

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

SEPTEMBER 25, 2012

**CLOUD COMPUTING**

Los Angeles County has implemented a private cloud system for their emails. The 2011-12 Recommended Budget [pg.276] states that the Internal Services Department's Strategic Plan plans to "expand centralized email and other services within the County's private cloud computing environment, to include data center consolidation".

**I, THEREFORE, MOVE** that the Board of Supervisors direct the Chief Executive Office in collaboration with the Chief Information Office and the Internal Services Department to report back to the Board in three weeks on:

1. An overall status report from all County Departments using the County's private cloud for email, including cost-savings of using the system, number of hours of down time due to crashes, number of employees using the system, number of staff maintaining the system, number of emails sent, etc.;
2. What other services besides email the County plans on placing on their private cloud network in the future; and the expected timeline;
3. An update on the progress of consolidating the County's data centers into the cloud system;
4. Whether the County has or will in the future, place confidential information on the private cloud network (ie. eCAPS, foster youth, Sheriff and DA databases), and what security protocols will be followed for accessing that information; and
5. How the County's private cloud network will benefit from my motion regarding countywide hyperconnectivity and increased internet speeds.
