PROBATION
DEPARTMENT

Los Angeles County Probation COVID-19 Weekly Update June 12, 2020

Juvenile Division

Testing of Youth for COVID-19

All youth in Probation juvenile facilities have been tested for COVID-19 by Probation and Juvenile Court Health Services (JCHS). Except for those youth who tested positive during the admission process, all youth have tested negative.

From June 5-June 12, 53 youth were tested for COVID-19. Out of the 786 tests administered in juvenile facilities since the pandemic began, no youth already inside a juvenile facility has tested positive for COVID-19. Of the 16 youth who have tested positive for COVID-19 (two in the past week), all are from among the population of youth who were entering juvenile hall. Three youth at Central Juvenile Hall remains in isolation due to a positive test. Youth testing positive have not been exposed to the facility's general population until cleared by JCHS after a period of isolation and all youth in juvenile facilities are provided with masks.

This expanded testing is part of a robust testing regimen throughout Probation juvenile facilities by the Los Angeles County Probation Department and Juvenile Court Health Services (JCHS). Besides testing youth displaying possible COVID-19 symptoms, all youth who are entering and departing juvenile hall are tested for COVID-19. With this testing taking place, camp movement has resumed, pending a youth's negative test.

Care of Youth Testing Positive for COVID-19

Youth who have tested positive will be housed in a designated isolation unit. In the event that a youth from camp tests positive, they will remain in juvenile hall and be assigned to one of the designated units. The positive testing youth will be kept separate and apart

from other youth until cleared by medical staff to return to a traditional housing assignment.

Reducing the Population in Juvenile Facilities

Over the period from June 5-June 12, the Los Angeles County juvenile hall population dropped from 317 to 302 and the juvenile residential camp population has risen from 214 to 218 over the same period. Since March 2, the juvenile hall population has decreased by 249 youth, or 45.2% and the juvenile camp population has decreased by 71 youth, or 24.6%.

The L.A. County Probation Department continues to work with the courts and legal partners on methods to safely reduce the juvenile population housed at Probation facilities. The Community Detention Program will only detain violations when a youth cuts their electronic monitoring device, is missing for more than 12 hours or commits a new crime. Otherwise they will be kept on and a report will be sent with the next court date. Detentions are not conducted as a result of failure to drug test and gang association.

The Department has been screening cases in the camps to consider early release in accordance with the guidelines received. The Department has been screening cases in the camps to consider early release in accordance with the guidelines received. Probation will continue to meet with Juvenile Court leadership, the Public Defender and the Alternative Public Defender to evaluate court orders.

Staff Health and Screening Measures

The Department is screening every person entering a juvenile detention facility. Those attempting to enter a juvenile hall or camp at any time are required to verbally respond if they currently have new or worsening symptoms of a respiratory illness. If the individual's response is that they are experiencing symptoms, they will be restricted from entering the facility that day. The department is also conducting infrared temperature checks on all individuals entering juvenile facilities.

Staff in juvenile facilities are wearing face coverings to protect youth and themselves. All staff who are not teleworking have been offered face coverings.

Three Probation employees have tested positive for COVID-19 over the last week. Since the pandemic began, 27 Probation staff (26 Probation employees and one contract employee) have tested positive for COVID-19. 13 of those staff members work in Juvenile facilities, with eight working at Barry J. Nidorf Juvenile Hall, one at Central Juvenile Hall, two at Campus Kilpatrick and the remaining two having been on leave and not at work when they tested positive. 13 staff who previously tested positive for COVID-19 have returned to work.

These employees are legally entitled to privacy and we will provide no further details at this time. For each employee who has tested positive, the County will notify potential workplace contacts, including other employees who may have been in close contact with the COVID-19 positive individual.

Currently there are no youth being quarantined due to possible exposure to staff testing positive.

Health Care Services

Juvenile Court Health Services (JCHS) continues to work with Probation facility staff regarding the care of the youth in the Quarantine and Isolation units to prevent potential spread of disease. JCHS nurses have trained selected Probation staff at the juvenile halls and camps for the use of infrared thermometers on all staff and visitors upon entry to the facility. A DHS Infectious Disease specialist is assigned to assist correctional facilities. He will be a clinical resource for medical staff to help workflow and answer clinical questions.

The Department has continued to partner with JCHS to develop telemedicine services for assessment and consultation by medical staff and to build 24/7 capacity that currently does not exist. Telemedicine workstations are now operational in all juvenile halls and camps.

Staffing of Juvenile Facilities

The Department ensures that all critical security and safety posts are staffed as required by the Board and State Community Standards and in accordance with the Department's Emergency Operations Plan. Contingency plans have been developed and put in place if facilities are not adequately staffed. Juvenile and Adult Field Operations have been

designated to assist and have continued to report to the halls and camps since March 23, 2020.

Expanded Precautions at Institutions

In addition to efforts outlined in past updates, Probation has made additional efforts to keep youth and staff safe from COVID-19:

- The Department has issued masks to all staff and youth in juvenile halls and residential camps.
- Alcohol wipes were distributed to all facilities to ensure handheld radios are cleaned frequently.
- On June 10, the Probation Department received a donation of 11,000 travel hand sanitizers from Project Gratitude, a nonprofit organization.
- Probation's Management Services Bureau continue to provide janitorial services at facilities to ensure all bathrooms and staff quarters (where applicable) are cleaned daily and have readily available hand soap, paper towels, toilet paper and disinfectant. The Department has also hired additional staff to clean and disinfect common touch areas twice per shift.

All Probation facilities have been instructed to conduct additional deep-cleaning efforts in high-traffic, high-volume areas, including visiting and health care facilities. Staff have also been granted permission to carry personal-use hand sanitizer. Public Health guidelines are reinforced daily to all staff and youth of the importance of social distancing and frequent handwashing.

COVID-19 Communications with Youth

Conversations with youth continue to be held to alleviate rumors and anxiety about COVID-19. In addition, staff perpetually reinforces proactive personal hygiene practices such as daily frequent hand-washing, coughing into the upper sleeve and social distancing. Youth continue to be advised to notify staff if they are not feeling well or are displaying any symptoms associated with COVID-19.

Communications to facilities about COVID-19

Juvenile Institutional Managers are provided with daily COVID-19 updates. In addition, they continue to participate in weekly conference calls hosted by Emergency Management to share information and obtain COVID-19 updates from partner agencies.

Youth-Parent Communications

In-person visitation at juvenile halls and residential treatment facilities remains suspended. Virtual visiting is taking place in both the halls and the camps. The Probation Department is currently planning social distancing protocols for the re-opening of in

person visiting sessions when public health safety permits with the support from the Los Angeles County Department of Public Health and JCHS.

Surveys were conducted in the juvenile halls to obtain feedback on remote learning and virtual visitations. 77% of the youth surveyed gave positive responses to the overall experience of virtual visits they received. The youth in camps were also given surveys and 61 % reported positive experiences.

Youth are still able to make free phone calls to families and are also provided with supplies for letter writing such as paper, pencils, crayons etc. The Department pays for all postage regardless of the number of letters a youth sends out.

Other Youth Activities

- Juvenile halls are offering live streamed religious services. All camps have virtual religious services every weekend as well.
- Probation camps are participating in additional programming that includes Urban Strategies, Conflict Resolutions courses, Arts for Incarcerated Youth Network and A Swan Within.
- As a result of the global pandemic, there will not be a high school graduation ceremony at the Walt Disney Concert hall this year. Graduating youth will be acknowledged at individual site ceremonies in camps and halls.
- On June 9th, The Los Angeles Rams live streamed an interview with two of their players to all camp youth. Previously, The LA Rams would personally visit the camp, however, due to the pandemic they graciously accommodated the Department by tailoring the program virtually. Probation's Educational Services assisted with facilitating this event through Microsoft Teams. Youth questionnaires were submitted to select participants for the event and those chosen were able to submit questions that were answered during the live interview. The LA Rams also provided merchandise for the participants that will be stored for the youth until their release.

Efforts to Address the Medically Fragile Population in Detention Facilities

The Probation Department continues to not have any youth with compromised immune systems or other medical conditions placing them at higher risk for COVID-19 infection. As previously reported, if any youth have other underlying medical conditions which might exacerbate the impact of such infection if one were to occur, the Department will work with Juvenile Court Health Services (JCHS) to assess and address those issues on a case by case basis.

Mental Health Services

The Department of Mental Health (DMH) implemented 32 "virtual counseling" kiosks in the juvenile halls June 1 to supplement the existing in person services provided in the facilities. June 15 is the target implementation date for implementation in the camps.

School for Youth in Juvenile Facilities

Los Angeles County Office of Education (LACOE) efforts to provide a quality education to youth in Probation facilities during the pandemic can be found at <https://www.lacoe.edu/LACOE-Schools/Covid-19-Distance-Learning-Plan>.

Virtual Court Hearings

Video Court for the halls continue to operate effectively. A youth that needs to attend court but is in a quarantined unit will not be transported to court.

Living arrangements for Youth upon Release

By law, Probation must always take steps to avoid release of youth to homelessness. All releases continue to happen in consultation with a parent/caregiver or, where none is available, the Department of Children and Family Services (DCFS) or Probation Placement.

Juvenile Services Field Division

Juvenile Services field staff continue to maintain phone contact with all juvenile probationers and make weekly contacts with high-risk offenders, specifically those under the Intensive Gang Supervision Program. Court officers continue to report daily to juvenile court departments and citation diversion court hearings postponed until further notice.

In addition to providing supervision, staff are also helping families and youth in need. They provide assistance and informational pamphlets/guides on food distribution locations and also deliver food to over 40 families every week. Additionally, youth and caregivers are surveyed to determine the barriers for youth unable to connect with an academic program as well as confirming that the educational needs of youth on field probation are being met via distance learning.

Adult Division

Field Probation COVID-19 Precautions and related activities

Area offices remain closed to the public. Deputy Probation Officers continue to maintain contact with probation clients by phone, email and videoconference. Clients are encouraged to reach out to their assigned probation officer as well. The Department continues to conduct field visits and is prioritizing cases where there are vulnerable victims, sex offenders, and any other circumstances that are considered high risk or require special attention. In addition to conducting safety checks, officers are providing COVID-19 Public Health information and resources. Additionally, the Department released a notice instructing adult field DPOs to work with clients experiencing financial difficulty as it relates to fines and fees. Adult clients continue to receive housing support through contracts with the Health Right 360 housing services.

Adult Field Services is working with the California Department of Corrections and Rehabilitation to facilitate the release of inmates back to Los Angeles County and is collaborating with the Sheriff's Department to assist in clearing the inmates for possible release. Probation is working with the California Department of Corrections and Rehabilitation and the Los Angeles County Sheriff Department to process these individuals and assist with appropriate orientation, addressing housing and other emergent needs.

The Adult Division is also doing a special outreach to probationers who fall within the vulnerable/high risk age group and may have preexisting health conditions. The outreach is to provide information as published by the county and other subject matter experts and to encourage them to take care of themselves.

Probation's AB109 and CORE Bureaus collaborated on community outreach effort with a local CBO on a COVID-19 Stimulus Program. This program is aimed at helping individuals recently released from incarceration. In a two-week period beginning May 27, Probation reached out to approximately 700 clients and were able to refer 175 clients for the stimulus program before they notified us that they were at capacity.

Adult Services continues to work with the court to facilitate their opening. This includes moving forward with the second phase of the bail reform pilot in which Probation plays a significant role. All efforts are being done with client and staff safety as paramount considerations.

Deputy Probation Officers assigned to the Adult Division also continue to support the staffing in juvenile institutions.

Communication and Guidance to Public

The L.A. County Probation Department held a virtual town hall with Department leadership and the community May 20. To see a recording of the town hall, please visit <https://vimeo.com/421724708>.

For information or services, clients and members of the community may call the juvenile facilities. For general questions, please contact the Probation Information Center at 866-931-2222 Monday-Friday from 8 a.m. to 5 p.m.
