardens. The Master Plan proposes to restructure the hierarchy of existing paths and provide additional paths to help improve visitor orientation and better showcase garden stories and experiences, guide visitors through the gardens instead of around the gardens, separate the visitor experience from maintenance routes, organize site amenities, and strategically distribute utilities. The Master Plan proposes two new gardens (plus a new nursery and storage yard), one new temporary overflow parking area, major improvements to 11 existing gardens, and improvements to the entrance complex and the two existing parking lots. The Master Plan proposes to increase the existing number of available parking stalls by over 30 percent to better accommodate existing and projected visitor use within the County property. Additionally, the Southern California Edison utility corridor would be graded to provide temporary overflow parking for up to 70 vehicles during events to reduce potential overflow parking in the surrounding neighborhood. Critical infrastructure upgrades would support existing and new programming at Descanso Gardens and would reduce the need for equipment rentals. The Master Plan proposes installation of new infrastructure (lighting, electricity, and Wi-Fi) to provide maximum flexibility for Descanso to curate new programs and installations, including permanent power hookups to support existing and future programming without temporary generators; new lighting along pathways and in event areas to support and enable nighttime

(continued on other side)

programming; and consideration of flexible lighting design for installations and programmable lighting elements that can be used by lighting designers to create special effects.

In accordance with Section 15072 of the State California Environmental Quality Act (CEQA) Guidelines, this notice is to inform public agencies, County and City residents, and the general public that the County of Los Angeles, as the lead agency, has completed a Proposed Mitigated Negative Declaration (MND) for the proposed project described above. The MND examines potential impacts of the proposed project on the environment. The MND will be available for a 30-day public review beginning January 27, 2020, at four locations:

- County of Los Angeles Department of Parks and Recreation, 1000 S. Fremont Avenue Unit #40, A-9 West, Third Floor, Alhambra, CA 91803. *Office hours are Mon.–Thurs. 7:00 am–5:30 pm. Please email Julie Yom, Park Planner, at* jyom@parks.lacounty.gov *to set up an appointment.*
- La Cañada Flintridge Library, 4545 North Oakwood Ave, La Cañada Flintridge, CA 91011. *Open Mon.–Wed. 10:00 am–8:00 pm, Thurs. 10:00 am–6:00 pm, and Fri.-Sat. 9:00 am–5:00 pm. Closed Sunday.*
- Descanso Gardens, 1418 Descanso Dr, La Cañada Flintridge, CA 91011. *Open 7 days a week, 9:00 am-5:00 pm.*
- Online at: County of Los Angeles Department of Parks and Recreation website: https://parks.lacounty.gov/environmental-documents/

PUBLIC COMMENT PERIOD: Monday, January 27, 2020, to Wednesday, February 26, 2020. All comments must be postmarked or emailed no later than **Wednesday, February 26, 2020**.

WHERE TO SEND COMMENTS: Written comments may be provided by letter or via email:

County of Los Angeles Department of Parks and Recreation
Planning Division
Attn: Julie Yom, Park Planner
1000 S. Fremont Avenue Unit #40
A-9 West, Third Floor
Alhambra, CA 91803
email: jyom@parks.lacounty.gov

SCOPING MEETING:

On Monday, February 10, 2020, the County will host a scoping meeting to review the project and solicit information in relation to the CEQA analysis for this project. The meeting will be held from 6:00 to 8:00 pm at Van de Kamp Hall at Descanso Gardens, 1418 Descanso Dr, La Cañada Flintridge, CA 91011.

Please direct any questions regarding this meeting to Julie Yom at (626) 588-5311 or jyom@parks.lacounty.gov.

Appendix 2

A Brief History of Descanso Gardens

APPENDIX 2: A BRIEF HISTORY OF DESCANSO GARDENS

Year	Event
Before Spanish Arrived[1]	The Gabrielino tribe lived in the San Gabriel Valley (villages of 150-400 inhabitants).
After Spanish Arrived[1]	The Master Plan Area and vicinity was formed into a land grant known as Rancho San Rafael.
1784[1]	Rancho San Rafael given to Corporal José María Verdugo.
1872[1]	Alfred B. Chapman and Andrew Glassell purchased Verdugo's ranch after it had recently been ruined by flooding and a long period of drought.
Between 1872 and 1881[1]	Colonel A.W. Williams and Dr. Jacob Lanterman purchased Verdugo's ranch.
1935-1937[1]	E. Manchester Boddy purchased Rancho del Descanso ("Ranch of Tranquility" - 165 acres of native oak woodland and chaparral in the Crescenta Valley between San Fernando Valley and San Gabriel Valley). Mr. Boddy planned to raise cattle on 40 acres of the property. In 1936 in response to the acidic soil under the oak canopy, Mr. Boddy began planting camellias (*japonica* cultivars), which were popular as corsages.
1937-1938[1]	12,000-square-foot, 2-story, 22-room Boddy House built, designed by Los Angeles architect James E. Dolene in his characteristic Hollywood Regency style. Horse stables were constructed (later demolished) at the current location of the Main Lawn near the performance stage.
1941[1]	Mr. Boddy purchased 440 acres in Hall-Beckley Canyon including a spring-fed stream and built an underground pipeline to move water across the Crescenta Valley to Rancho del Descanso. Mr. Boddy hired horticulturalist Howard Asper to manage the gardens.
1942[1]	Mr. Boddy purchased the entire inventory of a Japanese camellia grower, F.M. Uyematsu.
1945[1]	Mr. Boddy hired horticulturalist Dr. Walter Lammerts to create new hybrids of native plants, flowering fruit trees, lilacs, and roses.
1948[1]	Dr. Lammerts created several new varieties of roses and the original Old Rose Garden on the property. Dr. Lammerts acquired 20 *Camelia reticulata* plants from China that were quarantined in San Francisco; as several plants did not survive the journey or the quarantine, a hybridization program was initiated to expand the blooming season, color palette, and bloom intensity of camellias at Rancho del Descanso.
Circa 1949[1]	Mr. Boddy built the Boddy Lodge by the small lake on the property.
1950[1]	Mr. Boddy renamed his property "Descanso Gardens" and opened it to the public. Mr. Boddy closed the gardens immediately in response to neighbor protest after 6,000 visitors arrived to visit Descanso Gardens.
1951[1]	Mr. Boddy reopened Descanso Gardens to the public for a $1.000 admission charge.
1952[1]	Mr. Boddy retired and sold the 149-acre Descanso Gardens and 440-acre Hall-Beckley Canyon properties to the County as a public park. The County made a lease/purchase offer for the property so that it could not be subdivided for development. After the County negotiated with neighbors to satisfy concerns over the number of vehicles that would park in the neighborhood, Descanso Gardens was once again opened to the public.
1953[1]	The Lilac Garden was established with one hybrid, Lammerts' Lavender Lady.
1957[1]	A volunteer support group (the Guild) formed to promote Descanso Gardens and advance the institution as a true botanical garden with a broad educational purpose.
1959[1]	A California Native Plant section of the gardens was created to showcase native plants for home gardening, drought resistance, and erosion control. Theodore Payne designed the section and donated 1,000 of his native plants as well as bulbs and wildflower seed to Descanso Gardens.
Circa 1960[1]	The Center Circle garden, which is replanted every few years as a rotating demonstration garden, was first planted.

Year	Event
1966[1]	A Japanese-style garden and tea house (formerly known as the Full Moon or Oriental Tea House) designed by landscape architect Eijiro Nunokawa and architect Whitney R. Smith and constructed by general contractor Frank Ashley was dedicated. The garden included a koi-filled stream and pool with waterfalls, Japanese maples, and bamboo.
1968[1]	The bird observation station (now called the Lakeside Lookout), erected by the San Fernando Valley Audubon Society, the Guild, and the County Department of Arboreta and Botanical Gardens, was dedicated. The County Board of Supervisors adopted an order endorsing the application of the County Historical Landmarks Advisory Committee for registration of Descanso Gardens as a California Point of Historic Interest (CPHI), specifically for the native oak trees and native gardens. A plaque was placed on the grounds to represent the designation as a CPHI
1969[1]	A minka (traditional Japanese country-style farmhouse), designed by Kenneth Masao and donated by Robert H. Kawashima and Bob and Mary Matsumoto, was added to the Japanese-style garden.
1960s[1]	Descanso Gardens had approximately 100,000 camellias comprising of over 800 varieties gathered from Japan, England, the southern United States, and local growers in the San Gabriel Valley.
1972[1]	Approximately 4,200 feet of 8-inch diameter irrigation water main and appurtenances was installed.
1982[1]	A new entrance complex including two small meeting rooms, a new gatehouse, kitchen, gift shop, offices, a café, and courtyard, was constructed (architect Berry Berkus).
1987[1]	Artist and landscape architect Lew Watanabe installed "Weeping Wall", a 50-inch tall temporary stacked granite block sculpture that was permanently donated to Descanso Gardens in 1991.
1990[1]	The Old Rose Garden was re-landscaped in response to soil depletion; some original rose varieties were not replaceable.
1991[1]	Lew Watanabe designed two obelisk-type sculptural fountains at Descanso Gardens.
1993[1]	The County entered into a comprehensive operating agreement with the non-profit Guild that provided for the volunteer support group to provide full management responsibilities for Descanso Gardens. The Guild would manage Descanso Gardens on a contract basis. The most recent renewal of the operating agreement (November 2014) expires December 31, 2024, with a five-year renewal option.
1994[1]	A brand new 5-acre International Rosarium and Rose Pavilion with restroom facility designed by Steve Smith of Lawrence Moss & Associates with over 4,000 rose bushes opened.
1997[1]	The Japanese-style Garden was refreshed and redesigned by landscape architect Lew Watanabe, who also designed two stone fountains located elsewhere in Descanso Gardens. The redesign included new maple trees and a new bamboo water fountain.
2007-2008[1]	Descanso Gardens collaborated with the Pasadena Showcase House of the Arts organization to complete a full cosmetic overhaul and restoration of the Boddy House, which re-opened in 2008 as a house museum exhibit and interpretive center.
2008[1]	A public trail (Descanso Motorway/Descanso Loop Trail) was extended for hikers, bicyclists, and equestrians from Descanso Drive north of the Auxiliary Parking Lot through a new trail easement along the northern edge of the Master Plan Area to provide a connection to a hilltop terminus at the previously existing Cherry Canyon trail along the western and southern ridgelines of the Master Plan Area (see Figure 1.4-4). The County granted a 99-year easement on a strip of the Descanso Gardens property along the Master Plan Area's northern boundary to the City of LCF to accommodate the trail.
2009[1]	The Boddy House and Garage were deemed eligible for listing in the National Register of Historic Places (NRHP) and the California Register of Historical Resources (CRHR).
2010[1]	A portion of the Main Lawn near the Promenade was redesigned as Nature's Table (now called the Sensory Garden) by a landscape architecture student at California State Polytechnic University, Pomona as a "real world" class project.
2010[3]	A & M Home Improvement, Inc. installed solar panels on the roofs of the Visitor Center and Van de Kamp complex.
2011[1]	The Sturt Haaga Gallery was constructed as an adaptive reuse of the Boddy House Garage, consistent with the Secretary of the Interior's *Guidelines for the Treatment of Historic Properties*.
2012[3]	An electrical vehicle charging station was installed in the Auxiliary Parking Lot.
2014[1]	A new 7.7-acre Oak Woodland garden opened near The Lake and Boddy Lodge.

Year	Event
2015[1]	A new Ancient Forest garden opened near the Japanese-style garden and Lilac Garden.
2017[3]	An improved pathway and wood platform to protect heritage oaks were installed at the Lakeside Lookout (formerly bird observation station).
2018[3]	The caretaker's house (north of the Japanese-style garden) was converted to usable office spaces for Special Events, Facilities, and catering. Plumbing upgrades were installed.
2018[3]	The Gift Shop was expanded into the former Special Events Office.
2018[3]	The most recent redesign of the Center Circle was implemented.
2019-Present[3]	The County has authorized an on-site wastewater and septic improvements project in progress as of July 2019.

Appendix 3

Internal Planning Documents, 2009–Present

APPENDIX 3: INTERNAL PLANNING DOCUMENTS, 2009-PRESENT

In the past decade, a series of internal planning documents and conceptual plans have been prepared in support of the Guild's guiding principle that Descanso Gardens move forward as a botanical garden with a broad educational purpose in contrast to a park intended for public recreation. A summary of the documents and plans is summarized below, with their implication in development of the proposed Master Plan.

Long Range Concept Plan. In 2009, an internal framework plan was developed for the Guild to guide decisions on how to manage the land, water, legacy, and guest experience at Descanso Gardens that considered water balancing scenarios, energy use, waste cycles, and prioritization of projects. The primary focus of the internal document was on potential sustainability projects, providing a basis for further consideration of visitor experience and economics. Infrastructural improvements and deferred maintenance were not prioritized. Due to the needs and financial position of the gardens at that time, there were implementation challenges. In response to lessons learned from this internal framework plan, the proposed project plans for an implementable project shortly after the Master Plan is completed.

Entry + Parking Lot Feasibility Study. In 2014, a feasibility study was developed to evaluate the potential replacement of a maintenance facility, renovation of the four-acre Main Parking Lot to capture and infiltrate stormwater, and addition of solar photovoltaic (PV) panel shade structures over portions of the Main Parking Lot and nursery. The development of the Master Plan has involved stakeholder outreach and further evaluation of how the Main Parking Lot can capture and infiltrate stormwater in consideration of the larger Master Plan Area, add more parking space capacity to accommodate existing peak use during events, and better integrate the Auxiliary Parking Lot into planning efforts. Significant earmarks, grants and ballot initiatives (California Proposition W, County Measure A) funding is available for parking lot improvements. This could be a signature demonstration project for the master plan.

Pre-Master Plan Direction from the County. In 2015, the County DPR requested that the Guild complete a number of proposed improvements based on many factors, including questions to visitors regarding the types of improvements that would enhance visitor experiences; encourage higher levels of philanthropic support to allow the gardens to serve as a model for sustainable horticulture and land management; achieve long-term financial sustainability; expand opportunities for visitors to experience native landscapes within the garden; increase educational opportunities; and over the long term, accommodate sufficient allocation of space to meet visitor needs and related administrative and operations and maintenance requirements.

Rose Garden Concept Plan. In January 2016, a conceptual site plan, deer fence, wall, donor recognition, children's garden concepts, and garden scale studies were prepared to address guest concerns related to the state of the Rose Garden after multiple consecutive years of drought. Entitled "Reimagining the Descanso Rose Garden," the plan proposed a complete redesign of the rose garden to address maintenance, programming, hydrological, and ecological issues. The plan provided overall project concepts including improved site hydrology, tree removals, new pathways and circulation, a new rose garden layout, and a new and enlarged events pavilion building. The conceptual design documentation did not provide specific project details or plans. The proposed River of Roses concept involved development of a new event pavilion near the western edge of the Rose Garden with a new event terrace, event lawn, and river of roses in the center of the garden. The roses would be replanted in the garden along a series of new primary, secondary, and tertiary paths in full sun between the existing trees, the new event pavilion, an event lawn, a new meadow, and a children's garden. After conditions of the existing Rose Garden improved, the concept plan became less of a priority to implement, and further development was postponed to the master plan (proposed project).

Concept Design Report: The Lake and Water Promenade at Descanso Gardens. In May 2016, a concept design report was developed to investigate redesigning the hydrologic elements of the Lake and

Stream in response to site drainage, experience, and sustainability from the arroyos that drain into The Lake near the Boddy Lodge past the Enchanted Railroad to the eastern edge of the property near the Ancient Forest. The plan was intended as a demonstration project for sustainability and included a preliminary cost estimate and phasing. Goals of the concept design report such as providing better accessibility to and around the site's water features and integrating ecological functionality to the water system have been carried forward in the proposed project.

Member Survey. In 2017, an online member survey was distributed to identify attitudes regarding the membership program, communication preferences, renewal likelihood, and member satisfaction. As a total of 1,325 surveys were completed (7.9% response rate), the survey was not representative. However, summer concert issues were noted and reviewed in establishment of the Master Plan.

Descanso Gardens Strategic Plan 2018-2020. As of July 2019, a strategic plan is an in-progress 3-year outlook on priorities for Descanso Gardens to establish strategies and objectives in response to increased revenue and projected impacts to visitation. The process includes a board survey and resultant mission aligned goals. The proposed project is intended to be closely aligned with the five goals of the strategic plan (see Section 1.9, *Goals and Objectives*).

Other ongoing planning and evaluation efforts at Descanso Gardens as of July 2019 include the historic evaluation of Descanso Gardens by the County, development of a wayfinding & signage plan, and a camellia history presentation. In addition to the internal planning documents and concept plans prepared for the Guild in the last decade, the County has adopted park and recreation facility standards in the Los Angeles County General Plan 2035 (County General Plan) and identified Countywide recreation needs in a Countywide Comprehensive Parks & Recreation Needs Assessment.

Appendix 4

Existing Developed Gardens in Master Plan Area

APPENDIX 4: EXISTING DEVELOPED GARDENS IN MASTER PLAN AREA

Location	Garden Name	Year Opened	Acres	Location	Brief Description
1	Rose Garden	1994[1]	5+	Northern edge of gardens, between the Promenade, Lake, and Auxiliary Parking Lot	This garden was organized in part to exhibit the hybrids of roses created by hybridizers in many foreign countries, as well as those located in the United States; hence its formal name, "International Rosarium." The roses are showcased among a network of meandering paths, lawn, and companion plants surrounded by a grove of coast live oak and sycamore trees. No pesticides or herbicides are used to grow the roses. An event pavilion and cottage restroom/storage area are located in the center of the garden, with a rose trellis, children's maze, fountain, Victorian gazebo, and a heritage oak tree located at the northern portion of the garden. The northwestern corner and southeastern portion of the garden contain a display of irises. A climbing rose trellis surrounds the Mission Fountain near the western edge of the garden, and a manmade stream flows from the western edge to a pond adjacent to the Rose Pavilion. The Rose Pavilion and wedding gazebo are used for weddings.
2 3 4	Promenade/ Center Circle/ Nature's Table	Unknown 1960 2010	2.2	Immediately west of the entry courtyard, between Magnolia Lawn, the Main Lawn, Camellia Collection – West, Oak Grove, the Lake, and the Rose Garden	The Promenade showcases seasonal plants and home gardening ideas, as well as the Enchanted Railroad and a restroom. A spring display of thousands of tulips at the Promenade is complemented by tulip lights in the winter Enchanted Forest of Light nighttime experience. The Center Circle serves as a display garden that is refreshed or changed out every 2-3 years. Nature's Table is an 0.5-acre edible garden planted with fruit trees, seasonal vegetables, herbs, and edible flowers. In addition to showcasing the decorative qualities of edible plants, Nature's Table is also a heavily used resource in Descanso Garden's many educational programs for young children and school groups.
5	Magnolia Lawn	1990s	0.1	Southeast of the Center Circle, between Winery Canyon Channel, the Japanese Garden, the Main Lawn, and the Promenade/Center Circle	This small lawn is bordered by a crabapple espalier screen to the northwest, evergreen shrubs to the northeast, and evergreen trees, tulip magnolia trees, pacific dogwood trees, and camellias to the southeast and southwest. Two flowering cherry trees on the lawn provide additional seasonal interest and a backdrop for wedding ceremonies.

Location	Garden Name	Year Opened	Acres	Location	Brief Description
6	Main Lawn	Unknown	1.6	South of the Center Circle, between the Japanese Garden, Camellia Forest – East, Camellia Forest – West, and the Promenade/Center Circle	This lawn area is surrounded by camellias and oak trees and features a grass-covered raised stone stage near the southern portion of the lawn. Oak trees and a mulched area split the lawn area into two sections. The oak trees in the middle of the lawn create sightline challenges for many programs. Plant sales and a series of other events are held here, serving 200 to over 2,000 attendees. During the summer months, musical performances on the stage are viewed by visitors on picnic blankets on both sections of the lawn.
7	Japanese Garden	1966	1+	South of Van de Kamp Hall, between Winery Canyon Channel, the Lilac Garden, the Ancient Forest, Camellia Forest – East, Main Lawn, and Magnolia Lawn	Beneath a shaded canopy of coast live oak trees, a manmade stream flows from the northwestern through the southeastern edges of the garden between camellias, black pines, mondo grass, flowering cherry trees, azaleas, and Japanese maples. The garden includes features from many different styles of gardens in Japan, including the stroll garden, stream-and-pond garden, tea garden, and the raked-gravel garden (karesansui). A teahouse, a minka, and a red-orange bridge are reflective of local history. The space currently supports daytime events only (lighting and power needed for nighttime events).
8	Lilac Garden	1953	2	Near the eastern edge of the property, between Winery Canyon Channel, the eastern property boundary, the Ancient Forest, and the Japanese Garden	Four hundred lilacs provide a fragrant and colorful display in March and April against a backdrop of unpaved paths and evergreen foliage surrounding the garden. Due to the short bloom period of the lilacs, this garden is dormant approximately 10 months of the year.
9	Ancient Forest	2015	1.7	Southeast of the Japanese Garden, between the Lilac Garden, the Camellia Forest – East, the Main Lawn, and the Japanese Garden	The newest garden at Descanso Gardens includes a collection of more than 180 plants that existed in the Jurassic and Cretaceous periods. A collection of cycads grows near other ancient plant species, including tree ferns, ginkgo, magnolias, and redwood trees. The garden offers a view of the evolution of plants from the spore-bearing ferns to the first seed-bearing plants to flowering plants, and includes representatives of the ferns, cycads, and early conifers.

Location	Garden Name	Year Opened	Acres	Location	Brief Description
10	Hope's Garden	2000s	5.0	South of the Boddy House, in the southeastern corner of the developed gardens	This Mediterranean-themed garden is comprised of a series of terraces on the hillside above the Boddy House Complex. It features olive trees, rosemary, and Hope Rock as a seating area with a vista of the Crescenta Valley.
11	Camellia Forest - East	1930s	5.0	North and northwest of the Boddy House; southeast of the Main Lawn and Under the Oaks Theater, in the southern half of the developed gardens	The Camellia Collection at Descanso Gardens boasts rare and familiar camellias and has been designated an International Camellia Garden of Excellence by the International Camellia Society. These camellias were originally planted in the acidic soil under a canopy of native Coast live oaks to provide blossoms for the cut-flower industry. Many camellias are near end of life and in poor condition. Meandering unpaved paths pass through the evergreen camellia forest under a canopy of evergreen oak trees. Orange clivia lines some of the paths.
12	Camellia Forest - West	1930s	7.0	Southwest of the Main Lawn and east of the Oak Grove, in the southern portion of the developed gardens	The Camellia Collection at Descanso Gardens boasts rare and familiar camellias and has been designated an International Camellia Garden of Excellence by the International Camellia Society. These camellias were originally planted in the acidic soil under a canopy of native Coast live oaks to provide blossoms for the cut-flower industry. Many camellias are near end of life and in poor condition. Meandering unpaved paths pass through the evergreen camellia forest under a canopy of evergreen oak trees. A series of stone sculptures are hidden in the forest.
13	Oak Grove	N/A	2.0	Between the Promenade and the California Natives Garden to the north and south, Mulberry Pond to the northeast, and Camellia Forest-West to the west	A grove of native oak trees surrounded by a paved loop path and traversed by two unpaved paths and the Enchanted Railroad is sometimes used as an event venue for musical performances and wedding ceremonies. A non-native understory is green in spring and brown during the dry season.

Location	Garden Name	Year Opened	Acres	Location	Brief Description
14	California Garden	1959	8.5	In the southwestern corner of the developed gardens, southeast of the Oak Woodland and Lake, southwest of the Oak Grove	Designed by native plant advocate and horticulturalist Theodore Payne, this garden showcasing native plants in dry, forested, chaparral, riparian, and other microclimates contains three structures along the edge of the paved loop path through the garden: El Portal in the northeastern riparian end (with a drinking fountain), Mountain View near the northern end overlooking The Lake and borrowed scenery of the San Gabriel Mountains, and Canyon View near the southwestern edge of the garden overlooking the canyon in the middle of the garden.
15	Oak Woodland	2014	1.8	Along the western edge of the developed gardens, immediately west of the Lake	The Oak Woodland features naturally occurring coast live oaks, individual and grouped trees with native bunchgrass meadows, winding paths, seating areas, and a boardwalk for wildlife and riparian vegetation observation near the manmade Lake. The intent of the Oak Woodland is to suggest the savanna-like nature of the habitat of the Los Angeles Basin prior to European contact, and to perpetuate the expansion of the coast live oak forest on the Descanso Gardens site.
16	Lake & Surroundings	1940s	4.0	In the northwestern portion of the developed gardens, between the Rose Garden to the east and the Oak Woodland to the west	The manmade Lake has served as a reservoir for the gardens from the Hall-Beckley Canyon water source since the 1940s. The Boddy Lodge, Lakeside Lookout, a raised platform around a Heritage Oak, two bridges, and unpaved paths surround the Lake.
17	Harvest Garden	1962	0.7	Along the eastern edge of the Master Plan Area, north of Winery Canyon Channel and southeast of the Main Parking Lot	This garden, which is located outside of the gated entry area, supports a program that was started in 1962 as a free gardening program for people with special developmental needs, providing educational enrichment and therapeutic benefits of hands-on gardening and outdoor exploration for groups. The garden features a series of raised planting beds, two group gathering areas, and a small orchard.

Note:
[1] The Old Rose Garden opened in 1948.

SECTION 1.0
INTRODUCTION

1.1 PROJECT BACKGROUND

This Phase I Environmental Site Assessment (ESA) is being prepared for the Descanso Gardens Guild, Inc. (Guild). The Guild requested a Phase I ESA Report in order to provide information that may be helpful in developing a 15-year Descanso Gardens Master Plan (Master Plan). Building upon past planning efforts, the Master Plan will designate changes to guide the development of Descanso Gardens over the next 15 years. These changes will be consistent with the established mission. This Phase I ESA with its supporting environmental analysis will be used as reference in the decision-making process to be undertaken by the County of Los Angeles (County), as the Lead Agency pursuant to the California Environmental Quality Act (CEQA), for consideration of the Master Plan for approval.

1.2 PURPOSE

The purpose of this Phase I ESA is to outline recognized environmental conditions (RECs) to show the extent to which construction, operation, and planning of proposed development in association with the Master Plan has the potential to pose a risk or hazard to people at Descanso Gardens or properties located within one-quarter mile of the Master Plan area. RECs include, but are not limited to, the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. This Phase I ESA has been conducted in accordance with the American Society of Testing and Materials (ASTM) Standard E 1527-13, "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*,"[1] in order to satisfy 40 Code of Federal Regulations (CFR) Part 312 as required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

1.3 SCOPE OF THE INVESTIGATION

The scope of this Phase I ESA comprises five key tasks:

- Visual inspection of the accessible portions of the subject alignment and improvements to observe current uses of the subject property and adjacent properties for evidence of existing, potential, or suspected contamination and/or the presence of hazardous substances.

- Review of local, tribal, state, and federal environmental regulatory databases to assess the potential for the subject property to be considered or affected by potential, known, or suspected hazardous waste sites; contaminated soil, surface water, or groundwater; or leaking underground storage tanks (USTs) within the standard radius from the property as specified by the ASTM Standard E 1527-13.

[1] American Society for Testing and Materials. 2013. Standard E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process."

- Review of reasonably available historical information, including aerial photographs, fire insurance maps, topographic maps, city directory abstracts, other relevant city and/or county records, property owner(s) interviews, previous environmental investigations, and/or ownership records.

- Review of reasonably accessible local building, planning, and/or public works records.

- Preparation of a report documenting the findings, opinions, and conclusions regarding observed or potential environmental concerns.

1.4 SIGNIFICANT ASSUMPTIONS

No significant assumptions were made during the preparation of this Phase I ESA.

1.5 LIMITATIONS AND EXCEPTIONS

Physical testing for herbicides/pesticides, asbestos, lead-based paint, radon gas, vapor intrusion, or any other known hazardous materials or carcinogens were not performed in conjunction with this Phase I ESA.

1.6 USER RELIANCE

This report was prepared by, or under the supervision of, an environmental professional in accordance with ASTM Standard E 1527-13, Appendix X2, *Definition of Environmental Professional and Relevant Experience Thereto, Pursuant to 40 CFR 10*. No warranty, expressed or implied, is made by Sapphos Environmental, Inc.

This report is intended to serve as a screening device for environmental risk associated with present and past property uses. It should be noted that the degree of examination represented by a Phase I ESA is not intended to be used as an exhaustive and comprehensive investigation for every conceivable and possible environmental hazard, and Sapphos Environmental, Inc. does not make any such assertion. No claim is made for the actual existence or nonexistence of hazardous substances at the subject property or adjacent sites. Sapphos Environmental, Inc. makes no representation or warranty regarding the accuracy, quality, or completeness of any information provided by governmental agencies or other third-party entities used in the preparation of this report.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this investigation.

1.7 PRIOR INVESTIGATIONS

The 2003 asbestos survey of all existing structures at Descanso Gardens identified suspect asbestos containing materials (ACMs) in two locations: the Boddy House and the Boddy Lodge.[2] In the Boddy House, two rooms contain a foam-sprayed acoustic ceiling for an area of approximately 10 feet by 15 feet (breakfast nook) and an area of approximately 20 feet by 40 feet (the dining room). In both instances the material was observed to presently be in intact, non-friable condition. Due to its location, there is expected to be limited contact with this material, and it is expected to pose a

[2] Sapphos Environmental, Inc. October 13, 2003. *Descanso Gardens Asbestos Summary*.

minimal hazardous threat to persons at this facility. The Boddy Lodge is lined with 9-inch-square vinyl floor tile, a common ACM. During the 2003 survey, the inside of the Boddy Lodge was also inspected for ACMs.[4] Additional structures surveyed in 2003 asbestos survey include the Van de Kamp Hall, the Horticultural Trailer & Public Programs/Harvest Garden, the Gift Shop/Information Center/Classrooms, the former Sycamore Science Center (now split into two sides - Rose Garden bridal dressing room and shop/tool area for maintenance staff), the Tool Shed, the Minka House, the Tea House, the Gift Shop Area, the restroom at the Rose Garden, and the Bird Observation Station (now Lakeside Lookout). No other structures contained suspected ACMs.

The 2009 environmental evaluation of the proposed Rehabilitation and Adaptive Reuse of the Boddy House Garage project (now the Sturt Haaga Gallery) determined in a Categorical Exemption document that there would be no impacts regarding hazards and hazardous materials as a result of this project on the Descanso Gardens property. No known hazardous waste sites were identified within one-quarter mile of the project site for the Sturt Haaga Gallery in 2003.[3]

1.9 SITE SURVEY INSPECTION DATE

The Descanso Gardens property was inspected on February 12, 2019, and February 19, 2019.

1.10 INDIVIDUAL PERFORMING THE PHASE I ENVIRONMENTAL SITE ASSESSMENT

Ms. Mary Arias, California Licensed Professional Geologist #8109 of Sapphos Environmental, Inc., performed the Phase I Environmental Site Assessment (Phase I ESA) of Descanso Gardens.

SECTION 2.0
PROJECT DESCRIPTION

2.1 SITE LOCATION

Descanso Gardens is an approximately 149-acre property (139 acres owned by the County of Los Angeles), operated by the nonprofit 501(c)(3) Descanso Gardens Guild, Inc., located at 1418 Descanso Drive, La Canada Flintridge, California 91011. The Descanso Gardens property is located entirely within the incorporated City of La Canada Flintridge in the County of Los Angeles, immediately adjacent to the eastern boundary of the City of Glendale (Figure 2.1-1, *Regional Vicinity Map*; Figure 2.1-2, *Local Vicinity Map*). The master planning area is located on five parcels: Assessor Parcel Number (APN) 5813-008-909, 5813-008-910, 5813-008-902, 5813-008-903, and 5813-008-904. Approximately 10 acres of the property, including the picnic area and portions of the Main Lawn, are part of a utility corridor owned by Southern California Edison (SCE) that passes through the recreational facility. The Descanso Gardens property is roughly bound to the north by Verdugo Hills Hospital, single-family residences, and Descanso Drive; to the east by single-family residences along Encinas Drive; and to the south and west by a ridgeline traversed by Descanso Motorway (designated as the Descanso Trail in the City of La Canada Flintridge Trails Master Plan) and Flint Canyon Trail.

The Master Plan area is traversed by the Winery Creek Channel, a flood control channel managed by the County Department of Public Works, and SCE's utility corridor (see Figure 2.1-2). The Master Plan area appears on the U.S. Geological Survey (USGS) 7.5-minute series topographic quadrangle Pasadena located in the center of Township 1 N, Range 13 W, Section 2 (Figure 2.1-3, *Topographic Map with USGS 7.5-Minute Quadrangle Index*). The Master Plan area is generally concave, sloping down from west to east with elevation ranging from 1,605 feet above mean sea level (AMSL) near the Descanso Motorway trail, to 1,269 feet AMSL at the front entrance and main parking lot to the Descanso Gardens. The Master Plan area is located approximately 0.2 mile south of Interstate 210 and approximately 200 feet east of State Route 2. Descanso Gardens is accessed via Verdugo Boulevard to Descanso Drive. Further details are provided in Section 3.0, *Site Overview*.

2.2 SITE CHARACTERISTICS

Descanso Gardens is a public botanical garden serving the communities of La Canada Flintridge, Pasadena, and Glendale, and attracts visitors from throughout the country. Gardens of various degrees of cultivation occupy the majority of the approximately 80 acre developed area of Descanso Gardens and are the main attractions for visitors. The gardens include the Ancient Forest, periodically re-landscaped Center Circle, Oak Woodland, Rose Garden, California Garden, Lilac Garden, seasonally replanted Promenade, Japanese-style garden, Camellia Forest, and Hilltop Gardens near the Boddy House. Descanso Gardens amenities also include the entrance complex; Boddy complex and lodge; a caretaker's cottage; a Japanese-style tea house, Minka house, and bridge; the Lakeside Lookout; the Enchanted Railroad; and a pavilion and comfort station in the Rose Garden. The entrance complex comprises Van de Kamp Hall, Visitor Center, Birch Classroom, Cafe Descanso, Maple Restaurant, and a Gift Shop. Descanso Gardens contains various individual and grouped resources, including buildings, structures, landscapes, and features.

Descanso Gardens is accredited by the American Association of Museums as a museum of living collections, with nationally recognized botanical collections including camellias, California native plants, roses, and one of the few existing oak woodlands in greater Los Angeles.

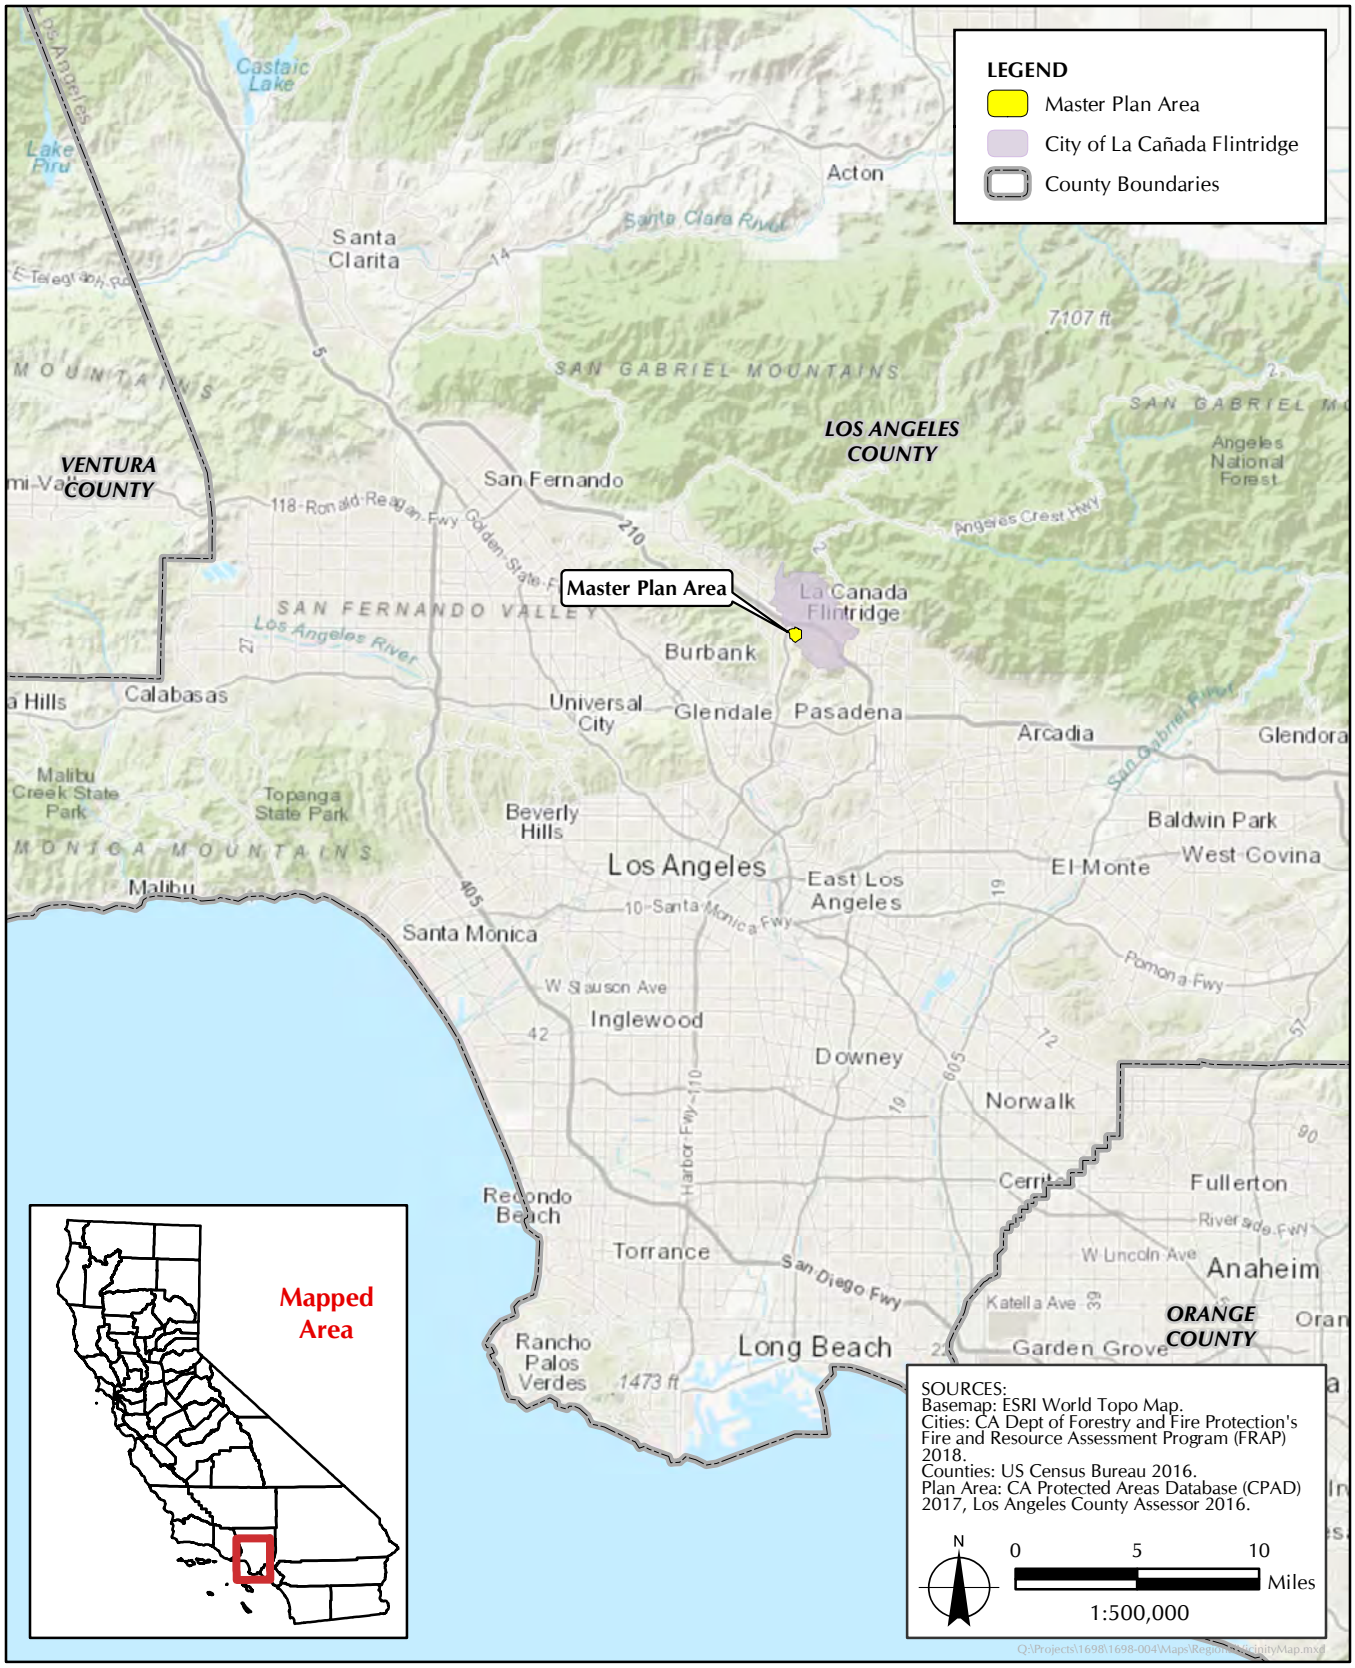

FIGURE 2.1-1

Regional Vicinity Map

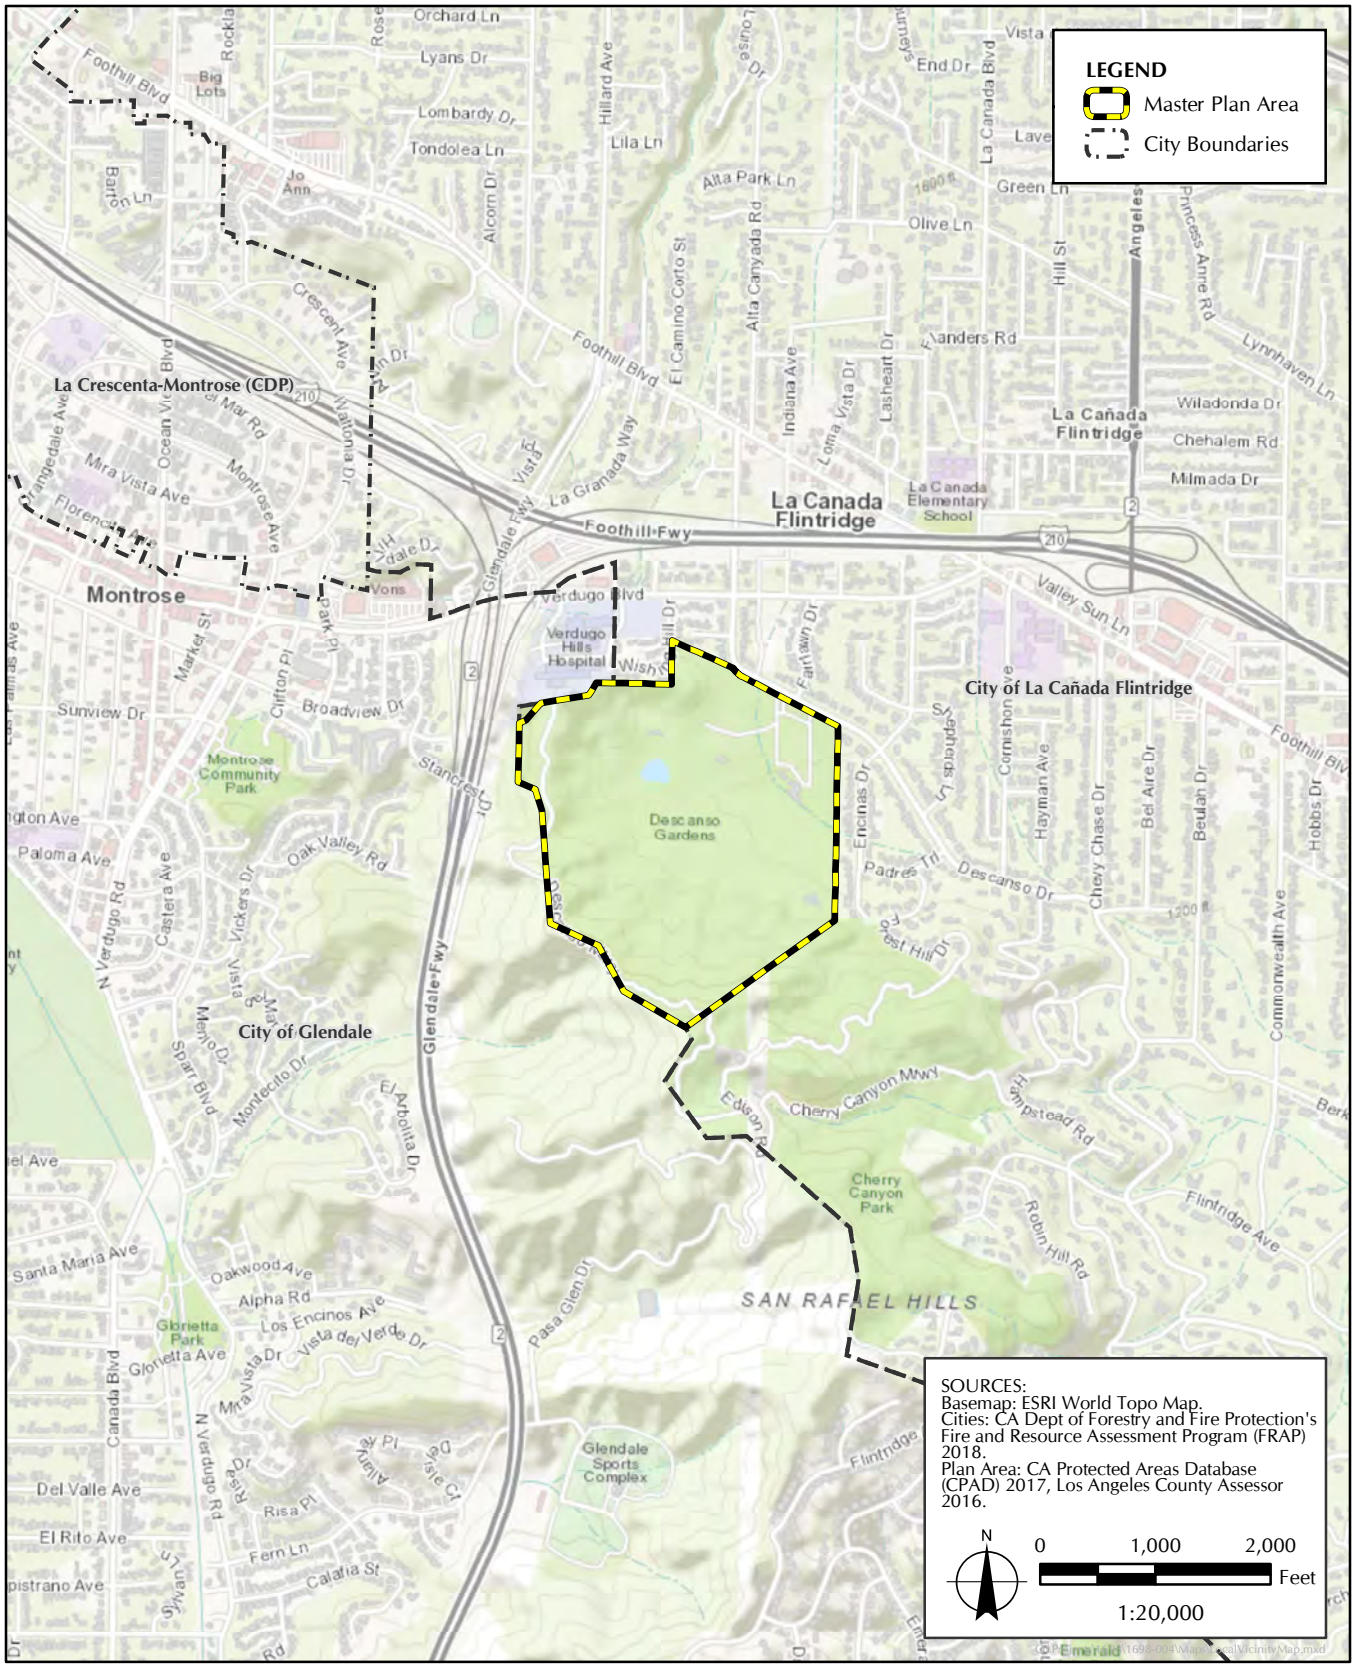

FIGURE 2.1-2

Local Vicinity Map

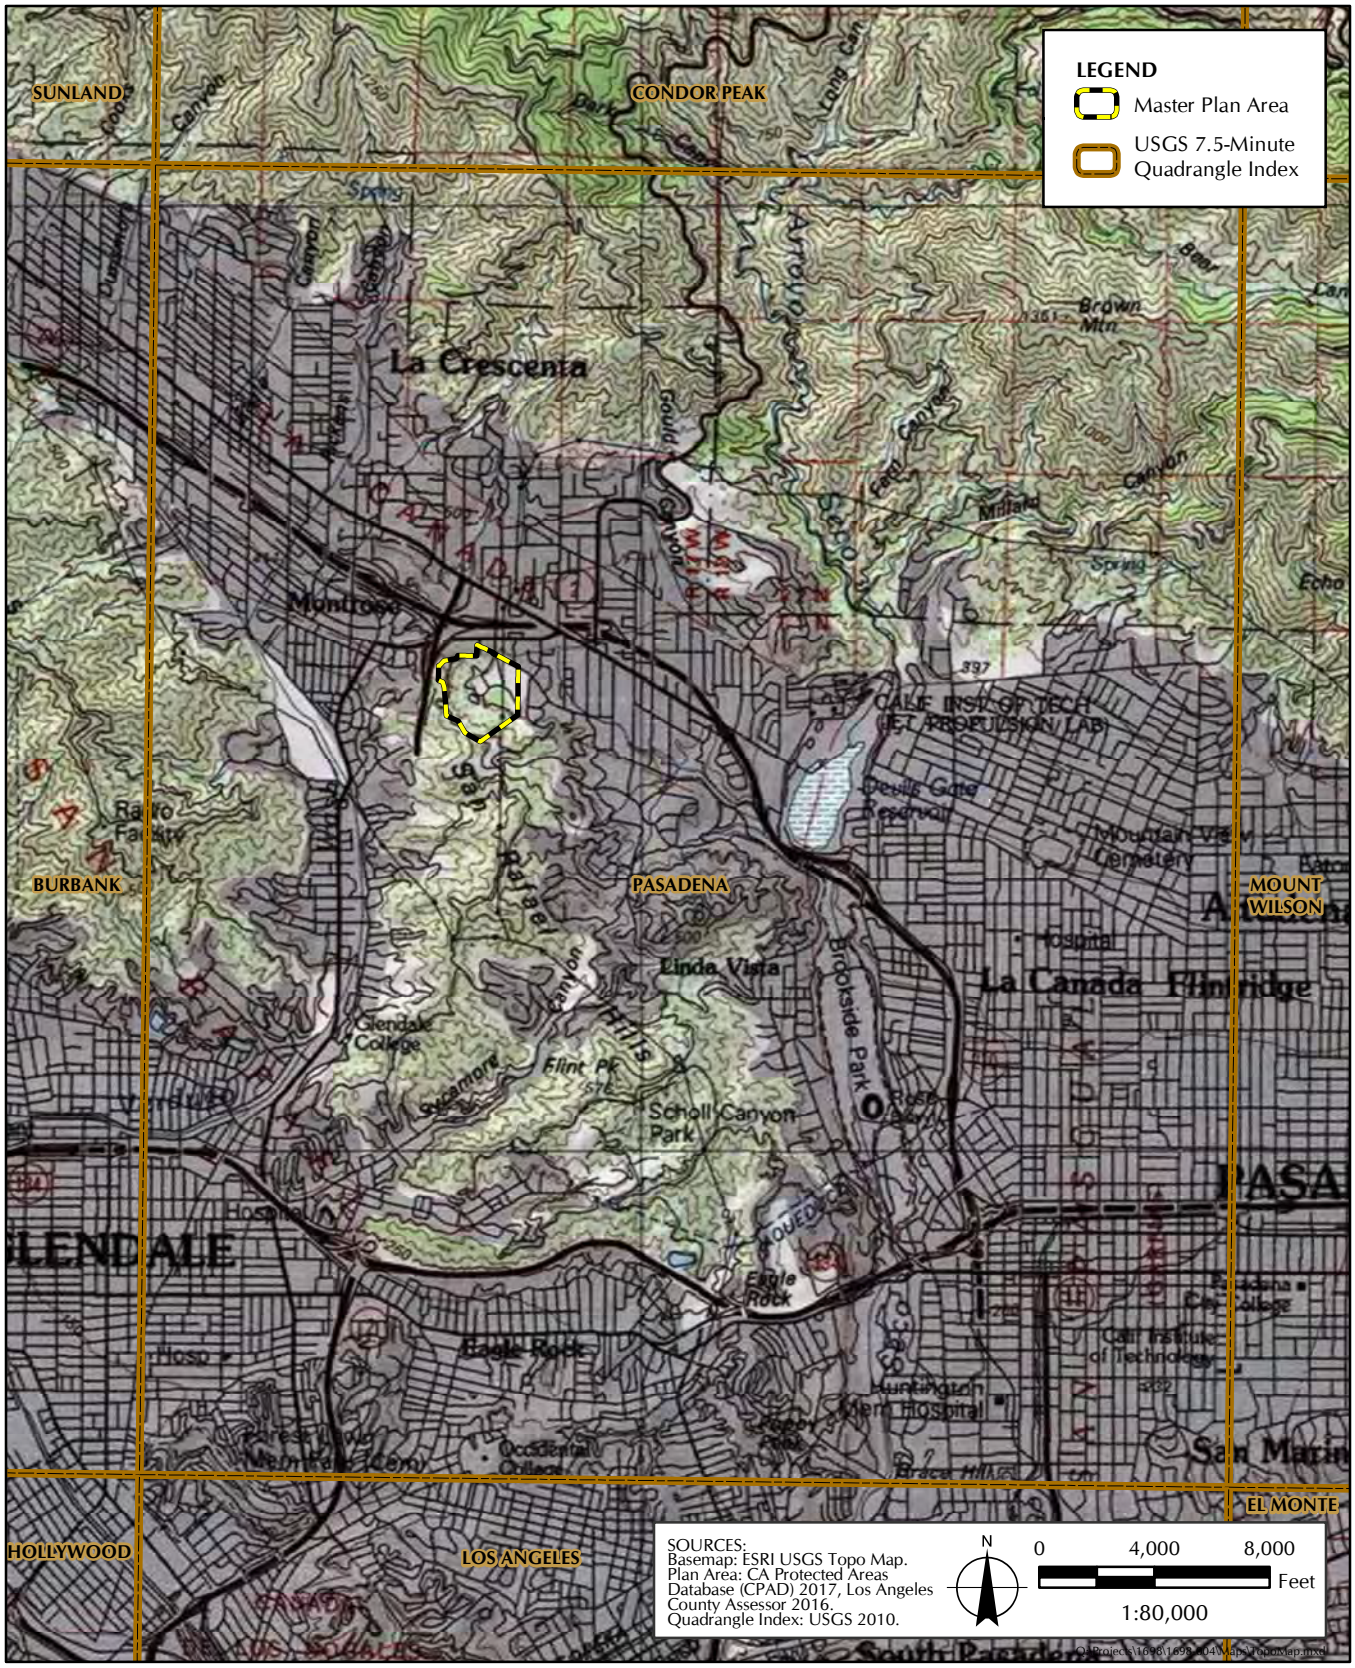

FIGURE 2.1-3

Topographic Map with USGS 7.5-Minute Quadrangle Index

Existing structures, buildings, and gardens within the Master Plan area include the Boddy House (circa 1938) and Boddy Lodge constructed for "Rancho del Descanso" property owner E. Manchester Boddy before he sold the property to Los Angeles County in 1953, the Gardens' signature camellia collection (circa 1942), a California natives garden developed in collaboration with Theodore Payne with the El Portal Ramada shade structure (1959)[4] and two structures constructed at a later date, a Japanese-style stroll garden and teahouse (1966), a complex of buildings at the Gardens' entrance (1982), a 5-acre Rose Garden with event pavilion and gazebo (1994), the Enchanted Railroad (a one-eighth scale replica of a diesel train), the Harvest Garden, the Sturt Haaga Gallery renovation to the Boddy Garage (2011), the Oak Woodland garden (2014), the periodically updated Promenade and Center Circle, the Ancient Forest garden (2015), and the Lakeside Lookout dedicated by the San Fernando Audubon Society in 1961 (revitalized in 2017).[5,6,7,8,9] A main parking lot provides parking spaces for staff and visitors, and an auxiliary lot provides supplemental parking for staff, visitors, and vendors. Paved roads and decomposed granite paths provide pedestrian and service vehicle access between gardens, and several unpaved pedestrian paths provide visitor and maintenance access through the gardens. The developed portion of the gardens is surrounded by a chain-link fence. The property is served by five septic systems. The main VDK septic system will be replaced by a membrane bioreactor wastewater treatment plant, which the other systems can be tied into in the future as they fail.

2.3 MASTER PLAN DEVELOPMENT

As of May 2019, the draft Master Plan is still undergoing development. The Master Plan will address parking, water quality, sustainability, user experience, staff experience, and other site changes and/or improvements to existing conditions for the next 15 years.

While the specific details of the Master Plan are still being developed, a majority of structural changes would be located within or near the developed portion of the property. There would be at least one new building that will replace the temporary mobile offices currently in use. Transportation and some demolition would be expected in this area. Construction activities would occur as well in other developed areas of Descanso Gardens. Less than 10 percent of the undeveloped 80 acres are anticipated to be developed for passive recreation as part of the Master Plan. As the Master Plan is still under development, the duration under which these activities are to be undertaken and maximum amount of building and structure demolition cannot be determined at this time.

SECTION 3.0
SITE INSPECTION

3.1 SUMMARY

The site inspection was performed on February 12, 2019 and February 19, 2019, by walking the entire fenced area of the Descanso Gardens property (Appendix A, *Site Reconnaissance Photographs*). During these two weeks, several inches of rain fell in the region of La Canada Flintridge.

On February 12, 2019, an unassisted survey of the area was conducted of the public areas of Descanso Gardens. It was overcast with light rain on February 12, 2019. Close to an inch of rain fell on the day prior. Rain water runoff was observed throughout the property with surficial water flowing over paved and unpaved pedestrian paths. All areas of inaccessibility were noted and addressed in the subsequent supervised second visit conducted one week later.

On February 19, 2019, Sapphos Environmental, Inc. met with Descanso Gardens personnel to survey areas inaccessible to the public. It was partly cloudy and approximately 60 degrees Fahrenheit with light winds. It was a free admission day, and the pedestrian paths were crowded. Sapphos Environmental, Inc. used staff vehicles to travel between different areas of the gardens along the wider paved paths and walked as necessary in order to access more inaccessible areas. Several staff members working in the various surveyed areas were interviewed regarding area history and observations. On February 18, 2019, one day prior to the second day of field reconnaissance, over one inch of rain fell on the Descanso Gardens Property. The site visit was concluded with an in-person interview and document reconnaissance at the main personnel office in the large trailer near the Descanso Gardens entrance. Key observations and notes are listed in the sections below.

3.2 SHEDS

Sheds are where all items within the Master Plan area containing fuels, solvents, fertilizers, or other products that may contain hazardous ingredients are stored. The survey included an inspection of 21 of the storage sheds located throughout the Descanso Gardens property (Figure 3.2-1, *Storage Sheds within the Project Area*). Approximately 10 of the sheds store items with potentially hazardous chemicals of concern (COCs). The sheds varied in size, age, construction materials, condition, and location. Most sheds were kept locked with no access available to the general public.

3.2.1 Metal Storage Cabinets

Two metal storage cabinets were observed on February 19, 2019, during the supervised reconnaissance (see Figure 3.2-1). Both metal cabinets were large locked shelved closets. One was located on the mulched area in the southwestern portion of the Auxiliary Parking Lot along the Rose Garden perimeter fence (Figure 3.2.1-1, *Auxiliary Parking Lot*; see Appendix A, Photo 1). The other metal shelf was located inside a large wooden shed adjacent to the same mulched area next to the Auxiliary Parking Lot.

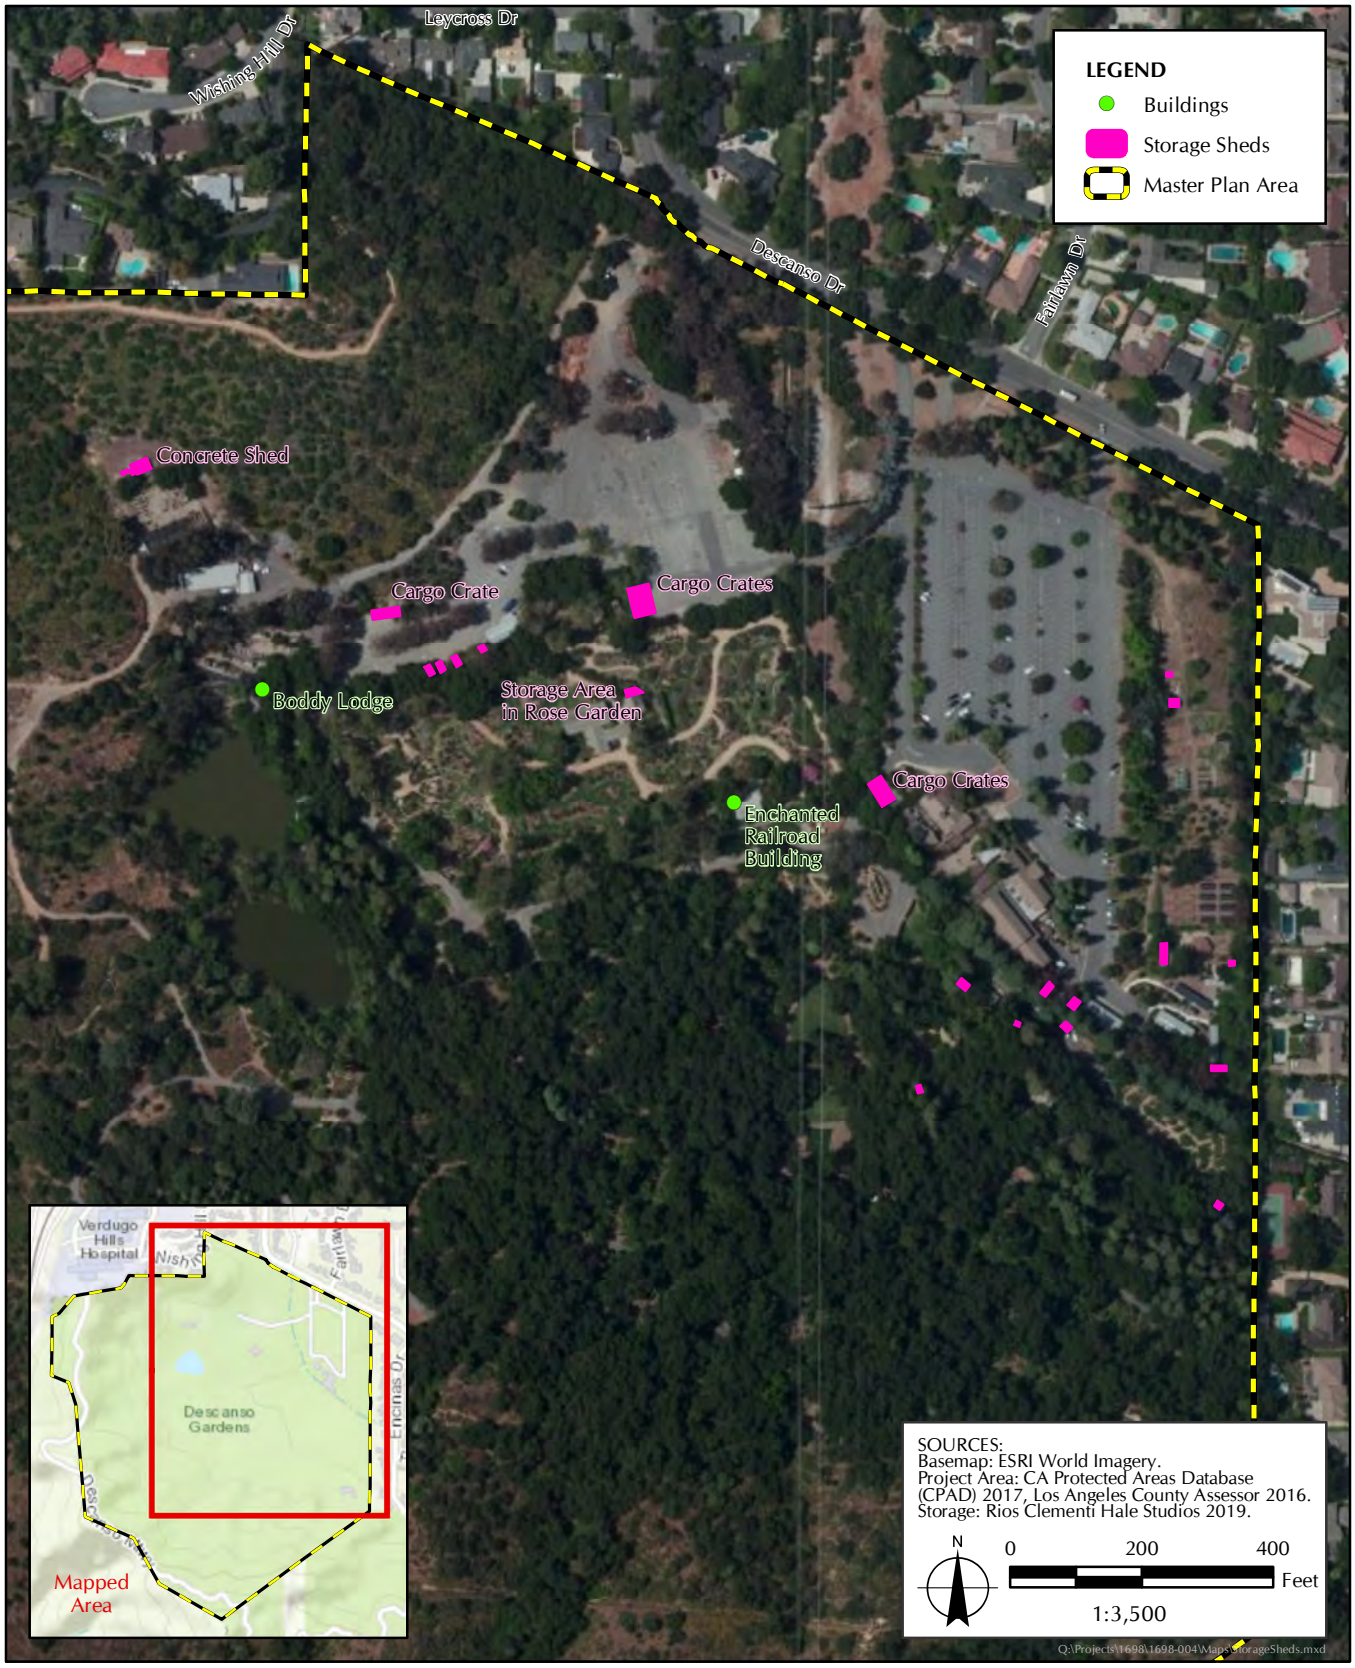

FIGURE 3.2-1

Storage Sheds within the Project Area

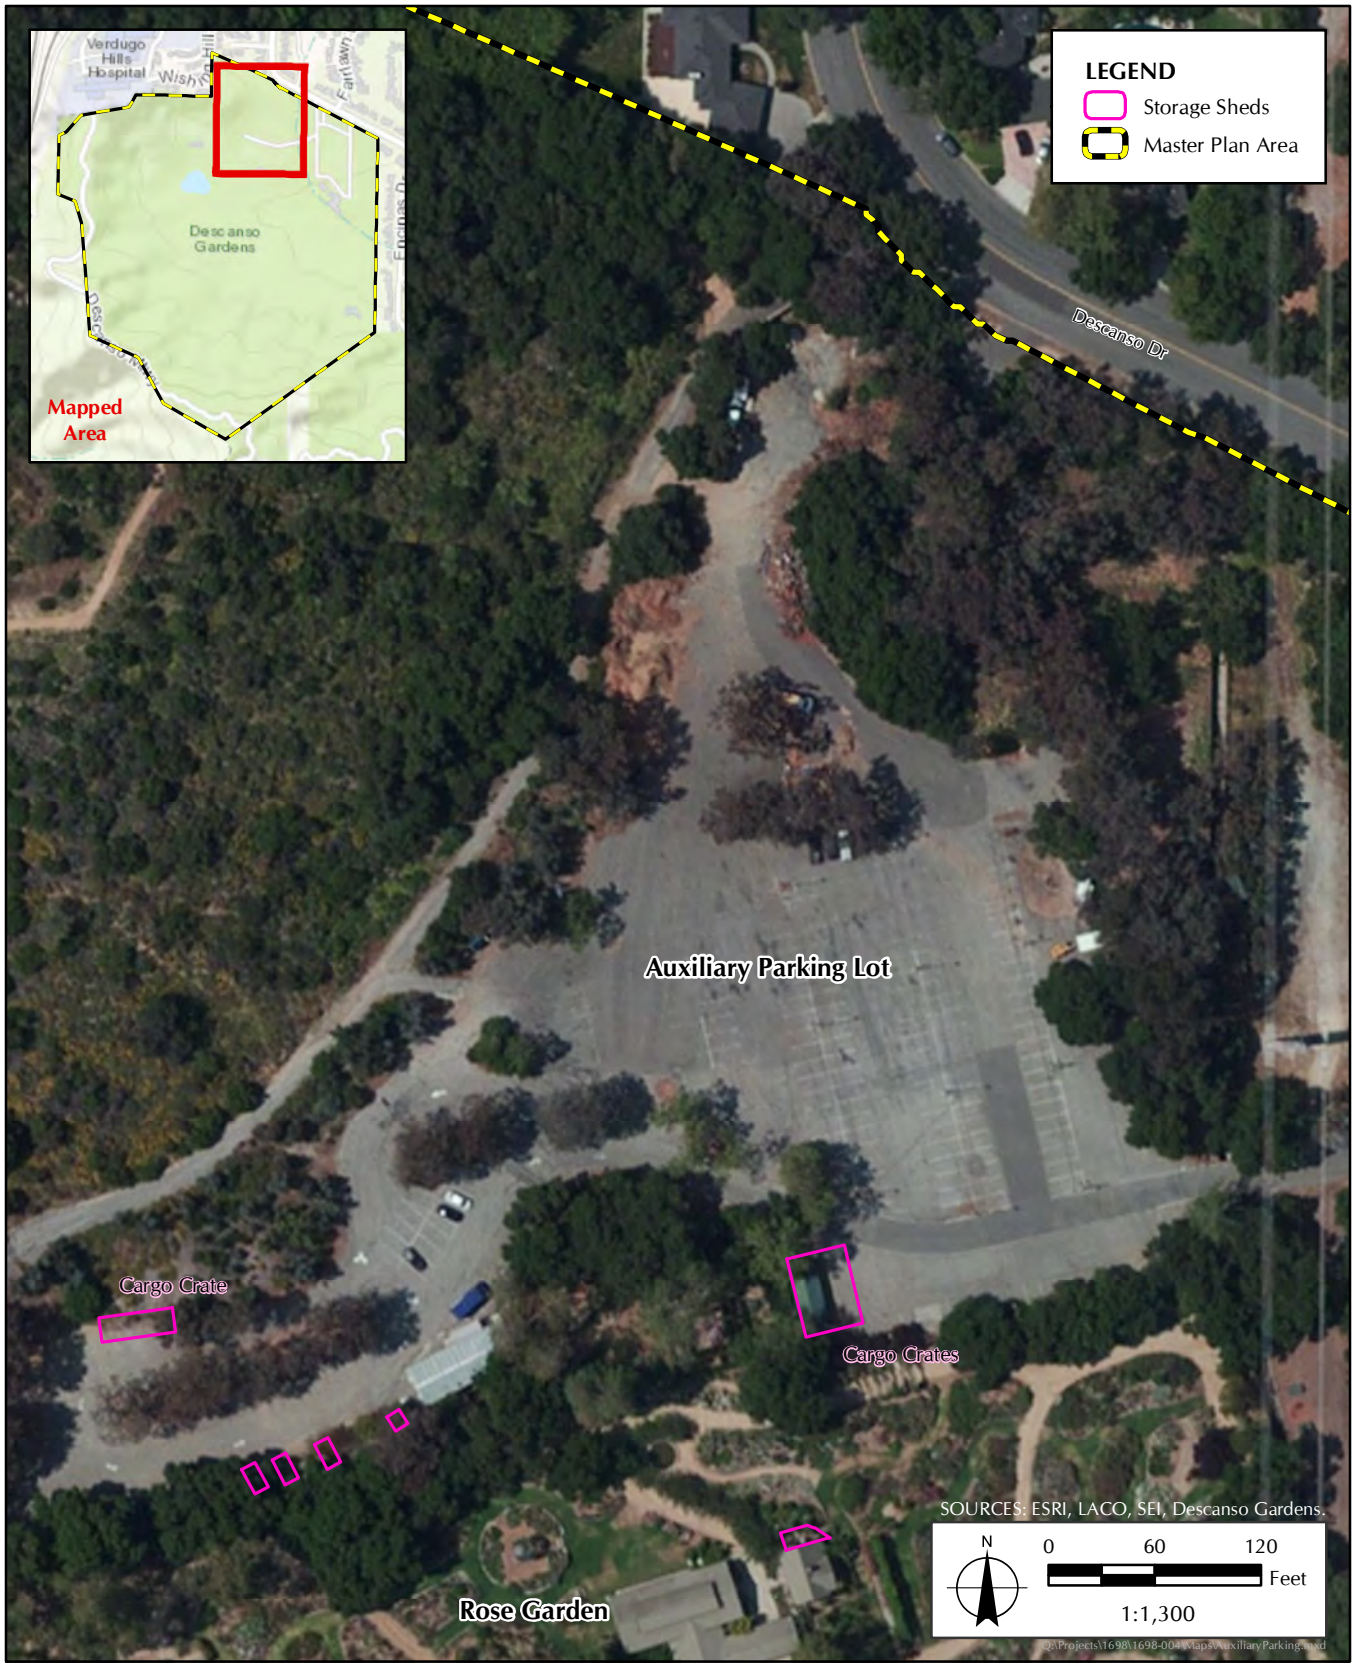

FIGURE 3.2.1-1

Auxiliary Parking Lot

The metal cabinets were observed to be completely locked and inaccessible to the public. Due to the inclement weather, which included large amounts of precipitation during the prior day and weeks before, the shelves inside the metal cabinets were completely saturated with water inside and outside. The metal shelves were backed with metal cans and plastic bottles that harbored petroleum oil, gasoline, distillates, paints, and cleaners, among other things related to vehicle and property maintenance (Photos 2 and 3). The water inside at the bottom of the outdoor metal cabinet was observed to have a black tint with an oily sheen on the surface (Photo 4). Though not directly observed, it is likely that the water spilled from the inside of the shelves into the mulched ground beneath and penetrated the underlying soil in this largely unpaved area.

3.2.2 Cargo Crates

Two large red cargo crates (Conex Shipping Containers), made of metal, were observed in the Auxiliary Parking Lot located along the fence border separating the staff parking lot area from the Rose Garden (see Figure 3.2-1). They were completely locked and inaccessible to the public (see Photo 5). The crates were observed to be completely wet outside with runoff from the crates observed to traverse the length of the auxiliary parking lot as evidenced by silt deposits. The interiors of the crates were completely dry. No unusual marks were observed on the floors. Many of the crates contained party supplies, including tables, chairs, and other miscellaneous items (Photo 6).

3.2.3 Wooden Sheds

Twelve wooden sheds were observed during the site inspection (see Figure 3.2-1). The wooden sheds on the Descanso Property varied in sizes between 4×2 feet and 25×35 feet. Most of these wooden sheds contained intact wooden floors in relatively good condition. The wooden sheds stored multiple items that contain potentially hazardous chemicals.

Small Wooden Sheds. Nine smaller wooden sheds were located throughout the property. The newer wooden sheds were observed to be at the eastern side of the Descanso Gardens property between the Ancient Forest and the Harvest Garden (Photo 7). They tended to store fertilizers, bottles of cleaners, and oil for tools (Photo 8–12).

Large Wooden Sheds. Three larger wooden storage sheds were mostly observed in the western portion of the property within the Auxiliary Parking Lot to the north of the Rose Garden. They served as large warehouses (see Photo 13). They contained stored items such as paints, voltage batteries, oils for tools, solvents, degreasers, epoxies, and tools such as a propane torch (Photos 14–20). The newer large wooden sheds were located at the western portion of the Auxiliary Parking Lot, adjacent to the Rose Garden.

3.2.4 Concrete Shed

A single concrete shed was located at the northwestern corner of the Auxiliary Parking Lot, towards the foothills to the west (see Figure 3.2-1; see also Photo 21). It was found to be in average condition with concrete walls and a wooden shingle roof and an intact wood floor that protected from the elements. There was a locked front door in excellent condition; a locked, weathered wooden garage door in poor condition; and one small window. The concrete shed stored a variety of items, including a small metal boat, wheelchair, cardboard boxes, vacuum cleaner, wood paneling, paper towels, ropes, and other miscellaneous items. All items seemed to be dry. The floor was littered with rodent feces (Photo 22). A concrete vault with a faucet was noted outside of the shed. The vault was cracked and the faucet does not seem to currently contain an active water supply. However, several hoses as

well as a bucket was presently located on top of the vault (Photo 23). Several other miscellaneous items were stored outside of the concrete shed, such as a rusted metal hopper, a broken weathered wooden bench, pressed board panels, and other miscellaneous items (Photo 24). There was also a bobcat located downgradient on soil off the paved road (Photo 25). Even further downgradient was evidence of soil stockpiles that mostly remained uncovered, as well as wooden pallets and 250-gallon water tanks (Photo 26).

Since the February 2019 site visit, Descanso Gardens staff have cleaned up the shed and cleared the floor areas of any items and biological debris (Appendix B, *Descanso Staff Site Photographs*, Photos 1–3).

3.3 OTHER AREAS HARBORING POTENTIAL HAZARDOUS COCs

Several areas of the Descanso Gardens property were identified as potentially harboring hazardous chemicals. Each area is discussed in the subsections below.

3.3.1 Enchanted Railroad Building

The Enchanted Railroad Building is located towards the center of the Descanso Gardens property in the Promenade area southeast of the Rose Garden (Figure 3.3.1-1, *Descanso Gardens General Areas Map*). The building was observed to be made of weathered wood paneling and in average condition (see Photos 27 and 28). There is no finished floor surface inside of the building; the ground surface is composed of gravel and dirt with the railroad track that continues from the outside of the building to transport the enchanted train (Photos 29 and 30). There were plastic containers of oil and gas located in the building (Photos 31–33). The gravel and dirt below were observed to be stained (Photo 34). From visual observation, it seems likely that the stains are from oil and gas spilling from the containers when used to perform routine maintenance on the enchanted train while inside the storage building.

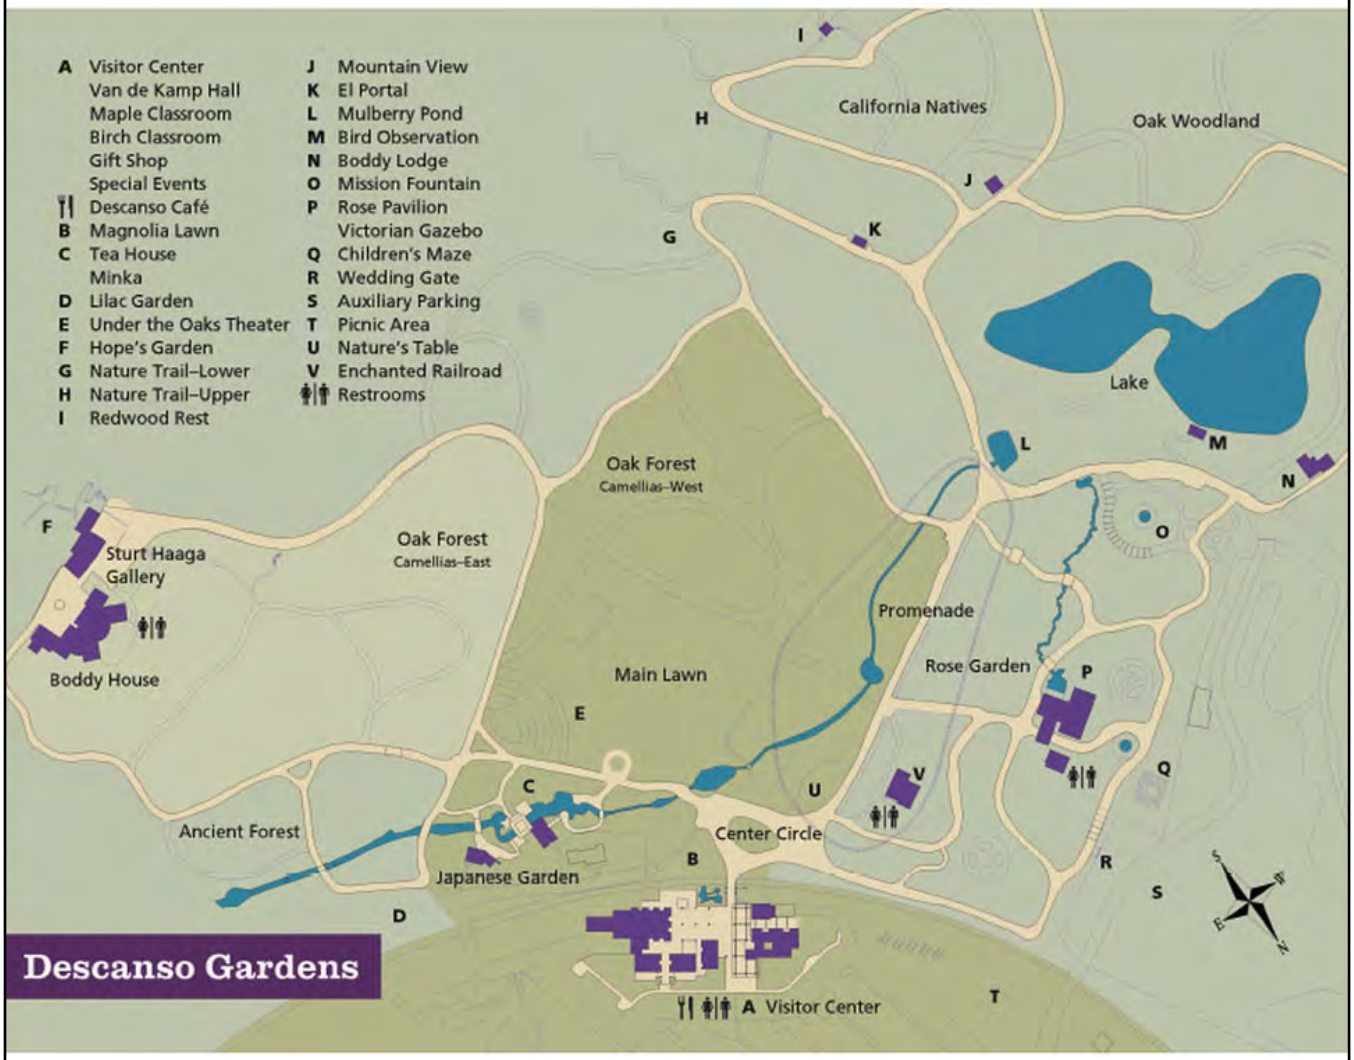

3.3.2 Enclosed and Fenced Storage Area in Rose Garden

There is a locked outdoor fenced area that is located directly adjacent to the Rose Garden's Restrooms/comfort station and Rose Pavilion (see Figure 3.3.1-1). An enclosed indoor area adjacent to the restrooms contained a water supply and drain in the floor. It houses cleaning supplies including buckets, hoses, and cleaning bottles (see Photo 35). The outdoor fenced area was observed to store various gardening items. Items included rakes, trowels, pots full of mulch and soil, and bags of soil. It is unclear within the soil within the pots contained fertilizer (Photo 36).

Since the February 2019 site visit, all fertilizer stored near the comfort station has been relocated to a shed in the Auxiliary Parking Lot that has been designated for fertilizer (see Appendix B, Photos 4–6).

3.3.3 Boddy Lodge

The Boddy Lodge is a single-story house located approximately at least 20 feet to the northeast of the manmade north lake in the Lake Area (see Figure 3.3.1-1). The Boddy Lodge walls consist of stained wood in good condition. The interior contains high vaulted ceilings (see Photos 37 and 38) with tile floors that were in average to poor condition, with some observed cracks and fragments (Photos 39–42). The tiles were observed to be cracking with small pieces of tile and dust evident from general observation. A previous asbestos survey was conducted on the interior of the house. A

Copyright Descanso Gardens 2018. Used with permission.

FIGURE 3.3.1-1

Descanso Gardens General Areas Map

large metal structure (approximately 3 × 3 × 3 feet), that seems to facilitate air circulation as perhaps a heating device, was bolted to the ceiling and wall. It seems to be in good condition with little risk of it falling off the ceiling (Photo 43). Descanso Gardens plans to remove this metal structure; it will not be replaced with anything else.

Staff mentioned that the structure was temporarily accessible to the public as a gift shop at night during the "Enchanted: Forest of Light" night tour from 5:30 p.m. to 9:00 p.m., during the winter months of November, December, and January. On February 19, 2019, the structure was mostly empty with no evidence of a gift shop or gift shop furniture or items was present. Staff mentioned that the structure is inaccessible to the public during normal operating hours due to a lack of potable water and electrical connection, while the Enchanted: Forest of Light is not in operation.

3.4 IDENTIFIED CHEMICALS

The use and storage of chemicals of concern at Descanso Gardens is characteristic of the materials used in routine operation and maintenance of regional parks or botanical gardens. Material Safety Data Sheets (MSDS) will be included in order to respond appropriately to any situations related to chemicals. The County is also required for herbicides and pesticides to be applied specifically by a licensed applicator. Twenty-seven COCs were recorded on the property. These include, but may not be limited to, the following:

- Diesel fuel
- Gasoline
- Propane
- N-Butane
- Benzene
- Toluene
- Methanol
- Petroleum base oil
- Aliphatic hydrocarbons
- Heptane
- Isopropyl alcohol
- 1,1 Difluoroethane
- Polydimethylsiloxane
- Tributylphosphate
- Tetrahydrofuran
- Methyl ethyl ketone
- Cyclohexanone
- Acetone
- Diethylene glycol monobutyl ether
- Didecyl dimethyl ammonium chloride
- Dimethyl benzyl ammonium chloride
- Lambda-cyhalothrin
- Imiprothrin
- Diethylene glycol monobutyl ether
- Isobutane
- Calcium hypochlorite
- Iron phosphate

Most items containing these chemicals were stored in locked enclosed areas such as cabinets or sheds. However, spills and staining were observed in some storage areas, which means that additional analysis is required prior to any ground-disturbing activity to determine if any remediation or worker safety requirements need to be undertaken in conjunction with construction and operation of proposed Master Plan facilities.

3.5 AREA-SPECIFIC OBSERVATIONS

Eight general areas of Descanso Gardens were identified (see Figure 3.3.1-1). All areas of Descanso Gardens contain unique characteristics. Field observations are listed in the following sections.

3.5.1 Entrance & Courtyard Area

The visitor entrance, gift shop and Center Circle area is located on the northeastern side of the property (see Figure 3.3.1-1). A large portion of this area is developed with mostly one-story post-1980 structures (i.e., the Gift Shop, Restaurant, and Restrooms) built of painted wood that are surrounded by pave-stoned courtyards (Photo 44) and concrete pedestrian pathways throughout this area. The remaining areas consist of well-manicured lawns, small flower gardens, and areas with mounds of mulch that contain vegetation that include trees and native plants. The Winery Creek Channel—a large concrete channel—runs through the Descanso Gardens property between the Main Parking Lot and Rose Garden/Auxiliary Parking Lot and separates the Entrance & Courtyard Area from the Center Circle (Photos 45 and 46). Mostly mulch with climate-appropriate and native vegetation and trees border the channel (Photo 47). It was observed that the mulch hangs over various areas of the channel, where some mulch material was observed at the bottom of the channel (Photo 48).

3.5.2 Main Lawn Area

The Main Lawn is located beyond the main entrance, towards the eastern center of Descanso Gardens (see Figure 3.3.1-1). The area consists of small hills of manicured, well-maintained lawns with areas of mulch containing native coast live oak trees and low-lying vegetation. A pave-stoned pedestrian path serves as the northeastern boundary of this area. The area is bisected in the northwestern corner by a shallow east-west running manmade stream, lined by cobblestones and various weathered sediments that have settled towards the bottom. The manmade stream originates from the manmade lake area to the west, hugs the rose garden area to the south, and runs towards the east, where it drains to the east into the Winery Creek Channel located along the northeastern border of the Descanso Gardens entrance area (see Photo 45).

3.5.3 Rose Garden Area

The Rose Garden is located on the northwestern area of the gardens, south of the Auxiliary Parking Lot (see Figure 3.3.1-1). This area is marked by a relatively flat topography with several winding paved pedestrian paths throughout surrounded by mulch with well-manicured plants and a permanent stream (see Photos 49–51). The area is bordered by the large channel along the northeastern border. The boundary of this area is fenced off, with a 6-foot-tall chain-linked fence to the west and south and wood panel fencing along the northern and eastern boundaries of this area. Two eastern and three southern gates were noted, allowing for public access to the area during regular operating hours. Two northern gates were also noted in the wood fenced area, to allow staff and wedding guest access to the area from the auxiliary parking lot. There is a large, mostly paved covered courtyard area called the "Rose Pavilion" as well as a gazebo called "Victorian Gazebo" in

the middle of this area. Restrooms were located adjacent with an outdoor locked fenced storage area, outside of the brick outhouse with a small indoor storage area (see Photo 36). It was noted that the fenced storage area consisted of gardening-related items such as gardening tools, bags of potting soil, trash bins, wheelbarrows, and pots (Photo 52). The area surrounding the fenced storage area was surrounded by manicured lawns leading to a pedestrian path and more roses with mulch.

3.5.4 Camellia Forest Area

Camellia Forest – Western Section. This area is located towards the center of Descanso Gardens (see Figure 3.3.1-1). It is largely undeveloped and consists of mainly native plants. Larger hills approximately 1 to 2 feet tall with steeper grading was noted throughout this area. Lots of soil, debris, and mulch-like material was noted throughout the area on the hills beneath the oaks (see Photos 53–56). The oaks are 20 feet tall or higher. Several unpaved winding pedestrian paths run throughout the area between the hills, beneath the oaks at various grades—from approximately 20 percent to 5 percent (Photo 57). During the February 12, 2019, visit, several drainage streams created from the rain were noted throughout the area bisecting many of the unpaved pedestrian paths. As the rain pressed downward, the braided stream pattern was noted in these drainages developing within the sediment of the unvegetated pedestrian paths. A large swale that is still partially paved with trees debris runs through this area (Photos 58).

Camellia Forest – Eastern Section (Camellias – East, Boddy House, Stuart Haaga Gallery). The area lies along the southeastern boundary of Descanso Gardens, and to the southeast of the Camellia Forest – Western Section and main lawn (see Figure 3.3.1-1). The area is steep to the east, with a large, more than 45 percent grade hill on the eastern side of this area (see Photo 59). At the bottom of the hill is a native oak forest with similar features as the Western Section of the Camellia Forest. Several unpaved, gentle-sloping pedestrian paths run throughout the forest between the trees at a variance of a 5 percent to 10 percent grade. Several stray sediments, plants, and vegetation debris were noted beneath the trees surrounding the paths (Photo 60). There are no other permanent streams observed in this low-lying area—only one concrete swale was noted here (Photo 61).

Two roads run towards the Boddy House and Sturt Haaga Gallery located at the top of the southeastern hill from the central areas of Descanso Gardens. One largely pedestrian road runs along the northern boundary of this area through the Camellia Forest. It grades sharply, approximately 15 percent to 30 percent towards the east and becomes shallower and flat towards the west at an approximate 5 percent to 10 percent grade. Towards the south, above and serving as a border for the low-lying Camellia Forest area, is a wider paved road for vehicular and pedestrian use. In the middle of the day, during observation, it was noted that traffic was moderate with a mix of mostly pedestrians and some golf carts transporting pedestrians, running along the road. The road gently grades at a no more than 5 percent grade (see Photo 62).

Two large structures are located at the top of the east hill in this area: Boddy House and Sturt Haaga Gallery (see Photo 63). Sturt Haaga Gallery is a newer one-story structure (a renovation of the historic Boddy House Garage) located along the bottom of a hill located towards the east that towers above the gallery. It contains an art gallery consisting of three rooms. The floors are polished tile. Restrooms are located inside the gallery. A well-manicured garden consisting mostly of drought-resistant plants is located outside of the gallery. Pavestone pathways lead to the gallery as well as to the steeper hill to the east. The pathways are surrounding by small, one-half-inch gravel stones around the garden. The Boddy House is a two-story colonial-style house with large columns and window panels (Photo 64). An interior inspection revealed waxed wooden floors and painted pressed-board walls within the living room and adjacent rooms in the central area. It was noted to be undergoing extensive

interior remodeling and renovation in two areas of interior at the time of survey in preparation for its display as the 2019 Pasadena Showcase House of Design. An adjacent room to the central living room was being decorated in preparation of an event or show in the coming week (Photos 65 and 66). The kitchen was undergoing extensive remodeling with appliances and wall fixtures being temporarily displaced during the February 2019 site visits.

3.5.5 Japanese Garden Area

The Japanese Garden area contains a pond filled with Koi fish; low, vegetated, rounded mounds; paved narrow pedestrian paths located between the mounds; wood bridges; and a large old wooden structure (formerly a teahouse) located at the center of this area (see Figure 3.3.1-1). A large locked storage area is present in the teahouse area where several chairs, tables, and other dining equipment are stored. Several pedestrians were observed walking along the narrow paths and over the bridges within this area. Leaves and debris were noted floating on the pond.

3.5.6 Ancient Forest Area

The Ancient Forest is a flat area located along the northeastern edge of Descanso Gardens (see Figure 3.3.1-1). The area consists of a large dirt area with planted trees throughout. A large deep channel borders the area to the north. One large paved path borders the area to the south and west. Another pedestrian dirt path bisects the forest (see Photo 67). An ungated wooden fence borders the planted tree area. There is no visible evidence of hazards or hazardous materials in this area.

3.5.7 Lake Area

The Lake Area includes two manmade reservoirs surrounded by rolling hills to the west, sloped shorelines to the east, and a wooden deck and the one-story Bird Observation Building to the east (see Figure 3.3.1-1). The hills to the west grade at approximately 10 percent to 25 percent and slope towards the east, with the slope increasing towards the west. Native trees and vegetation are located throughout the area, which includes the Oak Woodland garden (see Photo 68). Multiple unpaved pedestrian paths cut through this area at various grades. A large, partially paved path for pedestrians and vehicles borders the entire Lake Area. Many smaller and narrower paths were recently built cutting through the native vegetation along the southern side of the lake. During the first day of observation rainwater runoff through the canyon drainages were observed to originate from the large hills along the western border of the Descanso Gardens property.

Two structures hug the perimeter of the northern manmade lake. The Boddy Lodge is located approximately 100 feet away to the northeast of the North Lake. Lakeside Lookout is located a few feet off the North Lake margin to the east.

3.5.8 California Garden Area and Oak Woodland

The California Garden Area and Oak Woodland lie deep within the foot of the southwestern hills along the Descanso Gardens property boundary (see Figure 3.3.1-1). The area is generally steep grading from 10 percent to 25 percent towards the west. No structures exist within this area, except for a large chain link fence and gate along Descanso Gardens' western and southern developed gardens boundary. Several unpaved pedestrian paths cut through the area at various angles and grades (see Photos 69 and 70). The area is characterized by grasses, native vegetation, and native trees (Photo 71). Evidence of heavy erosion abounds throughout the foot of these western hills. Runoff drainages in the canyons cut through several of the unpaved pedestrian paths, leading to

erosion of the paths and sediment transport to the lake below to the east (Photo 72). Several pedestrians, as well as an occasional electric cart, was observed using the large paved path that cuts around the perimeter of this area, at the foot of the western hills, upgradient of the Lake. There is no visible evidence of hazards or hazardous materials in this area.

SECTION 4.0
SITE HISTORY

The following historical information was identified for the subject alignment and its adjacent properties.

4.1 HISTORICAL RESOURCE EVALUATION

Descanso Gardens has been nominated for listing in the National Register of Historic Places as a historic district for its association with Elias Manchester Boddy and plant collections. As stated in a 2019 Historical Resource Evaluation for Descanso Gardens, the Master Plan area was once part of Rancho San Rafael and utilized for cattle and horse ranching from the 1780s to 1935.[10] Mr. Boddy purchased Rancho del Descanso from 1935 to 1937, clearing the native chaparral and oak woodland plant communities to raise cattle in 1935 and planting various plants and flowers on the property in 1936. The remaining native oak woodlands and chaparral plant communities on the property were retained to support a camellia plantation and azaleas in the acidic soil under the oak trees. The Boddy House Complex, comprising a 9,877-square-foot two-story single-family residence and six-car garage in the southeastern portion of the property, was originally constructed in 1938. The camellia plantation under the coast live oak trees in the center and eastern portion of the property was installed in the 1940s. An Old Rose Garden was created on the property in 1948. The 600-square-foot Boddy Lodge located north of the north lake near the northwestern portion of the property was constructed circa 1949. The 1,421-square-foot Ranch-style residence to the north of the Japanese Garden was constructed by 1951. The County purchased the 149-acre property in 1952. The Main Lawn where the Garden House Lodge once existed was utilized starting in the 1950s and 1960s. The Japanese Garden, including the tea house, opened in 1966, and the Minka House and Japanese Garden Bridge were added in 1969. The Bird Observation Station near the north lake was constructed in 1968. The City of La Canada Flintridge was incorporated in 1976. The waterfall leading from the north lake was constructed in 1980, and the Mulberry Pond downstream from the waterfall was redesigned in 2000. In addition to the landscaping surrounding the Boddy House, Camellia Forest, Oak Grove, Main Lawn, and Mulberry Pond, there are currently seven developed gardens at Descanso Gardens:

- **Rose Garden** (originally opened in 1940s and served as the original entrance to Descanso Gardens in the 1950s; most recent redesign opened in 1994)
- **Japanese Garden** (1966)
- **Lilac Garden** (1953)
- **California Garden** (1959)
- **Center Circle** (rotating display garden started in mid-1990s)
- **Oak Woodland** (2014; previously used for green waste disposal)
- **Ancient Forest** (2015, after Descanso Gardens adopted non-pesticide-based approach to pest management)

[10] County of Los Angeles Department of Parks and Recreation. April 2019. *Historical Resource Evaluation for Descanso Gardens.* Prepared by Sapphos Environmental, Inc.

4.2 HISTORICAL U.S. GEOLOGICAL SURVEY TOPOGRAPHIC MAPS

Historical USGS topographic maps of the Master Plan area and adjacent properties were reviewed for the years 1894, 1896, 1900, 1928, 1933, 1934, 1939, 1953, 1966, 1972, 1988, 1995, and 2012 (Appendix C, *Historical Topographic Maps*).[11] The review of these topographic maps indicates that the site has gone through developmental changes over time, as described below. The topographic relief of the Master Plan area is 336 feet, with the elevation ranging from 1,605 feet to 1,269 feet AMSL.

1894, 1896, 1900

A review of these maps indicates no urban development within the property, which was part of a ranch. Little to no urban development was observed within the surrounding areas, with a sparse road network between ranches and farms around approximately 53 houses in 1893 in the current City of La Canada Flintridge.[12] From 1894 to 1900, the only development in the Master Plan area consisted of a road that provided access to the middle of the property from the north.

1928, 1933, 1934, 1939

A review of these maps indicates no significant physical changes were observable within the property and directly surrounding the property. Regionally, progressive urbanization of the current unincorporated community of La Crescenta-Montrose to the northwest of the property and residential development within the current City of La Canada Flintridge to the north and east of the property has occurred. The side streets along Montrose Avenue between Verdugo Boulevard and Foothill Boulevard have been developed. Between 1900 and 1928, the SCE power line has been developed across the eastern portion of the Master Plan area. By 1939, Descanso Drive was developed along the northern edge of the Master Plan area, and Michigan Avenue was renamed Foothill Boulevard.

1953

A review of these maps indicates progressive urbanization of the City of La Canada Flintridge to the northeast of the property. The side streets along Foothill Boulevard to the north of Descanso Drive have been developed. Auto repair shops and gasoline stations are more apparent. These sites may impact the Master Plan area as they likely contain USTs. Within the Master Plan area, the Boddy House, a lake providing water storage from Hall Beckley Canyon, and a road network in the northeastern portion of the property have been developed.

1966

A review of these maps indicates progressive urbanization of the City of La Canada Flintridge to the northeast of the property. The side streets along Chevy Chase Drive to the south of Foothill Boulevard have been developed. More gasoline stations as well as dry cleaners are apparent in these progressively urbanized regions, which may potentially affect the Master Plan area. A fence has been developed separating the developed and undeveloped portions of the Descanso Gardens property, the existing structures north of the Boddy Lodge and west of the auxiliary parking lot have been

[11] Environmental Data Resources, Inc. January 8, 2018. The EDR Historical Topographic Map Report. Inquiry Number 5153450.4.

[12] County of Los Angeles Department of Parks and Recreation. April 2019. *Historical Resource Evaluation for Descanso Gardens.* Prepared by Sapphos Environmental, Inc.

developed, the lake has been separated in to a north lake and a south lake, the gardens southeast of the lakes have been developed, Winery Canyon Channel has been developed, the paved roads on the property have been expanded around the developed gardens, and an unpaved road has been developed along the northwestern and southwestern edges of the Descanso Gardens property. Single-family residences have been developed immediately northwest of the Master Plan area.

1972, 1988, 1995, 2012

A review of these maps shows no significant observable physical changes within the property and directly surrounding the property. Regionally, further urbanization of this area to the northwest has occurred. In 1972, the map shows the intersection of the Glendale Freeway (State Route 2) and the Foothill Freeway (Interstate 210) has already been built. Between 1966 and 1988, Verdugo Hills Hospital was developed to the northwest of the Master Plan area. In 1988, the Glendale and Foothill freeways appear more prominently as construction is complete. These streets now appear in their present-day form.

4.3 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the subject alignment and adjacent properties were reviewed for the years 1928, 1938, 1948, 1952, 1954, 1964, 1970, 1972, 1981, 1994, 2002, 2005, 2009, 2012, and 2016 (Appendix D, *Historical Aerial Photographs*).[13]

1928

The native oak woodland has been retained in the eastern portion of the Master Plan area, which has been developed as agricultural lands to the northeast. The slopes on the western and southern portions of the Master Plan area have retained a dense vegetative character except for two locations: an unpaved road leading from the southwestern edge of the Master Plan area northeast towards the agricultural land and the SCE power line corridor running north-south through the Master Plan area to the west of the existing Boddy House (not yet constructed).

1938

The Boddy House Complex has been developed in the southeastern corner of the Master Plan area, and a ridgeline road has been developed along the southern and western edges of the Master Plan area.

1948, 1952, 1954

A lake has been developed to store water delivered from Hall Beckley Canyon, and the gardens have been developed around the lake to the northwest of the retained native oak woodland. Winery Creek Channel has been developed, and the portion of the Master Plan area to the northwest of the Winery Creek Channel retains an agricultural land use pattern.

[13] Environmental Data Resources, Inc. January 8, 2018. The EDR Aerial Photo Decade Package. Inquiry Number 5153450.4.

1964

The current Main Parking Lot in the northeastern portion of the property and Auxiliary Parking Lot in the northern portion of the property have been developed to facilitate visitor access to the County-owned botanical garden. The Main Parking Lot has been developed over the prior agricultural land in the northeastern portion of the Master Plan area. The Natives Garden has been developed.

1970, 1972, 1981, 1994, 2002, 2005

The lake providing water storage for the Master Plan area has been expanded into two lakes. An unpaved road has been installed from the southwestern ridgeline road towards the northern lake.

2009, 2012, 2016

Between 2005 and 2009, a ridgeline trail was developed from Descanso Drive along the northwestern border of the Master Plan area west towards the unpaved western ridgeline road along the western border of the Master Plan area. No other major development within the area has occurred.

4.4 HISTORICAL SANBORN FIRE INSURANCE MAPS

Historical Sanborn Fire Insurance Maps of the Master Plan area and adjacent properties are not available for the Descanso Gardens property (Appendix E, *Historical Sanborn Fire Insurance Maps*).[14]

4.5 USER QUESTIONNAIRE

During this investigation, a request for information pertaining to the questions, *User Questionnaire*, of ASTM Standard E 1527-13, was not sent to owners/users along the subject alignment.

[14] Environmental Data Resources, Inc. January 9, 2018. Certified Sanborn® Map Report. Inquiry Number 5153450.4.

SECTION 5.0
ENVIRONMENTAL SETTING

5.1 TOPOGRAPHY

The Master Plan area is in the City of La Canada Flintridge. La Canada Flintridge is located in the east end of the Crescenta Valley, a medium-sized northwest-southeast trending basin, nestled between the San Gabriel Mountains (peak elevations in the area rise above 4,000 feet AMSL to the north and the San Rafael Hills (highest elevation 1,788 feet AMSL) to the south and southwest. The San Rafael Hills and the San Gabriel Mountains in the Angeles National Forest provide a dramatic panoramic backdrop for the City to the north, while the north face of the San Rafael Hills frames the City's southern border.

The Crescenta Valley is bounded by the San Gabriel Mountains to the north and northeast, the Angeles National Forest to the north, the San Rafael Hills to the south-southwest, and the Verdugo Mountains to the west. The Crescenta Valley opens to the San Fernando Valley at the northwest corner and to the San Gabriel Valley at the southeast corner. The San Gabriel Mountains and Angeles National Forest border the north and do provide a dramatic panoramic backdrop for Descanso Gardens visitors. The north face of the San Rafael Hills frames the Master Plan area's southern border, gradually increasing the relief of the Gardens as the Descanso Gardens property lines the northern portion of the San Rafael Hills. The Master Plan area is regionally shaped in a concave slope, sloping from west to east. Elevations range from 1,605 feet AMSL near the Descanso Motorway Trail to 1,269 feet AMSL at the front entrance and the visitor parking lot and entrance of the Descanso Gardens.

5.2 REGIONAL GEOLOGY

The site is located on the bedrock highlands at the vicinity of the San Rafael Hills, which lies east of the Winery Canyon. The San Rafael Hills are primarily composed of Mesozoic quartz diorite bedrock, which is non–water bearing. The texture is medium-grained and the structure is massive. The rock is typically light grey to light brown. The bedrock is highly fractured and generally deeply weathered, making it friable near the surface. The contact between the friable bedrock and underlying massive bedrock is gradational. Subsurface materials encountered at the site consist predominantly of diorite bedrock. The weathered diorite bedrock is present from ground surface to approximately 40 feet below ground surface (BGS). Below 40 feet, the bedrock is reportedly less friable and more indurated. The massive bedrock extends to at least 62 feet BGS, the deepest depth drilled to date. This bedrock is part of the Southern California batholith complex, and its total thickness is extensive and traverses the entire basin.

The Crescenta Valley is a small inland valley in Los Angeles County that lies within the Transverse Ranges geomorphic province, a region of east-west trending mountain ranges that formed as a result of compressive stress at a restraining bend in the San Andreas Fault. These mountain ranges continue to rise through folding and faulting of rocks being compressed between the North American and Pacific tectonic plates. As the mountains rise, landslides and erosion break down the rocks and transport the resulting sediment, or alluvium, to the Crescenta Valley. Over time, hundreds of meters of alluvium have been deposited in the Crescenta Valley. The continuing process of folding and faulting result in frequent earthquakes in the region.

La Canada Flintridge is in a seismically active region. Large earthquakes have occurred in the vicinity and will occur again in the future. Estimates by the Southern California Earthquake Center indicate a

35 percent probability of a magnitude 7 event in the next 30 years. The City does not contain any faults recognized as active by the State of California and zoned under the Alquist Priolo Earthquake Fault Zoning Act. The Sierra Madre fault zone may have a substantial level of hazard.[15]

Liquefaction is not a likely in this area, even during the most severe seismic activities. However, some minor erosion or landsliding may occur during and after severe seismic events.

5.3 HYDROGEOLOGY

Surface water in the Crescenta Valley drains out of the Valley through the Arroyo Seco and eventually into the Los Angeles River. The Los Angeles River flows from the southwest side of the Crescenta Valley through the Los Angeles Coastal Plain to San Pedro Bay. The Los Angeles River, as well as two of its tributaries—including the Winery Canyon Channel and the Flint Canyon Channel leading into the Arroyo Seco—have been channelized and lined with concrete throughout most of its course to minimize flooding. Within the Sepulveda Flood Control Basin, the floor of the channel is unlined, which allows percolation of water from the channel into the ground. Numerous tributaries, most of which have intermittent flow, discharge into the Los Angeles River. These include Arroyo Calabasas, Bell Creek, Aliso Wash, Browns Canyon Wash, Chatsworth Creek, Pacoima Wash, Tujunga Wash, and Verdugo Wash. These washes and creeks are mostly lined with concrete in the urban areas.

The water-bearing sediments within the Basin consist of the lower Pleistocene Saugus Formation, Pleistocene and Holocene age alluvium. Groundwater flow in the Crescenta Valley and San Fernando Valley generally flows eastward, which mimics surface water flow along the Los Angeles River in this area. The highly nonuniform character of the soils in the Crescenta Valley and San Fernando Valley results in local "perched" aquifers that do not communicate with deeper groundwater.

The water infrastructure at Descanso includes the Ranch Water (Hall Beckley Canyon), which is used to supply the lake and streams, and the Valley Water, which supplies the potable water sources for gardens, kitchens, bathrooms, and drinking fountains as well as irrigation to supplement Hall Beckley Canyon. The San Rafael Foothills to the south are a source for rain runoff proportional to the rate of rainfall into the Descanso Gardens property. The lake collects some stormwater and rainfall, and the rest of the site water runs off into the Winery Channel especially during events of heavy precipitation. Wastewater on site is largely managed by septic systems.

5.4 SOILS

The Saugas Formation consists of marine deposits of conglomerates, sands, silts, and clays. Holocene age alluvium consists of coarse unsorted gravel and sand, with clay content ranging from 20 to 70 percent. Pleistocene age alluvium consists mainly of highly permeable coarse-grained alluvial fan deposits interspersed with less permeable paleosols.

The youngest and most widely exposed alluvial units near the Descanso Gardens consists of the Holocene channel and floodplain deposits derived from San Rafael Hills. The Master Plan area is predominantly underlain by very thick sandy and clay loams on alluvial fan deposits of Holocene age (less than 11,000 years old). Alluvial composition is extremely coarse-grained, granular

[15] City of La Canada Flintridge. 2013. *2013 General Plan. Safety Element*. Available at: https://docs.google.com/a/lcf.ca.gov/viewer?a=v&pid=sites&srcid=bGNmLmNhLmdvdnxjaXR5LW9mLWxhLWNhbmFkYS1mbGludHJpZGdlLXNpdGV8Z3g6M2IzMGJjOWZhY2E2N2YxMQ

materials. In the southern portion of the San Rafael Hills, the deposit consists primarily of silty and clayey sand with interbedded clay. The density of these deposits is loose to medium dense.

The City is situated on soils assigned to the Hanford and Vista-Amargosa soil associations that consist of loam and sandy loam soils that are well drained, with slow runoff, slight erosion hazard, and moderate subsoil permeability. The soils upon which the City is situated pose potential hazards including erosion and topsoil loss due to wind and rainfall and slope instability resulting from development.

5.5 METEOROLOGY

In the Crescenta Valley and vicinity, the southeasterly or northern winds prevail for a significant portion of the year. Similar to other areas of the Los Angeles basin, the two most climatic influences are the onshore marine layer from the Pacific and the offshore Santa Ana Canyon winds. The area experiences a persistent temperature inversion (increasing air temperature with increasing altitude) because of the Pacific high. Like other areas of the Los Angeles basin, the two most climatic influences are the onshore marine layer from the Pacific and the offshore Santa Ana Canyon winds. The area experiences a persistent temperature inversion because of the Pacific high that occurs over this topographic basin. Meteorological data from a weather station located in La Crescenta has indicated that the average high of 90 degrees Fahrenheit occurs during the summer months and a low of 32 degrees Fahrenheit occurs during the winter months. Very little rainfall or no rainfall at all occurs during the summer months. Rainfall typically occurs from October through April, providing an average annual rainfall of 9.5 inches of rain.[16]

[16] Western Regional Climate Center. n.d. La Crescenta climate data. Available at: https://wrcc.dri.edu/cgi-bin/cliMAIN.pl?ca4628. Accessed May 23, 2019.

SECTION 6.0
RECORDS REVIEW

6.1 FEDERAL, STATE, LOCAL, AND TRIBAL ENVIRONMENTAL REGULATORY DATABASES

The services of Environmental Data Resources, Inc. (EDR) were retained to search applicable regulatory agency lists and standard environmental record sources to identify locations of potential concern within the ASTM Standard Practice E 1527-13 (Standard) minimum search distances. The report includes two maps, one with concentric ellipses indicating the search distances of 0.25, 0.5, and 1 mile from the center of the project alignment, and the other with search distances of 0.125, 0.25, and 0.5 mile from the center of the project alignment. The EDR package included certified Sanborn Fire Insurance Maps, historical aerial photographs, historical topographic maps, high-risk historical records, and recovered government archives.

A previous site analysis conducted for the property was also reviewed and considered, including the asbestos survey for the 2004 Los Angeles County Parks and Strategic Asset Management Plan and an EDR Hazardous Sites records search providing substantial evidence for the Rehabilitation and Adaptive Reuse of the Boddy House Garage project (now the Sturt Haaga Gallery) federal, state, local, and tribal databases that were searched by EDR. A detailed description of each record is documented, including location, source of information, scope of REC, and status of any related remediation or clean-up efforts. The 2009 environmental evaluation of the proposed Rehabilitation and Adaptive Reuse of the Boddy House Garage project (now the Sturt Haaga Gallery) determined in a Categorical Exemption document that there would be no impacts regarding hazards and hazardous materials as a result of this project on the Descanso Gardens property. No known hazardous waste sites were identified within 1 mile of the project site for the Sturt Haaga Gallery in 2003; this 1-mile records search covered the one-quarter-mile radius around the Descanso Gardens property (Master Plan area).[17]

Appendix F, *Environmental Regulatory Databases*,[18] presents a listing of the federal, state, local, and tribal databases that were searched by EDR and the number of sites that were identified at various distances. A detailed description of the records is provided in the EDR report. The search identified 989 records of sites within the ASTM-prescribed minimum search distances that were mapped. It should be noted that many of the sites are listed in multiple databases.

The EDR report identified many historical auto and historical dry cleaner sites. Consideration of contamination for properties within a one-quarter-mile radius of the site is required pursuant to CEQA. There are no sites on the property which are within the one-quarter-mile radius as shown in the EDR Radius Map Executive Summary.

A review of the EDR package indicated RECs would not constrain the development of the Master Plan area. There are a variety of RECs that were registered in the various environmental databases that were searched by EDR (Table 6.1-1, *Recognized Environmental Concerns*). A search of the respective environmental databases identified only one historic auto site within the one-quarter- to one-eighth-mile search radius, with no manufactured gas plant (MGP) and dry cleaner sites. It should be noted that many of the sites are listed in multiple databases. The RECs include auto fuels, lab

[17] Environmental Data Resources. October 25, 2007. The EDR Radius Map with GeoCheck. Inquiry Number Inquiry 2059897.1s Boddy House at Descanso Gardens, 1418 Descanso Drive, La Canada-Flintridge, CA 91011.

[18] Environmental Data Resources, Inc. January 8, 2018. The EDR Radius Map. Inquiry Number 5153450.4.

waste, chemical waste, inorganic solid waste, pesticide/herbicide and asbestos. However, the review indicated that there were no active remediation sites within a one-quarter-mile radius of the project site and the distance of the sites identified in Table 6.1-1 would ensure that any historic contamination from these sites would not impact the Master Plan area. Several residences that generated asbestos containing waste were recorded on the HAZNET database within the 0.25-mile radius, but they were not included in Table 6.1-1 as they would not constrain the development of the Master Plan area.

TABLE 6.1-1
RECOGNIZED ENVIRONMENTAL CONCERNS

Address	Site	Distance	Database	REC	REC Impact
1418 Descanso Drive	Descanso Gardens	< 1/8 mile	CHMIRS, FINDS, HAZNET	Unknown chemical discharged to storm drain, inorganic solid waste, lab waste chemicals, pesticide/herbicide, oil waste, asbestos, household waste, aqueous solution.	Not significant
1510 Verdugo Blvd	SCE Substation	< 1/8 mile	HAZNET	PCB	Not significant
1812 Verdugo Blvd	Verdugo Hills Hospital	< 1/8 mile	RCRA-SQG, FINDS, CHIMRS, HAZNET	UST, diesel fuel, lab waste chemicals, hospital waste	Not significant
1975 Verdugo Blvd	Texaco Gas Station	1/8–1/4 mile	FINDS, UST, RCRA, HAZNET, UST, CHMIRS	Auto fuels	Not significant
1919 Verdugo Blvd	Foothill Chevrolet (now United Artists La Canada 8)	1/8–1/4 mile	FINDS, HIST UST, RCRA-SQG, HAZNET, UST	Auto fuels	Not significant

KEY: CHMIRS = California Hazardous Material Incident Reporting System; FINDS = Facility Index System; HAZNET = Hazardous Waste Information System Database; RCRA = Resource Conservation and Recovery Act; HIST UST = Hazardous Substance Storage Container Database; PCB = polychlorinated biphenyl.

An inspection for lead-based paints (LBPs) and ACMs was not included in this assessment. However, LBPs and ACMs may occur in pre-1970s buildings in the Master Plan area. Both LBPs and ACMs can be removed safely using standard removal protocols that would not constrain the development of the Master Plan area.

Although Descanso Gardens has phased out use of pesticides/herbicides starting in 2014, pesticide/herbicide residues may be present in the soil. Prior to the initiation of construction activities, surface and near-surface soil samples should be collected in excavation areas and analyzed for pesticide/herbicides. Although this is not anticipated to result in worker health and safety concerns, if pesticide/herbicides are detected, soil handling and disposal options would need to be evaluated. Pesticide/herbicide containing soil can be removed safely using standard removal protocols that would not constrain the development of the Master Plan area.

Until 1991 in California and 1996 in the rest of the United States, gasoline and other fuels contained lead as an additive.[19] Vehicle exhaust emissions containing lead were deposited adjacent to freeways and roadways as ADL. As the western periphery of the Master Plan area is located within 250 feet of the Glendale Freeway, there is the potential for ADL-contaminated soils in this area. Exposed soils that would be disturbed by project activities would be tested and ADL would be addressed using standard protocols that would not constrain the development of the Master Plan area.

SECTION 7.0
FINDINGS AND CONCLUSIONS

7.1 FINDINGS

Based on the ASTM E 1527-13 Standard definition of a REC, the following RECs were identified in relation to the Master Plan area:

Polychlorinated Biphenyls: During the site visit, it was noted that there were transformers located along the paved pathway along the hill leading to the Boddy House in the eastern portion of the Camellia Forest. Transformers installed prior to 1980 would have the potential to contain polychlorinated biphenyls (PCBs), fluorescent or mercury lamps, mercury timers, switches, and sensors, and/or other waste regulated by the California Department of Toxic Substances Control (DTSC). Disturbance of transformers or soil in and around this area would necessitate additional soil investigation and possibly remediation.

Volatile Organic Compounds: No USTs were observed to be present on site. However, several storage areas—both indoor and outdoor—contained 1- to 5-gallon metal containers of various fuels. Propane and Gasoline at 91 and 87 octanes were noted to be stored in metal containers. The Enchanted Railroad Building interior had old stained soil underneath, which smelled of fuel and likely contains contaminants that penetrated the soil. The southeastern side of the Auxiliary Parking lot, outside of the Rose Gardens, harbored stored fuel in metal cabinets stored outside on unpaved areas filled with mulch. Contaminated water was observed around the fuel storage containers inside the cabinet. It is hard to tell with mulch, but it is likely that the contaminated water penetrated the ground below. Disturbance of soil in and around this area would necessitate additional soil investigation and possibly remediation.

LBP: Inspection for LBPs was not included in this assessment. LBPs may occur in the older buildings. The Boddy Lodge was observed to have chipping paint at the entrance. The Boddy House was undergoing interior renovations in the kitchen area for the 2019 Pasadena Showcase House during the site visits where old wall fixtures and appliances were being removed or replaced. Many walls seemed to have already been upgraded to core board, but many areas of the house still contain lead-painted surfaces which are likely to be disturbed during renovations. Disturbance of property around this area would necessitate additional investigation and possibly remediation.

Pesticides: Dichlorodiphenyltrichloroethane may be present at the site as Descanso Gardens was growing camellias since 1942, prior to its widespread use. Given that the Master Plan area was historically employed for agricultural purposes since then, pesticide residues may be present in the soil. Prior to the initiation of construction activities, surface and near-surface soil samples should be collected in excavation areas and analyzed for pesticides. Although this is not anticipated to result in worker health and safety concerns, if pesticides are detected, soil handling and disposal options would need to be evaluated throughout Descanso Gardens. Among other insecticides and herbicides, triple-16 (similar to Round Up), was used many years ago. Rose Garden maintenance staff indicate that hazardous chemicals are not presently in use. Disturbance of soil in and around this area would necessitate additional soil investigation and possibly remediation.

Fertilizers: Only recycled mulch from vegetation clippings from the gardens are used and dug down at least 1 to 2 feet BGS, according to a native horticulturalist at Descanso Gardens. "Back to Nature" All-Natural Fertilizer was observed to be the only store-bought fertilizer stored presently at Descanso

Gardens. It contains all-natural ingredients, directly derived from plant and animal matter, which include, but are not limited to, tea leaves, crushed egg shells, coffee grounds, orange peels, banana peels, chicken manure, newspaper, cardboard paper, lawn and tree clippings, horse manure, seaweed, and worm castings. Large disturbances of any soil in areas that previously were subject to fertilizer use would necessitate additional soil investigation and possibly remediation.

Asbestos: Inspection for ACMs was not included in this assessment. However, asbestos may occur in older buildings along the alignment. The Boddy Lodge was observed to contain older, historical cracked vinyl floor tile, as previously observed and cited in an ACM survey conducted on October 13, 2003. Descanso staff mentioned that an asbestos survey was conducted at the Boddy Lodge at least 10 years ago. The Boddy House was undergoing extensive interior renovation in the Kitchen for the 2019 Pasadena Showcase House during the site visits. Large pipes within the walls are being pulled out during the renovation activities. Disturbance of property that was identified as possibly containing ACM would necessitate additional investigation and possibly remediation.

Aerially deposited lead (ADL): Until 1991 in California and 1996 in the rest of the United States, gasoline and other fuels contained lead as an additive. Vehicle exhaust emissions containing lead were deposited adjacent to roadways. Generally, ADL is found within 30 feet of the edge of the pavement and in the top 2 feet of soil. In some cases, lead exists in the subsurface to a depth of 5 feet BGS. Exposed soils will be disturbed by project activities. ADL may be a problem in the parking area and within a surrounding 30-foot radius. Vehicles on-site are not likely using lead-based fuels. Disturbance of property that was identified as possibly containing LBP and soils in areas that served as parking/travel areas for gas-powered vehicles prior to the statewide ban on leaded gasoline would necessitate additional investigation and possibly remediation.

7.2 CONCLUSIONS

This Phase I ESA has been conducted in conformance with the scope and limitations of ASTM Standard E 1527-05.

Prior to ground-disturbing activities in identified Master Plan areas that may be affected by COCs, further testing of the appropriate COCs (e.g., PCBs, gasoline and diesel fuel, lead, Dichlorodiphenyltrichloroethane, and asbestos) is recommended. Areas outside of the Boddy Lodge and Boddy House should be tested, and ADL should be addressed in a Lead Compliance Plan. Areas that are dug up for planting in the northeastern portion of the gardens need to be tested for pesticides. Maintenance areas of the staff carts and Enchanted Gardens Railroad need to be tested and assessed for petroleum hydrocarbons and chlorinated solvents leached to the subsurface. The soil around the transformers in the East Camellia Forest area should be tested to confirm there is no PCB contamination from older transformers that might have been used. Soil testing at the currently existing areas throughout the Descanso Gardens Master Plan area is recommended if soil adjacent is to be disturbed. The above tests are necessary, given the large evidence of erosion and transport of surface material throughout the Descanso Gardens Master Plan area towards the Winery Canyon Channel, where water is transported offsite, potentially impacting water and soil downstream into the surrounding communities.

If there is to be demolition or alteration of existing structures and buildings that are old enough to contain LBP and/or asbestos, but with no documentation of prior testing or remediation, LBP and/or ACM testing would need to be completed prior to alteration or demolition. Preventative measures should be implemented. Items containing hazardous chemicals should be stored in new sheds and not cabinets. All stockpiles should be covered at all times when not in use. Areas that may contain

potentially harmful substances should not be accessible to the public, and investigation and remediation measures should be implemented. Areas of renovation and disturbance of materials and soil in and around older properties should implement safety measures as set forth by the California Occupational Safety and Health Administration (CalOSHA). A human-health risk assessment may be warranted if, as a result of soil testing in areas that will be subject to ground-disturbing activities as outlined in the forthcoming Master Plan, there is possible risk or hazard to human health. A human health risk assessment provides a plan for further evaluation to be conducted for the Master Plan areas that are open to staff or public access to ensure the protection of the health and safety of all. However, at this time, it seems unlikely that a human health risk assessment or a voluntary clean up under the auspices of the DTSC is warranted.

REPORT AUTHORSHIP

This Phase I ESA report was prepared by:

Mary Arias, California Licensed Professional Geologist #8109
Senior Environmental Compliance Specialist
Sapphos Environmental, Inc.
430 North Halstead Street
Pasadena, California 91107

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professionals as defined in §312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mary Arias, PG
Senior Environmental Compliance Specialist

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Sapphos Environmental, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Pasadena, CA 91107
Contact: Laura Male

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Sapphos Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # F658-4E2A-BAA8

PO # NA

Project 1698-004

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: F658-4E2A-BAA8

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Sapphos Environmental, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/17/2018 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 7 RCRA-LQG sites within approximately 1 mile of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 28 RCRA-SQG sites within approximately 1 mile of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/30/2018 has revealed that there are 4 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 8 CA CPS-SLIC sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 16 CA UST sites within approximately 1 mile of the target property.

US CDL: A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

A review of the US CDL list, as provided by EDR, and dated 09/21/2018 has revealed that there is 1 US CDL site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 18 CA SWEEPS UST sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that

there are 3 RCRA NonGen / NLR sites within approximately 1 mile of the target property.

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 08/01/2018 has revealed that there is 1 RMP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/07/2018 has revealed that there are 113 FINDS sites within approximately 1 mile of the target property.

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there are 30 CA DRYCLEANERS sites within approximately 1 mile of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2016 has revealed that there are 357 CA HAZNET sites within approximately 1 mile of the target property.

CA WDR: In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

A review of the CA WDR list, as provided by EDR, and dated 09/10/2018 has revealed that there are 4 CA WDR sites within approximately 1 mile of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 07/23/2018 has revealed that there are 2 CA CERS sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 84 EDR Hist Auto sites within approximately 1 mile of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 64 EDR Hist

EXECUTIVE SUMMARY

Cleaner sites within approximately 1 mile of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 36 CA RGA LUST sites within approximately 1 mile of the target property.

FINDS:

Registry ID: 110002871429

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Fatals:	Not reported
Comments:	Not reported
Description:	Overflow from a day tank, emergency tank, at a hospital. Empties into the Verdugo Channel that flows to the LA River.

FINDS:

Registry ID: 110002657866

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CVS PHARMACY #9647 (Continued) **1001217319**

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

FINDS:

Registry ID: 110002844281

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002762564

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002768773

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter:	No

. Waste code:	D001
. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

CONOCO PHILLIPS #251113 (Continued) **1014386795**

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018

FINDS:

Registry ID: 110002716507

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Status: No violations found

FINDS:

Registry ID: 110002720182

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002870126

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 04/21/1992
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State Contractor/Grantee

FINDS:

Registry ID: 110002745147

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002855508

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

HONOLULU CLEANERS (Continued) **1000595874**

corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

RITE AID NO 5529 (Continued) **1016955184**

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002707009

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002887485

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/13/2018

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	1292 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5636829 PASADENA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

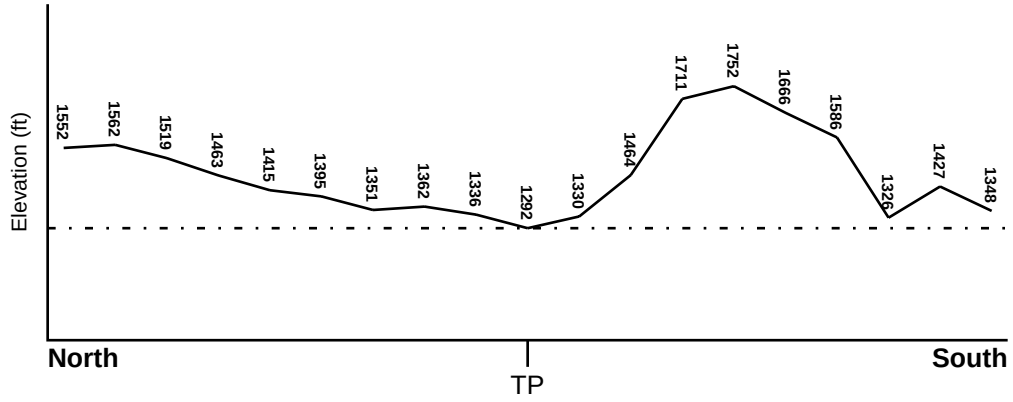

TOPOGRAPHIC INFORMATION

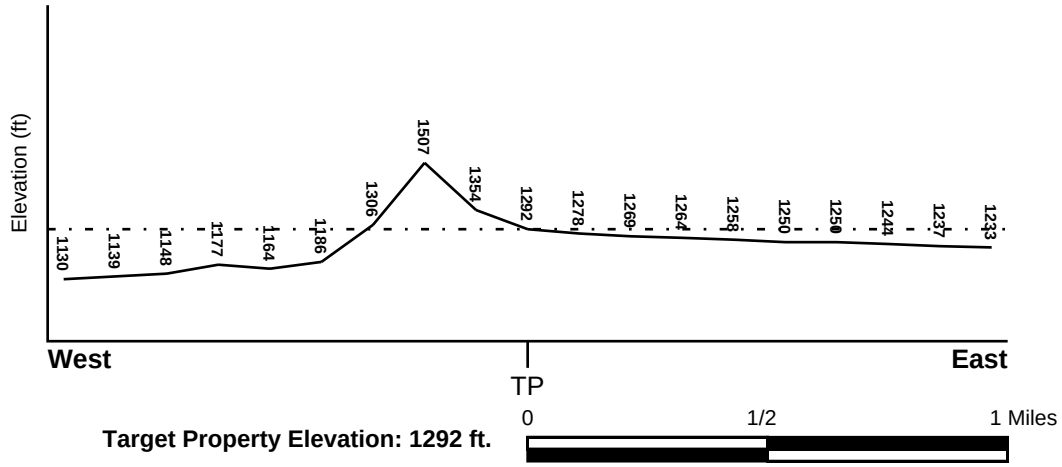

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1292 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1375F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PASADENA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Precambrian	Category:	Metamorphic Rocks
System:	Precambrian		
Series:	Orthogneiss and paragneiss		
Code:	Xm *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
