To ensure access to high-quality, patient-centered, cost-effective health care to Los Angeles County residents through direct services at DHS facilities and through collaboration with community and university partners.

www.dhs.lacounty.gov

November 20, 2012

The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

APPROVAL OF AN ELECTRONIC HEALTH RECORD SYSTEM AGREEMENT WITH CERNER CORPORATION, AND REQUEST FOR HIRING AUTHORITY
(ALL SUPERVISORIAL DISTRICTS)
(3 VOTES)

CIO RECOMMENDATION: APPROVE (X) APPROVE WITH MODIFICATION ( )
DISAPPROVE ( )

SUBJECT

Approval of (i) a new Agreement with Cerner Corporation for the provision of an Electronic Health Record System for the Department of Health Services, (ii) delegation of authority to the Director of the Department of Health Services to amend the Agreement, and (iii) approval to fill 55 new Full-Time Equivalent positions.

IT IS RECOMMENDED THAT THE BOARD:

1. Delegate authority to the Director of the Department of Health Services (DHS) or his designee to execute an Agreement substantially similar to Exhibit I, with Cerner Corporation, effective December 21, 2012, through December 31, 2022, for the provision of an Electronic Health Record (EHR) System with a provision for five, one year automatic extensions, in the County's discretion, through December 31, 2027, with a Maximum Contract Sum not to exceed $366,990,594, including the extension periods, with the Maximum Contract Sum comprised of: (i) Contract Elements of $272,482,095 ; (ii) Optional

Work/Pool Dollars of $55,912,701 with Optional Work/Pool Dollars expenditures to be authorized by the Director through the issuance of Change Orders; and, (iii) Additional EHR Capabilities of $38,595,798, which the County may acquire through a formal, Board approved amendment.

2. Delegate authority to the Director of Health Services (Director), or his designee, to (i) approve and execute Change Notices to the Agreement that do not require any additional costs or expenses or that do not affect any term or condition of the Agreement; and (ii) approve and execute Change Orders using Pool Dollars included as part of the Contract Sum for the acquisition of Optional Work, and provided the amounts payable under such Change Orders do not exceed the available amount of Pool Dollars.

3. Delegate authority to the Director, or designee, to amend the Agreement to (i) add or change terms and conditions as required by the Board; (ii) issue written notice(s) of partial or total termination of the Agreement for convenience without further action by the Board of Supervisors; (iii) prepare and execute Amendment(s) to the Agreement which may reduce the Services and the Contract Sum, subject to review and approval by County Counsel and the Chief Information Office (CIO), and with notification to the Board and Chief Executive Office (CEO); and/or (iv) prepare and execute Amendments to the Agreement to provide a limited Cost of Living Adjustment (COLA) in the extension periods, after December 31, 2022, in accordance with the terms of the Agreement and as further described in the Agreement Pricing section below.

4. Authorize DHS to fill up to 55 new Full-Time Equivalent (FTE) positions at DHS Health Services Administration, as shown on Attachment A and in excess of what is provided in the DHS staffing ordinance pursuant to Section 6.06.020 of the County Code, subject to allocation by the CEO.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The DHS EHR project is motivated by the fact that (1) a modern, integrated EHR is required if DHS is to be able to provide high-quality health care to residents of Los Angeles County, attract qualified healthcare providers and trainees, and fulfill requirements of "meaningful use" and Health Care Reform; and (2) the existing clinical system is at its end of life and is not Certified EHR Technology required to comply with Federal care delivery requirements and receive Federal Eligible Professional and Hospital incentive payments.

The vision for the DHS EHR project is to procure, deploy, and sustain a uniform, standardized and fully integrated EHR solution that is implemented consistently across care settings, with standardized associated workflow processes and a single, unified data structure. DHS intends to move from an outdated, silo approach to health information management to a modern, uniform, industry standard approach.

Finally, the goals of the EHR project include improving the quality and documentation of care, improving the coordination and efficiency of care across DHS facilities, and meeting requirements for meaningful use and incentive payments.

Approval of the first recommendation will allow execution of an Agreement with Cerner Corporation, substantially similar to Exhibit I, to provide an EHR System at DHS. The Agreement will provide for

ongoing maintenance and support services, hosting services, application management and professional services.

Approval of the second and third recommendations will allow the Director to issue Change Notices that do not authorize additional costs; issue Change Orders to purchase Optional Work using available Pool Dollars included in the Contract Sum; terminate the Agreement in full or part for convenience; and, amend the Agreement to reduce services and the Contract Sum, to add or change terms and conditions as required by the Board; and amend the Agreement to provide a limited COLA in the extension periods, after the initial term ends on December 31, 2022, in accordance with the terms of the Agreement and as further described in the Agreement Pricing discussion below.

Approval of the fourth recommendation will enable DHS to initiate actions to fill 55 FTE positions to implement and deploy the EHR under a centralized EHR division, which is to be established under the DHS Chief Information Office.

DHS will return to the Board before the effective date of the Agreement, December 21, 2012, to request approval for a Fiscal Year (FY) 2012-13 budget adjustment to increase appropriation authority and revenue to recognize the financing for the first year only of the total EHR cost. The budget adjustment will be for Cerner contract initiation and first year contract cost, funding for the 55 new FTE positions requested in the fourth recommendation, funding for subject matter experts, County infrastructure requirements to support EHR (including Capital Projects), County Pool Dollars, and a forthcoming consulting services agreement for assistance with EHR implementation.

Background of the EHR System Solution and Acquisition

The recommended Agreement is the culmination of several years of planning within DHS. Long before DHS released its Request for Proposals (RFP) on November 15, 2011, it created a provider led structure to provide leadership and direction for the EHR program. The core mission of this provider led structure was to identify key barriers to the success of an EHR System and develop a "roadmap" for the program to address these barriers. These efforts led DHS to develop and approve its EHR Strategy, including the release of the RFP.

A set of principles underlies both the DHS EHR strategy and the acquisition of the EHR System. These principles are: (1) DHS clinicians will use the EHR System as the primary mode of documentation of patient care; (2) DHS clinicians will use the EHR System to create all patient care orders online; (3) the EHR System will enable DHS to achieve compliance with reporting the quality measures and on-line activities required by the federal government, including enabling DHS hospitals and DHS eligible professionals to achieve "meaningful use" as required by Federal law; (4) the EHR System will enable charge capture for professional services and for facility services; (5) external paper documents relevant to patient care will be scanned and will be available as needed to providers through the EHR System; and (6) the EHR System will support the delivery of continuity of care across care venues in DHS facilities as well as across and between disciplines.

Scope of the EHR Solution

The EHR System will facilitate the transformation of the DHS system of care. It will integrate support across care settings, including the DHS in-patient facilities, outpatient departments and clinics, emergency departments, operating rooms, and ICUs.

This EHR System will permit the sharing of patient information across the DHS system and access to

comprehensive patient information to facilitate continuity of care within and between DHS sites. It will assist in the improvement of patient safety by: (1) capturing high quality patient data to support care decisions, research, analytics, and quality improvement; and (2) enabling DHS to provide a consistent patient experience across the DHS organization, permit the enterprise-wide sharing of best practices as well as enhance efficiency and effectiveness when implementing work flows, new rules, protocols and guidelines from both clinical and information technology perspectives.

The EHR System provides a wide range of functions, including: (1) on-line clinical documentation by care providers; (2) electronic order entry for care delivery orders; (3) medical coding for documentation; (4) decision support for documentation and electronic order entry; (5) integration of ancillary systems such as Pharmacy, Laboratory, and Radiology; and (6) management of the admission, discharge, and transfer cycle, including patient scheduling, registration and a Master Patient Index.
The EHR System

The EHR System will replace the current DHS health information system (QuadraMed/ "Affinity"), and a number of independently operating, "niche" systems in DHS, including ORSOS, Wellscripts, Allscripts and Sunquest. The EHR system will not replace the following: (1) QuadraMed Patient Accounting; (2) Fuji PACS Radiology; and (3) the DHS Outpatient Pharmacy system, which is now linked to the Cardinal Central Fill initiative previously approved by the Board. All of these separate “niche” systems will interface with the EHR System.

Finally, the EHR System will enable the exchange of health information, including clinical, administrative, outcome and encounter (e.g., payor and eligibility coverage) information at the patient and community-wide levels. DHS is committed to the exchange of information to further the patient care goals that it shares with its Safety Net providers, and the EHR System will enable DHS to achieve those goals by linking to Los Angeles Network for Enhanced Services (LANES), the local Health Information Exchange project involving the County and many of its Safety Net providers.

Design, Test and Build: Cluster Self-Assessment and Implementation

The DHS system-wide design, build, and testing phase is projected to be completed within 18 months after the Agreement's execution. Thereafter, implementation will occur at each of six DHS clusters, with "clusters" defined as they are for Affinity purposes. Therefore, any cluster which includes a hospital automatically will include its outpatient departments, health clinics and comprehensive health centers. Attachment B is a diagram of the DHS Affinity clusters. DHS expects implementation at all clusters to be completed in the Summer of 2016.

Cerner and DHS will deploy separate inpatient and outpatient implementation teams. DHS and Cerner plan to keep the inpatient and ambulatory teams generally "in sync" or working within the same cluster when there is both inpatient and ambulatory implementation work to be done in that cluster. However, having separate teams will enable the ambulatory team to move on to the "ambulatory-only" clusters if they complete the ambulatory work before the inpatient work is completed in a cluster. DHS anticipates that this will happen and thus may allow the High Desert and MLK MACCs, the only "ambulatory only" facilities, to have their implementations moved up on the EHR implementation schedule.

In arriving at the implementation order, DHS administration focused on maximizing opportunities for an overall successful implementation, keeping the project on schedule, and obtaining concurrence among the facilities as to implementation order. Using a self-assessment developed by DHS administration, the facilities" Chief Information Officers and Chief Medical Information Officers

assessed their individual facilities for EHR System implementation readiness using a variety of factors. That order is shown in Attachment C.

Implementation of Strategic Plan Goals

The recommended actions support Goal 1- Operation Effectiveness; Goal 2 – Fiscal Sustainability; and Goal 3 – Integrated Services Delivery of the County's Strategic Plan.

FISCAL IMPACT/FINANCING

General Financing Plan

DHS and the CEO are recommending that the initial development of the EHR System be financed through the issuance of commercial paper. During this initial development period, DHS would be responsible for annual interest payments using DHS existing resources. Upon completion and implementation of the EHR System at the first three DHS clusters, which is anticipated by the end of FY 2014-15, any outstanding commercial paper will be redeemed through the issuance of lease revenue bonds with a final maturity of ten years. Commercial paper would continue to be issued to finance the development and completion of the EHR System at the final three DHS clusters. Upon completion of this final project phase, which is anticipated in the Summer of 2016, a second series of ten-year lease revenue bonds would be issued to redeem the outstanding commercial paper.

The CEO and Treasurer Tax Collector will return to the Board with final recommendations regarding the proposed issuance of commercial paper and lease revenue bonds later in FY 2012-13.

DHS is setting aside in current and future budgets an amount sufficient to fund the payment of principal and interest due on the two series of long-term bonds. The annual set-aside would consist of EHR incentive payments, as more fully discussed below, existing resources, Waiver funds, and increased revenue from Health Care Reform.

Hospital & Eligible Professionals Incentive Payments

The federal government created Medicare and Medicaid incentive payments under the HITECH Act to promote the adoption and "meaningful use" of Certified EHR technology by hospitals and "Eligible Professionals" (EPs).

Hospitals may receive both Medicare and Medicaid incentive payments, assuming they meet the eligibility criteria for both programs. However, EPs must elect to pursue either a Medicare or Medicaid incentive. The maximum available Medicare incentive payment is anticipated to be $44,000 over a five-year period per individual EP, but that amount decreases depending on when, over the five-year period, the EP actually qualifies for the payment. The available Medicaid incentive payment is anticipated to be $63,750 over a six-year period per individual EP, making that incentive the better option and the one which DHS has decided to pursue.

For purposes of Medicaid incentives for EPs, "eligible professionals" are physicians, including licensed residents, optometrists, dentists, certified nurse midwives, nurse practitioners and physician assistants, who practice in Federally Qualified Health Centers. EPs must not be hospital based, must satisfy specified Medicaid patient volume requirements, and must demonstrate the meaningful

use of EHR technology at specific points in time in order to qualify for and receive incentive payments under the Federal statutory scheme.

Under the Federal law, EHR incentive payments are to be paid directly to the individual EPs and not to their employer unless the EP assigns the payment to the employer. With respect to those EPs who are under contract, DHS must have an assignment agreement in place or negotiated, which agreement provides for the payment of such funds to the County. Only then can the County gain access to those funds. The assignment agreement either may be incorporated into existing agreements or executed independently of existing agreements.

DHS is pursuing available EHR incentive payments for Hospitals under both Medicare and Medi-Cal, and for its EPs under Medi-Cal, to offset the costs of building the EHR System. The first potential Medi-Cal EHR incentive payment will become available upon execution of the recommended Agreement.

At this time, DHS is estimating approximately $100 million in incentive payments over the period of calendar year 2013 through 2021, subject to the assignment of EP incentive payments to the County and subsequent meaningful use stages. DHS estimates that its hospitals will receive approximately $39.1 million in Medi-Cal incentive payments and approximately $2.5 million in Medicare incentive payments, for a total of $41.6 million, over nine years. DHS also estimates that it will receive approximately $58.4 million in incentive payments from its EPs (both employed and under contract) who are anticipated to agree to reassign their incentive payments to the County.

Before the end of the calendar year, the CEO anticipates bringing forth the required amendment to the Memorandum of Understanding (MOU) between the County and the Union of American Physicians and Dentists (UAPD) to enable the County to obtain the assignment of incentive payments from the DHS represented physician and dentists. This MOU amendment culminates several months of negotiations with UAPD. Further, the CEO currently is negotiating with the appropriate bargaining units within SEIU concerning the assignment of incentive payments by nurse practitioners and nurse midwives. Finally, DHS anticipates returning to the Board by the end of the calendar year with requests for authority to amend DHS's various agreements with its contracted physician, dental and nurse practitioners for the assignment of their incentives.

Agreement Pricing

The Agreement's pricing is predominately fixed price, with price adjustment being limited to specific categories, such as expanded use of the EHR System by DHS and the election of Optional Work. This pricing model provides significant predictability and control over potential cost changes in the Agreement's pricing both during the implementation and in outlying years. Implementation and software payments are tied to Cerner achieving defined milestones in EHR implementation.

The Agreement's pricing includes all license costs of the software and its implementation at all six Affinity clusters, including interfaces and training costs; all hosting costs; and the costs of developing order scripts, clinical documentation templates, and all ongoing maintenance and support costs. Cerner's travel costs for the implementation are fixed and included in the Contract Sum, with payment for additional travel being limited to DHS-initiated requests for additional services or a DHS-initiated changes to the location of the delivery of the services. Travel costs are tied to, and will not exceed, the amounts allowed under County Auditor-Controller's policy. The Contract Sum includes Pool Dollars, which are available for Optional Work, including additional professional services, the purchase of new software licenses and new content, and payment for use reconciliations as described below. Cerner’s pricing for new software licenses and new content are fixed for the first

five years of the Agreement. Finally, it should be noted that the Contract Sum also includes Additional EHR Capabilities which the County may purchase in future years through a Board approved Amendment. Because of the nature of the financing supporting the EHR System acquisition, the inclusion of these costs in the Contract Sum from the Agreement's inception was necessary,

In the event that DHS grows in size over the Agreement's term, either through the addition of a new hospital or free-standing outpatient clinics, the pricing in the Agreement will extend to those new facilities according to a pre-established pricing formula. In the event of a physical growth event, DHS will return to the Board for approval of an amendment to the Agreement to increase the Contract Sum.

The maximum Contract Sum will not exceed $366,990,594. The Agreement has the following pricing components, as reflected on the Cash Flow Summary shown in Attachment D:

(1) Contract Elements: These costs are comprised of Licensed Software, implementation services and training, hardware and third party software, support, clinical content, remote hosting, Application Management Services, Third Party Products, and estimated taxes. These costs will not exceed $272,482,095.

(2) Optional Work: These costs are included in the Contract Sum as Pool Dollars, and DHS may purchase this work through the issuance of a Change Order pursuant to authority requested to be delegated by the Board and stated in the Agreement. Expenditures for Optional Work will not exceed $55,912,701. Optional Work includes new software, content, Professional Services, and Training and a "use reconciliation" process that is intended to capture additional Cerner costs that may arise through DHS's expanded use or consumption of the EHR System. The use reconciliation will be done using a baseline and metrics in the Agreement and will occur, if necessary, after the 5th, 7th and 10th contract years. Any needed use reconciliation will result in an incremental fee increase, which fee is established in the Agreement.

(3) Additional EHR Capabilities: These costs are included in the Contract Sum, and will not exceed $38,595,798. The County may purchase any or all of them only through a formal, Board-approved amendment to the Agreement. These additional capabilities are an enterprise data warehouse, the hosting of the DHS Outpatient Pharmacy system, a cardiovascular information system as an alternative to the Phillips Insight System, and a Clinical Exchange Platform, which is Cerner's Health Information Exchange solution and will be available to the County as an alternate to the LANES initiative

Finally, the Agreement contains a limited (COLA) for Professional and Support Services after the 10th contract year and proceeding through the extension periods. Cerner may receive the lesser of: (a) the difference between the most recently published percentage change, if any, in the U.S. Department of Labor, Bureau of Labor Statistics Consumer Price Index - Urban Wage Earners and Clerical Workers ("CPI-W") for the Los Angeles - Riverside - Orange County Area for the contract year prior to the year for which the COLA is being calculated and the CPI-W for the contract year of the first use reconciliation or (b) three percent (3%). In no event shall the cumulative COLA increases over the five year extension period exceed five percent (5%) of the Support Services Fee or Fixed Hourly Rate for Professional Services as of the effective date of the Agreement. The COLA is limited to the following components of the Agreement: Support, Clinical Content, Application Management Services and Third Party Products. The Director has requested delegated authority to provide the COLA and increase the Contract Sum accordingly. The COLA will not exceed $1,374,984.

Budget

As previously indicated, DHS will return to the Board shortly with the budget adjustment for FY 2012-13. DHS will request appropriation and revenue changes in subsequent fiscal years through the budget process as necessary in accordance with the EHR total cost and revenue implementation plan for each respective fiscal year.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The Agreement includes all Board of Supervisors' required provisions. The Agreement also contains a modified Delegation and Assignment provision.

In accordance with the Board's policy of engaging outside counsel for certain information technology agreements, County Counsel retained the law firm of Foley & Larder, LLP to assist in all aspects of this procurement. Accordingly, Foley & Lardner, in conjunction with County Counsel, assisted DHS in its RFP planning and drafting; advised on all aspects of the RFP evaluation process; and drafted and negotiated the recommended Agreement. Additionally, in accordance with the Board's policy, the Office of the County Counsel separately has submitted to the Board an attorney-client privileged communication which analyzes the Agreement.

County Counsel has approved Exhibit I as to form. The CIO concurs with the Department's recommendation and that office's analysis is attached as Attachment E. CEO Risk Management has reviewed the Agreement provisions concerning Insurance and Indemnification and approves those provisions.

CONTRACTING PROCESS

On November 15, 2011, DHS released its RFP for an EHR System. The RFP contained detailed minimum qualifications which vendors were required to meet in order to proceed to the second phase, which was the submission of a substantive proposal. Notice of availability of the RFP was posted on the County's "Doing Business with Us" website and the entire document was available for download from the DHS Contracts and Grants Division website. In addition, DHS electronically notified potential vendors on its internal mailing list.

By the minimum mandatory proposal submission deadline of December 9, 2011, DHS received six proposals. All six proposals were reviewed and it was determined that two vendors met all of the minimum qualifications. All six vendors were notified of the decision as to each. The four vendors who were deemed not qualified had the opportunity to protest the DHS decision. Two of the vendors submitted protests and, after conferring with County Counsel and outside counsel, DHS determined the protests lacked merit. DHS denied both and neither vendor pursued the decisions.

By the March 1, 2012, deadline for proposal submission, DHS received substantive proposals from the two qualified proposers, Cerner Corporation and Epic Corporation. The proposal evaluation process was a complex and immense undertaking with over 150 individuals representing all segments of DHS as well as subject matter experts. The evaluation committee was comprised of 18 different subgroups and the evaluation process itself had many steps. The informed averaging process was used to evaluate the two proposals.

At the conclusion of proposal evaluation process, Cerner Corporation was the top ranked proposer. It is being recommended for an Agreement. Although a debriefing was offered to Epic, the firm declined. There were no protests as a result of this solicitation and the period of time permitted for such a protest has elapsed.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

Approval of the recommendations will enable DHS to implement a centralized, standardized, enterprise-wide EHR System which will ensure that patients who seek services at any location within DHS will receive consistent care, supported by the same EHR across the entire care continuum.

Respectfully submitted,

Mitchell H. Katz, M.D.

Attachment C

EHR SYSTEM PLANNED ORDER OF IMPLEMENTATION

The current Information Technology (IT) infrastructure involves six separate Affinity "instances," including four IT facilities with both ambulatory and inpatient data (Olive View-UCLA Medical Center, LAC+USC Medical Center, Harbor-UCLA Medical Center, and Rancho Los Amigos National Rehabilitation Center), and two IT facilities with ambulatory data only (High Desert Multi-Service Ambulatory Care Center, Martin Luther King, Jr. Multi-Service Ambulatory Care Center). DHS' Comprehensive Health Centers (CHCs) and Health Centers (HCs) are included in clusters within each of the six IT centers. Once EHR implementation is complete, DHS data will no longer be divided into six areas, but will be integrated into one enterprise-wide solution. The planned order of implementation is as follows:

Order	Inpatient & Ambulatory	Ambulatory Only
1	Harbor-UCLA	MLK MACC
2	LAC+USC	High Desert MACC
3	Rancho Los Amigos	
4	Olive View-UCLA

SUBJECT:

APPROVAL OF AN ELECTRONIC HEALTH RECORD SYSTEM AGREEMENT WITH CERNER CORPORATION AND REQUEST FOR HIRING AUTHORITY

RECOMMENDATION:

☒ Approve ☐ Approve with Modification ☐ Disapprove

CONTRACT TYPE:

☒ New Contract ☐ Sole Source
☐ Amendment to Contract #: Enter contract #. ☐ Other: Describe contract type.

CONTRACT COMPONENTS:

☒ Software ☒ Hardware
☒ Telecommunications ☒ Professional Services

SUMMARY:

Department Executive Sponsor: Mitchell H. Katz, M.D.

Description: Department of Health Services is requesting authorization: 1) to execute an Agreement with Cerner Corporation (Cerner) effective December 21, 2012, through December 31, 2022, for the provision of an Electronic Health Record (EHR) System with five, one-year automatic extensions, at the County's discretion, through December 31, 2027; 2) to execute Change Notices to the Agreement that do not require any additional costs or affect any term of condition of the Agreement, and to issue Change Orders to purchase additional work using Agreement Pool Dollars; 3) to execute amendments to terminate the Agreement in full or part for convenience, to reduce services and Contract Sum, to add or change terms and conditions as required by the Board, and to provide a limited Cost of Living Adjustment in renewal term (after 10 years); and 4) to fill 55 new positions to support the system implementation.

Contract Amount: $366,990,594

Funding Source: Bond funding, Incentive payments, and DHS' Operating Budget

☒ Legislative or Regulatory Mandate ☐ Subvened/Grant Funded: Enter %

Strategic and Business Analysis	PROJECT GOALS AND OBJECTIVES:
	The objectives of the EHR project is to: 1) enhance patient safety and care delivery, 2) reduce costs of delivering high-quality care, 3) ensure continued revenue by complying with Meaningful Use guidelines, and 4) retire the current solution which will become unsupported by the existing vendor.

	BUSINESS DRIVERS: The key business drivers for the project are: 1) Improve patient care – The implementation of a centralized, standardized, enterprise-wide EHR System will ensure that DHS' patients receive consistent care through the entire care continuum. 2) Comply with Federal healthcare requirements – The implementation of a certified EHR system will enable DHS to meet Meaningful Use requirements under American Recovery and Reinvestment Act of 2009 (ARRA), to receive ARRA's incentives related to achieving "Meaningful Use", and to avoid penalties for non-compliance with ARRA as a result of failing to achieve "Meaningful Use."
	PROJECT ORGANIZATION: Dr. Mitchell H. Katz, Director of Department of Health Services, is the Project Executive Sponsor and Dr. Roger Lewis is the Project Director. Kevin Lynch, DHS' CIO, is the IT lead working with Dr. Lewis. DHS has established a strong governance comprised of clinical and technology teams that worked effectively throughout the contracting and negotiation process. DHS will need to transition to project governance for project design and build phase once the Agreement is approved by the Board.
	PERFORMANCE METRICS: The proposed Agreement identifies Service Levels for Response Time, Resolution Time, and Software Response Time. The County will receive corresponding credits for failures to meet these Service Levels.
	STRATEGIC AND BUSINESS ALIGNMENT: The project supports the following County Strategic Plan goals: Operational Effectiveness, Fiscal Sustainability, and Integrated Services Delivery.

PROJECT APPROACH:

DHS is acquiring and provisioning Cerner's commercial-off-the-shelf EHR software. It will be configured to meet DHS business needs, but the Department's intent is to minimize system customizations. The EHR deployment will be implemented in phases for inpatient hospitals and ambulatory clinics. The planned order of implementation is: Harbor-UCLA Medical Center and Martin Luther King Multi-Ambulatory Care Center, LAC+USC Medical Center, High Desert Multi-Ambulatory Care Center, Rancho Los Amigos National Rehabilitation Center, and Olive View Medical Center.

DHS will assign facility business owners (e.g., clinicians, nurses, physicians, technicians, and registration staff) to represent every facility and will be responsible for collaboratively designing, building, testing, training, and implementing EHR modules.

ALTERNATIVES ANALYZED:

DHS conducted a comprehensive RFP solicitation process that identified Cerner as the leading proposer.

Technical Analysis	ANALYSIS OF PROPOSED IT SOLUTION: The Cerner EHR Solution is called Millennium and includes both core component and additive components. The DHS project scope includes: Scheduling, Registration, Master Patient Index, Medical Records, Orders/Results, Computerized Physician Order Entry, Clinical Documentation, Operating Room, Emergency Room, Radiology, Laboratory and Inpatient Pharmacy, and a Document Imaging System. Existing DHS systems that will interface to the EHR system include: the Fuji PACS Radiology, QuadraMed Patient Accounting, and Outpatient Pharmacy. The DHS EHR system will be hosted at Cerner's primary data center in Kansas City, Missouri. It is N-Tier application that utilizes a Linux Operating System and a back-end Oracle database. Clinical images and documentation are stored in an enterprise class Storage Area Network. DHS users will securely access the majority of the EHR system modules using a Citrix Web Front End Server Farm. Certain system modules for document imaging, maternity care, etc., will be hosted locally in servers at DHS facilities that will continuously transmit data to system servers in the Kansas City data center. A secondary data center located approximately 20 miles from the primary data center in the suburbs of Kansas City will be used as a cold site for disaster recovery. Both the primary and secondary facilities have been designed, built, and maintained according to the FEMA P-361 standard, which defines appropriate safety of buildings required to survive an EF-5 tornado event. The EHR solution has redundant, dedicated telecommunications circuits entering from two geographical areas (Las Vegas and Phoenix) into the County's wide area network. In case of major outage that impacts both data centers and telecommunication links, DHS staff will utilize Downtime Viewers (DTV) to access a limited amount of data stored locally.

Financial Analysis	BUDGET: A Projected Cash Flow Summary (See Attachment D of the Board Letter) provides a 15 year funding analysis for the project. The total Contract Sum will not exceed $366,990,594 including the extension periods. The components are: 1. Contract Elements in the amount of $272,482,095, which includes software licenses, implementation services, hardware, third party software, support, remote hosting, and Application Management Services. 2. Optional Work/Pool Dollars in the amount of $55,912,701, which includes additional software professional services, training, and Use Reconciliation (if actual system usage exceeds projected system usage in the base contract). 3. Additional EHR capabilities in the amount of $38,595,798 for acquisition of future software. Acquiring some or all of these software components will require separate Board approval. DHS is also requesting authorization to fill 55 new Full-Time Equivalent (FTE) positions to support the project (See Attachment A of the Board letter). CEO and DHS intend to fund the initial development of the EHR System through the issuance of taxable commercial paper over a 2 to 3 year period. Upon completion and implementation of the first three DHS clusters anticipated by the end of FY 2014-15, any outstanding commercial paper will be redeemed through the issuance of long-term revenue bonds with a final maturity of ten-years. Upon completion of the entire project, which is anticipated in the Summer 2016, a second series of ten-year revenue bonds will be issued.

Risk Analysis	RISK MITIGATION: 1. Hiring appropriate and timely project resources (55 new positions) will be a critical success factor. DHS is working with CEO and DHR to address this issue. 2. Strong change management is required to ensure buy-in on standardizing clinical work processes across the DHS system. DHS has established a strong governance and communication process to promote this buy-in throughout the system. 3. The County CIO will be engaged to provide project oversight and quality assurance. 4. To mitigate service disruption resulting in the event of a disaster, DHS is working with Cerner to: • Procure Cerner's 724 Access Downtime Viewer to provide access to critical client data in case of an outage, including a network outage. • Maintain, test, review, and update a Business Continuity Plan and Disaster Recovery Plan for Cerner's Hosting Environment that will be available in the event of any unplanned interruption. • Ensure that the County's data will be stored on redundant applications and database hardware in their Primary Data Center and that this data is replicated in Cerner's Secondary Data Center. 5. The Chief Information Security Officer (CISO) has reviewed the Agreement and did not identify any IT security or privacy related issues.
CIO Approval	PREPARED BY: Sanmay Mukhopadhyay, Sr. Associate CIO — Date 11/13/2012 APPROVED: Richard Sanchez, County CIO — Date 11-13-12

Please contact the Office of the CIO (213.253.5600 or info@cio.lacounty.gov) for questions concerning this CIO Analysis. This document is also available online at http://ciointranet.lacounty.gov/

AGREEMENT BY AND BETWEEN

THE COUNTY OF LOS ANGELES

AND

CERNER CORPORATION

FOR

ELECTRONIC HEALTH RECORDS SYSTEM AND SERVICES

DECEMBER 21, 2012

ELECTRONIC HEALTH RECORDS
SYSTEM AND SERVICES AGREEMENT

This Electronic Health Records System and Services Agreement, Agreement No. H-705407, (the **"Agreement"**) is made and effective as of December 21, 2012 (**"Effective Date"**), by and between the County of Los Angeles, a political subdivision of the State of California (**"County"**) and Cerner Corporation, with its principal place of business at 2800 Rockcreek Parkway, North Kansas City, MO 64117 (**"Contractor"**). When used herein, the term "**Agreement**" includes the body of this Agreement and any and all Statements of Work entered into by the Parties hereunder and such other exhibits ("**Exhibit(s)**"), attachments ("**Attachment(s)**"), schedules ("**Schedule(s)**") appended to this Agreement and additional documents or web based materials that the Parties identify and agree to incorporate herein by reference. In the event of a conflict between the body of this Agreement and any Statement of Work, Exhibit, Attachment, Schedule, or incorporated material, the body of this Agreement shall govern. For purposes of determining conflicts between parts of this Agreement, Exhibit N (Additional Hosting Services Terms and Conditions) shall be deemed to be part of the body of this Agreement. Contractor and County may be referred to in this Agreement individually as a "**Party**" and together as the "**Parties**."

RECITALS

A. County is authorized by California Government Code Sections 26227 and 31000 to contract for goods and services, including the Services contemplated herein.

B. "**DHS**" is the County's Department of Health Services and is among the largest public hospital systems in the United States. DHS is governed by County's Board of Supervisors ("**Board**") through its appointed Director of DHS ("**Director**"). DHS serves the health care needs of nearly ten million County residents and encompasses hospital and outpatient care, programs, and clinics. At its core, DHS is a "safety net" health care provider. As such, it is the major provider of health care to more than two million County residents without health insurance. DHS provides the vast majority of all "uncompensated" medical care in the County. The mission of DHS is to ensure access to high-quality, patient-centered, cost-effective health care to Los Angeles County residents through direct services at DHS facilities and through collaboration with community and university partners. DHS provides extensive acute and rehabilitative patient care. DHS also trains physicians through affiliations with the University of Southern California Keck School of Medicine and the University of California at Los Angeles Medical School. DHS operates four inpatient hospitals, and also operates an extensive outpatient, ambulatory care system.

C. County seeks to facilitate the adoption of and promote the use of health information technology ("**HIT**") in the interests of quality of care, patient safety, and health care efficiency, while also maintaining patient data security and privacy. In support of these objectives, County is seeking to implement an electronic health record to link electronically participating physicians and other care givers, physicians' practices, clinics, reference labs, imaging centers, pharmacies, diagnostic centers, patients, and other health care or related entities (collectively, the "**EHR**"). Contractor recognizes that the EHR and County provide services essential to the community and that the continued availability and reliability of the Licensed Software, Hosting Software, Third-Party Products, Hardware, and Services (all as defined herein) are critical to facilitate the adoption by and trust of the community in the EHR. To that end, the Licensed Software, Hosting Software, Third-Party Products, Hardware, and Services provide access to authorized users, while

maintaining strict data integrity and security; maintaining agreed performance and availability; and meeting the other requirements of this Agreement. The EHR, or alternatively, the Licensed Software, Hosting Software, Hardware, Third-Party Products and Services, all as more particularly described herein, are sometimes referred to collectively in this Agreement as, and were referred to collectively in the RFP as, "**EHR System**."

D. The EHR System must enable the exchange of, as appropriate, health information, including clinical, administrative, outcome, and financial information at both the patient and community-wide levels in an effort to (1) improve the quality of care, patient safety, and health care efficiency, (2) improve care coordination and collaboration within the County community of caring, (3) facilitate reporting on clinical quality measures, (4) integrate patient care services at all levels of delivery, (5) assist in the evaluation of the necessity and cost effectiveness of care, (6) enhance measurement of patient satisfaction and outcomes, (7) comply with regulatory and accreditation agency reporting requirements, (8) assist County and individual physicians in effectively delivering care and in the collection, storage, retrieval, and protection of patient care and related information, and (9) achieve the business objectives set forth in Exhibit H (EHR Program Strategy) (collectively, the "**Business Objectives**"). Both Parties acknowledge that a principal objective of County in entering into this Agreement is to obtain the functionality from the Licensed Software, Hosting Software, Third-Party Products and Hardware to enable County to achieve the Business Objectives stated above.

E. County's EHR System must be designed and implemented to comply with all applicable requirements of the rules on electronic health records issued by the U.S. Department of Health and Human Services (**"HHS")** (including those of the Office of the National Coordinator for Health Information Technology ("**ONC**"), Centers for Medicare and Medicaid Services ("**CMS**"), and the Office of the Inspector General ("**OIG**")), which also implement provisions of the American Recovery and Reinvestment Act of 2009 ("**ARRA**"). This Agreement sets forth the terms under which Contractor will provide the EHR System.

F. County issued a Request for Proposal for the Electronic Health Records System (EHR System) RFP #KL2011 ("**RFP"**), dated November 15, 2011, for the provision, implementation, and maintenance and support of the EHR System. Contractor submitted a Proposal in response to the RFP, based on which Contractor was selected to enter into contract negotiations with County. Based on those negotiations, this Agreement was submitted to the Board for its consideration for Approval and award.

G. County desires to license the Licensed Software and obtain Hardware, Third-Party Products and the Services from Contractor, including, but not limited to, the Implementation Services, Hosting Services, Support Services, training, and other professional services, all as more particularly described herein. The Services to be provided by Contractor are set forth in this Agreement and such Statements of Work as the Parties may mutually agree upon from time to time.

H. Contractor represents that it will provide County the Contractor Personnel, Licensed Software, Hosting Software, Third-Party Products and Services with the requisite technological capabilities, professional skills, business process and information technology knowledge, software implementation and project management expertise, integration capabilities, hosting capabilities and services, and skilled resources required to implement the Licensed Software, Hosting Software, and Third-Party Products on the Recommended Configuration to conform to the Specifications and other terms and conditions of this Agreement and to effectively integrate all components of the EHR System.

AGREEMENT

In consideration of the foregoing Recitals (which are incorporated herein) and the mutual covenants and agreements contained herein, the Parties hereto agree as follows:

1. TERM

1.1 TERM

The term of this Agreement shall commence on the Effective Date and continue in full force and effect until the earlier of (a) the Agreement is terminated as provided in Section 29 (Termination), or (b) the expiration or termination of the Support Term (collectively, the "**Term**"), subject to Section 1.3 (Term of Statements of Work; License Term), Section 29.7 (Effect of Termination), and Section 29.9 (Survival).

1.2 INITIAL AND RENEWAL SUPPORT TERMS FOR SUPPORT SERVICES

The term for Support Services, as defined in Section 9.7 (Support Services), shall commence on the Effective Date and continue in full force until December 31, 2022, unless earlier terminated as provided herein (the "**Initial Support Term**"). Upon the expiration of the Initial Support Term, County may, at its option, extend Support Services, which will automatically renew for up to five (5) additional consecutive one (1) year terms (individually, each a "**Renewal Support Term**," and collectively referred to as, the "**Renewal Support Term"**). Not less than one hundred and twenty (120) days prior to the expiration of the Initial Support Term and each Renewal Support Term, Contractor shall provide written notice to County of the pending expiration of the Support Term and the date on which the Support Term will expire. At its option, County may elect, upon no less than thirty (30) days written notice to Contractor, to allow the Support Term to expire upon the end of the then-current Support Term. In the event Contractor fails to provide the notice of the pending expiration of the Support Term provided in this Section 1.2 (Initial and Renewal Support Terms for Support Services), County may terminate the Support Term on thirty (30) days written notice, without fee or penalty, at any time thirty (30) days before receiving the next notice of pending expiration to be provided by Contractor. The Initial Support Term and any Renewal Support Term are referred to herein collectively as the "**Support Term**." Pursuant to Section 14.10 (Cost of Living Adjustment), such notice shall identify any fee increase applicable to the Renewal Support Term that is about to commence.

1.3 TERM OF STATEMENTS OF WORK; LICENSE TERM

The commencement and termination dates for Statements of Work, to the extent applicable, shall be as provided in each Statement of Work. Termination of the Term of this Agreement, and termination or expiration of the Support Term, shall not affect the License granted in Section 3 (Licensed Software) and related License provisions, which License shall continue in perpetuity, notwithstanding expiration or termination of this Agreement or the Support Term. The term of the License granted in Section 3.1 (License Grant) shall be referred to as the "**License Term**." For the avoidance of doubt, Section 29.2 (Termination for Material Breach) shall not apply to allow termination of the License granted in Section 3 (Licensed Software),

except in the event of County's material breach of Section 18 (Intellectual Property) or Section 19 (Confidentiality).

2. IDENTIFICATION OF PARTIES

2.1 CONTRACTOR; SUBCONTRACTING

(a) Unless specifically authorized by County as provided herein, Contractor shall perform the obligations described in this Agreement and in the Statement(s) of Work itself, through its direct wholly-owned subsidiaries, provided such subsidiaries are disclosed in writing to County, and such subcontractors are identified on Exhibit BB (County Approved Contractor Entities and Countries). Contractor represents and warrants that it has entered into agreements with each such subsidiary under which such subsidiary has assigned to Contractor all rights necessary for Contractor to fulfill its obligations under this Agreement and to enable Contractor to assign and license to County under this Agreement the same rights that would have been assigned and licensed to County if Contractor had performed the obligations described under this Agreement and in any Statement(s) of Work by itself without the participation of any such subsidiary. All references to Contractor in this Agreement shall be deemed to include all such subsidiaries.

(b) County has relied, in entering into this Agreement, on the reputation of and on obtaining the personal performance of Contractor itself. Consequently, no performance of this Agreement, or any portion thereof, shall be subcontracted by Contractor without the prior written consent of County as provided in this Section 2.1 (Contractor; Subcontracting) which consent shall not be unreasonably withheld or delayed. Any purported agreement by Contractor to subcontract any performance under this Agreement without obtaining the prior written consent of County as provided in this Section 2.1(b) (Contractor; Subcontracting), shall not modify, alter, nor amend the Agreement or any rights, obligations, or responsibilities as between Contractor and County and shall require Contractor to provide the Services to County through a subcontractor Approved as provided in this Section 2.1 (Contractor; Subcontracting) and without any disruption to the Services or impact to the County's operations. In addition, Contractor shall indemnify County as provided in Section 23 (Indemnification) for any claims, demands, damages, liabilities, losses, costs, and expenses, including defense costs and reasonable legal, accounting, and other expert, consulting, or professional fees, and legal research fees arising from or related to the unapproved subcontractor's acts or omissions. Entering into a subcontract in violation of this Section 2.1 (Contractor; Subcontracting) shall be deemed a material breach of this Agreement. Notwithstanding the foregoing, County's prior written consent shall not be required prior to subcontracting with any third-party manufacturer of any Hardware for purposes of providing maintenance and support under Exhibit AA (Hardware Subcontractors Exempt from Approval)), provided that (a) such third-party manufacturers are not required to come onsite to any County Facility or access any patient records for purposes of providing such maintenance and support, (b) no staff of such third-party manufacturers are named in or otherwise dedicated to this Agreement, and (c) Contractor invoices County as part of the Contract Sum directly for any and all services provided by such third-party manufacturers (collectively "**Permitted Subcontractor**").

(c) If Contractor desires to subcontract any portion of its performance under this Agreement other than as specifically set forth in Section 2.1(b) (Contractor; Subcontracting), Contractor shall provide to County, in writing, a request for written Approval to enter into the particular subcontract, which request shall include:

(i) The reason(s) for the particular subcontract;

(ii) Identification of the proposed subcontractor and an explanation of why and how the proposed subcontractor was selected;

(iii) A detailed description of the work to be performed by the proposed subcontractor;

(iv) Confidentiality provisions applicable to the proposed subcontractor's officers, employees, and agents, which would be incorporated into the subcontract;

(v) A draft copy of the proposed subcontract agreement, in the form of Exhibit DD (Form Subcontractor Agreement), which shall, at a minimum:

(1) include representations and warranties by subcontractor that subcontractor (A) is qualified to perform the work for which subcontractor has been hired; (B) maintains the insurance required by this Agreement, and (C) is solely liable and responsible for any and all of its taxes, payments, and compensation, including compensation to its employees;

(2) provide for indemnification by subcontractor of County and Contractor under the same terms and conditions as the indemnification provisions of this Agreement set forth in Section 23 (Indemnification); and

(3) include (A) an executed Confidentiality and Assignment Agreement substantially similar to Exhibit R (Confidentiality and Assignment Agreement), (B) a copy of the executed Contractor Business Associate Agreement with Contractor, (C) an executed EEO Certification substantially similar to Exhibit S (Contractor's EEO Certification), (D) Exhibit T.1 (Safely Surrendered Baby Law), and (E) any other standard County required agreements, forms, and provisions, some of which may need to be executed by the proposed subcontractor and Contractor, as applicable;

(vi) Unless otherwise waived by County, copies of certificates of insurance from the proposed subcontractor, which establish that the subcontractor maintains the minimum programs of insurance required by County; and

(vii) Other pertinent information and/or certifications requested by County.

(d) County will review Contractor's request to subcontract and determine on a case-by-case basis whether or not to consent to such request, which consent shall not be unreasonably withheld.

(e) Subject to and in addition to the provisions of Section 23 (Indemnification), Contractor shall indemnify, defend, and hold harmless County, its officers, employees and agents, from and against any and all third-party claims, demands, liabilities, damages, costs and expenses, including, but not limited to, defense costs and reasonable legal, accounting or other expert consulting or professional fees arising from or related to Contractor's use of any subcontractor, including, without limitation, any officers, employees, or agents of any subcontractor, in the same manner as required for Contractor, its officers, employees, and agents, under this Agreement.

(f) Notwithstanding County's consent to any subcontracting, Contractor shall remain fully responsible for any and all performance required of it under this Agreement, including that which Contractor has determined to subcontract, including, but not limited to, the obligation to properly supervise, coordinate, and perform all work required under this Agreement. All subcontracts shall be made in the name of Contractor and shall not bind nor purport to bind County. Furthermore, County Approval of any subcontract shall not be construed to limit in any way Contractor's performance, obligations, or responsibilities to County, nor shall such Approval limit in any way County's rights or remedies contained in this Agreement. Additionally, County's Approval of any subcontract shall not be construed in any way to constitute the determination of the allowableness or appropriateness of any cost or payment under this Agreement.

(g) County's consent to any subcontracting shall not waive County's right to prior and continuing approval of any and all personnel, including subcontractor employees, providing services under this Agreement. Contractor shall notify its subcontractors of County's right prior to subcontractors commencing performance under this Agreement. Contractor shall assure that any subcontractor personnel not Approved in writing by County shall be immediately removed from the provision of any Services under the particular subcontract or that other action is taken as requested by County.

Further, in the event that County consents to any subcontracting, such consent shall be subject to County's right to terminate, in whole or in part, any subcontract at any time upon written notice to Contractor when such subcontractor is deemed by County to be in material breach of its subcontract or this Agreement. County shall not be liable or responsible in any way to Contractor, to any subcontractor, or to any officers, employees, or agents of Contractor or any subcontractor, for any claims, demands, damages, liabilities, losses, costs, or expenses, including, but not limited to, defense costs and legal, accounting and other expert, consulting or professional fees, in any way arising from or related to County's exercise of such right.

(h) Notwithstanding County's consent to any subcontracting, Contractor shall be solely liable and responsible for any and all payments and other compensation to all subcontractors, and their officers, employees, agents, and successors in interest, for any services performed by subcontractors under this Agreement.

(i) In the event that County consents to any subcontracting, for each subcontract entered into by Contractor, other than with respect to Permitted Subcontractors, Contractor shall deliver to the County Project Director, immediately after the effective date of the

subcontract but in no event later than the date any work is performed under the subcontract:

(i) A fully executed copy of each subcontract entered into by Contractor;

(ii) An executed version of County's then current Confidentiality and Assignment Agreement ("**Confidentiality and Assignment Agreement**") and Business Associate Agreement ("**BAA**") for each subcontractor Approved to perform work under this Agreement on behalf of such subcontractor and all of employees who will be performing such work; and

(iii) Unless otherwise waived by County, certificates of insurance which establish that the subcontractor maintains the minimum programs of insurance required by County under this Agreement.

(j) Notwithstanding County's consent to any subcontracting, Contractor shall be jointly and severally liable with each subcontractor for any breach by any subcontractor of this Agreement, the Confidentiality and Assignment Agreement, or the BAA.

(k) In the event that County consents to any subcontracting, such consent shall apply to each particular subcontract only and shall not be, or be construed to be, a waiver of this Section 2.1 (Contractor; Subcontracting) or a blanket consent to any further subcontracting.

2.2 COUNTY

The rights and obligations of County may be, in whole or in part, exercised or fulfilled by County's departments, joint power authorities in which County is a participant, and other public collaborative efforts, such as a community health information exchange ("**HIE**"), and participants of the Community Partners ("**CP**") Program, existing now or in the future (each, an "**Affiliated User,**" and collectively, "**Affiliate Users**"). County will implement appropriate contractual protections with regard to the Licensed Software with its CPs and, HIE participants (only in the event HIE participants HIE are allowed direct access to the Licensed Software) and expressly identify Contractor as a third-party beneficiary of any such agreement.

2.3 COUNTY DESIGNEE

Any third-party outsourcing vendor, contractor, agent, or other person or entity designated by County in writing (the "**County Designee**") shall be entitled to perform any responsibilities, obligations, or other provisions attributed to County under this Agreement. Contractor shall fully cooperate, communicate, coordinate with, and respond to all the requests of the County Designee, and Contractor will provide the County Designee with the appropriate information in the possession of Contractor relating to the Services. Contractor shall be entitled to reasonably rely on the County Designee, provided, however, that County written Approval shall be required for any work effort requested by a County Designee that may result in additional costs to the County. County shall be entitled to amend and/or terminate its use of the County Designee at any time upon advance notice to Contractor. County will require each County Designee to enter into an agreement containing appropriate confidentiality and non-use provisions with respect to

Contractor's Confidential Information. County shall remain responsible to Contractor for any and all performance required under this Agreement by the County Designee. County shall be entitled to provide the County Designee with Contractor's Confidential Information as required for the County Designee to provide its services to County pursuant to this Section 2.3 (County Designee).

3. LICENSED SOFTWARE

3.1 LICENSE GRANT

3.1.1 SCOPE OF LICENSE

Subject to the terms and conditions of this Agreement, Contractor grants to County a perpetual (except the license granted may not be perpetual as to certain Third-Party Products if otherwise specifically set forth in Exhibit B (EHR System Software Components)), non-exclusive, transferable (as provided in Section 32.17.2 (Assignment by County) license to use the Licensed Software, Third-Party Products and Documentation (as defined in Section 3.3 (Documentation) below) for County's business purposes and activities (hereinafter "**License**"). For the purposes of this Section 3 (Licensed Software), the term "**Use**" as it applies to Licensed Software and Third-Party Products means to copy, install, access, execute, operate, deploy, archive and run the Licensed Software and Third-Party Products for installation, test, development, production, support, archival, emergency restart, and disaster recovery purposes. Without limitation of the above, County's business purposes and activities will include making the Licensed Software, Third-Party Products and Documentation available to physicians, other health care providers, and other health care facilities, federal, State, and local agencies, and business partners (each a "**User**") to facilitate the use and the expansion of County's EHR System. County will ensure that Users who are not employees, not under contract with the County, or are not otherwise under the management of County, will execute confidentiality and appropriate use restrictions as to the EHR System as set forth in this Agreement. Licensed Software shall be and shall remain the exclusive property of Contractor, or, as applicable, Contractor's third-party licensor's. Notwithstanding the foregoing, Licensed Software items identified on Exhibit B (EHR System Software Components) as "Clinical Content," "ASP" or "Subscription" will have a license term coextensive with the Support Term.

3.1.2 LICENSE RESTRICTIONS

The Licensed Software, Hosting Software and Third-Party Products shall not in any way be disassembled, decompiled or reverse engineered, nor shall any attempt to do same be undertaken or knowingly permitted by County, except to the extent permitted by applicable law or authorized by Contractor. No right to modify, create derivative works (except as to the Documentation) of, translate or distribute the Licensed Software, Hosting Software and Third-Party Products are granted, except as provided in this Agreement.

3.1.3 COUNTY'S USE IN EXCESS OF LICENSE LIMITATIONS

In the event the Licensed Software or Third-Party Products are licensed on a limited basis (e.g., licensed on a per user, server, CPU, named user basis) and County Uses the Licensed Software or Third-Party Products in excess of such limited basis, County shall be solely responsible for payment of the license fees attributable to the excess Use at County's rates under this Agreement.

3.1.4 HOSTING SOFTWARE LICENSE

Hosting Software shall be and shall remain the exclusive property of Contractor, or, as applicable, Contractor's third-party licensors. Contractor hereby represents and warrants that it is authorized to use, all software provided in connection with providing the Hosting Services to County or, alternatively, to the extent permissible under its applicable licenses, Contractor grants to County during the Term and during the termination transition period as set forth in Section 29.8 (Termination Transition Services), a license to the software required solely to receive and use the Hosting Services provided by Contractor.

3.2 REVISIONS

During the Support Term, all Revisions distributed to any customer by Contractor (including Displaced/Renamed Products) shall be provided to County at no additional charge beyond the fees payable hereunder for Support Services. During the Support Term, if (a) the Licensed Software is displaced in Contractor's product line by another product or (b) a renamed product containing substantially similar functionality to the Licensed Software is made Generally Available to clients by Contractor (even if the renamed product contains additional features, functionality, or other capabilities) (each a "**Displaced/Renamed Product**"), County shall receive such Displaced/Renamed Product as a Revision.

3.3 DOCUMENTATION

For purposes of this Agreement, the term "**Documentation**" shall mean all of Contractor's training course materials, system specifications and technical manuals, and all other user instructions provided by Contractor or otherwise made available or accessible to County regarding the capabilities, operation, and use of the Licensed Software, including, but not limited to, online help screens contained in the Licensed Software, existing as of the Effective Date and any revisions, supplements, or updates thereto. At no additional charge to County, Contractor shall provide or make available to County all Documentation relating to the Licensed Software. If the Documentation for the Licensed Software is revised or supplemented at any time, Contractor shall promptly provide or make available to County a copy of such revised or supplemental Documentation, at no additional cost to County. County may, at any time, make a reasonable number of copies of all Documentation and other materials provided or made available by Contractor, distribute such copies to County personnel or County Designees, and incorporate such copies into its own technical and user manuals, provided that such reproduction relates to County's and its personnel's Use of the Licensed Software as permitted in this Agreement, and all copyright and trademark notices, if any, are reproduced thereon. Contractor shall provide or make available to County all Documentation in electronic form. Documentation as to Integral Third-Party Software or Third-Party Products shall be included

within the meaning of the term "Documentation", provided, such Documentation is accessible or available to Contractor.

4. ESCROW OF SOURCE MATERIALS

4.1 ESCROW AGENT AND RELEASE CONDITIONS

Contractor has deposited a copy of the Source Material with Iron Mountain Incorporated, as the assignee and successor in interest to the Master Preferred High Technology Escrow Agreement between Contractor and Data Securities International, Inc., a software escrow agent (the "**Escrow Agent**"), located at 2100 Norcross Pkwy, Suite 150, Norcross, GA 30071 (the "**Escrow**") pursuant to a written escrow agreement ("**Escrow Agreement**"). A copy of the Escrow Agreement shall be incorporated by reference into this Agreement as Exhibit Q (Escrow Agreement). Contractor shall continually update the Source Material by promptly depositing in the Escrow each new Revision of the Licensed Software. Contractor's duty to update the Source Material shall continue through the Support Term or until County ceases obtaining Support Services from Contractor, whichever is later. The Source Material will be held in the Escrow. The events upon which County shall have access to the Source Material shall include (collectively the "**Release Conditions**"): (a) the insolvency of Contractor; (b) the making of a general assignment by Contractor for the benefit of its creditors or a filing of a voluntary or involuntary petition in bankruptcy by or against Contractor that is not dismissed within one-hundred and twenty (120) days of the filing thereof; (c) as set forth in Section 5 (Bankruptcy and Liquidation); (d) in the event Contractor ceases to maintain or support the Licensed Software (after County has provided written notice of such failure and a thirty (30) day period to cure such failures) for reasons other than County's failure to pay for, or election not to receive, Contractor's Support Services, and no other entity has assumed the obligation to maintain and support the Licensed Software; (e) termination of this Agreement for breach by Contractor and Contractor refuses to provide transitional Services as set forth in Section 29.8 (Termination Transition Services); and (f) any other release conditions that may be specified under the Escrow Agreement. If a Release Condition occurs, County may hire Contractor Personnel to assist County with using and understanding the Source Material without being subject to Section 32.21 (Prohibition Against Inducement or Persuasion).

4.2 NATURAL DEGENERATION

The Parties acknowledge that as a result of the passage of time alone, the deposited Source Material may be susceptible to loss of quality ("**Natural Degeneration**"). For the purpose of reducing the risk of Natural Degeneration, Contractor shall deposit with the Escrow Agent a new copy of all deposited Source Material at least once every three (3) years. In the event the Source Material or any part of it is destroyed or corrupted, upon County's request, Contractor shall provide a replacement copy of the Source Material.

4.3 USE OF SOURCE MATERIAL

Upon the occurrence of a Release Condition County will, upon payment of the duplication cost and other handling charges of the Escrow Agent, be entitled to obtain a copy of such Source Material from the Escrow Agent. Source Material obtained by County under the provisions of this Agreement shall remain subject to every license restriction, proprietary rights protection,

and all other County obligations specified in this Agreement provided, however, County may make such Source Material available to third-parties as needed to assist County in making authorized use of the Licensed Software and/or Interfaces and provided such third-party has first entered into a written agreement containing restrictions at least as protective of the Source Material as this Agreement. County shall be entitled to use the Source Material as needed to remedy the event of release and mitigate any damages arising from such event. Such use will include, but is not limited to, County's right to perform its own support and maintenance, alter or modify the Source Material, and/or obtain the benefits sought under this Agreement. The Escrow Agent's responsibility in the event of a Release Condition will be to cause a copy of the Source Material, in the form as delivered by Contractor, to be promptly delivered to County at the appropriate time. Nothing herein relieves Contractor of its obligation to provide Support Services as required under this Agreement. Except as necessary to effectuate a transition to a new solution, in no event shall County be permitted to grant access to the Source Material to a competitor of Contractor. Likewise, County shall not be permitted to sell or transfer its rights in the Source Material to any other party. When Source Material is not in use, County agrees to keep such Source Material in a locked, secure place. When Source Material resides in a central processing unit, County shall limit access to its authorized employees and consultants who have a need to know in order to support the Licensed Software and/or Interfaces. In the event of a claim to the Source Material, County shall provide Contractor with a written notice outlining the facts upon which County bases its claim that a Release Condition has occurred. Contractor may contest the existence of the Release Condition pursuant to the procedures set forth in Section 27 (Dispute Resolution Procedure) or subject to other judicial proceedings as provided by law.

4.4 PROPRIETARY RIGHTS

County acknowledges that any possession of the Source Material referred to herein is subject to the confidentiality and proprietary provisions of access to any third-party, except to service, maintain, support, repair, operate, modify, or otherwise facilitate and continue the use and operation of the installed Licensed Software as provided herein. Should use of the Source Material as provided in this Section 4 (Escrow of Source Materials) involve the use or practice of any patent, copyright, trade secret, trademark, or other proprietary information in which Contractor has an interest, Contractor, on behalf of itself and its assignees and successors, agrees not to assert a claim for patent, copyright, trade secret, trademark, or other proprietary information infringement against County, provided use of the Licensed Software and Source Material is in accordance with this Agreement.

4.5 COUNTY'S RIGHT TO VERIFY SOURCE MATERIAL

Regardless of whether one of the Release Conditions occurs, County shall have the right, at County's sole expense, to require the Escrow Agent to verify the relevance, completeness, currency, accuracy, and functionality of the Source Material by, among other things, compiling the Source Material and performing test runs for comparison with the capabilities of the Licensed Software. In the event such testing demonstrates the Source Material does not correspond to the Licensed Software, Contractor shall reimburse County for all costs and fees incurred in said verification, compilation, and testing and immediately deposit the correct Source Material with the Escrow Agent.

4.6 AMENDMENT OF ESCROW AGREEMENT

Contractor shall not change the Escrow Agent designated in this Section 4 (Escrow of Source Materials) without County's Approval, which shall not be unreasonably withheld.

4.7 ESCROW MAINTENANCE FEES

There shall be no charge to County for the maintenance of the Escrow for the purpose of this Agreement.

4.8 LIMITATION OF SURVIVAL

The survival of the rights of this Section 4 (Escrow of Source Materials) as provided under Section 29.9 (Survival) shall be limited to three (3) years subsequent to the effective date of a termination of this Agreement.

5. BANKRUPTCY AND LIQUIDATION

In the event that Contractor shall: (1) make an assignment for the benefit of creditors or petition or apply to any tribunal for the appointment of a custodian, receiver, or trustee for all or a substantial part of its assets; (2) commence any proceeding under any bankruptcy, reorganization, arrangement, readjustment of debt, dissolution, or liquidation law or statute of any jurisdiction whether now or hereafter in effect; (3) have had any such petition or application filed or any such proceeding commenced against it in which an order for relief is entered or an adjudication or appointment is made, and which remains undismissed for a period of one-hundred and twenty (120) days or more; (4) take any corporate action indicating its consent to, approval of, or acquiescence in any such petition, application, proceeding, or order for relief or the appointment of a custodian, receiver, or trustee for all or substantial part of its assets; or (5) permit any such custodianship, receivership, or trusteeship to continue undischarged for a period of one-hundred and twenty (120) days or more, causing Contractor or any third-party, including, without limitation, a trustee in bankruptcy, to be empowered under state or federal law to reject this Agreement or any agreement supplementary hereto, County shall have the following rights:

(a) In the event of a rejection of this Agreement or any agreement supplementary hereto, County shall be permitted to retain and use any back-up or archival copies of the Licensed Software under this Agreement, as provided under Section 365(n) of the United States Bankruptcy Code (11 U.S.C. Section 365(n)) for the purpose of enabling it to mitigate damages caused to County because of the rejection of this Agreement;

(b) In the event of a rejection of this Agreement or any agreement supplementary hereto, County may elect to retain its rights under this Agreement or any agreement supplementary hereto as provided in Section 365(n) of the Bankruptcy Code. Upon written request of County to, as applicable, Contractor or the bankruptcy trustee or receiver, Contractor or such bankruptcy trustee or receiver shall not interfere with the rights of County as provided in this Agreement or in any agreement supplementary hereto to obtain the Source Material(s) from the bankruptcy trustee or from a third-party escrow agent and shall, if requested, cause a copy of such Source Material(s) to be available to County; and

(c) In the event of a rejection of this Agreement or any agreement supplementary hereto, County may retain its rights under this Agreement or any agreement supplementary hereto as provided in Section 365(n) of the Bankruptcy Code without prejudice to any of its rights under Section 503(b) of the Bankruptcy Code.

6. CONTINUOUS LICENSED SOFTWARE SUPPORT

If Contractor assigns this Agreement, is acquired, or is otherwise controlled by another individual or entity (collectively referred to as a "**Successor Event**"), such individual or entity shall continue to provide Support Services in accordance with this Agreement through the Support Term. If, subsequent to the Successor Event, the Licensed Software is not supported to at least the same level that Contractor supported the Licensed Software prior to the Successor Event, because, for example, Contractor's assignee chooses to support other products with similar functions or does not otherwise properly staff the support for the Licensed Software, County, at its sole option, may elect to transfer the license of the Licensed Software, without cost or penalty, to another similar product ("**Replacement Product**") within Contractor's assignee's or successor's product offering. For purposes of this Section 6 (Continuous Licensed Software Support), the term "controlled" shall mean the legal right to elect a majority of the directors of a corporation or similar officers of any other entity or to determine an entity's general management policies through contract or otherwise. The assignee or successor, by taking benefit (including acceptance of any payment under this Agreement) ratifies this Agreement. All terms and conditions of this Agreement shall continue in full force and effect for the Replacement Product. In addition, the following terms and conditions shall apply if County elects to transfer this license to a Replacement Product:

(a) Any prepaid maintenance and support shall transfer in full force and effect for the balance of the Replacement Product's maintenance and support term (or equivalent service) at no additional cost. If the prepaid moneys are greater than the Replacement Product's maintenance and support fee for the same term, the credit balance will be applied to future maintenance and support fees or returned to County, at its option;

(b) Any and all software offered separately and needed to fulfill the original Licensed Software's level of functionality shall be supplied by Contractor's assignee or successor without additional cost or penalty and shall not affect the calculation of any maintenance and support fees;

(c) Any services required for implementation of the Replacement Product shall be provided by Contractor's assignee or successor without additional cost or penalty;

(d) Contractor shall provide to County reasonable training for purposes of learning the Replacement Product at no cost to County;

(e) All license terms and conditions shall remain as granted herein with no additional fees imposed on County; and

(f) The definition of Licensed Software shall then mean and include the Replacement Product.

7. THIRD-PARTY PRODUCTS WITH INDEPENDENT CONDITIONS

In the event Contractor provides any Third-Party Product to County in connection with this Agreement for which Contractor is obligated to ensure that County accepts and is bound by third-party terms and conditions ("**Third-Party Product With Independent Conditions**"), the following shall apply: (a) Contractor shall specifically identify in writing all Third-Party Product With Independent Conditions in Exhibit B (EHR System Software Components) or the applicable Statement of Work; (b) Contractor shall attach to Exhibit FF (Independent Conditions) or the applicable Statement of Work written copies of all third-party license agreements applicable to County; and (c) Contractor warrants that: (i) it has the right to license any Third-Party Product With Independent Conditions licensed to County under this Agreement; (ii) to the best of Contractor's knowledge, the Third-Party Product With Independent Conditions does not, and the use of the Third-Party Product With Independent Conditions by County as contemplated by this Agreement will not, infringe any intellectual property rights of any third-party; and (iii) unless specifically provided otherwise herein, County shall have no obligation to pay any third-party any fees, royalties, or other payments for County's use of any Third-Party Product With Independent Conditions in accordance with the terms of this Agreement. Unless a license for the Third-Party Product With Independent Conditions is specifically Approved by County and such license is provided in Exhibit FF (Independent Conditions) or the applicable Statement of Work, such Third-Party Product shall be deemed Integral Third-Party Software until such independent conditions are specifically provided to County by Contractor and Approved by County. Prior to obtaining County's Approval as to the independent conditions, Contractor shall obtain, at Contractor's sole cost and expense, all license rights necessary for County's use of the Third-Party Product With Independent Conditions in accordance with this Agreement, including support and maintenance costs. Upon Approval of the Third-Party Product with Independent Conditions, the item will be added to Exhibit C (Fees; Contractor Professional Services Rates) or as otherwise agreed to in writing by the Parties. To the extent County has agreed to the independent conditions associated with a Third-Party Product, and there is a conflict between the terms of this Agreement and the independent conditions, the independent conditions will control to the extent permitted by law or contract, Contractor shall pass through to County the warranties for the Third-Party Product With Independent Conditions.

8. HARDWARE

To the extent County will purchase any hardware or other equipment from Contractor (collectively, "**Hardware**"), such Hardware shall be specifically identified in Exhibit D (Hardware) or the applicable Statement of Work, including all applicable fees and costs. Title to each item of Hardware shall pass to County on delivery to the facility designated by County and payment in full of the fees associated with that particular item. Contractor shall be responsible for customary and appropriate product packaging, freight charges, insurance, and delivery of the Hardware to the County designated FOB destination. Contractor shall ensure delivery of the Hardware within the times prescribed in Exhibit D (Hardware) or the applicable Statement of Work. All Hardware and the parts therein shall be new and shall not contain any refurbished or used parts.

9. SERVICES AND DELIVERABLES

9.1 SERVICES

Contractor will provide the Services, fulfill the obligations to County, produce and deliver the Deliverables, achieve the Milestones, and retain the responsibilities set forth in this Agreement and described in one or more sequentially numbered, written statements of work that specifically reference this Agreement and are attached hereto as Exhibit A (Statements of Work) or incorporated by Amendment as part of Exhibit A (Statements of Work) (each, a "**Statement of Work**"). Each new Statement of Work shall be in the general form set forth in Exhibit P (Form Statement of Work). The implementation under this Agreement is structured into Clusters to provide for a well-managed and organized execution of the Services and it is anticipated and understood that the Services may be adapted through additional Statement(s) of Work and modifications to existing Statement(s) of Work as additional details are defined by the Parties. Contractor shall provide the Services without causing a material disruption of County's operations.

9.2 STATEMENT(S) OF WORK

Each Statement of Work, other than those attached as Exhibit A (Statements of Work), which are effective on the Effective Date, will be effective and become valid and enforceable only as to Optional Work when a Change Order is executed in accordance with Section 13.3 (Change Orders, and in all other instances, when an Amendment is approved by the Board. If a conflict arises between the body of this Agreement and a Statement of Work or other Exhibit, Attachment, or Schedule hereto, except with regard to an express Amendment to a specific section of this Agreement, the body of this Agreement shall control. Each Statement of Work shall be deemed, upon its execution, to incorporate the terms and conditions of this Agreement.

9.3 PROJECT CONTROL DOCUMENT AND PROJECT SCHEDULE

9.3.1 PROJECT CONTROL DOCUMENT AND PROJECT SCHEDULE

Contractor shall implement the Licensed Software, Third-Party Products, and/or Hosting Software in accordance with the Project Control Document and Project Schedule. The Project Schedule shall, at a minimum, include the following items:

(a) Deliverable number;

(b) Description;

(c) Due date;

(d) Associated Deliverable;

(e) Milestone; and

(f) Any other items required by County under this Agreement.

9.3.2 KEY DELIVERABLES

Exhibit A.25 (Project Control Document) shall specify certain Deliverables as Key Deliverables, as determined by County. A Key Deliverable shall be deemed completed for purposes of this Section 9.3.2 (Key Deliverables) on the earliest date that all of the tasks, subtasks, Deliverables, goods, and Services required for completion of such Key Deliverable are completed and delivered to County, provided that all of such Services required for completion of such Key Deliverable are thereafter Approved in writing by County pursuant to Section 9.13 (Approval of Key Deliverables) without prior rejection by County or significant delay in County's Approval thereof, which delay is the result of Contractor's failure to deliver such tasks, subtasks, Deliverables, goods, and Services in accordance with the terms hereof. The determination of whether each Key Deliverable has been so completed and so Approved, and of the date upon which such Key Deliverable was completed, shall be made by the County Project Director as soon as practicable in accordance with Section 9.13 (Approval of Key Deliverables) after County is informed by Contractor that such Key Deliverable has been completed and is given all the necessary information, data, and documentation to verify such completion. A failure by Contractor to complete any Key Deliverable by the Credit Due Date for such Key Deliverable (as such date may be modified pursuant to Section 13 (Changes to Agreement)), including, without limitation, following delivery of a notice under Section 10.2.3 (Alert Reports), shall be subject to the provisions of Section 14.3.2 (Credits to County), Section 14.3.3 (Termination for Failure to Complete Key Deliverable) and Section 29.2 (Termination for Material Breach).

9.4 IMPLEMENTATION SERVICES

Contractor shall provide Implementation Services, including Licensed Software, Third-Party Products, and Hosting Software setup, installation, testing, training and other Services required for successful implementation of the EHR System, as provided in this Agreement and specified in Exhibit A (Statements of Work).

Contractor shall provide to County the transition-in and migration Services described in Exhibit A (Statements of Work), in accordance with the Project Schedule. Contractor shall provide the transition-in and migration Services without materially (a) disrupting or adversely impacting the business or operations of County, (b) degrading the Services being provided, or (c) interfering with the ability of County to obtain the benefit of the Services, except as may be otherwise provided in Exhibit A (Statements of Work). Unless otherwise stated in the Agreement, the transition-in and migration Services shall not adversely impact or delay any obligations or liabilities of Contractor under this Agreement.

Contractor and/or County will amend Exhibit B (EHR System Software Components) in order to: (i) add new Licensed Software Modules and/or components; (ii) revise the Licensed Software descriptions, and (iii) update the Licensed Software and Module version numbers, provided, however, no Licensed Software Module or component may be removed from or added to Exhibit B (EHR System Software Components) except in accordance with this Agreement and upon Approval of the County Project Director. All such changes to Exhibit B (EHR System

Software Components) shall be provided in accordance with Section 13 (Changes to Agreement).

9.5 KNOWLEDGE TRANSFER AND TRAINING

9.5.1 KNOWLEDGE TRANSFER

The Services shall include all knowledge transfer, training, and education activities as set forth in Exhibit A.22 (Training and Knowledge Transfer Statement of Work). Contractor shall provide to County, as part of the knowledge transfer, unlimited access to the computer based training course material through the end of the fifth (5^{th}) Contract Year.

9.5.2 TRAINING

As part of the Services, Contractor shall provide the training to County and its personnel, at a location to be designated by County, set forth in the applicable Statement(s) of Work at no additional charge to County. In addition, County may participate, at no additional charge, in any training seminars that may be held, at Contractor's discretion, for the benefit of all licensees.

9.6 INTERFACES

Contractor acknowledges and agrees that County may Interface, integrate, and use the Licensed Software, Third-Party Products, and/or Hosting Software with other systems owned or licensed by or for County or a third-party, so as to permit those systems to Interoperate, whether by use of calls, exchange of data, link editing or otherwise. Contractor shall not obtain any ownership interest in those other systems merely because they were Interfaced, integrated, or used with any Licensed Software. Contractor shall be responsible for developing and delivering the Interfaces, if any, identified in a Statement(s) of Work at no additional cost to County beyond the applicable cost in each Statement of Work, which Interfaces shall include but not be limited to Interfaces to third-party software and hardware identified in Exhibit M (Interfaces). All such required Interfaces shall be part of the Deliverables to be provided by Contractor.

9.7 SUPPORT SERVICES

Contractor shall provide the Licensed Software and Third-Party Products support and application maintenance services ("**AMS Services**") described in this Section 9.7 (Support Services) and the applicable Statement(s) of Work (collectively, the "**Support Services**"). There shall be no additional charge to County for on-site Support Services to remedy a breach of warranty, to correct a failure of the Licensed Software or Third-Party Products to conform to the Specifications, or to fulfill Contractor's obligations pursuant to this Section 9.7 (Support Services). If Contractor does not otherwise agree that onsite Support Services are required, then the onsite Support Services under this Section 9.7 (Support Services) will be provided upon request from DHS CIO or DHS CMIO or their individual designee(s). Notwithstanding the foregoing, as to Integral Third-Party Software and Third-Party Products, Contractor is not responsible for making changes to Integral Third-Party Software or Third-Party Products, but is responsible for coordinating and managing with the appropriate third-party such actions to

correct a failure of the Integral Third-Party Software or Third-Party Products consistent with its obligations under this Agreement.

9.7.1 SUPPORT RESPONSIBILITIES

In addition to any warranty obligations of Contractor under this Agreement, Contractor shall:

(a) Correct any failure of the Licensed Software, Services, and Deliverables to perform in accordance with the Specifications, including without limitation, defect repair, programming corrections, and remedial programming, and provide such services and repairs required to maintain the Licensed Software, Services, and Deliverables so that they operate properly and in accordance with the Specifications. As to Third-Party Products, Contractor is responsible for coordinating and managing with the appropriate third-party such actions to correct any failure of the Third-Party Products to perform in accordance with their specifications, and required to maintain the Third-Party Products so that such Third-Party Products operate properly together with the Licensed Software, Services, and Deliverables in accordance with the Specifications;

(b) Provide Support Services for, and respond to, Support Requests in accordance with Exhibit E (Service Levels and Performance Standards);

(c) Provide unlimited telephone support twenty-four (24) hours a day, seven (7) days a week;

(d) Provide online access to technical support bulletins and other user and self-help support information and forums; and

(e) Provide invitations for County personnel to attend and participate in, at no additional cost (excluding travel expenses) to County (i) for its Cerner Health Conference, Contractor will provide DHS CIO with twenty (20) passes per year to distribute to County personnel, and (ii) participation by County representatives in the following groups or events, including those that determine or influence Contractor's priorities for development of future Enhancements of the Licensed Software:

(a) County will be a member of Contractor's Academic Advisory Board; and

(b) DHS's CIO will also be granted a three (3) year term for the next term of Contractor's Academic Advisory Board beginning after the request of DHS's CIO.

9.7.2 CONTRACTOR'S REVISIONS

(a) Substantial Equivalence. Contractor may from time to time make material Revisions to the Licensed Software. In the event of such Revisions, (a) the

new Revision of the Licensed Software will, as to each function, (i) provide at least substantially equivalent functional results, (ii) maintain the level or quality of Services that County previously received, and (iii) shall continue to comply with all of the requirements of this Agreement, and (b) County shall be provided written notice at least sixty (60) days in advance of the general availability of any such Revision. Notwithstanding the foregoing, County may Approve a Revision to the Licensed Software that does not comply with the requirements of this Section 9.7.2(a) (Substantial Equivalence) if Contractor demonstrates to County that the Revision (1) is beneficial to the overall functionality or performance of the Licensed Software, (2) does not result in a material diminution of a feature or function that is deemed important to County's ongoing operations (e.g., the ability to timely file cost reports), and (3) does not result in the inability to maintain Interfaces with a third-party systems already Interfaced to the Licensed Software. In the event Contractor makes a Revision in breach of this Section 9.7.2(a) (Substantial Equivalence), Contractor shall provide the software, Services, and equipment required by County to provide the substantially equivalent functional result at no cost to County. Contractor's obligation under this Section 9.7.2(a) (Substantial Equivalence) does not apply to Integral Third-Party Software that is not embedded within the Licensed Software.

(b) No Material Adverse Effects. If within the later of thirty (30) days after (1) Acceptance in a Production Environment of a Revision, or (2) the first fiscal year end close after being placed into Productive Use, a material adverse effect on functionality or operation of the Licensed Software is identified, including, but not limited to, a failure to comply with the requirements of this Agreement, or compatibility with County's technical, business or regulatory requirements, including, without limitation, hardware, software, or browser configurations, then County may in its sole discretion reject such changes, and remain on the current Revision of the Licensed Software and continue to receive Support Services as required hereunder, until such time as Contractor has demonstrated the material adverse effects in the Revision have been corrected and County is able to implement the Revision without substantial disruption to County's operations.

(c) Delivery and Prior Version Support. During the Support Term, County shall receive access to all new Revisions of the Licensed Software and Hosting Software that Contractor makes available to its other licensees without additional charge as provided in Section 3.2 (Revisions) within thirty (30) days after their General Availability. Notwithstanding the foregoing, Contractor represents, warrants, covenants, and agrees that throughout the Term of this Agreement Contractor shall provide Support Services for the current Version of Licensed Software and the most recent prior two (2) Versions.

9.7.3 SUPPORT NOT TO BE WITHHELD

Support Services under this Agreement will not be withheld due to any dispute arising under this Agreement, another agreement between the Parties, or any other related or unrelated dispute between the Parties.

9.7.4 NO REMOVAL OF DATA

Contractor shall not remove from County's facilities, or retain a copy of, any County Data obtained from, or as a result of access to, County Systems unless that removal or retention is reasonably necessary to perform the Support Services or is otherwise Approved in writing by County.

9.8 OPTIONAL WORK

Upon County's written request and mutual approval pursuant to the terms of this Agreement, Contractor shall provide Optional Work, including New Software and Professional Services, in accordance with this Section 9.8 (Optional Work) at the applicable pricing terms set forth in Exhibit C (Fees; Contractor Professional Services Rates).

9.8.1 NEW SOFTWARE

Upon County's written request following Go-Live and mutual agreement, Contractor shall provide to County New Software as part of Optional Work using Pool Dollars, in accordance with any applicable Change Order. Any enhancements and/or modifications to the Licensed Software Requirements resulting from New Software shall be incorporated into, and become part of, the Licensed Software Requirements (Exhibit A.26 (Licensed Software Requirements)). Upon delivery by Contractor, and Acceptance and Approval in writing by County in accordance with the terms of this Agreement, of such New Software, Exhibit C.1 (Optional Work) shall be updated accordingly to add such delivered New Software via a Change Notice or by an Amendment, in each case, in accordance with Section 13 (Changes to Agreement).

All New Software, once Accepted and Approved in writing by County, shall become part of the Licensed Software, and shall be subject to the terms and conditions of this Agreement.

9.8.2 PROFESSIONAL SERVICES

Upon County's written request following Go-Live and mutual agreement, Contractor shall provide to County Professional Services as part of Optional Work using Pool Dollars, including consulting services and/or additional training, in accordance with any applicable Change Order. Specifically, County may from time to time, during the Term of this Agreement, submit to Contractor for Contractor's review written requests for Professional Services using Pool Dollars, including consulting services and/or additional training, for services not included in Implementation Services. County may require that Professional Services be provided on a (1) fixed fee basis, (2) not to exceed basis, (3) time and materials basis, or (4) a combination of the

above. In response to County's request, Contractor shall submit to County for Approval a Statement of Work describing the particular Professional Services and providing a response consistent with the payment method required by County to provide such Professional Services, calculated based on the Fixed Hourly Rate and other pricing terms set forth in Exhibit C (Fees; Contractor Professional Services Rates) and elsewhere in the Agreement. County and Contractor shall agree on the Change Order developed using the Statement of Work, which shall at a minimum include the tasks and Deliverables to be performed, Acceptance Tests, as applicable, and the pricing for such Professional Services. Any enhancements and/or modifications to the Licensed Software Requirements resulting from Professional Services shall be incorporated into, and become part of, the Licensed Software Requirements. Upon completion by Contractor, and Acceptance and Approval in writing by County in accordance with the terms of this Agreement, of such Professional Services, Exhibit C.1 (Optional Work) shall be updated accordingly to add such delivered Professional Services via a Change Notice or by an Amendment, in each case, in accordance with Section 13 (Changes to Agreement).

9.9 TIME

Time is of the essence with regard to Contractor's performance of the Services.

9.10 CONTRACTOR ACCESS TO COUNTY FACILITIES

Contractor and Contractor Personnel may be granted access to County facilities, subject to compliance with County's standard administrative and security requirements and policies (disclosed to Contractor or Contractor Personnel in writing or by other means generally used by County to disseminate such information to employees or contractors, including electronic means), for the purpose of performing the Services. Access to County facilities shall be restricted to normal County business hours. Access to County facilities outside normal business hours must be Approved in advance by County's Project Manager, which Approval will not be unreasonably withheld. Contractor shall have no tenancy, license or any other property rights or interest in County facilities. While present at County facilities, Contractor Personnel shall be accompanied by County personnel, unless otherwise specified prior to such event by County's Project Manager or his or her designee. Contractor shall not in any way physically alter or improve any County facility without the prior written Approval of County in its sole and absolute discretion. All Contractor Personnel assigned to County facilities are required to have a County Identification ("**ID**") badge on their person and visible at all times. Contractor bears all expense of the badging. Furthermore, with respect to badging:

(a) Contractor is responsible to ensure that Contractor Personnel have obtained a County ID badge before they are assigned to work in a County facility. Contractor Personnel may be asked to leave a County facility by a County representative if they do not have the proper County ID badge on their person.

(b) Contractor shall notify the County within one (1) Business Day when Contractor Personnel assigned on-site at a County facility is terminated from working under this Agreement. Contractor shall retrieve and return the County ID badge of the Contractor Personnel to the County as soon as practicable, but in no event more than three (3)

Business Days, unless the County agrees to an extension of such time, after the Contractor Personnel has been terminated from working under this Agreement.

(c) If County requests the removal of Contractor Personnel, Contractor shall retrieve and return the County ID badge, if applicable, of the Contractor Personnel to the County as soon as practicable, but in no event more than three (3) Business Days, unless the County agrees to an extension of such time, after the Contractor Personnel has been removed from working under this Agreement.

9.11 DAMAGE TO COUNTY FACILITIES

County shall repair, or cause to be repaired, at Contractor's own cost, any and all damage to County facilities, including, without limitation, County's buildings, grounds, equipment, and furniture, to the extent caused by Contractor or Contractor Personnel. Contractor shall notify County immediately of any and all damages. All reasonable costs incurred by County, as determined by County, for such repairs shall be repaid by Contractor by cash payment upon demand, or without limitation of County's other rights and remedies provided by law or under this Agreement, County may deduct such costs from any amounts due to Contractor from County under this Agreement.

9.12 UNAPPROVED WORK

If Contractor provides any tasks, subtasks, Deliverables, goods, services, or other work to County other than those specified in this Agreement, including a Statement of Work, or if Contractor provides such items requiring County's prior written Approval without first having obtained such written Approval, the same shall be deemed to be a gratuitous effort on the part of Contractor, and Contractor shall have no claim whatsoever against County for such tasks, subtasks, Deliverables, goods, services, or other work.

9.13 APPROVAL OF KEY DELIVERABLES

All Key Deliverables provided by Contractor under this Agreement must have the written Approval of the County Project Director as described in this Section 9.13 (Approval of Key Deliverables). Upon completion of each Key Deliverable, Contractor shall fully complete a Key Deliverable Acceptance Certificate (hereinafter "**Acceptance Certificate**"), as set forth in Exhibit A.27 (Acceptance Certificate), submit it to the County Project Manager for his/her review, Approval, and signature. In the event that the County Project Manager Approves such Acceptance Certificate and the Services described therein, the County Project Manager will then sign such Acceptance Certificate and forward it to the County Project Director for his/her review, Approval, and signature. Each Acceptance Certificate must have the Approval of the County Project Director, as evidenced by the County Project Director's signature on the applicable Acceptance Certificate before Contractor can invoice for payment. In the event County Project Manager or County Project Director does not Approve the Acceptance Certificate, the County Project Manager or County Project Director, as applicable, shall provide the Contractor written notice identifying the reasons for non-Approval. In no event shall County be liable or responsible for any payment prior to such written Approval. Furthermore, County reserves the right to reject any Key Deliverable not Approved by County in accordance with this Section 9.13 (Approval of Key Deliverables).

9.14 INTERFERING ACTS

In the event of Contractor's non-performance of a specific obligation, Contractor shall be excused from its responsibility to perform such obligation under this Agreement if and only to the extent such non-performance of the specific obligation is caused primarily by (a) County's material breach of its obligations under the Agreement, or (b) an act or omission of County that is Finally Determined to prevent or significantly impair Contractor's ability to perform the obligation. Upon the occurrence of acts or omissions by County in breach of County's performance obligations under the Agreement which have been determined by Contractor to be likely to adversely impact its ability to deliver or meet such specific obligation, Contractor shall promptly, but in no event longer than fourteen (14) days Contractor knew or should have known of the occurrence, advise the County Project Director and County Project Manager of such occurrence in writing and identify the reason for Contractor's inability to perform its obligation as a result of County's failure to perform its obligations under this Agreement. Nothing in the foregoing shall (i) relieve Contractor of any portion of liability Finally Determined by a court to be Contractor's arising from a breach of contract claim as to such failure to perform, (ii) preclude County from asserting such failure by Contractor to perform an obligation under this Agreement as a basis for County to terminate the Agreement for cause if subsequently discovered facts demonstrate the failure was not caused by County's failure to perform its obligations under this Agreement, or (iii) preclude County from asserting such failure by Contractor to perform an obligation under this Agreement as a basis for County to terminate the Agreement for cause if Contractor conduct, not caused by County's failure to perform its obligations under this Agreement, contributing to the failure is determined to be one of numerous breaches of its duties or obligations under the Agreement which in the aggregate are material.

10. PROJECT TEAM; REPORTS AND MEETINGS

10.1 PROJECT TEAM

10.1.1 PROJECT DIRECTOR

Contractor shall assign a "**Contractor Project Director**" who shall be dedicated to the County account full-time. The initial County Project Director is specified in Exhibit X (County Key Personnel). The Contractor Project Director shall be responsible for Contractor's performance of all its tasks, subtasks and other Services and ensuring Contractor's compliance with this Agreement. The initial Contractor Project Director, along with the location of the Contractor Project Director, is specified in Exhibit J (Contractor Key Employees). Contractor shall not reassign or replace any Contractor Project Director during the thirty-six (36) months from the Effective Date of the Agreement or Contractor Key Employees during the time of their Continuity Commitment as set forth in Exhibit J (Contractor Key Employees), unless: (a) Contractor obtains County's consent in writing (with respect to Contractor Key Employees which such consent shall not be unreasonably withheld) to such reassignment or replacement; or (b) the individual (i) voluntarily resigns from Contractor and is not rehired by Contractor for a period of no less than six (6) months, (ii) is dismissed by Contractor for (1) misconduct (e.g., fraud, drug abuse, theft), or (2) unsatisfactory performance in respect of his or her duties and

responsibilities to County or Contractor, (iii) is removed from the Contractor Personnel pursuant to Section 10.1.5 (Conduct of Contractor Personnel), (iv) is unable to work due to his or her death or disability, or (v) as to Contractor Key Employees (excluding the Contractor Project Director), requests reassignment under compassionate circumstances (e.g., relocation of a spouse) (subparts (a) and (b) are collectively referred to as "**Approved Reassignments Section 10.1.1**"). In the event the Contractor Project Director leaves after the thirty-six (36) month period above, Contractor must provide a replacement that has the same or better experience or skills as the Contractor Project Director being replaced, County shall have the right to Approve the replacement, a mutually agreed transition and knowledge transfer plan shall be developed and Approved by County, and, provided the Contractor Project Director is still employed by Contractor, Contractor shall make the former Contractor Project Director available to County to address significant issues as to which the former Contractor Project Director has a unique understanding or perspective based on his or her engagement at County.

10.1.2 CONTRACTOR PROJECT MANAGER

Contractor shall assign a "**Contractor Project Manager**" to manage Contractor's performance of the Services. The initial Contractor Project Manager shall be listed in the applicable Statement of Work. The Contractor Project Manager shall be responsible for Contractor's day-to-day activities under this Agreement and for providing County reports as provided in Section 10.2 (Reports and Meetings). The Contractor Project Manager shall also serve as Contractor's liaison with County, assign and schedule Contractor Personnel to perform all of the Services required by County under this Agreement, and act as Contractor's initial representative for dispute resolution. Contractor shall not reassign or replace the Contractor Project Manager during the thirty-six (36) months from the Effective Date of the Agreement, unless: (a) Contractor obtains County's consent in writing to such reassignment or replacement; or (b) the individual (i) voluntarily resigns from Contractor and is not rehired by Contractor for a period of no less than six (6) months, (ii) is dismissed by Contractor for (1) misconduct (e.g., fraud, drug abuse, theft), or (2) unsatisfactory performance in respect of his or her duties and responsibilities to County or Contractor, (iii) is removed from the Contractor Personnel pursuant to Section 10.1.5 (Conduct of Contractor Personnel), (iv) is unable to work due to his or her death or disability, or (v) as to Contractor Project Manager (excluding the Contractor Project Director), requests reassignment under compassionate circumstances (e.g. relocation of a spouse) (subparts (a) and (b) are collectively referred to as "**Approved Reassignments Section 10.1.2**"). In the event the Contractor Project Manager leaves after the thirty-six (36) month period above, Contractor must provide a replacement that has the same or better experience or skills as the Contractor Project Manager being replaced, County shall have the right to Approve the replacement, a mutually agreed transition and knowledge transfer plan shall be developed and Approved by County, and, provided the Contractor Project Manager is still employed by Contractor, Contractor shall make the former Contractor Project Manager available to County to address significant issues as to which the former Contractor Project Manager has a unique understanding or

perspective based on his or her engagement at County. Contractor shall manage the Services in accordance with the Project Management Institute standards or other County Approved IT project management methodology, as determined applicable by County.

10.1.3 COUNTY PROJECT MANAGER

County shall assign a "**County Project Manager**" who will be responsible for County's day-to-day activities with respect to such project under this Agreement. The initial County Project Manager shall be listed in the applicable Statement of Work. The County Project Manager shall serve as County's initial representative for dispute resolution. The County Project Manager shall respond to the Contractor Project Manager's reports to the extent that a response is appropriate as determined by the County Project Manager. All Services provided by Contractor hereunder shall be subject to Approval by the County Project Manager. Any change of the County Project Manager shall be in County's sole discretion; provided County shall notify Contractor in writing of any change. The County Project Manager is not authorized to make any changes in any of the terms and conditions of this Agreement and is not authorized to further obligate County in any respect whatsoever.

10.1.4 CONTRACTOR KEY EMPLOYEES

The Contractor Key Employees shall be dedicated to the County account as set forth in Exhibit J (Contractor Key Employees). The initial Contractor Key Employees are those individuals listed in Exhibit J (Contractor Key Employees). Except for a replacement or reassignment of the Contractor Key Employees due to the occurrence of an Approved Reassignment, Contractor shall not reassign or replace any Contractor Key Employee, if such reassignment or replacement would materially disrupt County's operations, until the completion of any projects to which the Contractor Key Employee is assigned. No Approved Reassignment of a Contractor Key Employee shall occur without at least thirty (30) calendar days (or as reasonably practical under the circumstances) prior written notice to County. Upon an Approved Reassignment of a Contractor Key Employee, the Parties agree to update Exhibit J (Contractor Key Employees) with the name of the agreed upon replacement individual, as appropriate via a Change Notice in accordance with Section 13.2 (Change Notices).

10.1.5 CONDUCT OF CONTRACTOR PERSONNEL

While at the County locations, all Contractor Personnel shall (a) comply with reasonable requests, standard rules, policies, and regulations of County communicated (disclosed to Contractor or Contractor Personnel in writing or by other means generally used by County to disseminate such information to employees or contractors, including electronic means) to Contractor regarding personal and professional conduct (including the wearing of business attire commensurate with County's standards and adhering to County regulations and general safety practices or procedures) generally applicable to such County

locations, and (b) otherwise conduct themselves in a professional and businesslike manner.

The County Project Director or the County Project Manager shall have the right to Approve or request the removal of any Contractor Personnel assigned to perform under this Agreement. Should County be dissatisfied with the performance, competence, responsiveness, capabilities, cooperativeness, or fitness for a particular task of any Contractor Personnel assigned by Contractor to perform Services under this Agreement, County may request the replacement of such Contractor Personnel. The replacement request shall be in writing, and, upon receipt of the request, Contractor shall make reasonable efforts to furnish a qualified and acceptable replacement within fifteen (15) Business Days. In the event Contractor should ever need to remove any Contractor Personnel from performing Services under this Agreement, Contractor shall provide County with adequate notice, except in circumstances in which such notice is not possible, and shall work with County on a mutually agreeable transition plan so as to provide an acceptable replacement and ensure project continuity. Such transitioning to replacement Contractor Personnel shall be at no additional cost to County. Contractor agrees that all Contractor Personnel assigned to perform under this Agreement must have experience and suitable training and skills in the areas in which they are responsible for performing the tasks to which they will be assigned under this Agreement. In the event that the actions or inactions of Contractor Personnel create additional work in connection with the performance of the Services that would have otherwise been unnecessary in the absence of such action or inaction, Contractor shall perform all such additional work at no additional charge to County, unless such action or inaction is demonstrated by Contractor to be at the direction of County. In addition, Contractor represents and warrants that it will take all commercially reasonable steps to assure continuity over time of the membership of the group constituting Contractor Personnel. Contractor shall promptly fill any Contractor Personnel vacancy with Contractor Personnel having qualifications at least equivalent to those of the Contractor Personnel being replaced. In the event Contractor replaces Contractor Personnel, all transition tasks, including, but not limited to training, knowledge transfer, and other time involved with the replacement Contractor Personnel becoming familiar with County and the Services, shall be at no additional cost to County. Additionally, in order to ensure a smooth transition between replacement and former Contractor Personnel, Contractor shall use reasonable effort to make the replacement Contractor Personnel available to shadow the Contractor Personnel to be replaced for a period of not less than ten (10) Business Days. During such shadow period, County shall only be responsible for the charges associated with the Contractor Personnel to be replaced.

10.1.6 COUNTY PERSONNEL

All County personnel assigned to this Agreement shall be under the exclusive supervision of County. Contractor understands and agrees that all such County personnel are assigned only for the convenience of County. Contractor hereby represents that its price, Project Schedule, and performance hereunder are based

solely on the work of Contractor's personnel, except as otherwise expressly provided in this Agreement.

10.2 REPORTS AND MEETINGS

10.2.1 REPORTS

The Contractor Project Manager and County Project Manager, as defined in Section 10.1.3 (County Project Manager), shall communicate at least once every two (2) weeks (the "**Status Report**") about the work in progress. The communications shall include a conference call or an in-person meeting (the "**Status Meeting**") and a report from the appropriate Contractor Personnel regarding:

(a) Period covered by the report;

(b) Tasks, subtasks, Deliverables, goods, and Services scheduled for the reporting period which were completed;

(c) Tasks, subtasks, Deliverables, goods, and Services scheduled for the reporting period which were not completed;

(d) Tasks, subtasks, Deliverables, goods, and Services not scheduled for but completed in the reporting period;

(e) Tasks, subtasks, Deliverables, goods, and Services scheduled to be completed in the next reporting period;

(f) Summary of project status as of reporting date;

(g) Updated Key Deliverable chart;

(h) Issues to be resolved;

(i) Issues resolved;

(j) Updates on any scheduling and Milestones;

(k) Hours worked and expenses incurred;

(l) Updates on knowledge transfer, training, education, and validated effectiveness; and

(m) Any other information that County or Contractor may, from time-to-time, reasonably request in writing that Contractor or County, as the case may be, may deem appropriate.

10.2.2 QUARTERLY REVIEW MEETINGS

Contractor and County shall, at quarterly intervals or such other time periods mutually agreed to by the Parties, hold a review meeting at County's offices, or at such other place as is mutually agreed to by the Parties, to review the performance of the Licensed Software, Third-Party Products, Hosting Software, Services, and Service Levels (as defined in Section 11 (Service Levels)); discuss fee and expense issues; and address such other issues as may be relevant at the time. The Contractor Project Manager (and senior executive personnel from the Contractor who attend) and Contractor's subject matter experts as determined by the meeting agenda shall attend at the sole cost of Contractor.

10.2.3 ALERT REPORTS

Contractor shall promptly notify County in writing (i.e., e-mail or facsimile transmission) on becoming aware of any change or problem that would negatively impact completion or performance of the Licensed Software, Third-Party Products, Hosting Software, Services, and/or Deliverables, the progress of tasks assigned under a Statement of Work, or any schedule in a Statement of Work. The written notice shall include a detailed description of the relevant change or problem and shall be provided to the County Project Manager and County Project Director.

11. SERVICE LEVELS

Contractor represents and warrants that, when installed on the Hardware and the Recommended Configuration and operated in conformance with the terms of this Agreement, the Licensed Software, Hosting Software, Third-Party Products and/or Services (as applicable) shall achieve the service levels ("**Service Levels**") set forth in Exhibit E (Service Levels and Performance Standards), any applicable Statement of Work, and in this Agreement.

12. ACCEPTANCE

12.1 ACCEPTANCE CRITERIA

The Licensed Software, Third-Party Products, Hosting Software, Services, Hardware, Deliverables, and Milestones (if the Statement of Work provides for Milestones) may be subject to acceptance testing by County, in its sole discretion, to verify that they satisfy the acceptance criteria mutually agreed to by the Parties, as developed in accordance with the applicable Statement(s) of Work and this Section 12 (Acceptance) (the "**Acceptance Criteria**"). Such Acceptance Criteria shall be based, at a minimum, on conformance of the Licensed Software, Third-Party Products, Hosting Software, Services, Hardware and Deliverables, operating on the Recommended Configuration and Hardware, to the Specifications and the capability of the Licensed Software, Third-Party Products, Hosting Software, Services, Hardware and Deliverables, operating on the Recommended Configuration and Hardware, to (a) fully support the achievement of Meaningful Use of Certified EHR Technology at each stage of the Meaningful Use requirements as provided in this Agreement, and (b) enable the protection of all Protected Health Information as provided in this Agreement.

12.2 ACCEPTANCE TESTS

When Contractor notifies County that the Licensed Software Third-Party Products, and Hosting Software has been implemented as required under the relevant Statement(s) of Work or that a Service, Deliverable, or Milestone (if the Statement of Work provides for Milestones) has been completed, County may, in its sole discretion, elect to test or evaluate the related Licensed Software, Third-Party Products, Hosting Software Services, Deliverables, and/or Milestones to determine whether they comply in all material respects with the Acceptance Criteria and the whether the EHR System, as a whole, is operating in accordance with the Specifications. Testing will be performed at various stages of the implementation as set forth in the Statement of Work, or as otherwise deemed appropriate by the Parties.

County and/or Contractor, as set forth in a Statement of Work or testing plan, shall conduct all tests (hereinafter "**Acceptance Test(s)**") specified in this Section 12.2 (Acceptance Tests) and in Exhibit A (Statements of Work). Such Acceptance Tests shall include, without limitation, the following:

(a) Installation Test: to validate that all installation tests have been completed.

(b) Initial Component Test: to determine whether the Licensed Software and all components of the EHR System, including Hardware, have been properly installed and are operating in accordance with applicable Specifications.

(c) Integration Test: to confirm that the Licensed Software and all components of the EHR System, including Hardware, operate properly in an integrated fashion and meet all applicable Specifications.

(d) Performance Verification Test: to test the same functionality as the Integration Test using actual data from County's day-to-day operations and confirm that the Licensed Software shall operate in the Production Environment without Errors.

For each of these tests, Contractor shall provide County testing scenarios consistent with Contractor's Best Practices for the applicable Licensed Software, Service, Hardware, Deliverable, and/or Milestone.

12.3 PRODUCTIVE USE

The Licensed Software, Third-Party Products, and Hosting Software shall achieve "**Go-Live**" and be ready for Productive Use when the County Project Director, or his/her designee, Approves in writing (a) Contractor's transition of the Licensed Software, Third-Party Products, and/or Hosting Software to the Production Environment, (b) documented results provided by Contractor certifying successful transition of the Licensed Software, Third-Party Products, and Hosting Software to the Production Environment and operation of the EHR System in accordance with the Specifications, and (c) any other pre-Productive Use testing requirements agreed to in writing by the Parties.

12.4 LICENSED SOFTWARE USE

Following Licensed Software, Third-Party Products, and Hosting Software installation by Contractor and prior to Final Acceptance by County, County shall have the right to use, in a Productive Use mode, any completed portion of the Licensed Software, Third-Party Products, and/or Hosting Software without any additional cost to County where County determines that it is necessary for County operations. Such Productive Use shall not restrict Contractor's performance under this Agreement and shall not be deemed Acceptance or Final Acceptance of the Licensed Software, Third-Party Products, and/or Hosting Software. If such use continues for more than one hundred twenty (120) days, then County shall stop using the Licensed Software, Third-Party Products, and/or Hosting Software in Productive Use or shall agree with Contractor to a schedule for Acceptance.

12.5 FINAL ACCEPTANCE

12.5.1 CONDUCT PERFORMANCE VERIFICATION

Following successful transitioning of the Licensed Software to a Production Environment, County will monitor for Errors and Contractor shall maintain the Licensed Software and EHR System in Productive Use for a minimum of ninety (90) days. Upon occurrence of an Error, Contractor shall provide County with a diagnosis of the Error and proposed solution(s), and Contractor shall correct such Error by re-performance pursuant to, and subject to, the provisions of this Agreement. County and Contractor shall agree upon each such proposed solutions to be used to correct an Error(s) prior to its implementation.

Commencing with Final Acceptance and continuing through the Warranty Period, any problems encountered by County in the use of the Licensed Software and EHR System shall be subject to the applicable Support Services terms under the Agreement.

12.5.2 PERFORMANCE VERIFICATION REPORT

Contractor shall provide to County the performance verification report, including supporting Documentation that the Licensed Software and EHR System comply with the Specifications under full production load. Contractor shall conduct a review with County at a meeting scheduled by County after Productive Use of each Cluster and provide any County-requested demonstrations of the Licensed Software and EHR System including:

(a) Summary of activities, results, and outcomes;

(b) Summary of each Error identified by Contractor or County. The summary shall include for each Error:

(i) Description of each Error and its root cause,
(ii) Business processes, Licensed Software, Third-Party Products, and/or Hosting Software functions, and/or Interfaces impacted,

(iii) Description of all potential risks to the Licensed Software, Third-Party Products, and/or Hosting Software and mitigation strategy for the Licensed Software,

(iv) Corrective action plan, test scenarios, and implementation approach,

(v) Schedule for completion of each corrective action and resources required or assigned,

(vi) Status of each corrective action,

(vii) Date of completion of each correction, and

(viii) Date of the County Project Director's Approval of each correction;

(c) Summary of lessons learned; and

(d) Recommendations for any improvements to the Licensed Software, Third-Party Products, and/or Hosting Software.

12.5.3 FINAL ACCEPTANCE

The Licensed Software and EHR System shall achieve "**Final Acceptance**" and shall be ready for Productive Use by County in the Production Environment when the County Project Director, or his/her designee, Approves in writing that all Errors discovered during the ninety (90) day period following the successful transitioning of the Licensed Software to the Production Environment have been corrected, even if such correction occurred beyond the ninety (90) day period. Contractor shall provide the Certification of Performance Verification and Final Acceptance, certifying that the Licensed Software and the EHR System complies with the Specifications and documenting the review with County under Section 12.5.2 (Performance Verification Report), including agenda, attendees, action items, and supporting documentation.

12.6 FAILED TESTING

(a) If the County Project Director makes a good faith determination at any time that the Licensed Software or the EHR System (as a whole, or any component thereof), Services, Deliverables, and/or Milestones has not successfully completed an Acceptance Test or has not achieved Final Acceptance (collectively referred to for purposes of this Section 12.6 (Failed Testing) as "**Designated Test**"), the County Project Director shall promptly notify Contractor in writing of such failure, specifying with as much detail as possible the manner in which the Licensed Software, Services, Deliverables, Milestones, and/or EHR System failed to pass the applicable Designated Test. Contractor shall immediately commence all reasonable efforts to complete, as quickly as possible, such necessary corrections, repairs, and modifications to the Licensed Software, Services, Deliverables, Milestones, and/or EHR System as will permit the Licensed Software, Services, Deliverables, Milestones, and/or EHR System to be ready for retesting. Contractor shall notify the County Project Director in writing when such corrections, repairs, and modifications have been completed, and the applicable Designated Test shall begin again. If, after the applicable Designated Test has been completed for a second time, the County Project Director makes a good faith determination that the Licensed

Software, Services, Deliverables, Milestones, and/or EHR System again fails to pass the applicable Designated Test, the County Project Director shall promptly notify Contractor in writing, specifying with as much detail as possible the manner in which the Licensed Software, Services, Deliverables, Milestones, and/or EHR System failed to pass the applicable Designated Test. Contractor shall immediately commence all reasonable efforts to complete, as quickly as possible, such necessary corrections, repairs, and modifications to the Licensed Software, Services, Deliverables, Milestones, and/or EHR System as will permit the Licensed Software, Services, Deliverables, Milestones, and/or EHR System to be ready for retesting.

(b) Such procedure shall continue, subject to County's rights under Sections 14.3.2 (Credits to County) and 14.3.3 (Termination for Failure to Complete Key Deliverable) in the event Contractor fails to timely complete any Key Deliverable, until such time as County notifies Contractor in writing either: (i) of the successful completion of such Designated Test or (ii) that County has concluded, subject to the Dispute Resolution Procedure, that satisfactory progress toward such successful completion of such Designated Test is not being made, in which latter event, County shall have the right to make a determination, which shall be binding and conclusive on Contractor, that a non-curable default has occurred and to terminate this Agreement in accordance with Section 29.2 (Termination for Material Breach) on the basis of such non-curable default.

(c) Such a termination by County may be, subject to the Dispute Resolution Procedure, as determined by County in its sole judgment: (i) a termination with respect to one or more of the components of the Licensed Software, Third-Party Products, and/or Hosting Software; (ii) a termination of the Statement(s) of Work relating to the Licensed Software, Third-Party Products, Hosting Software, Service(s), Deliverables(s), and/or Milestone(s) that is (are) not performing or conforming as required herein; or (iii) if County believes the failure to pass the applicable Designated Test materially affects the functionality, performance, or desirability to County of the EHR System as a whole, the entire Agreement. In the event of a termination under this Section 12.6 (Failed Testing), County shall have the right to receive from Contractor, within ten (10) days of written notice of termination, reimbursement of all payments made to Contractor by County under this Agreement for the component(s), Licensed Software, Third-Party Products, Hosting Software, Service(s), Deliverables(s), Milestone(s), and/or EHR System as to which the termination applies, or, if the entire Agreement is terminated, all amounts paid by County to Contractor under this Agreement. If the termination applies only to one or more Licensed Software or EHR System component(s), at County's sole option, any reimbursement due to it may be credited against other sums due and payable by County to Contractor. The foregoing is without prejudice to any other rights that may accrue to County or Contractor under the terms of this Agreement or by law.

12.7 INTEGRATION/INTERFACING

If the Licensed Software, Third-Party Products, and/or Hosting Software are to be integrated/Interfaced with other software, equipment, and/or systems provided by Contractor or at the direction of Contractor, including any customized Enhancements and Work Product, the Licensed Software, Third-Party Products, and/or Hosting Software shall not be deemed Accepted by County until the Licensed Software, Third-Party Products, and/or Hosting Software

and such other systems have been successfully integrated/Interfaced and Accepted by County in accordance with the terms of this Section 12 (Acceptance). For example, if Contractor is to provide Licensed Software, Third-Party Products, and/or Hosting Software consisting of multiple Modules or that includes Enhancements, including Work Product, to the Licensed Software, Third-Party Products, and/or Hosting Software as part of the Services, County's Acceptance of the Licensed Software, Third-Party Products, Hosting Software, and any individual Module or Enhancement shall not be final until County Accepts all of the Licensed Software, Third-Party Products, and/or Hosting Software and Modules or Enhancements integrated/Interfaced together as a complete system, including the operation of the Licensed Software, Third-Party Products, and/or Hosting Software on all equipment required for its use in conformance with the terms of this Agreement.

13. CHANGES TO AGREEMENT

13.1 GENERAL

No representative of either County or Contractor, including those named in this Agreement, is authorized to make any changes in any of the terms, obligations, or conditions of this Agreement, except through the procedures set forth in this Section 13 (Changes to Agreement). County reserves the right to change any portion of the Services required under this Agreement and to change any other provisions of this Agreement. All such changes shall be accomplished only as provided in this Section 13 (Changes to Agreement).

13.2 CHANGE NOTICES

For any change which does not authorize Contractor to incur any additional costs or expenses or affect any term or condition of this Agreement, a written change notice ("**Change Notice**") may be prepared and executed by the DHS CIO or designee.

13.3 CHANGE ORDERS

For any change which authorizes Contractor to incur any additional costs or expenses using Pool Dollars, a written Change Order may be prepared and executed by the DHS CIO or designee. For any Optional Work requested by County, following agreement on the Services, a Change Order shall be prepared and executed by each of: (a) the County Project Director, and (b) Contractor's authorized representative(s). County DHS CIO or designee is specifically authorized to execute Change Orders for expenditure of Pool Dollars for acquisition of Optional Work under the Agreement. Any requests for the expenditure of Pool Dollars must be Approved in writing by the DHS CIO or designee.

13.4 AMENDMENTS

Except as otherwise provided in this Agreement, for any change requested by County which requires a change to the Contract Sum or affects any term or condition included in this Agreement, a negotiated written amendment ("**Amendment**") to this Agreement must be prepared and executed by each of the Board and Contractor's authorized representative. Notwithstanding the foregoing, DHS' Director is specifically authorized to execute an Amendment to this Agreement on behalf of County upon County's election to extend this

Agreement for a Renewal Term(s) or to include Optional Work based on the terms negotiated herein.

13.5 CHANGES TO THE PROJECT SCHEDULE

Changes to the Project Schedule shall be made upon mutual agreement, in writing, by the DHS CIO or designee and the Contractor Project Director by Change Notice or otherwise, provided that the DHS CIO's or designee and the Contractor Project Director's agreement to alter the Project Schedule shall not prejudice either Party's right to claim that such alterations constitute an Amendment to this Agreement that shall be governed by the terms of Section 13.4 (Amendments) above.

13.6 EXTENSIONS OF TIME

Notwithstanding any other provision of this Section 13 (Changes to Agreement), to the extent that extensions of time for Contractor performance do not impact either the scope of Services or cost of this Agreement, the DHS CIO or designee, in his/her sole discretion, may grant Contractor extensions of time in writing for the work listed in the applicable sequentially numbered Exhibit A.25 (Project Control Document), provided such extensions shall not exceed a total of six (6) months beyond Final Acceptance.

13.7 BOARD ORDERS

Notwithstanding any other provision of this Section 13 (Changes to Agreement) or Section 29.6 (Termination for Convenience), Director shall take all appropriate action to carry out any orders of the Board relating to this Agreement, which directly impact the Licensed Software, EHR System or any of its components, or the budget allocated to the Licensed Software, EHR System or any of its components, or the Agreement, and, for this purpose, Director is authorized to: (1) issue written notice(s) of partial or total termination of this Agreement pursuant to Section 29.6 (Termination for Convenience) without further action by the Board and/or (2) prepare and execute Amendment(s) to this Agreement, which shall reduce the Services and the Contract Sum without further action by the Board.

(a) Such notices of partial or total termination shall be authorized under the following conditions:

(i) Notices shall be in compliance with all applicable Federal, State and County laws, rules, regulations, ordinances, guidelines and directives.

(ii) Director shall obtain the Approval of County Counsel for any notice.

(iii) Director shall file a copy of all notices with the Executive Office of the Board and County's Chief Executive Office within thirty (30) days after execution of each notice.

(b) Such Amendments shall be authorized under the following conditions:

(i) Amendments shall be in compliance with all applicable Federal, State, and County laws, rules, regulations, ordinances, guidelines and directives.

(ii) The Board has appropriated sufficient funds for purposes of such Amendments and this Agreement.

(iii) Director shall obtain the Approval of County Counsel for any Amendment.

(iv) Director shall file a copy of all Amendments with the Executive Office of the Board and County's Chief Executive Office within fifteen (15) days after execution of each Amendment.

13.8 FACSIMILE

Except for the Parties' initial signatures to this Agreement, which must be provided in "original" form and not by facsimile or other electronic form, County and Contractor hereby agree to regard facsimile representations of original signatures of authorized officials of each Party, when appearing in appropriate places on the Change Notices and Change Orders prepared pursuant to this Section 13 (Changes to Agreement) and received via communications facilities, as legally sufficient evidence that such original signatures have been affixed to Change Notices and Change Orders to this Agreement, such that the Parties need not follow up facsimile transmissions of such documents by subsequent (non-facsimile) transmissions of "original" versions of such documents.

14. CONTRACT SUM

14.1 MAXIMUM CONTRACT SUM

The Contract Sum under this Agreement shall be the total monetary amount payable by County to Contractor for supplying all the tasks, subtasks, Deliverables, goods, and Services required or requested by County under and during the Term of this Agreement. If County does not Approve work in writing, no payment shall be due Contractor for those Services. The Contract Sum, including all applicable taxes, authorized by County hereunder shall not exceed Three Hundred Sixty-Six Million, Nine Hundred Ninety Thousand, Five Hundred Ninety-Four Dollars ($366,990,594) as further detailed in Exhibit C (Fees; Contractor Professional Services Rates), unless the Contract Sum is modified pursuant to a duly Approved Amendment to this Agreement by the Board and Contractor's authorized representative(s) pursuant to Section 13 (Changes to Agreement). The Contract Sum under this Agreement shall cover the authorized payments for all elements of the EHR System, including the Licensed Software, Third-Party Products, Hosting Software, Hardware, and Services including, Implementation Services, Hosting Services, Support Services, and any Optional Work. The Contract Sum shall not be adjusted for any costs or expenses whatsoever of Contractor.

Contractor shall maintain a system of record keeping that will allow Contractor to determine when it has incurred seventy-five percent (75%) of the Contract Sum, including the Pool Dollars expenditures, authorized for this Agreement. Upon occurrence of this event, Contractor shall provide written notification to the County Project Director in accordance with Section 32.3 (Notices).

14.2 LICENSED SOFTWARE, THIRD-PARTY PRODUCTS, AND HOSTING SOFTWARE FEES

The license fees for the Licensed Software, Third-Party Products, and Hosting Software are specified in Exhibit C (Fees; Contractor Professional Services Rates). Payment of the licensee fees for the Licensed Software, Third-Party Products, and Hosting Software shall be made in accordance with the payment schedule specified in Exhibit C (Fees; Contractor Professional Services Rates).

14.3 IMPLEMENTATION SERVICES

14.3.1 IMPLEMENTATION FEES

Contractor shall provide Implementation Services in accordance with Exhibit A (Statements of Work) and the Agreement in exchange for County's payment of the applicable Implementation Fees. The "**Implementation Fees**" shall include any and all fees and costs to be paid by County for the Implementation Services, including all Services as that term is defined and the subset of those Services described in Exhibit A (Statements of Work), and all travel and living expenses incurred in connection with providing the Implementation Services, as specified in Exhibit C (Fees; Contractor Professional Services Rates). The Implementation Fees shall be a Fixed Fee amount specified in such Exhibit C (Fees; Contractor Professional Services Rates).

Included within the Services subject to the Implementation Fees, Contractor shall meet all Key Milestones by the date(s) specified unless extended by County in writing prior to the Key Milestone date. Should Contractor anticipate that the Contractor resources assigned to provide the Services, or any segment of Services (e.g., data conversion, building the test environment, or another work segment as set forth in the Statements of Work), subject to the Implementation Fees, are not sufficient to timely complete the Services, Contractor shall supplement them with Contractor resources at no additional cost to County as needed to timely complete the Services, or any segment of Services, within the time set forth in the Statement of Work.

14.3.2 CREDITS TO COUNTY

Contractor agrees that delayed performance by Contractor may cause damages to County, which are uncertain and would be impracticable or extremely difficult to ascertain in advance. Contractor further agrees that, in conformity with California Civil Code Section 1671, Contractor shall be liable to County for liquidated damages in the form of credits, as specified below in this Section 14.3.2 (Credits to County), as a fair and reasonable estimate of such damages. Any amount of such damages is not and shall not be construed as penalties and, when assessed, will be deducted from County's payment that is due.

For each and every occasion upon which a Deliverable marked on the applicable Exhibit A.25 (Project Control Document) as "Key" (hereinafter "**Key Deliverable**") has not been completed by Contractor within thirty (30) days after the date

scheduled for completion thereof as set forth in such Exhibit A.25 (Project Control Document) (hereinafter for each Key Deliverable "**Credit Due Date**"), other than as a result of delays caused by acts or omissions of County, and unless otherwise Approved in writing by the County Project Manager or designee in his/her discretion, County shall be entitled to receive credit against any or all amounts due to Contractor under this Agreement or otherwise in the total amount of One Thousand Dollars ($1,000) for each day after the Credit Due Date that the Key Deliverable is not completed as a fair and reasonable estimate of the harm caused by the delay provided that the total aggregate credits pursuant to this Section 14.3.2 (Credits to County) shall not exceed the Contract Sum. All of the foregoing credits shall apply separately, and cumulatively, to each Key Deliverable in the Project Schedule. A determination whether County shall assess credits due to it pursuant to this Section 14.3.2 (Credits to County) shall be made by the County Project Manager in his/her reasonable discretion. Notwithstanding the foregoing, if any Key Deliverable is not completed by the Credit Due Date, resulting in any of the above credits, but such Key Deliverable is thereafter completed by the date of the Milestone to which such Key Deliverable pertains, and if all other Deliverables required for the completion of such Milestone are completed by the Milestone date, then from and after the date such Milestone is completed the foregoing credits shall be reversed and shall no longer be deemed to apply as to any such Key Deliverable.

A Key Deliverable shall be deemed completed for purposes of this Section 14.3.2 (Credits to County) and Section 14.3.3 (Termination for Failure to Complete Key Deliverable) on the earliest date that all of the tasks, subtasks, Deliverables, goods, and Services required for the completion of such Key Deliverable are completed and delivered to County, provided that all of such tasks, subtasks, Deliverables, goods, and Services required for the completion of such Key Deliverable are thereafter Approved in writing by County pursuant to Section 9.13 (Approval of Key Deliverables) without prior rejection by County or significant delay in County's Approval thereof, which delay is the result of Contractor's failure to deliver such tasks, subtasks, Deliverables, goods, and Services in accordance with the terms hereof. For purposes of this Section 14.3.2 (Credits to County) and Section 14.3.3 (Termination for Failure to Complete Key Deliverable), the determination of whether a Key Deliverable has been so completed and is so Approved, and of the date upon which such Key Deliverable was completed, shall be made by the County Project Director as soon as practicable after County is informed by Contractor that such Key Deliverable has been completed and is given all the necessary information, data, and documentation to verify such completion.

14.3.3 TERMINATION FOR FAILURE TO COMPLETE KEY DELIVERABLE

In addition to the foregoing provisions of Section 14.3.2 (Credits to County), if any Key Deliverable is not completed within thirty (30) days after the applicable Credit Due Date other than as a result of delays caused by Interfering Acts, and thereafter Approved in writing by County pursuant to Section 9.13 (Approval of Key Deliverables), and unless the County Project Director and the Contractor Project Director have otherwise agreed, in writing, prior to such date scheduled for

completion, then County may, upon notice to Contractor, terminate this Agreement for default in accordance with Section 29.2 (Termination for Material Breach) as determined in the sole discretion of County, subject to the cure provisions set forth in Section 29.2 (Termination for Material Breach).

14.4 SUPPORT SERVICES

Contractor shall, during the Support Term, provide to County Support Services in exchange for County's payment of the applicable Support Services Fees set forth in Exhibit C (Fees; Contractor Professional Services Rates).

Contractor shall invoice County for Support Services for the applicable Cluster on a monthly basis, and County will pay the applicable monthly fees to Contractor in arrears. The monthly Support Services Fees for the applicable Cluster shall be calculated as a portion of the Support Services Fees as specified in Exhibit C (Fees; Contractor Professional Services Rates).

The Support Services Fees shall be fixed during the Initial Support Term of this Agreement. Thereafter, Contractor is eligible for a Cost of Living Adjustment on an annual basis during the Support Renewal Term. The amount of any such increase shall be determined, and subject to the limits, as described in Section 14.10 (Cost of Living Adjustment).

14.5 OTHER SERVICES AND THIRD-PARTY PRODUCT FEES

The fees for the Hosting Services, Third-Party Products (including clinical content) are specified in Exhibit C (Fees; Contractor Professional Services Rates). Payment of such fees shall be made, first in accordance with the requirements of this Agreement, and then pursuant to the payment schedule in Exhibit C (Fees; Contractor Professional Services Rates).

14.6 HARDWARE

All Hardware costs and fees are set forth in Exhibit C (Fees; Contractor Professional Services Rates).

14.7 IMPLEMENTING OPTIONAL WORK

14.7.1 NEW SOFTWARE

During the Support Term, if New Software is subsequently made Generally Available to any of Contractor's other clients, County shall have the option to obtain such New Software or products at a price equal to the Contractor's then current list pricing reduced by a rate or discount percentage as set forth in Exhibit C (Fees; Contractor Professional Services Rates).

14.7.2 PROFESSIONAL SERVICES

Upon County's request for Professional Services, Contractor shall provide to County, within fifteen (15) Business Days of County's request therefor, a written quotation providing a pricing proposal consistent with the payment method required by County based on the Fixed Hourly Rate, as applicable. Contractor's quotation shall

be valid for at least ninety (90) days from submission. Contractor's rates for Professional Services shall be subject to the applicable pricing terms set forth in Exhibit C (Fees; Contractor Professional Services Rates) during the Term of this Agreement. Contractor's Fixed Hourly Rate for Professional Services, as of the Effective Date, specified in Exhibit C (Fees; Contractor Professional Services Rates), shall be fixed for thirty-six (36) months after the Effective Date. Thereafter, Contractor may increase such rates by providing notice to County at least ninety (90) days prior to the commencement of a new Contract Year during the Support Term of this Agreement. The amount of any such increase shall be determined, and subject to the limits, as described below in Section 14.10 (Cost of Living Adjustment).

(a) Fixed Fee or Not to Exceed. In the event that the Parties agree that Contractor shall perform the Professional Services on either a fixed fee or not to exceed basis, the applicable Statement of Work shall include an estimated percentage allocation of the fixed fee or not to exceed amount for each Milestone. Contractor shall not perform Professional Services in excess of the fee amount allocated to a Milestone in the Statement of Work without first obtaining prior County written Approval to exceed the fee amount allocated to the Milestone in the Statement of Work. If Contractor provides Professional Services in excess of the fee amount allocated to a Milestone in the Statement of Work without first obtaining prior County written Approval, such Professional Services shall be deemed to be a gratuitous effort on the part of Contractor, and Contractor shall have no claim whatsoever against County therefor (it being understood by the Parties that Contractor shall have no obligation to continue to provide such gratuitous Professional Services unless Approved by County in writing in which case County shall compensate Contractor in accordance with this Agreement).

(b) Time and Materials. In the event that the Parties agree that Contractor shall perform the Professional Services on a time and materials basis, the applicable Statement of Work shall include a fee estimate. In the event it is anticipated that the fee estimate provided in such Statement of Work ("**Contractor Professional Services Fee Projection**") will be exceeded, Contractor will provide written notice to County in advance of incurring such excess cost. In the event Contractor does provide County with advance notice of a Project Overrun and County elects to proceed, any amounts incurred in excess of the Contractor Professional Services Fee Projection will be considered a "**Project Overrun**." In the event Contractor does not provide County with advance notice of a Project Overrun, Contractor shall be solely responsible for the Project Overrun. Project Overruns shall be accounted for upon the earlier of the completion of the applicable Statement of Work or the expiration or termination of this Agreement. Prior to such accounting, Contractor and County agree to assume that both Parties are equally at fault and will share equally of the Project Overrun. If, as part of the Dispute Resolution Procedure, either

Party is determined to be the primary cause of a Project Overrun, costs will be shared as follows:

(i) If Contractor, or any party other than County which Contractor has subcontracted to perform services or tasks, is determined to be the primary cause of the Project Overrun, Contractor shall be responsible for seventy-five percent (75%) of the Project Overrun. To the extent County has paid fees to Contractor as to such Project Overrun under the equal sharing provision above, such amounts paid in excess of the Project Overrun share allocated under this subpart shall be refunded to County by Contractor.

(ii) If County, or any party other than Contractor which County has contracted to perform services or tasks, is determined to be the primary cause of the Project Overrun, County shall be responsible for seventy-five percent (75%) of the Project Overrun. To the extent Contractor has paid or credited fees to County as to such Project Overrun under the equal sharing provision above, such amounts paid or credited in excess of the Project Overrun share allocated under this subpart shall be refunded to Contractor by County.

The determination of "**primary cause**" shall be made in accordance with Section 27 (Dispute Resolution Procedure) and, notwithstanding anything to the contrary in Section 27 (Dispute Resolution Procedure), shall be binding, final, and not subject to appeal.

14.8 NON-APPROPRIATION OF FUNDS

County's obligation may be limited if it is payable only and solely from funds appropriated for the purpose of this Agreement. Notwithstanding any other provision of this Agreement, County shall not be obligated for Contractor's performance hereunder or by any provision of this Agreement during any of County's future fiscal years unless and until the Board appropriates funds for this Agreement in County's budget for each such future fiscal year. In the event that funds are not appropriated for this Agreement, then County shall, at its sole discretion, either (a) terminate this Agreement as of June 30 of the last fiscal year for which funds were appropriated or (b) reduce the work provided hereunder in accordance with the funds appropriated. In the event of such a termination, Contractor shall be entitled to seek payment for Deliverables completed by Contractor and Approved by County in accordance with this Agreement prior to the effective date of such termination. County will notify Contractor in writing of any such non-appropriation of funds at its election at the earliest possible date.

14.9 COUNTY'S OBLIGATION FOR FUTURE FISCAL YEARS

In the event that the Board adopts, in any fiscal year, a County budget which provides for the reductions in the salaries and benefits paid to the majority of County employees and imposes similar reductions with respect to County contracts, County reserves the right to reduce its payment obligation under this Agreement correspondingly for that fiscal year and any subsequent fiscal year during the Term of this Agreement (including any extensions), and the

products and services to be provided by Contractor under this Agreement shall also be reduced correspondingly. County's notice to the Contractor regarding said reduction in payment obligations shall be provided within thirty (30) calendar days of the Board's Approval of such actions. Except as set forth in this Section 14.9 (County's Obligation for Future Fiscal Years), Contractor shall continue to perform as provided in this Agreement.

14.10 COST OF LIVING ADJUSTMENT

Any Cost of Living Adjustment under this Agreement will be limited to the Support Services and the Fixed Hourly Rate for Professional Services provided during the Renewal Support Term. The Parties will assess whether Contractor is eligible for a Cost of Living Adjustment as provided under this Section on an annual basis during the Renewal Support Term provided the maximum amount of a Cost of Living Adjustment in any Contract Year shall be capped at the lesser of: (a) the difference between the most recently published percentage change, if any, in the U.S. Department of Labor, Bureau of Labor Statistics Consumer Price Index - Urban Wage Earners and Clerical Workers ("**CPI-W**") for the Los Angeles – Riverside – Orange County Area for the Contract Year prior to the year for which the COLA is being calculated and the CPI-W for the Contract Year of the first Use Reconciliation under Exhibit C (Fees; Contractor Professional Services Rates) (the "**Base Year Index**"), or (b) three percent (3%) (hereafter, "**Cost of Living Adjustment**" or "**COLA**"). In no event shall the cumulative Cost of Living Adjustment increases over the Renewal Support Term exceed five percent (5%) of the Support Services Fee or Fixed Hourly Rate for Professional Services as of the Effective Date and as set forth in Exhibit C (Fees; Contractor Professional Services Rates).

14.11 ALL FEES STATED

Except as provided in this Section 14 (Contract Sum) or in the event of an Amendment to this Agreement, there are no other fees or charges to be paid by County in connection with this Agreement for the Licensed Software, Third-Party Products, Hosting Software, Hardware, and Services, including without limitation Implementation Services, Hosting Services, Support Services and/or other Services or Deliverables provided by Contractor to County under this Agreement. Any work performed by Contractor and not specifically authorized by County in writing shall be considered gratuitous and Contractor shall have no right or claim whatsoever to any form of compensation.

15. INVOICES AND PAYMENTS

15.1 INVOICES

Contractor shall invoice County in accordance with Exhibit C (Fees; Contractor Professional Services Rates) (1) for Implementation Services, based on the Deliverable amounts due, as set forth in Exhibit A.25 (Project Control Document) upon Contractor's completion and County's written Approval of billable Deliverables; (2) for Support Services, by payment of monthly fees monthly in arrears commencing sixty (60) days after Productive Use of each Cluster; and (3) for all Optional Work, on a per Change Order basis by payment of the actual price expended by Contractor for the provision of Optional Work, not to exceed the Maximum Fixed Price quoted for such Optional Work following Contractor's completion and County's written Approval thereof. Contractor shall invoice for Hosting Services and Third-Party Products (including clinical

content) in accordance first to the requirements of this Agreement, and then pursuant to the payment schedule in Exhibit C (Fees; Contractor Professional Services Rates).

15.1.1 SUBMISSION OF INVOICES

Contractor's invoice shall include the charges owed to Contractor by County under the terms of this Agreement as provided in Exhibit C (Fees; Contractor Professional Services Rates). All invoices and supporting documents under this Agreement shall be submitted to the DHS CIO or designee in accordance with Section 32.3(a) (Notices), with copies to DHS Finance.

15.1.2 INVOICE DETAILS

Each invoice submitted by Contractor shall indicate, at a minimum:

(a) Agreement name and number;

(b) The tasks, subtasks, Deliverables, goods, services, or other Services for which payment is claimed, including Implementation Services Deliverables, Support Services, and Optional Work;

(c) The price of such tasks, subtasks, Deliverables, goods, services, or other Services calculated based on the pricing terms set forth in Exhibit C (Fees; Contractor Professional Services Rates) or any Change Order, as applicable;

(d) The date of written Approval of the tasks, subtasks, Deliverables, goods, services, or other Services by the County Project Director;

(e) Indication of any applicable withhold or Holdback Amounts for payments claimed or reversals thereof;

(f) Indication of any applicable credits due County under the terms of this Agreement or reversals thereof;

(g) A copy of all applicable Acceptance Certificates signed by the County Project Director and the County Project Manager; and

(h) Any other information reasonably required by the County Project Director.

15.1.3 APPROVAL OF INVOICES

All invoices submitted by Contractor to County for payment shall have County's written Approval as provided in this Section 15.1 (Invoices), which approval shall not be unreasonably withheld. In no event shall County be liable or responsible for any payment prior to such written Approval.

15.1.4 INVOICE DISCREPANCIES

The DHS CIO or designee will review each invoice for any discrepancies and will, within forty-five (45) days of receipt thereof, notify Contractor in writing of any discrepancies found upon such review and submit a list of disputed charges. Contractor shall review the disputed charges and send a written explanation detailing the basis for the charges within forty-five (45) days of receipt of County's notice of discrepancies and disputed charges. If the DHS CIO or designee does not receive a written explanation for the charges within such forty-five (45) day period, Contractor shall be deemed to have waived its right to justify the original invoice amount, and County shall pay the undisputed amount as provided in Section 15.4 (Payments) and shall not be obligated to pay the disputed amount applicable to that invoice period.

All correspondence to County relating to invoice discrepancies shall be sent by email, followed by hard copy, directly to DHS Finance with a copy to the DHS CIO or designee in accordance with Section 32.3 (Notices). All correspondence to Contractor relating to invoice discrepancies shall be sent by email, followed by hard copy, directly to Contractor's Client Financial Specialist with a copy to the Contractor Client Results Executive ("**CRE**") or designee in accordance with Section 32.3 (Notices).

15.2 DELIVERY OF LICENSED SOFTWARE

All Licensed Software, Third-Party Products, Hosting Software and Documentation provided by Contractor under this Agreement, including the product of Support Services and any Optional Work, shall be delivered (i) solely in electronic format (e.g., via electronic mail or internet download), or (ii) personally by Contractor Personnel who shall load the Licensed Software, Third-Party Products and Documentation onto County's hardware but who will retain possession of all originals and copies of such tangible media (e.g., CD-ROM, magnetic tape, printed manuals) used to deliver the Licensed Software and Documentation to County.

Any Licensed Software, Third-Party Products, Hosting Software and Documentation provided or delivered by Contractor to County in a tangible format for Contractor Personnel to load and leave with the Licensed Software and Documentation shall be F.O.B. Destination. The Contract Sum shown in Section 14.1 (Maximum Contract Sum) includes all amounts necessary for County to reimburse Contractor for all transportation and related insurance charges, if any, on Licensed Software, Third-Party Products, Hosting Software and Documentation procured by County from Contractor pursuant to this Agreement. All transportation and related insurance charges, if any, shall be paid directly by Contractor to the applicable carrier.

In the event Licensed Software, Third-Party Products, Hosting Software or Documentation is provided or delivered by Contractor to County in a tangible format, Contractor shall bear the full risk of loss due to total or partial destruction of the Licensed Software, Third-Party Products, Hosting Software and/or Documentation loaded on CDs or other computer media until such items are delivered to and Accepted in writing by County.

15.3 SALES/USE TAX

The Contract Sum shown in Section 14.1 (Maximum Contract Sum) shall be deemed to include all amounts necessary for County to reimburse Contractor for all applicable California and other state and local sales/use taxes on all Licensed Software, Third-Party Products, Hosting Software provided by Contractor to County pursuant to or otherwise due as a result of this Agreement, including, but not limited to, the product of Support Services and any Optional Work, to the extent applicable. All California sales/use taxes shall be paid directly by Contractor to the State or other taxing authority.

Contractor shall be solely liable and responsible for, and shall indemnify, defend, and hold harmless County from, any and all such California and other state and local sales/use taxes. Further, Contractor shall be solely liable and responsible for, and shall indemnify, defend, and hold harmless County from, all applicable California and other state and local sales/use tax on all other items provided by Contractor pursuant to this Agreement and shall pay such tax directly to the State or other taxing authority. In addition, Contractor shall be solely responsible for all taxes based on Contractor's income or gross revenue, or personal property taxes levied or assessed on Contractor's personal property to which County does not hold title.

15.4 PAYMENTS

County will pay all undisputed invoice amounts to Contractor within forty-five (45) days of receipt of invoices that have not been disputed in accordance with Section 15.1.4 (Invoice Discrepancies) above. County's failure to pay within the forty-five (45) day period, however, shall not be deemed as automatic invoice Approval or Acceptance by County of any Deliverable for which payment is sought, nor shall it entitle Contractor to impose an interest on any late payment.

15.5 NO PAYMENT FOR SERVICES PROVIDED FOLLOWING EXPIRATION/TERMINATION OF AGREEMENT

Contractor shall have no claim against County for payment of any money or reimbursement, of any kind whatsoever, for any service provided by the Contractor after the expiration or other termination of this Agreement. Should the Contractor receive any such payment it shall immediately notify County and shall immediately repay all such funds to County. Payment by County for services rendered after expiration/termination of this Agreement shall not constitute a waiver of County's right to recover such payment from the Contractor. This provision shall survive the expiration or other termination of this Agreement.

15.6 HOLDBACKS

(a) The Implementation Fees shall be allocated among the Key Milestones as set forth in the Statements of Work ("**Key Milestone Allocation**"). The amount allocated to each Key Milestone need not be the same, provided, however, all allocated amounts must aggregate to equal the Implementation Fees. The Key Milestone Allocation will be divided by the number of months set forth in the original Statement of Work for completion of the Key Milestone ("**Key Milestone Scheduled Duration**") and that amount shall be multiplied by ninety percent (90%) to determine the "**Monthly Key**

Milestone Payment." The Monthly Key Milestone Payment will be made by County only for the Key Milestone Scheduled Duration. The remaining ten percent (10%) of the amounts invoiced ("**Holdback Amount**") will be payable as set forth in this Section 15.6 (Holdbacks). All amounts invoiced by Contractor under the Statements of Work shall be subject to the Holdback Amount. The Holdback Amount will be payable to Contractor based upon County's Approval of the applicable Key Milestone.

(b) A Key Milestone shall be deemed Approved for purposes of this Section 15.6 (Holdbacks) on the earliest date that all of the tasks, subtasks, Deliverables, goods, Services and other work required for completion of the Key Milestone are completed, tested for acceptability, and Approved in writing by County. The determination of whether each Key Milestone has been so completed and so Approved shall be made by the County Project Director as soon as practicable after County is informed by Contractor that such Key Milestone has been completed and is given all the necessary information, data, and documentation to verify such completion. If a Key Milestone is not Approved due to its failure to meet the applicable Acceptance Criteria or tests within thirty (30) calendar days of its scheduled completion per the Statement of Work, the Holdback Amount will not be paid until Approval of the next Key Milestone. No accumulated Holdback Amounts will be paid as to any Key Milestone, until all preceding Key Milestones have been Approved.

15.7 RESPONSIBILITY FOR COSTS

Except for any reimbursable expenses specified in a Statement of Work, or as otherwise Approved in writing by County, Contractor shall be responsible for all costs and expenses incidental to the provision of the Licensed Software and performance of Services, including but not limited to, all costs for Third-Party Products and equipment provided by Contractor, and all fees, fines, licenses, bonds or taxes required of or imposed against Contractor including but not limited to corporate income tax, sales and excise taxes or amounts levied thereof, and all other of Contractor's costs of doing business. Contractor shall supply copies of third-parties' invoices and other reasonable supporting documentation in substantiation of any reimbursable expenses, as County may request from time to time. No payments will be made for services rendered or expenses incurred by Contractor other than the Services or Deliverables unless such services are Approved in advance in writing by County, and Contractor supplies such documentation as County may request with respect to such costs.

15.8 TRAVEL AND LIVING EXPENSES

If reimbursement of travel expenses for Professional Services as provided in Section 14.7.2 (Professional Services), including airfare, parking, mileage, rental cars, taxi, fuel, tolls, lodging, and per diem, if applicable, are authorized by County in connection with a separate Statement of Work, such expenses shall be subject to, and shall not exceed, the expenditure limits set forth for County personnel in the then current Chapter 5.40 (Travel and Other Expenses) of the Los Angeles County Code, and as updated from time to time by the Los Angeles County Auditor-Controller. Contractor will provide all invoices, receipts, and other documentation reasonably needed to support the request for reimbursement.

For the avoidance of doubt, all travel and living expenses for the Services described in the Statements of Work are included in the Contract Sum.

15.9 PAYMENT DOES NOT IMPLY ACCEPTANCE

The making of any payment or payments by County, or the receipt thereof by Contractor, shall not imply Acceptance by County of such items or the waiver of any warranties or requirements of this Agreement.

15.10 RECORD RETENTION AND INSPECTION/AUDIT SETTLEMENT

Contractor shall maintain accurate and complete financial records of its activities and operations relating to this Agreement in accordance with generally accepted accounting principles. Contractor shall also maintain accurate and complete employment and other records relating to its performance of this Agreement. Contractor agrees that the County, any Federal or State auditor, or their authorized representatives, shall have access to and the right to examine, audit, excerpt, copy, or transcribe any pertinent transaction, activity, or record relating to this Agreement. For the avoidance of doubt, such audits include but are not limited to audits under the Health Care Coverage Initiative and the HITECH Act. All such material, including, but not limited to, all financial records, bank statements, cancelled checks or other proof of payment, timecards, sign-in/sign-out sheets and other time and employment records, and proprietary data and information, shall be kept and maintained by the Contractor and shall be made available to the County during the Term of this Agreement and for a period of five (5) years thereafter unless the County's written permission is given to dispose of any such material prior to such time and provided such access rights do not constitute an unlawful invasion of the privacy rights of any Contractor employee. Notwithstanding the foregoing, with respect to employment records that are not needed to support any financial or billing records, such records shall be kept and maintained by Contractor in accordance with Contractor's written records retention policy. All such material shall be maintained by the Contractor at a location in Los Angeles County, provided that if any such material is located outside Los Angeles County, then, at the County's option, the Contractor shall pay the County for travel, per diem, and other costs incurred by the County to examine, audit, excerpt, copy, or transcribe such material at such other location.

(a) In the event that an audit of the Contractor is conducted specifically regarding this Agreement by any Federal or State auditor, or by any auditor or accountant employed by the Contractor or otherwise, then the Contractor shall file a copy of such audit report with the County's Auditor-Controller within thirty (30) days of the Contractor's receipt thereof, unless otherwise provided by applicable Federal or State law or under this Agreement. Subject to applicable law, the County shall make a reasonable effort to maintain the confidentiality of such audit report(s).

(b) Failure on the part of the Contractor to comply with any of the provisions of this Section 15.10 (Record Retention and Inspection/Audit Settlement) shall constitute a material breach of this Agreement upon which the County may terminate or suspend this Agreement.

(c) If, at any time during the Term of this Agreement or within five (5) years after the expiration or termination of this Agreement, representatives of the County conduct an audit of the Contractor regarding the work performed under this Agreement, and if such audit finds that the County's dollar liability for any such work is less than payments made by the County to the Contractor, then the difference shall be either: (i) repaid by the Contractor to the County by cash payment upon demand or (ii) at the sole option of the County's Auditor-Controller, deducted from any amounts due to the Contractor from the County, whether under this Agreement or otherwise. If such audit finds that the County's dollar liability for such work is more than the payments made by the County to the Contractor, then the difference shall be paid to the Contractor by the County, provided that in no event shall the County's maximum obligation for this Agreement exceed the funds appropriated by the County for the purpose of this Agreement.

15.11 CONTRACTOR SELF-AUDIT

Contractor will provide to County a summary of: (1) the results of any security audits, security reviews, or other relevant audits listed below, conducted by Contractor or a third-party; and (2) the corrective actions or modifications, if any, Contractor will implement in response to such audits.

Relevant audits conducted by Contractor as of the Effective Date include:

(a) ISO 9001:2008 (Quality Systems) or FDA's Quality System Regulation, etc. – Contractor-Wide. A full recertification is conducted every three (3) years with surveillance audits annually.

(i) **External Audit –** Audit conducted by non-Contractor personnel, to assess Contractor's level of compliance to applicable regulations, standards, and contractual requirements.

(ii) **Internal Audit –** Audit conducted by qualified Contractor Personnel (or contracted designee) not responsible for the area of review, of Contractor organizations, operations, processes, and procedures, to assess compliance to and effectiveness of Contractor's Quality System ("**CQS**") in support of applicable regulations, standards, and requirements.

(iii) **Supplier Audit –** Quality audit conducted by qualified Contractor Personnel (or contracted designee) of product and service suppliers contracted by Contractor for internal or Contractor client use.

(iv) Detailed findings are not published externally, but a summary of the report findings, and corrective actions, if any, will be made available to County as provided above and the ISO certificate is published on Cerner.com.

(b) SSAE-16 (formerly known as SAS -70 II) – As to the Hosting Services only:

(i) Audit spans a full twelve (12) months of operation and is produced every six (6) months (end of June, end of December) to keep it "fresh."

(ii) The resulting detailed report is available to County.

(c) PCI ("**Payment Card Industry**") – Contractor hosted solutions/systems that have a credit card processing component.

(i) Network scans are completed quarterly in accordance payment card industry requirements.

Detailed findings are not published externally, but a summary of the report findings, and corrective actions, if any, will be made available to County as provided above.

15.12 SECURITY AUDITS

In addition to the audits described in Section 15.11 (Contractor Self Audit), during the Term of this Agreement, County or its third-party designee may annually, or more frequently as agreed in writing by the Parties, request a security audit of Contractor's data center and systems. The audit will take place at a time mutually agreed to by the Parties, but in no event on a date more than ninety (90) days from the date of the request by County. County's request for security audit will specify the areas that are subject to the audit and may include physical inspection, process reviews, evidence of external and internal vulnerability scans performed by Contractor (e.g., summary data of the results of the scan that has been filtered to remove the specific information of other Contractor customers such as IP address, server names, etc.), evidence of code reviews, and evidence of system configuration reviews. County shall pay for all third-party costs associated with the audit. Contractor shall cooperate with County in the development of the scope and methodology for the audit, and the timing and implementation of the audit. Any of County's regulators shall have the same right upon request, to request an audit as described above. Contractor agrees to comply with all reasonable recommendations that result from such inspections, tests, and audits within reasonable timeframes.

15.13 VERIFICATION OF LICENSEE COSTS BY GOVERNMENT

Until the expiration of four (4) years after the furnishing of any service pursuant to this Agreement, Contractor shall make available, upon written request of the Secretary of Health and Human Services or the Comptroller General of the United States or any of their duly authorized representatives, copies of this Agreement and any books, documents, records, and other data of Contractor that are necessary to certify the nature and extent of costs incurred by County for such services. If Contractor carries out any of its duties under this Agreement through a subcontract with a related organization involving a value or cost of Ten Thousand Dollars ($10,000) or more over a twelve (12) month period, Contractor shall cause such subcontract to contain a clause to the effect that, until the expiration of four (4) years after the furnishing of any service pursuant to said contract, the applicable organization will make available, upon written request of the Secretary of Health and Human Services or the Comptroller General of the United States or any of their duly authorized representatives, copies of records of the related organization that are necessary to certify the nature and extent of costs incurred for such services. Contractor shall ensure that this provision also apply to any contract

between a subcontractor and an organization related to the subcontractor by control or common ownership.

16. INDEPENDENT CONTRACTOR

16.1 INDEPENDENT CONTRACTORS

This Agreement is by and between the County and the Contractor and is not intended, and shall not be construed, to create the relationship of agent, servant, employee, partnership, joint venture, or association, as between the County and the Contractor. The employees and agents of one Party shall not be, or be construed to be, the employees or agents of the other Party for any purpose whatsoever. Contractor is an independent contractor and has no authority to bind, County by contract or otherwise. Contractor will perform the Services under the general direction of County, but Contractor will determine, in Contractor's sole discretion, the manner and means by which the Services are accomplished, subject to the requirement that Contractor will at all times comply with applicable law and with County's reasonable instructions. Further, it is not the intention of this Agreement or of the Parties to confer a third-party beneficiary right of action upon any third-party or entity whatsoever, and nothing in this Agreement will be construed so as to confer upon any third-party or entity other than the Parties hereto a right of action under this Agreement or in any manner whatsoever.

16.2 EMPLOYMENT RELATED CLAIMS

Contractor agrees to be solely responsible for all matters relating to compensation of its employees, subcontractors, agents, partners, or consultants including but not limited to compliance with laws governing workers' compensation, Social Security, provident fund, retrenchment, lay-off or termination compensation, withholding and payment of any and all federal, state, and local personal income taxes, disability/death insurance, unemployment, and any other taxes for such persons, including any related employer assessment or contributions required by law, and all other regulations governing such matters, and the payment of all salary, vacation, and other employee benefits. At Contractor's expense as described herein, Contractor agrees to defend, indemnify, and hold harmless County, and its officers, agents, employees, members, subsidiaries, joint venture partners, Affiliated Users, and successors in interest from and against any claim, demand, action, proceeding (threatened or actual), judgment, liability, loss, damage, cost, or expense, including, without limitation, reasonable attorneys' fees as provided herein arising out of Contractor's or County's alleged failure to pay, when due, all Contractor's tax and payment obligations under this Section 16.2 (Employment Related Claims) (collectively referred to for purposes of this Section as "**Employment Claim(s)**"). Contractor shall pay to County any expenses or charges relating to or arising from any such Employment Claim(s) as they are incurred by County.

16.3 NO ELIGIBILITY FOR BENEFITS

Neither Contractor nor its employees or agents shall be eligible to enroll for and/or receive benefits under any County employee benefit plan maintained by County, including, without limitation, any employee pension benefit plan within the meaning of Section 3(2) of the Employee Retirement Income Security Act of 1974, as amended ("**ERISA**"), any employee

welfare benefit plan within the meaning of Section 3(1) of ERISA, or any stock option or stock purchase plan.

16.4 COMMON-LAW EMPLOYEES

The foregoing shall apply to Contractor and Contractor's employees and agents even if Contractor or any Contractor employee or agent is subsequently reclassified by any court or governmental agency as a common-law employee for periods during which services were performed under this Agreement.

17. REPRESENTATIONS AND WARRANTIES

17.1 CONTRACTOR'S WARRANTIES

Contractor represents and warrants that:

17.1.1 AUTHORITY

Contractor has the full power, capacity, and authority to enter into and perform this Agreement and to make the grant of rights contained herein, and Contractor's performance of this Agreement does not violate or conflict with any agreement to which Contractor is a party. Further, Contractor represents and warrants that the person executing this Agreement for the Contractor is an authorized agent who has actual authority to bind the Contractor to each and every term, condition, and obligation of this Agreement and that all requirements of the Contractor have been fulfilled to provide such actual authority;

17.1.2 PERFORMANCE OF SERVICES

The Services will be performed and the Deliverables developed in a professional, competent, and timely manner by appropriately qualified Contractor Personnel in accordance with this Agreement and consistent with Contractor's applicable Best Practices;

17.1.3 CONFORMANCE TO SPECIFICATIONS

All the Licensed Software, Hosting Software, Third-Party Products, Hardware, Services, including Implementation Services, Hosting Services, Support Services, and Deliverables shall conform to the Specifications and requirements set forth in this Agreement without material deviations for the period commencing upon the Effective Date and continuing through the expiration or termination of Support Services ("**Warranty Period**"). Except as provided Section 9.7.2(b) (No Material Adverse Effects), this warranty is conditioned on the County operating the current Version of Licensed Software and Third-Party Products or one of the two (2) prior Versions as it relates to the current Version. Contractor shall institute quality controls, including suitable testing procedures, if any, to ensure that the Licensed Software, Hardware, Services, including Implementation Services, Hosting Services, Support Services, and Deliverables comply with the terms of this Agreement. Upon

County's reasonable request, County shall have the right to review Contractor's quality controls utilized to verify and/or improve the quality of the Licensed Software, Hosting Software, Services and Deliverables. A sample of Contractor's quality controls is attached as Exhibit I (Contractor Quality Controls);

17.1.4 NON-INFRINGEMENT

The Licensed Software (excluding the Integral Third-Party Software), Services, and the Deliverables do not contain defamatory or indecent matter, and County's permitted use of the Licensed Software (excluding the Integral Third-Party Software), Services, including Implementation Services, Hosting Services, Support Services, and the Deliverables do not and will not infringe U.S. patents, trademarks, copyrights and other intellectual property rights of any third-party. To the best of Contractor's knowledge as of the Effective Date, the Hosting Software, Third-Party Products, and Integral Third-Party Software do not contain defamatory or indecent matter, and County's permitted use of the Hosting Software, Third-Party Products, and Integral Third-Party Software do not infringe U.S. patents, trademarks, copyrights and other intellectual property rights of any third-party;

17.1.5 NO PENDING OR THREATENED LITIGATION

There is no pending or threatened litigation that would have a material adverse impact on its performance under the Agreement. In addition, Contractor also represents and warrants that based on pending actions, claims, disputes, or other information Contractor's Executive Cabinet as listed in Contractor's Annual Report or Chief Legal Officer has no knowledge of a failure of the Licensed Software, Hosting Software, or Third-Party Products to perform in accordance with the Specifications that would impact patient care, EHR System performance, create a financial hardship for customers, or affect confidentiality, and of which Contractor has not previously notified the County;

17.1.6 DOCUMENTATION; MATERIAL DIMINUTION IN FEATURES

The Documentation shall be complete and accurate so as to enable a reasonably skilled County user to effectively use all of its features and functions without assistance from Contractor and, on each date on which Contractor delivers it to County, the Documentation is Contractor's most current version thereof. The Documentation shall not be changed in a manner that results in a material diminution of a feature or function of the Licensed Software, without the prior written Approval of County, unless the Documentation is changed in connection with a Revision to the Licensed Software as set forth in Section 9.7.2(a) (Substantial Equivalence);

17.1.7 ASSIGNMENT OF WARRANTIES

To the extent permissible under the applicable third-party agreements, Contractor hereby assigns and agrees to deliver to County all representations and warranties

received by Contractor from its third-party licensors and suppliers, including Hardware vendors;

17.1.8 DESTRUCTIVE/DISABLING MECHANISMS

The Licensed Software, Hosting Software, Third-Party Products (to Contractor's knowledge) and, Hardware (to Contractor's knowledge), do not contain, and Contractor shall not insert into the Licensed Software, Hosting Software, Third-Party Products or Hardware, any Destructive Mechanisms, as defined below. Contractor shall not invoke such mechanisms at any time, including upon expiration or termination of this Agreement for any reason. Except if and to the extent expressly necessary for performance of Support Services, or any other servicing or support expressly authorized in writing by County, in no event shall Contractor, Contractor Personnel or anyone acting on its behalf, disable or interfere, in whole or in part, with County's use of the Licensed Software, Hosting Software, Third-Party Products or any software, hardware, systems or data owned, utilized, or held by County without the written permission of a corporate officer of County, whether or not the disablement is in connection with any dispute between the Parties or otherwise. Contractor understands and acknowledges that a breach of this Section 17.1.8 (Destructive/Disabling Mechanism) could cause substantial harm to County and to numerous third-parties having business relationships with County;

17.1.9 SYSTEM CONFIGURATION WARRANTY

Contractor has had the opportunity to assess County's existing information systems, specifically its applications, interface engine, network infrastructure, and connectivity (hereinafter collectively referred to as the "**Existing System**") relating to installation, implementation, and use of the EHR System. Contractor has had the opportunity to inquire of County's staff regarding the operation of the Existing System and its components and to review relevant documentation regarding the Existing System. Based on its assessment and experience with customers similar to County using Hosted Services, Contractor has provided County a Recommended Configuration providing performance and capacity specifications for:

1. Network infrastructure; and

2. Connectivity

for the Existing System for use in connection with the EHR System.

Provided County operates its Existing System in substantial conformance with the Recommended Configuration, Contractor represents and warrants that the Existing System and the EHR System are sufficient in size, capacity, and processing capability for the use by the County of the EHR System in accordance with this Agreement through one (1) year after Productive Use at the final Cluster ("**Configuration Warranty Period**"). If, during the Configuration Warranty Period, additional network infrastructure or connectivity to support and operate the EHR System as required by this Agreement is needed, Contractor shall pay all fees and costs

associated with the acquisition and installation of the software, equipment, and services pertaining to the network infrastructure and/or connectivity required to support and operate the EHR System as required by this Agreement. For purposes of this Section 17.1.9 (System Configuration Warranty), "substantial conformance" shall mean that the root cause of the Existing System issue giving rise to this warranty is not attributable to County's failure to conform to the Recommended Configuration.

17.1.10 RESOURCE REQUIREMENT WARRANTY

Contractor has the requisite professional skills, business process and information technology knowledge, software implementation and project management expertise, integration capabilities, and skilled resources required to determine and specify the resource requirements for implementation of the Licensed Software, Hosting Software, and Third-Party Products in accordance with the Specifications, and to enable County to utilize the Licensed Software, Hosting Software, and Third-Party Products as set forth in the Specifications.

17.1.11 LEGAL AND ACCREDITATION/CERTIFICATION REQUIREMENTS

The Licensed Software will enable County to, and the Services and Deliverables will, comply with: (1) the Privacy and Security Laws (as defined in Section 19.10 (Compliance With Federal and State Confidentiality Requirements) to the extent the functionality is included in the Licensed Software); and (2) all applicable existing federal and state laws, including applicable accreditation/certification requirements, (collectively referred to as "**Legal Requirements**"). Further, Contractor represents and warrants that, so long as County is receiving Support Services, Contractor shall provide County with the functionality necessary to enable County to comply with all new, amended, or otherwise modified Legal Requirements, applicable to the Licensed Software at no additional charge to County. Furthermore, Contractor represents and warrants that in performing its obligations under this Agreement, it shall comply with all applicable laws, regulations, and rules that are in effect during the Support Term of this Agreement as they concern the subject matter of this Agreement. In the event the Licensed Software, Services, and/or Deliverables fails to perform as warranted under this Section 17.1.11 (Legal and Accreditation/Certification Requirements), Contractor shall, upon notice initiate commercially reasonable efforts to correct Errors, provide functionality, or bring the Licensed Software, Services, and/or Deliverables into compliance with the warranty as set forth in this Agreement at no additional charge to County. This warranty does not apply to Integral Third-Party Software that is not embedded within the Licensed Software.

17.1.12 TIME/DATE COMPLIANCE

Without limiting any other warranty or obligation specified in this Agreement, the Licensed Software is, and at all times will be, Time/Date Compliant. In addition to and cumulative of all other remedies available to County under this Agreement or at law, Contractor shall provide County, at no additional cost to County, any new

Revisions of the Licensed Software and Deliverables that prevents a breach of this warranty or corrects a breach of this warranty;

17.1.13 BACKGROUND CHECKS

(a) All Contractor Personnel performing work on-site under this Agreement shall undergo and pass, to the reasonable satisfaction of County, a background investigation as a condition of beginning and continuing to work under this Agreement. County shall use its discretion in determining the method of background clearance to be used, which may include, but is not limited to, fingerprinting (which Contractor may perform consistent with its processes and deliver all relevant documentation to County), provided any method is not prohibited by law. The fees associated with obtaining the background information shall be at the expense of the Contractor, regardless if the Contractor's staff passes or fails the background clearance investigation. County shall perform the background check and bill Contractor for the cost or deduct such amount from funds owed by County to Contractor.

(b) County may request that the Contractor's staff be immediately removed from working at any County facility at any time during the term of this Agreement. County will not provide to Contractor, nor to Contractor's staff any information obtained through County conducted background clearance.

(c) County may immediately, at the sole discretion of County, deny or terminate facility access to any Contractor Personnel that does not pass such investigation(s) to the reasonable satisfaction of County or whose background or conduct is incompatible with County facility access.

(d) Disqualification, if any, of the Contractor's staff, pursuant to this Section 17.1.13 (Background Checks), shall not relieve Contractor of its obligation to complete all work in accordance with the terms and conditions of this Agreement;

17.1.14 KNOWN PERFORMANCE ISSUES

There is no known existing pattern or repetition of customer complaints regarding the Licensed Software, Hosting Software, Third-Party Products, Deliverables, or Services, including functionality or performance issues, and that Contractor's engineers have not currently identified any repeating adverse impact on the Licensed Software, Hosting Software, Deliverables, or Services, including functionality or performance, for which the root cause is believed to be a flaw or defect in the Licensed Software, Hosting Software, Third-Party Products, Deliverables or Services. The foregoing warranty shall not extend to any specifications provided by County;

17.1.15 NO OFFSHORE WORK

All Hosting Services shall be performed and rendered within the United States. Contractor warrants that it will not transmit or make available any of County's Confidential Information, County's intellectual property or any County Property to any entity or individual outside the United States without prior written County Approval of such transmittal to an entity or person outside of the United States. County has Approved transmittal of such information to the entities and countries identified in Exhibit BB (County-Approved Contractor Entities and Countries);

17.1.16 INTEGRATION WARRANTY

The Licensed Software components, Hosting Software, and Third-Party Products are capable of interconnecting and/or Interfacing with each other, the third-party software and hardware identified in Exhibit M (Interfaces), and County Systems, either through integration or, as applicable, industry standard Interface protocols. As to County Systems (which utilize then-current industry standard Interface protocols) acquired after the Effective Date, the Licensed Software, Hosting Software, and Third-Party Products shall be capable of Interfacing with such County Systems using then-current industry standard Interface protocols. The Licensed Software, Hosting Software, and Third-Party Products must be Interoperable at the time it is provided to County and at all times thereafter during the Support Term;

17.1.17 HITECH TECHNICAL STANDARDS WARRANTY

The Licensed Software subject to certification by ONC-Authorized Testing and Certification Body ("**ONC-ATCB**") has been tested and certified by an ONC-ATCB as Certified EHR Technology for use as a Complete EHR in the ambulatory and inpatient practice settings, as applicable based on the intended primary practice setting use of the Licensed Software, pursuant to the HITECH Technical Standards. Further, Contractor represents and warrants, during the Support Term, Contractor shall provide to County at no additional charge: (a) software updates or replacement software, and Revisions thereto, if required, ("**HITECH Modifications**"), so that the Licensed Software meets the requirements of Certified EHR Technology for use as a Complete EHR in the ambulatory and inpatient practice settings, as applicable based on the intended primary practice setting use of the Licensed Software, at each stage of the Meaningful Use requirements, as applicable to such Licensed Software (referred to as the HITECH Technical Standards as defined below), as that term is defined by the Health Information Technology for Economic and Clinical Health Act of 2009 (the "**HITECH Act**"); (b) Contractor will provide the HITECH Modifications sufficiently in advance of the beginning of the first applicable reporting period identified under the HITECH Act or its implementing regulations as to each stage of the Meaningful Use requirements in order for County to receive the full amount of incentive payments, and to permit a reasonable period for County's implementation of the HITECH Modification; and (c) all implementation, training, and data conversion Services up to a total amount of Thirty Thousand Dollars ($30,000.00) for Professional Services, per stage of the Meaningful Use requirements, to enable County to use the HITECH Modifications that County may, in its discretion, elect to implement in becoming a "meaningful user." HITECH Modifications will be deemed Revisions and shall not be deemed New Software. If the Contractor does not

provide the HITECH Modifications as required hereunder and such failure is a cause of incentive payments under ARRA to County not being received or penalties being imposed, Contractor shall pay the amount of such incentive payments lost or deferred, or penalties imposed that is caused by the failure of Contractor to provide the HITECH Modifications, until Contractor has complied with the above warranty. Contractor is not responsible for County's failure to receive incentive payments or for penalties imposed resulting from an act or failure to act by County that is not the result of Contractor's failure to provide the HITECH Modifications. All such amounts shall be deemed direct damages under this Agreement and not subject to, excluded, reduced or limited by any limitations of liability in this Agreement. Without impacting the payments to County arising under this Section 17.1.17 (HITECH Technical Standards Warranty), County shall also have the option to terminate the Agreement in the event of a breach of the foregoing warranty that precludes County from achieving the functionality necessary to successfully obtain incentive payments or avoid penalties, and achieve performance objectives and measures and clinical quality measures, under ARRA. This warranty does not apply to Integral Third-Party Software that is not embedded within the Licensed Software.

17.1.18 HIPAA TRANSACTION AND RELATED CODE SET WARRANTY

Contractor represents and warrants that the Licensed Software will enable County to comply with HIPAA, Medicare Part D, and related transaction and code set standards as to the functions provided by the Licensed Software. Maintaining compliance with HIPAA is deemed to be a Legal Requirement for purposes of Section 17.1.11 (Legal and Accreditation/Certification Requirements). Further, Contractor represents and warrants that, as of the Effective Date:

(a) The Licensed Software complies with Version 5010 of the Accredited Standards Committee (ASC) X12 standards for HIPAA transactions;

(b) The Licensed Software complies with Version 4010/4010A1 of the ASC X12 standards for administrative transactions to enable County to use the Licensed Software to conduct electronic transactions with third-party systems that are not yet compliant with the latest versions of the standards;

(c) In addition, the Licensed Software must be capable of electronically transmitting prescriptions and prescription-related information to external recipients according to the National Council for Prescription Drug Program (NCPDP) SCRIPT 8.1 or 10.6 in addition to the adopted vocabulary standard for medications at 45 C.F.R. 170.207(d); and

(d) The Licensed Software (2012.XX) will enable County to comply with the ICD-10 (International Classification of Diseases, 10th Revision) code set standard for coding diagnoses and procedures. In addition, the Licensed Software will enable County to comply with the ICD-9 (International Classification of Diseases, 9th revision, Clinical) code set standard to conduct electronic transactions (using the appropriate coding for diagnoses and procedures)

with third-party systems that are not yet compliant with the latest versions of the standards.

This warranty does not apply to Integral Third-Party Software that is not embedded within the Licensed Software.

17.1.19 EXCLUDED PROVIDER WARRANTY

To the best of Contractor's Knowledge, neither Contractor nor any of its officers, directors, agents, or employees is currently, or has at any time been, debarred from, excluded or suspended from, or otherwise ineligible for participation in any state or federal health care program, including Medicare, Medicaid and Medi-Cal. Contractor hereby agrees to immediately notify County in writing upon becoming aware of any threatened, proposed, or actual exclusion or suspension of Contractor or any of its officers, directors, agents, or employees from any state or federal health care program, including Medicare, Medicaid and Medi-Cal. In the event that Contractor is excluded or suspended from participation in any state or federal health care program during the Term of this Agreement, this Agreement will, as of the effective date of such exclusion or breach, automatically terminate in accordance with Section 29.2 (Termination for Material Breach) as a non-curable breach. If at any time after the Effective Date it is determined that any of Contractor's officers, directors, agents or employees is excluded or suspended from participation in any state or federal health care program during the Term of this Agreement, such that Contractor is in breach of this Section 17.1.19 (Excluded Provider Warranty), such breach shall be a basis for termination in accordance with Section 29.2 (Termination for Material Breach) unless Contractor is able to cure such breach through the immediate discharge of the excluded or suspended personnel. Contractor shall notify County upon Contractor's determination that an officer, director, agent or employee is excluded or suspended and further shall notify County of the subsequent, remedial measure.

17.1.20 WARRANTY AGAINST CONTINGENT FEES

(a) Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this Agreement upon any contract or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business.

(b) For breach of this warranty, the County shall have the right to terminate this Agreement and, at its sole discretion, deduct from the Agreement price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee;

17.1.21 NO AGREEMENT SUBORDINATION

During the Term of this Agreement, Contractor shall not subordinate this Agreement or any of its rights hereunder to any third-party without the prior written consent of County, and without providing in such subordination instrument for non-disturbance of County's use of the Licensed Software and Third-Party Products (or any part thereof) in accordance with this Agreement;

17.1.22 AGREEMENT NOT SUBJECT TO ANY LIENS

This Agreement and the Licensed Software licensed or acquired herein, are neither subject to any liens, encumbrances, or pledges nor subordinate to any right or claim of any third-party, including Contractor's creditors;

17.1.23 USE OF LICENSED SOFTWARE WITHOUT INTERRUPTION

County is entitled to use the Licensed Software, together with the Existing System, any Hardware purchased hereunder, and Contractor's Recommended Configuration, without interruption; and

17.1.24 INFORMATION FURNISHED TO COUNTY

As of the date furnished, no statement contained in writing in the Proposal contains any untrue statements about the prior experience or corporate description of Contractor, or omits any fact necessary to make such statement not misleading.

17.2 REMEDIES

County's remedies under this Agreement for the breach of the warranties set forth in this Agreement will include, but not be limited to, the repair or replacement by Contractor, at its own expense, of the non-conforming Licensed Software, Third-Party Products, and Hosting Software the specific remedies set forth in Exhibit E (Service Levels and Performance Standards), and other corrective measures afforded to County by Contractor under such Exhibit E (Service Levels and Performance Standards) and this Agreement.

17.3 BREACH OF WARRANTY OBLIGATIONS

Failure by Contractor to timely perform its obligations set forth in this Section 17 (Representations and Warranties) shall constitute a material breach, upon which, in addition to County's other rights and remedies set forth herein, County may terminate this Agreement, after written notice to Contractor and provision of a cure period in accordance with Section 29.2 (Termination for Material Breach).

17.4 REPRESENTATIONS AND WARRANTIES THROUGHOUT AGREEMENT

It is understood and agreed by the Parties that Contractor's representations and warranties are set forth throughout this Agreement and are not confined to this Section 17 (Representations and Warranties).

17.5 DISCLAIMER OF OTHER WARRANTIES

EXCEPT AS EXPRESSLY STATED IN THIS AGREEMENT, NEITHER PARTY MAKES ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, QUIET ENJOYMENT, QUALITY OF INFORMATION, OR TITLE/NON-INFRINGEMENT, AND ALL SUCH WARRANTIES ARE HEREBY SPECIFICALLY DISCLAIMED.

18. INTELLECTUAL PROPERTY

18.1 WORK PRODUCT AND BACKGROUND INTELLECTUAL PROPERTY

"**Work Product**" expressly excludes Licensed Software (the license to which is provided in Section 3.1 (License Grant)) and Third-Party Products (the license to which is provided in Section 7 (Third-Party Products with Independent Conditions)) and shall mean:

(1) all Deliverables and all concepts, inventions (whether or not protected under patent laws), works of authorship, information, new or useful art, combinations, discoveries, formulae, algorithms, specifications, manufacturing techniques, technical developments, systems, computer architecture, artwork, scripts, designs, procedures, processes, and methods of doing business, regardless of form or media, Documentation, training materials, and shall include any derivatives or modifications to any of the foregoing (collectively "**Class 1 Work Product**") ; and

(2) County Project management documents and reports, including the Project Control Document, Status Reports, project work plans, and risk reports ("**Class 2 Work Product**"),

developed or produced by Contractor under this Agreement, whether acting alone or in conjunction with County or its employees, Users, affiliates or others.

18.2 OWNERSHIP

All Work Product is the sole and exclusive property of Contractor. Contractor may use such Work Product for internal purposes as well as for other clients so long as Contractor does not use any Confidential Information belonging to County or otherwise breach this Agreement. However, to the extent Class 1 Work Product constitutes or is incorporated into any Deliverables or Services or needed for the use of the Deliverables or Services, Contractor hereby grants to County a perpetual, irrevocable, fully paid up, royalty free, transferable (as provided in Section 32.17.2 (Assignment by County)), sub-licensable, worldwide, non-exclusive right and license to use, prepare derivative works, and otherwise fully exploit in connection with County's business, the Class 1 Work Product (and derivative works thereof created by County), provided that the Work Product (and/or derivative works thereof) is used in a manner that does not violate its license rights under this Agreement and is not commercially exploited in a manner inconsistent with its license right.

As to Class 2 Work Product, Contractor hereby grants to County a perpetual, irrevocable, fully paid up, royalty free, transferable, sub-licensable, worldwide, non-exclusive right and license to

use, prepare derivative works, and otherwise fully exploit in connection with County's business, the Class 2 Work Product (and derivative works thereof created by County).

18.3 USE OF COUNTY PROPERTY

County may, but is not required to (unless otherwise set forth in this Agreement or an applicable Statement of Work), provide certain hardware, software, data, databases, office space, security access, intellectual property, technologies or other services and materials to Contractor for the sole purpose of assisting Contractor in the performance of the Services contemplated by this Agreement ("**County Property**"). County hereby grants Contractor a non-exclusive, non-transferable license to use the County Property solely for County's benefit in connection with Contractor's performance of the Services. County may terminate the foregoing license at any time, without cause, on written notice to Contractor. Unless specifically authorized otherwise in the Statement of Work, Contractor shall use the County Property only in the form provided by County, without modification. In addition, Contractor will maintain and use County Property in accordance with any written instructions and/or specifications provided by County. County Property shall be considered Confidential Information of County. Except for the limited license provided in this Section 18.3 (Use of County Property), nothing contained in this Agreement shall be construed as granting Contractor any right, title, or interest in or to any of the County Property.

18.4 COUNTY LICENSED SOFTWARE

In the event County provides Contractor with access to or use of software licensed by County from third-parties, Contractor shall be responsible for (a) complying with all applicable third-party license agreements (disclosed to Contractor or Contractor Personnel in writing or by other means generally used by County to disseminate such information to employees or contractors, including electronic means); (b) indemnifying, defending, and holding harmless County and its directors, officers, agents, employees, members, subsidiaries and successors in interest from any breach by Contractor of such license agreements; and (c) treating all such software as Confidential Information of County.

19. CONFIDENTIALITY

19.1 PUBLICITY

(a) Contractor shall not disclose any details in connection with this Agreement to any person or entity except as may be otherwise provided hereunder or required by law. However, in recognizing the Contractor's need to identify its services and related clients to sustain itself, the County shall not inhibit the Contractor from publishing its role under this Agreement within the following conditions:

(i) Contractor shall develop all publicity material in a professional manner; and

(ii) During the Term of this Agreement, the Contractor shall not, and shall not authorize another to, publish or disseminate any commercial advertisements, press releases, feature articles, or other materials using the name of the County

without the prior written consent of the County Project Director. County shall not unreasonably withhold written consent.

(b) Contractor may, without the prior written consent of County, indicate in its proposals and sales materials that it has been awarded this Agreement with the County, provided that the requirements of this Section 19.1 (Publicity) shall apply.

19.2 CONFIDENTIAL INFORMATION DEFINED

Except as provided in Section 19.3 (Exclusions) below, each Party agrees that all information supplied by one Party and its affiliates and agents (collectively, the "**Disclosing Party**") to the other ("**Receiving Party**") including, without limitation, (a) source code, prices, trade secrets, mask works, databases, designs and techniques, models, displays and manuals; (b) any unpublished information concerning research activities and plans, marketing or sales plans, sales forecasts or results of marketing efforts, pricing or pricing strategies, costs, operational techniques, or strategic plans, and unpublished financial information, including information concerning revenues, profits, and profit margins; (c) any information relating to County's customers, patients, business partners, or personnel; (d) Personal Data (as defined below); and (e) Protected Health Information (as defined below), will be deemed confidential and proprietary to the Disclosing Party, regardless of whether such information was disclosed intentionally or unintentionally or marked as "confidential" or "proprietary" ("**Confidential Information**"). The foregoing definition shall also include any Confidential Information provided by either Party's contractors, subcontractors, agents, or vendors. To be deemed "Confidential Information", trade secrets and mask works must be plainly and prominently marked with restrictive legends.

19.3 EXCLUSIONS

Confidential Information will not include any information or material, or any element thereof, whether or not such information or material is Confidential Information for the purposes of this Agreement, to the extent any such information or material, or any element thereof: (a) has previously become or is generally known, unless it has become generally known through a breach of this Agreement or a similar confidentiality or non-disclosure agreement, obligation or duty; (b) was already rightfully known to the Receiving Party prior to being disclosed by or obtained from the Disclosing Party as evidenced by written records kept in the ordinary course of business or by proof of actual use by the Receiving Party, (c) has been or is hereafter rightfully received by the Receiving Party from a third-party (other than the Disclosing Party) without restriction or disclosure and without breach of a duty of confidentiality to the Disclosing Party; or (d) has been independently developed by the Receiving Party without access to Confidential Information of the Disclosing Party. It will be presumed that any Confidential Information in a Receiving Party's possession is not within exceptions (b), (c) or (d) above, and the burden will be upon the Receiving Party to prove otherwise by records and documentation.

19.4 TREATMENT OF CONFIDENTIAL INFORMATION

Each Party recognizes the importance of the other Party's Confidential Information. In particular, each Party recognizes and agrees that the Confidential Information of the other is critical to their respective businesses and that neither Party would enter into this Agreement

without assurance that such information and the value thereof will be protected as provided in this Section 19 (Confidentiality) and elsewhere in this Agreement. Accordingly, each Party agrees as follows: (a) the Receiving Party will hold any and all Confidential Information it obtains in strictest confidence and will use and permit use of Confidential Information solely for the purposes of this Agreement. Without limiting the foregoing, the Receiving Party shall use at least the same degree of care, but no less than reasonable care, to avoid disclosure or use of this Confidential Information as the Receiving Party employs with respect to its own Confidential Information of a like importance; (b) the Receiving Party may disclose or provide access to its responsible employees, agents, and consultants who have a need to know and may make copies of Confidential Information only to the extent reasonably necessary to carry out its obligations hereunder; and (c) the Receiving Party currently has, and in the future will maintain in effect and enforce, rules and policies to protect against access to or use or disclosure of Confidential Information other than in accordance with this Agreement, including without limitation written instruction to and agreements with employees, agents, or consultants who are bound by an obligation of confidentiality no less restrictive than set forth in this Agreement to ensure that such employees, agents, and consultants protect the confidentiality of Confidential Information, including this Section 19 (Confidentiality) and Exhibit R (Confidentiality and Assignment Agreement). The Receiving Party will require its employees, agents, and consultants not to disclose Confidential Information to third-parties, including without limitation customers, subcontractors, or consultants, without the Disclosing Party's prior written consent, will notify the Disclosing Party immediately of any unauthorized disclosure or use, and will cooperate with the Disclosing Party to protect all proprietary rights in and ownership of its Confidential Information.

19.5 NON-EXCLUSIVE EQUITABLE REMEDY

Each Party acknowledges and agrees that due to the unique nature of Confidential Information there can be no adequate remedy at law for any breach of its obligations hereunder, that any such breach or threatened breach may allow a Party or third-parties to unfairly compete with the other Party resulting in irreparable harm to such Party, and therefore, that upon any such breach or any threat thereof, each Party will be entitled to appropriate equitable remedies, and may seek injunctive relief from a court of competent jurisdiction without the necessity of proving actual loss, in addition to whatever remedies either of them might have at law or equity. Any breach of this Section 19 (Confidentiality) shall constitute a material breach of this Agreement and be grounds for immediate termination of this Agreement in the exclusive discretion of the non-breaching Party.

19.6 PERSONAL DATA

In connection with this Agreement and performance of the Services, Contractor may be provided or obtain, from County or otherwise, Personal Data, as defined below, pertaining to County's current and prospective personnel, directors and officers, agents, subcontractors, investors, patients, and customers and may need to Process such Personal Data and/or transfer it, all subject to the restrictions set forth in this Agreement and otherwise in compliance with all applicable foreign and domestic laws and regulations for the sole purpose of performing the Services.

19.7 TREATMENT OF PERSONAL DATA

Without limiting any other warranty or obligation specified in this Agreement, and in particular the confidentiality provisions of this Section 19 (Confidentiality), during the Term of this Agreement and thereafter in perpetuity, Contractor will not gather, store, log, archive, use, or otherwise retain any Personal Data in any manner and will not disclose, distribute, sell, share, rent, or otherwise transfer any Personal Data to any third-party, except as expressly required to perform its obligations in this Agreement or as Contractor may be expressly directed in advance in writing by County. Contractor represents and warrants that Contractor will use and Process Personal Data only in compliance with (a) this Agreement (including Section 32.41 (Healthe Intent Services) with regard to Healthe Intent Services), (b) County's then current privacy policy (available at https://intranet.ladhs.org/intracommon/public/DhsPolPro/polProSearchAction.cfm?unit=dhsintra&prog=dhsintra&ou=dhsintra), and (c) all applicable local, state, and federal laws and regulations (including, but not limited to, current and future laws and regulations relating to spamming, privacy, confidentiality, data security, and consumer protection).

19.8 RETENTION OF PERSONAL DATA

Contractor will not retain any Personal Data for any period longer than necessary for Contractor to fulfill its obligations under this Agreement. As soon as Contractor no longer needs to retain such Personal Data in order to perform its duties under this Agreement, Contractor will promptly return or destroy or erase all originals and copies of such Personal Data.

19.9 COMPELLED DISCLOSURES

To the extent required by applicable law or by lawful order or requirement of a court or governmental authority having competent jurisdiction over the Receiving Party, the Receiving Party may disclose Confidential Information in accordance with such law or order or requirement, subject to the following conditions: as soon as possible after becoming aware of such law, order, or requirement and prior to disclosing Confidential Information pursuant thereto, the Receiving Party will so notify the Disclosing Party in writing and, if possible, the Receiving Party will provide the Disclosing Party notice not less than five (5) Business Days prior to the required disclosure. The Receiving Party will use reasonable efforts not to release Confidential Information pending the outcome of any measures taken by the Disclosing Party to contest, otherwise oppose, or seek to limit such disclosure by the Receiving Party and any subsequent disclosure or use of Confidential Information that may result from such disclosure. The Receiving Party will cooperate with and provide assistance to the Disclosing Party regarding such measures. Notwithstanding any such compelled disclosure by the Receiving Party, such compelled disclosure will not otherwise affect the Receiving Party's obligations hereunder with respect to Confidential Information so disclosed.

19.10 COMPLIANCE WITH FEDERAL AND STATE CONFIDENTIALITY REQUIREMENTS

The County is subject to the Administrative Simplification requirements of the Health Insurance Portability and Accountability Act of 1996, as codified at 42 U.S.C. § 1320d through d-8 and as amended from time to time ("**HIPAA**"). Under this Agreement, the Contractor provides services to the County and the Contractor receives, has access to, and/or creates Protected Health Information in order to provide those services. Contractor acknowledges and agrees that all patient records and Protected Health Information shall be subject to the confidentiality and

disclosure provisions of HIPAA, HITECH Act, ARRA, and the regulations promulgated thereunder by the U.S. Department of Health and Human Services including the Standards for Privacy of Individually Identifiable Health Information and the Security Standards for Electronic Protected Health Information at 45 Code of Federal Regulations ("**C.F.R.**"), parts 142, 160, and 164, as the same may be amended from time to time, and any other applicable federal and state laws (including California Civil Code Section 56.10) (collectively, the "**Privacy and Security Laws**") and agrees to maintain the confidentiality of all such records and information in accordance with such laws. The Parties further agree that they shall abide by the provisions of Exhibit F (Business Associate Agreement) hereto with respect to information subject to HIPAA. Should County amend Exhibit F (Business Associate Agreement) as is necessary to comply with the requirements of the Privacy and Security Regulations (as such term is defined in the Business Associate Agreement), County will execute a Change Notice in accordance with Section 13.2 (Change Notices), which shall replace Exhibit F (Business Associate Agreement) with the updated Business Associate Agreement.

19.11 COUNTY DATA

All of the County Confidential Information, data, records, and information of County to which Contractor has access, or otherwise provided to Contractor under this Agreement ("**County Data**"), shall be and remain the property of County and County shall retain exclusive rights and ownership thereto. The data of County shall not be used by Contractor for any purpose other than as required under this Agreement, nor shall such data or any part of such data be disclosed, sold, assigned, leased, or otherwise disposed of to third-parties by Contractor or commercially exploited or otherwise used by or on behalf of Contractor, its officers, directors, employees, or agents.

19.12 RETURN OF CONFIDENTIAL INFORMATION

On County's written request or upon expiration or termination of this Agreement for any reason, Contractor will promptly: (a) return or destroy, at County's option, all originals and copies of all documents and materials it has received containing County's Confidential Information; (b) if return or destruction is not permissible under applicable law, continue to protect such information in accordance with the terms of this Agreement; and (c) deliver or destroy, at County's option, all originals and copies of all summaries, records, descriptions, modifications, negatives, drawings, adoptions and other documents or materials, whether in writing or in machine-readable form, prepared by Contractor, prepared under its direction, or at its request, from the documents and materials referred to in Subsection 19.12(a), and provide a notarized written statement to County certifying that all documents and materials referred to in Subsections 19.12(a) and (b) have been delivered to County or destroyed, as requested by County. On termination or expiration of this Agreement, County shall return or destroy all Contractor Confidential Information (excluding items licensed to County hereunder or that are required for use of the Deliverables and/or the Licensed Software), at Contractor's option.

20. SECURITY

20.1 IN GENERAL

Contractor will maintain and enforce safety and physical security procedures with respect to its access, use, and possession of County's Confidential Information, including Personal Data, (a) that are compliant with the requirements of Exhibit K (Information Security Requirements) and, to the extent not inconsistent, at least equal to industry standards for such types of locations, and (b) which provide reasonably appropriate technical and organizational safeguards against accidental or unlawful destruction, loss, alteration, or unauthorized disclosure or access of such information. Without limiting the generality of the foregoing, Contractor will take all reasonable measures to secure and defend its location and equipment against "hackers" and others who may seek, without authorization, to modify or access Contractor systems or the information found therein. Contractor will periodically test its systems for potential areas where security could be breached. Contractor will immediately report to County any breaches of security or unauthorized access to County's Confidential Information, including Personal Data, that Contractor detects or becomes aware of. Contractor will use diligent efforts to remedy such breach of security or unauthorized access in a timely manner and deliver to County a root cause assessment and future incident mitigation plan with regard to any breach of security or unauthorized access affecting the Confidential Information, including Personal Data. Contractor shall provide County all written details regarding Contractor's internal investigation regarding any security breach. Upon County's request, Contractor will provide a second more in-depth investigation and results of findings. Contractor agrees not to notify any regulatory authority nor any customer or consumer, on behalf of County unless County specifically requests in writing that Contractor do so. Contractor and County will work together to formulate a plan to rectify all security breaches.

20.2 UNAUTHORIZED ACCESS

In the course of furnishing the Services, Contractor shall not access, and shall not permit Contractor Personnel or entities within its control to access, County Systems (i) without County's express written authorization, or (ii) except as is necessary for Contractor to perform its obligations set forth in this Agreement, including in the Statements of Work hereunder. Such written authorization may subsequently be revoked by County at any time in its sole discretion. Further, any access shall be consistent with, and in no case exceed the scope of, any such authorization given by County. All County authorized connectivity or attempted connectivity to County Systems shall be only through County's security gateways and/or firewalls, and in conformity with applicable County security policies.

20.3 CONTRACTOR SYSTEMS

Contractor shall be solely responsible for all systems Contractor uses to access County Systems. Contractor shall ensure that its systems include up-to-date anti-viral software to prevent viruses from reaching County Systems through Contractor's systems. Contractor shall prevent unauthorized access to County Systems through the Contractor systems.

20.4 USE OF PERSONAL PORTABLE DEVICES

Without County's prior written authorization, under no circumstances will any Contractor Personnel connect to any County System or access, handle, or use any County Confidential Information and/or data, for purposes of downloading, extracting, storing, or transmitting the information and/or data through personally owned, rented, or borrowed equipment, including but not limited to, laptops, personal digital assistants, instant messaging devices, Universal Serial Bus ("**USB**") devices, and cell phones.

20.5 SECURITY BREACH

Contractor shall notify County of any security, or suspected security, breach of any County Confidential Information or data covered under applicable federal regulations set forth in 12 C.F.R. Part 30, or under California Civil Code 1798.82, or any other breach of Confidential Information immediately following discovery, if the information was, or is reasonably believed to have been acquired by an unauthorized person. Notification must be given in the most expedient time possible and without unreasonable delay. Written confirmation must be sent within three (3) days of discovery or notification of the breach or suspected breach.

20.6 ADDITIONAL PROCEDURES IN THE EVENT OF SECURITY BREACH OF PERSONAL DATA

Additional Procedures in the Event of Security Breach of Personal Data. Upon County's determination that a misuse or security breach of Personal Data has occurred or is reasonably possible Contractor shall fully cooperate with County in rectifying any misuse, including notifying all affected County customers. County shall determine, in its sole discretion, the content and means of delivery of the customer notice. Contractor will bear all reasonable costs and expenses for mitigation actions, to the extent required by law, incurred as a result of security breach primarily caused directly or indirectly by Contractor, including but not limited to, the administrative cost of opening and closing accounts, printing new checks, embossing new cards, notice, print and mailing, and obtaining credit monitoring services and identity theft insurance for County customers whose Personal Data has or may have been compromised.

20.7 ADDITIONAL PROCEDURES FOR THE IDENTIFICATION OF POSSIBLE INSTANCES OF IDENTITY THEFT

Contractor acknowledges that County has certain obligations to identify patterns, practices, and specific forms of activity that indicate the possible existence of identity theft (defined as fraud committed using the identifying information of another person), pursuant to Section 114 of the Fair and Accurate Credit Transactions Act of 2003 and its implementing regulations promulgated by the Office of the Comptroller of the Currency, 12 C.F.R. Part 41. Contractor, to the extent that it holds or otherwise has access to data that is subject to the Fair and Accurate Credit Transactions Act, agrees to establish, maintain and update reasonably effective policies and procedures to detect, prevent, and mitigate the risk of identity theft, and to promptly notify and report to County upon request, any instances where Contractor detects potential identity theft in the course of its duties pursuant to this Agreement. Contractor further agrees to immediately report to County any confirmed instances of identity theft. In furtherance thereof, Contractor agrees to be guided by the examples of identity theft "**Red Flags**" (defined as a pattern, practice, or specific activity that indicates the possible existence of identity theft) set forth in Supplement A to Appendix J to 12 C.F.R. Part 41. Upon request by County, Contractor agrees to confirm in

writing and, when specified, demonstrate to County its compliance with the requirements of this Section 20 (Security).

21. COMMUNICATION SYSTEMS AND ACCESS TO INFORMATION

During the Term of this Agreement, Contractor may receive access to County's software, computers, equipment, and electronic communications systems ("**County Systems**"), including but not limited to voicemail, email, customer databases, and internet and intranet systems. Such County Systems are intended for legitimate business use related to County's business. Contractor acknowledges that Contractor does not have any expectation of privacy as between Contractor and County in the use of or access to County Systems and that all communications made with such County Systems or equipment by or on behalf of Contractor are subject to County's scrutiny, use, and disclosure, in County's discretion. County reserves the right, for business purposes and activities, to monitor, review, audit, intercept, access, archive, and/or disclose materials sent over, received by or from, or stored in any of its electronic County Systems. This includes, without limitation, email communications sent by users across the internet and intranet from and to any domain name owned or operated by County. This also includes, without limitation, any electronic communication system that has been used to access any of County Systems. Contractor further agrees that Contractor will use all appropriate security, such as, for example, encryption and passwords (Contractor must provide passwords and keys to County), to protect County's Confidential Information from unauthorized disclosure (internally or externally) and that the use of such security does not give rise to any privacy rights in the communication as between Contractor and County. County reserves the right to override any security passwords to obtain access to voicemail, email, computer (and software or other applications) and/or computer disks on County Systems. Contractor also acknowledges that County reserves the right, for any business purposes and activities, to search all work areas (e.g., offices, cubicles, desks, drawers, cabinets, computers, computer disks, and files) and all personal items brought onto County property or used to access County Confidential Information or County Systems.

22. DISASTER RECOVERY/BUSINESS CONTINUITY

Contractor shall maintain for its Hosting Environment a business continuity plan (the "**Business Continuity Plan**") and a disaster recovery plan (the "**Disaster Recovery Plan**") (collectively the "**DR/BC Plan**"), and implement such plan in the event of any unplanned interruption to the Hosting Environment. On or before the Effective Date, Contractor shall provide County with a copy of Contractor's current DR/BC Plan. Contractor shall actively test, review, and update the DR/BC Plan on at least an annual basis using American Institute of Certified Public Accountants standard SSAE 16. Contractor shall promptly provide County with copies of all such updates to the DR/BC Plan. All updates shall be subject to the requirements of this Section 22 (Disaster Recovery/Business Continuity). In any event, any future updates or revisions to the DR/BC Plan shall be no less protective than the plan in effect as of the Effective Date. Contractor shall notify County of the completion of any audit of the DR/BC Plan and promptly provide County with such information with regards to such audit as set forth in Section 15.11 (Contractor Self-Audit) and Exhibit N (Additional Hosting Services Terms and Conditions). Contractor shall also promptly provide County with a summary of all reports resulting from any testing of the DR/BC Plan. Contractor shall maintain disaster avoidance procedures designed to safeguard County's data and the data processing capability, and availability of the Hosting Environment, throughout the

Term of this Agreement. Contractor shall immediately notify County of any disaster or other event in which the DR/BC Plan is activated. Without limiting Contractor's obligations under this Agreement, whenever a disaster causes Contractor to allocate limited resources between or among Contractor's customers, County shall receive at least the same treatment as comparable Contractor customers with respect to such limited resources. The provisions of Section 32.1 (Force Majeure) shall not limit Contractor's obligations under this Section 22 (Disaster Recovery/Business Continuity).

23. INDEMNIFICATION

23.1 GENERAL INDEMNIFICATION

Contractor shall indemnify, defend, and hold harmless County, including districts administered by County, and their elected and appointed officers, employees, and agents (collectively referred to for purposes of this Section 23.1 (General Indemnification) as "**County**") from and against any and all third-party claims, demands, damages, liabilities, losses, costs, and expenses, including defense costs and reasonable legal, accounting, and other expert, consulting, or professional fees, and legal research fees, to the extent arising from, connected with, or related to Contractor, Contractor's agents', employees' or subcontractors' acts, errors, or omissions in the performance of services or provision of products hereunder, including any workers' compensation suits, liability, or expense, arising from or connected with any Services provided by any person on behalf of Contractor, Contractor's agents, employees, or subcontractors pursuant to this Agreement. Any legal defense pursuant to Contractor's indemnification obligations under this Section 23.1 (General Indemnification) shall be conducted by Contractor and performed by counsel selected by Contractor.

Notwithstanding the preceding sentence, County shall have the right to participate in any such defense at its sole cost and expense, except that in the event Contractor fails to provide County with a full and adequate defense, as County reasonably determines, County shall be entitled to retain its own counsel and receive reimbursement from Contractor for all such costs and expenses incurred by County in doing so. Neither Party shall have the right to enter into any settlement, agree to any injunction or other equitable relief, or make any admission on behalf of County without the County's prior written Approval.

23.2 INTELLECTUAL PROPERTY INDEMNIFICATION

(a) Contractor shall indemnify, hold harmless, and defend County, including its officers, employees, and agents, from and against any and all third-party claims, demands, damages, liabilities, losses, costs, and expenses, including, but not limited to, defense costs and reasonable legal, accounting, and other expert, consulting, or professional fees and attorney's fees, as such are incurred, for or by reason of any actual or alleged infringement of any third-party's U.S. patent, copyright, or other Intellectual Property Right, or any actual or alleged unauthorized trade secret disclosure or misappropriation, arising from or related to the Licensed Software, Hosting Software, Work Product, and/or Deliverables (collectively, the "**Indemnified Items**") (collectively referred to for purposes of this Section 23.2(a) as "**Infringement Claim(s)**"), provided that the Indemnified Item has not been altered, revised, or modified by County in a manner that causes the alleged infringement. Notwithstanding the foregoing, Contractor shall have

no indemnity obligation for Infringement Claims arising from (A) the development of custom software code required by County and based on specifications provided by County; (B) use of the Indemnified Items in excess of the rights granted hereunder; or (C) County's failure to implement an update or enhancement to the Indemnified Items, provided, as to the Licensed Software and Hosting Software, Contractor provides the update or enhancement at no additional charge to County and provides County with written notice that implementing the update or enhancement would avoid the infringement. Any legal defense pursuant to Contractor's indemnification obligations under this Section 23.2(a) shall be limited to the Licensed Software and Hosting Software and be conducted by Contractor and performed by counsel selected by Contractor. Notwithstanding the foregoing, County shall have the right to participate in any such defense at its sole cost and expense. To the extent permitted by law or contract, Contractor shall pass through to County the indemnities and warranties provided to Contractor by third-parties with regard to intellectual property and infringement for Third-Party Products.

(b) County shall notify Contractor, in writing, as soon as practicable of any claim or action alleging such infringement or unauthorized disclosure. If any Indemnified Item hereunder becomes the subject of an Infringement Claim under Section 23.2(a) (Intellectual Property Indemnification), or in Contractor's opinion is likely to become the subject of such a claim, then, in addition to defending the claim and paying any damages and attorneys' fees as required above in Section 23.2(a) (Intellectual Property Indemnification), Contractor shall, at its option and in its sole discretion and at no cost to County, as remedial measures, either: (i) procure the right, by license or otherwise, for County to continue to use the Indemnified Items or affected component(s) thereof, or part(s) thereof, pursuant to this Agreement; or (ii) replace or modify (Contractor's obligation to modify in this Section 23.2(b) only applies to the Contractor-developed Licensed Software) the Indemnified Items or component(s) thereof with another software, service, item, or component(s) thereof of at least equivalent quality and performance capabilities, in County's determination, until it is determined by County that the Indemnified Items and all components thereof become non-infringing, non-misappropriating, and non-disclosing (hereinafter collectively for the purpose of this Section "**Remedial Act(s)**").

(c) If Contractor fails to complete the Remedial Acts described in Section 23.2(b) above within ninety (90) days of notice of the claim (and such time has not been extended by County in writing) then, County shall have the right, at its sole option, to elect to (i) terminate this Agreement with regard to the infringing Indemnified Items for default pursuant to Section 29.2 (Termination for Material Breach), in which case, in addition to other remedies available to County, Contractor shall reimburse County for all Implementation Fees paid by County to Contractor under the Agreement, and/or (ii) take such remedial acts as it determines to be commercially reasonable to mitigate any impairment of its use of the infringing Indemnified Items or damages (hereafter collectively referred to as "**County's Mitigation Acts**"). Contractor shall indemnify and hold harmless County for all amounts paid and all direct and indirect costs associated with County's Mitigation Acts. Failure by Contractor to pay such amounts within ten (10) Business Days of invoice by County shall, in addition to, and cumulative of all other

remedies, entitle County to immediately withhold all payments due to Contractor under this Agreement up to the amount paid by County in connection with County's Mitigation Acts.

23.3 INDEMNITIES THROUGHOUT AGREEMENT

It is understood and agreed by the Parties that Contractor's indemnity obligations are set forth throughout this Agreement and are not confined to this Section 23 (Indemnification).

24. LIMITATION OF LIABILITY AND STEP DOWN LIMITATION OF LIABILITY AMOUNT

24.1 LIMITATION OF LIABILITY

Proprietary and Confidential

Proprietary and Confidential

(a) Proprietary and Confidential;

25. INSURANCE

25.1 GENERAL INSURANCE PROVISIONS

Without limiting Contractor's indemnification of County, and in the performance of this Agreement and until all of its obligations pursuant to this Agreement have been met, Contractor shall provide and maintain at its own expense insurance coverage satisfying the requirements specified in this Section 25 (Insurance). These minimum insurance coverage terms, types, and limits ("**Required Insurance**") also are in addition to and separate from any other contractual obligation imposed upon Contractor pursuant to this Agreement. County in no way warrants that the Required Insurance is sufficient to protect Contractor for liabilities which may arise from or relate to this Agreement.

25.2 EVIDENCE OF COVERAGE AND NOTICE

(a) Certificate(s) of insurance coverage ("**Certificate**") satisfactory to County, and a copy of an Additional Insured endorsement confirming County and its Agents (defined below)

has been given Insured status under the Contractor's General Liability policy, shall be delivered to County at the address specified in Section 25.2(d) below and provided prior to commencing services under this Agreement.

(b) Renewal Certificates shall be provided to County not less than ten (10) days following Contractor's policy expiration dates. County reserves the right to obtain complete, certified copies of any required Contractor and/or subcontractor insurance policies at any time.

(c) Certificates shall identify all Required Insurance coverage types and limits specified herein, reference this Agreement by name or number, and be signed by an authorized representative of the insurer(s). The Insured party named on the Certificate shall match the name of Contractor identified as the contracting party in this Agreement. Certificates shall provide the full name of each insurer providing coverage, its NAIC (National Association of Insurance Commissioners) identification number, its financial rating.

(d) Neither County's failure to obtain, nor County's receipt of, or failure to object to a non-complying insurance certificate or endorsement, or any other insurance documentation or information provided by the Contractor, its insurance broker(s) and/or insurer(s), shall be construed as a waiver of any of the Required Insurance provisions.

Certificates and copies of any required endorsements shall be sent to the County Project Director at the address specified in Exhibit X (County Key Personnel).

Contractor also shall promptly report to County any injury or property damage accident or incident, including any injury to a Contractor employee occurring on County property, and any loss, disappearance, destruction, misuse, or theft of County property, monies, or securities entrusted to Contractor. Contractor also shall promptly notify County of any third-party claim or suit filed against Contractor or any of its subcontractors which arises from or relates to this Agreement, and could result in the filing of a claim or lawsuit against Contractor and/or County.

25.3 ADDITIONAL INSURED STATUS AND SCOPE OF COVERAGE

The County of Los Angeles, its special districts, elected officials, officers, agents, employees and volunteers (collectively "**County and its Agents**") shall be provided additional insured status under Contractor's General Liability policy with respect to liability arising out of Contractor's ongoing and completed operations performed on behalf of County. County and its Agents additional insured status shall apply with respect to liability and defense of suits arising out of Contractor's acts or omissions, whether such liability is attributable to Contractor or to County. The full policy limits and scope of protection also shall apply to County and its Agents as an additional insured, even if they exceed the County's minimum Required Insurance specifications herein. Use of an automatic additional insured endorsement form is acceptable providing it satisfies the Required Insurance provisions herein.

25.3.1 CANCELLATION OF INSURANCE

Except in the case of cancellation for non-payment of premium, Contractor's insurance policies shall provide, and Certificates shall specify, that County shall receive notice in accordance with policy provisions of any cancellation of the Required Insurance. Ten (10) days prior notice may be given to County in event of cancellation for non-payment of premium.

25.3.2 INSURER FINANCIAL RATINGS

Coverage shall be placed with insurers acceptable to the County with A.M. Best ratings of not less than A:VII unless otherwise Approved by County.

25.3.3 CONTRACTOR'S INSURANCE SHALL BE PRIMARY

Contractor's insurance policies, with respect to any claims related to this Agreement, shall be primary with respect to all other sources of coverage available to Contractor. Any County maintained insurance or self-insurance coverage shall be in excess of and not contribute to any Contractor coverage.

25.3.4 WAIVERS OF SUBROGATION

To the fullest extent permitted by law, the Contractor hereby waives its rights and its insurer(s)' rights of recovery against County under all the Required Insurance for any loss arising from or relating to this Agreement. The Contractor shall require its insurers to execute any waiver of subrogation endorsements which may be necessary to effect such waiver.

25.3.5 SUBCONTRACTOR INSURANCE COVERAGE REQUIREMENTS

Contractor shall include all subcontractors as insureds under Contractor's own policies, or shall provide County with each subcontractor's separate evidence of insurance coverage. Contractor shall be responsible for verifying each subcontractor complies with the Required Insurance provisions herein, and shall require that each subcontractor name County and Contractor as additional insureds on the subcontractor's General Liability policy. Contractor shall obtain County's prior review and Approval of any subcontractor request for modification of the Required Insurance.

25.3.6 DEDUCTIBLES AND SELF-INSURED RETENTIONS

Contractor's policies shall not obligate the County to pay any portion of any Contractor deductible or SIR.

25.3.7 CLAIMS MADE COVERAGE

If any part of the Required Insurance is written on a claims made basis, any policy retroactive date shall precede the Effective Date of this Agreement. Contractor

understands and agrees it shall maintain such coverage for a period of not less than three (3) years following Agreement expiration, termination, or cancellation.

25.3.8 APPLICATION OF EXCESS LIABILITY COVERAGE

Contractors may use a combination of primary, and excess insurance policies which provide coverage as broad as ("follow form" over) the underlying primary policies, to satisfy the Required Insurance provisions.

25.3.9 SEPARATION OF INSUREDS

All liability policies shall provide cross-liability coverage as would be afforded by the standard ISO (Insurance Services Office, Inc.) separation of insureds provision with no insured versus insured exclusions or limitations.

25.3.10 ALTERNATIVE RISK FINANCING PROGRAMS

County reserves the right to review, and then Approve, Contractor use of self-insurance, risk retention groups, risk purchasing groups, pooling arrangements, and captive insurance to satisfy the Required Insurance provisions. County and its Agents shall be designated as an Additional Covered Party under any Approved program.

25.3.11 COUNTY REVIEW AND APPROVAL OF INSURANCE REQUIREMENTS

The County reserves the right to review and adjust the Required Insurance provisions, conditioned upon County's determination of changes in risk exposures.

25.4 INSURANCE COVERAGE REQUIREMENTS

25.4.1 COMMERCIAL GENERAL LIABILITY INSURANCE

Providing scope of coverage equivalent to ISO policy form CG 00 01, naming County and its Agents as an additional insured, with limits of not less than:

General Aggregate	$4 million
Products/Completed Operations Aggregate	$2 million
Personal and Advertising Injury	$2 million
Each Occurrence	$2 million

25.4.2 AUTOMOBILE LIABILITY INSURANCE

Providing scope of coverage equivalent to ISO policy form CA 00 01 with limits of not less than One Million Dollars ($1,000,000) for bodily injury and property damage, in combined or equivalent split limits, for each single accident. Insurance shall cover liability arising out of Contractor's use of autos pursuant to this

Agreement, including owned, leased, hired, and/or non-owned autos, as each may be applicable.

25.4.3 WORKERS' COMPENSATION AND EMPLOYERS' LIABILITY

Insurance or qualified self-insurance satisfying statutory requirements, which includes Employers' Liability coverage with limits of not less than One Million Dollars ($1,000,000) per accident.

25.4.4 PROFESSIONAL LIABILITY/ERRORS AND OMISSIONS

Insurance covering Contractor's liability arising from or related to this Contract, with limits of not less than One Million Dollars ($1,000,000) per claim and Two Million Dollars ($2,000,000) aggregate. Further, Contractor understands and agrees it shall maintain such coverage for a period of not less than three (3) years following this Agreement's expiration, termination, or cancellation.

25.5 FAILURE TO MAINTAIN INSURANCE

Contractor's failure to maintain or to provide acceptable evidence that it maintains the Required Insurance acceptable to County shall constitute a material breach of the Agreement, upon which County immediately may withhold payments due to Contractor and/or suspend this Agreement.

26. WITHHOLD REMEDY

In addition to, and cumulative to all other remedies in law, at equity and provided under this Agreement, in the event Contractor is in material default of its duties or obligations under this Agreement and it fails to cure the default within thirty (30) days after receipt of written notice of default from County, County may, without waiving any other rights under this Agreement, elect to withhold from the payments due to Contractor under this Agreement during the period beginning with the thirty first (31st) day after Contractor's receipt of notice of default, and ending on the date that the default has been cured to the reasonable satisfaction of County, an amount that is in proportion to the magnitude of the default or the Service that Contractor is not providing, as determined in County's reasonable discretion. Upon curing of the default by Contractor, County will cause the withheld payments to be paid to Contractor, without interest. In the event it is Finally Determined that County has withheld a payment in bad faith, such payment shall promptly be paid to Contractor, plus interest at the maximum legal rate.

27. DISPUTE RESOLUTION PROCEDURE

It is the intent of the Parties that all disputes arising under this Agreement be resolved expeditiously, amicably, and at the level within each Party's organization that is most knowledgeable about the disputed issue. The Parties understand and agree that the procedures outlined in this Section 27 (Dispute Resolution Procedure) are not intended to supplant the routine handling of inquiries and complaints through informal contact with their respective managers. Accordingly, for purposes of the procedures set forth in this Section 27 (Dispute Resolution Procedure), a "**Dispute**" shall mean any action, dispute, claim, or controversy of any

kind, whether in contract or tort, statutory or common law, legal or equitable, now existing or hereafter arising under or in connection with, or in any way pertaining to this Agreement.

(e) Contractor and County agree to act with urgency to mutually resolve any Disputes which may arise with respect to this Agreement. All such Disputes shall be subject to the provisions of this Section 27 (Dispute Resolution Procedure) (such provisions shall be collectively referred to as the "**Dispute Resolution Procedure**"). Time is of the essence in the resolution of Disputes.

(f) Contractor and County agree that, the existence and details of a Dispute notwithstanding, both Parties shall continue without delay their performance hereunder, except for any performance which County reasonably determines should be delayed as a result of such Dispute.

(g) Subject to the provisions of Section 15 (Invoices and Payments), if Contractor fails to continue without delay its performance hereunder which County, in its sole discretion, determines should not be delayed as a result of such Dispute, then any additional costs which may be incurred by Contractor or County as a result of Contractor's failure to continue to so perform shall be borne by Contractor, and Contractor shall make no claim whatsoever against County for such costs. Contractor shall promptly reimburse County for such County costs, as determined by County, or County may deduct all such additional costs from any amounts due to Contractor from County.

If County fails to continue without delay to perform its responsibilities under this Agreement which County determines should not be delayed as a result of such Dispute, then any additional costs incurred by Contractor or County as a result of County's failure to continue to so perform shall be borne by County, and County shall make no claim whatsoever against Contractor for such costs. County shall promptly reimburse Contractor for all such additional Contractor costs subject to the Approval of such costs by County.

(h) In the event of any Dispute between the Parties with respect to this Agreement, Contractor and County shall submit the matter to their respective Project Managers for the purpose of endeavoring to resolve such Dispute.

(i) In the event that the Project Managers are unable to resolve the Dispute within a reasonable time not to exceed ten (10) days from the date of submission of the Dispute to them, then the matter shall be immediately submitted to the Parties' respective Project Directors for further consideration and discussion to attempt to resolve the Dispute.

(j) In the event that the Project Directors are unable to resolve the Dispute within a reasonable time not to exceed ten (10) days from the date of submission of the Dispute to them, then the matter shall be immediately submitted to Contractor's Executive Vice President of Client Org (or equivalent position) and the Director. These persons shall have ten (10) days to attempt to resolve the Dispute.

(k) In the event that at these levels, there is not a resolution of the Dispute acceptable to both Parties, then each Party may assert its other rights and remedies provided under this Agreement and/or its rights and remedies as provided by law.

(l) All disputes utilizing this Dispute Resolution Procedure shall be documented in writing by each Party and shall state the specifics of each alleged dispute and all actions taken. The Parties shall act in good faith to resolve all disputes. At all three (3) levels described in this Section 27 (Dispute Resolution Procedure), the efforts to resolve a Dispute shall be undertaken by conference between the Parties' respective representatives, either orally, by face to face meeting or by telephone, or in writing by exchange of correspondence.

(m) Notwithstanding any other provision of this Agreement, County's right to terminate this Agreement or either Party's right to seek injunctive relief to enforce the provisions of Section 19 (Confidentiality) shall not be subject to this Dispute Resolution Procedure. The preceding sentence is intended only as a clarification of the Parties' rights and shall not be deemed to impair any claims that either Party may have or a Party's rights to assert such claims after any such termination or such injunctive relief has been obtained.

(n) Contractor shall bring to the attention of the County Project Manager and/or County Project Director any Dispute between the County and the Contractor regarding the performance of Services as stated in this Agreement.

28. DISPUTE RESOLUTION WITH CONTRACTOR AND OTHER VENDORS

Contractor shall, on County's request, participate in dispute resolution in accordance with this Agreement with County and Contractor and County's third-party vendors, including Hardware vendors, to resolve any disputes between and/or among such vendors, including County and Contractor, as to responsibility by any particular vendor for issues arising from performance, warranties, and other issues relating to the Licensed Software, Hardware, and Recommended Configuration.

29. TERMINATION

29.1 TERMINATION FOR INSOLVENCY

(a) The County may terminate this Agreement forthwith in the event of the occurrence of any of the following:

(i) Insolvency of the Contractor. Contractor shall be deemed to be insolvent if it has ceased to pay its debts for at least sixty (60) days in the ordinary course of business or cannot pay its debts as they become due, whether or not a petition has been filed under the Bankruptcy Code and whether or not the Contractor is insolvent within the meaning of the Bankruptcy Code; provided that Contractor shall not be deemed insolvent if it has ceased in the normal course of business to pay its debts which are disputed in good faith and which are not related to this Agreement as determined by County.

(ii) The filing of a voluntary or involuntary petition regarding the Contractor under the Federal Bankruptcy Code (which involuntary petition is not dismissed within ninety (90) days, provided that Contractor cooperates with County during such period with regard to any transition planning that County initiates in accordance with Section 29.8 (Termination Transition Services);

(iii) The appointment of a receiver or trustee for the Contractor; or

(iv) The execution by the Contractor of a general assignment for the benefit of creditors.

(b) The rights and remedies of the County provided in this Section 29.1 (Termination for Insolvency) shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Agreement.

29.2 TERMINATION FOR MATERIAL BREACH

(a) County may terminate this Agreement, any Statement of Work, in whole or in part: (i) if Contractor materially breaches any of its duties or obligations under the Agreement or any Statement of Work and fails to cure such breach within thirty (30) calendar days after written notice is provided by County (and assuming Contractor had previously been notified of the acts giving rise to the termination); (ii) if Contractor materially breaches any duty or obligation under the Agreement or any Statement of Work, which is not capable of being cured, within thirty (30) calendar days after written notice is provided by County; or (iii) if Contractor commits numerous breaches of its duties or obligations under the Agreement or any Statement of Work, which in the aggregate are material, and fails to cure such numerous breaches within thirty (30) calendar days after written notice is provided by County. In the event of Contractor's failure to cure any such breach or breaches, or, as applicable, submit an acceptable plan of correction, within the applicable cure period, County may terminate this Agreement or any Statement of Work, as of the date set forth in such written notice, which date of termination shall in no event be less than thirty (30) calendar days after the date of the notice of termination. In the event of any breach by Contractor of its material obligations under a Statement of Work, County's obligation to make any payments yet to be made and for which work has not been delivered under such Statement of Work shall be terminated. Termination of such payment obligations shall be in addition to any other rights or remedies that County may have in the event of any such breach or alleged breach.

(b) In the event that County fails to pay Contractor undisputed invoices properly due and owing to Contractor under this Agreement exceeding in the aggregate Fifty Thousand Dollars ($50,000) of the total invoices by the specified due date and fails to cure such default within sixty (60) days of notice from Contractor of its intention to terminate for failure to make such payment, Contractor may elect, by written notice to County, to terminate either the affected Statement(s) of Work or this Agreement. Contractor acknowledges and agrees that this Section 29.2(b) (Termination for Material Breach) describes Contractor's sole right to terminate any Statement of Work or this Agreement

and Contractor hereby waives any other rights it may have to terminate this Agreement or any Statement of Work.

(c) In the event that the County terminates this Agreement in whole or in part as provided in Section 29.2 (Termination for Material Breach), the County may procure, upon such terms and in such manner as the County may deem appropriate, goods and services similar to those so terminated. Contractor shall be liable to the County for any and all excess costs incurred by the County, as determined by the County, for such similar goods and services. Contractor shall continue the performance of this Agreement to the extent not terminated under the provisions of this Section 29.2 (Termination for Material Breach).

(d) If, after the County has given notice of termination under the provisions of this Section 29.2 (Termination for Material Breach), it is determined by the County that the Contractor was not in default under the provisions of this Section 29.2 (Termination for Material Breach), the rights and obligations of the Parties shall be the same as if the notice of termination had been issued pursuant to Section 29.6 (Termination for Convenience).

29.3 TERMINATION FOR REGULATORY NON-COMPLIANCE

In the event Contractor's relationship with County under this Agreement is identified in writing by any regulator (including any governmental body or accreditation/certification organization (e.g., Joint Commission, Certification Commission for Health Information Technology ("**CCHIT**"), or DNV Healthcare Inc.)) having jurisdiction over County, to present a risk to County or its customers that requires correction, County shall notify Contractor of such identification. In the event the Parties are unable for any reason through reasonable efforts to resolve the identified issue(s) to the satisfaction of the relevant regulator within the timeframe mandated by the regulator, County may terminate this Agreement for convenience and without obligation to pay any termination fee or penalty to Contractor. County agrees to pay Contractor for all products and services delivered prior to the effective date of termination.

29.4 TERMINATION FOR BREACH OF WARRANTY TO MAINTAIN COMPLIANCE WITH COUNTY'S CHILD SUPPORT COMPLIANCE PROGRAM

Failure of the Contractor to maintain compliance with the requirements set forth in Section 32.34 (Contractor's Warranty of Adherence to County's Child Support Compliance Program) shall constitute default under this Agreement. Without limiting the rights and remedies available to the County under any other provision of this Agreement, failure of the Contractor to cure such default within ninety (90) calendar days of written notice shall be grounds upon which the County may terminate this Agreement pursuant to Section 29.2 (Termination for Material Breach) and pursue debarment of the Contractor, pursuant to County Code Chapter 2.202.

29.5 TERMINATION FOR IMPROPER CONSIDERATION

(a) The County may, by written notice to the Contractor, immediately terminate the right of the Contractor to proceed under this Agreement if it is found that consideration, in any form, was offered or given by the Contractor, either directly or through an intermediary,

to any County officer, employee, or agent with the intent of securing this Agreement or securing favorable treatment with respect to the award, amendment, or extension of this Agreement or the making of any determinations with respect to the Contractor's performance pursuant to this Agreement. In the event of such termination, the County shall be entitled to pursue the same remedies against the Contractor as it could pursue in the event of default by the Contractor.

(b) Contractor shall immediately report any attempt by a County officer or employee to solicit such improper consideration. The report shall be made either to the County manager charged with the supervision of the employee or to the County Auditor-Controller's Employee Fraud Hotline at (800) 544-6861.

(c) Among other items, such improper consideration may take the form of cash, discounts, service, the provision of travel or entertainment, or tangible gifts.

29.6 TERMINATION FOR CONVENIENCE

County may terminate this Agreement, in whole or in part, or any Statement of Work, Service, or Deliverable immediately upon thirty (30) days written notice to Contractor without reason, penalty, or breach of this Agreement, notwithstanding that the Contractor is in compliance with all delivery, performance, or other requirements. In the event of any such termination, Contractor shall be compensated for any Services properly performed prior to the effective date of the termination, but any compensation allocated to Services that were yet to be rendered with regard to any canceled aspect of the Services shall then be eliminated. Termination under this Section 29.6 (Termination for Convenience) shall not affect the license granted in Section 3 (Licensed Software), which shall continue in perpetuity.

29.7 EFFECT OF TERMINATION

Upon expiration or termination of this Agreement, in whole or in part, or any Statement of Work, Service, or Deliverable, unless otherwise specified by County in writing:

(a) Contractor and County shall continue the performance of this Agreement to the extent not terminated.

(b) Contractor shall cease to perform the Services being terminated on the date and to the extent specified in such notice and provide to County all completed Services and Services in progress, in a media reasonably requested by County.

(c) County will pay to Contractor all sums due to Contractor for Services properly performed and products delivered through the effective date of such expiration or termination (prorated as appropriate).

(d) Contractor shall return to County all monies paid by County, yet unearned by Contractor, including any prepaid Support Services Fees, if applicable.

(e) Notwithstanding the foregoing, upon termination for default pursuant to Section 29.2 (Termination for Material Breach) during Implementation Services, Contractor shall

return all monies paid by County to Contractor during such Implementation Services, and County will return to Contractor all products of such terminated Implementation Services, subject to continued use as needed to maintain operations, to ensure health care to County's patients is not negatively impacted, and otherwise mitigate damages during an orderly transition to alternative systems.

(f) County shall have the rights set forth in Section 3 (Licensed Software) and Section 4 (Escrow of Source Materials) to access and use the Source Material as set forth therein, including without limitation the right to modify all source and object code versions of the Licensed Software provided one of the Release Conditions described in Section 4.1 (Escrow Agent and Release Conditions) has occurred which would permit County to use the Source Material.

(g) Expiration or termination of this Agreement for any reason will not release either Party from any liabilities or obligations set forth in this Agreement which (i) the Parties have expressly agreed in writing will survive any such expiration or termination, or (ii) remain to be performed or by their nature would be intended to be applicable following any such expiration or termination.

(h) In the case of expiration or termination of the Agreement, (i) all Statement(s) of Work that have not been completed shall be deemed terminated in accordance with this Section 29 (Termination) as of the effective date of such termination, and (ii) the Support Term shall be deemed terminated.

(i) Contractor understands and agrees that County has obligations that it cannot satisfy without use of the Licensed Software provided to County hereunder or an equivalent system, and that a failure to satisfy such obligations could result in irreparable damage to County and the entities it serves. Therefore, Contractor agrees that in the event of any expiration or termination of this Agreement, Contractor shall fully cooperate with County in the transition of County to a new system, toward the end that there be no interruption of County's day to day operations due to the un-Availability of the Licensed Software during such transition, as provided in Section 29.8 (Termination Transition Services).

(j) Contractor shall promptly return to County any and all Confidential Information, including County Data, that relate to that portion of the Agreement and Services terminated by County, except in instances where Contractor is required by law to maintain such County Data and subject to continuing protection in accordance with the confidentiality provisions of this Agreement.

29.8 TERMINATION TRANSITION SERVICES

Upon the expiration of this Agreement or its termination by either Party for any reason, including the breach of this Agreement by the other Party, the rights of County shall in any and all events be provided as set forth in this Section 29.8 (Termination Transition Services). Unless the Parties have specifically agreed upon a termination transition plan prior to the time of termination (the "**Termination Transition Plan**"), the rights of County upon any termination shall be as set forth in this Section 29.8 (Termination Transition Services). If a Termination

Transition Plan has been agreed to, then the rights of County upon any expiration or termination of this Agreement shall be as set forth in the most recent Approved Termination Transition Plan, and also as set forth in this Section 29.8 (Termination Transition Services). In the event of any inconsistency between this Section 29.8 (Termination Transition Services) and the applicable Termination Transition Plan, this Section 29.8 (Termination Transition Services) shall govern. If no Termination Transition Plan has been agreed to by the Parties at the time of any expiration or termination of this Agreement, then Contractor shall continue to perform the Services under the Agreement, at performance standards and Service Levels in effect at the time of termination or expiration, as well as the termination transition Services, which Services shall be provided as set forth in this Section 29.8 (Termination Transition Services). Contractor shall provide County with all of the Services and all of the termination transition Services as provided in this Section 29.8 (Termination Transition Services) and in the then most recent version of the Termination Transition Plan, if any. The duty of Contractor to provide such Services shall be conditioned on County continuing to comply with its obligations under the Agreement, including payment of all fees. Contractor shall have no right to withhold or limit its performance or any of such termination transition Services on the basis of any alleged breach of this Agreement by County, other than a failure by County to timely pay the amounts due hereunder during the termination transition period. County shall have the right to seek specific performance of this Section 29.8 (Termination Transition Services) in any court of competent jurisdiction and Contractor hereby waives any defense that damages are an adequate remedy. Compliance with this Section 29.8 (Termination Transition Services) by either Party shall not constitute a waiver or estoppel with regard to any rights or remedies available to the Parties. Contractor will (a) meet with County as soon as practicable after a notice of termination or notice of a decision to not extend this Agreement has been given, to discuss any potential modifications to the then most current Termination Transition Plan, if any, (b) use all commercially reasonable efforts to assist County in effecting a transition of the Services provided by Contractor hereunder, in accordance with Contractor's Best Practices, to County or another vendor chosen by County, and (c) be compensated for transition related Services and costs by payment by County in accordance with the rates set forth in this Agreement. Contractor will provide termination transition Services for a period defined in the Termination Transition Plan, if any, but in no event less than six (6) months following the expiration or termination of this Agreement. Thereafter, Contractor shall provide extensions of termination transition Services as requested by County in serial thirty (30) calendar day extension terms for up to an additional twelve (12) months. The total period of termination transition Services, including all extensions provided for herein, shall not exceed eighteen (18) months.

29.9 SURVIVAL

The following Sections shall survive any termination or expiration of this Agreement: Sections 3.1 (License Grant) (except in the event of termination for breach by County of Sections 3 (Licensed Software), 18 (Intellectual Property), or 19 (Confidentiality)), 4 (Escrow of Source Materials), 9.11 (Damage to County Facilities), 9.12 (Unapproved Work), 12.6 (Failed Testing), 14.8(Non-Appropriation of Funds), 14.9 (County's Obligation for Future Fiscal Years), 15.5 (No Payment for Services Provided Following Expiration/Termination of Agreement), 15.6 (Holdbacks), 15.10 (Record Retention and Inspection/Audit Settlement), 15.13 (Verification of Licensee Costs By Government), 17.1.1 (Authority), 17.1.4 (Non-Infringement), 17.3 (Breach of Warranty Obligations), 18 (Intellectual Property), 19 (Confidentiality), 20.5 (Security Breach),

20.6 (Additional Procedures in the Event of Security Breach of Personal Data), 20.7 (Additional Procedures for the Identification of Possible Instances of Identify Theft), 23 (Indemnification), 24 (Limitation of Liability and Step Down Limitation of Liability Amount), 25.3.7 (Claims Made Coverages), 25.5 (Failure to Maintain Insurance), 26 (Withhold Remedy), 29.7 (Effect of Termination), 29.8 (Termination Transition Services), 29.9 (Survival), 32 (Miscellaneous), 2 (In-House Solution) of Exhibit N (Additional Hosting Services Terms and Conditions), 3.3 (Services Not To Be Withheld or Suspended) of Exhibit N (Additional Hosting Services Terms and Conditions), 4 (Confidentiality) of Exhibit N (Additional Hosting Services Terms and Conditions), and 7.11 (Force Majeure Not Applicable) of Exhibit N (Additional Hosting Services Terms and Conditions).

30. MULTI-VENDOR ENVIRONMENT

30.1 CROSS-OVER ISSUES

Contractor acknowledges that it will be delivering the Services in a multi-vendor environment, with County and County Designee(s) providing services relating to the County Systems. Effective operation of such an environment requires not only the cooperation among all service providers, including Contractor, but also collaboration in addressing service-related issues that may cross over from one service area or provider to another and related to the Services ("**Cross-Over Issues**"). As part of the Services, Contractor will actively provide and support tasks associated with operating and maintaining a collaborative approach to Cross-Over Issues in the same manner as if the Contractor Service relevant to the Cross-Over Issue was being provided in-house by County rather than by Contractor.

30.2 SERVICE INTERDEPENDENCIES

Contractor shall use commercially reasonable efforts to identify all work efforts and Deliverables of which Contractor has knowledge, whether performed by Contractor, subcontractors, Contractor third-party vendors, County, or County Designee(s) that may impact the delivery of the Services (the "**Service Interdependency**"). For each Service Interdependency, Contractor shall verify that project plans, detailed to the task level with individual performance responsibility identified, have been developed by the party responsible for the work or Deliverable, and validate that each project plan reflects delivery of the work or Deliverables required by Contractor to deliver the Services in accordance with the Specifications. Contractor shall implement processes to insure it is receiving regular reports, from all parties responsible for a Service Interdependency, with sufficient data to enable it to validate that each Service Interdependency is proceeding in accordance with the timing applicable to that Service Interdependency, and that the then current timing of delivery of the work or Deliverables as to each Service Interdependency will not adversely impact Contractor's ability to deliver the Services in accordance with the Specifications. Contractor shall take reasonable steps to validate that the data it receives in the reporting process is supported by tangible progress on the Service Interdependency. Within a reasonable period of time of knowledge of any Service Interdependency, Contractor shall provide County with a written report outlining the scope and nature of such Service Interdependency and Contractor's proposed resolution to remedy such Service Interdependency.

30.3 CRITICAL PATH ESCALATION ISSUES

Critical Path Escalation Issues shall be identified and described in detail by Contractor or County (as appropriate) in writing and delivered electronically by one Party's Project Manager to the other Party's Project Manager. The Contractor Project Director and the County Project Director shall seek to resolve the issue(s) or implement a mutually agreed to corrective action plan and notify the DHS CIO or designee and Contractor Lead Partner the escalation process has been initiated. If an agreed to resolution or corrective action plan as to a Critical Path Escalation Issue is not achieved by the second (2^{nd}) Business Day after the date of delivery of the issue by Contractor or County (as appropriate), the issues shall be escalated to the DHS CIO or designee and Contractor Lead Partner. Escalation requires that the Contractor Project Director and the County Project Director frame the escalated issue(s) concisely and submit a jointly prepared document that identifies areas of agreement, remaining areas of disagreement, resolution recommendations of each Party, and all relevant supporting information developed by the Parties relating to the Critical Path Escalation Issue. The DHS CIO or designee and Contractor Lead Partner shall have a telephonic or in person conference to reach final resolution within two (2) Business Days after the joint escalation memorandum has been submitted.

31. RELATIONSHIP ENHANCING COMMITMENTS

31.1 EXECUTIVE TEAM PARTICIPATION

To ensure a direct line of communication between County and Contractor's executive management team, which team shall include the Contractor's Executive Vice President Of Client Organization, Contractor's Regional Vice President General Manager, the County DHS Chief Information Officer ("**DHS CIO**"), County Project Director, or their designees, shall have a scheduled meeting, once per quarter. The DHS CIO or County Project Director shall prepare a written agenda for the meeting, to include specific topics to be discussed at the meeting, including background with regard to issues that have previously been raised with Contractor's personnel, and shall provide the agenda to Contractor no later than five (5) Business Days prior to the scheduled meeting. The meeting may occur in person or by telephone/video as agreed upon by the DHS CIO or County Project Director and Contractor's Executive Vice President Of Client Organization and Contractor's Regional Vice President General Manager. Notwithstanding the foregoing, more frequent meetings may occur in the event that the DHS CIO or County Project Director identifies emergent issues which require resolution prior to the next regularly scheduled quarterly meeting. Issues discussed at a meeting that are unresolved will be escalated by the Contractor immediately to its Chief Operating Officer ("**COO**"), and the COO will respond directly to the DHS CIO or County Project Manager within ten (10) Business Days.

31.2 VALUE AND ROI STUDY

Contractor shall provide, at no cost to County, a before, during, and after study of the EHR System/Contractor value proposition at County. County and Contractor will cooperate in the design of the study, which will have agreed objectives, work plans, metrics, and measurement methodologies for each phase of the study (e.g. before, during, and after implementation of the Licensed Software). County will cooperate with Contractor in this effort and will provide reasonable assistance to Contractor in providing data and staff time to facilitate measurement

of the agreed metrics. Such metrics, may include, among others, those relating to patient experience, physician experience, operational efficiency and clinical quality. All work papers and results of the study, whether favorable or not favorable will be provided to County. The results will not be published with County's name, demographic, or other information that could reasonably cause the subject of the study to be identified as County without County's prior written consent to the release of the specific study. County will not publish the results without providing Contractor a thirty (30) day period for non-binding review and comment on the publication.

32. MISCELLANEOUS

32.1 FORCE MAJEURE

(a) Neither Party shall be liable for such Party's failure to perform its obligations under and in accordance with this Agreement, if such failure arises out of fires, floods, epidemics, quarantine restrictions, other natural occurrences, strikes, lockouts (other than a lockout by such Party or any of such Party's subcontractors), freight embargoes, or other similar events to those described above, but in every such case the failure to perform must be totally beyond the control and without any fault or negligence of such Party (such events are referred to in this sub-paragraph as "**Force Majeure Events**").

(b) Notwithstanding the foregoing, a default by a subcontractor of Contractor shall not constitute a Force Majeure Event, unless such default arises out of causes beyond the control of both Contractor and such subcontractor, and without any fault or negligence of either of them. In such case, Contractor shall not be liable for failure to perform, unless the goods or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit Contractor to meet the required performance schedule. As used in this Subsection, the term "subcontractor" and "subcontractors" mean subcontractors at any tier.

(c) In the event Contractor's failure to perform arises out of a Force Majeure Event, Contractor agrees to obtain goods or services from other sources, if applicable, and to otherwise mitigate the damages and reduce the delay caused by such Force Majeure Event.

(d) In the event a Force Majeure Event continues for more than thirty (30) Business Days, County may terminate this Agreement effective upon providing written notice to Contractor. Notwithstanding the foregoing, a Force Majeure Event will not relieve Contractor of its obligations under Sections 19 (Confidentiality), 20 (Security), and 22 (Disaster Recovery/Business Continuity) or any Service Levels expressly identified in a Statement of Work.

32.2 UCITA; SELF-HELP REMEDIES

The Uniform Computer Information Transactions Act ("**UCITA**") shall not apply to this Agreement regardless of when and howsoever adopted, enacted and further amended under the laws of any jurisdiction whose laws may be deemed to apply. In the event that UCITA is adopted and enacted in California or any other jurisdiction whose laws may be deemed to apply

and, as a result of such adoption and enactment or any subsequent amendment thereto, the Parties are required to take any action to effectuate the result contemplated by this provision, including amending this Agreement, the Parties agree to take such action as may be reasonably required, including amending this Agreement accordingly. Contractor expressly waives any rights it may have under any applicable law to exercise any means of self-help, electronic or otherwise, with respect to any software provided hereunder, including any self-help remedies provided for under UCITA regardless of when and howsoever adopted, enacted or further amended under the laws of any jurisdiction whose laws may be deemed to apply.

32.3 NOTICES

(a) All notices or demands required or permitted to be given or made under this Agreement, unless otherwise specified, shall be in writing and shall be addressed to the Parties at the following addresses and delivered: (i) by hand with signed receipt; (ii) by first class registered or certified United States mail, postage prepaid; or (iii) by facsimile or electronic mail transmission followed within twenty-four (24) hours by a confirmation copy mailed by first-class registered or certified United States mail, postage prepaid. Notices shall be deemed given at the time of signed receipt in the case of hand delivery, three (3) days after deposit in the United States mail as set forth above, or on the date of facsimile or electronic mail transmission if followed by timely confirmation mailing. Addresses may be changed by either Party by giving ten (10) days prior written notice thereof to the other Party.

(b) Director shall have the authority to issue all notices or demands which are required or permitted to be issued by County under this Agreement.

(c) All notices shall be sent by one of the methods specified above, to the following:

(i) To County, notices shall be sent to the attention of the County Project Manager, County Project Director and County Director of Contract Administration and Monitoring at the respective addresses specified in Exhibit X (County Key Personnel).

(ii) To Contractor, notices shall be sent to the attention of the Contractor Project Manager at the address specified in Exhibit J (Contractor Key Employees).

(d) Each Party may change the names of the people designated to receive notices pursuant to this Section 32.3 (Notices) by giving written notice of the change to the other Party, subject to County's right of Approval in accordance with Section 10.1 (Project Team).

32.4 INTERPRETATION

(a) All Exhibits, Statements of Work, Attachments, and Schedules that are referenced herein and appended hereto, or are signed by the Parties on or after the date of this Agreement and by their express terms are to be part of this Agreement, are hereby incorporated by reference. The Exhibits, Statements of Work, Attachments, and Schedules set forth in the Exhibit list above are attached hereto and incorporated herein.

(b) In the event of any conflict or inconsistency in the definition or interpretation of any word, responsibility, schedule, or the contents or description of any task, subtask, Deliverable, goods, service, or other Service, or otherwise, between or among any of the body of this Agreement (For purposes of determining conflicts between parts of this Agreement, Exhibit N (Additional Hosting Services Terms and Conditions) shall be deemed to be part of the body of this Agreement), Statements of Work, Exhibits, Attachments, and Schedules, such conflict or inconsistency shall be resolved by giving precedence first to the body of this Agreement, and then to the Statements of Work, Exhibits, Attachments, and Schedules according to the following descending priority:

(i) Exhibit G (Glossary);

(ii) Exhibit A (Statements of Work);

(iii) Exhibit E (Service Levels and Performance Standards);

(iv) Exhibit C (Fees; Contractor Professional Services Rates);

(v) Exhibit P (Form Statement of Work);

(vi) Exhibit W (Relevant Responses to County Requirements); and

(vii) All other Exhibits, Attachments and Schedules.

(c) When an industry standard or commonly referenced business process (such as HL7 protocols, SAS 70 Type II audits or ISO-17799 standards) referenced in this Agreement, is succeeded by a differently named or numbered standard or process, that successor standard or process is incorporated herein as if it were referenced by its new name or number in this Agreement. For example, references in this Agreement to SAS 70 shall be read as references to SSAE 16, upon its effective date and replacement of SAS 70.

32.5 ENTIRE AGREEMENT

This Agreement and the Statements of Work, Exhibits, Attachments, and Schedules to this Agreement, as to its subject matter, exclusively and completely states the rights, duties, and obligations of the Parties, and supersedes any and all prior and contemporaneous representations, letters, proposals, discussions, agreements, and understandings, whether written or oral, by or between the Parties. This Agreement may only be amended in a writing signed by both Parties in accordance with Section 13 (Changes to Agreement). The Parties, by their representatives signing below, agree with the terms of this Agreement. In particular, no shrink-wrap, click-wrap, or other terms and conditions or agreements ("**Additional Terms**") provided with any products or software hereunder shall be binding on County, even if use of such products and software requires an affirmative "acceptance" of those Additional Terms before access is permitted. All such Additional Terms shall be of no force or effect and shall be deemed rejected by County in their entirety.

32.6 WAIVERS

All waivers hereunder must be made in writing by a duly authorized representative of the Party against whom the waiver is to operate, and failure at any time to require the other Party's performance of any obligation under this Agreement shall not affect the right subsequently to require performance of that obligation. Any waiver, in whole or in part, of any provision of this Agreement will not be considered to be a waiver of any other provision.

32.7 GOVERNING LAW

This Agreement shall be governed by, and construed in accordance with, the laws of the State of California, without regard to its conflict of law provisions. Contractor agrees and consents to the exclusive jurisdiction of the courts of the State of California for all purposes regarding this Agreement and further agrees and consents that venue of any action brought hereunder shall be exclusively in the County of Los Angeles.

32.8 COMPLIANCE WITH APPLICABLE LAWS

(a) In the performance of this Agreement, Contractor shall comply with all applicable Federal, State and local laws, rules, regulations, ordinances, and all provisions required thereby to be included in this Agreement are hereby incorporated herein by reference.

(b) Contractor shall indemnify, defend, and hold harmless County, and its officers, employees, and agents, from and against any and all third-party claims, demands, damages, liabilities, losses, costs, and expenses, including, without limitation, defense costs and reasonable legal, accounting, and other expert, consulting, or professional fees, arising from, connected with, or related to any failure by Contractor, or its officers, employees, agents, or subcontractors, to comply with any such laws, rules, regulations, ordinances, as determined by County in its sole judgment. Any legal defense pursuant to Contractor's indemnification obligations under this Section 32.8 (Compliance with Applicable Laws) shall be conducted by Contractor and performed by counsel selected by Contractor. Notwithstanding the preceding sentence, County shall have the right to participate in any such defense at its sole cost and expense, except that in the event Contractor fails to provide County with a full and adequate defense, as determined by County in its sole judgment, County shall be entitled to retain its own counsel, including, without limitation, County Counsel, and reimbursement from Contractor for all such costs and expenses incurred by County in doing so. Neither Party shall have the right to enter into any settlement, agree to any injunction or other equitable relief, or make any admission, in each case, on behalf of the other Party without prior written approval.

32.9 REQUIRED CERTIFICATIONS

Contractor shall obtain and maintain in effect during the Term of this Agreement all licenses, permits, registrations, accreditations, and certificates required by all Federal, State, and local laws, ordinances, rules, and regulations, which are applicable to Contractor's Services under this Agreement. Contractor shall further ensure that all of its officers, employees, agents, and subcontractors who perform services hereunder, shall obtain and maintain in effect during the Term of this Agreement all licenses, permits, registrations, accreditations and certificates which are applicable to their performance hereunder. A copy of each such license, permit, registration, accreditation, and certificate required by all applicable Federal, State, and local

laws, ordinances, rules, and regulations shall be provided upon written request, in duplicate, to the County Project Director in accordance with Section 32.3 (Notices).

32.10 COMPLIANCE WITH CIVIL RIGHTS LAWS

Contractor hereby assures that it will comply with Subchapter VI of the Civil Rights Act of 1964, 42 U.S.C. Sections 2000(e)(1) through 2000(e)(17), to the end that no person shall, on the grounds of race, creed, color, sex, religion, ancestry, age, condition of physical handicap, marital status, political affiliation, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under this Agreement or under any project, program, or activity supported by this Agreement. Contractor shall comply with Exhibit S (Contractor's EEO Certification).

32.11 NONDISCRIMINATION AND AFFIRMATIVE ACTION

(a) Contractor certifies and agrees that all persons employed by it, its affiliates, subsidiaries, or holding companies are and shall be treated equally without regard to or because of race, color, religion, ancestry, national origin, sex, age, physical or mental disability, marital status, or political affiliation, in compliance with all applicable Federal and State anti-discrimination laws and regulations.

(b) Contractor shall certify to, and comply with, the provisions of Exhibit S (Contractor's EEO Certification).

(c) Contractor shall take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to race, color, religion, ancestry, national origin, sex, age, physical or mental disability, marital status, or political affiliation, in compliance with all applicable Federal and State anti-discrimination laws and regulations. Such action shall include, but is not limited to: employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(d) Contractor certifies and agrees that it will deal with its subcontractors, bidders, and vendors without regard to or because of race, color, religion, ancestry, national origin, sex, age, physical or mental disability, marital status, or political affiliation.

(e) Contractor certifies and agrees that it, and its affiliates, subsidiaries, and holding companies shall comply with all applicable Federal and State laws and regulations to the end that no person shall, on the grounds of race, color, religion, ancestry, national origin, sex, age, physical or mental disability, marital status, or political affiliation, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under this Agreement or under any project, program, or activity supported by this Agreement.

(f) Contractor shall allow County representatives access to the Contractor's applicable employment records during regular business hours to verify compliance with the provisions of this Section 32.11 (Nondiscrimination and Affirmative Action) when so

requested by the County. County shall provide reasonable advanced notice of the timing and need to review Contractor's employment records.

(g) If the County finds that any provisions of this Section 32.11 (Nondiscrimination and Affirmative Action) have been violated, such violation shall constitute a material breach of this Agreement. A determination by the California Fair Employment and Housing Commission or the Federal Equal Employment Opportunity Commission that the Contractor has violated Federal or State anti-discrimination laws or regulations shall constitute a finding by the County that the Contractor has violated the anti-discrimination provisions of this Agreement.

(h) The Parties agree that in the event the Contractor violates any of the anti-discrimination provisions of this Agreement, the County shall, at its sole option, be entitled to the sum of Five Hundred Dollars ($500) for each such violation pursuant to California Civil Code Section 1671 as liquidated damages in lieu of terminating or suspending this Agreement.

32.12 CONSTRUCTION

All captions and paragraph and Section headings used in this Agreement are for reference purposes only and are not part of this Agreement, and shall not be used in construing this Agreement. Neither this Agreement nor any Statement of Work, Exhibit, Attachment, or Schedule will be construed in favor or against either Party by reason of the authorship of any provisions hereof.

32.13 SEVERABILITY

If any provision of this Agreement or the application thereof to any person or circumstance is held invalid, the remainder of this Agreement and the application of such provision to other persons or circumstances shall not be affected thereby.

32.14 AGREEMENT DRAFTED BY ALL PARTIES

This Agreement is the result of arm's length negotiations between the Parties. Consequently, each Party has had the opportunity to receive advice from independent counsel of its own choosing. This Agreement shall be construed to have been drafted by all Parties such that any ambiguities in this Agreement shall not be construed against either Party.

32.15 COUNTERPARTS

This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, and will become effective and binding upon the Parties as of the Effective Date at such time as all the signatories hereto have signed a counterpart of this Agreement.

32.16 DAYS

Unless expressly provided otherwise, all references to "days" refer to calendar days.

32.17 ASSIGNMENT AND DELEGATION

32.17.1 ASSIGNMENT BY CONTRACTOR

(a) Contractor shall not assign its rights or delegate its duties under this Agreement, or both, whether in whole or in part, without the prior written consent of County, in its discretion, and any attempted assignment or delegation without such consent shall be null and void. For purposes of this Section 32.17.1 (Assignment by Contractor), County consent shall require a written amendment to the Agreement, which is formally approved and executed by the Parties. Any payments by the County to any approved delegate or assignee on any claim under this Agreement shall be deductible, at County's sole discretion, against the claims, which the Contractor may have against the County.

(b) Any assumption, assignment, delegation, or takeover of any of the Contractor's duties, responsibilities, obligations, or performance of same by any entity other than the Contractor, whether through assignment, subcontract, delegation, merger, buyout, Change of Control, or any other mechanism, with or without consideration for any reason whatsoever without County's express prior written Approval, shall be a material breach of this Agreement which may result in the termination of this Agreement. Notwithstanding the foregoing, shareholders or other equity holders of Contractor may transfer, sell, exchange, assign, or divest themselves of any interest they may have in Contractor without breaching this Section 32.17.1 (Assignment by Contractor) provided such sale, transfer, exchange, assignment, or divestment does not result in a Change of Control.

In the event of a termination under this Section 37.17.1 (Assignment by Contractor), County shall be entitled to pursue the same remedies against Contractor as it could pursue in the event of default by Contractor. County must deliver notice of termination pursuant to this Section 32.17.1(b) (Assignment by Contractor) within one-hundred and twenty (120) calendar days of, the later of (i) County's knowledge, or (ii) public disclosure, of any event above requiring County's express prior written Approval. For purposes of this Section, "Change of Control" shall mean a direct or indirect change (e.g., whether caused by Contractor, or its shareholder(s) or other equity holders of Contractor), of the power to direct or cause the direction of the management and policies of Contractor, whether through ownership of assets or voting securities, governing board representation, contract, or otherwise. In the event there is a Change of Control without County's express prior written Approval under this Section 32.17.1(b) (Assignment by Contractor), within thirty (30) calendar days of County's knowledge of or the public disclosure of such Change of Control event, Contractor and County will meet to discuss County's concerns regarding the Change of Control and develop solutions and adequate assurances in an effort to resolve County's concerns. In the event County Approves the solutions and adequate assurances, an Amendment, if necessary, implementing such solutions and adequate assurances will be submitted to the Board. The approval of the

Amendment by the Board will be deemed a cure of Contractor's material breach under this Section 32.17.1(b) (Assignment by Contractor). Contractor's failure to obtain County's express prior written Approval under this Section 32.17.1(b) (Assignment by Contractor) shall not be deemed a material breach if the failure to obtain Approval seven (7) or more years after the Effective Date of this Agreement.

32.17.2 ASSIGNMENT BY COUNTY

This Agreement may be assigned in whole or in part by County, without the further consent of Contractor, to a party which is not a competitor of Contractor and which agrees in writing to perform County's obligations under this Agreement.

32.18 COOPERATION IN REGULATORY COMPLIANCE

Contractor shall reasonably cooperate with County with regard to regulatory compliance matters relating to the Licensed Software, Services, and/or Deliverables. Such cooperation shall include, but is not limited to, the following: (a) responding in good faith to reasonable requests to change or modify this Agreement as set forth in Section 13 (Changes to Agreement) as it relates to County's regulatory compliance; and (b) to the extent reasonably practicable, providing documentation, including system audit information and incident response reports, to validate ongoing compliance by Contractor with its security and confidentiality obligations hereunder.

32.19 TERMINOLOGY

All personal pronouns used herein, whether used in the feminine, masculine, or neuter gender, shall include all other genders, and the singular shall include the plural and vice versa. Unless otherwise expressly stated, the words "herein," "hereof," and "hereunder" and other words of similar import refer to this Agreement as a whole and not to any particular Section, Subsection, or other subpart. The words "include," "includes," "included," "including," "without limitation," or the phrase "e.g." shall not be construed as terms of limitation and shall, in all instances, be interpreted as meaning "including, but not limited to."

32.20 ELECTRONIC SIGNATURES AND FACSIMILES - BINDING

Except for the Parties' initial signatures to this Agreement, which must be provided in "original" form and not by facsimile or other electronic form, this Agreement and associated Statement(s) of Work and related documents may be accepted in electronic form (e.g., by an electronic or digital signature or other means of demonstrating assent) and Contractor's acceptance will be deemed binding between the Parties. Contractor acknowledges and agrees it will not contest the validity or enforceability of this Agreement and associated Statement(s) of Work and related documents, including under any applicable statute of frauds, because they were accepted and/or signed in electronic form. Contractor further acknowledges and agrees that it will not contest the validity or enforceability of a signed facsimile copy of this Agreement and associated Statement(s) of Work and related documents on the basis that it lacks an original handwritten signature. Facsimile signatures shall be considered valid signatures as of the date hereof. Computer maintained records of a Party when produced in hard copy form shall constitute

business records and shall have the same validity as any other generally recognized business records.

32.21 PROHIBITION AGAINST INDUCEMENT OR PERSUASION

Notwithstanding the above, the Contractor and the County agree that, during the Term of this Agreement and for a period of one (1) year thereafter, neither Party shall in any way intentionally induce or persuade any employee of one Party to become an employee or agent of the other Party. No bar exists against any hiring action initiated through non-targeted solicitation in the ordinary course of business, which would include a public announcement.

32.22 CONTRACTOR PERSONNEL INJURIES

In the event Contractor Personnel are injured or hurt while rendering the Services, whether onsite at County or otherwise, Contractor's workers compensation coverage shall be the exclusive remedy for the Contractor Personnel as it relates to County.

32.23 RECYCLED BOND PAPER

Consistent with the Board of Supervisors' policy to reduce the amount of solid waste deposited at the County landfills, the Contractor agrees to use recycled-content paper to the maximum extent possible on this Agreement.

32.24 NON-EXCLUSIVITY

Nothing herein is intended nor shall be construed as creating any exclusive arrangement with the Contractor. This Agreement shall not restrict County from acquiring similar, equal, or like goods and/or services from other entities or sources.

32.25 BUDGET REDUCTIONS

In the event that the County's Board of Supervisors adopts, in any fiscal year, a County Budget which provides for reductions in the salaries and benefits paid to the majority of County employees and imposes similar reductions with respect to County contracts, the County reserves the right to reduce its payment obligation under this Agreement correspondingly for that fiscal year and any subsequent fiscal year during the Term of this Agreement (including any extensions), and the services to be provided by the Contractor under this Agreement shall also be reduced correspondingly. The County's notice to the Contractor regarding said reduction in payment obligation shall be provided within thirty (30) calendar days of the Board's Approval of such actions. Except as set forth in the preceding sentence, the Contractor shall continue to provide all of the services set forth in this Agreement, as adjusted per Section 13.4 (Amendments).

32.26 PUBLIC RECORDS ACT

(a) Any documents submitted by the Contractor; all information obtained in connection with the County's right to audit and inspect the Contractor's documents, books, and accounting records pursuant to Section 15.10 (Record Retention and Inspection/Audit

Settlement) of this Agreement; as well as those documents which were required to be submitted in response to the RFP used in the solicitation process for this Agreement become a matter of public record and shall be regarded as public records. Exceptions will be those elements in the California Government Code Section 6250 et seq. ("**Public Records Act**") and which are marked "trade secret", "confidential", or "proprietary". The County shall not in any way be liable or responsible for the disclosure of any such records including, without limitation, those so marked, if disclosure is required by law, or by an order issued by a court of competent jurisdiction.

(b) In the event the County is required to defend an action on a Public Records Act request for any of the aforementioned documents, information, books, records, and/or contents of a proposal marked "trade secret", "confidential", or "proprietary", the Contractor agrees to defend and indemnify the County from all costs and expenses, including reasonable attorney's fees, in action or liability arising under the Public Records Act.

32.27 CONFLICT OF INTEREST

(a) No County employee whose position with the County enables such employee to influence the award of this Agreement or any competing contract, and no spouse or economic dependent of such employee, shall be employed in any capacity by the Contractor or have any other direct or indirect financial interest in this Agreement. No officer or employee of the Contractor who may financially benefit from the performance of work hereunder shall in any way participate in the County's Approval, or ongoing evaluation, of such work, or in any way attempt to unlawfully influence the County's Approval or ongoing evaluation of such work.

(b) Contractor shall comply with all conflict of interest laws, ordinances, and regulations now in effect or hereafter to be enacted during the Term of this Agreement. Contractor warrants that it is not now aware of any facts that create a conflict of interest. If the Contractor hereafter becomes aware of any facts that might reasonably be expected to create a conflict of interest, it shall immediately make full written disclosure of such facts to the County. Full written disclosure shall include, but is not limited to, identification of all persons implicated and a complete description of all relevant circumstances. Failure to comply with the provisions of this Section 32.27 (Conflict of Interest) shall be a material breach of this Agreement.

32.28 CONTRACTOR RESPONSIBILITY AND DEBARMENT

32.28.1 RESPONSIBLE CONTRACTOR

A responsible contractor is a contractor who has demonstrated the attribute of trustworthiness, as well as quality, fitness, capacity, and experience to satisfactorily perform the contract. It is the County's policy to conduct business only with responsible contractors.

32.28.2 CHAPTER 2.202 OF THE COUNTY CODE

Contractor is hereby notified that, in accordance with Chapter 2.202 of the County Code, if the County acquires information concerning the performance of the Contractor on this or other contracts which indicates that the Contractor is not responsible, the County may, in addition to other remedies provided in the Agreement, debar the Contractor from bidding or proposing on, or being awarded, and/or performing work on County contracts for a specified period of time, which generally will not exceed five (5) years but may exceed five (5) years or be permanent if warranted by the circumstances, and terminate any or all existing contracts the Contractor may have with the County.

32.28.3 NON-RESPONSIBLE CONTRACTOR

The County may debar a Contractor if the Board of Supervisors finds, in its discretion, that the Contractor has done any of the following: (a) violated a term of a contract with the County or a nonprofit corporation created by the County; (b) committed an act or omission which negatively reflects on the Contractor's quality, fitness, or capacity to perform a contract with the County, any other public entity, or a nonprofit corporation created by the County, or engaged in a pattern or practice which negatively reflects on same; (c) committed an act or offense which indicates a lack of business integrity or business honesty; or (d) made or submitted a false claim against the County or any other public entity.

32.28.4 CONTRACTOR HEARING BOARD

(a) If there is evidence that the Contractor may be subject to debarment, the Department will notify the Contractor in writing of the evidence which is the basis for the proposed debarment and will advise the Contractor of the scheduled date for a debarment hearing before the Contractor Hearing Board.

(b) The Contractor Hearing Board will conduct a hearing where evidence on the proposed debarment is presented. Contractor and/or the Contractor's representative shall be given an opportunity to submit evidence at that hearing. After the hearing, the Contractor Hearing Board shall prepare a tentative proposed decision, which shall contain a recommendation regarding whether the Contractor should be debarred, and, if so, the appropriate length of time of the debarment. Contractor and the Department shall be provided an opportunity to object to the tentative proposed decision prior to its presentation to the Board of Supervisors.

(c) After consideration of any objections, or if no objections are submitted, a record of the hearing, the proposed decision, and any other recommendation of the Contractor Hearing Board shall be presented to the Board of Supervisors. The Board of Supervisors shall have the right to modify, deny, or adopt the proposed decision and recommendation of the Contractor Hearing Board.

(d) If a Contractor has been debarred for a period longer than five (5) years, that Contractor may after the debarment has been in effect for at least five (5) years, submit a written request for review of the debarment determination to reduce the period of debarment or terminate the debarment. The County may, in its discretion, reduce the period of debarment or terminate the debarment if it finds that the Contractor has adequately demonstrated one or more of the following: (i) elimination of the grounds for which the debarment was imposed; (ii) a bona fide change in ownership or management; (iii) material evidence discovered after debarment was imposed; or (iv) any other reason that is in the best interests of the County.

(e) The Contractor Hearing Board will consider a request for review of a debarment determination only where (i) the Contractor has been debarred for a period longer than five (5) years; (ii) the debarment has been in effect for at least five (5) years; and (iii) the request is in writing, states one or more of the grounds for reduction of the debarment period or termination of the debarment, and includes supporting documentation. Upon receiving an appropriate request, the Contractor Hearing Board will provide notice of the hearing on the request. At the hearing, the Contractor Hearing Board shall conduct a hearing where evidence on the proposed reduction of debarment period or termination of debarment is presented. This hearing shall be conducted and the request for review decided by the Contractor Hearing Board pursuant to the same procedures as for a debarment hearing.

(f) The Contractor Hearing Board's proposed decision shall contain a recommendation on the request to reduce the period of debarment or terminate the debarment. The Contractor Hearing Board shall present its proposed decision and recommendation to the Board of Supervisors. The Board of Supervisors shall have the right to modify, deny, or adopt the proposed decision and recommendation of the Contractor Hearing Board.

32.28.5 SUBCONTRACTORS OF CONTRACTOR

These terms shall also apply to subcontractors of County contractors.

32.29 COUNTY'S QUALITY ASSURANCE PLAN

The County or its agent will evaluate the Contractor's performance under this Agreement on not less than an annual basis. Such evaluation will include assessing the Contractor's compliance with all Agreement terms and conditions and performance standards. Contractor deficiencies which the County determines are severe or continuing and that may place performance of the Agreement in jeopardy if not corrected will be reported to the Board of Supervisors.

The report will include improvement/corrective action measures taken by the County and the Contractor.

32.30 EMPLOYMENT ELIGIBILITY VERIFICATION

(a) Contractor warrants that it fully complies with all Federal and State statutes and regulations regarding the employment of aliens and others and that all its employees performing work under this Agreement meet the citizenship or alien status requirements set forth in Federal and State statutes and regulations. Contractor shall obtain, from all employees performing work hereunder, all verification and other documentation of employment eligibility status required by Federal and State statutes and regulations including, but not limited to, the Immigration Reform and Control Act of 1986, (P.L. 99-603), as they currently exist and as they may be hereafter amended. Contractor shall retain all such documentation for all covered employees for the period prescribed by law.

(b) Contractor shall indemnify, defend, and hold harmless, the County, and its agents, officers, and employees from employer sanctions and any other liability which may be assessed against the Contractor or the County or both in connection with any alleged violation of any Federal or State statutes or regulations pertaining to the eligibility for employment of any persons performing work under this Agreement.

32.31 COMPLIANCE WITH THE COUNTY'S JURY SERVICE PROGRAM

32.31.1 JURY SERVICE PROGRAM

This Agreement is subject to the provisions of the County's ordinance entitled Contractor Employee Jury Service ("**Jury Service Program**") as codified in Sections 2.203.010 through 2.203.090 of the Los Angeles County Code, a copy of which is attached as Exhibit T.2 (Jury Service Ordinance) and incorporated by reference into and made a part of this Agreement.

32.31.2 WRITTEN EMPLOYEE JURY SERVICE POLICY.

(a) Unless the Contractor has demonstrated to the County's satisfaction either that the Contractor is not a "Contractor" as defined under the Jury Service Program (Section 2.203.020 of the County Code) or that the Contractor qualifies for an exception to the Jury Service Program (Section 2.203.070 of the County Code), the Contractor shall have and adhere to a written policy that provides that its Employees shall receive from the Contractor, on an annual basis, no less than five (5) days of regular pay for actual jury service. The policy may provide that Employees deposit any fees received for such jury service with the Contractor or that the Contractor deduct from the Employee's regular pay the fees received for jury service.

(b) For purposes of this Section 32.31.2 (Written Employee Jury Service Policy) only, "**Contractor**" means a person, partnership, corporation or other entity which has a contract with the County or a subcontract with a County Contractor and has received or will receive an aggregate sum of Fifty Thousand Dollars ($50,000) or more in any twelve (12)-month period under one or more County contracts or subcontracts. "**Employee**" means any

California resident who is a full-time employee of the Contractor. "**Full-time**" means forty (40) hours or more worked per week, or a lesser number of hours if: (i) the lesser number is a recognized industry standard as determined by the County, or (ii) Contractor has a long-standing practice that defines the lesser number of hours as full-time. Full-time employees providing short-term, temporary services of ninety (90) days or less within a twelve (12)-month period are not considered full-time for purposes of the Jury Service Program. If the Contractor uses any subcontractor to perform services for the County under the Agreement, the subcontractor shall also be subject to the provisions of this Section 32.31.2(b) (Written Employee Jury Service Policy). The provisions of this Section 32.31.2(b) (Written Employee Jury Service Policy) shall be inserted into any such subcontract agreement and a copy of the Jury Service Program shall be attached to this Agreement.

(c) If the Contractor is not required to comply with the Jury Service Program when the Agreement commences, the Contractor shall have a continuing obligation to review the applicability of its "exception status" from the Jury Service Program, and the Contractor shall immediately notify the County if the Contractor at any time either comes within the Jury Service Program's definition of "Contractor" or if the Contractor no longer qualifies for an exception to the Jury Service Program. In either event, the Contractor shall immediately implement a written policy consistent with the Jury Service Program. The County may also require, at any time during the Agreement and at its sole discretion, that the Contractor demonstrate, to the County's satisfaction that the Contractor either continues to remain outside of the Jury Service Program's definition of "Contractor" and/or that the Contractor continues to qualify for an exception to the Program.

(d) Contractor's violation of this sub-paragraph of the Agreement may constitute a material breach of the Agreement. In the event of such material breach, County may, in its sole discretion, terminate the Agreement and/or bar the Contractor from the award of future County contracts for a period of time consistent with the seriousness of the breach.

32.32 CONSIDERATION OF HIRING COUNTY EMPLOYEES TARGETED FOR LAYOFF/OR RE-EMPLOYMENT LIST

Should the Contractor require additional or replacement personnel after the Effective Date of this Agreement to perform the services set forth herein, the Contractor shall give first consideration for such employment openings to qualified, permanent County employees who are targeted for layoff or qualified, former County employees who are on a re-employment list during the life of this Agreement.

32.33 CONSIDERATION OF HIRING GAIN/GROW PROGRAM PARTICIPANTS

(a) Should the Contractor require additional or replacement personnel after the Effective Date of this Agreement, the Contractor shall give consideration for any such

employment openings to participants in the County's Department of Public Social Services Greater Avenues for Independence ("**GAIN**") Program or General Relief Opportunity for Work ("**GROW**") Program who meet the Contractor's minimum qualifications for the open position. For this purpose, consideration shall mean that the Contractor will interview qualified candidates. The County will refer GAIN/GROW participants by job category to the Contractor.

(b) In the event that both laid-off County employees and GAIN/GROW participants are available for hiring, County employees shall be given first priority.

32.34 CONTRACTOR'S WARRANTY OF ADHERENCE TO COUNTY'S CHILD SUPPORT COMPLIANCE PROGRAM

(a) Contractor acknowledges that the County has established a goal of ensuring that all individuals who benefit financially from the County through contract are in compliance with their court-ordered child, family, and spousal support obligations in order to mitigate the economic burden otherwise imposed upon the County and its taxpayers.

(b) As required by the County's Child Support Compliance Program (County Code Chapter 2.200) and without limiting the Contractor's duty under this Agreement to comply with all applicable provisions of law, the Contractor warrants that it is now in compliance and shall during the Term of this Agreement maintain in compliance with employment and wage reporting requirements as required by the Federal Social Security Act (42 USC Section 653a) and California Unemployment Insurance Code Section 1088.5, and shall implement all lawfully served Wage and Earnings Withholding Orders or Child Support Services Department Notices of Wage and Earnings Assignment for Child, Family, or Spousal Support, pursuant to California Code of Civil Procedure Section 706.031 and California Family Code Section 5246(b).

32.35 SAFELY SURRENDERED BABY LAW

32.35.1 CONTRACTOR'S ACKNOWLEDGMENT OF COUNTY'S COMMITMENT TO THE SAFELY SURRENDERED BABY LAW

Contractor acknowledges that the County places a high priority on the implementation of the Safely Surrendered Baby Law. Contractor understands that it is the County's policy to encourage all County contractors to voluntarily post the County's "Safely Surrendered Baby Law" poster in a prominent position at the Contractor's place of business. Contractor will also encourage its subcontractors, if any, to post this poster in a prominent position in the subcontractor's place of business. The County's Department of Children and Family Services will supply the Contractor with the poster to be used. Information on how to receive the poster can be found on the Internet at www.babysafela.org.

32.35.2 NOTICE TO EMPLOYEES REGARDING THE SAFELY SURRENDERED BABY LAW

Contractor shall notify and provide to its employees, and shall require each subcontractor to notify and provide to its employees, a fact sheet regarding the

Safely Surrendered Baby Law, its implementation in Los Angeles County, and where and how to safely surrender a baby. The fact sheet is set forth in Exhibit T.1 (Safely Surrendered Baby Law) of this Contract and is also available on the Internet at www.babysafela.org for printing purposes.

32.36 FEDERAL EARNED INCOME CREDIT

Contractor shall notify its employees, and shall require each subcontractor to notify its employees, that they may be eligible for the Federal Earned Income Credit under the federal income tax laws. Such notice shall be provided in accordance with the requirements set forth in Internal Revenue Service Notice No. 1015 (attached as Exhibit T.3 (IRS Notice 1015)).

32.37 DEFAULTED PROPERTY TAX REDUCTION PROGRAM

32.37.1 CONTRACTOR'S WARRANTY OF COMPLIANCE WITH COUNTY'S DEFAULTED PROPERTY TAX REDUCTION PROGRAM

Contractor acknowledges that County has established a goal of ensuring that all individuals and businesses who benefit financially from County through contract are current in paying their property tax obligations (secured and unsecured roll) in order to mitigate the economic burden otherwise imposed upon County and its taxpayers.

Unless Contractor qualifies for an exemption or exclusion, Contractor warrants and certifies that to the best of its knowledge it is now in compliance, and during the Term of this Agreement will maintain compliance, with Los Angeles County Code Chapter 2.206.

32.37.2 TERMINATION FOR BREACH OF WARRANTY TO MAINTAIN COMPLIANCE WITH COUNTY'S DEFAULTED PROPERTY TAX REDUCTION PROGRAM

Failure of Contractor to maintain compliance with the requirements set forth in Section 32.37.1 (Contractor's Warranty of Compliance with County's Defaulted Property Tax Reduction Program) shall constitute default under this Agreement. Without limiting the rights and remedies available to County under any other provision of this Agreement, failure of Contractor to cure such default within ten (10) days of notice shall be grounds upon which County may terminate this Agreement and/or pursue debarment of Contractor pursuant to County Code Chapter 2.206.

32.38 RESTRICTIONS ON LOBBYING

32.38.1 FEDERAL FUNDS PROJECT

If any Federal funds are to be used to pay for any of Contractor's Services under this Agreement, Contractor shall fully comply with all certification and disclosure requirements prescribed by Section 319 of Public law 101-121 (31 U.S.C. Section 1352) and any implementing regulations, and shall ensure that each of its

subcontractors receiving funds provided under this Agreement also fully complies with all such certification and disclosure requirements.

32.38.2 LOBBYIST ORDINANCE

Contractor, and each County lobbyist or County lobbying firm as defined in County Code Section 2.160.010 retained by the Contractor, shall fully comply with the County's Lobbyist Ordinance, County Code Chapter 2.160. Failure on the part of the Contractor or any County lobbyist or County lobbying firm retained by the Contractor to fully comply with the County's Lobbyist Ordinance shall constitute a material breach of this Agreement, upon which the County may in its sole discretion, immediately terminate or suspend this Agreement at County's option, either for material breach under Section 29.2 (Termination for Material Breach) of this Agreement or for convenience under Section 29.6 (Termination for Convenience) of this Agreement.

32.39 STAFF PERFORMANCE WHILE UNDER INFLUENCE

Contractor shall use reasonable efforts to ensure that no employee of Contractor shall perform services hereunder while under the influence of any alcoholic beverage, medication, narcotic, or other substance, which might impair his/her physical or mental performance.

32.40 CONTRACTOR PERFORMANCE DURING CIVIL UNREST AND DISASTER

Contractor recognizes that County provides services essential to the residents of the communities it serves, and that these services are of particular importance at the time of a riot, insurrection, civil unrest, natural disaster, or similar event. Notwithstanding any other provision of this Agreement, including Section 32.1 (Force Majeure), full performance by Contractor during any riot, insurrection, civil unrest, natural disaster, or similar event is not excused if such performance remains physically possible without related danger to Contractor's or subcontractors' employees and suppliers. During any such event in which the health or safety of any of Contractor's staff members would be endangered by performing their services on-site, such staff members may perform any or all of their services remotely.

32.41 HEALTHE INTENT SERVICES

County may use Contractor's Healthe Intent Service. "**Healthe Intent Services**" means the Contractor's St. John Sepsis agent (CE-10300-PKG) and Healthe Intent: Chart Search (CE-10200).

County understands this Service is provided by Contractor at no fee and the Healthe Intent Service is not required to use the EHR System in accordance with the Agreement. Notwithstanding anything to the contrary in this Agreement, the Healthe Intent Service is (1) not subject to the limitation of liability in Section 24 (Limitation of Liability and Step Down Limitation of Liability Amount) of this Agreement; and instead is subject to the limitation of liability set forth in this Section 32.41 (Healthe Intent Services), (2) Contractor's indemnification obligations in the Agreement shall not apply to the Healthe Intent Services, (3) the Resolution Time Service Level and Response Time Service Level provided in the Agreement are not applicable as to Healthe Intent Services support, and (4) Contractor warrants only that the Healthe Intent

Services will perform in accordance with applicable laws and regulations and in a professional, workmanlike manner in accordance with the applicable Service description.

While the Healthe Intent Services have been developed and reviewed by Contractor based upon published data and the experiences of qualified professionals whenever possible, medical information changes rapidly and, therefore, some of the medical information utilized in the Healthe Intent Services may be out of date. County acknowledges and agrees that the Healthe Intent Services provided by Contractor are information management tools only many of which contemplate and require the involvement of professional medical personnel. In connection with its use of the Healthe Intent Service, County also acknowledges the Healthe Intent Service is not intended to be a substitute for the advice and professional judgment or other professional medical personnel and County will advise its personnel that use of the Healthe Service is not a substitute for, and does not affect the obligation of County's personnel to exercise, their own independent judgment in the delivery of medical care. County is responsible for credentialing all Users that use the Healthe Intent Services and determining the correct privileges for each User. County acknowledges and agrees that physicians and other professional medical personnel will be advised not to delay providing treatment, or make a treatment decision, based solely upon information provided through the Healthe Intent Services. County further acknowledges and agrees that Contractor has not represented its Healthe Intent Services as having the ability to diagnose disease, prescribe treatment, or perform any other tasks that constitute the practice of medicine or of other professional or academic disciplines.

As to the Healthe Intent Service only and not as to no other Service or element of this Agreement, NEITHER PARTY WILL BE LIABLE FOR LOST REVENUES OR INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL, EXEMPLARY, OR PUNITIVE DAMAGES, EVEN IF THE PARTY KNEW OR SHOULD HAVE KNOWN THAT SUCH DAMAGES WERE POSSIBLE AND EVEN IF DIRECT DAMAGES DO NOT SATISFY A REMEDY. Contractor's aggregate liability for all claims whatsoever arising solely from the Healthe Intent Service is One-Hundred Thousand Dollars ($100,000). This limitation of liability does not apply to breaches of the Business Associate Agreement.

THE HEALTHE INTENT SERVICES WARRANTY PROVIDED IN THIS SECTION IS IN LIEU OF, AND CONTRACTOR HEREBY EXPRESSLY DISCLAIMS, ALL OTHER WARRANTIES, BOTH EXPRESS AND IMPLIED. SPECIFICALLY, AND WITHOUT LIMITATION, CONTRACTOR DOES NOT WARRANT THAT THE HEALTHE INTENT SERVICES WILL BE ERROR-FREE OR UNINTERRUPTED, THAT ANY ALERTS OR OTHER INFORMATION PROVIDED THROUGH THE HEALTHE INTENT SERVICE HAVE THE ABILITY TO SAVE PATIENT LIVES, OR THAT ANY DEFECTS WILL BE CORRECTED. CONTENT IS DELIVERED ON AN AS-IS AND AS-AVAILABLE BASIS AND SUBJECT TO TIME DELAYS. THERE SHALL BE NO IMPLIED WARRANTIES OF ACCURACY, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT OF PROPRIETARY RIGHTS OR ANY OTHER WARRANTY AS MAY OTHERWISE BE APPLICABLE TO THE HEALTHE INTENT SERVICES.

Contractor may use the County Data in compliance with the provisions of Sections 19 (Confidentiality) and 20 (Security) of this Agreement and in a manner that is consistent with HIPAA and California state law (California Civil Code Section 56.10), in connection with Healthe Intent Services including performance of the Healthe Intent Services, analysis of the Healthe Intent Services, and improvements to the Healthe Intent Services. For purposes of this section, County Data shall mean all data that is collected, stored, or generated through the use of the Healthe Intent Services. Contractor is not responsible for County's actions required to

implement the County's security and privacy policies with respect to use by County and/or its Users of the Healthe Intent Services.

County will terminate unauthorized use of the Healthe Intent Services of which it is aware of and has validated. In an effort to assist Contractor in its efforts to secure the Healthe Intent Services, County will provide generalized information regarding an unauthorized access event to Contractor. For purposes of intellectual property protection, Healthe Intent Services shall be treated as Licensed Software under Sections 3.1.1 (Scope of License), 3.1.2 (License Restrictions) and Work Product under Section 18.2 (Ownership) of the Agreement.

Contractor and County will cooperate to implement the Healthe Intent Services and Contractor's efforts in that regard will be included in the Services.

[Signature Page Follows]

IN WITNESS WHEREOF, Contractor has executed this Agreement, or caused it to be duly executed and the County, by order of its Board has caused this Agreement to be executed on its behalf by the Chair of said Board and attested by the Executive Officer-Clerk of the Board thereof, the Effective Date.

Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) to the Electronic Health Records System and Services Agreement

Table of Contents

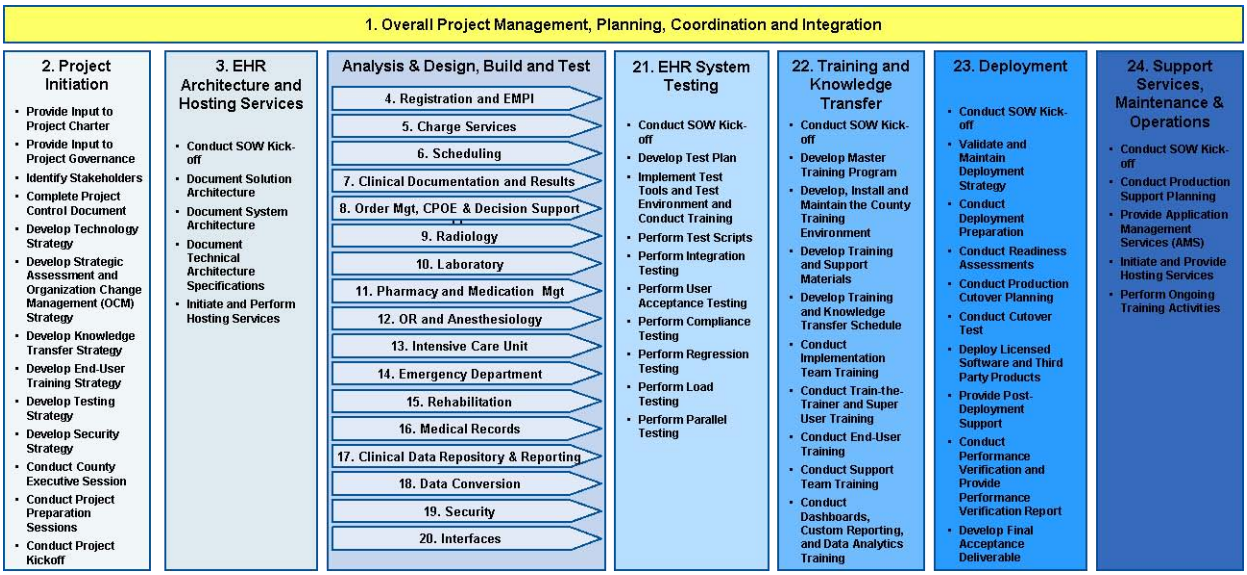
1. Introduction

This Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the all the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work). The completion of any phase in a period of time shorter or longer that that specified below shall not increase the Contract Sum.

This is Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW will provide the overall project management, planning, coordination and task integration framework which will be used to manage all the activities for the EHR System implementation.

3. SOW Summary

3.1 Overview

This SOW addresses all the Project administration and Project management activities to ensure that Contractor can deliver and manage the Services for the Project in accordance with the Project Control Document.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. As part of this SOW, Deliverables are created which are used in all SOWs.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) will begin upon the Effective Date of the Agreement. This SOW is scheduled to be completed at the conclusion of the Project upon the Acceptance by the County Project Director of the Deliverables in this Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for tasks and sub-tasks will be developed as part of Project Control Document.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of Deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Project Manager Responsibilities

Contractor will designate a Contractor Project Manager to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Project Manager's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the Project Work Plan which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates.

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Overall Project Management, Planning, Coordination and Integration SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Project Manager and County for the tasks and Deliverables set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Project Manager;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Project Manager any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Project Manager on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Project Manager to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Minimize tools for change to big changes - SOW change and change management are very different and need to be treated differently;

(8) Coordinate resolution of issues raised by the Contractor Project Manager pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(9) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(10) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(11) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule; and

(12) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Project Manager with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel, where feasible;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1 Conduct Governance Assessments	
Subtask 1.1 Conduct Governance Assessments	Deliverable 1.1 Governance Assessments
Task 2 Perform Project Administration	
Subtask 2.1 Coordinate Project Activities for All SOWs, Including "Hand-offs" Between SOWs	Deliverable 2.1 Coordination of Project Activities Between SOWs
Subtask 2.2 Develop Status Reports	Deliverable 2.2 Status Reports
Subtask 2.3 Conduct Status Meetings	Deliverable 2.3 Status Meeting Minutes
Task 3 Perform Project Management and Ongoing Updates of the Project Control Documents	
Subtask 3.1 Maintain Project Work Plan	Deliverable 3.1 Project Work Plan Management
Subtask 3.2 Perform Error Management	Deliverable 3.2 Error Management
Subtask 3.3 Perform Risk Management	Deliverable 3.3 Risk Management
Subtask 3.4 Manage Project Staffing and Resources	Deliverable 3.4 Staffing and Resources Management
Subtask 3.5 Perform Configuration and	Deliverable 3.5 Configuration and Technology

Technology Change Management	Change Management
Subtask 3.6 Perform Issue Management	Deliverable 3.6 Issue Management
Subtask 3.7 Perform Project Change Management	Deliverable 3.7 Project Change Management
Subtask 3.8 Perform Quality Management	Deliverable 3.8 Quality Management
Subtask 3.9 Perform Deliverables Management	Deliverable 3.9 Deliverables Management
Subtask 3.10 Develop Procedures for Status Meetings/Reports	Deliverable 3.10 Procedures for Status Meetings/Reports
Task 4 Conduct Communications Strategy Review	
Subtask 4.1 Conduct Communications Strategy Review	Deliverable 4.1 Communications Strategy Update
Task 5 Review Organizational Change Management Strategy	
Subtask 5.1 Conduct Organizational Change Management Strategy Review	Deliverable 5.1 Organizational Change Management Strategy Update
Task 6 Maintain Project Library on MethodM Online	
Subtask 6.1 Maintain Project Library	Deliverable 6.1 Project Library
Task 7 Conduct Project Close-out Activities	
Subtask 7.1 Develop Project Close-out Checklist	Deliverable 7.1 Project Close-out Checklist
Subtask 7.2 Conduct Project Close-out	Deliverable 7.2 Project Close-out

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings, and all MethodM events, sessions, and workshops) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverables for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Project Manager and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make all changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct Governance Assessments
Task Description
As defined by task 2 (Establish Project Governance) of Exhibit A.2 (Project Initiation Statement of Work), Project governance will enable effective decision-making within and throughout the Project. To ensure committee structures and decision making processes are efficient and effective, Contractor will conduct quarterly Project governance assessments and provide County with identification of risks and recommendations for improvement.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Employees
  ○ County Project Director; and
  ○ County Project Manager.

Subtasks/Deliverables	

Subtask 1.1 Conduct Governance Assessments
Contractor will:
• Conduct a quarterly review of Project governance that includes an assessment of efficiency and effectiveness of Project governance structures and decision making processes. The quarterly review will, at a minimum, include:
  ○ Identification of risks and issues related to Project governance processes; and
  ○ Proposals to mitigate risks, and to resolve governance issues, including recommended changes to the governance structure and decision making process (e.g., additional or modified decision making processes).
• Review the recommendations with the County Project Director and develop a plan of action for implementing changes, mitigating risk, and resolving issues.
• Assist County with meetings and briefings to implement any County-Approved actions with regard to Contractor's recommendations.
• Deploy resources necessary to:
  ○ Support the County Project governance processes; and
  ○ Address and resolve identified issues and risks to the County Project governance processes.
Contractor will develop a draft written report regarding risks and issues, and recommendations regarding risk mitigation, issue resolution, and governance improvements, and submit the draft written report to County for review and feedback.
Contractor will review and incorporate County feedback and proposed changes into the written report regarding risks and issues and submit a final version to County for Approval.
	Deliverable 1.1: Governance Assessments
	• Quarterly governance review.
	• Written report regarding risks and issues, and recommendations regarding risk mitigation, issue resolution, and governance improvements.
	• Governance review session.
	• Availability of Contractor resources to support implementing recommendations resulting from assessments.
	
	Acceptance Criteria
	• County Approved quarterly governance review.
	• Quarterly Governance review incorporates, and is consistent with, County-provided input.
	• Quarterly review addresses all elements described in subtask 1.1 (Conduct Governance Assessments).

Task 2 Perform Project Administration

Task Description

Contractor will manage ongoing Project activities and regularly track and report on Project status as described in the following sub-tasks.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager; and
  - Delivery Consultants.
- County Key Employees
  - County Project Director; and
  - County Workgroup leads.

Subtasks/Deliverable

Subtask 2.1 Coordinate Project Activities for All SOWs, Including "Hand-offs" Between SOWs

During the course of the Project, Contractor will:

- Track individual work streams as identified in Exhibit A.2 (Project Initiation Statement of Work), including monitoring dependencies among work streams outlined in the various SOWs.
- Ensure consistency of process and progress among work streams outlined in the various SOWs, and conduct coordination meetings by reviewing all data collection workbooks (also known as a "**DCW**"), and design decision matrices (also known as a "**DDM**"), identifying potential conflicts and issues, and facilitating meetings with County to ensure consistency.
- Monitor all issues and risks that may impact the Project Schedule using the Issue Management Plan and Risk Management Plan developed in Exhibit A.2 (Project Initiation Statement of Work) in accordance with Section 30 (Multi-Vendor Environment) of the Agreement.
- Monitor the progress toward the completion of Milestones, Key Milestones, Deliverables, and Key Deliverables.
- Identify any issues, risks or other barriers that are or may prevent completion of

Deliverable 2.1 Coordination of Project Activities Between SOWs

- Updates to Issue and Risk Logs.
- Input to Status Reports and Status Meetings.
- Documented dependent and cross-work streams impacts and issues.

Acceptance Criteria

- Accurate reflection of dependencies, issues, and risks in the Project Control Documents.
- Resolution of all pending issues that impact completion of Milestones, Key Milestones Deliverables, and Key Deliverables.
- Project activities and meetings address all elements described in subtask 2.1 (Coordinate Project Activities for All SOWs, Including "Hand-offs" Between SOWs), and have been Approved by County.

Milestones, Key Milestones, Deliverables, or Key Deliverables, or that may otherwise jeopardize Project advancement. • Monitor progress in completing DCWs, DDMs, and other design and risk documents across all work streams. • Identify problems with Project activities that impact coordination across the SOWs (e.g., time management, resource conflicts, complexity, data quality, training issues), and provide County with recommendation for addressing them. • Resolve or facilitate the resolution of pending issues that remain for completion of Milestones, Key Milestones, Deliverables, and Key Deliverables. • Identify and communicate with Project team members who need to be notified in advance of upcoming activities, transitions, and hand-offs. • Identify and document impacts and issues among and between dependent and cross-work streams. • Conduct and facilitate meetings among and between dependent and cross-work stream teams to facilitate hands-offs and to address identified issues and impacts. • Continually verify that all activities are conducted in accordance with the Project Work Plan. • Maintain adherence to the Project Control Document and identify and resolve gaps between actual performance and the Services and the Project Control Document along with reconciliation mitigation recommendations.	
Subtask 2.2 Develop Status Reports Contractor will develop Status Reports in accordance with Section 10.2 (Reports and Meetings) of the Agreement and the procedures for Status Reports developed in subtask 4.14 (Develop Procedures for Status Meetings/Reporting) of Exhibit A.2 (Project	**Deliverable 2.2 Status Reports** • Status Reports as defined in the Agreement and the procedures for Status Reports. • Updated documents and dashboard on MethodM Online.

Initiation). The Status Reports will include, at a minimum, the following: • Period covered by the report; • Tasks, subtasks, Deliverables, goods, and Services scheduled for the reporting period which were completed; • Tasks, subtasks, Deliverables, goods, and Services scheduled for the reporting period which were not completed; • Tasks, subtasks, Deliverables, goods, and Services not scheduled for, but completed in, the reporting period; • Tasks, subtasks, Deliverables, goods, and Services scheduled to be completed in the next reporting period; • Summary of Project status and progress as of reporting date, including the progress toward completing Milestones, Key Milestones Deliverables, and Key Deliverables, with actual status with respect to the Project Schedule; • Reported progress on Key Deliverables; • Project issues and risks identified through the quality assurance and risk management process and status of identified issues and risks; • Issues and risks to be resolved; • Issues and risks resolved; • Updates to the Project Control Document (and associated documents); • Critical path analysis; • Status of any changes as documented in the Project Change Management Plan; • Project Schedule; and • Any other information that County or Contractor may, from time-to-time, reasonably request in writing, or that Contractor or County, as the case may be, may deem appropriate. In addition to the Status Reports, Contractor will update MethodM Online dashboards to reflect	**Acceptance Criteria:** • Status Reports address all elements described in subtask 2.2 (Develop Status Reports), and have been Approved by County. • Dashboard on MethodM Online has been updated as described in subtask 2.2 (Develop Status Reports), and has been Approved by County.

current Project status.	
Subtask 2.3 Conduct Status Meetings Contractor will conduct Status Meetings in accordance with Section 10.2 (Reports and Meetings) of the Agreement and the procedures developed in subtask 4.12 (Develop Procedures for Status Meetings/Reports) of Exhibit A. 2(Project Initiation). In preparation for each Status Meeting, Contractor will develop and distribute a Status Meeting agenda. In preparation for each Status Meeting, Contractor will prepare a Status Report as described in Subtask 2.2 (Develop Status Reports). During the Status Meetings, Contractor will: • Keep an attendance log; • Document meeting minutes including, at a minimum, decisions made during the meeting and outcomes for each agenda item; • Document issues and risks, including proposed resolutions and mitigations; and • Identify and track action items with, at minimum, the following information: o Action item description; o Owner; o Due date; and o Actual date of completion. Following the Status Meetings, Contractor will circulate Status Meeting minutes for County review and Approval in accordance with the procedures for Status Meetings developed in subtask 4.12 (Develop Procedures for Status Meetings/Reports) of Exhibit A.2 (Project Initiation).	**Deliverable 2.3 Status Meeting Minutes** • Status Meeting agenda. • Status Meeting report. • Status Meeting minutes, including attendance log, issues and risks, and action items. • Updated documents and dashboard on MethodM Online. **Acceptance Criteria:** • The Status Meeting report addresses all elements described in subtask 2.3 (Conduct Status Meetings), and has been Approved by County. • Status Meeting minutes address all elements described in subtask 2.3 (Conduct Status Meetings) and have been Approved by County.

Task 3 Perform Project Management and Ongoing Update of the Project Control Documents
Task Description
During the Project, Contractor will deliver and manage the Services for the Project in accordance with the Project Control Document. In addition, Contractor will maintain and update the Project Control

<table>
<tr><td colspan="2">Document (and associated documents) on a timely, regular, and ongoing basis.</td></tr>
<tr><td colspan="2">Personnel Requirements</td></tr>
<tr><td colspan="2">• Contractor Key Employees
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager; and
  ○ County Workgroup leads.</td></tr>
<tr><td colspan="2">Subtasks/Deliverables</td></tr>
<tr><td>Subtask 3.1 Maintain Project Work Plan
Contractor will maintain a Project Work Plan (also known as a “PWP”) on an ongoing basis and update the PWP at a minimum on a bi-weekly basis.
During Status Meetings, Contractor will provide County with an overview of the updates and changes to the PWP, including a description of the following:
• Impact of changes on the overall Project Schedule and critical path of the impacted work stream;
• Impact on resources; and
• Dependencies and impact on related tasks.
Contractor will review and incorporate County feedback and proposed changes into the PWP, and submit updates to the PWP to County for Approval.
Contractor will also:
• Ensure changes are reflected on the MethodM Online dashboard;
• Maintain baseline and all revisions to the PWP in the Project Library; and
• Notify all impacted Project team members of changes and updates.</td><td>Deliverable 3.1 Project Work Plan Management
• Updates to the PWP.
• Updated documents and dashboard on MethodM Online.

Acceptance Criteria
• Updates to PWP are complete and accurate, and are consistent with, County-provided input.
• Updates and changes to the PWP have been Approved by County.</td></tr>
<tr><td>Subtask 3.2 Perform Error Management
Contractor will manage the Error management process in accordance with the Error Management Plan (also known as an “EMP”).
Contractor will manage and report on all Errors and their resolution according to the EMP.</td><td>Deliverable 3.2 Error Management Plan Updates
• Updates to the EMP.
• Updated documents and dashboard on MethodM Online.</td></tr>
</table>

Contractor will continuously update the EMP and: • Maintain baseline and all revisions to the EMP in the Project Library; • Periodically assess the processes documented in the EMP and provide County with recommendations for increasing the efficiency and effectiveness of the Error management process; • Review recommendations with County and solicit County feedback; and • Notify all impacted Project team members of the changes. Contractor will review and incorporate County feedback and proposed changes into the EMP and submit the updated version to County for Approval.	**Acceptance Criteria** • Updates to EMP incorporate, and are consistent with, County-provided input. • Updates and changes to the EMP have been Approved by County.

Subtask 3.3 Perform Risk Management
Contractor will manage the Project risks in accordance with the Risk Management Plan.
Contractor will manage and report on all risks and their mitigation, management, or resolution according to the Risk Management Plan.
Contractor will:
• Maintain the risk log on an ongoing basis.
• Provide County with an aggregate view of all identified risks on a weekly basis or more frequently as required, including:
  ○ Risk description;
  ○ Risk type (e.g., organizational, software, Go-Live, non-information technology, testing).
  ○ Risk severity;
  ○ Impact of the risk;
  ○ Risk probability; and
  ○ Recommended risk mitigation.
• Monitor risk status and progress on risk mitigation.
• On an ongoing basis, and as further requested by County, assess the processes
	Deliverable 3.3 Risk Management
	• Ongoing risk management.
	• Recommendations for increasing efficiency and effectiveness of the risk management process.
	• Updates to the Risk Management Plan.
	• Updated documents on MethodM Online.
	
	Acceptance Criteria
	• Ongoing, aggregate review of risks address all elements described in subtask 3.3 (Perform Risk Management).
	• Updates and changes to the Risk Management Plan have been Approved by County.

documented in the Risk Management Plan. • Provide County with recommendations for increasing efficiency and effectiveness of the risk management process. • Update the Risk Management Plan to include all recommendations Approved by County and inform all impacted Project team members of the change. • Maintain baseline and all revisions to the Risk Management Plan in the Project Library.	

Subtask 3.4 Manage Project Staffing and Resources
Contractor will monitor Project staffing and resources in accordance with the Project Staffing and Resource Management Plan and manage any Contractor Personnel changes in accordance with the Agreement.
Contractor will:
• Update the Project Staffing and Resource Management Plan upon:
  ○ County Approved changes to Contractor Key Employees in accordance with the Agreement;
  ○ Changes to County key staff (e.g., Project Manager, Workgroup Leads);
  ○ County Approved changes to the number of Contractor resources employed or required;
  ○ County Approved changes to Contractor or County roles and responsibilities; and
  ○ Changes in Contractor and County resources or staff, other than Contractor Key Employees, as needed.
• Inform all impacted Project team members of the change.
• Provide to County a description of other resources such as conference rooms, training rooms, connectivity, calendars, etc.
• Maintain baseline and all revisions to the Project Staffing and Resource Management
	Deliverable 3.4 Staffing and Resources Management
	• Ongoing staffing and resource management.
	• Updates to Project Staffing and Resource Management Plan.
	• Updated documents on MethodM Online.
	
	Acceptance Criteria
	• Updates and changes to the Project Staffing and Resource Management Plan have been Approved by County.

Plan in the Project Library.	
Subtask 3.5 Perform Configuration and Technology Change Management Contractor will manage and report on all configuration changes according to the Configuration and Technology Change Management Plan. Contractor will: • Assess the processes documented in the Configuration and Technology Change Management Plan as requested by County. • Provide County with recommendations for increasing the efficiency and effectiveness of the configuration and technology change management process. • Review and incorporate County feedback and proposed changes into the Configuration and Technology Change Management Plan. • Submit the updated version of the Configuration and Technology Change Management Plan to County for Approval. • Inform all impacted Project team members of County Approved changes to the Configuration and Technology Change Management Plan. • Maintain baseline and all revisions to the Configuration and Technology Change Management Plan in the Project Library.	**Deliverable 3.5 Configuration and Technology Change Management** • Ongoing configuration and technology change management. • Updates to the Configuration and Technology Change Management Plan. **Acceptance Criteria** • Changes to the Configuration and Technology Change Management Plan incorporate, and are consistent with, County-provided input. • Updates and changes to the Configuration and Technology Change Management Plan have been Approved by County.
Subtask 3.6 Perform Issue Management Contractor will manage the Project issues in accordance with the Issue Management Plan. Contractor will manage and report on all Project issues according to the Issue Management Plan. Contractor will: • Maintain the issue log on an ongoing basis. • Provide the County with an aggregate view of all issues on a weekly basis or more frequently as required and provide: o Issue identifier; o Issue description; o Issue type (e.g., organizational, software,	**Deliverable 3.6 Issue Management** • Ongoing maintenance and updates to issues log. • Maintain dashboard and documents in MethodM Online. • Update to Issue Management Plan. **Acceptance Criteria** • Aggregate report on issues addresses all elements described in subtask 3.6 (Perform Issue Management). • Updates to the Issue Management Plan incorporate, and are consistent with, County-

Go-Live, non-information technology, testing); o Severity of the issue; o Impact of the issue; o Estimated time to resolution; o Issue resolution owner; and o Recommendations for issue resolution. • Provide written alert reports, as set forth in Section 10.2.3 (Alert Reports) of the Agreement. • Periodically assess the processes documented in the Issue Management Plan, and if applicable, each issue's status in the escalation process. • Provide County with recommendations for increasing the efficiency and effectiveness of the issue management process. • Update the Issue Management Plan to include all recommendations Approved by County and inform all impacted Project team members of the change.	provided input. • Updates and changes to the Issue Management Plan have been Approved by County.
Subtask 3.7 Perform Project Change Management Contractor will manage all Project changes (i.e., activities that do not require an Amendment to the Agreement, nor affect the Contract Sum or timing of Productive Use at any Cluster) such that County is fully aware of and Approves such Project changes and all such Approved Project changes are documented. It is critical for the Parties to understand that a Project change will not result in any change to the Agreement, the Contract Sum, or the timing of Productive Use at any Cluster. Contractor will assist County in moving Project changes through the Project governance processes, documenting Project changes as required. Contractor will continuously update the Project Change Management Plan and: • Define, implement, and manage changes according to the Project Change	**Deliverable 3.7 Project Change Management** • Updates to Project Change Management Plan. • Maintain documents in MethodM Online. **Acceptance Criteria** • Updates to the Project Change Management Plan incorporate, and are consistent with, County feedback. • Updates and changes to the Project Change Management Plan have been Approved by County.

Management Plan; • Periodically assess the processes documented in the Project Change Management Plan; • Provide County with recommendations for increasing the efficiency and effectiveness of the Project Change Management process; • Review and incorporate County feedback and proposed changes into the Project Change Management Plan; • Submit the updated version to County for Approval; • Inform all impacted Project team members of the change; and • Maintain baseline and all revisions to the Project Change Management Plan in the Project Library.	
Subtask 3.8 Perform Quality Management Contractor will manage the quality management process in accordance with the Quality Management Plan. Contractor will: • Document quality control criteria and metrics; • Identify and document issues related to quality; • Move quality issues through the resolution process; • Track and monitor the quality of each Deliverable; and • Identify and document deviations from the documented baseline. Contractor will continuously update the Quality Management Plan and: • Inform all impacted Project team members of the change; • Maintain baseline and all revisions to the Quality Management Plan in the Project Library; • Periodically assess the processes documented in the Quality Management	**Deliverable 3.8 Quality Management** • Updates to Quality Management Plan. • Resolution of quality issues. • Maintain documents on MethodM Online. **Acceptance Criteria** • Quality issues resolved to the extent that they do not impact schedule or functionality. • Updates to the Quality Management Plan incorporate, and are consistent with, County-provided input. • Updates and changes to the Quality Management Plan have been Approved by County.

Plan; • Provide County with recommendations for increasing the efficiency and effectiveness of the quality management process; • Review recommendations and incorporate County feedback and proposed changes into the Quality Management Plan; and • Submit an updated version of the Quality Management Plan to County for Approval.	
Subtask 3.9 Perform Deliverables Management Contractor will manage the Deliverables in accordance with the Deliverables Management Plan. Contractor will: • Complete a DED for each Deliverable. • Provide each Deliverable with a completed DED to County. • Review County feedback on the Deliverable. • Monitor and ensure the quality of the Deliverables. • Identify and provide explanations for any deviations of each Deliverable from the DED. • Update Deliverables and DEDs to address County feedback. • Continuously update the Deliverables Management Plan. • Inform all impacted Project team members of any changes. • Maintain baseline and all changes to the Deliverables Management Plan in the Project Library. • Assess the processes documented in the Deliverables Management Plan as requested by County. • Provide County with recommendations for increasing the efficiency and effectiveness of the Deliverables management process. • Review recommendations with County and incorporate County-Approved changes into the Deliverables Management Plan. • Submit updated version of the Deliverables	**Deliverable 3.9 Deliverables Management** • Recommendations for increasing the efficiency and effectiveness of the Deliverables management process. • Updates to Deliverables Management Plan. • Completed DED for each Deliverable. **Acceptance Criteria** • Each Deliverable and each DED incorporates, and is consistent with, County-provided input. • Each DED has been Approved by County. • Updates and changes to the Deliverables Management Plan incorporate, and are consistent with, County-provided input. • Updates and changes to the Deliverables Management Plan have been Approved by County.

Management Plan to County for Approval.	
Subtask 3.10 Develop Procedures for Status Meetings/Reports Contractor will periodically assess the processes documented in the procedures for Status Meetings and Status Reports developed in subtask 4.12 (Develop Procedures for Status Meetings/Reporting) of Exhibit A.2 (Project Initiation) ("Procedures for Status Meetings/Reports") and provide County with recommendations for improvement. As requested by County, Contractor will: • Update the Procedures for Status Meetings/Reports in accordance with County feedback. • Inform all impacted Project team members of any County-Approved changes to the Procedures for Status Meetings/Reports. • Maintain baseline and all revisions to the Procedures for Status Meetings/Reports in the Project Library.	**Deliverable 3.10 Updated Procedures for Status Meetings/Reporting** • Updates to Procedures for Status Meetings/Reports. • Recommendations for improvement of the Procedures for Status Meetings/Reports. **Acceptance Criteria** • Updates and changes to the Procedures for Status Meetings/Reports incorporate, and are consistent with, County feedback. • Updates and changes to the Procedures for Status Meetings/Reports have been Approved by County.

Task 4 Conduct Communications Strategy Review	
Task Description	
During the Project, County will implement a Project Communications Strategy. Contractor will conduct a quarterly assessment of the effectiveness of the Project-related communication and provide County with recommendations.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager; and
  ○ County Change Management and Education Director.	

Subtasks/Deliverables	
Subtask 4.1 Conduct Communications Strategy Review County will develop and implement a Project Communications Strategy based at least in part	**Deliverable 4.1 Communications Strategy Update** • Review of Project Communications Strategy developed following the Contractor-led

on the advice and recommendations provided in Contractor-led Leading Strategic Change Sessions and its event-based follow ups. Contractor will review the initial Project Communications Strategy and provide advice and recommendations. Contractor will conduct a quarterly assessment of the Project Communications Strategy and its implementation and outcomes that, at a minimum, includes: • Assessment of the effectiveness of the Project Communications Strategy and County activities related to that strategy. • Identification of issues related to communications. • Recommendations for communications approaches and activities to enhance the effectiveness of communications and enhance the likelihood of overall Project success. • Recommendations changes to the overall Project Communications Strategy. • Development of communication materials, presentations, and content for County use. • Facilitation of a review session of the quarterly Project Communications Strategy assessment with County Project team.	Leading Strategic Change Session. • Quarterly Project Communications Strategy review. • Project Communications Strategy review session. • Recommendations for improvement of County Project Communications Strategy. • Communications materials, presentations, and content for County's use. **Acceptance Criteria** • Quarterly Project Communications Strategy review addresses all elements described in subtask 4.1 (Conduct Communications Strategy Review). • Quarterly Project Communications Strategy review has been Approved by County.

Task 5 Review Organizational Change Management Strategy
Task Description
During the Project, County will implement the Organizational Change Management Strategy ("**OCM Strategy**"). Contractor will conduct a quarterly assessment of the effectiveness of the Project-related OCM and provide County with recommendations.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Clinical Strategist; and
  ○ Training Lead.
• County Key Employees
  ○ County Project Director;

- County Project Manager;
- Physician Champions; and
- Change Management and Education Director.

Subtasks/Deliverables

Subtask 5.1 Conduct Organizational Change Management Strategy Review	**Deliverable 4.1 Organizational Change Management Strategy Update**
County will develop and implement an OCM Strategy based at least in part in the advice and recommendations provided in the Contractor-led Leading Strategic Change Sessions and its event-based follow ups. Contractor will review the initial OCM Strategy and provide advice and recommendations. Contractor will conduct a quarterly assessment of County's OCM Strategy and its implementation and outcomes that, at a minimum, includes: • Assessment of the effectiveness of the OCM Strategy and County activities related to that strategy. • Identification of issues related to organizational change management. • Recommendations for approaches and activities to enhance the effectiveness of organizational change and enhance the likelihood of overall Project success. • Recommendations for potential changes to the OCM Strategy. • Facilitation of a review session of the quarterly OCM Strategy assessment with County Project team.	• Review of the initial OCM Strategy developed following the Contractor-led Leading Strategic Change Session. • Quarterly OCM Strategy review. • OCM Strategy review session. • Recommendations for improvement of County's OCM Strategy. **Acceptance Criteria** • Quarterly assessment of County's OCM Strategy assessment addresses all elements described in subtask 5.1 (Conduct Organizational Change Management Strategy Review). • Quarterly OCM Strategy review has been Approved by County.

Task 6 Maintain Project Library on MethodM Online

Task Description

During the Project, documents and artifacts developed and collected as part of the Project activities will be managed, stored, and archived. Contractor will maintain Project documents and artifacts in a Project library on MethodM Online ("**Project Library**").

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager; and

○ Delivery Consultants. • County Key Employees ○ County Project Director; ○ County Project Manager; and ○ County Workgroup leads.	
Subtasks/Deliverables	
Subtask 6.1 Maintain Project Library Contractor will maintain Project documents and artifacts in a Project library on MethodM Online. Contractor will develop guidelines for managing Project documents in the Project Library, including: • Folder structure; • Naming convention; • Document templates for specialized purposes (e.g., risk log, issue log, cross-stream communication); • Document standard/format; • Document check in/check-out rules; • User access and privileges; • Document ownership; and • Relationship and governance between County and Contractor Project Library. Throughout Project, Contractor will: • Maintain the Project Library; • Update document management guidelines; • Manage user access roles and privileges; • Coordinate the use of document management systems between County and Contractor; and • Develop quick-start guides and other training materials for new County personnel. Upon Project completion, Contractor will archive and deliver an offline copy of the Project Library to County in data formats specified and agreed upon by County.	**Deliverable 6.1 Project Library** • Guidelines to Project Library. • Ongoing management of Project Library. • Quick start guides and other training materials. • Offline copy of the Project Library. **Acceptance Criteria** • Guidelines for managing Project documents and artifacts in the Project Library address all elements described in subtask 6.1 (Maintain Project Library). • Guidelines for the Project Library have been Approved by County.

Task 7 Conduct Project Close-out Activities	
Task Description	
Contractor will be responsible for Project close-out activities. The purpose of these activities is to resolve any outstanding Project issues, obtain formal agreement from the Project governance processes to officially close out the Project, ensure that there is an official hand over of the EHR System from the Project team to the maintenance and operations team, and conduct a thorough review of the Project.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Delivery Consultants;
  ○ Clinical Strategist; and
  ○ Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Technical lead; and
  ○ County Education Director.	

Subtasks/ Deliverables	
Subtask 7.1 Develop Project Close-out Checklist Contractor will develop a Deployment and Project Close-out Checklist in accordance with subtask 3.6 (Develop Deployment and Project Close-out Checklist) in Exhibit A.23 (Deployment). Contractor will review the Deployment and Project Close-out Checklist with County. Contractor will incorporate County feedback and proposed changes into the Deployment and Project Close-out Checklist and submit a final version to County for Approval.	**Deliverable 7.1 Project Closeout Checklist** • Deployment and Project Close-out Checklist. **Acceptance Criteria:** • Updated Deployment and Project close-out checklist has been Approved by County.
Subtask 7.2 Conduct Project Close-out During the Project close-out, Contractor will: • Conduct all of the activities defined in the Deployment and Project Close-Out Checklist and tasks 10 (Conduct Performance Verification and Provide Performance Verification Report) and 11 (Develop Final Acceptance Deliverable) of Exhibit A.23 (Deployment); • Review all aspects of Project close-out with	**Deliverable 7.2 Project Close-out** • Project close-out activities as identified in the Deployment and Project Close-out Checklist. **Acceptance Criteria:** • County-Approved Project close-out activities.

County; and • Address all outstanding issues and activities.

Exhibit A.2 (Project Initiation Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

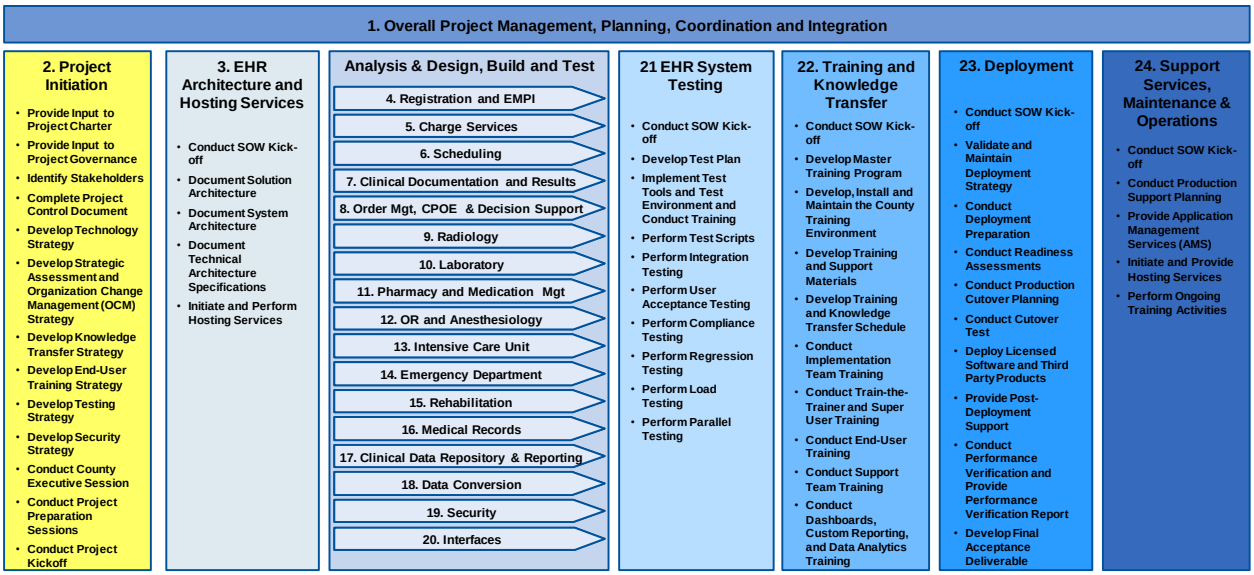
1. Introduction

This Exhibit A.2 (Project Initiation Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.2 (Project Initiation Statement of Work). The completion of any phase in a period of time shorter or longer that that specified below shall not increase the Contract Sum.

This is Exhibit A.2 (Project Initiation Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW will provide, among other elements, an overall Project management framework, and describe the nature of the Services, expected outcomes, governance processes, and tasks.

3. SOW Summary

3.1. Overview

This SOW addresses all initiation activities for the Project. The purpose of Project initiation is to begin to define the overall parameters of the Project and establish the appropriate Project management and quality environment required to complete the Project. This includes the development of the Project governance structure, the development of a Project charter as well as all other planning documents and strategies that will be used, updated, and maintained throughout the course of the Project.

3.2. SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the foregoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3. Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.

3.4. Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – The Project timeline is too short to hide difficult messages. Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5. Schedule

The commencement date for Exhibit A.2 (Project Initiation Statement of Work) will begin upon the Effective Date of the Agreement. Notwithstanding the foregoing, Contractor is required to provide several Deliverables in this SOW prior to submission of the Agreement to the Board for Approval. This SOW is scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.2 (Project Initiation Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table, will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1. Contractor Project Manager Responsibilities

Contractor Project Manager will be designated as the individual for this SOW to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Project Manager's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates.

Contractor will perform these activities throughout the provision of the Services.

4.2. Specific County Tasks

4.2.1. County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Project Initiation SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Project Manager and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Project Manager;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Project Manager any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Deliver Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Project Manager to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Project Manager pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project Status Meetings with Contractor Project team members, and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Project Manager with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2. Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities;

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1: Provide Input to Project Charter	
Subtask 1.1 Provide Input to Project Charter	Deliverable 1.1 Input for Project Charter (Key Deliverable)
Task 2: Provide Input to Project Governance	
Subtask 2.1 Provide Input to Project Governance Structure	Deliverable 2.1 Input to Project Governance Structure (Key Deliverable)
Subtask 2.2 Provide Input to Project Governance Processes	Deliverable 2.2 Input to Project Governance Processes (Key Deliverable)
Task 3: Identify Stakeholders	
Subtask 3.1 Identify Stakeholders	Deliverable 3.1 Stakeholder Analysis (Key Deliverable)
Task 4: Complete Project Control Document	
Subtask 4.1 Develop Project Control Document Framework	Deliverable 4.1 Project Control Document Framework (Key Deliverable)
Subtask 4.2 Develop Project Work Plan	Deliverable 4.2 Project Work Plan (Key Deliverable)
Subtask 4.3 Develop Error Management Plan	Deliverable 4.3 Error Management Plan (Key Deliverable)
Subtask 4.4 Develop Project Communications Strategy	Deliverable 4.4 Project Communications Strategy (Key Deliverable)
Subtask 4.5 Develop Risk Management Plan	Deliverable 4.5 Risk Management Plan (Key Deliverable)
Subtask 4.6 Develop Project Staffing and Resource Management Plan	Deliverable 4.6 Project Staffing and Resource Management Plan (Key Deliverable)

Task/Subtask Name	Deliverables
Subtask 4.7 Develop Configuration and Technology Change Management Plan	Deliverable 4.7 Configuration and Technology Change Management Plan (Key Deliverable)
Subtask 4.8 Develop Issue Management Plan	Deliverable 4.8 Issue Management Plan (Key Deliverable)
Subtask 4.9 Develop Project Change Management Plan	Deliverable 4.9 Project Change Management Plan (Key Deliverable)
Subtask 4.10 Develop Quality Management Plan	Deliverable 4.10 Quality Management Plan (Key Deliverable)
Subtask 4.11 Develop Deliverables Management Plan	Deliverable 4.11 Deliverables Management Plan (Key Deliverable)
Subtask 4.12: Develop Procedures for Status Meetings/Reporting	Deliverable 4.12 Procedures for Status Meetings/Reporting (Key Deliverable)
Subtask 4.13: Develop Project Control Document	Deliverable 4.13 Project Control Document (Key Deliverable)
Task 5: Develop Technology Strategy	
Subtask 5.1 Conduct Technical Assessment	Deliverable 5.1. Technical Assessment (Key Deliverable)
Subtask 5.2 Develop Technology Strategy	Deliverable 5.2 Technology Strategy (Key Deliverable)
Task 6: Develop Strategic Assessment and Organization Change Management Strategy	
Subtask 6.1 Conduct Strategic Assessment	Deliverable 6.1 Strategic Assessment (Key Deliverable)
Subtask 6.2: Develop Organizational Change Management Strategy	Deliverable 6.2 Organizational Change Management Strategy (Key Deliverable)
Task 7: Develop Knowledge Transfer Strategy	
Subtask 7.1 Develop Knowledge Transfer Strategy	Deliverable 7.1 Knowledge Transfer Strategy (Key Deliverable)
Task 8: Develop End-User Training Strategy	
Subtask 8.1 Develop End-User Training Strategy	Deliverable 8.1 End User Training Strategy (Key Deliverable)
Task 9: Develop Testing Strategy	
Subtask 9.1 Develop Testing Strategy	Deliverable 9.1 Testing Strategy (Key Deliverable)
Task 10: Develop Security Strategy	
Subtask 10.1 Develop Security Strategy	Deliverable 10.1 Security Strategy (Key Deliverable)
Task 11: Conduct County Executive Session	

Task/Subtask Name	Deliverables
Subtask 11.1 Conduct County Executive Session	Deliverable 11.1 County Executive Session (Key Deliverable)
Task 12: Conduct Project Preparation Sessions	
Subtask 12.1 Conduct Project Management Workshop	Deliverable 12.1 Proficiency Assessment (Key Deliverable)
Subtask 12.2 Conduct Project Team Workshop	Deliverable 12.2 Project Team Workshop (Key Deliverable)
Subtask 12.3 Conduct PC Basics Course	Deliverable 12.3 PC Basics Course (Key Deliverable)
Subtask 12.4 Conduct Solution Build and Maintain Course	Deliverable 12.4 Solution Build and Maintain Course (Key Deliverable)
Subtask 12.5 Conduct Solution and Tools Introduction Workshop	Deliverable 12.5 Solution and Tools Introduction Workshop (Key Deliverable)
Subtask 12.6 Conduct Licensed Software and Third-Party Products Fundamentals Course	Deliverable 12.6 Licensed Software and Third-Party Products Fundamentals Course (Key Deliverable)
Subtask 12.7 Conduct Clinical and Business Process Analysis Training	Deliverable 12.7 Clinical and Business Process Analysis Training (Key Deliverable)
Subtask 12.8 Conduct IT Analyst Prep Sessions	Deliverable 12.8 IT Analyst Prep Sessions (Key Deliverable)
Subtask 12.9 Conduct Physician and Nursing (Clinician) Sessions	Deliverable 12.9 Physician and Nursing (Clinician) Sessions (Key Deliverable)
Subtask 12.10 Conduct Leading Strategic Change Workshop	Deliverable 12.10 Leading Strategic Change Workshop (Key Deliverable)
Task 13: Conduct Project Kickoff	
Subtask 13.1 Conduct Project Kickoff	Deliverable 13.1 Project Kickoff (Key Deliverable)

5.1. Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project Deliverable's DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Project Manager and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2. Tasks

Contractor shall be responsible for performing the following as it relates to the Services to be provided under this SOW.

Task 1 Develop Project Charter
Task Description
Contractor will support County in developing a Project charter.
Personnel Requirements

• Contractor Key Resources
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Resources
  ○ County Project Director; and
  ○ County Project Manager.

Task 1 Develop Project Charter	
Subtasks/Deliverables	
Subtask 1.1 Provide Input to Project Charter Contractor will support County in the creation of a Project charter. Contractor will: • Provide County with Project charter sample templates, and sample content; • Identify content which was developed to date as part of the Project Control Document (e.g. project resources, schedule) and which is relevant for inclusion in the Project charter; • Review the County-developed Project charter; • Provide feedback and recommendations; and • Validate that the Project charter will suit the purpose of directing and framing the overall Project.	**Deliverable 1.1 Input for Project Charter** • Project charter templates. • Sample Project charter content developed to date as part of the Project Control Document. • Feedback and recommendations based on draft Project charter. • Validation of Project charter. **Acceptance Criteria:** • Templates and content relevant for inclusion into the Project charter.

Task 2 Provide Input to Project Governance	
Task Description	
A Project governance framework will be developed and implemented. This framework will provide a set of processes and structures that will enable effective decision-making within the Project and will address, among other subjects, the structure, roles and responsibilities of governance participants and the decision making authority and processes.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Integration Architect;
  ○ Clinical Strategist; and
  ○ Solution Architect.
• County Key Resources
  ○ County Project Director; and
  ○ County Project Manager.	

Subtasks/Deliverables	
Subtask 2.1 Provide Input to Project Governance Structure Contractor will provide sample documents for a Project governance structure that, at a minimum, includes recommendations for:	**Deliverable 2.1 Input to Project Governance Structure** • Sample Project governance templates. • Sample content (e.g., organizational structures, role statements, mandates,

Task 2 Provide Input to Project Governance	
• Governance structure indicating the type of decisions needed as well as descriptions which outline the nature of the responsibilities of each governance participant or group; • Criteria to be used to identify and select governance participants (e.g., organizational authority required, availability for meetings, level of influence in the organization, clinical knowledge,); • Contractor participation in governance activities (e.g., number of Contractor participants, title of Contractor participants, and the role of each participant); • Interrelationship between governance participants (e.g., reporting relationships, communication channels,); • Decision flow among governance participants (e.g., information and escalation processes); and • Frequency and schedule of meetings. Contractor will review the draft Project governance structure and provide written recommendations for changes to Project governance structures and processes, information flow, communication channels and other means to enhance the effectiveness and the efficiency of decision making processes.	committee charters, selection criteria, responsibility assignment matrices). • Review of governance structure.. • Recommendations for improvement of County-drafted Project governance structure. **Acceptance Criteria:** • Sample content provided addresses all elements described under subtask 2.1 (Provide Input to Project Governance Structure). • Sample content provided is of sufficient completeness to address governance of entire Project across DHS, including all Domains, Venues, and Locations.
Subtask 2.2 Provide Input to Project Governance Processes Contractor will provide County with templates, documents and written recommendations for decision making and communication processes that, at a minimum, include: • Internal County conflict resolution process; • Criteria and management processes for creating, evaluating and managing exception requests; • Evaluation criteria for exceptions; • Means to address issues raised by special interest groups; • Issue and risk escalation and resolution	**Deliverable 2.2 Input to Project Governance Processes** • Sample Project governance processes templates. • Sample content (e.g., organizational structures, role statements, selection criteria, RACI charts,). • Review of governance processes. • Recommendations for improvement of the County-drafted Project governance processes. **Acceptance Criteria:** • Sample content provided will address all

Task 2 Provide Input to Project Governance	
process; • Tracking tools; and • Processes and structures for cross-Project integration to address issues and differences arising among County stakeholders representing different Domains, Venues and Locations. Contractor will review draft County-documented governance processes and provide written recommendations for enhancing the County-developed governance processes.	elements described in subtask 2.2 (Provide Input to Project Governance Processes). • Sample content provided will be of sufficient completeness to address governance of entire Project across DHS, including all Domains, Venues, and Locations.

Task 3 Identify Stakeholders	
Task Description	
The necessary County Project stakeholders will be identified and a strategy will be developed for managing these stakeholders throughout the Project.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Employees
  ○ County Project Director; and
  ○ County Project Manager.	

Subtasks/Deliverables	

Subtask 3.1 Identify Stakeholders
Contractor will provide analytical frameworks, templates, and written recommendations related to:
• Overall stakeholder categories (types of stakeholders); including:
  ○ Executive leadership;
  ○ Clinical leadership;
  ○ Technical leadership;
  ○ Clinical staff; and
  ○ Technical staff.
• Project-specific stakeholder roles and responsibilities; including:
  ○ IT analyst;
  ○ Workgroup lead;
	Deliverable 3.1 Stakeholder Analysis
	• Analytical frameworks, templates and written recommendations.
	• List of stakeholder categories.
	• Draft Stakeholder Analysis.
	• Final Stakeholder Analysis.
	
	Acceptance Criteria:
	• Contractor-provided analytical frameworks, templates and written recommendations address all elements described in subtask 3.1 (Identify Stakeholders), and have been Approved by County.
	• Draft Framework Analysis includes recommendations regarding adequacy of team capabilities (skills and knowledge) and

Task 3 Identify Stakeholders	
○ Workgroup members; and ○ Subject Matter Experts. • Contractor counterparts by stakeholder category. Contractor will develop a Stakeholder Analysis which will include recommendations regarding adequacy of team capabilities (skills and knowledge) and capacity (number of resources) and submit to County for review. Contractor will review and incorporate County feedback and proposed changes into the Stakeholder Analysis and submit a final version to County for Approval.	capacity (number of resources). • Final Stakeholder Analysis incorporates, and is consistent with, County-provided input. • Final Stakeholder Analysis has been Approved by County.

Task 4 Complete Project Control Document
Task Description
Contractor will complete a Project Control Document ("**PCD**") with input from the appropriate County executive and clinician stakeholders. Following County Approval of the PCD, it will be used by Contractor and County to manage, track, and evaluate Project performance. The PCD will address, among other subjects: • Project Work Plan ("**PWP**")* • Error Management Plan ("**EMP**") • Project Communications Strategy • Risk Management Plan • Project Staffing and Resource Management Plan* • Configuration and Technology Change Management Plan ("**CTCMP**") • Project Team Organization Plan • Issue Management Plan • Project Change Management Plan • Quality Management Plan • Deliverables Management Plan • Project Work Plan Management Document • Procedures for Status Meetings / Reporting Items marked with a * are required prior to submission of the Agreement to the Board for Approval.
Personnel Requirements
• Contractor Key Employees ○ Contractor Project Director; and ○ Contractor Project Manager. • County Key Employees ○ Project Director; and ○ Project Manager.

Task 4 Complete Project Control Document	
Subtasks/Deliverables	
Subtask 4.1 Develop Project Control Document Framework The PCD framework will provide the overall structure and procedures which will be used by Contractor and County to manage, track, and evaluate Project performance. The PCD must define the process for managing the Project schedule and, at a minimum, address: • Scheduling methodology and tools; • Schedule and milestone tracking methodology; • Scheduling performance measures during the Project across all SOWs; • Critical path identification and dependencies; • Resource allocation methodology; and • Methodology to account for Licensed Software Revisions during the course of the Project. Contractor will develop a draft PCD framework and submit it to County for review and feedback. The PCD framework will address all components of the PCD and include an outline and/or table of contents for all sub-components of the PCD. Contractor will review and incorporate County feedback and proposed changes into the PCD framework and submit a final version to County for Approval.	**Deliverable 4.1 Project Control Document Framework** • PCD framework. **Acceptance Criteria:** • PCD framework incorporates, and is consistent with, County-provided feedback. • PCD framework has been Approved by County.
Subtask 4.2 Develop Project Work Plan Contractor will develop a PWP that lists, as further detailed below, all tasks and subtasks listed in each of the SOWs, and any others as required to deliver the Services. The PWP will be developed in a MethodM Online compatible version of Microsoft Project. The PWP will, at a minimum, include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources assigned to each Deliverable, task, and subtask;	**Deliverable 4.2 Project Work Plan** • Project Work Plan. **Acceptance Criteria:** • Final PWP incorporates, and is consistent with, County-provided input. • Final PWP addresses all required elements described in subtask 4.2 (Develop Project Work Plan). • Final PWP has been Approved by County.

Task 4 Complete Project Control Document	
• Start date and date of completion for each Deliverable, task, and subtask; and • Identification of the grouping of each task or grouping of tasks and Deliverables to specific Milestones and Key Milestones. Contractor will develop a draft PWP and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the PWP and submit a final version to County for Approval.	
Subtask 4.3 Develop Error Management Plan Contractor will develop an EMP that documents, as further detailed below, the approach to Error management, including methodology, recommended tool(s) and escalation processes. Contractor will develop a draft EMP and submit to County for review and feedback. The EMP, at a minimum, will include: • Definitions of different severity (or criticality) levels for Errors; • Communication paths, processes, and time frames for dealing with different Error levels; • Tools for tracking and reporting on Errors and Error resolution; and • Tools for capturing and methods of communicating "Project lessons" to minimize the repetition of Errors. Contractor will review and incorporate County feedback and proposed changes into the EMP and submit a final version to County for Approval.	**Deliverable 4.3 Error Management Plan** • Error Management Plan. **Acceptance Criteria:** • Final EMP incorporates, and is consistent with, County-provided input. • Final EMP addresses all required elements described in subtask 4.3 (Develop Error Management Plan). • Final EMP has been Approved by County.
Subtask 4.4 Develop Project Communications Strategy Contractor will provide documents that include frameworks, templates, approach, guidelines, Best Practices, and sample content, including: • Recommendations for approaches to create awareness tailored to each stakeholder's category; • Recommendations for implementing communications, including access to a comprehensive library or collection of examples;	**Deliverable 4.4 Project Communications Strategy** • Project Communication Strategy frameworks, templates and Best Practices. • Sample content (e.g. communications matrix). • Recommendations for improvement of County draft Project Communications Strategy. **Acceptance Criteria:**

Task 4 Complete Project Control Document	

• Recommendations for the role of communications in the overall organizational change effort; and
• Communication activities that address:
  o Target audiences;
  o Communications content;
  o Communication channels;
  o Messengers; and
  o Frequency.
Contractor will review County's documented Project Communications Strategy and provide written recommendations for improvement.
	• Project Communications strategy frameworks, templates and Best Practices include all required elements described in subtask 4.4 (Develop Project Communications Strategy).

Subtask 4.5 Develop Risk Management Plan Contractor will develop a comprehensive Risk Management Plan that documents, at a minimum, the following: • Approach to risk analysis (the evaluation of risks and risk interactions to assess the range of possible Project outcomes); • Risk mitigation (the identification of ways to minimize or eliminate Project risks); • Process and frequency for assessing established risk analysis and mitigation approaches; • Risk tracking/control (methods to ensure that all steps of the risk management process are being followed and, risks are being mitigated effectively); and • Process for risk communication to County and within Contractor's organization and escalation. Contractor will develop a draft Risk Management Plan and submit it to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the Risk Management Plan and submit a final version to County for Approval.	**Deliverable 4.5 Risk Management Plan** • Risk Management Plan. **Acceptance Criteria:** • Final Risk Management Plan incorporates, and is consistent with, County-provided input. • Final Risk Management Plan addresses all required elements described in subtask 4.5 (Develop Risk Management Plan). • Final Risk Management Plan has been Approved by County.
Subtask 4.6 Develop Project Staffing and Resource Management Plan Contractor will develop a Project Staffing and Resource Management Plan that, at a minimum, includes:	**Deliverable 4.6 Project Staffing and Resource Management Plan** • Project Staffing and Resource Management Plan.

Task 4 Complete Project Control Document	
• Fully loaded Contractor resource staffing commitments (i.e., identification of FTE equivalent or hours for all resources by Key Milestone); • Project Organizational Chart that aligns with Contractor Licensed Software, Third-Party Products, and work streams documented in the SOWs; • Mapping of staffing to the roles, responsibilities, and activities of the PWP; • Reporting relationships; • Description of other resources such as conference rooms, training rooms, connectivity, calendars, etc.; • Education Tracker to monitor training received or required for specific County staff/roles; and • Guidelines for knowledge transfer between County personnel as they change roles, leave, or join the Project. Contractor will develop a draft Project Staffing and Resource Management Plan and submit it to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Project Staffing and Resource Management Plan and submit a final version to County for Approval.	**Acceptance Criteria:** • Final Project Staffing and Resource Management Plan incorporates, and is consistent with, County-provided input. • Final Project Management and Staffing Plan addresses all required elements described in subtask 4.6 (Develop Project Staffing and Resource Management Plan). • Final Project Staffing and Resource Management Plan has been Approved by County.
Subtask 4.7 Develop Configuration and Technology Change Management Plan Contractor will provide a CTCMP that defines the process for managing changes to the Licensed Software and the Hosting Environment, including software and hardware components. The CTCMP will address, among other subjects: • Servers and network devices on County premises; and • Operating system software and tools which reside on devices on County premises. Contractor will provide its current change management policy/procedure, develop a draft CTCMP and submit to County for review and feedback.	**Deliverable 4.7 Configuration and Technology Change Management Plan** • Configuration and Technology Change Management Plan. **Acceptance Criteria:** • Final CTCMP incorporates County specific information on communication and processes. • Final CTCMP addresses all required elements described in subtask 4.7 (Develop Configuration and Technology Change Management Plan). • Final CTCMP has been Approved by County.

Task 4 Complete Project Control Document	
Contractor will review and incorporate County specific information on communications and processes into the CTCMP and submit a final version to County for Approval.	
Subtask 4.8 Develop Issues Management Plan The Issues Management Plan will allow for the tracking and prioritizing of issues, defining and documenting action plans for issue resolution, and identifying issue owners who are responsible for driving the issue to resolution. Contractor will draft an Issues Management Plan which will include descriptions of processes and tools for at least the following items: • Issue identification (including dates); • Issue categorization; • Severity; • Impact; • Approach to resolution; • Identification of individuals responsible for issue resolution; • Expected resolution date; and • Escalation. Contractor will submit the Issues Management Plan to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Issues Management Plan and submit a final version to County for Approval.	**Deliverable 4.8 Issue Management Plan** • Issues Management Plan. **Acceptance Criteria:** • Final Issues Management Plan incorporates, and is consistent with, County-provided input. • Final Issues Management Plan addresses all required elements described in subtask 4.8 (Develop Issues Management Plan). • Final Issues Management Plan has been Approved by County.
Subtask 4.9 Develop Project Change Management Plan The Project Change Management Plan will delineate the formal process through which all Project changes (i.e. activities that do not require an Amendment to the Agreement, nor affect the Contract Sum or timing of Productive Use at any Cluster) are managed such that County is fully aware of and Approves such Project changes and all such Approved Project changes are documented. It is critical for all parties to understand that a Project change will not result in any change to the Agreement, to the Contract Sum, or to the	**4.9 Project Change Management Plan** • Project Change Management Plan. **Acceptance Criteria:** • Final Project Change Management Plan incorporates, and is consistent with, County-provided input. • Final Project Change Management Plan addresses all required elements described in subtask 4.9 (Develop Project Change Management Plan). • Final Project Change Management Plan has

Task 4 Complete Project Control Document	
timing of Productive Use at any Cluster. The Project Change Management Plan, at a minimum, must address: • Process for identifying Project changes; • Triaging process for Project changes; • Templates for documenting the description and estimated effort to implement proposed changes; • Roles, and responsibilities for documenting Project changes; and • Escalation process. Contractor will draft a Project Change Management Plan and submit to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Project Change Management Plan and submit a final version to County for Approval.	been Approved by County.
Subtask 4.10 Develop Quality Management Plan Contractor will develop a Quality Management Plan that documents Contractor's approach and methodology for quality assurance of Project Deliverables. The Quality Management Plan, at a minimum, must include: • Contractor roles and responsibilities with respect to quality management; • Quality control criteria and metrics; • Process to detect quality issues related to quality; and • Process for quality issue resolution. Contractor will draft a Quality Management Plan and submit to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Quality Management Plan and submit a final version to County for Approval.	**Deliverable 4.10 Quality Management Plan** • Quality Management Plan. **Acceptance Criteria:** • Final Quality Management Plan incorporates, and is consistent with, County-provided input. • Final Quality Management Plan addresses all required elements described in subtask 4.10 (Develop Quality Management Plan). • Final Quality Management Plan has been Approved by County.
Subtask 4.11 Develop Deliverables Management Plan Contractor will develop a Deliverables Management Plan in accordance with Sections	**Deliverable 4.11 Deliverables Management Plan** • Deliverables Management Plan.

Task 4 Complete Project Control Document	
9.3.2 (Key Deliverables) and 9.13 (Approval of Key Deliverables) of the Agreement. The Deliverables Management Plan must include the detailed process for initiation, development, review and Acceptance of Deliverables, including but not limited to: • Process for completing and Approving DEDs; • Identification of reviewers; • Deliverable Approval process for all Deliverables; • Status types for Deliverables; and • Process for tracking of Deliverables. Contractor will draft a Deliverables Management Plan and submit to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Deliverables Management Plan and submit a final version to County for Approval.	**Acceptance Criteria:** • Final Deliverables Management Plan incorporates, and is consistent with, County-provided input. • Final Deliverables Management Plan addresses all required elements described in subtask 4.11(Develop Deliverables Management Plan). • Final Deliverables Management Plan has been Approved by County.
Subtask 4.12: Develop Procedures for Status Meetings/Reporting Contractor will develop procedures for Status Meetings in accordance with Section 10.2 (Reports and Meetings) of the Agreement. These procedures, at a minimum, will include the following: • Listing of all standing Project meetings. At a minimum, the meetings must include weekly Status Meetings, quarterly Status Meetings, and Executive Project Updates; • Guidelines for ad hoc meetings; • Meeting modality and logistics; • Contractor and County required participants; • Meeting duration; • Frequency of meeting; • Format of the meeting agenda; and • Meeting minute format, including: o Agenda; o Decisions; o Attendance log;	**Deliverable 4.12 Procedures for Status Meetings/Reporting** • Procedures for Status Meetings/Reporting. **Acceptance Criteria:** • Final Procedures for Status Meetings/Reporting incorporate, and are consistent with, County-provided input. • Final Procedures for Status Meetings/Reporting address all required elements described in subtask 4.13 (Develop Procedures for Status Meetings/Reporting). • Final Procedures for Status Meetings/Reporting have been Approved by County.

Task 4 Complete Project Control Document	
○ Issues list; and ○ Action items list. Contractor will develop procedures for Status Reporting. These procedures, at a minimum, will address the following: • Listing of all status reports; • Guidelines for ad-hoc reports; • Status reporting format; • Reporting period; • Distribution date and time; and • Distribution groups. Contractor will draft Procedures for Status Meetings/Reporting and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the Procedures for Status Meetings/Reporting and submit a final version to County for Approval.	
Subtask 4.13: Develop Project Control Document Contractor will compile all Deliverables developed as part of Task 4 (Complete Project Control Document) in a comprehensive Project Control Document. The PCD must include all of the following: • Project Work Plan; • Error Management Plan; • Project Communications Strategy; • Risk Management Plan; • Project Staffing and Resource Management Plan; • Configuration and Technology Change Management Plan; • Issue Management Plan; • Project Change Management Plan; • Quality Management Plan; • Deliverables Management Plan; • Project Work Plan Management Document, and • Procedures for Status Meetings/Reporting. The Contractor will draft a PCD and submit to	**Deliverable 4.13 Project Control Document** • Project Control Document. **Acceptance Criteria:** • Final Project Control Document incorporates, and is consistent with, County-provided input. • Final Project Control Document addresses all required elements described in subtask 4.13 (Develop Project Control Document). • Final Project Control Document has been Approved by County. • Final Project Control Document completed and Approved prior to Project startup gateway.

Task 4 Complete Project Control Document	
County for feedback. The Contractor will incorporate County feedback and proposed changes into the PCD and submit a final version to County for Approval.	

Task 5 Develop Technology Strategy	
Task Description	
The purpose of the Technology Strategy is to identify and document the technical requirements for the EHR System, including end-user hardware devices, WAN and LAN requirements, as well as the domains and hosting strategy for the EHR System.	
Personnel Requirements	

• Contractor Key Resources
  ○ Technical Engagement Leader.
• County Key Resources
  ○ County Technical Manager;
  ○ County Desktop Technician;
  ○ County Network Technician;
  ○ County Peripherals Coordinator; and
  ○ County Biomed Technician.	

Subtasks/Deliverables	
Subtask 5.1 Conduct Technical Assessment Contractor will facilitate a session with County stakeholders to review the process for County to conduct an assessment of the County technical environment and determine County's readiness for the implementation of the EHR System. The session will include: • High-level overview of the Licensed Software and Third-Party Products; and • Technical walkthrough of the Licensed Software and Third-Party Products architecture. Contractor will support County in conducting data gathering and develop a draft Technical Assessment including current state analysis. Contractor will review and provide input and recommendations for future state needs. The Technical Assessment will include: • Current state technical environment; • Technical and infrastructure requirements at County facilities;	**Deliverable 5.1 Technical Assessment** • Technical Assessment. **Acceptance Criteria:** • Final Technical Assessment incorporates, and is consistent with, County-provided input. • Final Technical Assessment addresses all required elements described in subtask 5.1 (Conduct Technical Assessment). • Final Technical Assessment is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 5 Develop Technology Strategy	
• Gap between current and future state; • Risk analysis and mitigation; and • Technology recommendations with options for closing gaps. Contractor will support the Technical Assessment data collection process as follows: • Identify systemic issues related to completion of Technical Assessment data gathering (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to the address issues and recommendations above (the resources are to be as determined necessary to support the Project through the Governance process defined in this SOW. Contractor Technical Engagement Leader will be available for ad hoc calls and support by email. Immediate requests for support will be routed to another Contractor designee if the Contractor Technical Engagement Leader is unavailable. Contractor will facilitate a review session of the Technical Assessment with County and collect feedback and additional input as required to finalize the Technical Assessment. Contractor will incorporate County feedback and proposed changes into the Technical Assessment and submit a final version to County for Approval.	
Subtask 5.2 Develop Technology Strategy Based on the Technology Assessment, Contractor will provide input and recommendations for County to develop a Technology Strategy, which includes a representation of the required end-to-end technology components and hosting strategy to ensure a successful implementation of the Licensed Software for the EHR System. The Technology Strategy will describe the overall components of the infrastructure required on County premises including at a minimum: • Network and communication for connectivity to the Hosting Environment;	**Deliverable 5.2 Technology Strategy** • Input and recommendations into County Technology Strategy. **Acceptance Criteria:** • Recommendations into Technology Strategy incorporate, and are consistent with, County-provided input.

Task 5 Develop Technology Strategy	
• Servers required for disaster recovery or down time viewing; • Connectivity, routers, and concentrators for devices (including workstations and medical devices); and • Equipment and software required for cross-DHS communications and connectivity. Contractor will review the County developed Technology Strategy and provide written feedback and recommendations based on Contractor experience and industry Best Practices.	

Task 6 Develop Strategic Assessment and Organization Change Management Strategy	
Task Description	
Contractor will perform a Strategic Assessment using a diagnostic approach to assess County's culture and readiness for change. During this assessment, County leadership, end-users and prospective Project team members will be engaged by Contractor to assess the County's current state with respect to the implementation of a new EHR System, challenges and opportunities. Based in part on this Strategic Assessment, the Organizational Change Management Strategy ("**OCM Strategy**") will be finalized. The OCM Strategy describes the approach that will be taken to promote the successful initiation, planning, communication, implementation, and evaluation of change.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ Physician Champions; and
  ○ Change Management and Education Director.	

Subtasks/Deliverables	
Subtask 6.1 Conduct Strategic Assessment Contractor will facilitate a Strategic Assessment Session with County leadership, end-users, and prospective project team members. The Strategic Assessment Session must, at a minimum, address: • Overview of current County environment (including aspects such as clinical and operational process maturity, data quality,	**Deliverable 6.1 Strategic Assessment** • Strategic Assessment Session. • Strategic Assessment Report. **Acceptance Criteria:** • Approved documentation of the County's culture and readiness for change. • Final Strategic Assessment Report

Task 6 Develop Strategic Assessment and Organization Change Management Strategy	
prior success with technology implementation, ability to accomplish organizational change, technical environment); • Areas of strength; • Challenges; • Opportunities for change; and • Expected Project benefits. Following the Strategic Assessment Session, Contractor will draft a Strategic Assessment Report and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the Strategic Assessment Report and submit a final version to County for Approval.	incorporates, and is consistent with, County-provided input. • Final Strategic Assessment Report addresses all required elements described in Task 6.1 (Conduct Strategic Assessment). • Final Strategic Assessment Report is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.
Subtask 6.2 Develop Organization Change Management Strategy Based on the outcome of the Leading Strategic Change Workshops conducted by the Contractor as outlined in subtask 12.10 (Conduct Leading Strategic Change Workshop), Contractor will draft an OCM Strategy that, at a minimum, includes: • Data gathering processes and tools to assess current state County capabilities to enable effective change; • Resource requirements; • Recommended approach for the County to successfully manage organizational and cultural change; and • Contractor support for implementing the OCM Strategy (e.g., including OCM Strategy activities in MethodM). Contractor will facilitate a session with County stakeholders to review the draft OCM Strategy and document County input and feedback. Contractor will draft an OCM Strategy and submit to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the OCM Strategy and submit a final version to County for Approval.	**Deliverable 6.1 Organization Change Management Strategy** • OCM Strategy. **Acceptance Criteria:** • Final OCM Strategy incorporates, and is consistent with, County-provided input. • Final OCM Strategy addresses all required elements described in subtask 6.2 (Develop Organization Change Management Strategy). • Final OCM Strategy is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 7 Develop Knowledge Transfer Strategy	
Task Description	
The Knowledge Transfer Strategy documents Contractor's approach to knowledge transfer and the support that Contractor will provide throughout the Project to prepare County for deployment and post production support of the Licensed Software and Third-Party Products. The Knowledge Transfer Strategy will be developed in accordance with the Section 9.5 (Knowledge Transfer and Training) of the Agreement.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ Physician Champions; and
  ○ Change Management and Education Director.	

Subtasks/Deliverables	

Subtask 7.1 Develop Knowledge Transfer Strategy
Contractor will document a Knowledge Transfer Strategy that outlines each of the activities that together make up knowledge transfer for the Licensed Software, Third-Party Products and process changes. This includes at a minimum:
• Events to educate County on:
  ○ Leading strategic change;
  ○ System review;
  ○ Design review;
  ○ System validation;
  ○ Maintenance training; and
  ○ Trainer conversion.
• Relationships and interdependencies among events;
• Goals and expected outcomes;
• Coverage of all Domains, Venues and Locations;
• Coaching and mentoring approach between and beyond events; and
• Approach to develop County capabilities with regard to hand off to Contractor for Support Services and AMS Services.
	Deliverable 7.1 Knowledge Transfer Strategy
	• Knowledge Transfer Strategy.
	
	Acceptance Criteria:
	• Final Knowledge Transfer Strategy incorporates, and is consistent with, County-provided input.
	• Final Knowledge Transfer Strategy addresses all required elements described in Task 7.1 (Develop Knowledge Transfer Strategy).
	• Final Knowledge Transfer Strategy is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Contractor will draft a Knowledge Transfer Strategy and submit to County for review and feedback. Contractor will incorporate County feedback and proposed changes into the Knowledge Transfer Strategy and submit a final version to County for Approval.	

Task 8 Develop End-User Training Strategy	
Task Description	
The End-User Training Strategy documents the training requirements, the approach for development of training curricula, and the deployment of training for County's end users on the use of the Licensed Software and Third-Party Products. The End-User Training Strategy will be developed in accordance with Section 9.5 (Knowledge Transfer and Training) of the Agreement.	
Personnel Requirements	

• Contractor Key Resources
  ○ Learning Consultant.
• County Key Resources
  ○ County Education Coordinator; and
  ○ County Education and Learning Team.	

Subtasks/Deliverables	

Subtask 8.1 Develop End-User Training Strategy
Contractor will develop an End-User Training Strategy that, at a minimum, includes:
• Defined and documented categories of County users to be trained (end-users, super-users, etc.);
• Recommended approach for conducting end-user training (train the trainer, classroom, one-on-one, simulated environment, etc.);
• Learning tools; including:
  ○ ULearn;
  ○ LearningLive;
  ○ Standard WBT's; and
  ○ OpenHouse.
• Training methodologies and modalities;
• Contractor and County resources required; and
• Role for Contractor, County, and third-party resources.
	Deliverable 8.1 End-User Training Strategy
	• End-User Training Strategy.
	
	Acceptance Criteria:
	• Final End-User Training Strategy incorporates, and is consistent with, County-provided input.
	• Final End-User Training Strategy addresses all required elements described in subtask 8.1 (Develop End-User Training Strategy).
	• Final End-User Training Strategy is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 8 Develop End-User Training Strategy	
Contractor will develop a draft End-User Training Strategy and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the End-User Training Strategy and submit a final version to County for validation and Approval.	

Task 9 Develop Testing Strategy	
Task Description	
Provide a Testing Strategy that describes the approach and processes that will be used to fully test all components of the EHR System.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Manager;
  ○ Technical Engagement Leader;
  ○ Solution Architect; and
  ○ Integration Architect.
• County Key Resources
  ○ County Project Manager; and
  ○ IT Analysts.	

Subtasks/Deliverables	
Subtask 9.1 Develop Testing Strategy Contractor will document a Testing Strategy with County input and participation that, at a minimum, includes: • Identification of all tests (e.g. unit, system, integration, end-to-end, interface, medical device integration, user acceptance, data migration, performance (including stress and volume), regression, downtime procedures, and security), including a description of the purpose of each test and a high-level test schedule; • Tools, resources, and facilities required to support testing; • Artifacts that need to be created, such as scripts, test data, and scenarios; • Contractor and County roles and responsibilities; • Processes for Update, Revision, change, build,	**Deliverable 9.1 Testing Strategy** • Testing Strategy. **Acceptance Criteria:** • Final Testing Strategy incorporates, and is consistent with, County-provided input. • Final Testing Strategy addresses all required elements described in subtask 9.1 (Develop Testing Strategy). • Final Testing Strategy is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 9 Develop Testing Strategy	
and version control; and • Testing implications based on the County selected deployment or "Go-Live" approach. Contractor will develop a draft Testing Strategy and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the Testing Strategy and submit a final version to County for Approval.	

Task 10 Security Strategy	
Task Description	
The objective of the Security Strategy is to document the requirements, including physical, administrative and technical elements, and the divisions of security roles and responsibilities related to the EHR System. The Security Strategy will be developed in accordance with Exhibit K (Information Security Requirements) of the Agreement.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Manager;
  ○ Delivery Consultant;
  ○ Technical Engagement Leader; and
  ○ Solution Architect.
• County Key Resources
  ○ County Project Manager; and
  ○ IT Analysts.	

Subtasks/Deliverables	
Subtask 10.1 Develop Security Strategy Contractor will document a Security Strategy, with specifications in accordance with Exhibit K (Information Security Requirements) of the Agreement. The Security Strategy, at a minimum, must address: • Identification of applicable regulatory requirements; • Tools, testing, resources and facilities required to support security roles, management, access controls, user authorization and authentication, threat risk assessment, threat response, reporting, and audits; • Contractor and County roles and	**Deliverable 10.1 Security Strategy** • Security Strategy. **Acceptance Criteria:** • Final Security Strategy incorporates, and is consistent with, County-provided input; • Final Security Strategy addresses all required elements described in subtask 10.1 (Develop Security Strategy); • Final Security Strategy is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

responsibilities; • Portable device security precautions and procedures; and • Implications for the County-selected deployment or "Go-Live" approach. Contractor will develop a draft Security Strategy and submit to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the Security Strategy and submit a final version to County for Approval.	

Task 11 Conduct County Executive Session	
Task Description	
The objective of the County Executive Session is to achieve strategic, Project, and technical alignment between Contractor and County executive teams. This event also serves as the executive leadership kick off for the Project. The County Executive Session provides an opportunity to discuss and further define the goals and outcomes for the Project. These defined outcomes will guide the Project. The County Executive Session is an interactive session with knowledge transfer between County and Contractor leadership.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director; and
  ○ Contractor Project Manager.
• County Key Resources
  ○ County Executive and Clinical Leadership Team; and
  ○ County Quality Director.	

Subtasks/Deliverables	
Subtask 11.1 Conduct County Executive Session Contractor will conduct a one (1) day County Executive Session with County executives, the agenda to include review of all Project Control Documents and strategies developed by Contractor to-date. The County Executive Session must provide an overview of: • Project governance; • Project organization; • Project Work Plan; • Quality Management Plan; • Communications Strategy; • OCM Strategy; • Security Strategy;	**Deliverable 11.1 County Executive Session** • Agenda/schedule for County Executive Session. • Attendance sheet/roster of participants for County Executive Session. • County Executive Session presentation materials. • County Executive Session Event Summary Report. **Acceptance Criteria**: • Final County Executive Session Event Summary Report incorporates, and is

Task 11 Conduct County Executive Session	
• Knowledge Transfer Strategy; and • End-User Training Strategy. During the County Executive Session, Contractor will provide an overview of the Project, including: • Identifying and documenting expected Project outcomes; • Creating understanding among County Executives of the Licensed Software and Services and key dates; • Outlining the Project approach and general timeline; • Discussing County's Meaningful Use objectives to be addressed on this Project; and • Discussing Project success and risk factors. The County Executive Session will also address the strategic alignment of the Project with the DHS strategic plan. This includes: • Clarifying County leadership's organizational vision, mission, goals, and outcomes; • Educating County leaders about the Project; • Encouraging County leadership's participation in the Project; and • Facilitating communication planning. During the County Executive Session, Contractor will document input from County stakeholders which will be incorporated into the County Executive Session Event Summary Report. Contractor will develop a draft County Executive Session Event Summary Report that includes findings (observations, opportunities, challenges) from the session. Contractor will provide recommendations regarding how to increase Project readiness as part of the County Executive Session Event Summary Report. Contractor will provide County with assistance and resources to implement the recommendations as needed. Contractor will submit County Executive Session Event Summary Report for County review and input. Contractor will review and incorporate County feedback and proposed changes into the	consistent with, County-provided input. • Executive Session addresses all required elements described in subtask 11.1 (Conduct County Executive Session). • Final County Executive Session Event Summary Report addresses all required elements described in subtask 11.1 (Conduct County Executive Session). • Final County Executive Session Event Summary Report has been Approved by County.

Task 11 Conduct County Executive Session	
Executive Session Event Summary Report and submit a final version to County for Approval.	

Task 12 Conduct Project Preparation Sessions	
Task Description	
The purpose of the Project Preparation Sessions is to assess County's basic computer skills and project management concepts/tools needed to run a successful EHR System implementation Project. County will be introduced to the Contractor Project team and learn County's role and others' role on the team. MethodM will be introduced, and County will learn the different events within the methodology. Project tools that will make the Project successful will be introduced and demonstrated. Contractor will provide County with the opportunity to have hands on experience working on the Licensed Software and Third-Party Products.	
Personnel Requirements	

• Contractor Key Resources
  ○ Entire Contractor Project Team - Key Leadership, Analysts, and Subject Matter Experts;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Integration Architect
  ○ Contractor Delivery Consultants;
  ○ Clinical Strategist; and
  ○ Solution Architects.
• County Key Resources
  ○ Entire County Project Team – Key Leadership, Analysts, and Subject Matter Experts.	

Subtasks/ Deliverables	

Subtask 12.1 Conduct Project Management Workshop
Contractor will:
• Work with County to identify the appropriate audience for this event;
• Provide County with a roster of participants; and
• Conduct a Project Management Workshop.
During the Project Management Workshop, at a minimum, Contractor will:
• Review the following key concepts:
  ○ Recommendations for effectively managing the Project; and
  ○ Establishing benefits as the Project foundation.
• Review how Meaningful Use fits into the
	Deliverable 12.1 Project Management Workshop
	• Agenda/schedule for Project Management Workshop.
	• Attendance sheet/roster of participants for Project Management Workshop.
	• Project Management Workshop presentation materials.
	• Proficiency Assessment; and
	• Project Management Workshop Event Summary Report.
	
	Acceptance Criteria:
	• Project Management Workshop Event Summary Report has been Approved by County.

Task 12 Conduct Project Preparation Sessions	
Project; • Review Project governance structure; • Review the various components of MethodM; • Review the roles and responsibilities of Project team members; • Review managing, updating, and reporting of the Project Work Plan; • Review of the Communication Strategy; • Review Project risks/issue management processes; and • Develop a Proficiency Assessment for all workshop participants to: o Assess the skills learned by the County team; and o Ensure that the County Project team members have obtained the necessary knowledge and skills presented during the course. Upon completion of each Project Management Workshop, Contractor will: • Develop a Project Management Workshop Event Summary Report that includes findings (observations, opportunities, challenges) from the Project Management Workshop; and • Provide recommendations for increasing Project readiness and provide County with assistance and resources to implement the recommendations as needed.	
Subtask 12.2 Conduct Project Team Workshop Contractor will: • Work with County to identify the appropriate audience for this event; • Provide County with a roster of participants; and • Conduct Project Team Workshops. During the Project Team Workshop, at a minimum, Contractor will: • Introduce the Project team to various project roles/responsibilities, MethodM, and project	**Deliverable 12.2 Project Team Workshop** • Agenda/schedule for Project Team Workshop. • Attendance sheet/roster of participants for Project Team Workshop. • Project Team Workshop presentation materials. • Proficiency Assessment. • Project Team Workshop Event Summary Report.

Task 12 Conduct Project Preparation Sessions	

tools that will be used for the project.
• Address at a minimum:
  ○ Introduction to MethodM;
  ○ Presentation of key Project documents; and
  ○ Introduction to administrative tools.
• Introduce the Project team;
• Review Project benefits and Meaningful Use measures addressed by Project;
• Define Project roles and expectations;
• Outline Contractor implementation approach;
• Review Licensed Software, Third-Party Products, Services, and Key event dates; and
• Provide an overview of Project administration tools.
Upon completion of each Project Team Workshop, Contractor will:
• Develop a Project Team Workshop Event Summary Report that includes findings (observations, opportunities, challenges) from the session; and
• Provide recommendations for increasing Project readiness and provide County with assistance and resources to implement the recommendations as needed.
	Acceptance Criteria:
	• Project Team Workshop Event Summary Report has been Approved by County.

Subtask 12.3 Conduct PC Basics Course Contractor will: • Work with County to identify the appropriate audience for this event; • Provide County with a roster of participants; • Establish PC Basics Course learning objectives and proficiency measures; and • Conduct a PC Basics Course. During the PC Basics Course, at a minimum, Contractor will: • Provide County participants with a basic understanding of Windows, MS Word, and MS Excel skills, on versions to be specified by County. Upon completion of each PC Basics Course,	**Deliverable 12.3 PC Basics Course** • Agenda/schedule for PC Basics Course. • Attendance sheet/roster of participants for PC Basics Course. • PC Basics Course learning objectives. • PC Basics Course presentation materials. • PC Basics Course Event Summary Report, including results of the Proficiency Assessment. • Recommendations for addressing shortcomings. **Acceptance Criteria:** • PC Basics Course Event Summary Reports have been Approved by County.

Task 12 Conduct Project Preparation Sessions	

Contractor will:
• Develop a Proficiency Assessment for all workshop participants to:
  ○ Document the skills acquired by the County team; and
  ○ Ensure that the County Project team members have obtained the necessary knowledge and skills for the software covered by the course.
• Develop a PC Basics Course Event Summary Report; and
• Provide County with written recommendations on how to address shortcomings and deficiencies related to PC Basics Course skills.	

Subtask 12.4 Conduct Solution Build and Maintain Course As part of the Project preparation, Contractor will: • Work with County to identify the appropriate audience for this event; • Provide County with a roster of participants; • Conduct Solution Build and Maintain Courses for County Project team members who are closely involved with the Licensed Software build; and • As needed, Contractor will repeat the Solution Build and Maintain Courses throughout the duration of the Project. During the Solution Build and Maintain Courses, at a minimum, Contractor will: • Address design, build, maintenance and troubleshooting topics for the Licensed Software and Third-Party Products; • Provide training on the tools and methodologies used during design and build; and • Conduct various hands-on exercises providing participants with an opportunity to demonstrate skills during mini-build sessions. Upon completion of each Solution Build and	**Deliverable 12.4 Solution Build and Maintain Course** • Agenda/schedule for Solution Build and Maintain Course. • Attendance sheet/roster of participants for Solution Build and Maintain Course. • Solution Build and Maintain Course learning objectives. • Solution Build and Maintain Course presentation materials. • Solution Build and Maintain Course Event Summary Report, including results of the Proficiency Assessment. • Recommendations for addressing shortcomings. **Acceptance Criteria:** • County Approved Solution Build and Maintain Course Event Summary Report.

Task 12 Conduct Project Preparation Sessions	

Maintain Course, Contactor will:
• Develop a Proficiency Assessment for all course participants to:
  ○ Document the skills acquired by the County team; and
  ○ Ensure that the County Project team members have obtained the necessary knowledge and skills for the course.
• Develop a Solution Build and Maintain Course Event Summary Report that includes findings (observations, opportunities, challenges) from the session; and
• Provide recommendations for increasing Project readiness and provide County with assistance and resources to implement the recommendations as needed.	

Subtask 12.5 Conduct Solution and Tools Introduction Workshop
As part of the Project preparation, Contractor will:
• Work with County to identify the appropriate audience for this event;
• Provide County with a roster of participants; and
• Conduct the Solution and Tools Introduction Workshop.
During the Solution and Tools Introduction Workshop, at a minimum, Contractor will:
• Ensure that all Project team members have a basic understanding of necessary Contractor tools, including:
  ○ MethodM Online;
  ○ Solutions WBT's - The simulated solution environment that performs like the DHS system;
  ○ Cerner.com: Access to Contractor proprietary content and tools and solution documentation, service centers, and distribution packages; and
  ○ Bedrock tools.
After each Solution and Tools Introduction
	Deliverable 12.5. Solution and Tools Introduction Workshop
	• Agenda/schedule for Solution and Tools Introduction Workshop.
	• Attendance sheet/roster of participants for Solution and Tools Introduction Workshop.
	• Solution and Tools Introduction Workshop learning objectives.
	• Solution and Tools Introduction Workshop presentation materials.
	• Solution and Tools Introduction Workshop Event Summary Report.
	
	Acceptance Criteria:
	• Solution and Tools Introduction Workshop Event Summary Report has been Approved by County.

Task 12 Conduct Project Preparation Sessions	

Workshop, Contactor will:
• Develop a draft Solution and Tools Introduction Workshop Event Summary Report that includes findings (observations, opportunities, challenges) from the workshop;
• Develop a Proficiency Assessment for all workshop participants to:
  o Document the skills acquired by the County team;
  o Ensure that the County Project team members have obtained the necessary knowledge and skills for the course.
• Provide recommendations for increasing Project readiness and provide County with assistance and resources to implement the recommendations as needed.	

Subtask 12.6 Licensed Software and Third-Party Products Fundamentals Course Contractor will: • Work with County to identify the appropriate audience for this event; • Provide County with a roster of participants; and • Conduct Licensed Software and Third-Party Products Fundamentals Courses. During the Licensed Software and Third-Party Products Fundamentals Courses, at a minimum, Contractor will: • Provide hands-on exercises for County participants who are preparing to implement the Contractor Licensed Software and Third-Party Products; and • Review the technical architecture, terminology, and fundamental components of the Licensed Software and Third-Party Products. After each Licensed Software and Third Party Products Fundamentals Course, Contactor will: • Develop a Proficiency Assessment for all workshop participants to: o Assess the skills learned by the County	**Deliverable 12.6 Licensed Software and Third Party Products Fundamentals Course** • Agenda/schedule for Licensed Software and Third Party Products Fundamentals Course. • Attendance sheet/roster of participants for Licensed Software Fundamentals and Third Party Products Course, learning objectives, and presentation materials. • Licensed Software and Third Party Products Fundamentals Course Event Summary Report. **Acceptance Criteria:** • Licensed Software and Third Party Products Fundamentals Course Event Summary Report has been Approved by County.

Task 12 Conduct Project Preparation Sessions	
team; and ○ Ensure that the County Project team members have obtained the necessary knowledge and skills presented during the course. • Develop a Licensed Software and Third Party Products Fundamentals Course Event Summary Report that includes findings (observations, opportunities, challenges) from the course; and • Provide recommendations for increasing Project readiness and provide County with assistance and resources to implement the recommendations as needed.	

Task 12 Conduct Project Preparation Sessions	

Subtask 12.7 Conduct Clinical and Business Process Analysis Training
Contractor will:
• Work with County to identify the appropriate audience for this event;
• Provide County with a roster of participants; and
• Conduct training in clinical and business process analysis, improvements and design consulting for IT Analysts, Workgroup members and SMEs.
During the Clinical and Business Process Analysis Training, at a minimum, Contractor will:
• Provide training on Contractor's bedrock and MethodM implementation tools and Project management tools; and
• Provide instructions on how to discover, analyze, develop, implement, and assess clinical and business process improvements.
After each Clinical and Business Process Analysis Training, Contactor will:
• Develop a Proficiency Assessment for all workshop participants to:
  ○ Assess the skills learned by the County team; and
  ○ Ensure that the County Project team members have obtained the necessary knowledge and skills presented during the training.
• Develop a Clinical and Business Process Analysis Training Event Summary Report that includes findings (observations, opportunities, challenges) from the session; and
• Provide recommendations to increase Project readiness and support County with the implementation of the recommendations as needed.
	Deliverable 12.7 Clinical and Business Process Analysis Training
	• Agenda/schedule for Clinical and Business Process Analysis Training.
	• Clinical and Business Process Analysis Training.
	• Clinical and Business Process Analysis Training learning objectives, presentation materials, and an attendance sheet/roster of participants.
	• Clinical and Business Process Analysis Training Event Summary Reports.
	
	Acceptance Criteria:
	• Clinical and Business Process Analysis Training Event Summary Reports have been Approved by County.

Subtask 12.8 Conduct IT Analyst Prep Session As part of the Project kick-off and initiation, Contractor will:	**Deliverable 12.8 IT Analyst Prep Session** • Agenda/schedule for IT Analyst Prep Session. • IT Analyst Prep Session learning objectives,

Task 12 Conduct Project Preparation Sessions	

• Work with County to identify the appropriate audience for this event;
• Provide County with a roster of participants; and
• Conduct IT Analyst Prep Sessions with all Solution Architects and County IT Analysts from all Domains as needed.
During the IT Analyst Prep Session, at a minimum, Contractor will:
• Discuss, develop, and document cross-work stream integration/communication processes to ensure that there is a basis for coordination and communication among Solution Architects and IT Analysts across the various work streams of the Project;
• Review work effort that will be required for each Domain throughout the life of the Project so that the County Project team is better prepared for upcoming events and activities;
• Discuss the roles and responsibilities of the County Workgroup, including SMEs; and
• Provide training on workshop and data gathering session facilitation.
After each IT Analyst Prep Session, Contactor will:
• Develop a Proficiency Assessment for all workshop participants to:
  ○ Assess the skills learned by the County team; and
  ○ Ensure that the County Project team members have obtained the necessary knowledge and skills presented during the course.
• Develop an IT Analyst Prep Sessions Event Summary Report that includes findings (observations, opportunities, challenges) from the session
• Provide recommendations for the increase Project readiness and support County with the implementation of the recommendations as needed.
	presentation materials, and an attendance sheet/roster of participants.
	• IT Analyst Prep Session Event Summary Report.
	
	Acceptance Criteria:
	• IT Analyst Prep Session Event Summary Report has been Approved by County.

Task 12 Conduct Project Preparation Sessions	
Subtask 12.9 Conduct Physician and Nursing (Clinician) Sessions During Project preparation, Contractor will: • Work with County to identify the appropriate audience for this event covering all Domains, Venues, and Locations; • Provide County with a roster of participants; and • Conduct Physician and Nursing (Clinician) Sessions. During each Physician and Nursing (Clinician) Session, at a minimum, Contractor will: • Provide senior clinical staff with an understanding of the Project scope, the implementation approach, and expected Project outcomes; and • Assist the County leadership team in developing a cohesive, shared vision of the Project and strategy for a successful engagement. After each Physician and Nursing (Clinician) Sessions, Contactor will: • Develop a proficiency assessment for all workshop participants to: o Assess the skills learned by the County team; and o Ensure that the County Project team members have obtained the necessary knowledge and skills presented during the session. • Develop a Physician and Nursing (Clinician) Sessions Event Summary Report that includes findings (observations, opportunities, challenges) from the session; and • Provide recommendations for the increase Project readiness and support County with the implementation of the recommendations as needed.	**Deliverable 12.9 Physician and Nursing (Clinician) Sessions** • Agenda/schedule for Physician & Nursing (Clinician) Sessions. • Physician and Nursing (Clinician) Sessions learning objectives, presentation materials, and an attendance sheet/roster of participants. • Physician and Nursing (Clinician) Sessions. • Physician and Nursing (Clinician) Sessions Event Summary Reports. **Acceptance Criteria:** • Physician and Nursing (Clinician) Sessions Event Summary Reports have been Approved by County.
Subtask 12.10 Conduct Leading Strategic Change Workshop Contractor will: • Work with County to identify the appropriate	**Deliverable 12.10 Leading Strategic Change Workshop** • Agenda/schedule for Leading Strategic Change Workshop.

Task 12 Conduct Project Preparation Sessions	
audience for this event; • Provide County with a roster of participants; and • Conduct an initial, two-day Leading Strategic Change Workshop during Project initiation focused on assessing and improving the County's ability to create an organizational change campaign to influence behaviors and realize benefits. During each Leading Strategic Change Workshop, at a minimum, Contractor will: • Define and document effective change strategies; • Introduce County to processes of introducing and managing change in the County organization; • Assess and document the skills, tools, techniques, measurements, and processes contributing to County's success in managing change; • Identify and document a strategy to prepare end users for implementation of Contractor Licensed Software; • Document timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and • Update the: (a) Knowledge Transfer Strategy; (b) End-User Training Strategy; and (c) OCM Strategy with County's feedback from the Leading Strategic Change Workshop. After each Leading Strategic Change Workshop, Contactor will: • Develop a Leading Strategic Change Workshop Event Summary Report that includes findings (observations, opportunities, challenges) from the session; and • Provide recommendations for the increase Project readiness and support County with the implementation of the recommendations as needed.	• Attendance sheet/roster of participants for Leading Strategic Change Workshop. • Leading Strategic Change Workshop learning objectives. • Leading Strategic Change Workshop presentation materials. • Updated Knowledge Transfer Strategy. • Updated End-User Training Strategy. • Updated OCM Strategy. • Leading Strategic Change Workshop Event Summary Report. **Acceptance Criteria:** • Each Leading Strategic Change Workshop addresses all required elements described in subtask 12.10 (Conduct Leading Strategic Change Workshop). • Final Leading Strategic Change Workshop Event Summary report has been Approved by County.

Task 13 Conduct Project Kickoff

Task Description

Contractor will conduct a comprehensive introduction to the Project and hold a kickoff session at a County location to formally launch the Project. The kickoff is an opportunity for County executives and Project leadership to create enthusiasm for the Project. The kickoff is also an opportunity for County Project leaders and sponsors to create clarity as to the purpose for the Project and help stakeholders across Domains, Venues, and Locations to understand the benefits to be gained from the implementation of the Licensed Software.

The Project Kickoff is one of several forums where the entire organization gathers to receive Project information. Topics at the kickoff will include project goals, overview, timeline, Project approach, and Project team roles.

Personnel Requirements

- Contractor Key Resources
  - Entire Project Team – Key Leadership, Analysts, and Subject Matter Experts;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Integration Architect
  - Contractor Delivery Consultants;
  - Clinical Strategist; and
  - Solution Architects.
- County Key Resources
  - Entire Project Team – Key Leadership, Analysts, and Subject Matter Experts;

Subtasks/Deliverables

Subtask 13.1 Conduct Project Kickoff

County and Contractor will develop and discuss the approach, modality, format, and venue for the Project Kickoff.

Contractor will:

- Prepare an agenda and develop draft presentation materials for the Project Kickoff that include at a minimum:
  - Project goals, including alignment with County EHR strategy and Business Objectives;
  - Project overview;
  - Project timeline;
  - Project approach; and
  - Contractor and County Project team roles.
- Incorporate County feedback and recommendations and finalize the Project

Deliverable 13.1 Project Kickoff

- Agenda/schedule for Project Kickoff.
- Attendance sheet/roster of participants for Project Kickoff.
- Project Kickoff presentation materials.
- Project Kickoff Event Summary Report.

Acceptance Criteria:

- Project Kickoff presentation and agenda addresses all required elements described in Task 13.1 (Conduct Project Kickoff).
- Final Project Kickoff Event Summary Report incorporates, and is consistent with, County-provided input.
- Project Kickoff presentation and agenda has been Approved by County.
- Project Kickoff Event Summary Report has

Task 13 Conduct Project Kickoff	
Kickoff presentation materials; and • Conduct the Project Kickoff in collaboration with County Project leadership. Contractor will, in collaboration with County, hold the Project Kickoff. After the Project Kickoff, Contactor will: • Submit a draft Project Kickoff Event Summary Report for County review and input; • Review and incorporate County feedback and proposed changes into the Project Kickoff Event Summary Report; and • Submit a final Project Kickoff Event Summary Report to County for validation and Approval.	been Approved by County.

Exhibit A.3 (EHR Architecture and Hosting Services Statement

Of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

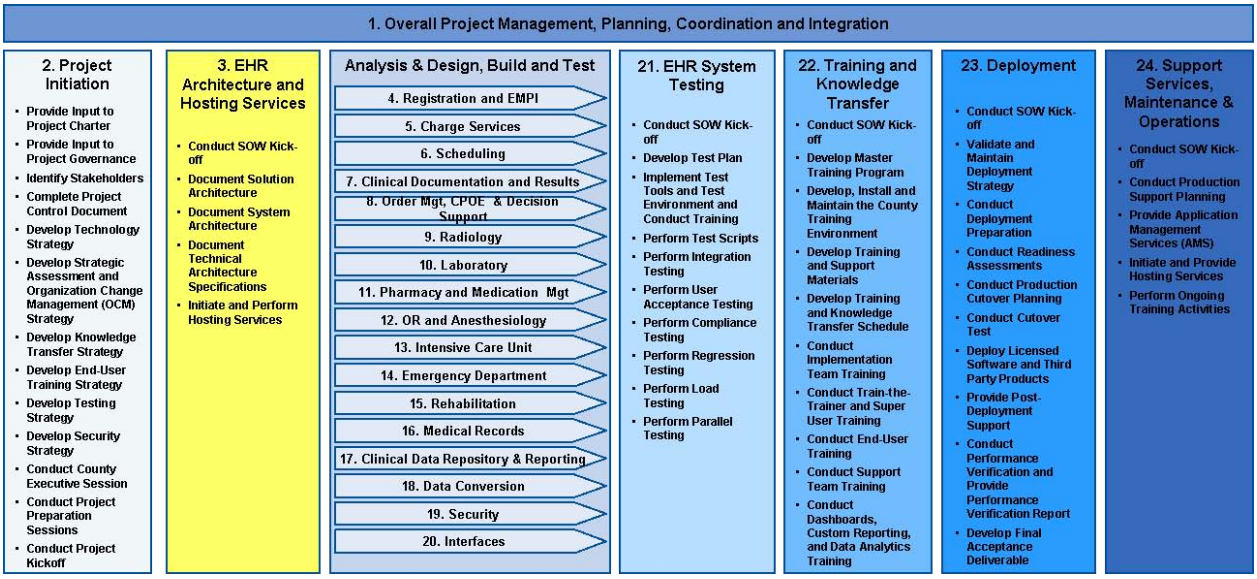
1. Introduction

This Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under this Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW will provide for the solution, system, and technical architecture for all components of the Licensed Software as defined under the Agreement, and for the preparation, initiation, and performance of the Hosting Services Project Plan.

3. SOW Summary

3.1 Overview

This SOW addresses the architecture and Hosting Services required for successful completion of the Project. It describes the work plan and initiation session for this sub-project; documentation of the solution architecture, including the Licensed Software, Third-Party Products, and Hosting Software; documenting the system architecture necessary to meet the current environment, while planning for potential growth; documenting the technical architecture required to build, test, deploy, and maintain the Licensed Software; and development of a plan that identifies tasks, roles, and responsibilities for Hosting Services.

3.2 SOW Team Structure and Resources

Contractor will provide a recommended Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the foregoing, this is a fixed fee engagement and Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides for Deliverables which create the foundation for all SOWs, including this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – The Project timeline is too short to hide difficult messages. Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). This SOW is scheduled to be completed as indicated in the Project Work Plan, and upon Approval by the County Project Director of the Deliverables in this Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table, will be developed as part of the Project Control Document. The detailed durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with this Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation of and conduct of monthly steering committee updates.

Contractor will perform this activity throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County EHR Architecture and Hosting Services SOW Lead**" or "**County SOW Lead**". The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverables set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule; and

(11) Participate in selected Project Status Meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1 Conduct SOW Kick-off	
Subtask 1.1 Develop Sub-Project Work Plan for EHR Architecture and Hosting Services	Deliverable 1.1 Sub-Project Work Plan for EHR Architecture and Hosting Services
Subtask 1.2 Initiation Session for EHR Architecture and Hosting Services Workgroup	Deliverable 1.2 EHR Architecture and Hosting Services Initiation Session (Key Deliverable)
Task 2: Document Solution Architecture	
Subtask 2.1 Document Solution Architecture	Deliverable 2.1 Solution Architecture
Task 3: Document System Architecture	
Subtask 3.1 Document System Architecture	Deliverable 3.1 System Architecture

Task/Subtask Name	Deliverables
Task 4 Document Technical Architecture	
Subtask 4.1 Document Technical Architecture	Deliverable 4.1 Technical Architecture
Task 5: Initiate and Perform Hosting Services	
Subtask 5.1 Prepare Hosting Services Project Plan	Deliverable 5.1 Remote Hosting Services Project Plan
Subtask 5.2 Initiate and Perform Remote Hosting Services for Design, Build, Test, Deployment, and Training	Deliverable 5.2 Remote Hosting Services for Design, Build, Test, Deployment, and Training (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor obligations, which shall be sub-tasks to each individual task. Contractor will:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverable Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project DED as the cover sheet. A template to be used for DEDs during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverables.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings), and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverables for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverables to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverables including, prior to distribution for Approval by County, validation by Contractor that the Deliverables conforms to the Specifications and meets the Acceptance Criteria.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should

be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the Project Schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor will be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-off

Task Description

The team members from Contractor, County, and external stakeholders will be introduced to the work ahead and their specific roles will be described. EHR Architecture and Hosting Services-specific training on the Licensed Software and Third-Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "County EHR Architecture and Hosting Services Workgroup" or "County Workgroup") and the County EHR Architecture and Hosting Services Workgroup will be introduced to Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Resources
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Integration Architect;
  - Contractor Hosting Services Engagement Leader;
  - Contractor Hosting Services System Engineer;
  - Contractor Technical Engagement Leader;
  - AMS Engagement Leader; and
  - Hosting Services Engagement Leader.
- County Key Resources
  - County Project Manager;
  - County EHR Architecture and Hosting Services Workgroup;
  - Technical Lead;
  - DHS CIO; and
  - Facility CIOs.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Work Plan for EHR Architecture and Hosting Services	**Deliverable 1.1 Sub-Project Work Plan for EHR Architecture and Hosting Services**
As part of the Project Control Document, Contractor will develop an overall Project Work Plan. The Project Work Plan will include an EHR Architecture and Hosting Services-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online compatible version of	• EHR Architecture and Hosting Services-specific section of Project Work Plan • Sub-Project Work Plan for EHR Architecture and Hosting Services

Task 1 Conduct SOW Kick-off	
Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks both within this SOW and across all related SOWs and work streams; • Resources (effort hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Approval requirements for each Deliverable; and • Milestones and Key Milestones. Contractor will adapt the EHR Architecture and Hosting Services-specific section of the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) and subject to County Approval.	**Acceptance Criteria:** • The EHR Architecture and Hosting Services-specific section of the Project Work Plan incorporates, and is consistent with, County-provided input. • The EHR Architecture and Hosting Services-specific section of the Project Work Plan addresses all elements described in subtask 1.1 (Develop Detailed Work Plan for EHR Architecture and Hosting Services). • The EHR Architecture and Hosting Services-specific section of the Project Work Plan has been Approved by County. • Timelines detailed in the EHR Architecture and Hosting Services-specific section of the Project Work Plan and sub-Project Work Plans are realistically achievable with reasonable effort as determined by County. • Elements of the EHR Architecture and Hosting Services-specific section of the Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this and other SOWs. • Confirmed availability of Contractor resources required to create the architecture documentation and develop and implement the EHR Architecture and Hosting Services sub-Project Work Plan.
Subtask 1.2 Initiation Session for EHR Architecture and Hosting Services Workgroup Contractor will conduct an EHR Architecture and Hosting Services Initiation Session to provide and introduction to the County Workgroup to the Services covered by this Exhibit A.3 (Architecture Documentation and Hosting Services Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Before the Initiation Session, Contractor will: • Work with County to identify all Contractor and County resources required to complete the tasks outlined in this SOW;	**Deliverable 1.2 EHR Architecture and Hosting Services Initiation Session** • Build EHR Architecture and Hosting Services Initiation Session materials for County review. • Report documenting EHR Architecture and Hosting Services SOW dependencies. • List of County Workgroup members who attended the EHR Architecture and Hosting Services Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • EHR Architecture and Hosting Services

Task 1 Conduct SOW Kick-off	

• Provide County with a roster of EHR Architecture and Hosting Services Initiation Session participants;
• Conduct a Project Management Workshop; and
• Develop an agenda/schedule for the EHR Architecture and Hosting Services Initiation Session.
 	
Contractor will conduct the EHR Architecture and Hosting Services Initiation Session as follows:
• Review and document Licensed Software, Modules, Domains, Venues, and Locations required for delivery of EHR Architecture and Hosting Services;
• Illustrate and document dependencies between this SOW and any other SOWs and Project work streams, including:
  ○ Requirements gathering and functional/technical specifications during System Review, Design Review, and System Validation;
  ○ Testing, including integration testing, peripheral device testing, and user acceptance testing;
  ○ Go-Live readiness assessment; and
  ○ Post-Go-Live assessment.
• Review tasks, Deliverables, and Milestones for the development of EHR Architecture and Hosting Services;
• Train the County Workgroup on the required process and tools used to support Contractor in conducting the current state assessment, purpose and expected outcome of the assessment, and related activities; and
• Provide the County Workgroup with an overview of MethodM including system and design review activities and data collection processes.
 	
After the EHR Architecture and Hosting Services Initiation Session, Contractor will prepare an EHR Architecture and Hosting Services Initiation Session Event Summary Report for review and
	Initiation Session Event Summary Report.
	• Agenda/Schedule for EHR Architecture and Hosting Services Initiation Session.
	• EHR Architecture and Hosting Services presentation materials.
	
	Acceptance Criteria:
	• The EHR Architecture and Hosting Services Initiation Session Event Summary Report from Contractor documenting that the EHR Architecture and Hosting Services Initiation Session (a) has been completed and (b) includes accurate documentation of the content, outcomes, and next steps agreed upon at the EHR Architecture and Hosting Services Initiation Session Event.
	• The EHR Architecture and Hosting Services Initiation Session Event Summary Report has been Approved by County.
	• Report documenting Architecture Documentation and Hosting Services Project Plan SOW dependencies addresses all elements described in subtask 1.2 (Initiation Session for EHR Architecture and Hosting Services Workgroup).
	• Report documenting EHR Architecture and Hosting Services SOW dependencies has been Approved by County.
	• Agreed upon and understood learning objectives for County Workgroup. Contractor evidence that County Workgroup has achieved stated learning objectives required for Project progression according to stated timelines.

Task 1 Conduct SOW Kick-off	
Approval by County.	

Task 2 Document Solution Architecture	
Task Description	
Contractor will identify, define, and document the Licensed Software, Third-Party Products, and Hosting Software solution architecture. Licensed Software solution architecture is defined as an architectural description of all Licensed Software, Third-Party Products, and Hosting Software solution components, including how they are built, the capabilities they provide, and how they Interface with each other and components outside the Licensed Software as described in the subtask below. This description must incorporate multiple architectural viewpoints, including business, information, and technical.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Integration Architect;
  ○ Contractor Hosting Services Engagement Leader;
  ○ Contractor Hosting Services System Engineer; and
  ○ Contractor Technical Engagement Leader.
• County Key Resources
  ○ County Project Manager;
  ○ Technical Lead;
  ○ DHS CIO;
  ○ Facility CIOs; and
  ○ County Enterprise Architect.	

Subtask 2.1 Document Solution Architecture
Contractor will develop a solution architecture that includes:
• Business, information, and technical view of the Licensed Software, Third-Party Products, and Hosting Software including:
  ○ List and description of the functionality of Licensed Software Modules and Third-Party Products, and Hosting Software solution components;
  ○ Information flow across Licensed Software Modules and Third-Party Products, and Hosting Software;
  ○ Modality by which users and administrators will access the system;
  ○ Contractor list of certified devices for accessing Licensed Software Modules and
	Deliverable 2.1 Solution Architecture
	• Solution business architecture document and diagrams.
	• Solution information architecture document and diagrams.
	• Solution technical architecture document and diagrams.
	
	Acceptance Criteria:
	• County Approved solution architecture documentation.

Third-Party Products; and o Special architectural considerations such as: ▪ Storing and retrieving large media files; ▪ Large scale data transfer; and ▪ Down time infrastructure and architecture. • Description of Licensed Software Interfaces with Integral Third-Party Software (if any),Third-Party Products, internal and external systems and components, and end-user and medical devices, whether hard wired, remote access, or mobile. This description will include identification of all clinical data access and entry devices, printers and other peripheral devices in accordance with the requirements of Exhibit A.20 (Interfaces Statement of Work). • Validation of baseline metrics necessary for sizing Licensed Software solution, including: o Number of sites; o User base; o User device types and locations; and o Hardware and bandwidth capacity. Contractor will: • Develop a draft Licensed Software solution architecture; • Conduct a review session with County; • Incorporate County feedback; and • Submit a final version to County for Approval.	

Task 3 Document System Architecture
Task Description
Based on the solution architecture, Contractor will identify, define, and document system architecture specifications. The objective is to design a system architecture that meets current County environment while planning for potential growth and expansion requirements. The system architecture will identify and consider specific technology attributes, such as performance, availability, scalability, and integration when determining the best possible system solution.

Task 3 Document System Architecture	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Integration Architect;
  ○ Contractor Hosting Services Engagement Leader;
  ○ Contractor Hosting Services System Engineer; and
  ○ Contractor Technical Engagement Leader.
• County Key Resources
  ○ County Project Manager; and
  ○ Technical Lead.	

Subtask 3.1 Document System Architecture Contractor will develop system architecture specifications that include: • Information and database architecture; • Application architecture, including 724 Downtime access architecture; • Network architecture; • Interface architecture; • Patient and provider portal architecture; • Network and system monitoring architecture; • Backup and disaster recovery architecture; and • Scalability and capacity planning during deployment and maintenance and operations taking into account County estimates for future expansion. Contractor will: • Develop draft system architecture specifications; • Conduct a review session with County; • Incorporate County feedback; and • Submit a final version to County for Approval.	**Deliverable 3.1 System Architecture** • System architecture document and diagram. **Acceptance Criteria:** • County-Approved system architecture documentation.

Task 4 Document Technical Architecture	
Task Description	
Contractor will document the technical architecture specifications for all hosted environments (e.g., development, test, training, staging, and production) required to build, test, deploy, and maintain the Licensed Software and train users. This will include the specifications for the technical infrastructure to support the Licensed Software, computing environment, and physical network as it relates to the EHR System.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Hosting Services Engagement Leader;
  ○ Contractor Hosting Services System Engineer; and
  ○ Contractor Technical Engagement Leader
 	
• County Key Resources
  ○ County Project Manager;
  ○ Technical Lead; and
  ○ County Enterprise Architect.	

Subtasks/ Deliverables	
Subtask 4.1 Document Technical Architecture Contractor will develop system architecture specifications that include: • Specifications for Contractor-hosted hardware; • Hardware and operating system specifications for County-owned or approved devices; • Requirements for rack space, network infrastructure, power, and physical environment to accommodate Contractor-owned equipment on County premises; and • Physical network and points of demarcation. Contractor will develop technical architecture document and submit to County for Approval.	**Deliverable 4.1 Technical Architecture** • Technical architecture document and diagram. **Acceptance Criteria:** • County-Approved technical architecture documentation.

Task 5 Initiate and Perform Remote Hosting Services
Task Description
Contractor will develop a Remote Hosting Services Plan. This plan will include tasks related to hosting computing services (operations and administration, remote access, database administration) and related support services. Roles and responsibilities related to these tasks will also be identified. Contractor will initiate and perform the tasks set forth in the Remote Hosting Services Plan.

Task 5 Initiate and Perform Remote Hosting Services	
Personnel Requirements	
• Contractor Key Resources ○ Contractor Project Director; ○ Contractor Project Manager; ○ Contractor Integration Architect; ○ Contractor Hosting Services Engagement Leader; ○ Contractor Hosting Services System Engineer; ○ Contractor Technical Engagement Leader; and; ○ AMS Engagement Leader; and • County Key Resources ○ County Project Manager; ○ Technical Lead; and ○ County Help Desk Lead.	
Subtasks/ Deliverables	
Subtask 5.1 Develop Remote Hosting Services Plan Contractor will develop Remote Hosting Services Plan which covers the Project in accordance with the Agreement and Exhibit N (Required Remote Hosted Software Services Terms and Conditions) to the Agreement. The plan will address all tasks required to provide the Hosting Services to build, test, deploy, maintain, and operate and train end-users including: • Approach to determining, monitoring, and validating County capacity needs; • Roles and responsibilities of Contractor and County (e.g., operations and administration, remote access for County super users, database administration, etc.);Support Services for identification and resolution of Errors and for Hosting Error Correction; • Approach to building out the hosted environments during development, test, and deployment of the Licensed Software and Third-Party Products and the training of end-users, including a description of the function of each self-contained hosted environment and the expected timeframe of its availability to users; • Approach to building out the fail over and disaster recovery systems for the Licensed	**Deliverable 5.1 Remote Hosting Services Plan** • Draft Remote Hosting Services Plan. • Final Remote Hosting Services Plan. • Updated Remote Hosting Services Plan. **Acceptance Criteria:** • County Approved Remote Hosting Services Plan. • County Approved updates to Remote Hosting Services Plan.

Task 5 Initiate and Perform Remote Hosting Services	

Software and Third-Party Products;
• Process to test all hosted environments and associated fail over and 724 Downtime Viewer;
• Approach to maintaining the hosted environments current during the Term to respond to technological changes;
• Methodology for monitoring, measuring, and reporting the performance metrics and system accounting information corresponding to the Service Levels consistent with the requirements of subtask 4.7 (Service Level Monitoring and Reporting) of Exhibits A.25 (Deployment Statement of Work) and A.26 (Support Services, Maintenance and Operations Statement of Work);
• Hosting Services security architecture including:
  ○ Federal, State, and County mandated security requirements;
  ○ Contractor Hosting Services security policies;
  ○ HIPAA/HITECH requirements (privacy and security);
  ○ Physical security requirements; and
  ○ Other security requirements specified in Section 20 of the Agreement and Exhibit K (Information Security Requirements).
• County access to lights on network ("**LON**") for performance monitoring.
Contractor will:
• Develop draft Remote Hosting Services Plan;
• Conduct a review session with County during the System Management Workshop;
• Incorporate County feedback;
• Submit a final version to County for Approval;
• Review the Remote Hosting Services Plan after each Cluster deployment and provide County with written recommendations to	

Task 5 Initiate and Perform Remote Hosting Services	
enhance its effectiveness; and • Update Remote Hosting Services Plan after each deployment to accommodate County responses to Contractor's written recommendations.	
Subtask 5.2 Initiate and Perform Remote Hosting Services for Design, Build, Test Deployment, and Training Contractor will initiate and perform the tasks set forth in the Remote Hosting Services Plan and applicable SOWs necessary during all phases of the Project in accordance with the Agreement and Exhibit N (Required Remote Hosting Services Terms and Conditions), including: • Design and build; • Testing; and • Training.	**Deliverable 5.2 Remote Hosting Services for Design, Build, Test Deployment, and Training** • Hosting Services provided in accordance with the Remote Hosting Services Plan, the Agreement, and applicable SOWs. **Acceptance Criteria:** • As set forth in the Agreement and applicable SOWs.

Exhibit A.4 (Registration and Enterprise Master Patient Index

(EMPI) Statement Of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

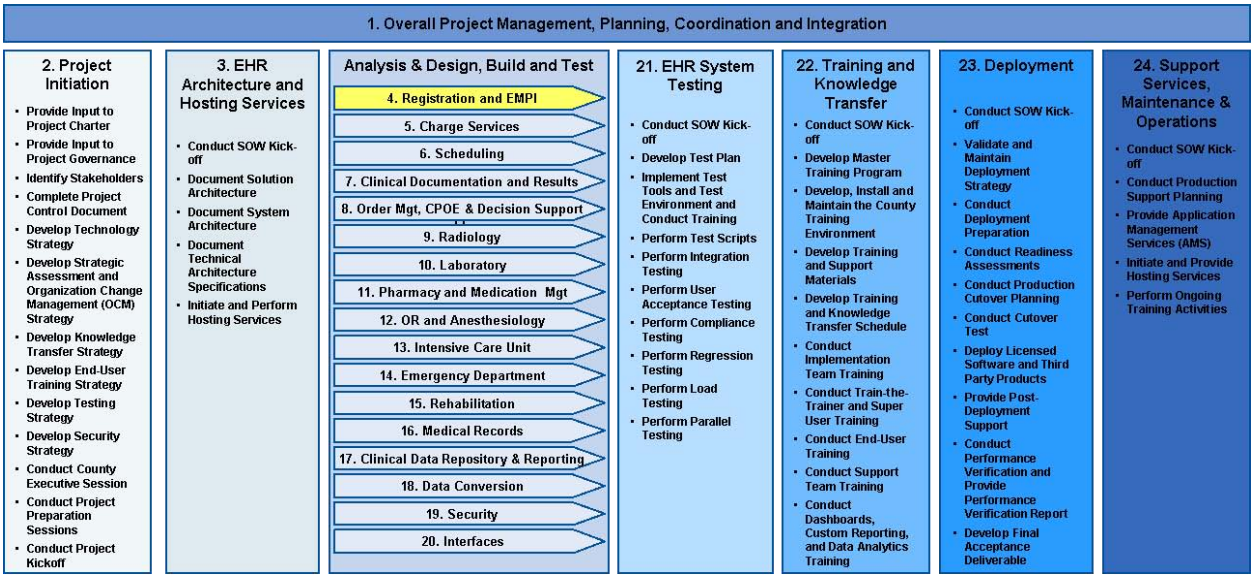
1. Introduction

This Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver registration and the Enterprise Master Patient Index ("EMPI") as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of registration and EMPI, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Access Management – Contractor Enterprise Master Person Index
- Access Management – Contractor Registration Management

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone)

Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Registration and Enterprise Master Patient Index (EMPI) SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Registration and Enterprise Master Patient Index (EMPI)	Deliverable 1.1 SOW Sub-Project Work Plan - Registration and Enterprise Master Patient Index (EMPI)
Subtask 1.2 Conduct Initiation Session for Registration and Enterprise Master Patient Index (EMPI) Workgroup	Deliverable 1.2 Registration and Enterprise Master Patient Index (EMPI) Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection

Tasks/Subtasks	Deliverables
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop	Deliverable 4.4 Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Registration and Enterprise Master Patient Index (EMPI)
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project

Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Registration and Enterprise Master Patient Index (EMPI)-specific training on the Licensed Software and Third Party Products will be provided for the County personnel

working on this SOW (referred to in this Exhibit as the "**County Registration and Enterprise Master Patient Index (EMPI) Workgroup**" or "**County Workgroup**") and the County Registration and Enterprise Master Patient Index (EMPI) Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Registration and Enterprise Master Patient Index (EMPI) Architect;
  - Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County Registration and Enterprise Master Patient Index (EMPI) SOW Lead;
  - County Registration and Enterprise Master Patient Index (EMPI) Workgroup;
  - County Transformation Lead;
  - County Registration and Enterprise Master Patient Index (EMPI) Analyst;
  - County Project Director;
  - County Project Manager; and
  - County Integration Architect.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – Registration and Enterprise Master Patient Index (EMPI) As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Registration and Enterprise Master Patient Index (EMPI)-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable;	**Deliverable 1.1 Registration and Enterprise Master Patient Index (EMPI) Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Registration and Enterprise Master Patient Index (EMPI) specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Registration and Enterprise Master Patient Index (EMPI)-specific sub-Project Work Plan.

• County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for Registration and Enterprise Master Patient Index (EMPI) Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.4 (Registration and Enterprise Master Patient Index (EMPI) Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Registration and Enterprise Master Patient Index (EMPI) capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Registration and Enterprise Master Patient Index (EMPI) functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises.	**Deliverable 1.2 Registration and Enterprise Master Patient Index (EMPI) Initiation Session** • Registration and Enterprise Master Patient Index (EMPI) Initiation Session materials for County review one (1) week prior to the Registration and Enterprise Master Patient Index (EMPI) Initiation Session. • Initial list of County Domains, Venues and Locations for which Registration and Enterprise Master Patient Index (EMPI) capabilities must be delivered for review during Registration and Enterprise Master Patient Index (EMPI) Initiation Session. • Demonstration of Registration and Enterprise Master Patient Index (EMPI) functionality. • List of County Workgroup members who attended the Registration and Enterprise Master Patient Index (EMPI) Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Registration and Enterprise Master Patient Index (EMPI) Initiation Session and other County

• Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Registration and Enterprise Master Patient Index (EMPI) Initiation Session. • Registration and Enterprise Master Patient Index (EMPI) Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Registration and Enterprise Master Patient Index (EMPI) Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Registration and Enterprise Master Patient Index (EMPI) Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants.

exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County

	personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	
• Contractor Key Employees ○ Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant; ○ Contractor Solution Architect; and ○ Contractor Clinical Strategist. • County Key Employees ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Lead; ○ County Registration and Enterprise Master Patient Index (EMPI) Analyst; ○ County Registration and Enterprise Master Patient Index (EMPI) Workgroup; and ○ County Registration and Enterprise Master Patient Index (EMPI) SMEs.	
Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is

Task 2 Conduct Current State Assessment	
the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Registration and Enterprise Master Patient Index (EMPI) workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. At a minimum, the assessment must: • Distinguish between different registration processes (e.g., centralized vs. decentralized; quick registration vs. regular registration vs. disaster registration; inpatient vs. outpatient). • Identify the interrelationships between EMPI and Registration workflows, other clinical and administrative workflows (e.g., nursing, documentation, finance), and workflows that are external to DHS (e.g., external payers). • Identify staffing that supports existing workflows. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed.	**Deliverable 2.2 Workflow Assessment** • Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. • Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. • Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** • Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. • County reviewed and Approved findings.

Task 2 Conduct Current State Assessment	
Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	

Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities
 	
Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software including use of relevant devices such as registration kiosks and other smart devices, using Best Practices, and capabilities provided by the Registration and Enterprise Master Patient Index (EMPI) components, the Contractor knowledge base, and expertise of Contractor SMEs.
 	
Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation.
 	
Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.
	Deliverable 2.3 Risk and Opportunities Documentation
	
	• Workflow assessment report including completed OWA tool and identified risks and opportunities report.
	
	• Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving:
	  ○ Efficiency;
	  ○ Patient safety;
	  ○ Quality of care; and
	  ○ Patient experience.
	
	• Recommendations for improved processes to manage Enterprise Master Patient Index (EMPI).
	
	• Documented County-Approved metrics to be utilized to determine success.
	
	• Recommendations for identifying implications with other workflows.
	
	• Recommendations for identifying industry best practices.
	
	• Documented risks.
	
	Acceptance Criteria:
	
	• County Approval of the Risk and Opportunities Documentation.
	
	• County acknowledgement that originally defined areas of workflow assessment have been accurately assessed.

Task 2 Conduct Current State Assessment	
	• Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Lead
  ○ County Registration and Enterprise Master Patient Index (EMPI) Analyst
  ○ County Registration and Enterprise Master Patient Index (EMPI) Workgroup
  ○ County Registration and Enterprise Master Patient Index (EMPI) SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation).

Task 3 Conduct System Review	
expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Registration and EMPI Demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Registration and Enterprise Master Patient Index (EMPI) Workgroup Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and	• List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Registration and Enterprise Master Patient Index (EMPI) Workgroup. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in

Task 3 Conduct System Review	
Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track.	**Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Registration and Enterprise Master Patient Index (EMPI) covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County Registration and Enterprise Master Patient Index (EMPI) SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Registration and Enterprise Master Patient Index (EMPI) process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Registration and Enterprise Master Patient Index (EMPI) process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Registration and Enterprise Master Patient Index (EMPI) processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary

Task 3 Conduct System Review	

quality of data collected if needed.
• Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM
• Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Registration and Enterprise Master Patient Index (EMPI).
• Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	level of detail on schedule.
	• Contractor Delivery Consultant support through ad hoc calls and e-mails.
	• Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation.
	• Documented decisions made related to DDM and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Registration and Enterprise Master Patient Index (EMPI) Lead Analyst;
  ○ County Registration and Enterprise Master Patient Index (EMPI) Analyst; and
  ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting

Task 4 Conduct Design Review	
solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Registration and Enterprise Master Patient Index (EMPI). • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Registration and Enterprise Master Patient Index (EMPI) and other related SOWs to date	interdependencies between Registration and Enterprise Master Patient Index (EMPI) workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Registration and Enterprise Master Patient Index (EMPI) data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after	

Task 4 Conduct Design Review	
the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Registration and Enterprise Master Patient Index (EMPI). • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Registration and Enterprise Master Patient Index (EMPI). • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues

Task 4 Conduct Design Review	
completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Registration and Enterprise Master Patient Index (EMPI)	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Registration and Enterprise Master Patient Index (EMPI) processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified

Task 4 Conduct Design Review	
workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams covering the complete range of Registration and Enterprise Master Patient Index (EMPI) processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Registration and Enterprise Master Patient Index (EMPI); ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Registration and Enterprise Master Patient Index (EMPI) downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations	benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Registration and Enterprise Master Patient Index (EMPI) downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location.

Task 4 Conduct Design Review	
as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	• Suggested changes are achievable within County's resource constraints.
Subtask 4.4 Conduct Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop Contractor will conduct Registration and Enterprise Master Patient Index (EMPI) Workflow Workshops as needed in which the future state workflows for Registration and Enterprise Master Patient Index (EMPI) will be demonstrated to County and decisions required for the design of Registration and Enterprise Master Patient Index (EMPI) functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Registration and Enterprise Master Patient Index (EMPI). • Discuss the key decision points related to automation of capture and management of Registration and Enterprise Master Patient Index (EMPI).	**Deliverable 4.4 Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop** • Agenda/Schedule for Registration and Enterprise Master Patient Index (EMPI)Workflow Workshops. • Attendance sheet/roster of participants for Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop (agenda and presentation). • List of materials for Registration and Enterprise Master Patient Index (EMPI) Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback.

Task 4 Conduct Design Review	
• Document the key design decisions and desired outcomes related to Registration and Enterprise Master Patient Index (EMPI) in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Registration and Enterprise Master Patient Index (EMPI) in the DDMs. • Compare and contrast design elements for Registration and Enterprise Master Patient Index (EMPI) and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Registration and Enterprise Master Patient Index (EMPI) Domain. • At the end of the Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop, Contractor will draft and finalize the Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop Event Summary Report.	• Registration and Enterprise Master Patient Index (EMPI) Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Registration and Enterprise Master Patient Index (EMPI). **Acceptance Criteria:** • County-Approved Registration and Enterprise Master Patient Index (EMPI) Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions. • County-Approved updated downtime strategies for Registration and EMPI.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Registration and Enterprise Master Patient Index (EMPI) Licensed Software build based on the data collected and decisions made during the design review and workflow	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams.

Task 4 Conduct Design Review	
localization. The Registration and Enterprise Master Patient Index (EMPI) final Detailed Design Document shall include documentation on all design decisions, including: • List of all Domains, Venues, and Locations included in the Registration EMPI Final Design Document; • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Registration and Enterprise Master Patient Index (EMPI) Analyst; and

Task 5 Complete Initial Partial System Build	
○ County Registration and Enterprise Master Patient Index (EMPI) SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Registration and Enterprise Master Patient Index (EMPI) processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Registration and Enterprise Master Patient Index (EMPI). Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation
Task Description
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed,

Task 6 Conduct System Validation

will produce an integrated solution that meets the needs of County Registration and Enterprise Master Patient Index (EMPI) and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Registration and Enterprise Master Patient Index (EMPI) Licensed Software.

Personnel Requirements

- Contractor Key Employees
  - Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect.
- County Key Employees
  - County Registration and Enterprise Master Patient Index (EMPI) SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Registration and Enterprise Master Patient Index (EMPI) Analyst;
  - County Registration and Enterprise Master Patient Index (EMPI) SOW Workgroup; and
  - County Registration and Enterprise Master Patient Index (EMPI) SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/Deliverables

Subtask 6.1 System Validation Session

Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

The objectives of the session are to:

- Provide an in-depth demonstration of the solution and build to date using County's Domain.
- Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing.
- Begin development of County-specific unit and system test scripts.

Deliverable 6.1 System Validation

- System Validation Session (agenda and presentation).
- Library of sample Unit and System Test scripts to be adapted for County.
- System Validation Session Event Summary Report for Registration and Enterprise Master Patient Index (EMPI) Licensed Software including Issues Log.
- Updated DCWs in MethodM Online.
- Build Audit Report (comparison between DCW and built Domain).
- Updated DDM in MethodM Online.
- Updated Project documents.

Acceptance Criteria:

- County verification that System Validation Session Event Summary Report includes

Task 6 Conduct System Validation	
• Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Registration and Enterprise Master Patient Index (EMPI) reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Registration and Enterprise Master Patient Index (EMPI) Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs	accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
and DCWs. • Provide samples of Registration and Enterprise Master Patient Index (EMPI) Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Registration and Enterprise Master Patient Index (EMPI) Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing,

Task 6 Conduct System Validation	
• Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Registration and Enterprise Master Patient Index (EMPI) Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect;

Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) and Conduct System and Unit Testing	
○ Contractor Integration Architect; and ○ Contractor Test Lead. • County Key Employees ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Lead; ○ County Project Director; ○ County Project Manager; ○ County Registration and Enterprise Master Patient Index (EMPI); and ○ County Registration and Enterprise Master Patient Index (EMPI) SOW Workgroup.	
Subtasks/Deliverables	
Subtask 7.1 Complete System Build Contractor will iteratively build Registration and Enterprise Master Patient Index (EMPI) Licensed Software functionality and content until the full build of Registration and Enterprise Master Patient Index (EMPI) content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions.	**Deliverable 7.1 Complete System Build for Registration and Enterprise Master Patient Index (EMPI)** • Release Schedule. • Iterative releases of Registration and Enterprise Master Patient Index (EMPI) Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Registration and Enterprise Master Patient Index (EMPI) Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Registration and Enterprise Master Patient Index (EMPI) builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) and Conduct System and Unit Testing	
• Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Registration and Enterprise Master Patient Index (EMPI) Licensed Software has been fully configured to include all DDMs and DCWs related to Registration and Enterprise Master Patient Index (EMPI).	
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online. • Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released. • Address identified Omissions as follows: ○ Document and verify the requirements to address the Omission in a consistent and	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the documented omission specifications. • County-Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) and Conduct System and Unit Testing	
structured format; ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released; ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Registration and Enterprise Master Patient Index (EMPI) build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Registration	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Registration and Enterprise Master Patient Index (EMPI) Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Registration and Enterprise Master Patient Index (EMPI) Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Registration and Enterprise

Task 7 Complete Build of Registration and Enterprise Master Patient Index (EMPI) and Conduct System and Unit Testing	
and Enterprise Master Patient Index (EMPI) build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	Master Patient Index (EMPI) Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.5 (Charge Services Statement of Work)

to the

Electronic Health Records System and Services Agreement

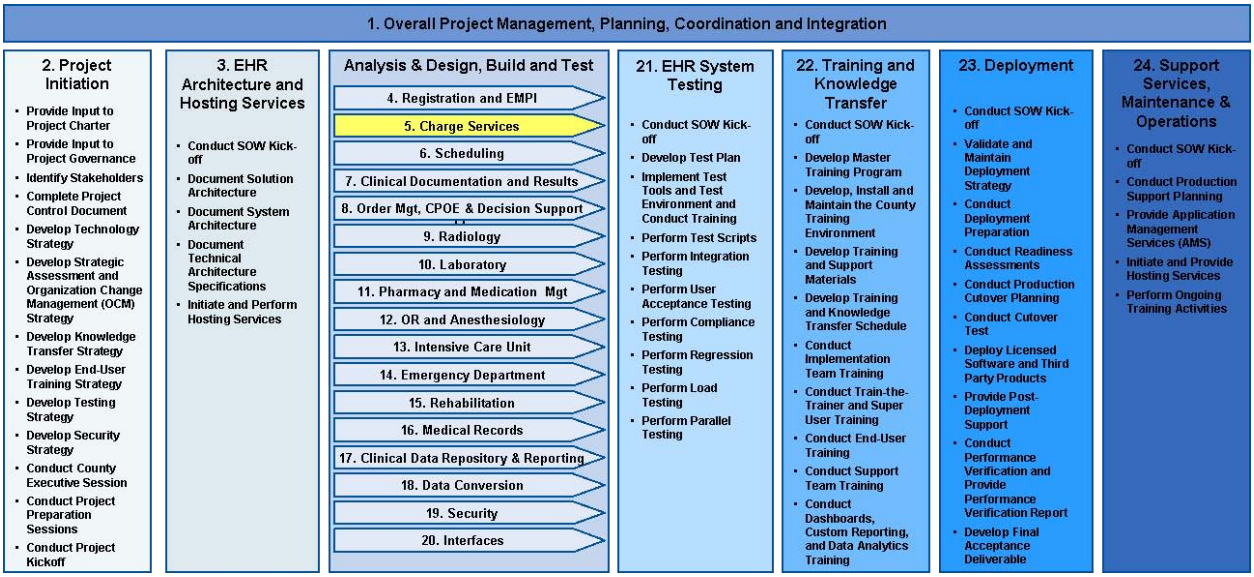
Table of Contents

1. Introduction

This Exhibit A.5 (Charge Services Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.5 (Charge Services Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum. This is Exhibit A.5 (Charge Services Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c)

recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Charge Services as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Charge Services, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Charge Services

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.5 (Charge Services Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.5 (Charge Services Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in

writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the " **Contractor Charge Services Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Charge Services SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Charge Services	Deliverable 1.1 SOW Sub-Project Work Plan - Charge Services
Subtask 1.2 Conduct Initiation Session for Charge Services Workgroup	Deliverable 1.2 Charge Services Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Charge Services Workflow Workshop	Deliverable 4.4 Charge Services Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)

Tasks/Subtasks	Deliverables
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Charge Services Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Charge Services
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Charge Services-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Charge Services Workgroup**" or "**County Workgroup**") and the County Charge Services Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Charge Services Architect;
  ○ Contractor Charge Services Delivery Consultant;
  ○ Integration Architect; and
  ○ Clinical Strategist.
• County Key Employees
  ○ County Charge Services SOW Lead;
  ○ County Charge Services Workgroup;
  ○ County Transformation Lead;
  ○ County Charge Services Analyst;

○ County Project Director; ○ County Project Manager; and ○ County Integration Architect.	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Charge Services As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Charge Services -specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.5 (Charge Services Statement of Work) and subject to County Approval**.**	**Deliverable 1.1 Charge Services Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Charge Services specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Charge Services-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Charge Services Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.5 (Charge Services Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues,	**Deliverable 1.2 Charge Services Initiation Session** • Charge Services Initiation Session materials for County review one (1) week prior to Charge Services Initiation Session. • Initial list of County Domains, Venues and Locations for which Charge Services capabilities must be delivered for review during Charge Services Initiation Session. • Demonstration of Charge Services functionality.

and Locations for which Charge Services capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Charge Services functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure	• List of County Workgroup members who attended the Charge Services Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Charge Services Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Charge Services Initiation Session. • Charge Services Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Charge Services Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Charge Services Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County.

observable progress, or lack thereof, in using that knowledge in completing implementation tasks.
During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan.
Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.
	• Weekly updates demonstrate that, on an ongoing basis:
	  ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and
	  ○ Additional training is appropriate to achieve remediation for identified deficiencies.
	• Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals.
	• Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks.
	• Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts.
	• Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved.
	• Approval by County of County Workgroup readiness to use training tools.
	• County SOW Lead Approval of updated learning objectives.
	• Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements
• Contractor Key Employees   ○ Contractor Charge Services Delivery Consultant;

Task 2 Conduct Current State Assessment	
○ Contractor Solution Architect; and ○ Contractor Clinical Strategist. ● County Key Employees ○ County Charge Services SOW Lead; ○ County Charge Services Analyst; ○ County Charge Services Workgroup; and ○ County Charge Services SMEs.	
Subtasks/Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** ● List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** ● List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. ● County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current charge capture and charge management workflow processes, the charge description master, and its usage (County-wide and facility or department-specific) at the minimum level necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool, and other charge management tools. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated.	**Deliverable 2.2 Workflow Assessment** ● Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County.

Task 2 Conduct Current State Assessment	
Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	**Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Charge Services components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage the charge capture. ● Recommendations for charge master consolidation. ● Documented County-Approved metrics to be utilized to determine success. ● Recommendations for identifying implications with other workflows. ● Recommendations for identifying industry best practices. ● Documented risks. **Acceptance Criteria:** ● County Approval of the Risk and

Task 2 Conduct Current State Assessment	
	Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Charge Services Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Charge Services SOW Lead
  ○ County Charge Services Workgroup
  ○ County Charge Services SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor.	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and

Task 3 Conduct System Review	
Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Charge Services demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Charge Services Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel	presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Charge Services. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps,

Task 3 Conduct System Review	
to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by County personnel.	and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Charge Services covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
• Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County. Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice charge master process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice charge master process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the charge processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback

Task 3 Conduct System Review	
decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the charge processes. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable. • Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead. • Weekly calls and/or meetings of at least sixty (60) minutes will: o Discuss progress compared to timelines documented in the Project Work Plan; and o Identify issues with data collection (risks, quality, etc.) and escalate as appropriate. • Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.	on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process. • County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review). • Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document

Task 4 Conduct Design Review

County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Charge Services Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Charge Services Lead Analyst; and
  - County Charge Services SOW Workgroup.

Subtask 4.1 Conduct Design Review Session

The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants.

During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

During the Design Review Session, Contractor will:

- Demonstrate the workflow of the relevant solutions/Licensed Software modules.
- Review data collection materials and/or data received in DCWs.
- Review and confirm the completeness and acceptability of design decisions.
- Review, discuss, and confirm integration

Deliverable 4.1

- List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials).
- Completed and Contractor-confirmed DCWs.
- Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration.
- Updated versions of the DDM and DCWs based on design review feedback.
- Design Review Session Event Summary Report and issues log.
- Approved assignments and schedule for tasks to be completed in preparation for system validation task.
- Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution.
- Data flow and workflow diagram depicting interdependencies between Charge Services workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers).

Task 4 Conduct Design Review	
decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Charge Services. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Charge Services and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials	**Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Charge Services data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	

Task 4 Conduct Design Review	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Charge Services. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Charge Services. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion.

Task 4 Conduct Design Review	
(on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	**Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Charge Services workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: o Future State Workflow Diagrams covering the complete range of Charge Services processes impacted by the Licensed Software and with attention to	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Charge Services processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.

Task 4 Conduct Design Review	
interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating the Charge Master; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Charge Services downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated	● Recommendations for Charge Services downtime strategies and documentation, including samples based on County build of Licensed Software. ● Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** ● County Approved Workflow Localization Documents. ● Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. ● Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. ● Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. ● Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Charge Services Workflow Workshop Contractor will conduct Charge Services Workflow Workshops as needed in which the future state workflows for Charge Services will be demonstrated to County and decisions required for the design of Charge Services functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Charge Services. • Discuss the key decision points related to automation of capture and management of Charge Services. • Document the key design decisions and desired outcomes related to Charge Services in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Charge Services in the DDMs. • Compare and contrast design elements for Charge Services and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are	**Deliverable 4.4 Charge Services Workflow Workshop** • Agenda/Schedule for Charge Services Workflow Workshops. • Attendance sheet/roster of participants for Charge Services Workshop (agenda and presentation). • List of materials for Charge Services Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Charge Services Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Charge Services. **Acceptance Criteria:** • County-Approved Charge Services Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
outstanding. • Refine and augment downtime strategy for Charge Services Domain. • At the end of the Charge Services Workflow Workshop, Contractor will draft and finalize the Charge Services Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Charge Services Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Charge Services final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;

Task 5 Complete Initial Partial System Build	
○ Contractor Charge Services Delivery Consultant; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect; • County Key Employees ○ County Charge Services SOW Lead; ○ County Project Director; ○ County Project Manager; ○ County Charge Services Analyst; and ○ County Charge Services SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and charge capture and management processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Charge Services. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and

Task 5 Complete Initial Partial System Build	
	DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Charge Services and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Charge Services Licensed Software.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Charge Services Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Charge Services SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Charge Services Analyst;
  ○ County Charge Services SOW Workgroup; and
  ○ County Charge Services SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Charge Services Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents.

Task 6 Conduct System Validation	
Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Charge Services reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Charge Services Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County.	**Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Charge Services Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Charge Services Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing,

Task 6 Conduct System Validation	
• Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Charge Services and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Charge Services Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect;
  ○ Contractor Integration Architect; and
  ○ Contractor Test Lead.

Task 7 Complete Build of Charge Services and Conduct System and Unit Testing

- County Key Employees
  - County Charge Services SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Charge Services Analyst; and
  - County Charge Services SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Charge Services Licensed Software functionality and content until the full build of Charge Services content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Provide test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Report weekly on progress toward Complete Build, and alert County of any issues or risks.
- Notify County when the Charge Services Licensed Software has been fully configured

Deliverable 7.1 Complete System Build for Charge Services

- Release Schedule.
- Iterative releases of Charge Services Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release.
- Complete Build of Charge Services Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Charge Services builds meet specifications as documented in the final Detailed Design Document.

<table>
<tr><th colspan="2">Task 7 Complete Build of Charge Services and Conduct System and Unit Testing</th></tr>
<tr><td>to include all DDMs and DCWs related to Charge Services.</td><td></td></tr>
<tr><td>Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests
As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software (“Omissions”).
Contractor will:
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
o Document and verify the requirements to address the Omission in a consistent and structured format;
o Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
o Escalate all Omissions which will have</td><td>Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests
• Updated Release Schedules.
• Specifications for requested additions of content and functionality.
• Defect resolution document describing identified defects and Omissions which have been resolved.
• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
• Implementation of defect resolutions and County-Approved change requests.
• Gateway criteria for Unit and System Test completion.

Acceptance Criteria:
• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
• County validation that Approved changes to address Omissions fully address the documented omission specifications.
• County Approved gateway criteria for unit and system test completion.</td></tr>
</table>

Task 7 Complete Build of Charge Services and Conduct System and Unit Testing	
impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Charge Services build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Charge Services build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Charge Services Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Charge Services Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Charge Services Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain,

Task 7 Complete Build of Charge Services and Conduct System and Unit Testing	
	but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.6 (Scheduling Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

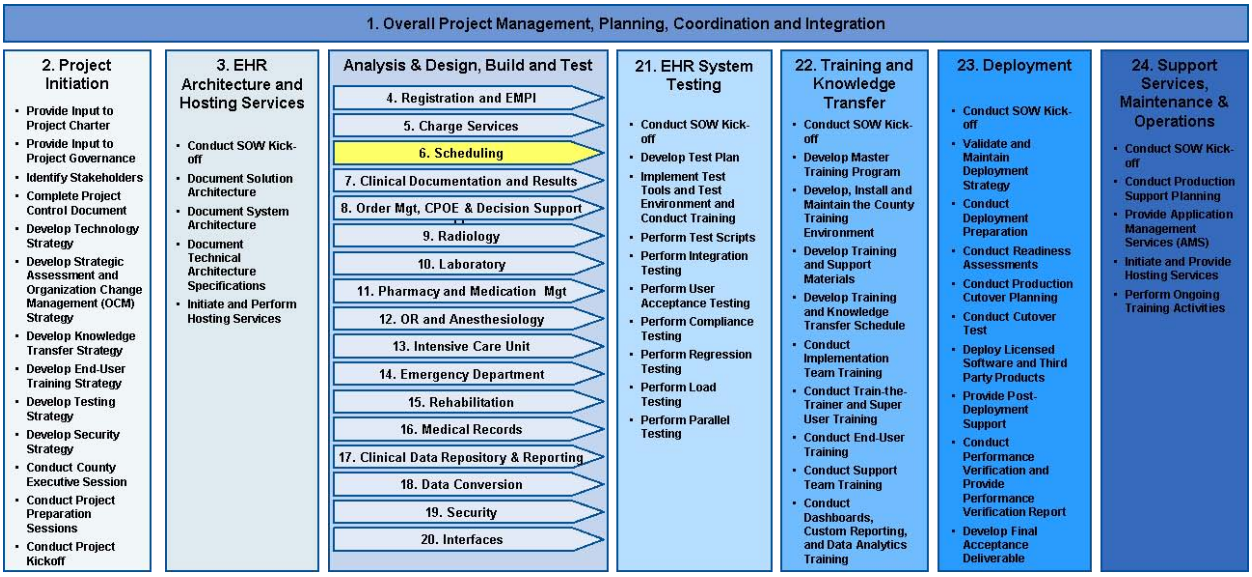
1. Introduction

This Exhibit A.6 (Scheduling Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.6 (Scheduling Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.6 (Scheduling Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver scheduling as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of scheduling functionality, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Scheduling Management
- Enhanced Medical Necessity Content (Acute Care or Ambulatory)

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a

fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined –Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.6 (Scheduling Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.6 (Scheduling Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific

Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Scheduling Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Scheduling SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Scheduling	Deliverable 1.1 SOW Sub-Project Work Plan - Scheduling
Subtask 1.2 Conduct Initiation Session for Scheduling Workgroup	Deliverable 1.2 Scheduling Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Scheduling Workflow Workshop	Deliverable 4.4 Scheduling Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)

Tasks/Subtasks	Deliverables
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Scheduling Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Scheduling
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off/Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Clinical Documentation and Results-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Scheduling Workgroup**" or "**County Workgroup**") and the County Scheduling Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Scheduling Architect;
  ○ Contractor Scheduling Delivery Consultant;
  ○ Integration Architect; and
  ○ Clinical Strategist.
• County Key Employees
  ○ County Scheduling SOW Lead;
  ○ County Scheduling Workgroup;
  ○ County Transformation Lead;
  ○ County Scheduling Analyst;

○ County Project Director; ○ County Project Manager; and ○ County Integration Architect	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Scheduling As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Scheduling-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.6 (Scheduling Statement of Work) and subject to County Approval**.**	**Deliverable 1.1 Scheduling Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Scheduling specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Scheduling-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Scheduling Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.6 (Scheduling Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Scheduling	**Deliverable 1.2 Scheduling Initiation Session** • Scheduling Initiation Session materials for County review one (1) week prior to Scheduling Initiation Session. • Initial list of County Domains, Venues and Locations for which Clinical Documentation and Results capabilities must be delivered for review during Scheduling Initiation Session. • Demonstration of Clinical Documentation and Results functionality. • List of County Workgroup members who

capabilities will be triggered and utilized within County (e.g., disciplines, departments, service lines, ambulatory, inpatient, appointment reminders, patient-driven vs. order-driven Scheduling, etc.) • Demonstrate Scheduling functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure	attended the Scheduling Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Scheduling Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Scheduling Initiation Session. • Scheduling Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Scheduling Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Scheduling Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an

observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements
• Contractor Key Employees ○ Contractor Scheduling Delivery Consultant; ○ Contractor Solution Architect; and ○ Contractor Clinical Strategist.

Task 2 Conduct Current State Assessment	

• County Key Employees
  ○ County Scheduling SOW Lead;
  ○ County Scheduling Analyst;
  ○ County Scheduling Workgroup; and
  ○ County Scheduling SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Contractor will provide County with a recommended list of other SOWs that require Scheduling functionality. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Subtask 2.2 Conduct Workflow Assessment
In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Scheduling workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows.
Contractor will document the assessment in the template-based structured OWA tool.
Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated.
Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed (e.g., order management, clinical documentation,
	Deliverable 2.2 Workflow Assessment
	• Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to:
	  ○ Worksheets;
	  ○ Recommended workflows; and
	  ○ Key County requirements.
	• Documented interrelationships with other SOW workflows (e.g., order management, clinical documentation, registration) that need to be recognized and addressed.
	• Workflows documented in sufficient detail to permit Contractor to:
	  ○ Compare to Best Practices; and
	  ○ Identify risks and opportunities as determined by County.
	
	Acceptance Criteria:
	• Reviewed and finalized OWA posted on MethodM Online capturing the agreed

Task 2 Conduct Current State Assessment	
registration, and medical records). Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	workflow processes at the agreed level of detail. • County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Scheduling components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** • Workflow assessment report including completed OWA tool and identified risks and opportunities report. • Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: o Efficiency; o Patient safety; o Quality of care; and o Patient experience. • Recommendations for improved processes to manage Scheduling. • Recommendations for enterprise-wide Scheduling. • Recommendations for converting from current paper-based systems. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation.

Task 2 Conduct Current State Assessment	
	• County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Scheduling Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ Contractor Project Manager;
  ○ County Integration Architect;
  ○ County Scheduling SOW Lead
  ○ County Scheduling Workgroup
  ○ County Scheduling SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System

Task 3 Conduct System Review	
expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Scheduling demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Conduct a Scheduling demonstration for patient-initiated and provider-initiated appointments. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Scheduling Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and	Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Scheduling. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track.

Task 3 Conduct System Review	
Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by	**Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Scheduling covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Scheduling process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Scheduling process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Scheduling processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback

Task 3 Conduct System Review	
decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on Scheduling. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable. • Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead. • Weekly calls and/or meetings of at least sixty (60) minutes will: o Discuss progress compared to timelines documented in the Project Work Plan; and o Identify issues with data collection (risks, quality, etc.) and escalate as appropriate. • Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.	on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process. • County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review). • Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document

Task 4 Conduct Design Review

County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Scheduling Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Scheduling Lead Analyst; and
  - County Scheduling SOW Workgroup.

Subtask 4.1 Conduct Design Review Session

The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants.

During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

During the Design Review Session, Contractor will:

- Demonstrate the workflow of the relevant solutions/Licensed Software modules.
- Review data collection materials and/or data received in DCWs.
- Review and confirm the completeness and acceptability of design decisions.
- Review, discuss, and confirm integration decisions with respect to Licensed Software

Deliverable 4.1

- List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials).
- Completed and Contractor-confirmed DCWs.
- Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration.
- Updated versions of the DDM and DCWs based on design review feedback.
- Design Review Session Event Summary Report and issues log.
- Approved assignments and schedule for tasks to be completed in preparation for system validation task.
- Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution.
- Data flow and workflow diagram depicting interdependencies between Scheduling workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers).

Task 4 Conduct Design Review	
Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Clinical Documentation and Results. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Scheduling and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs.	**Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Scheduling data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings.

Task 4 Conduct Design Review	
Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Scheduling. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project	• Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Scheduling. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs.

Task 4 Conduct Design Review	
Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	• County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Scheduling workflow localization Deliverables and OWAs from other SOWs, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: o Future State Workflow Diagrams covering the complete range of Scheduling processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems (e.g., eConsult, i2i); o A list and examples of policies and procedures that will need to be created or revised;	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Scheduling processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Scheduling downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to

Task 4 Conduct Design Review	
○ Processes for maintaining and updating Scheduling templates; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Scheduling downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the	what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
workflow localization Deliverables.	
Subtask 4.4 Conduct Scheduling Workflow Workshop Contractor will conduct Scheduling Workflow Workshops as needed in which the future state workflows for Scheduling will be demonstrated to County and decisions required for the design of Scheduling functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Scheduling. • Discuss the key decision points related to automation of capture and management of Clinical Documentation and Results. • Document the key design decisions and desired outcomes related to Scheduling in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Clinical Documentation and Results in the DDMs. • Compare and contrast design elements for Scheduling and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Scheduling Domain. • At the end of the Scheduling Workflow Workshop, Contractor will draft and finalize the Scheduling Workflow Workshop Event Summary Report.	**Deliverable 4.4 Scheduling Workflow Workshop** • Agenda/Schedule for Scheduling Workflow Workshops. • Attendance sheet/roster of participants for Scheduling Workflow Workshop (agenda and presentation). • List of materials for Scheduling Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Scheduling Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Scheduling. **Acceptance Criteria:** • County-Approved Scheduling Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Scheduling Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Scheduling final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Scheduling Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Scheduling SOW Lead;
  ○ County Project Director;

Task 5 Complete Initial Partial System Build	
○ County Project Manager; ○ County Scheduling Analyst; and ○ County Scheduling SOW Workgroup.	
Subtasks/Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines (e.g., departments, service lines, ambulatory, inpatient, appointment reminders, patient-driven vs. order-driven Scheduling), and Scheduling processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Scheduling. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation

Task Description

Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Scheduling and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Scheduling Licensed Software.

Personnel Requirements

- Contractor Key Employees
  - Contractor Scheduling Delivery Consultant;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect.
- County Key Employees
  - County Scheduling SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Scheduling Analyst;
  - County Scheduling SOW Workgroup; and
  - County Scheduling SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/Deliverables

Subtask 6.1 System Validation Session

Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

The objectives of the session are to:

- Provide an in-depth demonstration of the solution and build to date using County's Domain.
- Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing.
- Begin development of County-specific unit

Deliverable 6.1 System Validation

- System Validation Session (agenda and presentation).
- Library of sample Unit and System Test scripts to be adapted for County.
- System Validation Session Event Summary Report for Scheduling Licensed Software including Issues Log.
- Updated DCWs in MethodM Online.
- Build Audit Report (comparison between DCW and built Domain).
- Updated DDM in MethodM Online.
- Updated Project documents.

Acceptance Criteria:

- County verification that System Validation Session Event Summary Report includes

Task 6 Conduct System Validation	
and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Scheduling reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Scheduling Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Scheduling Unit and System Test scripts (including test script for	accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Scheduling Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live.

Task 6 Conduct System Validation	
development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Scheduling and Conduct System and Unit Testing	
Task Description	
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.	
Personnel Requirements	
• Contractor Key Employees o Contractor Project Director; o Contractor Project Manager; o Contractor Scheduling Delivery Consultant; o Contractor Clinical Strategist; o Contractor Solution Architect; o Contractor Integration Architect; and o Contractor Test Lead. • County Key Employees o County Scheduling SOW Lead; o County Scheduling Analyst; and o County Scheduling SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 7.1 Complete System Build Contractor will iteratively build Scheduling	**Deliverable 7.1 Complete System Build for Scheduling**

Task 7 Complete Build of Scheduling and Conduct System and Unit Testing	
Licensed Software functionality and content until the full build of Scheduling content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Scheduling Licensed Software has been fully configured to include all DDMs and DCWs related to Scheduling.	• Release Schedule. • Iterative releases of Scheduling Licensed Software content and functionality for Unit and System Testing. • Release nNotes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Scheduling Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Scheduling builds meet specifications as documented in the final Detailed Design Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will:	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and

Task 7 Complete Build of Scheduling and Conduct System and Unit Testing	

• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  o Document and verify the requirements to address the Omission in a consistent and structured format;
  o Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  o Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
  o Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and
  o Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released.
• Provide County with sample gateway criteria
	how they have been resolved.
	• Implementation of defect resolutions and County-Approved change requests.
	• Gateway criteria for Unit and System Test completion.
	
	Acceptance Criteria:
	• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Scheduling and Conduct System and Unit Testing	
and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County Approved-gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Scheduling build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Scheduling build is ready for moving to Integration Testing, based on: o Completeness of functionality and content; o Severity of outstanding defects; and o Severity of outstanding change requests.	**Deliverable 7.3 Tested Complete System Build Ready For Integration Testing** • Documented results of completed and tested Scheduling Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Scheduling Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Scheduling Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.7 (Clinical Results and Documentation Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

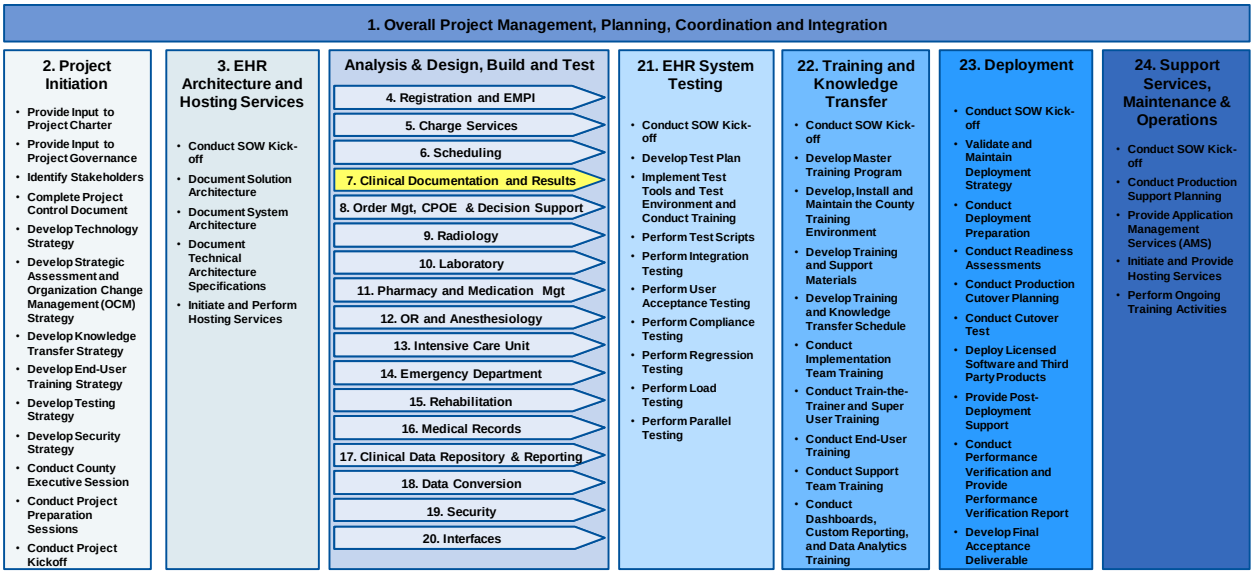
1. Introduction

This Exhibit A.7 (Clinical Documentation and Results Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.7 (Clinical Documentation and Results Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.7 (Clinical Documentation and Results Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Clinical Documentation and Results as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of clinical documentation, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Advanced Care Documentation
- PowerChart Ambulatory
- PowerPlan
- CareCompass
- Medication Administration Record

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.7 (Clinical Documentation and Results Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.7 (Clinical Documentation and Results).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Clinical Results and Documentation Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Clinical Documentation and Results SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Clinical Documentation and Results	Deliverable 1.1 SOW Sub-Project Work Plan - Clinical Documentation and Results
Subtask 1.2 Conduct Initiation Session for Clinical Documentation and Results Workgroup	Deliverable 1.2 Clinical Documentation and Results Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data	Deliverable 3.2 System Review Data Collection

Tasks/ Subtasks	Deliverables
Collection (System Review Follow-Up)	
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Clinical Documentation Workflow Workshop	Deliverable 4.4 Clinical Documentation Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Clinical Documentation and Results Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Clinical Documentation and Results
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project

Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Clinical Documentation and Results-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW

(referred to in this Exhibit as the "**County Clinical Documentation and Results Workgroup**" or "**County Workgroup**") and the County Clinical Documentation and Results Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Project Director
  - Project Manager
  - Clinical Documentation and Results Architect;
  - Contractor Clinical Results and Documentation Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County Clinical Documentation and Results SOW Lead;
  - County Clinical Documentation and Results Workgroup;
  - County Transformation Lead;
  - County Clinical Documentation and Results Analyst;
  - County Project Director;
  - County Project Manager; and
  - County Integration Architect.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – Clinical Documentation and Results

As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Clinical Documentation and Results-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include:

- Deliverables, tasks, and subtasks;
- Associated dependencies among Deliverables, tasks, and subtasks;
- Resources (hours and roles) required for each Deliverable, task, and subtask;
- Start date and date of completion for each Deliverable, task, and subtask;
- County review period for each Deliverable;
- Acceptance Criteria for each Deliverable;
- County Deliverable review period; and

Deliverable 1.1 Clinical Documentation and Results Sub-Project Work Plan – Including All Elements Described in Subtask 1.1

Acceptance Criteria:

- County-Approved Clinical Documentation and Results specific sub-Project Work Plan.
- Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.
- Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs.
- Confirmed availability of Contractor resources required to implement the Project Work Plan and Clinical Documentation and Results-specific sub-Project Work Plan.

• Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.7 (Clinical Documentation and Results Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for Clinical Documentation and Results Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.7 (Clinical Documentation and Results Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Clinical Documentation and Results capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Clinical Documentation and Results functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits;	**Deliverable 1.2 Clinical Documentation and Results Initiation Session** • Clinical Documentation and Results Initiation Session materials for County review one (1) week prior to Clinical Documentation and Results Initiation Session. • Initial list of County Domains, Venues and Locations for which Clinical Documentation and Results capabilities must be delivered for review during Clinical Documentation and Results Initiation Session. • Demonstration of Clinical Documentation and Results functionality. • List of County Workgroup members who attended the Clinical Documentation and Results Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Clinical Documentation and Results Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Clinical Documentation and Results Initiation

(b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	Session. • Clinical Documentation and Results Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Clinical Documentation and Results Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Clinical Documentation and Results Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel.	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved.

• Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup

	readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Clinical Results and Documentation Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Clinical Documentation and Results SOW Lead;
  ○ County Clinical Documentation and Results Analyst;
  ○ County Clinical Documentation and Results Workgroup; and
  ○ County Clinical Documentation and Results SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Task 2 Conduct Current State Assessment	
regarding scheduling.	

Subtask 2.2 Conduct Workflow Assessment
In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Clinical Documentation and Results workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows.
Contractor will document the assessment in the template-based structured OWA tool.
Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated.
Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed.
Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy.
County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.
	Deliverable 2.2 Workflow Assessment
	• Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to:
	  ○ Worksheets;
	  ○ Recommended workflows; and
	  ○ Key County requirements.
	• Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed.
	• Workflows documented in sufficient detail to permit Contractor to:
	  ○ Compare to Best Practices; and
	  ○ Identify risks and opportunities as determined by County.
	
	Acceptance Criteria:
	• Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail.
	• County reviewed and Approved findings.

Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Clinical Documentation and Results components, the Contractor knowledge base, and expertise of	**Deliverable 2.3 Risk and Opportunities Documentation** • Workflow assessment report including completed OWA tool and identified risks and opportunities report. • Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving:

Task 2 Conduct Current State Assessment	
Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage Clinical Documentation and Results. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements
• Contractor Key Employees ○ Contractor Clinical Results and Documentation Delivery Consultant; ○ Contractor Project Director

Task 3 Conduct System Review	
○ Contractor Project Manager ○ Contractor Clinical Strategist; ○ Contractor Integration Architect; and ○ Contractor Solution Architect. • County Key Employees ○ County Project Director; ○ County Project Manager ○ County Integration Architect; ○ County Clinical Documentation and Results SOW Lead ○ County Clinical Documentation and Results Workgroup ○ County Clinical Documentation and Results SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	
Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Clinical Documentation and Results demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process.	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Clinical Documentation and Results. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all

Task 3 Conduct System Review	
• Conduct a review of the Clinical Documentation and Results Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and	participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Clinical Documentation and Results covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and

Task 3 Conduct System Review	
County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	County to remediate any deficiencies identified in the System Review Session.
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs.

Task 3 Conduct System Review	
and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Clinical Documentation and Results process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Clinical Documentation and Results. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the	• Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Clinical Documentation and Results process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Clinical Documentation and Results processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs

Task 3 Conduct System Review	

Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Results and Documentation Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Clinical Documentation and Results Lead Analyst; and
  ○ County Clinical Documentation and Results SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs.

Task 4 Conduct Design Review	
detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will:	• Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Clinical Documentation and Results workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and

Task 4 Conduct Design Review	
• Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Clinical Documentation and Results. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Clinical Documentation and Results and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).	

Task 4 Conduct Design Review	
in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Clinical Documentation and Results data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on

Task 4 Conduct Design Review	
progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Clinical Documentation and Results. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Clinical Documentation and Results. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Clinical Documentation

Task 4 Conduct Design Review	
strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Clinical Documentation and Results workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: o Future State Workflow Diagrams covering the complete range of Clinical Documentation and Results processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; o A list and examples of policies and procedures that will need to be created or revised; o Processes for maintaining and updating Clinical Documentation and Results; o Listing of suggested clinical pathways and decision support algorithms; o Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; o Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job	and Results processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Clinical Documentation and Results downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct

Task 4 Conduct Design Review	
descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Clinical Documentation and Results downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.
Subtask 4.4 Conduct Clinical Documentation Workflow Workshop Contractor will conduct Clinical Documentation and Results Workflow Workshops as needed in which the future state workflows for Clinical Documentation and Results will be demonstrated to County and decisions required for the design of Clinical Documentation and Results functionality will be made.	**Deliverable 4.4 Clinical Documentation Workflow Workshop** • Agenda/Schedule for Clinical Documentation and Results Workflow Workshops. • Attendance sheet/roster of participants for Clinical Documentation and Results Workflow Workshop (agenda and presentation). • List of materials for Clinical Documentation and Results Workshop (agenda and

Task 4 Conduct Design Review	
During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Clinical Documentation and Results. • Discuss the key decision points related to automation of capture and management of Clinical Documentation and Results. • Document the key design decisions and desired outcomes related to Clinical Documentation and Results in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Clinical Documentation and Results in the DDMs. • Compare and contrast design elements for Clinical Documentation and Results and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Clinical Documentation and Results Domain. • At the end of the Clinical Documentation and Results Workflow Workshop, Contractor will draft and finalize the Clinical Documentation and Results Workflow Workshop Event Summary Report.	presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Clinical Documentation and Results Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Clinical Documentation and Results. **Acceptance Criteria:** • County-Approved Clinical Documentation and Results Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Clinical Documentation and Results Licensed Software build based on the	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM.

Task 4 Conduct Design Review	
data collected and decisions made during the design review and workflow localization. The Clinical Documentation and Results final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	• Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build	
Task Description	
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contactor Clinical Results and Documentation Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Clinical Documentation and Results SOW Lead;
  ○ County Project Director
  ○ County Project Manager
  ○ County Clinical Documentation and Results Analyst; and
  ○ County Clinical Documentation and Results SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools**

Task 5 Complete Initial Partial System Build	
the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Clinical Documentation and Results processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Clinical Documentation and Results. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation
Task Description
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Clinical Documentation and Results and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Clinical Documentation and Results Licensed Software.

Task 6 Conduct System Validation

Personnel Requirements

- Contractor Key Employees
  - Contractor Clinical Results and Documentation Delivery Consultant;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect.
- County Key Employees
  - County Clinical Documentation and Results SOW Lead;
  - County Project Director
  - County Project Manager
  - County Clinical Documentation and Results Analyst;
  - County Clinical Documentation and Results SOW Workgroup; and
  - County Clinical Documentation and Results SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 6.1 System Validation Session

Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

The objectives of the session are to:

- Provide an in-depth demonstration of the solution and build to date using County's Domain.
- Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing.
- Begin development of County-specific unit and system test scripts.
- Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup.

Deliverable 6.1 System Validation

- System Validation Session (agenda and presentation).
- Library of sample Unit and System Test scripts to be adapted for County.
- System Validation Session Event Summary Report for Clinical Documentation and Results Licensed Software including Issues Log.
- Updated DCWs in MethodM Online.
- Build Audit Report (comparison between DCW and built Domain).
- Updated DDM in MethodM Online.
- Updated Project documents.

Acceptance Criteria:

- County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project.
- County verification that Contractor has

Task 6 Conduct System Validation	
• Validate database build to date of System Validation Session. • Validate proposed Clinical Documentation and Results reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Clinical Documentation and Results Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Clinical Documentation and Results Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document	provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Clinical Documentation and Results Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live.

Task 6 Conduct System Validation	
• Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Clinical Documentation and Results and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Results and Documentation Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect;
  ○ Contractor Integration Architect; and
  ○ Contractor Test Lead.
• County Key Employees
  ○ County Clinical Documentation and Results SOW Lead;
  ○ County Project Director
  ○ County Project Manager
  ○ County Clinical Documentation and Results Analyst; and
  ○ County Clinical Documentation and Results SOW Workgroup.

Task 7 Complete Build of Clinical Documentation and Results and Conduct System and Unit Testing	
Subtasks/ Deliverables	
Subtask 7.1 Complete System Build Contractor will iteratively build Clinical Documentation and Results Licensed Software functionality and content until the full build of Clinical Documentation and Results content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Clinical Documentation and Results Licensed Software has been fully configured to include all DDMs and DCWs related to Clinical Documentation and Results.	**Deliverable 7.1 Complete System Build for Clinical Documentation and Results** • Release Schedule. • Iterative releases of Clinical Documentation and Results Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Clinical Documentation and Results Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Clinical Documentation and Results builds meet specifications as documented in the final Detailed Design Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests**

Task 7 Complete Build of Clinical Documentation and Results and Conduct System and Unit Testing	

As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**").
 	
Contractor will:
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
  ○ Contractor and County will jointly
	• Updated Release Schedules.
	• Specifications for requested additions of content and functionality.
	• Defect resolution document describing identified defects and Omissions which have been resolved.
	• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
	• Implementation of defect resolutions and County-Approved change requests.
	• Gateway criteria for Unit and System Test completion.
	
	Acceptance Criteria:
	• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Clinical Documentation and Results and Conduct System and Unit Testing	
determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and o Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Clinical Documentation and Results build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Clinical Documentation and Results build is ready for moving to Integration Testing, based on: o Completeness of functionality and content; o Severity of outstanding defects; and o Severity of outstanding change requests.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Clinical Documentation and Results Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Clinical Documentation and Results Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Clinical Documentation and Results Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and

Task 7 Complete Build of Clinical Documentation and Results and Conduct System and Unit Testing	
	documented severity levels identified.

Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

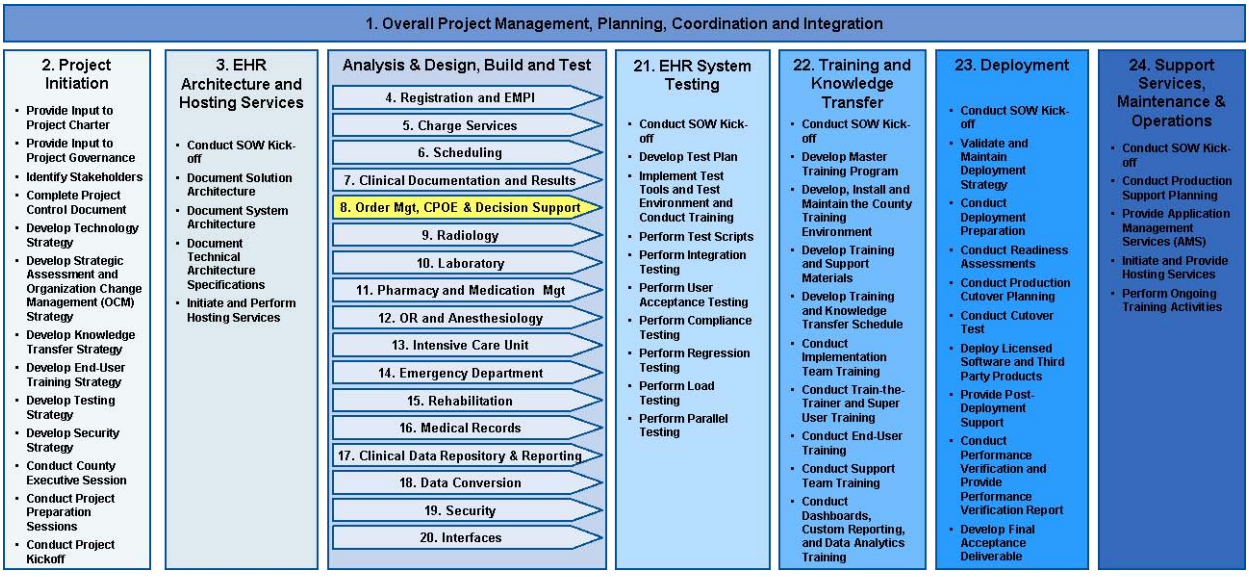
1. Introduction

This Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Order Management, CPOE, and Decision Support as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of clinical documentation, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Cerner Order Management
- PowerOrders
- Clinical Data Repository
- PowerNote
- Clinical Office PowerNote
- Discern Expert

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and

- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Order Management, CPOE, and Decision Support Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Order Management, CPOE, and Decision Support SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County

personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Order Management, CPOE, and Decision Support	Deliverable 1.1 SOW Sub-Project Work Plan - Order Management, CPOE, and Decision Support
Subtask 1.2 Conduct Initiation Session for Order Management, CPOE, and Decision Support Workgroup	Deliverable 1.2 Order Management, CPOE, and Decision Support Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation

Tasks/ Subtasks	Deliverables
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Order Management, CPOE, and Decision Support Workflow Workshop	Deliverable 4.4 Order Management, CPOE, and Decision Support Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Order Management, CPOE, and Decision Support Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Order Management, CPOE, and Decision Support
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

<table>
<tr><th colspan="2">Task 1 Conduct SOW Kick-Off / Mobilization</th></tr>
<tr><td colspan="2">Task Description</td></tr>
<tr><td colspan="2">The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Order Management, CPOE, and Decision Support-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "County Order Management, CPOE, and Decision Support Workgroup" or "County Workgroup") and the County Order Management, CPOE, and Decision Support Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.</td></tr>
<tr><td colspan="2">Personnel Requirements</td></tr>
<tr><td colspan="2">• Contractor Key Employees
○ Contractor Project Director;
○ Contractor Project Manager;
○ Order Management, CPOE, and Decision Support Architect;
○ Contractor Order Management, CPOE, and Decision Support Delivery Consultant;
○ Integration Architect; and
○ Clinical Strategist.
• County Key Employees
○ County Order Management, CPOE, and Decision Support SOW Lead;
○ County Order Management, CPOE, and Decision Support Workgroup;
○ County Transformation Lead;
○ County Order Management, CPOE, and Decision Support Analyst;
○ County Project Director;
○ County Project Manager; and
○ County Integration Architect.</td></tr>
<tr><td colspan="2">Subtasks/Deliverables</td></tr>
<tr><td>Subtask 1.1 Develop Detailed Sub-Project Work Plan – Order Management, CPOE, and Decision Support

As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include an Order Management, CPOE, and Decision Support-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include:

• Deliverables, tasks, and subtasks;</td><td>Deliverable 1.1 Order Management, CPOE, and Decision Support Sub-Project Work Plan – Including All Elements Described in Subtask 1.1

Acceptance Criteria:

• County-Approved Order Management, CPOE, and Decision Support specific sub-Project Work Plan.

• Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.

• Elements of Project Work Plan are consistent</td></tr>
</table>

• Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work) and subject to County Approval**.**	with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Order Management, CPOE, and Decision Support-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Order Management, CPOE, and Decision Support Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.8 (Order Management, Computerized Order Entry (CPOE), and Decision Support Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Order Management, CPOE, and Decision Support capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Order Management, CPOE, and Decision Support functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use	**Deliverable 1.2 Order Management, CPOE, and Decision Support Initiation Session** • Order Management, CPOE, and Decision Support Initiation Session materials for County review one (1) week prior to Order Management, CPOE, and Decision Support Initiation Session. • Initial list of County Domains, Venues and Locations for which Order Management, CPOE, and Decision Support capabilities must be delivered for review during Order Management, CPOE, and Decision Support Initiation Session. • Demonstration of Order Management, CPOE, and Decision Support functionality. • List of County Workgroup members who attended the Order Management, CPOE, and Decision Support Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan.

of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	• An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Order Management, CPOE, and Decision Support Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Order Management, CPOE, and Decision Support Initiation Session. • Order Management, CPOE, and Decision Support Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Order Management, CPOE, and Decision Support Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

Subtask 1.3 Conduct Comprehension Exercises
Subsequent to the Order Management, CPOE, and Decision Support Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including:
• Providing scripts for use by the County Workgroup for training/education exercises.
• Monitoring the use of WBTs, and review of MethodM Online.
• Providing telephone and e-mail support to County personnel.
• Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee.
• Supporting the County education coordinator in running Education Tracker Reports.
• Managing and reporting on the progress of learning activities and logging issues on MethodM.
• Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives.
• Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation.
The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks.
During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the
	Deliverable 1.3 Progress Report on Comprehension Exercises
	• Open House Domain scripts.
	• Progress Report on comprehension exercises.
	• Education Tracker demonstrates successful completion of all learning objectives by all County participants.
	• Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts.
	• Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved.
	• Approval by County of County Workgroup readiness to use training tools.
	• County SOW Lead Approval of updated learning objectives.
	• Provided telephone and e-mail support to County personnel as specified in the Agreement.
	
	Acceptance Criteria
	• Effective training by Contractor of County personnel on the tasks to be completed.
	• Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests.
	• Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County.
	• Weekly updates demonstrate that, on an ongoing basis:
	  ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and
	  ○ Additional training is appropriate to achieve remediation for identified deficiencies.
	• Weekly updated Education Tracker, including

Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Order Management, CPOE, and Decision Support Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Order Management, CPOE, and Decision Support SOW Lead;
  ○ County Order Management, CPOE, and Decision Support Analyst;
  ○ County Order Management, CPOE, and Decision Support Workgroup; and
  ○ County Order Management, CPOE, and Decision Support SMEs.

Task 2 Conduct Current State Assessment	
Subtasks/Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Order Management, CPOE, and Decision Support workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness	**Deliverable 2.2 Workflow Assessment** • Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. • Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. • Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** • Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. • County reviewed and Approved findings.

Task 2 Conduct Current State Assessment	
and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Order Management, CPOE, and Decision Support components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** • Workflow assessment report including completed OWA tool and identified risks and opportunities report. • Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage Order Management, CPOE, and Decision Support. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows (e.g. Registration Medical Records). • Recommendations for interdisciplinary communication. • Recommended principles for discipline-specific user Interface and screen flows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally

Task 2 Conduct Current State Assessment	
	defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Order Management, CPOE, and Decision Support SOW Lead
  ○ County Order Management, CPOE, and Decision Support Workgroup
  ○ County Order Management, CPOE, and Decision Support SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation).

Task 3 Conduct System Review	
will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Order Management, CPOE, and Decision Support demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Conduct the order set workshop to finalize order set design, review the order set approval process, begin populating data collection tools, and finalize the order set build timeline. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Order Management, CPOE, and Decision Support Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted	• List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Order Management, CPOE, and Decision Support. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained.

Task 3 Conduct System Review	
materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up	• Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Order Management, CPOE, and Decision Support covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
items; ○ Tasks from the Project Work Plan for specific solution; ○ Assessment of County's ability to complete the remaining data collection and design decisions; and ○ Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County. Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Order Management, CPOE, and Decision Support process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion.	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Order Management, CPOE, and Decision Support process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Order Management, CPOE, and Decision Support

Task 3 Conduct System Review	

• Facilitate on-site weekly meetings to discuss issues.
• Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed.
• Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM
• Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Order Management, CPOE, and Decision Support.
• Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan;
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate;
	processes.
	• Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule.
	• Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule.
	• Contractor Delivery Consultant support through ad hoc calls and e-mails.
	• Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation.
	• Documented decisions made related to DDM and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 3 Conduct System Review	
and ○ Identify outstanding requirements and constraints from other workgroups (e.g., orders and alerts established by the lab, radiology, pharmacy) • Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.	

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	
• Contractor Key Employees ○ Contractor Project Director; ○ Contractor Project Manager; ○ Contractor Order Management, CPOE, and Decision Support Delivery Consultant; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect • County Key Employees ○ County Project Director; ○ County Project Manager; ○ County Order Management, CPOE, and Decision Support Lead Analyst; and ○ County Order Management, CPOE, and Decision Support SOW Workgroup.	
Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary

Task 4 Conduct Design Review	
completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions that were made according to the predefined order set approval process and the interdisciplinary workgroup review process documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Order	Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Order Management, CPOE, and Decision Support workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of

Task 4 Conduct Design Review	
Management, CPOE, and Decision Support. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Order Management, CPOE, and Decision Support and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County.	documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Manage and maintain a documented record of the Order Management, CPOE, and Decision Support data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM

Task 4 Conduct Design Review	
analysis completed. • Review relevant cross-SOW implications for Order Management, CPOE, and Decision Support. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	and DCWs. • Documented cross-SOW implications for Order Management, CPOE, and Decision Support. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Order Management, CPOE,

Task 4 Conduct Design Review	

strategy.
Contractor will:
• Draft an agenda for meetings that will be held at County facilities and departments for review by the County.
• Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables.
• Conduct crosswalk between Order Management, CPOE, and Decision Support workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks.
• Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows.
• Develop the following Deliverables:
  ○ Future State Workflow Diagrams covering the complete range of Order Management, CPOE, and Decision Support processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems;
  ○ A list and examples of policies and procedures that will need to be created or revised;
  ○ Processes for maintaining and updating Order Management, CPOE, and Decision Support;
  ○ Listing of suggested clinical pathways and decision support algorithms;
  ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices;
  ○ Description of how County personnel's roles will change and document new positions and revisions to existing job
	and Decision Support processes impacted by the Licensed Software.
	• A list and examples of policies and procedures that will need to be created or revised.
	• Listing of suggested decision support algorithms.
	• Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices.
	• Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified.
	• A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.
	• Recommendations for Order Management, CPOE, and Decision Support downtime strategies and documentation, including samples based on County build of Licensed Software.
	• Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented.
	
	Acceptance Criteria:
	• County Approved Workflow Localization Documents.
	• Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process.
	• Workflow Localization Documents address all

Task 4 Conduct Design Review	
descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Order Management, CPOE, and Decision Support downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will facilitate workshops to develop a County-wide Order Management, CPOE and Decision Support strategy, and define an order set/decision support approval process, which considers current County policy, level of maturity, and industry best practice. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
Subtask 4.4 Conduct Order Management, CPOE, and Decision Support Workflow Workshop Contractor will conduct Order Management, CPOE, and Decision Support Workflow Workshops as needed in which the future state workflows for Order Management, CPOE, and Decision Support will be demonstrated to County and decisions required for the design of Order Management, CPOE, and Decision Support functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Order Management, CPOE, and Decision Support. • Discuss the key decision points related to automation of capture and management of Order Management, CPOE, and Decision Support. • Document the key design decisions and desired outcomes related to Order Management, CPOE, and Decision Support in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Order Management, CPOE, and Decision Support in the DDMs. • Compare and contrast design elements for Order Management, CPOE, and Decision Support and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are	**Deliverable 4.4 Order Management, CPOE, and Decision Support Workflow Workshop** • Agenda/Schedule for Order Management, CPOE, and Decision Support Workflow Workshops. • Attendance sheet/roster of participants for Order Management, CPOE, and Decision Support Workflow Workshop (agenda and presentation). • List of materials for Order Management, CPOE, and Decision Support Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Order Management, CPOE, and Decision Support Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Order Management, CPOE, and Decision Support. **Acceptance Criteria:** • County-Approved Order Management, CPOE, and Decision Support Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
outstanding. • Refine and augment downtime strategy for Order Management, CPOE, and Decision Support Domain. • Refine and augment data conversion for Order Management, CPOE, and Decision Support. • At the end of the Order Management, CPOE, and Decision Support Workflow Workshop, Contractor will draft and finalize the Order Management, CPOE, and Decision Support Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Order Management, CPOE, and Decision Support Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Order Management, CPOE, and Decision Support final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build	
Task Description	
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Order Management, CPOE, and Decision Support Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Order Management, CPOE, and Decision Support SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Order Management, CPOE, and Decision Support Analyst; and
  ○ County Order Management, CPOE, and Decision Support SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Order Management, CPOE, and Decision Support processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.

Task 5 Complete Initial Partial System Build	
be included in the Initial Partial System Build.	
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Order Management, CPOE, and Decision Support. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation
Task Description
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Order Management, CPOE, and Decision Support and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Order Management, CPOE, and Decision Support Licensed Software.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Order Management, CPOE, and Decision Support Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Order Management, CPOE, and Decision Support SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Order Management, CPOE, and Decision Support Analyst;
  ○ County Order Management, CPOE, and Decision Support SOW Workgroup; and
  ○ County Order Management, CPOE, and Decision Support SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts

Task 6 Conduct System Validation	
Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Order Management, CPOE, and Decision Support reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Order Management, CPOE, and Decision Support Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach to be adapted for County. • System Validation Session Event Summary Report for Order Management, CPOE, and Decision Support Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.	

Task 6 Conduct System Validation	
and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Order Management, CPOE, and Decision Support and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Order Management, CPOE, and Decision Support Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel.	

Task 6 Conduct System Validation	
• Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Order Management, CPOE, and Decision Support and Conduct System and Unit Testing

Task Description

Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County.

Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Order Management, CPOE, and Decision Support Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect;
  - Contractor Integration Architect; and
  - Contractor Test Lead.
- County Key Employees
  - County Order Management, CPOE, and Decision Support SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Order Management, CPOE, and Decision Support Analyst; and
  - County Order Management, CPOE, and Decision Support SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build	**Deliverable 7.1 Complete System Build for Order Management, CPOE, and Decision Support**
Contractor will iteratively build Order Management, CPOE, and Decision Support Licensed Software functionality and content until the full build of Order Management, CPOE, and Decision Support content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County	• Release Schedule. • Iterative releases of Order Management, CPOE, and Decision Support Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Order Management, CPOE, and Decision Support Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status

Task 7 Complete Build of Order Management, CPOE, and Decision Support and Conduct System and Unit Testing	
SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Order Management, CPOE, and Decision Support Licensed Software has been fully configured to include all DDMs and DCWs related to Order Management, CPOE, and Decision Support.	Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Order Management, CPOE, and Decision Support builds meet specifications as documented in the final Detailed Design Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets

Task 7 Complete Build of Order Management, CPOE, and Decision Support and Conduct System and Unit Testing	
report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online. • Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released. • Address identified Omissions as follows: ○ Document and verify the requirements to address the Omission in a consistent and structured format; ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released; ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the documented omission specifications. • County-Approved gateway criteria for unit and system test completion.
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Order Management, CPOE, and Decision Support build	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested

Task 7 Complete Build of Order Management, CPOE, and Decision Support and Conduct System and Unit Testing	

as documented in the DCWs and DDMs is complete.
 	
Contractor will:
 	
• Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls.
• Release defect resolutions and implemented change requests as part of the build release cycles.
• Support County in re-testing resolved defects deployed by Contractor.
• Jointly decide with County through the governance process when the Order Management, CPOE, and Decision Support build is ready for moving to Integration Testing, based on:
  ○ Completeness of functionality and content;
  ○ Severity of outstanding defects; and
  ○ Severity of outstanding change requests.
	Order Management, CPOE, and Decision Support Licensed Software.
	• List of resolved defects, including date of completion, retest results, and County Approval.
	• County-Approved completed Unit and System Testing for Order Management, CPOE, and Decision Support Licensed Software.
	
	Acceptance Criteria:
	
	• Resolution of all outstanding defects defined as required for Order Management, CPOE, and Decision Support Licensed Software Acceptance.
	• Licensed Software Build Completion Document provided by Contractor and Approved by County.
	• Gateway criteria have either been achieved or exceptions documented and Approved by Project governance.
	• All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.9 (Radiology Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

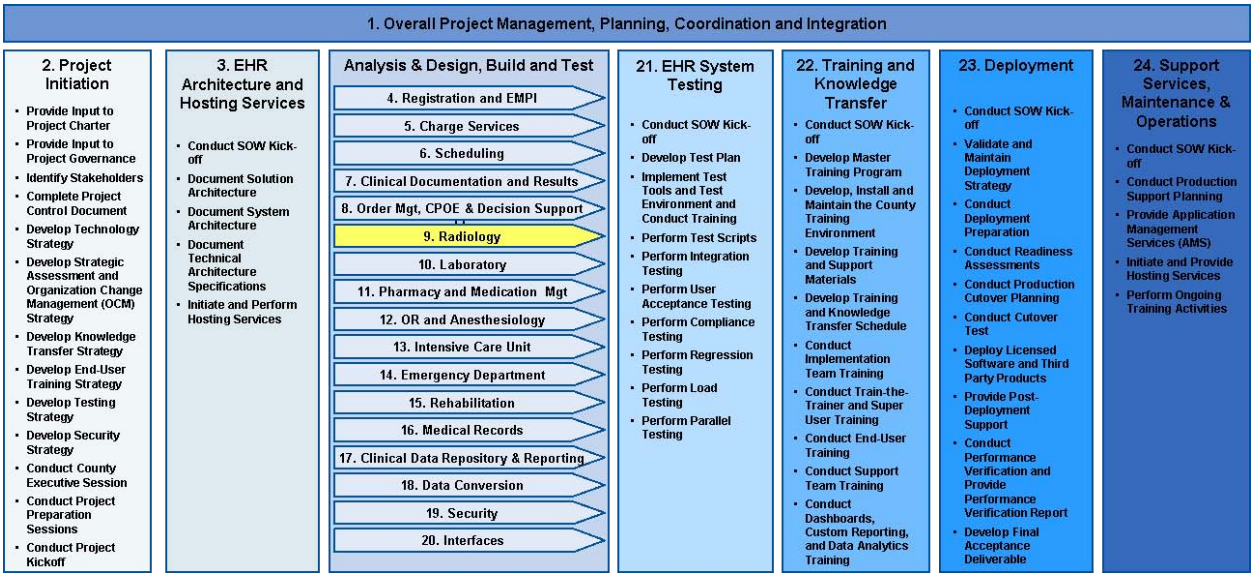
1. Introduction

This Exhibit A.9 (Radiology Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.9 (Radiology Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.9 (Radiology Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Radiology as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Radiology, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Radiology Management
- Departmental Scheduling Management
- Mammography Management

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a

fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.9 (Radiology Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.9 (Radiology Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Radiology Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Radiology SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Radiology	Deliverable 1.1 SOW Sub-Project Work Plan - Radiology
Subtask 1.2 Conduct Initiation Session for Radiology	Deliverable 1.2 Radiology Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
btask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Radiology Workshop	Deliverable 4.4 Radiology Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document(Key Deliverable)

Tasks/ Subtasks	Deliverables
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Radiology Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Radiology
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off/Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Radiology-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County** Radiology **Workgroup**" or "**County Workgroup**") and the County Radiology Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Radiology Architect;
  ○ Contractor Radiology Delivery Consultant;
  ○ Integration Architect; and
  ○ Clinical Strategist.
• County Key Employees
  ○ County Radiology SOW Lead;
  ○ County Radiology Workgroup;
  ○ County Transformation Lead;
  ○ County Radiology Analyst;

○ County Project Director; ○ County Project Manager; and ○ County Integration Architect.	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Radiology As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Radiology-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.9 (Radiology Statement of Work) and subject to County Approval**.**	**Deliverable 1.**1 Radiology **Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Radiology-specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Radiology-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Radiology Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.9 (Radiology Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues,	**Deliverable 1.2 Radiology Initiation Session** • Radiology Initiation Session materials for County review one (1) week prior to Radiology Initiation Session. • Initial list of County Domains, Venues and Locations for which Radiology capabilities must be delivered for review during Radiology Initiation Session. • Demonstration of Radiology functionality. • List of County Workgroup members who

and Locations for which Radiology capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Radiology functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood.	attended the Radiology Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Radiology Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Radiology Initiation Session. • Radiology Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Radiology Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

• Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Radiology Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an

that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements
• Contractor Key Employees ○ Contractor Radiology Delivery Consultant; ○ Contractor Solution Architect; and

Task 2 Conduct Current State Assessment	
○ Contractor Clinical Strategist. ● County Key Employees ○ County Radiology SOW Lead; ○ County Radiology Analyst; ○ County Radiology Workgroup; and ○ County Radiology SMEs.	
Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** ● List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** ● List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. ● County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Radiology workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed.	**Deliverable 2.2 Workflow Assessment** ● Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on

Task 2 Conduct Current State Assessment	
Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	MethodM Online capturing the agreed workflow processes at the agreed level of detail. • County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Radiology components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** • Workflow assessment report including completed OWA tool and identified risks and opportunities report. • Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage Radiology. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth

Task 2 Conduct Current State Assessment	
	of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Radiology Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Radiology SOW Lead
  ○ County Radiology Workgroup
  ○ County Radiology SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs.

Task 3 Conduct System Review	
City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Radiology demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Radiology Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks	• DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Radiology. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda.

Task 3 Conduct System Review	
(also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for	• County-Approved System Review Session Event Summary Report. • Demonstration of Radiology covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Radiology process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on Radiology. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality,	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Radiology process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Radiology processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs.

Task 3 Conduct System Review	
training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable. • Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead. • Weekly calls and/or meetings of at least sixty (60) minutes will: ○ Discuss progress compared to timelines documented in the Project Work Plan; ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate; and ○ Identify outstanding requirements and constraints from other workgroups (e.g. scheduling). • Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process. • County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review). • Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.

Task 4 Conduct Design Review	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Radiology Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Radiology Lead Analyst; and
  ○ County Radiology SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other	**Deliverable 4.1 Design Session Documents** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Radiology workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for

Task 4 Conduct Design Review	
relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Radiology. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Radiology and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs.	System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Radiology data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	

Task 4 Conduct Design Review	
Subtasks/Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Radiology. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Radiology. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion.

Task 4 Conduct Design Review	
(on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	**Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Radiology workflow localization Deliverables and OWAs from other clinical disciplines, scheduling workgroup, agreements with third party vendors, and related services, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams covering the complete range of Radiology	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Radiology processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.

Task 4 Conduct Design Review	
processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Radiology; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Radiology downtime and recovery strategies, including samples for Radiology, and third party vendor and related services; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc.	• Recommendations for Radiology downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Radiology Workflow Workshop Contractor will conduct Radiology Workflow Workshops as needed in which the future state workflows for Radiology will be demonstrated to County and decisions required for the design of Radiology functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Radiology. • Discuss the key decision points related to automation of capture and management of Radiology. • Document the key design decisions and desired outcomes related to Radiology in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Radiology in the DDMs. • Compare and contrast design elements for Radiology and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel.	**Deliverable 4.4 Radiology Workflow Workshop** • Agenda/Schedule for Radiology Workflow Workshops. • Attendance sheet/roster of participants for Radiology Workflow Workshop (agenda and presentation). • List of materials for Radiology Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Radiology Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Radiology. **Acceptance Criteria:** • County-Approved Radiology Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
• Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for the Radiology Domain. • Refine and augment data conversion (historical data upload requirements) for the Radiology Domain. • At the end of the Radiology Workflow Workshop, Contractor will draft and finalize the Radiology Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Radiology Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Radiology final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build	
Task Description	
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Radiology Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Radiology SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Radiology Analyst; and
  ○ County Radiology SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Radiology processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.

Task 5 Complete Initial Partial System Build	
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Radiology. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** ● Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** ● County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Radiology and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Radiology Licensed Software.	
Personnel Requirements	
● Contractor Key Employees ○ Contractor Radiology Delivery Consultant; ○ Contractor Project Director; ○ Contractor Project Manager; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect. ● County Key Employees ○ County Radiology SOW Lead; ○ Contractor Project Manager; ○ Contractor Project Director; ○ County Radiology Analyst; ○ County Radiology SOW Workgroup; and ○ County Radiology SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	
Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los	**Deliverable 6.1 System Validation** ● System Validation Session (agenda and presentation). ● Library of sample Unit and System Test scripts to be adapted for County. ● System Validation Session Event Summary Report for Radiology Licensed Software

Task 6 Conduct System Validation	
Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Radiology reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Radiology Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources,	including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Radiology Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Radiology Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment

Task 6 Conduct System Validation	
completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Radiology and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.

Task 7 Complete Build of Radiology and Conduct System and Unit Testing

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Radiology Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect;
  - Contractor Integration Architect; and
  - Contractor Test Lead.
- County Key Employees
  - County Radiology SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Radiology Analyst; and
  - County Radiology SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Radiology Licensed Software functionality and content until the full build of Radiology content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.

Deliverable 7.1 Complete System Build for Radiology

- Release Schedule.
- Iterative releases of Radiology Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release.
- Complete Build of Radiology Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Radiology builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of Radiology and Conduct System and Unit Testing	
• Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Radiology Licensed Software has been fully configured to include all DDMs and DCWs related to Radiology.	
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online. • Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released. • Address identified Omissions as follows: ○ Document and verify the requirements to address the Omission in a consistent and structured format;	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the documented omission specifications. • County-Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Radiology and Conduct System and Unit Testing	
○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released; ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Radiology build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Radiology build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Radiology Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Radiology Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Radiology Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved

Task 7 Complete Build of Radiology and Conduct System and Unit Testing	
content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.10 (Laboratory Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

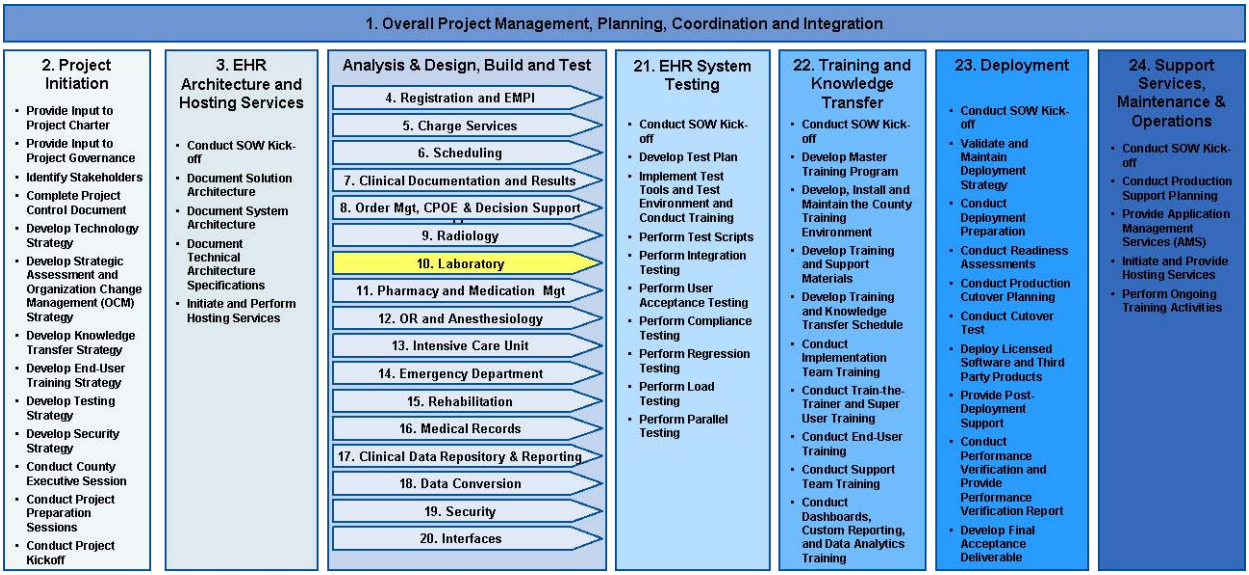
1. Introduction

This Exhibit A.10 (Laboratory Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.10 (Laboratory Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.10 (Laboratory Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Laboratory as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Laboratory, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- PathNet – General Laboratory
- PathNet - Microbiology
- PathNet – Anatomic Pathology
- PathNet – HLA – Human Leukocyte Antigen (Organ Transplant)
- PathNet – Blood Bank Transfusion
- PathNet – Outreach Service
- PathNet – Laboratory Imaging
- PathNet – Synoptic Reporting for Pathology

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and

- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.10 (Laboratory Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.10 (Laboratory Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the " **Contractor Laboratory Delivery Consultant**" or "**Contractor Delivery Consultant**")to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Laboratory SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Laboratory	Deliverable 1.1 SOW Sub-Project Work Plan - Laboratory
Subtask 1.2 Conduct Initiation Session for Laboratory Workgroup	Deliverable 1.2 Laboratory Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents

Tasks/Subtasks	Deliverables
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Laboratory Workflow Workshop	Deliverable 4.4 Laboratory Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Laboratory Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Laboratory
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Laboratory-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County** Laboratory **Workgroup**" or "**County Workgroup**") and the County Laboratory Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Laboratory Architect;

○ Contractor Laboratory Delivery Consultant; ○ Integration Architect; and ○ Clinical Strategist. • County Key Employees ○ County Laboratory SOW Lead; ○ County Laboratory Workgroup; ○ County Transformation Lead; ○ County Laboratory Analyst; ○ County Project Director; ○ County Project Manager; and ○ County Laboratory Architect.	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Laboratory As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Laboratory-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.10 (Laboratory Statement of Work) and subject to County Approval**.**	**Deliverable 1.1 Laboratory Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Laboratory specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Laboratory-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Laboratory Workgroup Contractor will conduct an initiation session to	**Deliverable 1.2 Laboratory Initiation Session** • Laboratory Initiation Session materials for County review one (1) week prior to

introduce the County Workgroup to the Services covered by this Exhibit A.10 (Laboratory Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Laboratory capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Laboratory functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the	Laboratory Initiation Session. • Initial list of County Domains, Venues and Locations for which Laboratory capabilities must be delivered for review during Laboratory Initiation Session. • Demonstration of Laboratory functionality. • List of County Workgroup members who attended the Laboratory Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Laboratory Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Laboratory Initiation Session. • Laboratory Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Laboratory Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and

required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Laboratory Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training

personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document

Task 2 Conduct Current State Assessment	
Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Laboratory Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Laboratory SOW Lead;
  ○ County Laboratory Analyst;
  ○ County Laboratory Workgroup; and
  ○ County Laboratory SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, including third party vendors and instrumentation for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Subtask 2.2 Conduct Workflow Assessment
In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Laboratory workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows.
Contractor will document the assessment in the
	Deliverable 2.2 Workflow Assessment
	• Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to:
	  ○ Worksheets;
	  ○ Recommended workflows; and
	  ○ Key County requirements.
	• Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to

Task 2 Conduct Current State Assessment	
template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Laboratory components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage Laboratory. ● Documented County-Approved metrics to be utilized to determine success. ● Recommendations for identifying implications with other workflows. ● Recommendations for identifying industry best practices. ● Documented risks.

Task 2 Conduct Current State Assessment	
	Acceptance Criteria: • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Laboratory Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Laboratory SOW Lead
  ○ County Laboratory Workgroup
  ○ County Laboratory SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.

Task 3 Conduct System Review	
Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Laboratory demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Laboratory Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead.	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Laboratory. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document.

Task 3 Conduct System Review	

• Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved.
• Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions.
• Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design.
• Work with the County Workgroup to begin the initial population of the DCWs.
• Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently.
• Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently.
• Create System Review Session event summary report. The System Review Session Event Summary Report will include:
  ○ Online DCW and DDM status for specific solution;
  ○ Unresolved issues from the online DDM;
  ○ Section for Contractor and County counterpart to add additional follow-up items;
  ○ Tasks from the Project Work Plan for
	• Project Status Reports.
	• Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained.
	• Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track.
	
	Acceptance Criteria:
	• County-Approved System Review Session agenda.
	• County-Approved System Review Session Event Summary Report.
	• Demonstration of Laboratory covers all relevant County Domains, Venues, and Locations.
	• Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress.
	• System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW.
	• Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
specific solution; ○ Assessment of County's ability to complete the remaining data collection and design decisions; and ○ Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Laboratory process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Laboratory process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Laboratory processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule.

Task 3 Conduct System Review	

progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed.
• Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM
• Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Laboratory.
• Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to
	• Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule.
	• Contractor Delivery Consultant support through ad hoc calls and e-mails.
	• Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation.
	• Documented decisions made related to DDM and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 3 Conduct System Review	
schedule.	

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Laboratory Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Laboratory Lead Analyst; and
  ○ County Laboratory SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting

Task 4 Conduct Design Review	
solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Laboratory. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Laboratory and other related SOWs to date by County and identify further work that is required by County.	interdependencies between Laboratory workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Laboratory data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan.	

Task 4 Conduct Design Review	
• Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Laboratory. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources).	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Laboratory. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion

Task 4 Conduct Design Review	
• Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Laboratory workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows.	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Laboratory processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate

Task 4 Conduct Design Review	

• Develop the following Deliverables:
  ○ Future State Workflow Diagrams covering the complete range of Laboratory processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems;
  ○ A list and examples of policies and procedures that will need to be created or revised;
  ○ Processes for maintaining and updating Laboratory;
  ○ Listing of suggested clinical pathways and decision support algorithms;
  ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices;
  ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions;
  ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures;
  ○ Recommendations for Laboratory downtime and recovery strategies, including samples; and
  ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented.
 	
Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor.
 	
Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and
	improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.
	• Recommendations for Laboratory downtime strategies and documentation, including samples based on County build of Licensed Software.
	• Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented.
	
	Acceptance Criteria:
	• County Approved Workflow Localization Documents.
	• Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process.
	• Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that:
	  ○ All County patient care activities and services are addressed; and
	  ○ Realistic strategies for achieving Best Practice standards are delineated.
	• Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location.
	• Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Laboratory Workflow Workshop Contractor will conduct Laboratory Workflow Workshops as needed in which the future state workflows for Laboratory will be demonstrated to County and decisions required for the design of Laboratory functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Laboratory. • Discuss the key decision points related to automation of capture and management of Laboratory. • Document the key design decisions and desired outcomes related to Laboratory in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Laboratory in the DDMs. • Compare and contrast design elements for Laboratory and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan	**Deliverable 4.4 Laboratory Workflow Workshop** • Agenda/Schedule for Laboratory Workflow Workshops. • Attendance sheet/roster of participants for Laboratory Workflow Workshop (agenda and presentation). • List of materials for Laboratory Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Laboratory Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Laboratory. **Acceptance Criteria:** • County-Approved Laboratory Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Laboratory Domain. • At the end of the Laboratory Workflow Workshop, Contractor will draft and finalize the Laboratory Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Laboratory Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Laboratory final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.

Task 5 Complete Initial Partial System Build	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Laboratory Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Laboratory SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Laboratory Analyst; and
  ○ County Laboratory SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Laboratory processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Laboratory.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the

Task 5 Complete Initial Partial System Build	
Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Laboratory and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Laboratory Licensed Software.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Laboratory SOW Lead;
  ○ County Project Manager;
  ○ County Project Director;
  ○ County Laboratory Analyst;
  ○ County Laboratory SOW Workgroup; and
  ○ County Laboratory SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to:	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Laboratory Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between

Task 6 Conduct System Validation	
• Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Laboratory reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Laboratory Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing.	DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Laboratory Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Laboratory Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will:	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data

Task 6 Conduct System Validation	
• Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Laboratory and Conduct Unit and System Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Delivery Consultant;

Task 7 Complete Build of Laboratory and Conduct Unit and System Testing

- Contractor Clinical Strategist;
- Contractor Solution Architect;
- Contractor Integration Architect; and
- Contractor Test Lead.

- County Key Employees
  - County Laboratory SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Laboratory Analyst; and
  - County Laboratory SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Laboratory Licensed Software functionality and content until the full build of Laboratory content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Provide test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Report weekly on progress toward Complete Build, and alert County of any issues or risks.

Deliverable 7.1 Complete System Build for Laboratory

- Release Schedule.
- Iterative releases of Laboratory Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release.
- Complete Build of Laboratory Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Laboratory builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of Laboratory and Conduct Unit and System Testing	
• Notify County when the Laboratory Licensed Software has been fully configured to include all DDMs and DCWs related to Laboratory.	

Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests
As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**").
Contractor will:
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  ○ Escalate all Omissions which will have
	Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests
	• Updated Release Schedules.
	• Specifications for requested additions of content and functionality.
	• Defect resolution document describing identified defects and Omissions which have been resolved.
	• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
	• Implementation of defect resolutions and County-Approved change requests.
	• Gateway criteria for Unit and System Test completion.
	
	Acceptance Criteria:
	• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Laboratory and Conduct Unit and System Testing	
impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Laboratory build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Laboratory build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Laboratory Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Laboratory Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Laboratory Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the

Task 7 Complete Build of Laboratory and Conduct Unit and System Testing	
	issues list by mutual agreement, and documented severity levels identified.

Exhibit A.11 (Pharmacy and Medication Management Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

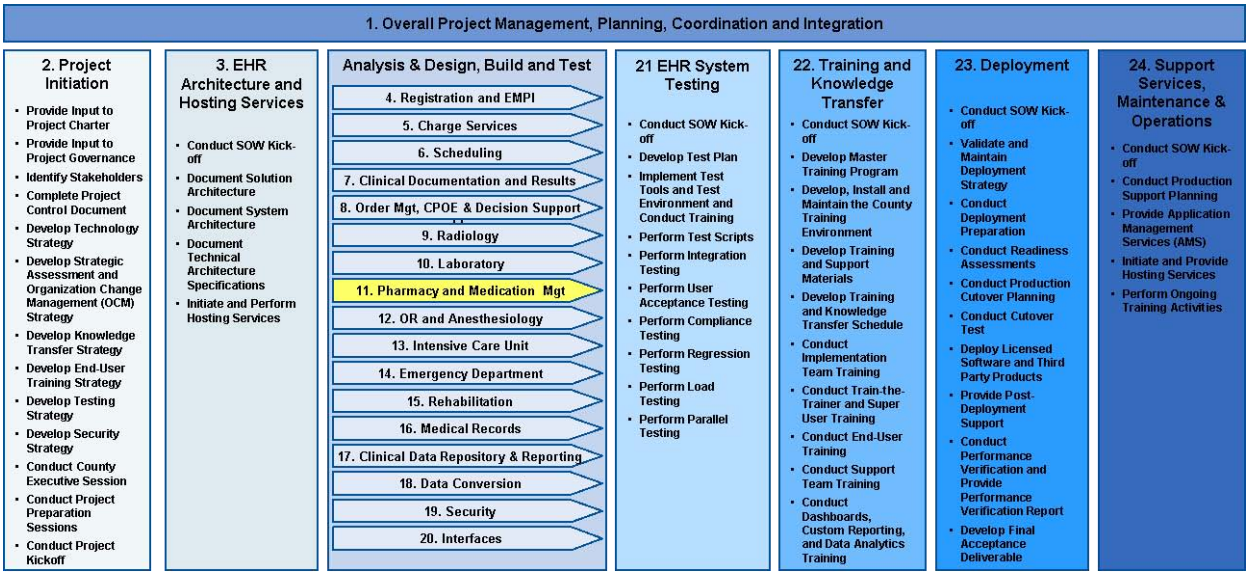
1. Introduction

This Exhibit A.11 (Pharmacy and Medication Management Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.11 (Pharmacy and Medication Management Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.11 (Pharmacy and Medication Management Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Pharmacy and Medication Management as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Pharmacy and Medication Management, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Pharmacy – Inpatient Pharmacy
- Pharmacy – Departmental Clinical Supply Chain
- CareNet – Medication Administration Record
- Point of Care Medication Administration - Tethered

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.11 (Pharmacy and Medication Management Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.11 (Pharmacy and Medication Management Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Pharmacy and Medication Management Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Pharmacy and Medication Management SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Pharmacy and Medication Management	Deliverable 1.1 SOW Sub-Project Work Plan - Pharmacy and Medication Management
Subtask 1.2 Conduct Initiation Session for Pharmacy and Medication Management Workgroup	Deliverable 1.2 Pharmacy and Medication Management Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data	Deliverable 3.2 System Review Data Collection

Tasks/ Subtasks	Deliverables
Collection (System Review Follow-Up)	
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Pharmacy and Medication Management Workflow Workshop	Deliverable 4.4 Pharmacy and Medication Management Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Pharmacy and Medication Management Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Pharmacy and Medication Management
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project

Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Pharmacy and Medication Management-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this

SOW (referred to in this Exhibit as the "**County Pharmacy and Medication Management Workgroup**" or "**County Workgroup**") and the County Pharmacy and Medication Management Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Pharmacy and Medication Management Architect;
  - Contractor Pharmacy and Medication Management Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County Pharmacy and Medication Management SOW Lead;
  - County Pharmacy and Medication Management Workgroup;
  - County Transformation Lead;
  - County Pharmacy and Medication Management Analyst;
  - County Project Director;
  - County Project Manager; and
  - County Integration Architect.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – Pharmacy and Medication Management As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Pharmacy and Medication Management-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and	**Deliverable 1.1 Pharmacy and Medication Management Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Pharmacy and Medication Management specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Pharmacy and Medication Management-specific sub-Project Work Plan.

• Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.11 (Pharmacy and Medication Management Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for Pharmacy and Medication Management Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.11 (Pharmacy and Medication Management Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Pharmacy and Medication Management capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Pharmacy and Medication Management functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Demonstrate Medication Reconciliation functionality and documentation across all medication reconciliation. • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-	**Deliverable 1.2 Pharmacy and Medication Management Initiation Session** • Pharmacy and Medication Management Initiation Session materials for County review one (1) week prior to Pharmacy and Medication Management Initiation Session. • Initial list of County Domains, Venues and Locations for which Pharmacy and Medication Management capabilities must be delivered for review during Pharmacy and Medication Management Initiation Session. • Demonstration of Pharmacy and Medication Management functionality. • List of County Workgroup members who attended the Pharmacy and Medication Management Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Pharmacy and Medication Management Initiation Session and other County stakeholders as mutually agreed upon. • Demonstrated Medication Reconciliation functionality and documentation across all

learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	medication reconciliation. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Pharmacy and Medication Management Initiation Session. • Pharmacy and Medication Management Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Pharmacy and Medication Management Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Pharmacy and Medication Management Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants.

Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County

	personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Pharmacy and Medication Management Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Pharmacy and Medication Management SOW Lead;
  ○ County Pharmacy and Medication Management Analyst;
  ○ County Pharmacy and Medication Management Workgroup; and
  ○ County Pharmacy and Medication Management SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, including third party vendors and medication automation for the workflow assessment across all DHS Clusters.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is

Task 2 Conduct Current State Assessment	
Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Pharmacy and Medication Management workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	**Deliverable 2.2 Workflow Assessment** • Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. • Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. • Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** • Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. • County reviewed and Approved findings.

Task 2 Conduct Current State Assessment	
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Pharmacy and Medication Management components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage Pharmacy and Medication Management. ● Documented County-Approved metrics to be utilized to determine success. ● Recommendations for identifying implications with other workflows. ● Recommendations for identifying industry best practices. ● Documented risks. **Acceptance Criteria:** ● County Approval of the Risk and Opportunities Documentation. ● County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. ● Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. ● County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Pharmacy and Medication Management Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Pharmacy and Medication Management SOW Lead
  ○ County Pharmacy and Medication Management Workgroup
  ○ County Pharmacy and Medication Management SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will:	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed.

Task 3 Conduct System Review	
• Conduct a Pharmacy and Medication Management for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Pharmacy and Medication Management Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**").	• System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Pharmacy and Medication Management. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report.

Task 3 Conduct System Review	
Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design	• Demonstration of Pharmacy and Medication Management covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Pharmacy and Medication Management process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Pharmacy and Medication Management. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality,	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Pharmacy and Medication Management process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Pharmacy and Medication Management processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM

Task 3 Conduct System Review	

training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;

Task 4 Conduct Design Review	
○ Contractor Pharmacy and Medication Management Delivery Consultant; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect • County Key Employees ○ County Project Director; ○ County Project Manager; ○ County Pharmacy and Medication Management Lead Analyst; and ○ County Pharmacy and Medication Management SOW Workgroup.	
Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online.	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Pharmacy and Medication Management workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session).

Task 4 Conduct Design Review	
• Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Pharmacy and Medication Management. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Pharmacy and Medication Management and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required	• County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Pharmacy and Medication Management data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	

Task 4 Conduct Design Review	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Pharmacy and Medication Management. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail.	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Pharmacy and Medication Management. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document

Task 4 Conduct Design Review	
• Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Pharmacy and Medication Management workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Pharmacy and Medication Management processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics,

Task 4 Conduct Design Review	
covering the complete range of Pharmacy and Medication Management processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Pharmacy and Medication Management; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Pharmacy and Medication Management downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and	procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Pharmacy and Medication Management downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Pharmacy and Medication Management Workflow Workshop Contractor will conduct Pharmacy and Medication Management Workflow Workshops as needed in which the future state workflows for Pharmacy and Medication Management will be demonstrated to County and decisions required for the design of Pharmacy and Medication Management functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Pharmacy and Medication Management. • Discuss the key decision points related to automation of capture and management of Pharmacy and Medication Management. • Document the key design decisions and desired outcomes related to Pharmacy and Medication Management in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Pharmacy and Medication Management in the DDMs. • Compare and contrast design elements for Pharmacy and Medication Management and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there	**Deliverable 4.4 Pharmacy and Medication Management Workflow Workshop** • Agenda/Schedule for Pharmacy and Medication Management Workflow Workshops. • Attendance sheet/roster of participants for Pharmacy and Medication Management Workflow Workshop (agenda and presentation). • List of materials for Pharmacy and Medication Management Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Pharmacy and Medication Management Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Pharmacy and Medication Management. **Acceptance Criteria:** • County-Approved Pharmacy and Medication Management Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed

Task 4 Conduct Design Review	
is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Pharmacy and Medication Management Domain. • At the end of the Pharmacy and Medication Management Workflow Workshop, Contractor will draft and finalize the Pharmacy and Medication Management Workflow Workshop Event Summary Report.	upon next steps. • County Approval of the design elements and design decisions.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Pharmacy and Medication Management Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Pharmacy and Medication Management final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build	
Task Description	
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Pharmacy and Medication Management Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Pharmacy and Medication Management SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Pharmacy and Medication Management Analyst; and
  ○ County Pharmacy and Medication Management SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Pharmacy and Medication Management processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.

Task 5 Complete Initial Partial System Build	
be included in the Initial Partial System Build.	
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Pharmacy and Medication Management. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Pharmacy and Medication Management and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Pharmacy and Medication Management Licensed Software.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Pharmacy and Medication Management Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Pharmacy and Medication Management SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Pharmacy and Medication Management Analyst;
  ○ County Pharmacy and Medication Management SOW Workgroup; and
  ○ County Pharmacy and Medication Management SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts

Task 6 Conduct System Validation	
Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Pharmacy and Medication Management reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Pharmacy and Medication Management Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing.	to be adapted for County. • System Validation Session Event Summary Report for Pharmacy and Medication Management Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Pharmacy and Medication Management Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Pharmacy and Medication Management Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate	

Task 6 Conduct System Validation	
design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Pharmacy and Medication Management and Conduct Unit and System Testing

Task Description

Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County.

Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Pharmacy and Medication Management Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect;
  - Contractor Integration Architect; and
  - Contractor Test Lead.
- County Key Employees
  - County Pharmacy and Medication Management SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Pharmacy and Medication Management Analyst; and
  - County Pharmacy and Medication Management SOW Workgroup.

Subtasks/Deliverables

Subtask 7.1 Complete System Build	**Deliverable 7.1 Complete System Build for Pharmacy and Medication Management**
Contractor will iteratively build Pharmacy and Medication Management Licensed Software functionality and content until the full build of Pharmacy and Medication Management content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule	• Release Schedule. • Iterative releases of Pharmacy and Medication Management Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Pharmacy and Medication Management Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status

Task 7 Complete Build of Pharmacy and Medication Management and Conduct Unit and System Testing	
as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Pharmacy and Medication Management Licensed Software has been fully configured to include all DDMs and DCWs related to Pharmacy and Medication Management.	Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Pharmacy and Medication Management builds meet specifications as documented in the final Detailed Design Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues

Task 7 Complete Build of Pharmacy and Medication Management and Conduct Unit and System Testing	

• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
  ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and
  ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released.
• Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing.
• Document County-Approved gateway criteria.
	Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Pharmacy and Medication Management build as documented in the DCWs and DDMs is complete.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Pharmacy and Medication Management

Task 7 Complete Build of Pharmacy and Medication Management and Conduct Unit and System Testing	

Contractor will:
• Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls.
• Release defect resolutions and implemented change requests as part of the build release cycles.
• Support County in re-testing resolved defects deployed by Contractor.
• Jointly decide with County through the governance process when the Pharmacy and Medication Management build is ready for moving to Integration Testing, based on:
  ○ Completeness of functionality and content;
  ○ Severity of outstanding defects; and
  ○ Severity of outstanding change requests.
	Licensed Software.
	• List of resolved defects, including date of completion, retest results, and County Approval.
	• County-Approved completed Unit and System Testing for Pharmacy and Medication Management Licensed Software.
	
	Acceptance Criteria:
	• Resolution of all outstanding defects defined as required for Pharmacy and Medication Management Licensed Software Acceptance.
	• Licensed Software Build Completion Document provided by Contractor and Approved by County.
	• Gateway criteria have either been achieved or exceptions documented and Approved by Project governance.
	• All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.12 (Operating Room (OR) and Anesthesiology

Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

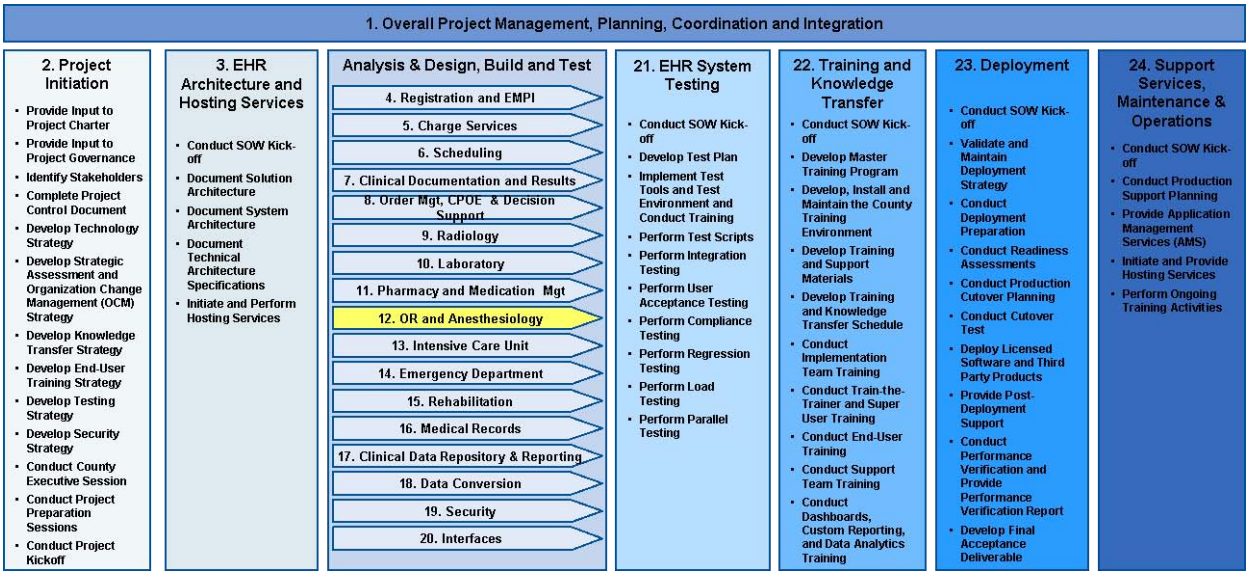
1. Introduction

This Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver OR and Anesthesiology as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of OR and Anesthesiology, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- SurgiNet - Surgical Management
- SurgiNet - Surgery Case Tracking
- SurgiNet - Perioperative Nursing Care Management
- SurgiNet - Departmental Clinical Supply Chain
- SurgiNet – Departmental Scheduling Management
- Anesthesia Management

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and

- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor OR and Anesthesiology Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County OR and Anesthesiology SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - OR and Anesthesiology	Deliverable 1.1 SOW Sub-Project Work Plan - OR and Anesthesiology
Subtask 1.2 Conduct Initiation Session for OR and Anesthesiology Workgroup	Deliverable 1.2 OR and Anesthesiology Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection

Tasks/ Subtasks	Deliverables
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct OR and Anesthesiology Workflow Workshop	Deliverable 4.4 OR and Anesthesiology Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of OR and Anesthesiology Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for OR and Anesthesiology
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found

in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. OR and Anesthesiology -specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County OR and Anesthesiology Workgroup**" or "**County Workgroup**") and the County OR and Anesthesiology Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - OR and Anesthesiology (SurgiNet) Architect;
  - OR and Anesthesiology (SurgiNet) Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County OR and Anesthesiology SOW Lead;
  - County OR and Anesthesiology Workgroup;
  - County Transformation Lead;
  - County OR and Anesthesiology Analyst;
  - County Project Director;
  - County Project Manager; and
  - County OR and Anesthesiology Integration Architect;

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – OR and Anesthesiology

As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include an OR and Anesthesiology-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include:

- Deliverables, tasks, and subtasks;
- Associated dependencies among Deliverables, tasks, and subtasks;
- Resources (hours and roles) required for each Deliverable, task, and subtask;
- Start date and date of completion for each Deliverable, task, and subtask;
- County review period for each Deliverable;
- Acceptance Criteria for each Deliverable;
- County Deliverable review period; and
- Milestones and Key Milestones.

Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and

Deliverable 1.1 OR and Anesthesiology Sub-Project Work Plan – Including All Elements Described in Subtask 1.1

Acceptance Criteria:

- County-Approved OR and Anesthesiology specific sub-Project Work Plan.
- Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.
- Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs.
- Confirmed availability of Contractor resources required to implement the Project Work Plan and OR and Anesthesiology-specific sub-Project Work Plan.

Milestones specific to this Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for OR and Anesthesiology Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.12 (Operating Room (OR) and Anesthesiology Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which OR and Anesthesiology capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate OR and Anesthesiology functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques,	**Deliverable 1.2 OR and Anesthesiology Initiation Session** • OR and Anesthesiology Initiation Session materials for County review one (1) week prior to OR and Anesthesiology Initiation Session. • Initial list of County Domains, Venues and Locations for which OR and Anesthesiology capabilities must be delivered for review during OR and Anesthesiology Initiation Session. • Demonstration of OR and Anesthesiology functionality. • List of County Workgroup members who attended the OR and Anesthesiology Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the OR and Anesthesiology Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the OR and Anesthesiology Initiation Session. • OR and Anesthesiology Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and

measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved OR and Anesthesiology Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the OR and Anesthesiology Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives.

Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives.

	• Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor OR and Anesthesiology Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County OR and Anesthesiology SOW Lead;
  ○ County OR and Anesthesiology Analyst;
  ○ County OR and Anesthesiology Workgroup; and
  ○ County OR and Anesthesiology SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Task 2 Conduct Current State Assessment	
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current OR and Anesthesiology workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	**Deliverable 2.2 Workflow Assessment** ● Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the OR and Anesthesiology components, the Contractor knowledge base, and expertise of Contractor SMEs.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety;

Task 2 Conduct Current State Assessment	
Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage OR and Anesthesiology. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements
• Contractor Key Employees ○ Contractor OR and Anesthesiology Delivery Consultant; ○ Contractor Project Director; ○ Contractor Project Manager;

Task 3 Conduct System Review

- Contractor Clinical Strategist;
- Contractor Integration Architect; and
- Contractor Solution Architect.

- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Integration Architect;
  - County OR and Anesthesiology SOW Lead;
  - County OR and Anesthesiology Analyst;
  - County OR and Anesthesiology Workgroup; and
  - County OR and Anesthesiology SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 3.1 Conduct System Review Session

The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor.

Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

During the System Review Session, Contractor will:

- Conduct an OR and Anesthesiology demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices.
- Demonstrate the information gathering tools and materials used to facilitate the solution design and build process.
- Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process.
- Conduct a review of the OR and

Deliverable 3.1 System Review Session Documents

- List of participants and copies of all materials used for System Review Session (agenda and presentation).
- List of educational objectives for System Review Session.
- Benefits Presentation for System Review Session.
- DCWs.
- DDM on MethodM Online.
- Recommended plan for achieving any outstanding learning objectives which have not been completed.
- System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup
- Completed demonstration of OR and Anesthesiology.
- Verbal and written review of System Review Session Event Summary Report with County.
- List of training for information gathering tools and design/build process.
- List of integration requirements with documentation of areas requiring integration resolutions.
- Validation of completed WBT scripts by all

Task 3 Conduct System Review	
Anesthesiology Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design	participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of OR and Anesthesiology covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW.

Task 3 Conduct System Review	

decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently.
• Create System Review Session event summary report. The System Review Session Event Summary Report will include:
  ○ Online DCW and DDM status for specific solution;
  ○ Unresolved issues from the online DDM;
  ○ Section for Contractor and County counterpart to add additional follow-up items;
  ○ Tasks from the Project Work Plan for specific solution;
  ○ Assessment of County's ability to complete the remaining data collection and design decisions; and
  ○ Report on the status of education by County personnel.
• Incorporate County input and review the System Review Session Event Summary Report with County
• Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities.
• Identify, document, and review next steps for data collection and completion of design documents with County.
Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.
	• Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related

Task 3 Conduct System Review	
County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice OR and Anesthesiology process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the OR and Anesthesiology. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the	to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice OR and Anesthesiology process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the OR and Anesthesiology processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-

Task 3 Conduct System Review	

Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor OR and Anesthesiology Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ Transformation Coordinator;
  ○ County OR and Anesthesiology Integration Architect;
  ○ County OR and Anesthesiology Lead Analyst;
  ○ County OR and Anesthesiology Lead; and
  ○ County OR and Anesthesiology SOW Workgroup.

Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between OR and Anesthesiology workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's

Task 4 Conduct Design Review	
established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to OR and Anesthesiology. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for OR and Anesthesiology and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection	ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the OR and Anesthesiology data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at

Task 4 Conduct Design Review	
process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for OR and Anesthesiology. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for OR and Anesthesiology. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.

Task 4 Conduct Design Review	

Subtask 4.3 Conduct Workflow Localization
The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy.
Contractor will:
• Draft an agenda for meetings that will be held at County facilities and departments for review by the County.
• Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables.
• Conduct crosswalk between OR and Anesthesiology workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks.
• Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows.
• Develop the following Deliverables:
  ○ Future State Workflow Diagrams covering the complete range of OR and Anesthesiology processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems;
  ○ A list and examples of policies and procedures that will need to be created or revised;
  ○ Processes for maintaining and updating OR and Anesthesiology;
  ○ Listing of suggested clinical pathways and decision support algorithms;
  ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve
	Deliverable 4.3 Workflow Localization Documents
	• List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials).
	• Future State Workflow Diagrams covering the complete range of OR and Anesthesiology processes impacted by the Licensed Software.
	• A list and examples of policies and procedures that will need to be created or revised.
	• Listing of suggested decision support algorithms.
	• Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices.
	• Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified.
	• A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.
	• Recommendations for OR and Anesthesiology downtime strategies and documentation, including samples based on County build of Licensed Software.
	• Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented.
	
	Acceptance Criteria:
	• County Approved Workflow Localization

Task 4 Conduct Design Review	
identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for OR and Anesthesiology downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	Documents. ● Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. ● Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. ● Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. ● Suggested changes are achievable within County's resource constraints.
Subtask 4.4 Conduct OR and Anesthesiology Workflow Workshop Contractor will conduct OR and Anesthesiology Workflow Workshops as needed in which the future state workflows for OR and	**Deliverable 4.4 OR and Anesthesiology Workflow Workshop** ● Agenda/Schedule for OR and Anesthesiology Workflow Workshops. ● Attendance sheet/roster of participants for

Task 4 Conduct Design Review	
Anesthesiology will be demonstrated to County and decisions required for the design of OR and Anesthesiology functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for OR and Anesthesiology. • Discuss the key decision points related to automation of capture and management of OR and Anesthesiology. • Document the key design decisions and desired outcomes related to OR and Anesthesiology in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and OR and Anesthesiology in the DDMs. • Compare and contrast design elements for OR and Anesthesiology and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for OR and Anesthesiology Domain. • At the end of the OR and Anesthesiology Workflow Workshop, Contractor will draft and finalize the OR and Anesthesiology Workflow Workshop Event Summary Report.	OR and Anesthesiology Workflow Workshop (agenda and presentation). • List of materials for OR and Anesthesiology Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • OR and Anesthesiology Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for OR and Anesthesiology. **Acceptance Criteria:** • County-Approved OR and Anesthesiology Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document.

Task 4 Conduct Design Review	
specifications for the OR and Anesthesiology Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The OR and Anesthesiology final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	• Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor OR and Anesthesiology Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County OR and Anesthesiology SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County OR and Anesthesiology Analyst; and
  ○ County OR and Anesthesiology SOW Workgroup.

Task 5 Complete Initial Partial System Build	
Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and OR and Anesthesiology processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for OR and Anesthesiology. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation
Task Description
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County OR and Anesthesiology and prepare the County for testing of the design build. Contractor and County will begin the development

Task 6 Conduct System Validation

of unit and system test scripts and test data for the OR and Anesthesiology Licensed Software.

Personnel Requirements

- Contractor Key Employees
  - Contractor OR and Anesthesiology Delivery Consultant;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect.
- County Key Employees
  - County OR and Anesthesiology SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County OR and Anesthesiology Analyst;
  - County OR and Anesthesiology SOW Workgroup; and
  - County OR and Anesthesiology SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 6.1 System Validation Session

Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor.

Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services.

The objectives of the session are to:

- Provide an in-depth demonstration of the solution and build to date using County's Domain.
- Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing.
- Begin development of County-specific unit and system test scripts.
- Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County

Deliverable 6.1 System Validation

- System Validation Session (agenda and presentation).
- Library of sample Unit and System Test scripts to be adapted for County.
- System Validation Session Event Summary Report for OR and Anesthesiology Licensed Software including Issues Log.
- Updated DCWs in MethodM Online.
- Build Audit Report (comparison between DCW and built Domain).
- Updated DDM in MethodM Online.
- Updated Project documents.

Acceptance Criteria:

- County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project.
- County verification that Contractor has

Task 6 Conduct System Validation	
Workgroup. • Validate database build to date of System Validation Session. • Validate proposed OR and Anesthesiology reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the OR and Anesthesiology Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of OR and Anesthesiology Unit and System Test scripts (including test script for reviewing historical data).	provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of OR and Anesthesiology Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live.

Task 6 Conduct System Validation	
• Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of OR and Anesthesiology and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor OR and Anesthesiology Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect;
  ○ Contractor Integration Architect; and
  ○ Contractor Test Lead.
• County Key Employees
  ○ County OR and Anesthesiology SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County OR and Anesthesiology Analyst;

Task 7 Complete Build of OR and Anesthesiology and Conduct System and Unit Testing	
○ County OR and Anesthesiology SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 7.1 Complete System Build Contractor will iteratively build OR and Anesthesiology Licensed Software functionality and content until the full build of OR and Anesthesiology content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the OR and Anesthesiology Licensed Software has been fully configured to include all DDMs and DCWs related to OR and Anesthesiology.	**Deliverable 7.1 Complete System Build for OR and Anesthesiology** • Release Schedule. • Iterative releases of OR and Anesthesiology Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of OR and Anesthesiology Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of OR and Anesthesiology builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of OR and Anesthesiology and Conduct System and Unit Testing	

Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests
 	
As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**").
 	
Contractor will:
 	
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
	Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests
	
	• Updated Release Schedules.
	• Specifications for requested additions of content and functionality.
	• Defect resolution document describing identified defects and Omissions which have been resolved.
	• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
	• Implementation of defect resolutions and County-Approved change requests.
	• Gateway criteria for Unit and System Test completion.
	
	Acceptance Criteria:
	
	• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of OR and Anesthesiology and Conduct System and Unit Testing	
○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the OR and Anesthesiology build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the OR and Anesthesiology build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested OR and Anesthesiology Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for OR and Anesthesiology Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for OR and Anesthesiology Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the

Task 7 Complete Build of OR and Anesthesiology and Conduct System and Unit Testing	
	issues list by mutual agreement, and documented severity levels identified.

Exhibit A.13 (Intensive Care Unit Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

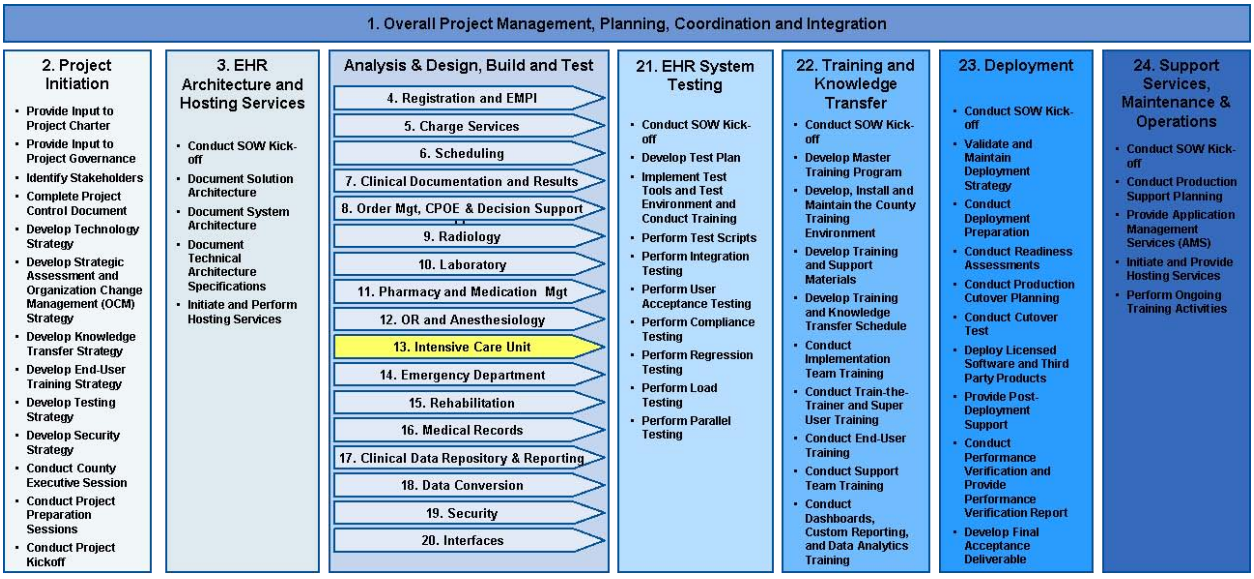
1. Introduction

This Exhibit A.13 (Intensive Care Unit Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.13 (Intensive Care Unit Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.13 (Intensive Care Unit Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Intensive Care Unit as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of the Intensive Care Unit, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Critical Care – Inet Critical Care
- CareAware MultiMedia – Digital Objects

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a

fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.13 (Intensive Care Unit Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.13 (Intensive Care Unit Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Intensive Care Unit Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Intensive Care Unit SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Intensive Care Unit	Deliverable 1.1 SOW Sub-Project Work Plan - Intensive Care Unit
Subtask 1.2 Conduct Initiation Session for Intensive Care Unit Workgroup	Deliverable 1.2 Intensive Care Unit Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Intensive Care Unit Workflow Workshop	Deliverable 4.4 Intensive Care Unit Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)

Tasks/Subtasks	Deliverables
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Intensive Care Unit Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Intensive Care Unit
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Intensive Care Unit-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Intensive Care Unit Workgroup**" or "**County Workgroup**") and the County Intensive Care Unit Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ CareNet Architect;
  ○ CareAware Architect;
  ○ Intensive Care Unit Delivery Consultant;
  ○ Integration Architect; and
  ○ Clinical Strategist.
• County Key Employees
  ○ County Intensive Care Unit SOW Lead;
  ○ County Intensive Care Unit Workgroup
  ○ County Transformation Lead;

○ County Intensive Care Unit Analyst; ○ County Project Director; ○ County Project Manager; and ○ County Integration Architect.	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Intensive Care Unit As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include an Intensive Care Unit-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.13 (Intensive Care Unit Statement of Work) and subject to County Approval**.**	**Deliverable 1.1 Intensive Care Unit Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Intensive Care Unit specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Intensive Care Unit-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Intensive Care Unit Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.13 (Intensive Care Unit Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows:	**Deliverable 1.2 Intensive Care Unit Initiation Session** • Intensive Care Unit Initiation Session materials for County review one (1) week prior to Intensive Care Unit Initiation Session. • Initial list of County Domains, Venues and Locations for which Intensive Care Unit capabilities must be delivered for review during Intensive Care Unit Initiation Session. • Demonstration of Intensive Care Unit

• Review and document Domains, Venues, and Locations for which Intensive Care Unit capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Intensive Care Unit functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and	functionality. • List of County Workgroup members who attended the Intensive Care Unit Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Intensive Care Unit Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Intensive Care Unit Initiation Session. • Intensive Care Unit Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Intensive Care Unit Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Intensive Care Unit Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County.

knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements
• Contractor Key Employees ○ Contractor Intensive Care Unit Delivery Consultant;

Task 2 Conduct Current State Assessment	
○ Contractor Solution Architect; and ○ Contractor Clinical Strategist. ● County Key Employees ○ County Intensive Care Unit SOW Lead; ○ County Intensive Care Unit Analyst; ○ County Intensive Care Unit Workgroup; and ○ County Intensive Care Unit SMEs.	
Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** ● List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** ● List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. ● County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Intensive Care Unit workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across	**Deliverable 2.2 Workflow Assessment** ● Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County.

Task 2 Conduct Current State Assessment	
Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	**Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Intensive Care Unit components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage Intensive Care Unit. ● Documented County-Approved metrics to be utilized to determine success. ● Recommendations for identifying implications with other workflows. ● Recommendations for identifying industry best practices. ● Documented risks. **Acceptance Criteria:** ● County Approval of the Risk and Opportunities Documentation. ● County acknowledgement that originally defined areas of workflow assessment have been accurately assessed.

Task 2 Conduct Current State Assessment	
	• Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review	
Task Description	
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Architect;
  ○ Contractor Intensive Care Unit Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Intensive Care Unit Analyst;
  ○ County Intensive Care Unit SOW Lead;
  ○ County Intensive Care Unit Workgroup; and
  ○ County Intensive Care Unit SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System

Task 3 Conduct System Review	
anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct an Intensive Care Unit demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Intensive Care Unit Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions.	Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Intensive Care Unit. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep

Task 3 Conduct System Review	

• Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design.
• Work with the County Workgroup to begin the initial population of the DCWs.
• Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently.
• Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently.
• Create System Review Session event summary report. The System Review Session Event Summary Report will include:
  ○ Online DCW and DDM status for specific solution;
  ○ Unresolved issues from the online DDM;
  ○ Section for Contractor and County counterpart to add additional follow-up items;
  ○ Tasks from the Project Work Plan for specific solution;
  ○ Assessment of County's ability to complete the remaining data collection and design decisions; and
  ○ Report on the status of education by County personnel.
• Incorporate County input and review the System Review Session Event Summary
	progress on track.
	
	Acceptance Criteria:
	• County-Approved System Review Session agenda.
	• County-Approved System Review Session Event Summary Report.
	• Demonstration of Intensive Care Unit covers all relevant County Domains, Venues, and Locations.
	• Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress.
	• System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW.
	• Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County. Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Intensive Care Unit process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Intensive Care Unit process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Intensive Care Unit processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of

Task 3 Conduct System Review	

DDMs and DCWs to assess the impact on the Intensive Care Unit.
• Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	completeness and comprehensiveness required for successful design, build, and implementation.
	• Documented decisions made related to DDM and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.

Task 4 Conduct Design Review	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Intensive Care Unit Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Intensive Care Unit Analyst;
  ○ County Intensive Care Unit SOW Lead; and
  ○ County Intensive Care Unit SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Intensive Care Unit workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers).

Task 4 Conduct Design Review	
Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Intensive Care Unit. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Intensive Care Unit and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials	**Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Intensive Care Unit data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	

Task 4 Conduct Design Review	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Intensive Care Unit. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Intensive Care Unit. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion.

Task 4 Conduct Design Review	
(on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	**Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Intensive Care Unit workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: o Future State Workflow Diagrams covering the complete range of Intensive Care Unit processes impacted by the Licensed Software and with attention to	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Intensive Care Unit processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.

Task 4 Conduct Design Review	
interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Intensive Care Unit; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Intensive Care Unit downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback	● Recommendations for Intensive Care Unit downtime strategies and documentation, including samples based on County build of Licensed Software. ● Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** ● County Approved Workflow Localization Documents. ● Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. ● Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. ● Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. ● Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Intensive Care Unit Workflow Workshop Contractor will conduct Intensive Care Unit Workflow Workshops as needed in which the future state workflows for Intensive Care Unit will be demonstrated to County and decisions required for the design of Intensive Care Unit functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Intensive Care Unit. • Discuss the key decision points related to automation of capture and management of Intensive Care Unit. • Document the key design decisions and desired outcomes related to Intensive Care Unit in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Intensive Care Unit in the DDMs. • Compare and contrast design elements for Intensive Care Unit and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding.	**Deliverable 4.4 Intensive Care Unit Workflow Workshop** • Agenda/Schedule for Intensive Care Unit Workflow Workshops. • Attendance sheet/roster of participants for Intensive Care Unit Workflow Workshop (agenda and presentation). • List of materials for Intensive Care Unit Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Intensive Care Unit Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Intensive Care Unit. **Acceptance Criteria:** • County-Approved Intensive Care Unit Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
• Refine and augment downtime strategy for Intensive Care Unit Domain. • At the end of the Intensive Care Unit Workflow Workshop, Contractor will draft and finalize the Intensive Care Unit Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Intensive Care Unit Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Intensive Care Unit final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Intensive Care Unit Delivery Consultant;

Task 5 Complete Initial Partial System Build	
○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect; • County Key Employees ○ County Intensive Care Unit SOW Lead; ○ County Project Director; ○ County Project Manager; ○ County Intensive Care Unit Analyst; and ○ County Intensive Care Unit SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment (including relevant Interfaces to external systems and devices) and to include different care providers, different care venues, and disciplines, and Intensive Care Unit processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build (including relevant Interfaces to external systems and devices) for ICU. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Intensive Care Unit. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and

Task 5 Complete Initial Partial System Build	
	DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Intensive Care Unit and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Intensive Care Unit Licensed Software.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Intensive Care Unit Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Intensive Care Unit SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Intensive Care Unit Analyst;
  ○ County Intensive Care Unit SOW Workgroup; and
  ○ County Intensive Care Unit SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Intensive Care Unit Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents.

Task 6 Conduct System Validation	
Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Intensive Care Unit reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Intensive Care Unit Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County.	**Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Intensive Care Unit Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Intensive Care Unit Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing,

Task 6 Conduct System Validation	
• Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Intensive Care Unit and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Intensive Care Unit Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect;
  ○ Contractor Integration Architect; and
  ○ Contractor Test Lead.

Task 7 Complete Build of Intensive Care Unit and Conduct System and Unit Testing

- County Key Employees
  - County Intensive Care Unit SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Intensive Care Unit Analyst;
  - County Intensive Care Unit SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Intensive Care Unit Licensed Software functionality and content until the full build of Intensive Care Unit content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Provide test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Report weekly on progress toward Complete Build, and alert County of any issues or risks.
- Notify County when the Intensive Care Unit Licensed Software has been fully configured to include all DDMs and DCWs related to

Deliverable 7.1 Complete System Build for Intensive Care Unit

- Release Schedule.
- Iterative releases of Intensive Care Unit Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release.
- Complete Build of Intensive Care Unit Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Intensive Care Unit builds meet specifications as documented in the final Detailed Design Document.

<table>
<tr><th colspan="2">Task 7 Complete Build of Intensive Care Unit and Conduct System and Unit Testing</th></tr>
<tr><td>Intensive Care Unit.</td><td></td></tr>
<tr><td>Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests
As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software (“Omissions”).
Contractor will:
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
o Document and verify the requirements to address the Omission in a consistent and structured format;
o Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
o Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;</td><td>Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests
• Updated Release Schedules.
• Specifications for requested additions of content and functionality.
• Defect resolution document describing identified defects and Omissions which have been resolved.
• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
• Implementation of defect resolutions and County-Approved change requests.
• Gateway criteria for Unit and System Test completion.

Acceptance Criteria:
• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
• County validation that Approved changes to address Omissions fully address the documented omission specifications.
• County Approved gateway criteria for unit and system test completion.</td></tr>
</table>

Task 7 Complete Build of Intensive Care Unit and Conduct System and Unit Testing	
○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Intensive Care Unit build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Intensive Care Unit build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Intensive Care Unit Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Intensive Care Unit Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Intensive Care Unit Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and

Task 7 Complete Build of Intensive Care Unit and Conduct System and Unit Testing	
	documented severity levels identified.

Exhibit A.14 (Emergency Department Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

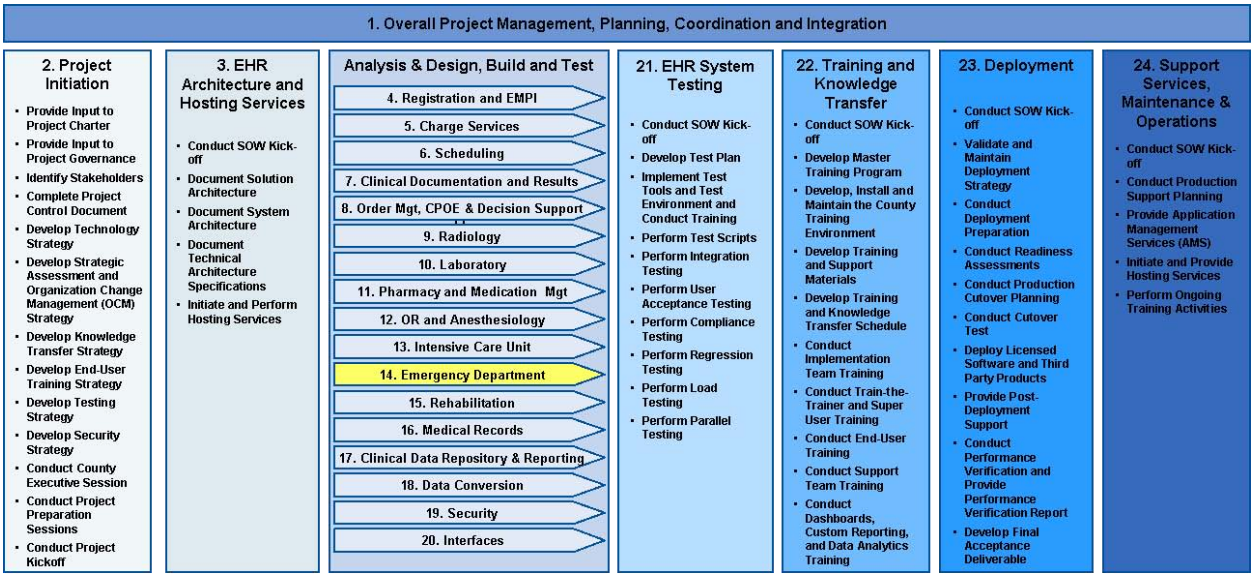
1. Introduction

This Exhibit A.14 (Emergency Department Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.14 (Emergency Department Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.14 (Emergency Department Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Emergency Department and Results as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Emergency Department, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- FirstNet – Emergency Department Triage and Tracking
- FirstNet – Emergency Department Care Management
- FirstNet – ED Coding & Physician Documentation License
- FirstNet – ED Summary MPage

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.14 (Emergency Department Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.14 (Emergency Department Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Emergency Department Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Emergency Department SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Emergency Department	Deliverable 1.1 SOW Sub-Project Work Plan - Emergency Department
Subtask 1.2 Conduct Initiation Session for Emergency Department Workgroup	Deliverable 1.2 Emergency Department Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection

Tasks/ Subtasks	Deliverables
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Emergency Department Workflow Workshop	Deliverable 4.4 Emergency Department Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Emergency Department Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Emergency Department
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found

in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Emergency Department-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Emergency Department Workgroup**" or "**County Workgroup**") and the County Emergency Department Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Emergency Department Architect;
  - Contractor Emergency Department Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County Emergency Department SOW Lead;
  - County Emergency Department Workgroup;
  - County Transformation Lead;
  - County Emergency Department Analyst;
  - County Project Director;
  - County Project Manager;
  - County Integration Architect; and
  - Transformation Coordinator.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – Emergency Department

As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include an Emergency Department-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include:

- Deliverables, tasks, and subtasks;
- Associated dependencies among Deliverables, tasks, and subtasks;
- Resources (hours and roles) required for each Deliverable, task, and subtask;
- Start date and date of completion for each Deliverable, task, and subtask;
- County review period for each Deliverable;
- Acceptance Criteria for each Deliverable;
- County Deliverable review period; and
- Milestones and Key Milestones.

Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which

Deliverable 1.1 Emergency Department Sub-Project Work Plan – Including All Elements Described in Subtask 1.1

Acceptance Criteria:

- County-Approved Emergency Department specific sub-Project Work Plan.
- Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.
- Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs.
- Confirmed availability of Contractor resources required to implement the Project Work Plan and Emergency Department specific sub-Project Work Plan.

includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.14 (Emergency Department Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for Emergency Department Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.14 (Emergency Department Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Emergency Department capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Emergency Department functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure	**Deliverable 1.2 Emergency Department Initiation Session** • Emergency Department Initiation Session materials for County review one (1) week prior to Emergency Department Initiation Session. • Initial list of County Domains, Venues and Locations for which Emergency Department capabilities must be delivered for review during Emergency Department Initiation Session. • Demonstration of Emergency Department functionality. • List of County Workgroup members who attended the Emergency Department Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Emergency Department Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Emergency Department Initiation Session. • Emergency Department Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome

success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	issues and barriers. **Acceptance Criteria:** • County-Approved Emergency Department Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Emergency Department Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports.	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the

• Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Architect;
  ○ Contractor Emergency Department Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Emergency Department SOW Lead;
  ○ County Emergency Department Analyst;
  ○ Transformation Lead/Coordinator;
  ○ County Emergency Department Workgroup; and
  ○ County Emergency Department SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, including devices and equipment, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations, including devices and equipment, for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, including devices and equipment, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County	**Deliverable 2.2 Workflow Assessment** • Documented findings of OWA for all identified and verified Domains, Venues, and

Task 2 Conduct Current State Assessment	
Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Emergency Department workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Emergency Department components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage Emergency Department.

Task 2 Conduct Current State Assessment	
Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	• Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Recommendations for enhancing effective utilization of external services. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Emergency Department Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist; and
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.

Task 3 Conduct System Review

- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Integration Architect;
  - County Emergency Department SOW Lead;
  - County Emergency Department Workgroup;
  - County Emergency Department Analyst;
  - County Transformation Lead;
  - County Emergency Department SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 3.1 Conduct System Review Session	**Deliverable 3.1 System Review Session Documents**
The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct an Emergency Department demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Emergency Department Licensed Software integration requirements, current design decisions, with	• List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Emergency Department. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for

Task 3 Conduct System Review	
all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup	subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Emergency Department covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	

documents design decisions independently.
• Create System Review Session event summary report. The System Review Session Event Summary Report will include:
  ○ Online DCW and DDM status for specific solution;
  ○ Unresolved issues from the online DDM;
  ○ Section for Contractor and County counterpart to add additional follow-up items;
  ○ Tasks from the Project Work Plan for specific solution;
  ○ Assessment of County's ability to complete the remaining data collection and design decisions; and
  ○ Report on the status of education by County personnel.
• Incorporate County input and review the System Review Session Event Summary Report with County
• Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities.
• Identify, document, and review next steps for data collection and completion of design documents with County.
Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	

Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows:	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which

Task 3 Conduct System Review	
• Provide a Best Practice Emergency Department process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Emergency Department. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable. • Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County	includes current and final status of all risks and issues and date of resolution. • Best Practice Emergency Department process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Emergency Department processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions

Task 3 Conduct System Review	

SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Emergency Department Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Transformation Lead;
  ○ County Project Manager;
  ○ County Emergency Department Lead Analyst; and
  ○ County Emergency Department SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants.	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration.

Task 4 Conduct Design Review	
During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to	• Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Emergency Department workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps.

Task 4 Conduct Design Review	
Emergency Department. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Emergency Department and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Emergency Department data	• County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Emergency Department.	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for

Task 4 Conduct Design Review	
• Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	Emergency Department. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Emergency Department processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised.

Task 4 Conduct Design Review	
review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Emergency Department workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams covering the complete range of Emergency Department processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Emergency Department; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Emergency	• Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Emergency Department downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated.

Task 4 Conduct Design Review	
Department downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	• Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.
Subtask 4.4 Conduct Emergency Department Workflow Workshop Contractor will conduct Emergency Department Workflow Workshops as needed in which the future state workflows for Emergency Department will be demonstrated to County and decisions required for the design of Emergency Department functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Emergency Department. • Discuss the key decision points related to automation of capture and management of Emergency Department. • Document the key design decisions and desired outcomes related to Emergency Department in the DDMs.	**Deliverable 4.4 Emergency Department Workflow Workshop** • Agenda/Schedule for Emergency Department Workflow Workshops. • Attendance sheet/roster of participants for Emergency Department Workflow Workshop (agenda and presentation). • List of materials for Emergency Department Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Emergency Department Workflow Workshop

Task 4 Conduct Design Review	
• Document implication of key design decisions related to integration with existing third-party and County systems and Emergency Department in the DDMs. • Compare and contrast design elements for Emergency Department and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Emergency Department Domain. • At the end of the Emergency Department Workflow Workshop, Contractor will draft and finalize the Emergency Department Workflow Workshop Event Summary Report.	Event Summary Report and Issues Log. • Updated downtime strategies for Emergency Department. **Acceptance Criteria:** • County-Approved Emergency Department Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Emergency Department Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Emergency Department final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 4 Conduct Design Review	
Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	

Task 5 Complete Initial Partial System Build	
Task Description	
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Emergency Department Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Emergency Department SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Emergency Department Analyst;
  ○ County Emergency Department SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Emergency Department processes. Contractor will facilitate a review session with County in which it:	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System

Task 5 Complete Initial Partial System Build	
• Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Emergency Department. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation
Task Description
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Emergency Department and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Emergency Department Licensed Software.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Emergency Department Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Emergency Department SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Emergency Department Analyst;
  ○ County Emergency Department SOW Workgroup; and
  ○ County Emergency Department SMEs who represent the end-users from each Domain

Task 6 Conduct System Validation	
and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	
Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Emergency Department reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module).	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Emergency Department Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
• Conduct training sessions on the Emergency Department Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Emergency Department Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Emergency Department Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members.	

Task 6 Conduct System Validation	
• Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Emergency Department and Conduct System and Unit Testing

Task Description

Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County.

Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Emergency Department Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect;
  - Contractor Integration Architect; and
  - Contractor Test Lead.
- County Key Employees
  - County Emergency Department SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Emergency Department Analyst;
  - County Emergency Department SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build	**Deliverable 7.1 Complete System Build for Emergency Department**
Contractor will iteratively build Emergency Department Licensed Software functionality and content until the full build of Emergency Department content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality	• Release Schedule. • Iterative releases of Emergency Department Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Emergency Department Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report.

Task 7 Complete Build of Emergency Department and Conduct System and Unit Testing	
delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Emergency Department Licensed Software has been fully configured to include all DDMs and DCWs related to Emergency Department.	• Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Emergency Department builds meet specifications as documented in the final Detailed Design Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the

Task 7 Complete Build of Emergency Department and Conduct System and Unit Testing	

Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
  ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
  ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and
  ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released.
• Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing.
• Document County-Approved gateway criteria.
	documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Emergency Department build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Emergency Department Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Emergency Department Licensed

Task 7 Complete Build of Emergency Department and Conduct System and Unit Testing	
change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Emergency Department build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Emergency Department Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.15 (Rehabilitation Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

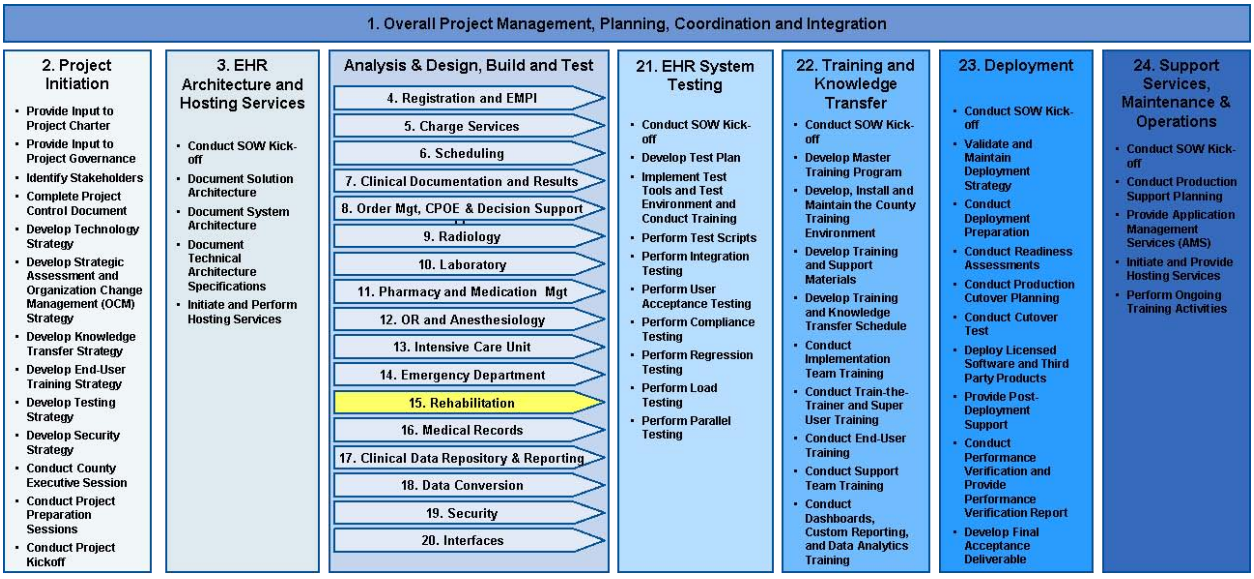
1. Introduction

This Exhibit A.15 (Rehabilitation Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.15 (Rehabilitation Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.15 (Rehabilitation Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Rehabilitation as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Rehabilitation, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Executable Knowledge for Rehabilitation (Inpatient)
- Executable Knowledge for Rehabilitation (Outpatient)

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a

fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.15 (Rehabilitation Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.15 (Rehabilitation Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Rehabilitation Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Rehabilitation SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Rehabilitation	Deliverable 1.1 SOW Sub-Project Work Plan - Rehabilitation
Subtask 1.2 Conduct Initiation Session for Rehabilitation Workgroup	Deliverable 1.2 Rehabilitation Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Rehabilitation Workflow Workshop	Deliverable 4.4 Rehabilitation Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)

Tasks/ Subtasks	Deliverables
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Rehabilitation Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Rehabilitation
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Rehabilitation-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Rehabilitation Workgroup**" or "**County Workgroup**") and the County Rehabilitation Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Rehabilitation Solution Architect;
  ○ Rehabilitation Delivery Consultant;
  ○ Integration Architect; and
  ○ Clinical Strategist.
• County Key Employees
  ○ County Rehabilitation SOW Lead;
  ○ County Rehabilitation Workgroup;
  ○ County Transformation Lead;
  ○ County Rehabilitation Analyst;

○ County Project Director; ○ County Project Manager; and ○ County Integration Architect.	
Subtasks/Deliverables	
Subtask 1.1 Develop Detailed Sub-Project Work Plan – Rehabilitation As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Rehabilitation-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.15 (Rehabilitation Statement of Work) and subject to County Approval**.**	**Deliverable 1.1 Rehabilitation Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Rehabilitation specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Rehabilitation-specific sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for Rehabilitation Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.15 (Rehabilitation Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows:	**Deliverable 1.2 Rehabilitation Initiation Session** • Rehabilitation Initiation Session materials for County review one (1) week prior to Rehabilitation Initiation Session. • Initial list of County Domains, Venues and Locations for which Rehabilitation capabilities must be delivered for review during Rehabilitation Initiation Session. • Demonstration of Rehabilitation functionality.

• Review and document Domains, Venues, and Locations for which Rehabilitation capabilities will be triggered and utilized within County (including external referral sources). • Demonstrate Rehabilitation functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and	• List of County Workgroup members who attended the Rehabilitation Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Rehabilitation Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Rehabilitation Initiation Session. • Rehabilitation Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Rehabilitation Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Rehabilitation Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County.

knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	• Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment
Task Description
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.
Personnel Requirements
• Contractor Key Employees ○ Contractor Architect;

Task 2 Conduct Current State Assessment	
○ Contractor Rehabilitation Delivery Consultant; ○ Contractor Solution Architect; and ○ Contractor Clinical Strategist. • County Key Employees ○ County Rehabilitation SOW Lead; ○ County Rehabilitation Analyst; ○ County Rehabilitation Workgroup; ○ County Rehabilitation SMEs; ○ County Project Director; ○ County Transformation Lead; ○ County Integration Architect.	
Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment including devices and equipment e.g. seating pressure, audiology, remote monitoring, for the Workflow Assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations including devices and equipment e.g. seating pressure, audiology, remote monitoring, for the Workflow Assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, including devices and equipment (e.g., seating pressure, audiology, remote monitoring) is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations, including devices and equipment e.g. seating pressure, audiology, remote monitoring,.
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Rehabilitation workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows.	**Deliverable 2.2 Workflow Assessment** • Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. • Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to

Task 2 Conduct Current State Assessment	
Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	be recognized and addressed. • Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** • Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. • County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Rehabilitation components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** • Workflow assessment report including completed OWA tool and identified risks and opportunities report. • Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage Rehabilitation. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices.

Task 2 Conduct Current State Assessment	
	• Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Rehabilitation Delivery Consultant;
  ○ County Project Director;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Rehabilitation Analyst;
  ○ County Rehabilitation SOW Lead;
  ○ County Rehabilitation Workgroup; and
  ○ County Rehabilitation SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Rehabilitation demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Rehabilitation Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Rehabilitation. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting

Task 3 Conduct System Review	
relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution;	County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Rehabilitation covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
○ Assessment of County's ability to complete the remaining data collection and design decisions; and ○ Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Rehabilitation process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Rehabilitation process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Rehabilitation processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as

Task 3 Conduct System Review	
with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Rehabilitation. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable. • Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead. • Weekly calls and/or meetings of at least sixty (60) minutes will: ○ Discuss progress compared to timelines documented in the Project Work Plan; and ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate. • Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.	needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). **Acceptance Criteria:** • Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process. • County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review). • Identified issues are resolved and or closed.

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Rehabilitation Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Rehabilitation Analyst;
  ○ County Project Director;
  ○ County Rehabilitation Lead;
  ○ County Rehabilitation Lead Analyst; and
  ○ County Rehabilitation SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Rehabilitation

Task 4 Conduct Design Review	
received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Rehabilitation. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Rehabilitation and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision.	workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Rehabilitation data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel.	

Task 4 Conduct Design Review	
• Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Rehabilitation. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above.	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Rehabilitation. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule.

Task 4 Conduct Design Review	
• Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	• Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Rehabilitation workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Rehabilitation processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified. • A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics,

Task 4 Conduct Design Review	
covering the complete range of Rehabilitation processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Rehabilitation; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Rehabilitation downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the	procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Rehabilitation downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Rehabilitation Workflow Workshop Contractor will conduct Rehabilitation Workflow Workshops as needed in which the future state workflows for Rehabilitation will be demonstrated to County and decisions required for the design of Rehabilitation functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Rehabilitation. • Discuss the key decision points related to automation of capture and management of Rehabilitation. • Document the key design decisions and desired outcomes related to Rehabilitation in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Rehabilitation in the DDMs. • Compare and contrast design elements for Rehabilitation and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel.	**Deliverable 4.4 Rehabilitation Workflow Workshop** • Agenda/Schedule for Rehabilitation Workflow Workshops. • Attendance sheet/roster of participants for Rehabilitation Workflow Workshop (agenda and presentation). • List of materials for Rehabilitation Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Rehabilitation Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Rehabilitation. **Acceptance Criteria:** • County-Approved Rehabilitation Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
• Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Rehabilitation Domain. • At the end of the Rehabilitation Workflow Workshop, Contractor will draft and finalize the Rehabilitation Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Rehabilitation Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Rehabilitation final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.

Task 5 Complete Initial Partial System Build	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Rehabilitation Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect;
• County Key Employees
  ○ County Rehabilitation SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Rehabilitation Analyst; and
  ○ County Rehabilitation SOW Workgroup.	

Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Rehabilitation processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Rehabilitation.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the

Task 5 Complete Initial Partial System Build	
Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation

Task Description

Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Rehabilitation and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Rehabilitation Licensed Software.

Personnel Requirements

- Contractor Key Employees
  - Contractor Rehabilitation Delivery Consultant;
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect.
- County Key Employees
  - County Rehabilitation SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Rehabilitation Analyst;
  - County Rehabilitation SOW Workgroup; and
  - County Rehabilitation SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 6.1 System Validation Session	Deliverable 6.1 System Validation
Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to:	• System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Rehabilitation Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between

Task 6 Conduct System Validation	
• Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Rehabilitation reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Rehabilitation Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation	DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Rehabilitation Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Rehabilitation Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data.	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality

Task 6 Conduct System Validation	
Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Rehabilitation and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;

Task 7 Complete Build of Rehabilitation and Conduct System and Unit Testing	
○ Contractor Rehabilitation Delivery Consultant; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; ○ Contractor Integration Architect; and ○ Contractor Test Lead. • County Key Employees ○ County Rehabilitation SOW Lead; ○ County Project Director; ○ County Project Manager; ○ County Rehabilitation Analyst; and ○ County Rehabilitation SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 7.1 Complete System Build Contractor will iteratively build Rehabilitation Licensed Software functionality and content until the full build of Rehabilitation content and functionality is complete. Specific Contractor activities include: • Develop a Release Schedule. • Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment. • Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use. • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release. • Define test scripts to validate interfaces with third-party vendor systems, services, and devices. • Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions. • Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete	**Deliverable 7.1 Complete System Build for Rehabilitation** • Release Schedule. • Iterative releases of Rehabilitation Licensed Software content and functionality for Unit and System Testing. • Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release. • Complete Build of Rehabilitation Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document. • Weekly updates on status of release and defect fixes as part of the Project Status Report. • Test scripts validating interfaces with third-party vendor systems, services, and devices. **Acceptance Criteria** • County validation that releases of Rehabilitation builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of Rehabilitation and Conduct System and Unit Testing	
Build, and alert County of any issues or risks. • Notify County when the Rehabilitation Licensed Software has been fully configured to include all DDMs and DCWs related to Rehabilitation.	

Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests
As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**").
Contractor will:
• Provide ad hoc telephone, e-mail, and in-person support to the County testing teams.
• Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc.
• Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions.
• Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online.
• Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released.
• Address identified Omissions as follows:
  ○ Document and verify the requirements to address the Omission in a consistent and structured format;
  ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new
	Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests
	• Updated Release Schedules.
	• Specifications for requested additions of content and functionality.
	• Defect resolution document describing identified defects and Omissions which have been resolved.
	• Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved.
	• Implementation of defect resolutions and County-Approved change requests.
	• Gateway criteria for Unit and System Test completion.
	Acceptance Criteria:
	• County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log.
	• County validation that Approved changes to address Omissions fully address the documented omission specifications.
	• County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Rehabilitation and Conduct System and Unit Testing	
content or functionality will be released; ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Rehabilitation build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor. • Jointly decide with County through the governance process when the Rehabilitation build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Rehabilitation Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Rehabilitation Licensed Software. **Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Rehabilitation Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain,

Task 7 Complete Build of Rehabilitation and Conduct System and Unit Testing	
○ Severity of outstanding change requests.	but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.16 (Medical Records Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

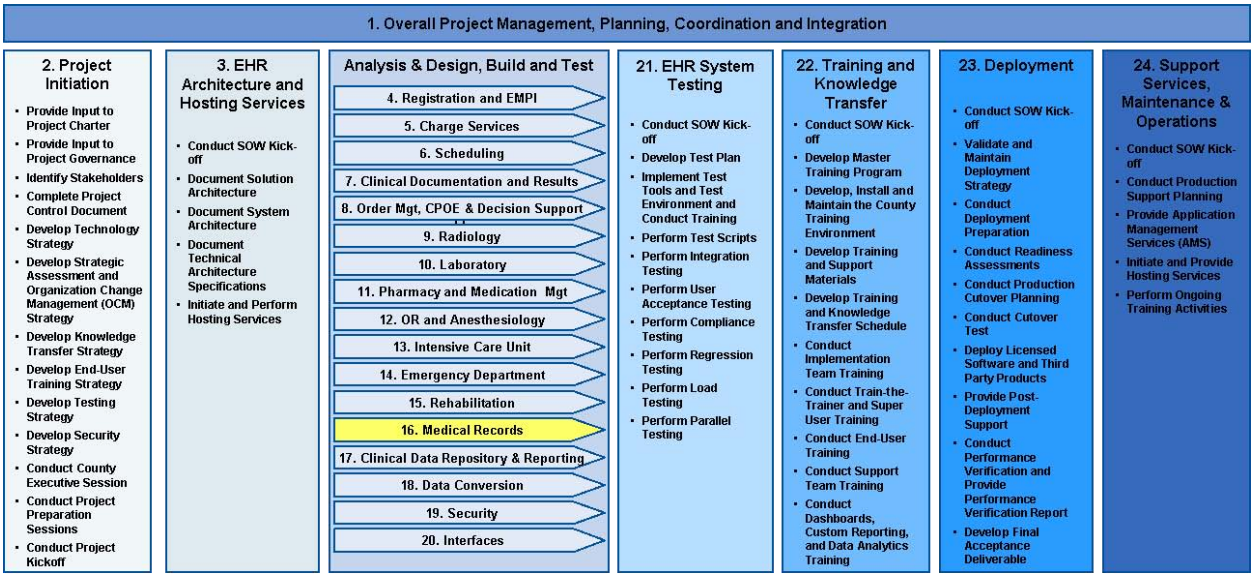
1. Introduction

This Exhibit A.16 (Medical Records Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.16 (Medical Records Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.16 (Medical Records Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Medical Records as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Medical Records, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Cerner Health Information Management
- HIM – Chart Deficiency and Management
- HIM – Chart Location and Patient Care Chart Requests
- HIM - Coding and Abstracting (with PC Encoder Interface)
- HIM – Release of Information

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined –Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.16 (Medical Records Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.16 (Medical Records Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Medical Records Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Medical Records SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Medical Records	Deliverable 1.1 SOW Sub-Project Work Plan - Medical Records
Subtask 1.2 Conduct Initiation Session for Medical Records Workgroup	Deliverable 1.2 Medical Records Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents

Tasks/ Subtasks	Deliverables
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Medical Records Workflow Workshop	Deliverable 4.4 Medical Records Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Medical Records Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Medical Records
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Medical Records-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Medical Records Workgroup**" or "**County Workgroup**") and the County Medical Records Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor;
  ○ Medical Records Architect;

<table>
<tr><td colspan="2">

Contractor Medical Records Delivery Consultant;
Integration Architect; and
Clinical Strategist.

County Key Employees

County Medical Records SOW Lead;
County Medical Records Workgroup;
County Transformation Lead;
County Medical Records Analyst;
County Project Director;
County Project Manager; and
County Integration Architect.

</td></tr>
<tr><td colspan="2">Subtasks/Deliverables</td></tr>
<tr><td>Subtask 1.1 Develop Detailed Sub-Project Work Plan – Medical Records
As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Medical Records-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include:
• Deliverables, tasks, and subtasks;
• Associated dependencies among Deliverables, tasks, and subtasks;
• Resources (hours and roles) required for each Deliverable, task, and subtask;
• Start date and date of completion for each Deliverable, task, and subtask;
• County review period for each Deliverable;
• Acceptance Criteria for each Deliverable;
• County Deliverable review period; and
• Milestones and Key Milestones.
Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.16 (Medical Records Statement of Work) and subject to County Approval.</td><td>Deliverable 1.1 Medical Records Sub-Project Work Plan – Including All Elements Described in Subtask 1.1
Acceptance Criteria:
• County-Approved Medical Records specific sub-Project Work Plan.
• Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.
• Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs.
• Confirmed availability of Contractor resources required to implement the Project Work Plan and Medical Records-specific sub-Project Work Plan.</td></tr>
<tr><td>Subtask 1.2 Conduct Initiation Session for Medical Records Workgroup</td><td>Deliverable 1.2 Medical Records Initiation Session
• Medical Records Initiation Session materials</td></tr>
</table>

Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.16 (Medical Records Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Medical Records capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Medical Records (coding, release of Information, abstraction, deficiency review, etc.) functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g)	for County review one (1) week prior to Medical Records Initiation Session. • Initial list of County Domains, Venues and Locations for which Medical Records capabilities must be delivered for review during Medical Records Initiation Session. • Demonstration of Medical Records functionality. • List of County Workgroup members who attended the Medical Records Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Medical Records Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Medical Records Initiation Session. • Medical Records Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Medical Records Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation

guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Medical Records Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives.	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed.

• Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation.
 	
The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks.
 	
During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan.
 	
Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.
	• Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests.
	
	• Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County.
	
	• Weekly updates demonstrate that, on an ongoing basis:
	  ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and
	  ○ Additional training is appropriate to achieve remediation for identified deficiencies.
	
	• Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals.
	
	• Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks.
	
	• Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts.
	
	• Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved.
	
	• Approval by County of County Workgroup readiness to use training tools.
	
	• County SOW Lead Approval of updated learning objectives.
	
	• Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Medical Records Delivery Consultant;
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Medical Records SOW Lead;
  ○ County Medical Records Analyst;
  ○ County Medical Records Workgroup;
  ○ County Medical Records SMEs;
  ○ County Project Director; and
  ○ County Integration Architect.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead regarding scheduling.	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Subtask 2.2 Conduct Workflow Assessment
In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Medical Records workflow processes and provide the framework
	Deliverable 2.2 Workflow Assessment
	• Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to:
	  ○ Worksheets;
	  ○ Recommended workflows; and

Task 2 Conduct Current State Assessment	
and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Medical Records components, the Contractor knowledge base, and expertise of Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. ● Recommendations for improved processes to manage Medical Records. ● Documented County-Approved metrics to be utilized to determine success. ● Recommendations for identifying implications with other workflows.

Task 2 Conduct Current State Assessment	
	• Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Medical Records Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor Solution Architect.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Integration Architect;
  ○ County Medical Records Analyst;
  ○ County Medical Records SOW Lead;
  ○ County Medical Records Workgroup; and

Task 3 Conduct System Review	
○ County Medical Records SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.	
Subtasks/ Deliverables	
Subtask 3.1 Conduct System Review Session The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Medical Records demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to be used in the design and build process. • Conduct a review of the Medical Records Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during	**Deliverable 3.1 System Review Session Documents** • List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Medical Records. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM.

Task 3 Conduct System Review	
comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County	• Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Medical Records covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.

Task 3 Conduct System Review	
counterpart to add additional follow-up items; ○ Tasks from the Project Work Plan for specific solution; ○ Assessment of County's ability to complete the remaining data collection and design decisions; and ○ Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County. Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Medical Records process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor. • Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Medical Records process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Medical Records processes. • Update Risks and Issue Matrix related to the

Task 3 Conduct System Review	

issues.
• Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed.
• Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM
• Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Medical Records.
• Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources).
• Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
• Contractor Delivery Consultant will be available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix
	completion of DDM and DCWs with alerts to County of any risks to schedule.
	• Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule.
	• Contractor Delivery Consultant support through ad hoc calls and e-mails.
	• Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation.
	• Documented decisions made related to DDM and DCWs.
	• Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources).
	• Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).
	
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 3 Conduct System Review	
related to the completion of DDMs and DCWs and alert County of any risks to schedule.	

Task 4 Conduct Design Review	
Task Description	
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Medical Records Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Medical Records Lead Analyst; and
  ○ County Medical Records SOW Workgroup.	

Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible

Task 4 Conduct Design Review	
will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Medical Records. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Medical Records and other related SOWs to	Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Medical Records workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build. • Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Medical Records data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress,	

Task 4 Conduct Design Review	
as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Medical Records. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g.,	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Medical Records. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation

Task 4 Conduct Design Review	
through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed and in-process issues have current updates.
Subtask 4.3 Conduct Workflow Localization The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy. Contractor will: • Draft an agenda for meetings that will be held at County facilities and departments for review by the County. • Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables. • Conduct crosswalk between Medical Records workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks. • Work with County personnel to identify necessary and recommended changes to	**Deliverable 4.3 Workflow Localization Documents** • List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials). • Future State Workflow Diagrams covering the complete range of Medical Records processes impacted by the Licensed Software. • A list and examples of policies and procedures that will need to be created or revised. • Listing of suggested decision support algorithms. • Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices. • Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified.

Task 4 Conduct Design Review	
policy, procedures, and bylaws required to implement future workflows. • Develop the following Deliverables: ○ Future State Workflow Diagrams covering the complete range of Medical Records processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems; ○ A list and examples of policies and procedures that will need to be created or revised; ○ Processes for maintaining and updating Medical Records; ○ Listing of suggested clinical pathways and decision support algorithms; ○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Medical Records downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations	• A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance. • Recommendations for Medical Records downtime strategies and documentation, including samples based on County build of Licensed Software. • Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. **Acceptance Criteria:** • County Approved Workflow Localization Documents. • Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. • Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. • Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. • Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	
Subtask 4.4 Conduct Medical Records Workflow Workshop Contractor will conduct Medical Records Workflow Workshops as needed in which the future state workflows for Medical Records will be demonstrated to County and decisions required for the design of Medical Records functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Medical Records. • Discuss the key decision points related to automation of capture and management of Medical Records. • Document the key design decisions and desired outcomes related to Medical Records in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Medical Records in the DDMs. • Compare and contrast design elements for Medical Records and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process.	**Deliverable 4.4 Medical Records Workflow Workshop** • Agenda/Schedule for Medical Records Workflow Workshops. • Attendance sheet/roster of participants for Medical Records Workflow Workshop (agenda and presentation). • List of materials for Medical Records Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Medical Records Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Medical Records. **Acceptance Criteria:** • County-Approved Medical Records Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and

Task 4 Conduct Design Review	
• Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Medical Records Domain. • At the end of the Medical Records Workflow Workshop, Contractor will draft and finalize the Medical Records Workflow Workshop Event Summary Report.	design decisions.
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Medical Records Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Medical Records final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build

Task Description

Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Medical Records Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect; and
  - Contractor Integration Architect;
- County Key Employees
  - County Medical Records SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Medical Records Analyst; and
  - County Medical Records SOW Workgroup.

Subtasks/ Deliverables

Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary)

Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Medical Records processes.

Contractor will facilitate a review session with County in which it:

- Presents a rationale for how it came up with the recommended content for the Initial Partial System Build;
- Presents the recommended content for the Initial Partial System Build; and
- Obtains feedback from County.

Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.

Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)

- List of recommended content and functional coverage of Initial Partial System Build.
- Facilitated review session of content and functional coverage of Initial Partial System Build.
- Initial Partial System Build content and functional coverage specifications.

Acceptance Criteria:

- County Approved list of content and functional coverage of Initial Partial System Build.
- Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.

Task 5 Complete Initial Partial System Build	
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Medical Records. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** ● Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** ● County Approval of Initial Partial System Build which conforms to documented DDM and DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Medical Records and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Medical Records Licensed Software.	
Personnel Requirements	
● Contractor Key Employees ○ Contractor Medical Records Delivery Consultant; ○ Contractor Project Director; ○ Contractor Project Manager; ○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect. ● County Key Employees ○ County Medical Records SOW Lead; ○ Contractor Project Director; ○ Contractor Project Manager; ○ County Medical Records Analyst; ○ County Medical Records SOW Workgroup; and ○ County Medical Records SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	
Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los	**Deliverable 6.1 System Validation** ● System Validation Session (agenda and presentation). ● Library of sample Unit and System Test scripts to be adapted for County. ● System Validation Session Event Summary Report for Medical Records Licensed

Task 6 Conduct System Validation	
Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain. • Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Medical Records reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Medical Records Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and	Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain). • Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Medical Records Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Medical Records Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session,	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts.

Task 6 Conduct System Validation	
Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will: • Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	• Test data loaded into test environment database. • Documented risks to schedule or to quality and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Medical Records and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.

Task 7 Complete Build of Medical Records and Conduct System and Unit Testing

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Medical Records Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Solution Architect;
  - Contractor Integration Architect; and
  - Contractor Test Lead.
- County Key Employees
  - County Medical Records SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Medical Records Analyst; and
  - County Medical Records SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Medical Records Licensed Software functionality and content until the full build of Medical Records content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.

Deliverable 7.1 Complete System Build for Medical Records

- Release Schedule.
- Iterative releases of Medical Records Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects. applicable to County that have been corrected by the release.
- Complete Build of Medical Records Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Medical Records builds meet specifications as documented in the final Detailed Design

Task 7 Complete Build of Medical Records and Conduct System and Unit Testing	
• Provide test scripts to validate release of new functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Medical Records Licensed Software has been fully configured to include all DDMs and DCWs related to Medical Records.	Document.
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online. • Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released. • Address identified Omissions as follows: ○ Document and verify the requirements to address the Omission in a consistent and	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the documented omission specifications. • County Approved gateway criteria for unit and system test completion.

<table>
<tr><th colspan="2">Task 7 Complete Build of Medical Records and Conduct System and Unit Testing</th></tr>
<tr><td>structured format;
○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released;
○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process;
○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and
○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released.
• Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing.
• Document County-Approved gateway criteria.</td><td></td></tr>
<tr><td>Subtask 7.3 Complete Unit and System Testing
Contractor will notify County once the Medical Records build as documented in the DCWs and DDMs is complete.
Contractor will:
• Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls.
• Release defect resolutions and implemented change requests as part of the build release cycles.
• Support County in re-testing resolved defects deployed by Contractor.
• Jointly decide with County through the governance process when the Medical Records build is ready for moving to Integration Testing, based on:</td><td>Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing
• Documented results of completed and tested Medical Records Licensed Software.
• List of resolved defects, including date of completion, retest results, and County Approval.
• County-Approved completed Unit and System Testing for Medical Records Licensed Software.
Acceptance Criteria:
• Resolution of all outstanding defects defined as required for Medical Records Licensed Software Acceptance.
• Licensed Software Build Completion Document provided by Contractor and</td></tr>
</table>

Task 7 Complete Build of Medical Records and Conduct System and Unit Testing	
○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

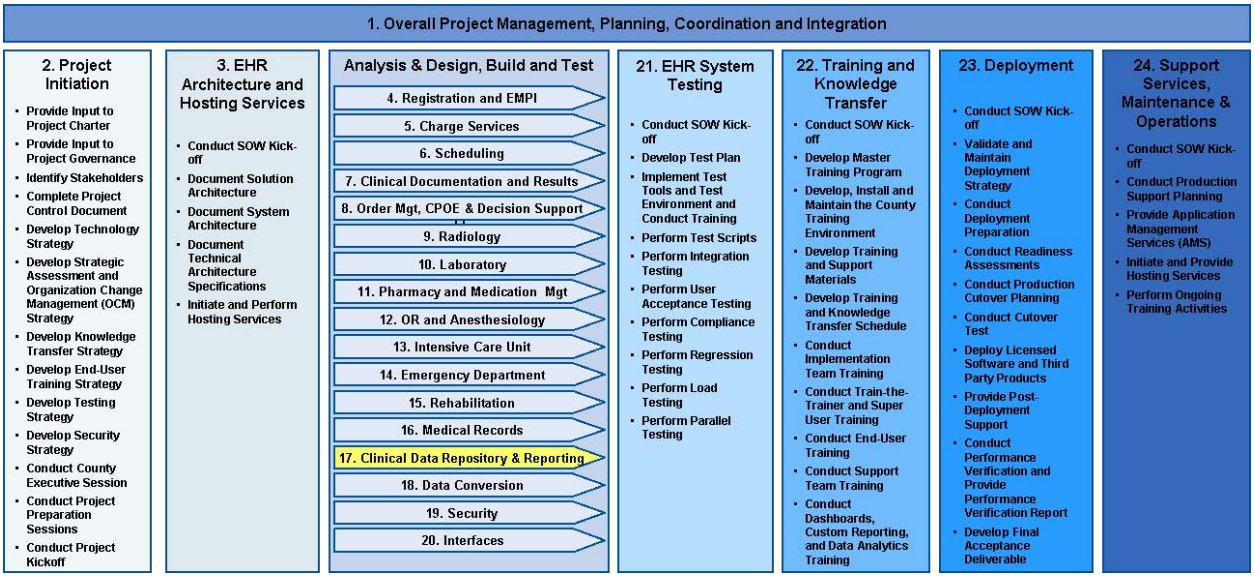
1. Introduction

This Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County workgroup training and preparation in the fundamentals of the use of the Licensed Software and Third-Party Products, as used in conjunction with the Licensed Software and EHR System, (b) analysis of current state workflow, (c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the Licensed Software and Third-Party Products components which are necessary to deliver Clinical Data Repository and Reporting as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Clinical Data Repository and Reporting, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will to be accommodated.

3. SOW Summary

3.1 Overview

This SOW will result in the configuration and implementation of the following Contractor modules:

- Clinical Data Repository
- Clinical Reporting

It will include the design, build, and as applicable, Interface setup, and any needed data migration from the Existing System that will be displaced by the new EHR System components.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide

County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provide the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provide the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table will be developed as part of the Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with the Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor Clinical Data Repository and Reporting Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service Interdependencies, Key Milestones, and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly status reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Clinical Data Repository and Reporting SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Tasks/ Subtasks	Deliverables
Task 1 Conduct SOW Kick-Off/ Mobilization	
Subtask 1.1 Develop Detailed Sub-Project Work Plan - Clinical Data Repository and Reporting	Deliverable 1.1 SOW Sub-Project Work Plan - Clinical Data Repository and Reporting
Subtask 1.2 Conduct Initiation Session for Clinical Data Repository and Reporting Workgroup	Deliverable 1.2 Clinical Data Repository and Reporting Initiation Session (Key Deliverable)
Subtask 1.3 Conduct Comprehension Exercises	Deliverable 1.3 Progress Report on Comprehension Exercises
Task 2 Conduct Current State Assessment	
Subtask 2.1 Identify and Document Domains, Venues, and Locations of Workflow Assessment	Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment
Subtask 2.2 Conduct Workflow Assessment	Deliverable 2.2 Workflow Assessment
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities	Deliverable 2.3 Risk and Opportunities Documentation
Task 3 Conduct System Review	
Subtask 3.1 Conduct System Review Session	Deliverable 3.1 System Review Session Documents
Subtask 3.2 Perform System Review Data Collection (System Review Follow-Up)	Deliverable 3.2 System Review Data Collection

Tasks/ Subtasks	Deliverables
Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session	Deliverable 4.1 Design Session Documents
Subtask 4.2 Conduct Design Review Session Follow-Up	Deliverable 4.2 System Design Data Collection
Subtask 4.3 Conduct Workflow Localization	Deliverable 4.3 Workflow Localization Documents
Subtask 4.4 Conduct Clinical Data Repository and Reporting Workflow Workshop	Deliverable 4.4 Clinical Data Repository and Reporting Workflow Workshop
Subtask 4.5 Develop Final Detailed Design Document	Deliverable 4.5: Final Detail Design Document (Key Deliverable)
Task 5 Complete Partial System Build	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build	Deliverable 5.1 Initial Partial System Build Specification
Subtask 5.2 Complete Initial Partial Build	Deliverable 5.2 Initial Partial System Build
Task 6 Conduct System Validation	
Subtask 6.1 Conduct System Validation Session	Deliverable 6.1 System Validation
Subtask 6.2 Conduct System Validation Session Follow-up	Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing
Task 7 Complete Build of Clinical Data Repository and Reporting Modules and Conduct Unit and System Testing	
Subtask 7.1 Complete System Build	Deliverable 7.1 Complete System Build for Clinical Data Repository and Reporting
Subtask 7.2 Resolve Defects and Implement County Approved Change Requests	Subtask 7.2 Resolved Defects and Implement County Approved Change Requests
Subtask 7.3 Complete Unit and System Testing	Deliverable 7.3 Tested Complete System Build Ready For Integration Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor's obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found

in Section 5.3 (Project Deliverable Expectations Document (DED) Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor shall be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-Off / Mobilization
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Clinical Data Repository and Reporting-specific training on the Licensed Software and Third Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Clinical Data Repository and Reporting Workgroup**" or "**County Workgroup**") and the County Clinical Data Repository and Reporting Workgroup will be

introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Clinical Data Repository and Reporting Architect;
  - Contractor Clinical Data Repository and Reporting Delivery Consultant;
  - Integration Architect; and
  - Clinical Strategist.
- County Key Employees
  - County Clinical Data Repository and Reporting SOW Lead;
  - County Clinical Data Repository and Reporting Workgroup;
  - County Transformation Lead;
  - County Clinical Data Repository and Reporting Analyst;
  - County Project Director;
  - County Integration Architect; and
  - County Integration Architect.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan – Clinical Data Repository and Reporting As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Clinical Data Repository and Reporting-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks; • Resources (hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; • County Deliverable review period; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to	**Deliverable 1.1 Clinical Data Repository and Reporting Sub-Project Work Plan – Including All Elements Described in Subtask 1.1** **Acceptance Criteria:** • County-Approved Clinical Data Repository and Reporting specific sub-Project Work Plan. • Timelines detailed in Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County. • Elements of Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this SOW and other SOWs. • Confirmed availability of Contractor resources required to implement the Project Work Plan and Clinical Data Repository and Reporting-specific sub-Project Work Plan.

create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work) and subject to County Approval**.**	
Subtask 1.2 Conduct Initiation Session for Clinical Data Repository and Reporting Workgroup Contractor will conduct an initiation session to introduce the County Workgroup to the Services covered by this Exhibit A.17 (Clinical Data Repository and Reporting Statement of Work), including the time lines and nature of the work effort that will be required to implement this SOW. Contractor will conduct the initiation session as follows: • Review and document Domains, Venues, and Locations for which Clinical Data Repository and Reporting capabilities will be triggered and utilized within County (e.g., disciplines, service lines, ambulatory vs. inpatient, etc.) • Demonstrate Clinical Data Repository and Reporting functionality using a generic version of the Licensed Software that will be configured for use by County (also known as the "**Open House Domain**"). • Provide training materials and hands on training to the County Workgroup in the use of the Open House Domain, and identify learning expectations and objectives of Open House Domain use. • Train County Workgroup on the Web Based Training tool (also referred to as a "**WBT**") and provide instructions for the County Workgroup to obtain support during self-learning exercises. • Conduct the Leading Strategic Change Workshop to: (a) improve County's ability to create an organizational change campaign to influence behaviors and realize benefits; (b) define and execute effective change strategies; (c) guide County through the	**Deliverable 1.2 Clinical Data Repository and Reporting Initiation Session** • Clinical Data Repository and Reporting Initiation Session materials for County review one (1) week prior to Clinical Data Repository and Reporting Initiation Session. • Initial list of County Domains, Venues and Locations for which Clinical Data Repository and Reporting capabilities must be delivered for review during Clinical Data Repository and Reporting Initiation Session. • Demonstration of Clinical Data Repository and Reporting functionality. • List of County Workgroup members who attended the Clinical Data Repository and Reporting Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • List of identified and validated learning objectives for County Workgroup learning plan. • An Education Tracker to monitor and manage completion of learning objectives, including a summary report on progress and issues logged on MethodM Online. • Log-in credentials to all relevant tools and sites (Open House Domain, MethodM Online) for both participants of the Clinical Data Repository and Reporting Initiation Session and other County stakeholders as mutually agreed upon. • Written instructions and documentation for County Workgroup members to familiarize themselves with materials covered in the Clinical Data Repository and Reporting Initiation Session.

process of introducing and managing change in the organization; (d) review necessary skills, tools, techniques, measurements, and processes to ensure success in managing change; (e) identify strategies to prepare end users for implementation of the Licensed Software; (f) review the timeline, gap analysis, equipment requirements, and supplemental resources to educate end users; and (g) guide County in the preparation of the initial learning plan document. • Train the County Workgroup on the required process and tools used to support Contractor in conducting the workflow assessment, purpose and expected outcome of the workflow assessment, and related activities. • Present and refine learning objectives and work with the County SOW Lead to ensure that learning objectives are understood. • Identify and address issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. • Provide the County Workgroup with an overview of MethodM including system design review activities and data collection processes.	• Clinical Data Repository and Reporting Initiation Session Event Summary Report • List of issues and barriers that may be in the way of achieving learning objectives and provide County with support to overcome issues and barriers. **Acceptance Criteria:** • County-Approved Clinical Data Repository and Reporting Initiation Session Event Summary Report from Contractor documenting that initiation session has been completed and includes accurate documentation of the content, outcomes, and next steps agreed upon at the Initiation Session. • Agreed upon and understood learning objectives for County personnel and Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.
Subtask 1.3 Conduct Comprehension Exercises Subsequent to the Clinical Data Repository and Reporting Initiation Session, Contractor will support the County Workgroup in developing an understanding of and applying knowledge as needed including: • Providing scripts for use by the County Workgroup for training/education exercises. • Monitoring the use of WBTs, and review of MethodM Online. • Providing telephone and e-mail support to County personnel. • Monitoring the Education Tracker for each County workgroup and activity, including	**Deliverable 1.3 Progress Report on Comprehension Exercises** • Open House Domain scripts. • Progress Report on comprehension exercises. • Education Tracker demonstrates successful completion of all learning objectives by all County participants. • Validation by Contractor that County personnel have completed WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup

progress status for each trainee. • Supporting the County education coordinator in running Education Tracker Reports. • Managing and reporting on the progress of learning activities and logging issues on MethodM. • Providing the County SOW Lead with advice and direction to enhance County's achievement of learning objectives. • Providing on-site follow up when the County SOW Lead identifies a substantive or wide spread execution issue that reflects a lack of understanding or ability of County's personnel to execute, and that may be remedied with additional training or orientation. The Contractor Delivery Consultant will report progress to County on a weekly basis on County's success, or lack thereof, in applying knowledge from the initiation sessions, and its observable progress, or lack thereof, in using that knowledge in completing implementation tasks. During comprehension exercises, Contractor will work with the County SOW Lead and the County Workgroup to adjust/add activities and plans if progress is behind the goals stated in the Project Work Plan. Contractor will provide additional training on an as-needed and/or requested basis for the County Workgroup members to ensure that the County Workgroup members have sufficient understanding of tools and methodologies to complete subsequent tasks in a timely manner to meet the Project Schedule.	readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Provided telephone and e-mail support to County personnel as specified in the Agreement. **Acceptance Criteria** • Effective training by Contractor of County personnel on the tasks to be completed. • Complete and successful access to Open House Domain and MethodM Online by the County Workgroup with no outstanding training requests. • Education Tracker demonstrates ongoing education of County Workgroup members sufficient to ensure successful completion of subsequent tasks as outlined in this and other applicable SOWs, as determined by County. • Weekly updates demonstrate that, on an ongoing basis: ○ Deficiencies in educational progress by County Workgroup members are expeditiously identified; and ○ Additional training is appropriate to achieve remediation for identified deficiencies. • Weekly updated Education Tracker, including update on risks and issues as well as consequences if trainees do not meet expected goals. • Availability of necessary and agreed upon supplemental support for County personnel to enable effective delivery by County personnel of assigned tasks. • Validation by Contractor that County personnel have completed provided WBTs and Open House Domain scripts. • Validation by Contractor that all relevant WBTs have been completed and that learning objectives have been achieved. • Approval by County of County Workgroup

	readiness to use training tools. • County SOW Lead Approval of updated learning objectives. • Agreed-upon and understood learning objectives for County personnel have been met as evidenced by completion of WBTs and Open House Domain Scripts.

Task 2 Conduct Current State Assessment	
Task Description	
Contractor will conduct an assessment of County's current workflows and processes to gain an understanding of County's unique workflows and process flows and recommend workflow practices based on Contractor's workflow model and Best Practices. The assessment will identify and document Project risks and opportunities in preparation for future data collection and design activities. The assessment will be documented in the Onsite Workflow Assessment (also known as "**OWA**") tools in MethodM Online and provide input into the activities during the system and design review tasks.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Clinical Data Repository and Reporting Delivery Consultant
  ○ Contractor Solution Architect; and
  ○ Contractor Clinical Strategist.
• County Key Employees
  ○ County Clinical Data Repository and Reporting SOW Lead;
  ○ County Clinical Data Repository and Reporting Analyst
  ○ County Clinical Data Repository and Reporting Workgroup; and
  ○ County Clinical Data Repository and Reporting SMEs.	

Subtasks/ Deliverables	
Subtask 2.1 Identify and Document Domains, Venues and Locations of Workflow Assessment Contractor will provide County with a list of proposed Domains, Venues and Locations, for the workflow assessment across all DHS Clusters. Based on County input, Contractor will finalize the list of Domains, Venues and Locations for the workflow assessment for County's final review and Approval. County SOW Lead will schedule the workflow assessment and Contractor Delivery Consultant will coordinate with the County SOW Lead	**Deliverable 2.1 List of Domains, Venues, and Locations for Workflow Assessment** • List of Domains, Venues and Locations across all DHS Clusters. **Acceptance Criteria** • List of Domains, Venues and Locations, is complete and consistent with County input and the agreements by County and Contractor. • County Approval of finalized list of Domains, Venues, and Locations.

Task 2 Conduct Current State Assessment	
regarding scheduling.	
Subtask 2.2 Conduct Workflow Assessment In each of the Domains, Venues, and Locations identified, Contractor will meet with the County Workgroup and County subject matter experts (also referred to as "**SMEs**") to walk through and document at a high level current Clinical Data Repository and Reporting workflow processes and provide the framework and requirements for design as necessary to provide an overview of changes which will be required by recommended new workflows. Contractor will document the assessment in the template-based structured OWA tool. Contractor will continuously update the OWA tool on MethodM Online with information from each Domain, Venue, and Location, as the assessment templates are populated. Contractor will identify interrelationships with work processes in other SOWs, and across Domains, Venues, and Locations, that need to be recognized and addressed. Contractor will regularly review the assessments documented in the OWA tool with County SMEs for completeness and accuracy, and County will provide input on how to improve completeness and accuracy. County will Approve completed updates and additions that have been posted and addressed as new information regarding Domains, Venues, and Locations is identified over the course of the assessment.	**Deliverable 2.2 Workflow Assessment** ● Documented findings of OWA for all identified and verified Domains, Venues, and Locations, including, but not limited to: ○ Worksheets; ○ Recommended workflows; and ○ Key County requirements. ● Documented interrelationships with other SOW workflows (e.g., order management, scheduling and medical records) that need to be recognized and addressed. ● Workflows documented in sufficient detail to permit Contractor to: ○ Compare to Best Practices; and ○ Identify risks and opportunities as determined by County. **Acceptance Criteria:** ● Reviewed and finalized OWA posted on MethodM Online capturing the agreed workflow processes at the agreed level of detail. ● County reviewed and Approved findings.
Subtask 2.3 Review Current DHS Workflows and Processes to Identify Risks and Opportunities Contractor will analyze the findings of the OWA activity, including the OWA visit notes, and identify and document risks and opportunities which could result from implementing the Licensed Software using Best Practices and capabilities provided by the Clinical Data Repository and Reporting components, the Contractor knowledge base, and expertise of	**Deliverable 2.3 Risk and Opportunities Documentation** ● Workflow assessment report including completed OWA tool and identified risks and opportunities report. ● Risks and Opportunities Documentation, located on a discrete SOW-specific section of MethodM Online, includes recommendations that have a high likelihood of improving: ○ Efficiency;

Task 2 Conduct Current State Assessment	
Contractor SMEs. Contractor Clinical Strategist will review the assessment results with County Workgroup and provide recommendations in a Risk and Opportunities Documentation. Contractor will report and identify gaps in functionality from the Licensed Software as it relates to current County workflows.	○ Patient safety; ○ Quality of care; and ○ Patient experience. • Recommendations for improved processes to manage Clinical Data Repository and Reporting. • Documented County-Approved metrics to be utilized to determine success. • Recommendations for identifying implications with other workflows. • Recommendations for identifying industry best practices. • Documented risks. **Acceptance Criteria:** • County Approval of the Risk and Opportunities Documentation. • County acknowledgement that originally defined areas of workflow assessment have been accurately assessed. • Risks and Opportunities Documentation demonstrates substantial detail and breadth of scope as determined by County. • County Approval of opportunities to be implemented and the metrics to be utilized to determine success.

Task 3 Conduct System Review
Task Description
Contractor will provide a guided overview of the solution relative to Contractor's recommended workflows (based upon the OWA tool). Contractor will introduce, train, and support the County Workgroup in data collection tasks required for the design and build process. Contractor will provide a demonstration of the Licensed Software, including recommended operational workflows. Small group sessions with County Workgroup members and Contractor's solution experts will be conducted in order develop a solution blueprint and database build plan and engage in knowledge-sharing opportunities.
Personnel Requirements
• Contractor Key Employees ○ Contractor Clinical Data Repository and Reporting Delivery Consultant;

Task 3 Conduct System Review

- Contractor Project Director;
- Contractor Project Manager;
- Contractor Clinical Strategist;
- Contractor Integration Architect; and
- Contractor Solution Architect.

- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Integration Architect;
  - County Clinical Data Repository and Reporting SOW Lead;
  - County Clinical Data Repository and Reporting Workgroup;
  - County Clinical Data Repository and Reporting SMEs who represent the end-users from each Domain. These SMEs should have a solid understanding of the workflow in their area of expertise.

Subtasks/ Deliverables

Subtask 3.1 Conduct System Review Session	**Deliverable 3.1 System Review Session Documents**
The System Review Session is a week-long event held in Kansas City or Los Angeles as determined by County and Contractor. Prior to the System Review Session, Contractor will provide a detailed agenda, including expectations of the County participants and anticipated post-event work to be completed by County participants. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the System Review Session, Contractor will: • Conduct a Clinical Data Repository and Reporting demonstration for multiple work settings and across disciplines and interdisciplinary work teams, including integrated solution workflow discussions and recommended design practices. • Demonstrate the information gathering tools and materials used to facilitate the solution design and build process. • Provide hands on training on Contractor's information gathering tools and materials to	• List of participants and copies of all materials used for System Review Session (agenda and presentation). • List of educational objectives for System Review Session. • Benefits Presentation for System Review Session. • DCWs. • DDM on MethodM Online. • Recommended plan for achieving any outstanding learning objectives which have not been completed. • System Review Session Event Summary Reports with County identified and agreed upon tasks for the County Workgroup • Completed demonstration of Clinical Data Repository and Reporting. • Verbal and written review of System Review Session Event Summary Report with County. • List of training for information gathering tools and design/build process. • List of integration requirements with documentation of areas requiring integration

Task 3 Conduct System Review	
be used in the design and build process. • Conduct a review of the Clinical Data Repository and Reporting Licensed Software integration requirements, current design decisions, with all of the SOW workgroups together and then specific SOW workgroup teams separately (including resolution of areas of interdependencies and interrelationships, such as organizations and locations). • Validate that County personnel have completed Open House Domain Scripts provided by Contractor during comprehension exercises and provide weekly updates on status and quality of submitted materials to the County SOW Lead. • Using the Education Tracker, validate that all relevant WBTs have been completed and that learning objectives have been achieved. • Review and discuss documented outcomes included in the OWA tool and the Risk and Opportunities Report with County personnel to optimize design decisions. • Review and provide training on the tools, processes, and objectives for the upcoming data collection activities and demonstrate how the County Workgroup will use them to perform its specific tasks related to this activity – the Data Collection Workbooks (also known as a "**DCW**") and the Design Decision Matrix (also known as a "**DDM**"). Contractor shall provide County with DCWs and DDMs that have been pre-populated with Contractor's recommended configuration or design. • Work with the County Workgroup to begin the initial population of the DCWs. • Work individually with each member of the County Workgroup and County SMEs to populate several entries of the DCW, and then observe and assist each member of the County Workgroup in populating the DCW	resolutions. • Validation of completed WBT scripts by all participants. • Listing of tools, processes, and objectives for subtask 3.2 (Perform Data Collection (System Review Follow-Up)). • Validation of completed DCW and DDM data collection tools training. • Initial population of DCWs. • Documentation of initial design decisions in DDM. • Documentation of next steps. • Provide updated learning plan document. • Project Status Reports. • Updated Education Tracker documenting County personnel who have completed training and demonstrated competencies in the use of additional tools trained. • Identified gaps in County preparatory steps, and remedial actions necessary to keep progress on track. **Acceptance Criteria:** • County-Approved System Review Session agenda. • County-Approved System Review Session Event Summary Report. • Demonstration of Clinical Data Repository and Reporting covers all relevant County Domains, Venues, and Locations. • Event summary report includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • System Review Session Event Summary Report documents which County participants have achieved all educational objectives, including but not limited to preparing

Task 3 Conduct System Review	
independently. • Work with the County Workgroup and County SMEs to begin documenting design decisions in the DDM – document several design decisions and then observe and assist as each member of the County Workgroup documents design decisions independently. • Create System Review Session event summary report. The System Review Session Event Summary Report will include: o Online DCW and DDM status for specific solution; o Unresolved issues from the online DDM; o Section for Contractor and County counterpart to add additional follow-up items; o Tasks from the Project Work Plan for specific solution; o Assessment of County's ability to complete the remaining data collection and design decisions; and o Report on the status of education by County personnel. • Incorporate County input and review the System Review Session Event Summary Report with County • Provide recommendations for changes to the approach, staffing, and support model for the upcoming activities. • Identify, document, and review next steps for data collection and completion of design documents with County . Contractor will track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports.	participants to, complete data collection activities as outlined in this SOW. • Approved assignments for Contactor and County to remediate any deficiencies identified in the System Review Session.
Subtask 3.2 Perform Data Collection (System Review Follow-Up) Following the system review session, Contractor Delivery Consultant will work with the County SOW Lead and the County Workgroup, and other relevant SOW Workgroup members, to complete the DDMs and DCWs that provide the data for	**Deliverable 3.2 System Review Data Collection** • Facilitated weekly calls and/or meetings • Complete DDM that has been validated by Contractor. • Complete DCWs that have been validated by Contractor.

Task 3 Conduct System Review	
the subsequent design and build process. Contractor will support the County SOW Lead and County Workgroup, who will work with County SMEs to complete the DDM and DCWs. Contractor will support the data collection process as follows: • Provide a Best Practice Clinical Data Repository and Reporting process with all of its components. • Identify data, information, and reports to ensure the County can meet Meaningful Use requirements. • Track progress and communicate status of DDM and DCW completion. • Facilitate on-site weekly meetings to discuss issues. • Regularly review a sampling of work in progress DDMs and DCWs to provide County with feedback and direction to improve the quality of data collected if needed. • Address questions and comments arising within the County Workgroup which stand in the way of making and documenting design decisions in the DDM • Facilitate relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Clinical Data Repository and Reporting. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendations for addressing them (e.g., through additional training, augmenting resources). • Provide additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Contractor Delivery Consultant will be	• Weekly progress reports on completion of DDMs and DCWs. • Regular notification of issues and risks related to quality and schedule of document completion. • Documented Risk and Issue Matrix which includes current and final status of all risks and issues and date of resolution. • Best Practice Clinical Data Repository and Reporting process with all of its components • Relevant cross-SOW reviews of DDMs and DCWs to assess the impact on the Clinical Data Repository and Reporting processes. • Update Risks and Issue Matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Additional design coaching sessions as needed to complete documents at necessary level of detail on schedule. • Contractor Delivery Consultant support through ad hoc calls and e-mails. • Detailed review and documented feedback on a sampling of DDMs and DCWs in order to assure that County is achieving level of completeness and comprehensiveness required for successful design, build, and implementation. • Documented decisions made related to DDM and DCWs. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)).

Task 3 Conduct System Review	

available for ad hoc calls and support by e-mail. Immediate request for support will be routed to another Contractor designee if the Delivery Consultant is unavailable.
• Deliver additional design coaching sessions (on-site in Los Angeles or online) as need is identified by Contractor review or by County SOW Lead.
• Weekly calls and/or meetings of at least sixty (60) minutes will:
  ○ Discuss progress compared to timelines documented in the Project Work Plan; and
  ○ Identify issues with data collection (risks, quality, etc.) and escalate as appropriate.
• Update and maintain a Risk and Issue Matrix related to the completion of DDMs and DCWs and alert County of any risks to schedule.
	Acceptance Criteria:
	• Contractor's assistance in completing DDMs and DCWs is sufficient to result in on-schedule progress to task 4 (Conduct Design Review), including all initially defined items as well as agreed upon necessary additions identified during the system review process.
	• County-Approved DDMs and DCWs sufficiently complete to result in on-schedule progress to task 4 (Conduct Design Review).
	• Identified issues are resolved and or closed.

Task 4 Conduct Design Review
Task Description
The purpose of this task is to review, confirm the accuracy of, and finalize design decisions prior to system build. Contractor will provide and review recommended workflows with County, document County's design decisions, finalize the data collection tasks, and validate the EHR System design and build for completeness and accuracy.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Data Repository and Reporting Delivery Consultant;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Clinical Data Repository and Reporting Analyst
  ○ County Clinical Data Repository and Reporting SOW Lead; and
  ○ County Clinical Data Repository and Reporting SOW Workgroup.

Task 4 Conduct Design Review	
Subtask 4.1 Conduct Design Review Session The Design Review Session is a week-long event held in Kansas City or another mutually agreed upon location. Prior to the Design Review Session, Contractor will provide County with a detailed agenda, which shall include the expectations of attendees and anticipated post-event work expected to be completed by participants. During the Design Review Session, design decisions for each component of the Licensed Software will be reviewed and their completeness and acceptability confirmed. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. During the Design Review Session, Contractor will: • Demonstrate the workflow of the relevant solutions/Licensed Software modules. • Review data collection materials and/or data received in DCWs. • Review and confirm the completeness and acceptability of design decisions. • Review, discuss, and confirm integration decisions with respect to Licensed Software Modules, Third-Party Products, and other relevant systems. • Review and confirm County Approval on design decisions documented in MethodM Online. • Recommend an approach (and execute it) to address open issues and decisions that have not received Approval. • Identify and communicate current progress, as well as next steps based on agreed upon Project Work Plan. • Review the expected goals identified for the Design Review Session follow-up activities	**Deliverable 4.1** • List of participants and materials for Design Review Session (agenda, presentation materials, and all training materials). • Completed and Contractor-confirmed DCWs. • Completed and Contractor-confirmed design decisions including decisions about cross-Domain integration. • Updated versions of the DDM and DCWs based on design review feedback. • Design Review Session Event Summary Report and issues log. • Approved assignments and schedule for tasks to be completed in preparation for system validation task. • Identification of open issues needing resolution or escalation, as documented in the DDM, including assignment of responsible Party for the resolution. • Data flow and workflow diagram depicting interdependencies between Clinical Data Repository and Reporting workflows, and other clinical and administrative workflows (e.g., nursing documentation, finance), and workflows that are external to DHS (e.g., external payers). **Acceptance Criteria:** • Agenda, presentations, and objectives for System Review Session address and meet all objectives defined in the activities in subtask 4.1 (Conduct Design Review Session). • County-Approved Design Review Event Summary Report • Design Review Summary Event Report accurately describes the content of the discussions and decisions, expected outcomes, and next steps required for Project progression. • Design Review Event Summary Report

Task 4 Conduct Design Review	
established for County, and verify mutual understanding of who will carry out each aspect of the work. During the Design Review Session, Contractor will: • Conduct an all-day integrated welcome session for all Domain workgroups. • Facilitate meetings between the County Workgroup and the Contractor Solution Architect to review the DDM related to Clinical Data Repository and Reporting. • Provide an overview of the workflows and processes in the various solutions/Licensed Software Modules to ensure the County Workgroup's understanding. • Provide feedback to County on the completeness and acceptability of design decisions documented in the DDM for Clinical Data Repository and Reporting and other related SOWs to date by County and identify further work that is required by County. • Provide workflow and configuration impact as a result of a proposed decision. • Confirm County Approval of design decisions (using the online collection tool) and attend to issues as to decisions that have not received sign off. • Review additional data collection materials and/or data received in DCWs. • Provide an update on the state of the integration decisions across Domains and identify further data or decisions required from County. • Provide County with recommended Best Practices to facilitate design decisions (recommended design review). • Conduct system demonstration of Licensed Software standard build. • Discuss and document potential modifications to standard build.	includes a realistic assessment of County's ability to complete remaining data collection and design activities, as well as a written plan for ensuring on-time progress. • County verifies that revised versions of DDM and DCW accurately reflect feedback and design decisions. • County Approval on design decisions using the online collection tool. • County Approved identified next steps. • County review and Acceptance of documentation and data flow diagrams that address interdependencies among Modules/Domains, both internal and external, including integration with other disciplines (e.g. pharmacy operations, laboratory, radiology).

Task 4 Conduct Design Review	
• Identify need for additional data collection required to finalize design. • Provide training and overview of new DCWs for additional data collection. • Review relevant County policies and procedures and incorporate, as appropriate, in content and functional design, or recommend changes to policies and procedures to be considered by County. • Manage and maintain a documented record of the Clinical Data Repository and Reporting data conversion (historical data upload) requirements. At the end of the Design Review Session, Contractor will: • Draft the Design Review Session Event Summary Report. • Review the Design Review Session Event Summary Report with County personnel after the end of the session. • Identify and communicate current progress, as well as next steps, based on agreed upon Project Work Plan. • Identify and discuss next steps with County personnel. • Develop and communicate required County activities to complete design decisions and data collection.	
Subtasks/ Deliverables	
Subtask 4.2 Conduct Design Review Session Follow-Up Following the Design Review Session, the Contractor Delivery Consultant will continue to track progress on Deliverables and report progress as well as issues and risks in the Project Status Reports. Contractor will support the County SOW Lead and County Workgroup members who will work with County SMEs to complete the DDM and DCWs.	**Deliverable 4.2 System Design Data Collection** • Facilitated weekly calls and/or meetings. • Completed DDM validated by Contractor. • Completed DCWs validated by Contractor. • Regular notification of issues and risks related to quality and schedule of document completion. Documentation on risk matrix tool of current and/or final status of all issues and date of resolution. • Design coaching sessions provided on an as-

Task 4 Conduct Design Review	
Contractor will support the data collection process as follows: • Track progress of DDM and DCW completion. • Facilitate weekly on-site meetings to discuss issues. • Conduct a detailed review of work-in-progress DDMs and DCWs to provide County with written feedback and direction to improve quality of data collected and level of analysis completed. • Review relevant cross-SOW implications for Clinical Data Repository and Reporting. • Track design recommendations accepted/rejected by County in MethodM Online. • Facilitate decision making process related to the completion of the DDM. • Identify systemic issues related to completion of DDMs and DCWs (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g., through additional training, augmenting resources). • Provide additional Contractor resources to address issues and recommendations above. • Contractor Delivery Consultant will provide ad hoc support by telephone and e-mail. • Deliver additional design coaching sessions (on-site or online) as need is identified by Contractor review or by County SOW Lead. • Conduct weekly calls during which Contractor will discuss progress compared to the Project Work Plan. • Identify issues with data collection (risks, quality, etc.). • Update and maintain a risk matrix related to the completion of DDMs and DCWs and alert County of any risks including, but not limited to, risks to schedule.	needed basis to complete documents at necessary level of detail on schedule. • Weekly progress reports on completion of DDMs and DCWs. • Contractor Delivery Consultant available for ad hoc calls and e-mails. • Feedback and recommendations based on detailed sample reviews of DDMs and DCWs. • Documented decisions made related to DDM and DCWs. • Documented cross-SOW implications for Clinical Data Repository and Reporting. • Documented systemic issues related to completion of DDM and DCWs and recommendations to County to resolve (e.g., through additional training, augmenting resources). • Additional resources to address the issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation Statement of Work)). • Updated risk matrix related to the completion of DDM and DCWs with alerts to County of any risks to schedule. • Notification of issues and risks related to quality and schedule of document completion. **Acceptance Criteria:** • County Approved completed DDMs and DCWs. • County verification that DDMs and DCWs are completed at a level of detail required for forward progression of Project, including all initially defined items, as well as agreed upon necessary additions identified during the design review process. • Identified issues are resolved and/or closed

Task 4 Conduct Design Review	
	and in-process issues have current updates.

Subtask 4.3 Conduct Workflow Localization
The Workflow Localization Session(s) will be held at County site(s) where Licensed Software will be implemented and will assist County personnel to better understand the future state design, any changes in role/job responsibilities, benefits, educational and training needs, and downtime strategy.
Contractor will:
• Draft an agenda for meetings that will be held at County facilities and departments for review by the County.
• Conduct a series of meetings across all relevant County facilities and departments where EHR System will be utilized to develop the workflow localization Deliverables.
• Conduct crosswalk between Clinical Data Repository and Reporting workflow localization Deliverables and OWAs from other clinical disciplines, and highlight interdependencies, issues, and risks.
• Work with County personnel to identify necessary and recommended changes to policy, procedures, and bylaws required to implement future workflows.
• Develop the following Deliverables:
  ○ Future State Workflow Diagrams covering the complete range of Clinical Data Repository and Reporting processes impacted by the Licensed Software and with attention to interrelationships with other modules and other relevant systems;
  ○ A list and examples of policies and procedures that will need to be created or revised;
  ○ Processes for maintaining and updating Clinical Data Repository and Reporting;
  ○ Listing of suggested clinical pathways and decision support algorithms;
	Deliverable 4.3 Workflow Localization Documents
	• List of participants and materials for Workflow Localization Sessions (agenda, presentation, and all training materials).
	• Future State Workflow Diagrams covering the complete range of Clinical Data Repository and Reporting processes impacted by the Licensed Software.
	• A list and examples of policies and procedures that will need to be created or revised.
	• Listing of suggested decision support algorithms.
	• Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices.
	• Description of how County personnel roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions for all modified or new positions identified.
	• A list of documented, measurable target procedures which will demonstrate improvement of new system over baseline function, including baseline metrics, procedures for how to collect baseline data, track measures, and compare before and after performance.
	• Recommendations for Clinical Data Repository and Reporting downtime strategies and documentation, including samples based on County build of Licensed Software.
	• Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented.

Task 4 Conduct Design Review	
○ Recommendations, impact statement, and a roadmap for implementation of organizational changes to achieve identified benefits and utilize Contractor Best Practices; ○ Description of how County personnel's roles will change and document new positions and revisions to existing job descriptions, including sample job descriptions; ○ Documented, measurable target baseline metrics and procedures for how to achieve baselines, target measures, and how to track measures; ○ Recommendations for Clinical Data Repository and Reporting downtime and recovery strategies, including samples; and ○ Stop, Start, Continue recommendations as to what processes will stop, what processes will continue, and what new processes will be implemented. Contractor will provide County with draft Deliverables and will facilitate review sessions in which each Deliverable is reviewed with the County Workgroup and revised by Contractor. Contractor will work with County to identify the actions and types of resources required to address all of the findings and recommendations of the workflow localization analysis including such items as the development of policies and job descriptions, etc. Contractor will incorporate feedback, modify the Deliverables, and submit to County for Approval. In instances where there is no consolidated County feedback or agreement on how feedback should be included in the Deliverable, Contractor will log the issues and refer through the defined governance process for resolution. Contractor will document and incorporate all County feedback and decisions and finalize the workflow localization Deliverables.	**Acceptance Criteria:** ● County Approved Workflow Localization Documents. ● Workflow Localization Documents are complete and accurately reflect County feedback and decisions made during the design review process. ● Workflow Localization Documents address all components of Subtask 4.3 (Conduct Workflow Localization) in sufficient detail and completeness to assure that: ○ All County patient care activities and services are addressed; and ○ Realistic strategies for achieving Best Practice standards are delineated. ● Concrete benefit realization targets, with schedule of metrics to be achieved for each Domain, Venue, and Location. ● Suggested changes are achievable within County's resource constraints.

Task 4 Conduct Design Review	
Subtask 4.4 Conduct Clinical Data Repository and Reporting Workflow Workshop Contractor will conduct Clinical Data Repository and Reporting Workflow Workshops as needed in which the future state workflows for Clinical Data Repository and Reporting will be demonstrated to County and decisions required for the design of Clinical Data Repository and Reporting functionality will be made. During the workshops, Contractor will: • Describe Best Practices future state clinical workflow for Clinical Data Repository and Reporting. • Discuss the key decision points related to automation of capture and management of Clinical Data Repository and Reporting. • Document the key design decisions and desired outcomes related to Clinical Data Repository and Reporting in the DDMs. • Document implication of key design decisions related to integration with existing third-party and County systems and Clinical Data Repository and Reporting in the DDMs. • Compare and contrast design elements for Clinical Data Repository and Reporting and document outcomes in the DDMs. • Confirm County Approval of the design elements and design decisions. • Expeditiously escalate issues for which there is no Approval to the predefined governance process. • Identify, discuss, and communicate next steps as identified in the Project Work Plan with County personnel. • Identify and assign any design decisions or data collection activities that are outstanding. • Refine and augment downtime strategy for Clinical Data Repository and Reporting Domain.	**Deliverable 4.4 Clinical Data Repository and Reporting Workflow Workshop** • Agenda/Schedule for Clinical Data Repository and Reporting Workflow Workshops. • Attendance sheet/roster of participants for Clinical Data Repository and Reporting Workflow Workshop (agenda and presentation). • List of materials for Clinical Data Repository and Reporting Workshop (agenda and presentation). • Updated Issues Log. • Completed and County confirmed DCWs. • Completed and confirmed DDM. • Updated DDM and DCWs based on design review feedback. • Clinical Data Repository and Reporting Workflow Workshop Event Summary Report and Issues Log. • Updated downtime strategies for Clinical Data Repository and Reporting. **Acceptance Criteria:** • County-Approved Clinical Data Repository and Reporting Workflow Workshop Event Summary Report that provides an accurate summary of the workshop training delivered, the expected outcomes, and mutually agreed upon next steps. • County Approval of the design elements and design decisions.

Task 4 Conduct Design Review	
• At the end of the Clinical Data Repository and Reporting Workflow Workshop, Contractor will draft and finalize the Clinical Data Repository and Reporting Workflow Workshop Event Summary Report.	
Subtask 4.5 Develop Final Detailed Design Document Contractor will develop a final Detailed Design Document that includes the County design specifications for the Clinical Data Repository and Reporting Licensed Software build based on the data collected and decisions made during the design review and workflow localization. The Clinical Data Repository and Reporting final Detailed Design Document shall include documentation on all design decisions, including: • County Approval of the data collection and decision documents; • Whether the decision followed Contractor's recommendation or not; and • Justification for not following a Contractor recommendation. Contractor will submit a draft final Detailed Design Document for County review and facilitate a review session with the County Workgroup. Contractor will solicit County input and incorporate into the draft final Detailed Design Document, then submit the final Detailed Design Document for County Approval.	**Deliverable 4.5 Final Detailed Design Document** • Overview EHR System conceptual and logical design document. • Final DCWs. • Final DDM. • Final Future-State Workflows Diagrams. **Acceptance Criteria** • Content and functional coverage of system build is included in final Detailed Design Document. • Decisions made during task 4 (Conduct Design Review) incorporated in final Detailed Design Document.

Task 5 Complete Initial Partial System Build
Task Description
Contractor will deliver an Initial Partial System Build that will be used for system validation. This partial build will consist of a subset of the content and functional coverage of the final build.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Data Repository and Reporting Delivery Consultant;

Task 5 Complete Initial Partial System Build	
○ Contractor Clinical Strategist; ○ Contractor Solution Architect; and ○ Contractor Integration Architect. • County Key Employees ○ County Clinical Data Repository and Reporting SOW Lead; ○ County Project Director; ○ County Project Manager; ○ County Clinical Data Repository and Reporting Analyst; and ○ County Clinical Data Repository and Reporting SOW Workgroup.	
Subtasks/ Deliverables	
Subtask 5.1 Identify Content and Functional Coverage of Initial Partial System Build (Using the DDM and DCW Tools and Other Documentation as Necessary) Contractor will provide County with a recommended list of content and functional coverage to be included in the Initial Partial system Build which it considers to be representative of County's environment and to include different care providers, different care venues, and disciplines, and Clinical Data Repository and Reporting processes. Contractor will facilitate a review session with County in which it: • Presents a rationale for how it came up with the recommended content for the Initial Partial System Build; • Presents the recommended content for the Initial Partial System Build; and • Obtains feedback from County. Based on feedback provided in the review session, Contractor will document the content and functional coverage in MethodM Online to be included in the Initial Partial System Build.	**Deliverable 5.1 Initial Partial System Build Specification (Using the DDM and DCW Tools and Other Documentation as Necessary)** • List of recommended content and functional coverage of Initial Partial System Build. • Facilitated review session of content and functional coverage of Initial Partial System Build. • Initial Partial System Build content and functional coverage specifications. **Acceptance Criteria:** • County Approved list of content and functional coverage of Initial Partial System Build. • Initial Partial System Build Specifications reflect accurately the design decisions recorded in the DDMs and DCWs.
Subtask 5.2 Complete Initial Partial System Build Contractor will develop the Initial Partial System Build for Clinical Data Repository and Reporting. Contractor will report progress on a weekly basis to County and proactively alert County of any issues and risks that may lead to a deviation from the Project Schedule.	**Deliverable 5.2 Initial Partial System Build** • Initial Partial System Build which conforms to the functions and content specified in the Initial Partial System Build Specifications. **Acceptance Criteria:** • County Approval of Initial Partial System Build which conforms to documented DDM and

Task 5 Complete Initial Partial System Build	
	DCW and other documents as required.

Task 6 Conduct System Validation	
Task Description	
Contractor will develop, deliver, review, and build upon the functionality delivered in the Initial Partial System Build and provide training relevant to testing. The Initial Partial System Build, as developed, will produce an integrated solution that meets the needs of County Clinical Data Repository and Reporting and prepare the County for testing of the design build. Contractor and County will begin the development of unit and system test scripts and test data for the Clinical Data Repository and Reporting Licensed Software.	
Personnel Requirements	

• Contractor Key Employees
  ○ Contractor Clinical Data Repository and Reporting Delivery Consultant;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Solution Architect; and
  ○ Contractor Integration Architect.
• County Key Employees
  ○ County Clinical Data Repository and Reporting SOW Lead;
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Clinical Data Repository and Reporting Analyst;
  ○ County Clinical Data Repository and Reporting SOW Workgroup; and
  ○ County Clinical Data Repository and Reporting SMEs who represent the end-users from each Domain and who will conduct system testing. These SMEs should have a solid understanding of the workflow in their area of expertise.	

Subtasks/ Deliverables	
Subtask 6.1 System Validation Session Contractor will conduct a week-long System Validation Session in Kansas City or Los Angeles as determined by County and Contractor. Contractor's AMS resources will participate in this event in person if the event is held in Kansas City, or remotely if the event is held in Los Angeles, to provide expertise that could positively impact post Go-Live Support Services. The objectives of the session are to: • Provide an in-depth demonstration of the solution and build to date using County's Domain.	**Deliverable 6.1 System Validation** • System Validation Session (agenda and presentation). • Library of sample Unit and System Test scripts to be adapted for County. • System Validation Session Event Summary Report for Clinical Data Repository and Reporting Licensed Software including Issues Log. • Updated DCWs in MethodM Online. • Build Audit Report (comparison between DCW and built Domain).

Task 6 Conduct System Validation	
• Provide hands on training on the Licensed Software in the Initial Partial System Build to the County Workgroup members and County SMEs who will conduct testing. • Begin development of County-specific unit and system test scripts. • Develop a list and schedule of work assignments and discuss next steps identified in the Project Work Plan with County Workgroup. • Validate database build to date of System Validation Session. • Validate proposed Clinical Data Repository and Reporting processes. During the one (1) week System Validation Session Contractor will: • Demonstrate the Initial Partial System Build to the County Workgroup and County's SMEs. • Facilitate the County Workgroup walk-through of the Initial Partial System Build. • Make available to County training material that County can customize according to County's build Specifications (vs. generic self-learning module). • Conduct training sessions on the Clinical Data Repository and Reporting Licensed Software to County IT personnel to allow unit and system testing to commence. • Conduct training on overall testing approach and specifically on Unit and System Testing. • Confirm and document the appropriate tests which need to be conducted on the Licensed Software with County. • Identify and document roles and responsibilities of Contractor resources, County Workgroup members, and County SMEs who will play a role in system validation testing. • Create a test plan for Unit and System	• Updated DDM in MethodM Online. • Updated Project documents. **Acceptance Criteria:** • County verification that System Validation Session Event Summary Report includes accurate documentation of the training content and mutually agreed upon next steps for forward progression of Project. • County verification that Contractor has provided evidence of County personnel achievement of learning objectives and readiness to perform testing activities. • Approval of unit test procedures, including all steps in the process. • Acceptance of the tools and techniques for performing the unit test and documenting defects and issues. • Approval of the test scenarios to be developed for the complete unit test, and the expected minimum acceptance criteria. • County Approval of "readiness" to proceed with Unit and System Testing of the Initial Partial System Build.

Task 6 Conduct System Validation	
Testing with input and participation from County. • Configure the Initial Partial System Build to incorporate feedback and any County-Approved modifications recorded in DDMs and DCWs. • Provide samples of Clinical Data Repository and Reporting Unit and System Test scripts (including test script for reviewing historical data). • Work with County to identify and document relevant test scenarios. • Work with County to identify and document relevant test patient data and regression test data. • Document test scripts and test patient data requirements. • Begin development of unit and system test scripts and test data, including the assumed data for the starting point of the unit test scripts. • Identify activities required by the County Workgroup for testing and validation of Clinical Data Repository and Reporting Licensed Software functionality and ensure that these activities have been assigned to the relevant County Workgroup members. • Identify and discuss next steps as documented in the Project Work Plan with County personnel. • Review conceptual and logical system design with the County Workgroup and incorporate design review and system validation feedback into design documents.	
Subtask 6.2 Conduct System Validation Session Follow-up Following the System Validation Session, Contractor will support County with the completion of Unit and System Test scripts and development of test data. Contractor will:	**Deliverable 6.2 Test Scripts and Test Data for Unit and System Testing** • Complete Unit and System Test scripts. • Test data loaded into test environment database. • Documented risks to schedule or to quality

Task 6 Conduct System Validation	
• Support County in developing detailed test scripts built upon the samples provided during the System Validation Session. • Review County-adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective. • Support County with the development of test data and specify volume of data required to perform thorough testing. • Monitor progress on test script and test data development. • Notify County of any risks to schedule or to quality and completeness of the scripts and data being developed. • Validate completeness of test data • Provide support by responding to all County ad hoc calls and e-mails in a timely manner to address questions as they arise. • Deliver additional training on test script and test data development to County personnel as needed. • Develop defect severity definitions to support decision making regarding readiness for Go-Live. • Document status of testing activities and report progress as well as issues and risks in the Project Status Reports.	and completeness of the scripts and data being developed. • Documented test procedures. • Documented County readiness for testing, including County Workgroup and County SME readiness (training complete). • Defect severity definitions developed to distinguish: (a) acceptability for Integration Testing; (b) necessity for Go-Live; and (c) acceptability for remediation after Go-Live. **Acceptance Criteria:** • All identified test scripts completed by the County Workgroup and County SMEs without issue. • County verifies that test data required to complete all test scripts has been identified and developed.

Task 7 Complete Build of Clinical Data Repository and Reporting and Conduct System and Unit Testing
Task Description
Contractor will document and complete the system build to meet the final Detailed Design Document specifications in the DDMs and DCWs. Contractor will release system content and functionality on an ongoing basis for review and testing by County. Once the full build has been completed and System and Unit Testing are complete, Integration Testing can begin.
Personnel Requirements
• Contractor Key Employees   ○ Contractor Project Director;

Task 7 Complete Build of Clinical Data Repository and Reporting and Conduct System and Unit Testing

- Contractor Project Manager;
- Contractor Clinical Data Repository and Reporting Delivery Consultant;
- Contractor Clinical Strategist;
- Contractor Solution Architect;
- Contractor Integration Architect; and
- Contractor Test Lead.

- County Key Employees
  - County Clinical Data Repository and Reporting SOW Lead;
  - County Project Director;
  - County Project Manager;
  - County Clinical Data Repository and Reporting Analyst; and
  - County Clinical Data Repository and Reporting SOW Workgroup.

Subtasks/ Deliverables

Subtask 7.1 Complete System Build

Contractor will iteratively build Clinical Data Repository and Reporting Licensed Software functionality and content until the full build of Clinical Data Repository and Reporting content and functionality is complete.

Specific Contractor activities include:

- Develop a Release Schedule.
- Regularly release new functionality in a structured and scheduled manner to the County Unit and System test environment.
- Contractor will optimize the design and build of the Licensed Software and Third Party Products to deliver the information, data, and reports necessary to report on achieving Meaningful Use.
- On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release.
- Define test scripts to validate interfaces with third-party vendor systems, services, and devices.
- Support County in developing detailed test scripts to validate release of new functionality which addresses County-Approved Omissions.
- Provide test scripts to validate release of new

Deliverable 7.1 Complete System Build for Clinical Data Repository and Reporting

- Release Schedule.
- Iterative releases of Clinical Data Repository and Reporting Licensed Software content and functionality for Unit and System Testing.
- Release notes identifying the content of each new release and any issues and defects applicable to County that have been corrected by the release.
- Complete Build of Clinical Data Repository and Reporting Licensed Software for final unit and system testing that includes all content and functionality as documented in the final Detailed Design Document.
- Weekly updates on status of release and defect fixes as part of the Project Status Report.
- Test scripts validating interfaces with third-party vendor systems, services, and devices.

Acceptance Criteria

- County validation that releases of Clinical Data Repository and Reporting builds meet specifications as documented in the final Detailed Design Document.

Task 7 Complete Build of Clinical Data Repository and Reporting and Conduct System and Unit Testing	
functionality which addresses County-Approved Omissions. • Report weekly on progress toward Complete Build, and alert County of any issues or risks. • Notify County when the Clinical Data Repository and Reporting Licensed Software has been fully configured to include all DDMs and DCWs related to Clinical Data Repository and Reporting.	
Subtask 7.2 Resolve Defects and Implement County-Approved Change Requests As new functionality is released, the County Workgroup will test the system using test scripts developed during system validation and identify defects and omissions in the planned build that should have been included and would not require an enhancement to the Licensed Software ("**Omissions**"). Contractor will: • Provide ad hoc telephone, e-mail, and in-person support to the County testing teams. • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for additional resources, test support, and management tools, etc. • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions. • Enter those defects and Omissions of content or functionality which are not entered directly by County personnel but which are, instead, communicated by e-mail to the Contractor Test Lead for entering into MethodM Online. • Correct defects and update the Release Schedule to notify County of the build in which defect resolutions will be released. • Address identified Omissions as follows:	**Deliverable 7.2 Resolved Defects and Implement Approved-Change Requests** • Updated Release Schedules. • Specifications for requested additions of content and functionality. • Defect resolution document describing identified defects and Omissions which have been resolved. • Documented resolution on Omissions that are escalated to the governance process, and how they have been resolved. • Implementation of defect resolutions and County-Approved change requests. • Gateway criteria for Unit and System Test completion. **Acceptance Criteria:** • County validation that defect resolution fully addresses defect as logged and meets targeted timeframes specified in the Issues Log. • County validation that Approved changes to address Omissions fully address the documented omission specifications. • County Approved gateway criteria for unit and system test completion.

Task 7 Complete Build of Clinical Data Repository and Reporting and Conduct System and Unit Testing	
○ Document and verify the requirements to address the Omission in a consistent and structured format; ○ Address all Omissions which will have little or no impact on the Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released; ○ Escalate all Omissions which will have impact on the Project Schedule or risk for consideration by the governance process; ○ Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go Live, or should be rejected; and ○ Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing. • Document County-Approved gateway criteria.	
Subtask 7.3 Complete Unit and System Testing Contractor will notify County once the Clinical Data Repository and Reporting build as documented in the DCWs and DDMs is complete. Contractor will: • Provide updates on the status of defect resolution and implementation of County-Approved change request on weekly calls. • Release defect resolutions and implemented change requests as part of the build release cycles. • Support County in re-testing resolved defects deployed by Contractor.	**Deliverable 7.3 Testing of Complete System Build Finalized Ready for Integration Testing** • Documented results of completed and tested Clinical Data Repository and Reporting Licensed Software. • List of resolved defects, including date of completion, retest results, and County Approval. • County-Approved completed Unit and System Testing for Clinical Data Repository and Reporting Licensed Software.

Task 7 Complete Build of Clinical Data Repository and Reporting and Conduct System and Unit Testing	
• Jointly decide with County through the governance process when the Clinical Data Repository and Reporting build is ready for moving to Integration Testing, based on: ○ Completeness of functionality and content; ○ Severity of outstanding defects; and ○ Severity of outstanding change requests.	**Acceptance Criteria:** • Resolution of all outstanding defects defined as required for Clinical Data Repository and Reporting Licensed Software Acceptance. • Licensed Software Build Completion Document provided by Contractor and Approved by County. • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Exhibit A.18 (Data Conversion Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

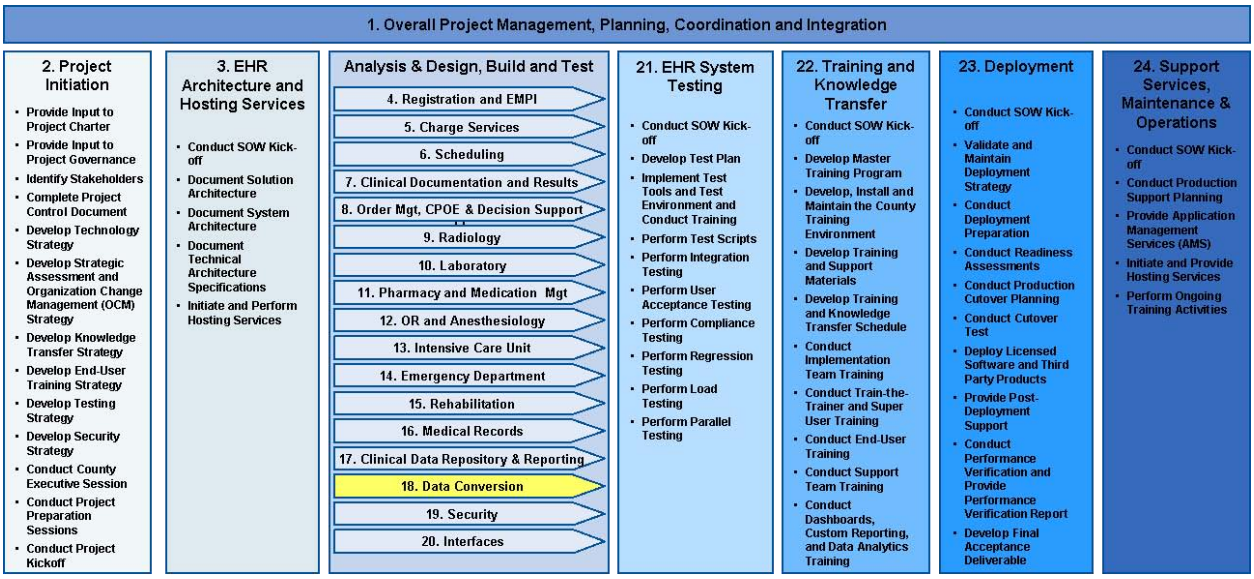
1. Introduction

This Exhibit A.18 (Data Conversion Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System, as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.18 (Data Conversion Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.18 (Data Conversion Statement of Work) (also known by Contractor as Historical Data Upload). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW describes Services to be provided by Contractor, and where specifically identified by County, to manage and execute all the data conversion activities for the Project.

3. SOW Summary

3.1 Overview

This SOW describes Services to be provided by Contractor to manage and execute all the data conversion activities for the Project. This SOW will result in the documentation and validation of data sources, and the development of a data conversion strategy and specifications. Contractor will test and perform data conversion for the Project.

The Project will be conducted using the key steps and Deliverables defined in the Contractor's MethodM implementation methodology (also referred to in this Exhibit as "**MethodM**"), as adapted by this SOW, including:

- ***Stop, Start, Continue Method*** to identify which current key activities will no longer be performed, which will continue, and which new activities will be completed per role;
- ***Clinical Automation*** to automate clinical and business workflows based on current Contractor Best Practices and recommendations;
- ***Walk-throughs*** to validate current workflow/ processes and develop recommendations for improvement;
- ***MethodM Online tool*** to collect data and track critical design decisions;
- ***Contractor Bedrock wizards*** to guide the process of designing and building the Licensed Software; and
- ***START database content*** which provides pre-built tables and forms to facilitate database design and build, and help the continuity of testing repeatable processes.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the forgoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provides the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for this Exhibit A.18 (Data Conversion Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.18 (Data Conversion Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including a Key Milestone table, will be developed as part of the Project Control Document. The detailed durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with this Agreement. This includes use of Contractor's knowledge capital databases and other repositories of Deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Data Conversion SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project Status Meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings, and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/ Subtask Name	Deliverables
Task 1 Conduct SOW Kick-off	
Subtask 1.1 Develop Detailed Data Conversion-	Deliverable 1.1 Data Conversion-Specific Section of

Task/ Subtask Name	Deliverables
Specific Section of the Project Work Plan	the Project Work Plan
Subtask 1.2 Conduct Initiation Session for Data Conversion Workgroup	Deliverable 1.2 Data Conversion Initiation Session (Key Deliverable)
Task 2 Develop and Document Data Conversion Strategy	
Subtask 2.1 Confirm and Validate Data Sources	Deliverable 2.1 Data Sources
Subtask 2.2 Develop Data Conversion Implementation Strategy Document	Deliverable 2.2 Data Conversion Implementation Strategy Document
Task 3 Develop Data Conversion Specifications	
Subtask 3.1 Identify Data Conversion Specifications	Deliverable 3.1 Data Conversion Specifications (Key Deliverable)
Task 4 Conduct Data Conversion Pilot	
Subtask 4.1 Execute Data Conversion Pilot	Deliverable 4.1 Data Conversion Pilot (Key Deliverable)
Task 5 Conduct Data Conversion	
Subtask 5.1 Perform Data Conversion	Deliverable 5.1 Data Conversion Executed in Staging Environment

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable will be developed in accordance with the following Contractor's obligations, which will be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document ("**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template) of this SOW.

(2) Develop agendas and coordinate scheduling for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and analyze County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee will notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor will make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable will be provided to County with a request for Acceptance. County will notify Contractor of it Acceptance or rejection in a time that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor will be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-off
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Data conversion-specific training on the Licensed Software and Third-Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Data Conversion Workgroup**" or "**County Workgroup**") and the County Data Conversion Workgroup will be introduced to various Contractor tools, existing Interface libraries, methodologies, and Best Practice recommendations that will be used throughout this SOW.
Personnel Requirements

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Delivery Consultants; and
  ○ Interface Architect.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Interface Manager;
  ○ County Data Conversion SOW Lead; and
  ○ County Data Conversion Workgroup.

Task 1 Conduct SOW Kick-off	
Subtasks/ Deliverables	
Subtask 1.1 Develop Detailed Data Conversion-Specific Section of the Project Work Plan As part of the Project Control Document, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a data conversion-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks both within this SOW and across all related SOWs and work streams; • Resources (effort hours and roles) from Contractor, County, and third-party vendors required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.18 (Data Conversion Statement of Work) and subject to County Approval.	**Deliverable 1.1 Data Conversion-Specific Section of the Project Work Plan** • Data conversion-specific section of Project Work Plan; and • Sub-Project Work Plan for data conversion. **Acceptance Criteria:** • The data conversion-specific section of the Project Work Plan incorporates, and is consistent with, County-provided input. • The data conversion-specific section of the Project Work Plan addresses all elements described in subtask 1.1 (Develop Detailed Data Conversion-Specific Section of the Project Work Plan) and includes requirements for involvement of third-party vendors. • The data conversion-specific section of the Project Work Plan has been Approved by County. • Timelines detailed in the data conversion-specific section of the Project Work Plan are realistically achievable with reasonable effort as determined by County (subject to adjustment after completion of Subtask 4.1 (Execute Data Conversion Pilot) of this SOW). • Elements of the data conversion-specific section of the Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this and other SOWs. • Confirmed availability of Contractor resources required to implement the data conversion Project Work Plan.
Subtask 1.2 Initiation Session for Data Conversion Workgroup Contractor will conduct an initiation session to provide an introduction to the County Workgroup to the Services covered by this SOW, including the time lines and nature of the work effort that will be required to implement this	**Deliverable 1.2 Data Conversion Initiation Session** • Data Conversion Initiation Session materials for County review. • Initial list of systems and data sources for which data conversion capabilities may be

Task 1 Conduct SOW Kick-off	
SOW. Before the Data Conversion Initiation Session, Contractor will: • Work with County to identify all Contractor, County, and third-party vendor resources required to complete the tasks outlined in this SOW; • Provide County with a roster of kick-off participants; • Conduct a project management workshop as described in task 12 (Conduct Project Preparation Sessions) of Exhibit A.2 (Project Initiation Statement of Work); and • Develop an agenda/schedule for the Data Conversion Initiation Session. Contractor will conduct the Data Conversion Initiation Session as follows: • Review and document systems and data sources for which data conversion capabilities may be required by County; • Illustrate and document dependencies between the this SOW and any other SOWs and Project work streams; including at a minimum: o Requirements gathering and functional/technical specifications; o Testing, including Integration Testing and User Acceptance Testing; o Development approach; o Go-Live readiness assessment; and o Post-Go-Live assessment. • Review tasks, Deliverables, and Milestones for the data conversion; • Train the County Data Conversion Workgroup on the required methodology used to support Contractor in developing the data conversion specifications, and related activities; and • Provide the County Data Conversion Workgroup with an overview of MethodM including system and design review activities and data collection processes.	required by County for review during Data Conversion Initiation Session. • Report documenting Exhibit A.2 (Data Conversion Statement of Work) dependencies. • List of assignments and roles associated with those assignments for Contractor, members of the County Data Conversion Workgroup, and/or third-party vendors. • Data Conversion Initiation Session Event Summary Report. • Data Conversion Interface Initiation Session presentation materials. **Acceptance Criteria:** • The Data Conversion Initiation Session Event Summary Report from Contractor documenting that the Data Conversion Initiation Session (a) has been completed and (b) includes accurate Documentation of the content, outcomes and next steps agreed upon at the Data Conversion Initiation Session Event. • The Data Conversion Initiation Session Event Summary Report has been Approved by County. • Report documenting Exhibit A.2 (Data Conversion Statement of Work) dependencies addresses all elements described in subtask 1.2 (Conduct Initiation Session for Data Conversion Workgroup). • Report documenting Exhibit A.2 (Data Conversion Statement of Work) dependencies has been Approved by County. • Agreed upon and understood learning objectives for County personnel. • Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

Task 1 Conduct SOW Kick-off	
After the Data Conversion Initiation Session, Contractor will prepare a Data Conversion Initiation Session Event Summary Report for review and Approval by County.	

Task 2 Develop and Document Data Conversion Strategy	
Task Description	
During this task, Contractor will develop for County's Approval a Data Conversion Strategy, including identification of source systems, approach to conversion, validation and data cleansing, roles and responsibilities for Contractor Personnel and County staff, and policies and procedures to ensure controls are in place in accordance with County rules and regulations.	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Integration Architect;
  ○ Interface Architect;
  ○ Lab Solution Architect;
  ○ Radiology Solution Architect; and
  ○ Registration Solution Architect
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Interface SOW Lead;
  ○ County Data Conversion SOW Lead;
  ○ County Lab Lead;
  ○ County Registration Lead;
  ○ County Radiology Lead;
  ○ County Data Architect; and
• Third-Party System Vendor Interface Lead.	

Subtasks/Deliverables	
Subtask 2.1 Confirm and Validate Data Sources Contractor will document and validate the systems for which data conversion will be performed, including systems identified by County or identified in current state assessments performed during other SOW work streams. Contractor will review the data sources and elements identified. Contractor and County will jointly conduct an assessment of the data quality. Contractor will draft a Data Quality Assessment	**Deliverable 2.1 Data Sources** • Data sources for data conversion. • Risk Analysis Document. • Data Quality Assessment. **Acceptance Criteria:** • Documented and County Approved data sources.

Task 2 Develop and Document Data Conversion Strategy	
with County input and participation that identifies at the minimum: • Data integrity issues; • Data cleansing effort required; and • Recommendations for the extent of inclusion of data source/data element in the conversion. Contractor will develop a Risk Analysis Document that, for each data source to be converted, will (a) identify and document issues, risks and barriers that may interfere with the data conversion work stream and (b) propose recommendations and options for mitigating the identified risks, including identifying: • Data which Contractor cannot convert or has not been able to convert in the past; • Any systems for which Contractor has experienced problems converting data in the past; • Data sources where the "catch-up" or cutover process involves significant complexity, labor or risk; • Potential issues connecting/reconciling MPIs across data sources; and • Historical data or data sources for which the cost and/or effort of the data conversion likely outweighs its benefit. Contractor will conduct a review session of the Data Quality Assessment and recommendations with County. Contractor will incorporate County feedback and proposed changes into the Data Quality Assessment and submit a final version to County for Approval.	• The Risk Analysis Document addresses all elements described in subtask 2.1 (Confirm and Validate Data Sources). • The Risk Analysis Document demonstrates substantial detail and breadth of scope as determined by County, and incorporates, and is consistent with, County-provided input. • The Risk Analysis Document has been Approved by County. • The Data Quality Assessment addresses all elements described in subtask 2.1 (Confirm and Validate Data Sources). • The Data Quality Assessment incorporates, and is consistent with, County-provided input. • The Data Quality Assessment has been Approved by County.
Subtask 2.2 – Develop Data Conversion Implementation Strategy Document Contractor will prepare a Data Conversion Implementation Strategy Document, which will include: • Purpose and expected benefits of data conversion;	**Deliverable 2.2 Data Conversion Implementation Strategy Document** • Data Conversion Implementation Strategy Document. • Updated detailed sub Project Work Plan(s) for data conversion that specifies when the data conversion will be initiated and completed.

Task 2 Develop and Document Data Conversion Strategy	
• Source systems; • Approach for determining the conversion period (i.e., regulatory/legal/reporting requirements, trade-offs between amount of data vs. accuracy/necessity of data, clinical requirements, data retention requirements); • Data conversion methodology; • Data integrity analysis and cleansing methodology; • Data validation methodology to be determined mutually with County; • Projected time and resource requirements to complete the data conversion; • The cost-benefit analysis of the data conversion (compared with proceeding without converting the data); • Approach for ensuring data integrity and data privacy to be determined mutually with County; • Roles and responsibilities of Contractor, County, and third-party resources; • Timing, sequencing and coordination of the data conversion process (including cutover, catch-up and deployment) that is tied to (a) the timing of related/applicable SOWs and work streams and (b) the phased deployment strategy for the Project; • Recommendations for decommissioning, retiring, or freezing legacy systems; • Alternatives for accessing legacy data not converted from source system (e.g., retain legacy system, archive data); • Approach for development of reports that span the cutover date (e.g., how to develop a quarterly report based on data partially in legacy system and partially in Licensed Software); • Data conversion contingency plan to be created mutually with County input and participation, including risk mitigation of failed conversion to ensure there is no	**Acceptance Criteria:** • The Data Conversion Implementation Strategy Document incorporates, and is consistent with, County-provided input. • The Data Conversion Implementation Strategy Document addresses all elements described in subtask 2.2 (Develop Data Conversion Implementation Strategy Document). • The Data Conversion Implementation Strategy Document reflects County's decisions regarding whether to perform the data conversion on each data source, and if so, how much data will be converted. • The Data Conversion Implementation Strategy Document has been Approved by County. • The updated sub-Project Work Plan for data conversion incorporates, and is consistent with, the information set forth in the Approved Data Conversion Implementation Strategy Document, and has been Approved by County.

Task 2 Develop and Document Data Conversion Strategy	

interruption to patient care;
• Data quality assurance criteria, including:
  ○ Checkpoints for data validation; and
  ○ Gateway criteria for testing.
• Associated dependencies with all other applicable SOWs.
Contractor will review the draft Data Conversion Implementation Strategy Document with County.
For each data source identified in the draft Data Conversion Implementation Strategy Document, County will determine whether to proceed with the data conversion process, and if so, how much data to convert.
Contractor will update the Data Conversion Implementation Strategy Document to reflect County's decisions with respect to each data source.
Contractor will incorporate County feedback and proposed changes into the Data Conversion Implementation Strategy Document and submit a final version to County for Approval.
Contractor will update the sub-Project Work Plan for data conversion with the information developed in the Data Conversion Implementation Strategy Document.	

Task 3 Develop Data Conversion Specifications
Task Description
Contractor will work with the County to define the specifications for migration of data from the County legacy system(s) into the Contractor's Licensed Software, including alternatives for accessing data that will not be converted but that is necessary to meet patient safety or regulatory requirements.

Task 3 Develop Data Conversion Specifications	
Personnel Requirements	

• Contractor Key Resources
  ○ Interface Architect; and
  ○ System Engineer.
• County Key Resources
  ○ County Data Conversion SOW Lead;
  ○ County Interface SOW Lead; and
• Third-Party System Vendor Interface Lead.	

Subtasks/Deliverables	

Subtask 3.1 – Identify Data Conversion Specifications
Contractor and County will develop a Data Conversion Specifications for each data source, including:
• Description of the data source including:
  ○ data elements;
  ○ data formats and standards;
  ○ data volume provided by County;
  ○ vendor contact information provided by County;
  ○ data dictionaries;
  ○ transfer methods (flat file, etc.); and
  ○ future disposition of the system (whether system will be retired or maintained), to be determined by County.
• Mapping of data elements to the Licensed Software Module;
• Requirements for data retention (e.g., business need, regulatory requirement) determined by County;
• Amount of data (i.e., how far in the past should data be converted - e.g., one (1) month prior to deployment, one (1) year prior to deployment), to be determined by County;
• Type of conversion:
  ○ Automated;
  ○ Semi-automated; and
	Deliverable 3.1 Data Conversion Specifications
	• Data Conversion Specifications
	• Risk Analysis Document.
	Acceptance Criteria:
	• The Data Conversion Specifications for each data source address all elements described in subtask 3.1 (Identify Data Conversion Specifications).
	• The Data Conversion Specifications for each data source incorporate, and are consistent with, County-provided input.
	• The Data Conversion Specifications for each data source have been Approved by County.
	• The Risk Analysis Document addresses all elements described in subtask 3.1 (Identify Data Conversion Specifications).
	• The Risk Analysis Document demonstrates substantial detail and breadth of scope as determined by County, and incorporates, and is consistent with, County-provided input.
	• The risks analysis document has been Approved by County.

Task 3 Develop Data Conversion Specifications	
○ Manual. • Filtering rules for the migrated data, including data elements to filter out; • Attributes used to identify duplicate patient data from multiple data sources; • Algorithm to merge duplicate patient data from multiple data sources and/or data from patients with multiple records/MPIs; • Roles and responsibilities for Contractor, County and third-party vendors (if applicable); • Resource requirements (i.e., time commitments for data conversion team members); • Storage requirements for data to be converted; and • Conversion procedures, including: ○ Process for entering "catch-up" transactions into the Licensed Software during cutover tailored to each source system/data source (e.g., outpatient vs. ED); ○ Approach for migrating data of inpatients (scheduled appointments, pending orders, partial results, MAR, etc.); and ○ Process for medication reconciliation. Contractor will make available tools, software and Best Practices that may facilitate addressing the County data conversion requirements for all type of data conversion (automated, semi-automated, or manual). During the development of the Data Conversion Specifications, Contractor will update the Risk Analysis Document developed in subtask 2.1 (Confirm and Validate Data Sources) which (a) identifies and documents issues, risks and barriers that may interfere with the data conversion work stream and (b) proposes recommendations and options for mitigating the identified risks, including identifying: • Data which Contractor cannot convert or has	

Task 3 Develop Data Conversion Specifications	
not been able to convert in the past; • Any systems for which Contractor has experienced problems converting data in the past; • Data sources where the “catch-up” or cutover process involves greater complexity, labor or risk; • Alternative access mechanisms for data that will not be converted; • Potential issues connecting/reconciling MPIs across data sources; • The source system’s inability to filter the data; and • Historical data or data sources for which the cost and/or effort of the data conversion likely outweighs its benefit.	

Task 4 Conduct Data Conversion Pilot
Task Description
Contractor and County will conduct a data conversion pilot prior to deployment in order to: • Verify conversion load sequence and dependencies. • Determine approximate timing for every load, validation, and quality assurance review to estimate how long the data conversion activities will take. • Validate that legacy data is "clean", e.g., missing data is created, duplicate records are eliminated, legacy non-integrated data reconciles once loaded mutually with County. • Refine existing data validation procedures that ensure that each conversion loaded properly and that interdependent data conversions reconcile.
Personnel Requirements

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Integration Architect;
  ○ Interface Architect; and
  ○ Data Conversion Team.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Database Analyst;
  ○ Data Architect;

</td></tr>
<tr><td colspan="2">

Third-Party System Vendor Interface Lead.

</td></tr>
<tr><td colspan="2">Subtasks/Deliverables</td></tr>
<tr><td>Subtask 4.1 Execute Data Conversion Pilot

For each data source, Contractor will create a Pilot Data Conversion Plan that can be leveraged for the Production Cutover Plan.

Contractor will assist County in implementing the recommendations set forth in the specifications (including developing and implementing a filtering process for data to be migrated into the Licensed Software).

If applicable, Contractor will make Extract, Transfer and Load tools available to implement the data migration strategy.

County and third-party system vendors will identify a sample set of data to be converted during the data conversion pilot.

Contractor will review sample data with County, solicit and incorporate input, then finalize the pilot data set.

Contractor will support County in extracting pilot data from source systems, cleansing the data and uploading the data into the Licensed Software.

Contractor will support the County in validating the data in the Licensed Software, including:

• Verification of migration load sequence/timing;
• Missing data highlighted/created;
• Legacy data reconciled once loaded;
• Verification of conversion load sequence and dependencies (e.g., loading the parent data prior to child data);
• Validation that legacy data is "clean"(e.g., missing data is created, duplicate records are eliminated, legacy non-integrated data reconciled once loaded); and
• Validation that data is loaded in the correct business context.

Contractor will log issues discovered during the</td><td>Deliverable 4.1 Data Conversion Pilot

• Pilot Data Conversion Plan.
• Pilot Data Conversion Report
• Updated Data Conversion Specifications.
• County Approved completed successful pilot data conversion.

Acceptance Criteria:

• Resolution of all outstanding issues defined as required for moving forward to Integration Testing.
• Gateway criteria have either been achieved or exceptions documented and Approved by Project governance.
• All issues that remain, but are not essential to Integration Testing, but essential to Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.
• The Data Conversion Pilot Report has been Approved by County.
• The Data Conversion Pilot Report addresses all elements described in subtask 4.1 (Execute Data Conversion Pilot).
• The Data Conversion Pilot Report incorporates, and is consistent with, County-provided input.
• The Data Conversion Pilot Report has been Approved by County.
• The updated Data Conversion Specifications incorporate, and are consistent with, County provided input.
• The updated Data Conversion Specifications have been Approved by County.</td></tr>
</table>

Task 4 Conduct Data Conversion Pilot	
data conversion pilot in an issue log and identify resolution. Contractor will resolve issues and repeat the data conversion pilot until all critical issues have been resolved and Approved by County. Contractor will support County in piloting the catch-up process and contingency procedures. Contractor will monitor the data conversion and validation process and prepare a Pilot Data Conversion Report, including: • Recommendations for refining the Data Conversion Specifications; • Estimated conversion duration and schedule for converting all data identified based on successful pilot; • Recommendations for mitigating impact on system performance/response time while data migration is in progress; and • Refinement of validation and quality assurance procedures to ensure that each conversion is loaded properly, and that interdependent conversions reconcile. Contractor will review Pilot Data Conversion Report with County and (a) update the Data Conversion Specifications with new information based on timing in pilot, and (b) incorporate any other feedback and input from County. Upon completion of final successful pilot, Contractor will jointly decide with the County through the governance process when the data conversion for each source system is ready for Integration Testing.	

Task 5 Conduct Data Conversion
Task Description
Using the Data Conversion Implementation Strategy Document and Data Conversion Specifications, outcome and lessons learned from the data conversion pilot, and the direction provided in the Production Cutover Plan developed in subtask 5.1(Develop Production Cutover Plan) of Exhibit A.23 (Deployment Statement of Work), Contractor will perform data conversion, moving the converted data into data staging environment and subsequently into production environment.

Task 5 Conduct Data Conversion	
Personnel Requirements	

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Solution Delivery Consultant;
  ○ Interface Architect;
  ○ System Engineer; and
  ○ Data Conversion Team.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Interface SOW Lead;
  ○ Domain Workgroup Leads;
  ○ Data Architect;
  ○ Data Conversion SOW Lead; and
  ○ Testing Lead.
• Third-Party System Vendor Interface Lead.	

Subtasks/Deliverables	
Subtask 5.1 Perform Data Conversion Contractor will convert all relevant data from existing system(s) to staging and production environments in accordance with the Data Conversion Specifications, associated timelines, and the Production Cutover Plan developed in subtask 5.1(Develop Production Cutover Plan) of Exhibit A.23 (Deployment Statement of Work). Contractor will monitor the data conversion process and report to County any issues. Contractor will coordinate all data conversion activities with other relevant deployment activities set forth in Exhibit A.23 (Deployment Statement of Work).	**Deliverable 5.1 Data Conversion Executed in Staging Environment** • Data conversion in all relevant Licensed Software staging environments (staging, production, etc.). • Data Conversion readiness report. **Acceptance Criteria:** • The Data conversion in Licensed Software staging environment has been Approved by County. • The data conversion readiness report has been Approved by County.

5.3 Project Deliverable Expectations Document Template

Project Deliverable Expectations Document

Exhibit A.19 (Security Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

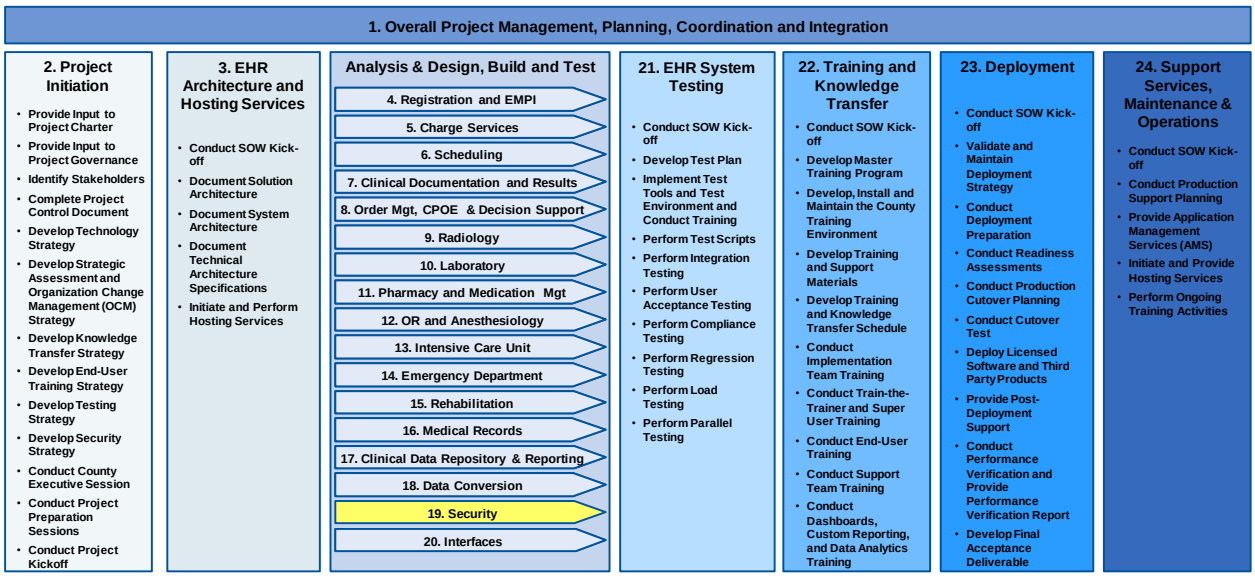
1. Introduction

This Exhibit A.19 (Security Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.19 (Security Statement of Work). The completion of any phase in a period of time shorter or longer than that specified below shall not increase the Contract Sum.

This is Exhibit A.19 (Security Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

Completion of this SOW will (a) provide the designated County Workgroup training and preparation in fundamentals of Licensed Software and Third-Party Products use, (b) analysis of current state workflow,

(c) recommendations from Contractor for design, configuration and testing approach, and (d) some implementation elements of the software components which are necessary to deliver Security as part of the EHR System.

All care venues will be incorporated into the preparation, kick-off, current state assessment, system review/design build, and system validation. The needs of County-identified care providers and specialties will be an integrated part of the build and validation process. External sources of information will be incorporated, as will downstream users of Security functionality, both internal and external. In addition, automated data capture devices that "interface" directly and indirectly will be accommodated.

3. SOW Summary

3.1 Overview

This SOW describes the Security tasks, subtasks, and Deliverables required for successful completion of the Project. It describes the work plan and initiation session for this sub-project; the process for documenting and validating security objectives and requirements for the Licensed Software; the setup, deployment and monitoring in accordance with security requirements; and the setup of user roles and authorizations.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the foregoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Service Statement of Work) provides the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.5 Schedule

The commencement date for Exhibit A.19 (Security Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.19 (Security Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations Milestones, including a Key Milestone table, will be developed as part of the Project Control Document. The detailed durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with this Agreement. This includes use of Contractor's knowledge capital databases and other repositories of deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Security SOW Lead**" or "**County SOW Lead**". The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverables set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project Status Meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings and work sessions related to the completion of this SOW.

(12) County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1 Conduct SOW Kick-off	
Subtask 1.1 Develop Detailed Sub-Project Work Plan for Security	Deliverable 1.1 Sub-Project Work Plan for Security
Subtask 1.2 Conduct Initiation Session for Security Workgroup	Deliverable 1.2 Security Initiation Session (Key Deliverable)
Task 2 Document Security Objectives and Protection Requirements	
Subtask 2.1 Document Security Objectives and Protection Requirements	Deliverable 2.1 Security Objectives and Protection Requirements
Subtask 2.2 Develop System Security Plan	Deliverable 2.2 System Security Plan (Key Deliverable)

Task/Subtask Name	Deliverables
Task 3 Implement Security Monitoring and Auditing Infrastructure and Processes	
Subtask 3.1 Set Up and Configure Security Monitoring and Auditing Infrastructure and Processes	Deliverable 3.1 Monitoring and Auditing Infrastructure and Processes
Subtask 3.2 Deploy Security Monitoring and Auditing Tools	Deliverable 3.2 Security Monitoring and Auditing Tools (Key Deliverable)
Task 4 Implement Roles and Provision Users	
Subtask 4.1 Document User Security Profiles (Roles and Authorizations)	Deliverable 4.1 User Security Profiles Document
Subtask 4.2 Implement User Roles and Authorizations	Deliverable 4.2 User Roles and Authorizations
Subtask 4.3 Populate User Roles and Authorizations	Deliverable 4.3 User Roles and Authorizations Populate to Production Environment

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable shall be developed in accordance with the following Contractor obligations, which shall be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverable Expectations Document (also referred to as "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, the Contractor must include a copy of the Project DED as the cover sheet. A template to be used for DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and incorporate County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

(10) Provide both the clinical and workflow subject matter expertise to support the completion of Deliverables.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee shall notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable shall be provided to County with a request for Acceptance. County shall notify Contractor of its Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor will be responsible for performing the following tasks as to the Services to be provided under this SOW.

<table>
<tr><th colspan="2">Task 1 Conduct SOW Kick-off</th></tr>
<tr><td colspan="2">Task Description</td></tr>
<tr><td colspan="2">The team members from Contractor, and County, and external stakeholders will be introduced and their specific roles will be described. Security-specific training on the Licensed Software and Third-Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "County Security Workgroup" or "County Workgroup" and the County Security Workgroup will be introduced to various Contractor tools, methodologies, and Best Practice recommendations that will be used throughout this SOW.</td></tr>
<tr><td colspan="2">Personnel Requirements</td></tr>
<tr><td colspan="2">• Contractor Resources
○ Core Architect;
○ Core Delivery Consultant; and
○ Integration Architect.
• County Resources
○ County Security SOW Lead;
○ County Security SOW Workgroup; and
○ IT Analyst.</td></tr>
<tr><td colspan="2">Subtasks/Deliverables</td></tr>
<tr><td>Subtask 1.1 Develop Sub-Project Work Plan for Security
As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include a Security-specific section. The overall Project Work Plan will include a Project</td><td>Deliverable 1.1 Sub-Project Work Plan for Security
• Security-specific section of Project Work Plan.
• Sub-Project Work Plan for Security.</td></tr>
</table>

Task 1 Conduct SOW Kick-off	
Schedule, and will be developed in a MethodM Online-compatible version of Microsoft Project, which shall include: • Deliverables, tasks, and subtasks; • Associated dependencies among Deliverables, tasks, and subtasks, both within this SOW and across all related SOWs and work streams; • Resources (effort hours and roles) required for each Deliverable, task, and subtask; • Start date and date of completion for each Deliverable, task, and subtask; • County review period for each Deliverable; • Acceptance Criteria for each Deliverable; and • Milestones and Key Milestones. Contractor will adapt the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.19 (Security Statement of Work) and subject to County Approval.	**Acceptance Criteria:** • The Security-specific section of the Project Work Plan incorporates, and is consistent with, County-provided input. • The Security-specific section of the Project Work Plan addresses all elements described in subtask 1.1 (Develop Detailed Sub-Project Work Plan for Security). • The Security-specific section of the Project Work Plan has been Approved by County. • Timelines detailed in the Security-specific section of the Project Work Plan and sub-Project Work Plans are realistically achievable with reasonable effort as determined by County. • Elements of the Security-specific section of the Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this and other SOWs. • Confirmed availability of Contractor resources required to implement the Security sub-Project Work Plan. • Sub-Project Work Plan for Security addresses all elements described in subtask 1.1 (Develop Detailed Sub-Project Work Plan for Security) and has been Approved by County.
Subtask 1.2 Conduct Initiation Session for Security Workgroup Contractor will conduct a Security Initiation Session to provide an introduction to the County Workgroup to the Services covered by this Exhibit A.19 (Security Statement of Work), including the timelines and nature of the work effort that will be required to implement this SOW. Before the Security Initiation Session, Contractor will: • Work with County to identify all Contractor and County resources required to complete the tasks outlined in this SOW; • Provide County with a roster of kick-off	**Deliverable 1.2 Security Initiation Session** • Security Initiation Session materials for County review one (1) week prior to Security Initiation Session. • Initial list of County Domains, Venues and Locations for which Security capabilities must be delivered for review during Security Initiation Session. • Report documenting Security SOW dependencies. • List of County Workgroup members who attended the Security Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup.

Task 1 Conduct SOW Kick-off	
participants; • Conduct a Project Management Workshop; and • Develop an agenda/schedule for the Security Initiation Session. Contractor will conduct the Security Initiation Session as follows: • Review and document Licensed Software Modules, Domains, Venues and Locations for which Security capabilities must be delivered within County; • Illustrate and document dependencies between the Security SOW and any other SOWs and Project work streams; including at a minimum: o Requirements gathering and functional/technical Specifications during system review, design review and system validation o Testing, including Integration Testing, Peripheral Device testing and User Acceptance Testing; o Go-Live readiness assessment; and o Post-Go-Live assessment. • Review tasks, Deliverables and Milestones for the development of Security. • Train the County Workgroup on the required processes and tools used to support the implementation of this SOW. • Provide the County Workgroup with an overview of MethodM including system and design review activities and data collection processes. After the Security Initiation Session, Contractor will prepare a Security Initiation Session Event Summary Report for review and Approval by County.	• Security Initiation Session Event Summary Report. • Agenda/schedule for Security Initiation Session. • Security Initiation Session presentation materials. **Acceptance Criteria:** • The Security Initiation Session Event Summary Report from Contractor documenting that Security Initiation Session (a) has been completed, and (b) includes accurate documentation of the content, outcomes and next steps agreed upon at the Security Initiation Session Event. • The Security Initiation Session Event Summary Report has been Approved by County. • Report documenting Security SOW dependencies addresses all elements described in subtask 1.2 (Conduct Initiation Session for Security Workgroup). • Report documenting Security SOW dependencies has been Approved by County. • Agreed upon and understood learning objectives for County personnel. • Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

Task 2 Document Security Objectives and Protection Requirements	
Task Description	
Contractor will document and validate with County the security objectives and protection requirements for the EHR System in accordance with the Agreement.	
Personnel Requirements	

• Contractor Resources
  ○ Core Architect;
  ○ Core Delivery Consultant; and
  ○ Integration Architect.
• County Resources
  ○ County Security SOW Lead;
  ○ County Security SOW Workgroup Members; and
  ○ IT Analyst.	

Subtasks/Deliverables	

Subtask 2.1 Document Security Objectives and Protection Requirements
Contractor will draft a Security Protection Requirements Document outlining security threats, risk, security objectives (confidentiality, integrity, availability, user control, accountability) and relevant protection requirements that address current risks and those foreseen by the time implementation is complete. The Security Protection Requirements Document will:
• Define the solution security protection framework including:
  ○ Authentication;
  ○ Authorization;
  ○ Auditing;
  ○ Data confidentiality and integrity;
  ○ Data validation and content scanning; and
  ○ Management and administration.
• Identify existing security protection capabilities within County that are applicable to the EHR System;
• Identify any differences between existing County capabilities and EHR System capabilities, noting where existing County protection capabilities are weaker or stronger (more secure);
	Deliverable 2.1 Security Objectives and Protection Requirements
	• Security Protection Requirements Document.
	• Security Assessment document.
	• Security Protection Requirements Document and Security Assessment validation session.
	
	Acceptance Criteria:
	• County Approved Security Protection Requirements Document.
	• County Approved Security Assessment document.

Task 2 Document Security Objectives and Protection Requirements	

• Identify how the EHR System will leverage existing County security protection capabilities to improve the overall security of the EHR System and/or make the user experience simpler (e.g. reduce the need to sign in to the Licensed Software separately by leveraging the County's existing access control capabilities);
• Identify additional security considerations for County to consider mitigating known vulnerabilities in the EHR System, including the Licensed Software;
• Map each protection requirement to identified County security threat and risk to enable non-technical hospital management to quickly and easily understand the likelihood and impact of any security-related risk as justification for protection requirement;
• Map each security and privacy requirement of the Agreement to a description of the physical or logical protections designed to address the requirement along with reference to the implementation strategy, if applicable, for each protection;
• Ensure the protection requirements address all relevant legal and regulatory requirements including but not limited to the following items (attach all these requirements to the document):
  ○ Federal, State and County mandated information protection requirements (e.g., HIPAA/HITECH);
  ○ Contractor Hosting Services and Hosting Environment security policies;
  ○ Physical security requirements at County facilities as they relate to the EHR System; and
  ○ Information protection requirements specified in Section 20 (Security) of the Agreement and Exhibit K (Information Protection Requirements) and Exhibit N (Hosting Services) to the Agreement.	

Task 2 Document Security Objectives and Protection Requirements	

• Document the target security architecture and map relevant the Licensed Software security features and functions (e.g. access controls, authentication, encryption) to the following key architecture components:
  ○ Authentication;
  ○ Authorization;
  ○ Access Governance;
  ▪ Roles, rules, entitlements, policy management; and
  ▪ Access request and approval workflow.
  ○ Auditing;
  ○ Data confidentiality and integrity;
  ○ Data validation and content scanning;
  ○ Network security; and
  ○ Management and administration.
Contractor will perform a high level Security Assessment of shortcomings in the current County security environment and provide recommendations with regard to the implementation and use of the EHR System The Security Assessment will be developed using, at a minimum,
• Interviews with security stakeholders within each County facility (both business and IT stakeholders);
• Contractor's knowledge base; and
• The expertise of the facilities and the Contractor's SMEs.
The Security Assessment should identify current vulnerabilities and the controls being implemented within the EHR System to mitigate the related risk.
Contractor will conduct a validation session of the draft Security Protection Requirements Document and Security Assessment with County.
Contractor will incorporate County feedback and proposed changes into the Security Assessment and Security Protection Requirements Document and submit a final version to County for	

Task 2 Document Security Objectives and Protection Requirements	
Approval.	
Subtask 2.2 Develop System Security Plan Contractor will draft a System Security Plan to ensure that application security will be addressed throughout the Project's entire lifecycle. The System Security Plan includes: • Description of the application security; • Security risks and concerns; • Roles and responsibilities; and • Security Project management requirements. Security-specific Project Deliverables based on subtask 2.1 output (Document Security Objectives and Protection Requirements) covering end-to-end information protection in all states (at rest/motion/use). Contractor will conduct a review session of the draft System Security Plan and risk assessment with County. Contractor will incorporate County feedback and proposed changes into the System Security Plan and submit a final version to County for Approval. Throughout the Project, Contractor will periodically review and update the System Security Plan. Contractor will alert County of potential issues and mitigate security issues early on in the Project life cycle.	**Deliverable 2.2 System Security Plan** • System Security Plan. • System Security Plan review session. **Acceptance Criteria:** • County Approved System Security Plan; • Final System Security Plan addresses all required elements described in Task 2.2 (Develop System Security Plan); and • Final System Security Plan is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 3 Implement Security Monitoring and Auditing Infrastructure and Processes
Task Description
Contractor will set up, test, and deploy the infrastructure and processes required for the monitoring and auditing of security including all activities necessary to ensure that the security monitoring and auditing infrastructure and processes will be ready and operate in accordance with the security requirements by the time of Go-Live.
Personnel Requirements

• Contractor Resources
  ○ Core Architect;
  ○ Core Delivery Consultant;
  ○ DeviceWorks Delivery Consultant; and
  ○ Integration Architect.
• County Resources

Task 3 Implement Security Monitoring and Auditing Infrastructure and Processes	
○ County Security SOW Lead; ○ County Workgroup Members; and ○ IT Analyst.	
Subtasks/Deliverables	
Subtask 3.1 Set Up and Configure Monitoring and Auditing Infrastructure and Processes Contractor will set up and configure monitoring and auditing infrastructure and processes in accordance with the System Security Plan in subtask 2.2 (Develop System Security Plan). Contractor will setup security monitoring infrastructure and document processes in Security Monitoring Infrastructure Documentation and Security Monitoring Process Documentation that includes: • Security monitoring tools; • Vulnerability management; • Security information and event management; • Roles and responsibilities of Contractor and County; • Privilege access monitoring; • Incident management; and • Change management. Contractor will setup security auditing infrastructure and document processes in Security Auditing Infrastructure Documentation and Security Auditing Process Documentation that include: • Security auditing tools (e.g., P2Sentinel); • Roles and responsibilities of Contractor and County; • Audit Issue management; • Escalation procedures; and • Incident notification and risk assessment and mitigation. Throughout the Project, Contractor will periodically review and update the System Monitoring and Auditing Infrastructure and Processes Documentation. Contractor will alert County of potential issues and mitigate security	**Deliverable 3.1 Monitoring and Auditing Infrastructure and Processes** • Security Monitoring Infrastructure Documentation. • Security Monitoring Process Documentation. • Security Auditing Infrastructure Documentation. • Security Auditing Process Documentation. **Acceptance Criteria:** • County Approved Security Monitoring Infrastructure Documentation. • County Approved Security Monitoring Process Documentation. • County Approved Security Auditing Infrastructure Documentation. • County Approved Security Auditing Process Documentation.

Task 3 Implement Security Monitoring and Auditing Infrastructure and Processes	
issues early on in the project lifecycle.	
Subtask 3.2 Deploy Security Monitoring and Auditing Tools Contractor will deploy the Security Monitoring and Auditing Tools related to Licensed Software and Third-Party products, including: • Design, configure, and test infrastructure for the Security Monitoring and Auditing Tools; and • Train County personnel on accessing Security Monitoring and Auditing Tools, dashboards and reports.	**Deliverable 3.2 Security Monitoring and Auditing Tools** • Security Monitoring and Auditing Tools. **Acceptance Criteria** • County Approved Security Monitoring and Auditing Tools.

Task 4 Implement Roles and Provision Users	
Task Description	
Contractor will identify and set up user roles and the required authorizations for Licensed Software and Third-Party Product access.	
Personnel Requirements	

• Contractor Resources
  ○ Core Architect;
  ○ Core Delivery Consultant; and
  ○ Integration Architect.
• County Resources
  ○ County Security SOW Lead; and
  ○ IT Analyst.	

Subtasks/Deliverables	
Subtask 4.1 Document User Security Profiles (Roles and Authorizations) Contractor will assist County in completing security Data Collection Workbooks ("**DCWs**") in collaboration with all other SOW workgroups and in accordance with the tasks and Deliverables specified in Exhibits A.4 – A.18 to the Agreement. Contractor will review DCWs and highlight issues and provide County with recommendations for addressing identified issues based upon Contractor Best Practices and other client experiences and approaches. Contractor will draft an Enterprise-wide User Security Profiles Document that includes:	**Deliverable 4.1 User Security Profiles Document** • Enterprise-wide User Security Profiles Document. • Enterprise-wide User Security Profiles Document review session. • Training on user provisioning and user account management. **Acceptance Criteria:** • County Approved Enterprise-wide User Security Profiles Document. • County Approved required authorizations for

Task 4 Implement Roles and Provision Users	
• Approach to defining and documenting standardized user security profiles and required authorizations for system access, as well as for administrative access to "back office" solution components such as databases, servers, production data, etc.; • User roles for accessing Licensed Software, Third-Party Products, and Hosting Software; • Policies and procedures for provisioning and de-provisioning user identities based on Best Practices for identity and access management solutions; and • Training materials for County personnel to provision users and managing user accounts. Contractor will conduct a review session of the Enterprise-wide User Security Profiles Document with County, including SMEs from all relevant SOWs and work streams. Contractor will incorporate County feedback and proposed changes into the Enterprise-wide User Security Profile Document and submit a final version to County for Approval. Contractor will conduct training of County personnel on user provisioning and user account management in accordance with Exhibit A.22 (Training and Knowledge Transfer Statement of Work).	system access. • County Approved policies and procedures for provisioning and de-provisioning user identities.
Subtask 4.2 Implement User Roles and Authorizations Contractor will support County implementation of user roles and authorizations, including: • Integration of roles with existing County Identity Access Management (**"IAM"**) capabilities; • Providing assistance in the setup of user roles within existing County IAM systems, if available; • Setup roles within the EHR System; and • Setup of the required authorizations for EHR System access, including privileged uses (as described in the comment above).	**Deliverable 4.2 User Roles and Authorizations** • Implemented user roles and authorizations. • Documentation and tools to support County implementation of user roles and authorizations. • User Role and Authorization Test Plan. **Acceptance Criteria:** • County Approved user roles. • County Approved authorizations for system access. • County receipt of documentation and tools to support County implementation of user roles

Task 4 Implement Roles and Provision Users	
Contractor will document, and provide tools, and advice to support the County implementation of user roles and authorizations, including: • Governance mechanisms for the maintenance of roles over time; • Suggested change management processes; • Suggested provisioning process; and • Staff training, for the implementation and maintenance and revision of roles on an ongoing basis. Contractor will develop and document User Role and Authorization Test Plan that includes: • Input into Domain-specific test scripts and test data; • Security test scripts for monitoring and audit tools; • Testing process; and • Process for reporting and fixing testing defects.	and authorizations. • County Approved User Role and Authorization Test Plan.
Subtask 4.3 Populate User Roles and Authorizations Contractor will validate County provided list of users and roles. Contractor will migrate all user roles and authorizations for EHR System access into the training and Production Environments as it relates to the roles in the EHR System. Contractor will assist County in creating generic user accounts in the training environments for each Cluster. Contractor will provision users in the Production Environments for each Cluster. Contractor will migrate all relevant data in accordance with the Production Cutover Plan developed in subtask 5.1 (Develop Production Cutover Plan) of Exhibit A.23 (Deployment Statement of Work). Contractor will document: • User security profiles, including roles and authorizations; and	**Deliverable 4.3 User Roles and Authorizations Populate To Production Environment** • Documented user security profiles, including roles and authorizations. • Migrated user roles and authorizations for system access into the Production Environment. **Acceptance Criteria:** • User roles successfully migrated. • County Approved user security profiles.

Task 4 Implement Roles and Provision Users	
• Users provisioned. Contractor will coordinate migration activities with other relevant deployment activities set forth in Exhibit A.23 (Deployment Statement of Work).	

5.3 Project Deliverable Expectations Document Template

Project Deliverable Expectations Document

Exhibit A.20 (Interfaces Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

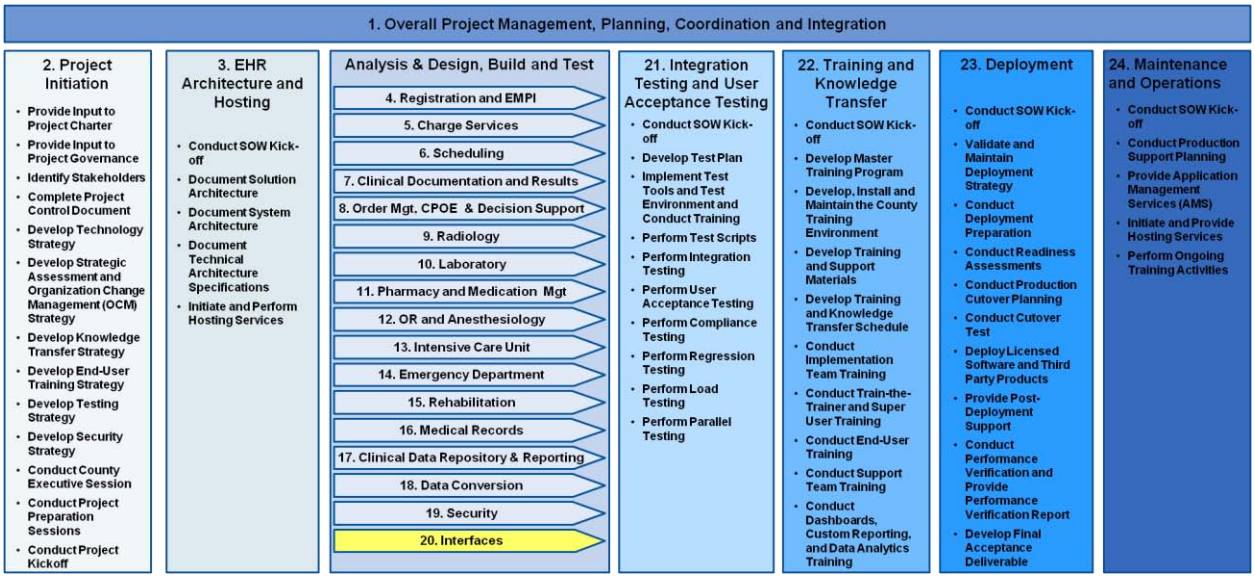
1. Introduction

This Exhibit A.20 (Interfaces Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the all the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.20 (Interfaces Statement of Work). The completion of any phase in a period of time shorter or longer that that specified below will not increase the Contract Sum.

This is Exhibit A.20 (Interfaces Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW will provide the framework which will be used to design, build, test, and install Interfaces for this EHR implementation.

3. SOW Summary

3.1 Overview

This SOW describes the tasks, subtasks and Deliverables necessary to design, build and test Interfaces required by County.

3.2 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded (identification of FTE equivalent or hours for all resources by Key Milestone) Contractor resource staffing commitments and to detail specific County resources which will guide County on how best to allocate and deploy staff to this Project. Notwithstanding the foregoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.3 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provides the development/build and test environments that are required for this SOW.

3.4 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, driving decisions, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – Executive leadership from Contractor, DHS, and the DHS CIO must be involved in the Project and meet at regular intervals to discuss the Project's progress and reach agreement on decisions that have been escalated to their level.

3.5 Schedule

The commencement date for this Exhibit A.20 (Interfaces Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation Statement of Work). This SOW is scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.20 (Interfaces Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for tasks and sub-task, including a Key Milestone table will be developed as part of the Project Control Document. The detailed durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with this Agreement. This includes use of Contractor's knowledge capital databases and other repositories of Deliverables and intellectual capital from previous client experiences.

(4) Contractor will provide all Services in English.

4.1 Contractor Delivery Consultant Responsibilities

Contractor will designate a Contractor Delivery Consultant to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones and Deliverables, and schedule;

(5) Measure, track, and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates

Contractor will perform this activity throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County Interfaces SOW Lead**" or "**County SOW Lead**"). The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverable set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project Status Meetings with Contractor Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1 Conduct SOW Kick-off	
Subtask 1.1 Develop Detailed Sub-Project Work Plan for Interfaces	Deliverable 1.1 Sub-Project Work Plan for Interfaces
Subtask 1.2 Conduct Initiation Session for Interfaces Workgroup	Deliverable 1.2 Interface Initiation Session (Key Deliverable)
Task 2 Perform Current State Assessment	
Subtask 2.1 Document Interfaces Current State Assessment	Deliverable 2.1 Interfaces Current State Assessment
Subtask 2.2 Prepare Interfaces Implementation Strategy Document	Deliverable 2.2 Interfaces Implementation Strategy Document
Task 3 Design Interfaces	
Subtask 3.1 Document Functional and Technical Specifications for Interfaces	Deliverable 3.1 Functional and Technical Specifications for Interfaces
Subtask 3.2 Develop Interface Test Plan	Deliverable 3.2 Interface Test Plan (Key Deliverable)
Task 4 Build and Test Interfaces	
Subtask 4.1 Build and Test Interfaces	Deliverable 4.1 Tested Interfaces (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable will be developed in accordance with the following Contractor's obligations, which will be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by County and Contractor using a Deliverables Expectations Document ("**DED**") Approved by the County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template).

(2) Develop agendas, and coordinate scheduling with County, for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and, distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and analyze County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee will notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, Contractor will make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable will be provided to County with a request for Acceptance. County will notify Contractor of it Acceptance or rejection in a timeframe that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor will be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-off

Task Description

The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. Interfaces-specific training on the Licensed Software and Third-Party Products will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County Interfaces Workgroup**" or "**County Workgroup**" and the County Interfaces Workgroup will be introduced to various Contractor tools, existing Interface libraries, Interface methodologies, and Best Practice recommendations that will be used throughout this SOW.

Personnel Requirements

- Contractor Key Employees
  - Project Director;
  - Project Manager;
  - Integration Architect; and
  - Interface Solution Architect
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Interface SOW Lead; and
  - County Interface Workgroup.

Subtasks/Deliverables

Subtask 1.1 Develop Detailed Sub-Project Work Plan for Interfaces

As part of the Project Control Documentation, Contractor will develop and maintain an overall Project Work Plan. The Project Work Plan will include an Interface-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online compatible version of Microsoft Project, which shall include:

- Deliverables, tasks, and subtasks;
- Associated dependencies among Deliverables, tasks, and subtasks both within this SOW and across all related SOWs and work streams;
- Resources (effort hours and roles) required for each Deliverable, task, and subtask;
- Start date and date of completion for each Deliverable, task, and subtask;
- County review period for each Deliverable;
- Acceptance Criteria for each Deliverable; and

Deliverable 1.1 Sub-Project Work Plan for Interfaces

- Interfaces-specific section of Project Work Plan.
- Sub-Project Work Plan for Interfaces.

Acceptance Criteria:

- The Interfaces-specific section of the Project Work Plan incorporates, and is consistent with, County-provided input.
- The Interfaces-specific section of the Project Work Plan addresses all elements described in subtask 1.1 (Develop Detailed Sub-Project Work Plan for Interfaces).
- The Interfaces-specific section of the Project Work Plan has been Approved by County.
- Timelines detailed in the Interfaces-specific section of the Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.

Task 1 Conduct SOW Kick-off	
• Milestones and Key Milestones. Contractor will adapt the Interfaces-specific section of the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.20 (Interfaces Statement of Work) and subject to County Approval.	• Elements of the Interfaces-specific section of the Project Work Plan are consistent with Tasks, subtasks, and deliverables as outlined in this and other SOWs. • Confirmed availability of Contractor resources required to implement the Interfaces sub-Project Work Plan.
Subtask 1.2 Initiation Session for Interfaces Workgroup Contractor will conduct an Interfaces Initiation Session to provide an introduction to the County Workgroup to the Services covered by this Exhibit A.20 (Interfaces Statement of Work), including the timelines and nature of the work effort that will be required to implement this SOW. Before the Interfaces Initiation Session, Contractor will: • Work with County to identify all Contractor and County resources required to complete the tasks outlined in this SOW; • Provide County with a roster of Interfaces Initiation Session participants; • Conduct a Project Management Workshop as described in task 12 (Conduct Project Preparation Sessions) of Exhibit A.2 (Project Initiation Statement of Work); and • Develop a written agenda/schedule for the Interfaces Initiation Session. The Interfaces Initiation Session will include the following: • Review and document Licensed Software Modules and Third-Party Products, Domains, Venues and Locations for which Interface capabilities must be delivered within County; • Illustrate and document sample dependencies and an approach to identify all of the dependencies between this SOW and any other SOWs and Project work streams; including at a minimum: ○ Requirements gathering and functional/technical Specifications during	**Deliverable 1.2 Interfaces Initiation Session** • Interfaces Initiation Session materials for County. • Initial list of County Domains, Venues and Locations for which Interfaces capabilities must be delivered. • Report documenting Interfaces Statement of Work dependencies. • List of County Workgroup members who attended the Interfaces Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • Interfaces Initiation Session Event Summary Report. • Interface Statement of Work kick-off presentation materials. • Interface Statement of Work kick-off Event Summary Report. **Acceptance Criteria:** • The Initiation Session Event Summary Report from Contractor documenting that the Interfaces Initiation Session (a) has been completed and (b) includes accurate Documentation of the content, outcomes and next steps agreed upon at the Interfaces Initiation Session. • The Interfaces Initiation Session Event Summary Report has been Approved by County. • Report documenting sample Interfaces Statement of Work dependencies and a plan

Task 1 Conduct SOW Kick-off	
system review, design review and system validation; ○ Testing, including Integration Testing, Peripheral Device Testing and User Acceptance Testing; ○ Go-Live readiness assessment; and ○ Post-Go-Live assessment. • Review tasks, Deliverables and Milestones for the development of Interfaces; • Train the County Workgroup on the required methodology used to support Contractor in conducting the current state assessment, purpose and expected outcome of the assessment, and related activities; and • Provide the County Workgroup with an overview of MethodM including system and design review activities and data collection processes. After the Interfaces Initiation Session, Contractor will prepare an Interfaces Initiation Session Event Summary Report for review and Approval by County.	to identify and address all others as described in subtask 1.2 (Conduct Initiation Session for Interfaces Workgroup). • Report documenting Interfaces Statement of Work dependencies has been Approved by County. • Agreed upon and understood learning objectives for County personnel. • Contractor evidence that County personnel have achieved stated learning objectives required for Project progression according to stated timelines.

Task 2 Perform Current State Assessment
Task Description
Contractor will identify and validate the necessary Interfaces and develop an Interface Requirements Document.
Personnel Requirements
• Contractor Key Employees ○ Contractor Project Director; ○ Contractor Project Manager; ○ Integration Architect; ○ Solution Architects; ○ Contractor Engagement Leader; ○ Technical Engagement Leader; ○ Interface Architect; ○ Lab Solution Architect; ○ Radiology Solution Architect; and ○ Registration Solution Architect. • County Key Resources ○ County Project Director;

Task 2 Perform Current State Assessment	
○ County Project Manager; ○ County Interface SOW Lead; and ○ Other County SOW Leads, as applicable.	
Subtasks/Deliverables	
Subtask 2.1 Document Interfaces Current State Assessment Contractor will perform an Interfaces Current State Assessment as it relates to the Licensed Software and Third-Party Products, and document the assessment in the template-based structured OWA tool on MethodM Online. Contractor will draft an Interfaces Current State Assessment that includes the following: • All existing Interfaces; • Source systems for Interfaces to and from Licensed Software; • Target systems for Interfaces to and from Licensed Software Interfaces; • County will provide vendor contacts required for Interfaces with any third-party system, and any other applicable information regarding such third-party systems; • High level Interface description (types of data, messaging, and Interface tools and strategy); • Projected transaction volume and frequency provided by County; • Identification of existing Contractor Interfaces that meet or may facilitate addressing the County Interface requirements (For the avoidance of doubt, prior Contractor Interface work and tools are to be made available to County as part of the Services). Contractor will analyze the findings of the Interfaces Current State Assessment and prepare a Risk Analysis Document that (a) identifies and documents issues, risks and barriers that may interfere with the Interfaces work stream, and (b) proposes recommendations and options for mitigating the identified risks, including:	**Deliverable 2.1 Interfaces Current State Assessment** • Interfaces Current State Assessment including completed OWA tool and identified risks. • Risk Analysis Document with recommendations for workarounds that include recommendations that have a high likelihood of improving: ○ Efficiency; ○ Patient safety; ○ Quality of care; and ○ Patient experience. **Acceptance Criteria:** • The Interfaces Current State Assessment is stored on a discrete SOW-specific section of MethodM Online, and it incorporates, and is consistent with, County-provided input. • The Interfaces Current State Assessment and analysis addresses all elements described in subtask 2.1 (Document Interfaces Current State Assessment). • The Interface Current State Assessment has been Approved by County. • The Risk Analysis Document demonstrates substantial detail and breadth of scope as determined by County. • The Risk Analysis Document has been Approved by County.

Task 2 Perform Current State Assessment	
• Identifying (a) any Interfaces which Contractor cannot develop or has not been able to develop in the past, (b) any third-party systems for which Contractor has experienced problems developing Interfaces in the past; • Identifying problematic service level agreements with third-party systems for which County requires an Interface; and • Identifying Interfaces for which a workaround may be required, and any limitations associated with the applicable workaround. Contractor will develop a Risk Analysis Document using industry standards, Best Practices, Contractor's knowledge base and the expertise of Contractor's SMEs. Contractor will review the draft Interfaces Current State Assessment with County. Contractor will incorporate County feedback and proposed changes into the Interfaces Current State Assessment and OWA and submit the updates to County for Approval.	
Subtask 2.2 – Prepare Interfaces Implementation Strategy Document Contractor will prepare an Interfaces Implementation Strategy Document, which, at a minimum, will: • Identify any existing systems or Interfaces that will be (a) discontinued, (b) retained and replaced with new systems/Interfaces to Licensed Software, or (c) added; • Specify the timing, sequencing and coordination of the development and implementation of each Interface that is tied to (a) the timing of related/applicable SOWs and work streams and (b) the phased deployment strategy for the Project; • Identify potential temporary Interfaces needed during the phased deployment of the system; • Specify data conversion requirements, and	**Deliverable 2.2 Interfaces Implementation Strategy Document** • Interfaces Implementation Strategy Document. • Updated detailed sub-Project Work Plan(s) for Interfaces that specify when each Interface will be developed and completed. **Acceptance Criteria:** • The Interfaces Implementation Strategy Document incorporates, and is consistent with, County provided input. • The Interfaces Implementation Strategy Document addresses all elements described in subtask 2.2 (Prepare Interfaces Implementation Strategy Document). • The Interfaces Implementation Strategy Document has been Approved by County.

Task 2 Perform Current State Assessment	
the associated dependencies with ExhibitA.18 (Data Conversion Statement of Work); • Include a draft future state data flow diagram; and • Specify the process and procedures for global Interface downtime and recovery strategy. Contractor will review the draft Interfaces Implementation Strategy Document with County. Contractor will incorporate County feedback and proposed changes into the Interfaces Implementation Strategy Document and submit a final version to County for Approval. Contractor will use the Interfaces Implementation Strategy Document to update the sub-Project Work Plan(s) for Interfaces with information regarding when each Interface will be developed and completed.	• The updated sub-Project Work Plan(s) for Interfaces incorporates, and is consistent with, the information set forth in the Approved Interfaces Implementation Strategy Document, and has been Approved by County. • The updated sub-Project Work Plan(s) includes any tasks and deliverables by third-party vendors to meet the Licensed Software requirements (including dependencies with third-party vendor agreements).

Task 3 Design Interfaces	
Task Description	
For each required Interface, Contractor and County will develop functional and technical Specifications.	
Personnel Requirements	

• Contractor Key Resources
  ○ Interface Architect; and
  ○ Contractor System Engineer.
• County Key Resources
  ○ County Interface SOW Lead	

Subtasks/Deliverables	
Subtask 3.1 Document Functional and Technical Specifications for Interfaces Contractor will coordinate all activities between the County Interface Workgroup and the Project activities associated with (a) the development and deployment of the applicable modules of the Licensed Software, and (b) Exhibit A.18 (Data Conversion Statement of Work), including: • Engaging the County Interfaces Workgroup in the System Review, Design Review, and	**Deliverable 3.1 Functional and Technical Specifications for Interfaces** • Interface Specifications Document for each Interface. • Updated to Interfaces Risk Analysis Document. **Acceptance Criteria:** • The Interfaces Specifications Document for each Interface incorporates, and is consistent

Task 3 Design Interfaces	
System Validation for each Module of the Licensed Software; • Engaging the County Interfaces Workgroup in the applicable activities of the County Data Conversion Workgroup; • Assisting County in determining which Interfaces are required for each Module or component of the Licensed Software (if any); • Documenting any Interface requirements between the Licensed Software and internal and external systems; • Identifying any dependencies between the development of each Interface and the development and deployment of the applicable Modules/components of the Licensed Software; and • Identifying requirements associated with migration of the applicable data. Contractor will draft functional and technical Specifications for each required Interface ("**Interface Specifications Document**") that, at a minimum, specifies the following: • Name and high level description of the County device/system with which an Interface is required, and a description of the purpose and function of the Interface; • Requirements of the Licensed Software either to receive or send required elements and values; including: o Elements and values required by County, the Contractor, and any third-party vendor; and o Detailed description of what the Interface can or cannot accommodate, the impact to the License Software, and alternatives where required. • Interface engine(s) that will be used to manage the Interface transactions; • List of transactions and data content for Interfaces required for each County system/device; • Specifications for mapping, aliasing and/or	with, County-provided input. • The Interfaces Specifications Document for each Interface addresses all elements described in subtask 3.1 (Document Functional and Technical Specifications for Interfaces). • The Interface Specifications Document for each Interface has been Approved by County. • The updates to the Risk Analysis Document address all elements described in subtask 3.1 (Document Functional and Technical Specifications for Interfaces) and have been Approved by County. • The Interface Specifications Document for each Interface that interacts with a third-party system includes information from the third-party vendor necessary for Contractor to build the Interface

Task 3 Design Interfaces	
transforming the data to conform to the applicable system and to the Licensed Software, including (a) which engine will be used for the transformation of the data, and (b) which data elements County wants to retain in the Clinical Data Repository via the Interface; • Processes and requirements for Interface management, including filtering, throttling, queuing, retention period, and resending/republishing of messages; • Performance requirements for each transaction, including real time vs. periodic, latency, etc.; • Established standard for the Interface transaction (e.g., HL7, ASTM, X12, DICOM, etc.) which will be used for the necessary Interface. If a standard cannot be met, Contractor will propose an alternative (including justification for using something other than an established standard); • Specifications of the data and transport mechanisms required for the Interface transaction; • Specifications of device / system operating requirements for the Interface; • Descriptions of the triggers from other work streams as identified in task 4.1 (Conduct Design Review Session) of Exhibits A.4 – A.18; • Specifications for monitoring the traffic through the Interface, and reporting requirements to County for unusual traffic; • Requirements for identification of exception types and exception processing of transactions; • Specifications for downtime and recovery strategy for each Interface; • Specifications for Interface connectivity including: o TCP/IP addresses; o Ports and firewall rules;	

Task 3 Design Interfaces	
○ Client engines; and ○ Security certifications/VPN. • System administrator account provisioning requirements for Interface access and control; • Bandwidth requirements and transaction volumes, jointly with County and Contractor Interface architect, County and Contractor Systems Engineer; • The role and required contributions of applicable third-party vendors, if any, for the Interface (both to build and maintain the Interface). If Contractor and County cannot agree on Contractor's proposed solution for any Interface that must be built to meet County's requirements, Contractor will expeditiously escalate the issue to the predefined governance process. Contractor will review the functional and technical Interface Specifications Document with County. Contractor will incorporate County feedback and proposed changes into the functional and technical Interface Specifications Document and submit a final version to County for Approval. Contractor will work with the applicable third-party vendors as required for Contractor to create the functional and technical Specifications for each required Interface. Contractor will update the Risk Analysis Document based on the functional and technical Specifications developed for the Interface, to identify any additional issues and barriers that interfere with achieving the objectives of the Interfaces work stream and propose options for mitigating the identified risks, including identifying: • Any Interfaces which Contractor cannot develop or has not been able to develop in the past; • Any third-party systems for which Contractor has experienced problems developing	

Task 3 Design Interfaces	
Interfaces in the past; • Any data types, fields, or segments that Contractor cannot support via an Interface; and • Interfaces for which a workaround may be required, and any limitations associated with the applicable workaround.	
Subtask 3.2 – Develop Interface Test Plan Contractor will develop and document an Interface Test Plan with input and participation from County that, at a minimum, includes: • The testing tools used to test each Interface; • All resources required to test each Interface; • County-specific Unit and System Test scripts for each Interface; • On-site training sessions on the Interfaces to County personnel to allow Unit and System Testing to commence; • Training on overall testing approach and specifically on Unit and System Testing; • Documentation of the appropriate tests which need to be conducted on the Interfaces; • Identification and documentation of the roles and responsibilities of Contractor resources, County Interfaces Workgroup members, third-party vendors, and SMEs who will play a role in Interface validation testing; • A test plan for Unit and System Testing of each Interface; • Samples of Unit Test scripts (including test script for reviewing historical data where applicable) for Interfaces; • Identification and documentation of relevant test scenarios for each Interface; • Identification and documentation of relevant test patient data, and regression test data; • A process for the development of Unit and System Test scripts and test data, including the assumed data for the starting point of the	**Deliverable 3.2 Interface Test Plan** • Interface Test Plan. **Acceptance Criteria:** • The Interface Test Plan incorporates, and is consistent with, County-provided input. • The Interface Test Plan addresses all elements described in subtask 3.3 (Develop Interface Test Plan). • The Interface Test Plan has been Approved by County.

Task 3 Design Interfaces	
unit test scripts; • Identification of any activities required by County team and third-party vendors for testing and validation of Interfaces and ensure that these activities have been assigned to the relevant team members/third-party vendors; • A process to coordinate the timing and scope of Interface testing with applicable testing related to other SOWs and work streams; and • A process to incorporate feedback and County Approved modifications recorded in the Interface Specifications Document. Contractor will review the Interfaces Test Plan with County. Contractor will incorporate County feedback and proposed changes into the functional and technical Interface Specifications Document and submit a final version to County for Approval.	

Task 4 Build and Test Interfaces
Task Description
The Contractor will be responsible for developing the County identified Interfaces between the Contractor's Licensed Software and County's systems and external systems.
Personnel Requirements

• Contractor Key Resources
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Interfaces Architect;
  ○ Contractor Systems Engineer;
  ○ Integration Architect;
  ○ Lab Solution Architect;
  ○ Radiology Solution Architect; and
  ○ Registration Solution Architect.
• County Key Resources
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Interfaces SOW Lead;
  ○ County Interfaces Workgroup;
  ○ Domain Workgroup Leads;
  ○ County Lab Lead;

Task 4 Build and Test Interfaces	
○ County Radiology Lead; ○ County Registration Lead; and ○ County Test Lead.	
Subtasks/Deliverables	
Subtask 4.1 Build and Test Interfaces Contractor will build or supply an Interface engine to manage the Interface transactions. At County's discretion, Contractor will either (a) build the complete Interface prior to testing or (b) build each Interface using the partial build approach outlined below. For Interfaces built using the partial build concept, Contractor will: • Iteratively build the Interface's functionality and content until the full build of the Interface content and functionality is complete; • Develop a Release Schedule for the Interface; • Regularly release new functionality in a structured and scheduled manner to the County Unit and System Test environment; • On an ongoing basis, provide the County SOW Lead with an updated Release Schedule as to the new content and functionality delivered in each release of the Interface; • Report weekly on progress toward complete build and alert County of any issues or risks; and • Notify County when each Interface has been fully configured to include all Specifications related to the Interface. As each Interface is completed, the County will test the Interface and identify defects and Omissions. Contractor will: • Provide ad hoc telephone, email, and in person support to the County testing teams; • Monitor progress of testing and provide County with advice to address issues arising such as inability to meet timelines, lack of quality or attention in testing, the need for	**Deliverable 4.1 Tested Interfaces** • Interface Release Schedule. • Interfaces built which conform to the functional and technical Interface Specifications Document. • Documented results with County input and participation of each completed and tested Interface. • List of resolved Defects, including date of completion, retest results, and County Approval for each Interface. • County-Approved completed Unit Testing and System Testing for each Interface. **Acceptance Criteria:** • County Approved Interface Release Schedule. • County Approved built and tested Interfaces. • Resolution of all outstanding defects defined as required for Acceptance of each Interface. • Interface build completion document provided by Contractor is Approved by County • Gateway criteria have either been achieved or exceptions documented and Approved by Project governance. • All defects and change requests that remain for each Interface, but are not essential to Integration Testing, but essential to system Go-Live, are identified on the issues list by mutual agreement, and documented severity levels identified.

Task 4 Build and Test Interfaces	
additional resources or test support, and management tools, etc.; • Provide a structured tool and format in MethodM Online for County to record and report defects and Omissions; • Enter those defects and Omissions which are not entered directly by County personnel but which are, instead, communicated by email to Contractor Test Lead for entering into MethodM Online; • Correct Defects and update Release Schedule to notify County of the build in which defect resolutions will be released; • Address identified Omissions as follows: o Document and verify the requirements to address the Omission in a consistent and structured format; o Address all Omissions which will have little or no impact on Project Schedule or risk and update the Release Schedule to notify County when the new content or functionality will be released; o Escalate all Omissions which will have impact on Project Schedule or risk for consideration by the governance process; o Contractor and County will jointly determine whether a requested change should be pursued at this stage in the Project, pursued as a change request after Go-Live, or should be rejected; o Address all Omissions which are approved by the governance body and update the Release Schedule to notify County when the new content or functionality will be released; and o Provide test scripts with County input and participation to validate release of new functionality which addresses County Approved Omissions. • Provide County with sample gateway criteria and assist County in adopting gateway criteria for moving from Unit and System Testing to Integration Testing; and	

Task 4 Build and Test Interfaces	

• Document County Approved gateway criteria.
For each Interface, Contractor will:
• Track progress on Deliverables and report progress as well as issues and risks in the weekly Project Status Reports;
• Update and maintain a Risk Matrix related to the completion of Interfaces Specifications and alert County of any risks to schedule;
• Provide build Documentation and descriptions for successful ongoing maintenance and support of Contractor provided Interfaces including:
  ○ Identification of all systems which utilize the Interface;
  ○ Functionality of the Interface, the hardware and software components, transactions involved, and security and integrity requirements; and
  ○ Interface requirements including data protocols, data formats, communications methods, and processing priorities.
• Configure, code, and test all applications, application extensions, and data acquisition/Interfaces in accordance with the functional and technical Interface Specifications Document;
• Execute the Interface Test Plan, including Unit Testing, and Integration Testing;
• Utilize test scripts to test each Interface;
• Test the Interfaces;
• Log issues and defects related to testing of Interfaces;
• Resolve issues and defects;
• Provide updates on status of defect resolution and implementation of County Approved change requests on weekly calls;
• Release defect resolutions and implemented change requests as part of the build release cycles;	

Task 4 Build and Test Interfaces	

• Support County in re-testing resolved defects deployed by Contractor;
• Jointly decide with County through the governance process when the Interface build is ready for moving to Integration Testing, based on:
  o Completeness of functionality and content; and
  o Severity of outstanding defects.
Contractor will coordinate Interface build and testing with activities set forth in Exhibit A.21 (EHR System Testing Statement of Work) and the deployment readiness assessment.
Contractor will notify County once each Interface build as documented in the Interfaces Specifications is complete.

Exhibit A.21 (EHR System Testing Statement of Work)

to the

Electronic Health Records System and Services Agreement

Table of Contents

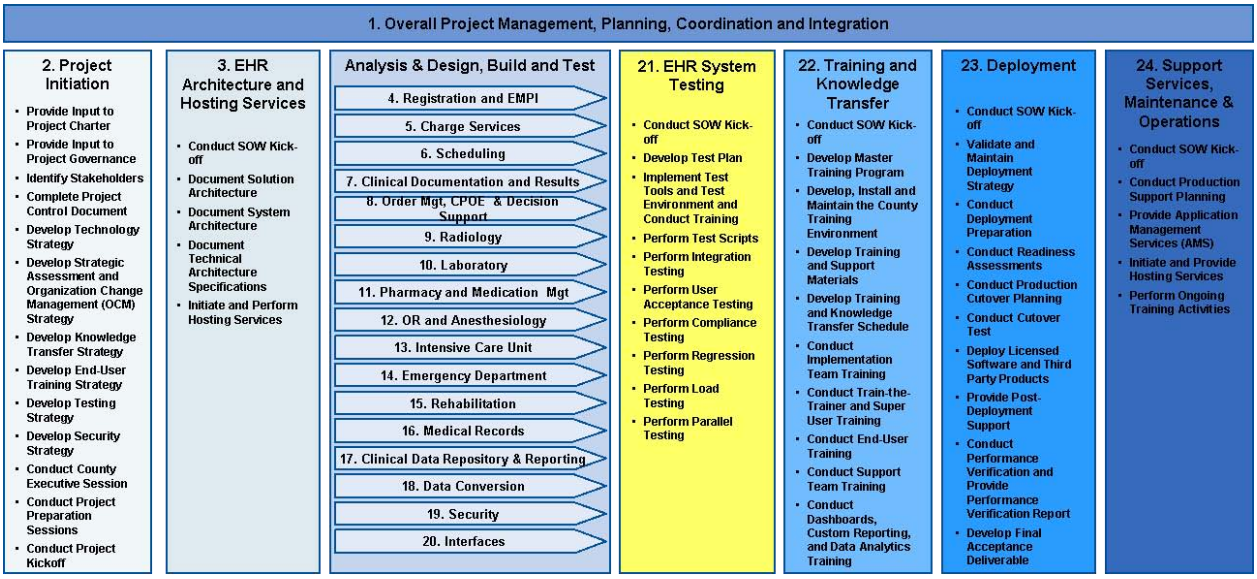
1. Introduction

This Exhibit A.21 (EHR System Testing Statement of Work) (sometimes referred to in this Exhibit as "**this SOW**") is an attachment and addition to the Electronic Health Records System and Services Agreement dated December 21, 2012 (hereinafter "**Agreement**") entered into by and between the County of Los Angeles ("**County**") and Cerner Corporation ("**Contractor**") and is incorporated into the Agreement by reference hereof. In the event of conflicting terms between the Agreement and this SOW, the terms of the Agreement shall prevail and nothing in this SOW shall modify or amend any provisions of the Agreement (including all components such as Statements of Work, Service Level Agreements, Exhibits, etc.) unless such modifications or amendments and the provisions of the Agreement which they modify or amend are specifically identified in this SOW and are Approved. This SOW includes any attachments hereto. Any capitalized terms not defined in this SOW shall have the same meanings as used in the Agreement.

All of the all the tasks, subtasks, Deliverables, goods, and other services required or requested by County below are included as part of the Services. This SOW aggregates tasks and subtasks that are a subset of both the broad definition of Services set forth in Exhibit G (Glossary) of the Agreement, and the specific Services associated with this SOW. Whether or not additional Services, not specifically included in any SOW, are needed to successfully deliver the EHR System as required under the Agreement, such Services are required to be delivered by Contractor and are included in the Contract Sum.

This SOW provides a description of the nature of the work required, but does not provide an exhaustive list of every task or subtask necessary for completion of this Exhibit A.21 (EHR System Testing Statement of Work). The completion of any phase in a period of time shorter or longer that that specified below shall not increase the Contract Sum.

This is Exhibit A.21 (EHR System Testing Statement of Work). It is one of a series of twenty-four (24) SOWs, which describe all of the key work elements and Deliverables of the Project. The twenty-four (24) SOWs are as follows:



2. Business Objectives Supported

This SOW will provide the framework which will be used in connection with testing for the EHR System.

3. SOW Summary

This SOW describes the EHR System Testing tasks, subtasks, and Deliverables required for successful completion of the Project. It describes the work plan and initiation session for this sub-project; development of a testing plan to ensure all components of the EHR System function when integrated; implementation of testing tools and a testing environment; development of test scripts and test scenarios; and performance of the integration testing, user acceptance testing, compliance testing, regression testing, load testing, and parallel testing.

3.1 SOW Team Structure and Resources

Contractor will provide a Project Staffing and Resource Management Plan. This plan will be utilized to establish fully loaded Contractor resource staffing commitments and to detail specific County resources to guide County on how best to allocate and deploy staff to this Project. Notwithstanding the foregoing, this is a fixed fee engagement and the Contractor resources identified in the Project Staffing and Resource Management Plan do not limit the resources that may be required by Contractor.

3.2 Dependencies with Other SOWs

Contractor acknowledges and accepts that this SOW is one in a series of SOWs, all of which are inter-related, and the performance of which is integral to the overall success of this Project. Deliverables are created in other SOWs, which provide the foundation for this SOW, including but not limited to:

- Exhibit A.1 (Overall Project Management, Planning, Coordination and Integration Statement of Work) provides the framework that will be used to manage the overall Project, including this SOW.
- Exhibit A.2 (Project Initiation Statement of Work) provides Deliverables which create the foundation for all SOWs, including this SOW.
- Exhibit A.3 (EHR Architecture and Hosting Services Statement of Work) provides the test environment that is required for this SOW.
- Solution requirements identified and configured in Exhibits A.4 through A.18 are comprehensively tested as part of this SOW.
- Solution requirements identified and configured in Exhibits A.18 through A.20 (are comprehensively tested as part of this SOW.

3.3 Critical Success Factors

A number of factors are deemed critical to overall Project success. The Parties acknowledge that the following factors are critical to the success of this Project:

Strong Project Management – Effectively managing the Services provided under the Agreement to the Project Schedule and results to be achieved and managing issues, risk, dependencies, and resources in a manner to achieve the Project Schedule and the results.

Open Communication and Governance Structure Clearly Defined – Good and open communication must be established early. Governance, committee structure, and committee members must be defined early. Meeting schedules must also be established for the length of the Project.

Executive Leadership Involvement – It is imperative that executive leadership from Contractor, DHS, and the DHS CIO be involved in the Project governance and meet at regular intervals to discuss the Project's progress and reach agreement on any key decisions that have been escalated to their level.

3.4 Schedule

The commencement Date for this Exhibit A.21 (EHR System Testing Statement of Work) will begin upon completion of Exhibit A.2 (Project Initiation) and will run through completion of the Project. The Services under this SOW are scheduled to be completed as indicated in the Project Work Plan, and upon Acceptance by the County Project Director of the Deliverables in this Exhibit A.21 (EHR System Testing Statement of Work).

Scheduled commencement dates, scheduled completion dates, and anticipated durations for Milestones, including Key Milestones, will be developed as part of Project Control Document. The durations for tasks and subtasks are in the detailed Project Work Plan.

4. General Responsibilities

For the Services described in this SOW:

(1) The Services will be performed by Contractor on-site at sites designated by County and at off-site location(s) as agreed in writing by the Parties in writing for specific activities.

(2) Contractor will provide designated full-time on-site key Project leadership members to deliver the Services during normal business hours, 8:00 AM to 5:00 PM, Pacific Time, Monday through Thursday (accommodating for travel on Mondays), except County and Contractor recognized holidays, unless otherwise agreed by the Parties in writing. Project leadership that is not on-site will also be available during normal business hours, 7:00 AM to 3:30 PM, Pacific Time, unless otherwise agreed by the Parties in writing.

(3) Contractor will utilize its MethodM implementation methodology, templates, and other tools as required to support the efficient and cost effective execution of the Services defined in this SOW to the extent MethodM is not inconsistent with this Agreement. This includes use of Contractor's knowledge capital databases and other repositories of Deliverables and intellectual capital from previous client experiences.

(4) Cerner will provide all Services in English.

4.1 Cerner Delivery Leader Responsibilities

Contractor will designate a Contractor Delivery Consultant for this SOW (referred to in this Exhibit as the "**Contractor EHR System Testing Delivery Consultant**" or "**Contractor Delivery Consultant**") to whom all County communications may be addressed and who has the authority to represent and commit Contractor in connection with all aspects of this SOW.

The Contractor Delivery Consultant's obligations include:

(1) Establish and maintain communications through the County SOW Lead and Project governance structure;

(2) Manage the delivery of Services and Service Interdependencies;

(3) Notify County of any Contractor focal point or contacts for specific activities or tasks;

(4) Manage and maintain the sub-Project Work Plan for this SOW which lists, as appropriate, the activities, tasks, assignments, Service interdependencies, Key Milestones and Deliverables, and schedule;

(5) Measure, track and evaluate progress against the Project Schedule;

(6) Work with the County SOW Lead to resolve deviations, if any, from the Project Schedule;

(7) Coordinate and manage the activities of Contractor Personnel;

(8) Report to the County SOW Lead problems and issues impacting Contractor's provision of the Services that require County's attention and resolution;

(9) Coordinate resolution of all Service issues including those raised by the County SOW Lead and, as necessary, escalate such issues within the Contractor organization;

(10) Administer the Project Control Document with the County SOW Lead;

(11) Conduct regularly scheduled Project Status Meetings and prepare weekly Status Reports for the Services defined in this SOW; and

(12) Assist in the preparation and conduct of monthly steering committee updates.

Contractor will perform these activities throughout the provision of the Services.

4.2 Specific County Tasks

4.2.1 County SOW Lead Responsibilities

The County will assign a lead for this SOW (referred to in this Exhibit as the "**County EHR System Testing SOW Lead**" or "**County SOW Lead**". The County SOW Lead will:

(1) Serve as the primary interface between the Contractor Delivery Consultant and County for the tasks and Deliverables set forth in this SOW;

(2) Review this SOW and the responsibilities of both County and Contractor with the Contractor Delivery Consultant;

(3) Coordinate, manage, and be responsible for the control of the activities of County personnel for this SOW;

(4) Communicate to the Contractor Delivery Consultant any changes that may materially affect Contractor's provision of the Services set forth in this SOW;

(5) Coordinate with Contractor Delivery Consultant on Contractor's efforts to resolve problems and issues related to the Services set forth in this SOW;

(6) Work with the Contractor Delivery Consultant to resolve deviations, if any, from the Project Work Plan related to this SOW;

(7) Coordinate resolution of issues raised by the Contractor Delivery Consultant pertaining to this SOW and, as necessary, escalate such issues within the County organization;

(8) Serve as the interface between Contractor's Project team and all County departments participating in activities for the Services set forth in this SOW;

(9) Notify Contractor of any County focal point or contacts for specific activities or tasks related to this SOW;

(10) Ensure that tasks related to this SOW assigned to personnel within the County organization will be completed according to the timetable in the Project Schedule;

(11) Participate in selected Project status meetings with Contractor's Project team members and schedule and coordinate attendance and participation of County personnel for interviews, meetings and work sessions related to the completion of this SOW.

County may change the County SOW Lead by providing notification to the Contractor Delivery Consultant with an introduction and handoff meeting to establish plans for a smooth transition.

4.2.2 Other County Responsibilities

County agrees to comply with its responsibilities as described in this SOW. Such obligations are to be performed at no charge to Contractor.

County will:

(1) Provide County standard and available office space, basic office furniture, and access to the Internet supporting VPN for Contractor Personnel while working at County's facilities;

(2) Locate the Contractor Personnel in an area near County subject matter experts and technical personnel;

(3) Provide necessary security badges and clearances for Contractor Personnel working at County's facilities; and

(4) Make available staff with appropriate skills and experience to deliver County tasks as specifically set forth in this SOW.

5. Services and Deliverables

The Services and Deliverables to be provided under this SOW include:

Task/Subtask Name	Deliverables
Task 1 Conduct SOW Kick-off	
Subtask 1.1 Develop Sub-Project Work Plan for EHR System Testing	Deliverable 1.1 Sub-Project Work Plan for EHR System Testing
Subtask 1.2 Conduct Initiation Session for EHR System Testing Workgroup	Deliverable 1.2 EHR System Testing Initiation Session
Task 2 Develop Test Plan	
Subtask 2.1 Develop Test Plan	Deliverable 2.1 Test Plan
Task 3 Implement Test Tools and Test Environment and Conduct Training	
Subtask 3.1 Implement Test Tools and Test Environment, and Conduct Training	Deliverable 3.1 Test Tools, Test Environment Implemented, and Training
Task 4 Develop Test Scripts	
Subtask 4.1 Develop Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	Deliverable 6.1 Test Scripts, Test Scenarios, Test Cycles, and Common Test Data

Task/Subtask Name	Deliverables
Task 5 Perform Integration Testing	
Subtask 5.1 Identify Integration Test Scripts, Test Scenarios, Test Cycles and Common Test Data	Deliverable 5.1 Integration Test Scripts, Test Scenarios, Test Cycles and Common Test Data
Subtask 5.2 Perform Integration Testing	Deliverable 5.2 Integration Testing
Task 6 Perform User Acceptance Testing	
Subtask 6.1 Identify User Acceptance Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	Deliverable 6.1 User Acceptance Test Scripts, Test Scenarios, Test Cycles, and Common Test Data
Subtask 6.2 Perform User Acceptance Testing	Deliverable 6.2 User Acceptance Testing
Task 7 Perform Compliance Testing	
Subtask 7.1 Perform Compliance Testing	Deliverable 7.1 Compliance Review
Task 8 Perform Regression Testing	
Subtask 8.1 Identify Regression Test Scripts, Test Scenarios, Test Cycles and, Common Test Data	Deliverable 8.1 Regression Test Scripts, Test Scenarios, Test Cycles, and Common Test Data
Subtask 8.2 Support Regression Testing	Deliverable 8.2 Regression Testing
Task 9 Perform Load Testing	
Subtask 9.1 Identify Load Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	Deliverable 9.1 Load Test Scripts, Test Scenarios, Test Cycles, and Common Test Data
Subtask 9.2 Support Load Testing	Deliverable 9.2 Load Testing
Task 10 Perform Parallel Testing	
Subtask 10.1 Identify Parallel Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	Deliverable 10.1 Parallel Test Scripts, Test Scenarios, Test Cycles, and Common Test Data
Subtask 10.2 Support Parallel Testing	Deliverable 10.2 Parallel Testing (Key Deliverable)

5.1 Deliverable Development and Approval Process

This section specifies a repeating process for developing Deliverables for this SOW. Each Deliverable will be developed in accordance with the following Contractor's obligations, which will be sub-tasks to each individual task:

(1) All Deliverables must be developed in the form and format agreed to by the County and Contractor using a Deliverables Expectations Document (also referred to as a "**DED**") Approved by County. No work will be performed on any Deliverable associated with a payment Milestone until the DED has been Approved by County. As each Project Deliverable is submitted, Contractor must include a copy of the Project DED as the cover sheet. A template to be used for each DED during this Project can be found in Section 5.3 (Project Deliverable Expectations Document Template) of this SOW.

(2) Develop agendas, and coordinate scheduling with County for all necessary events (e.g., workshops, meetings) for the production of the Deliverable.

(3) Facilitate events (e.g., workshops, meetings) as required for the development of each Deliverable.

(4) Record and analyze the input received from all events (e.g., workshops, meetings) and, distribute results or minutes for review to event participants.

(5) Prepare drafts of the Deliverable for County for review.

(6) Provide a structured process for County to provide feedback on drafts, including events, as appropriate.

(7) Compile and analyze County feedback to the draft Deliverable and prepare a revised Deliverable.

(8) Distribute the revised Deliverable to County for review; obtain and analyze County feedback as above, and repeat if necessary.

(9) Complete a final version of the Deliverable including, prior to distribution for Approval by County, validation by Contractor that the Deliverable conforms to the Specifications and meets the Acceptance Criteria.

After receipt of a Deliverable from Contractor, the County SOW Lead or designee will notify the Contractor Delivery Consultant and assigned Project team resources in writing as to any specific changes requested (together with a reasonably detailed explanation of the reasons why the Deliverable should be modified) in as expeditious a time frame as possible given the nature of the Deliverable and the schedule. Unless a change is disputed, the Contractor shall make the changes described in a timely manner so as to not adversely impact the schedule under the Project Work Plan. Upon completion of such changes, the Deliverable will be provided to County with a request for Acceptance. County will notify Contractor of its Acceptance or rejection in a time that is practical and reasonable given the nature, criticality, and complexity associated with the Acceptance Testing/review.

5.2 Tasks

Contractor will be responsible for performing the following tasks as to the Services to be provided under this SOW.

Task 1 Conduct SOW Kick-off
Task Description
The team members from Contractor, County, and external stakeholders will be introduced and their specific roles will be described. EHR System Testing specific training on the Licensed Software will be provided for the County personnel working on this SOW (referred to in this Exhibit as the "**County EHR System Testing Workgroup**" or "**County** Workgroup and the County EHR System Testing Workgroup will be introduced to various Contractor tools, methodologies and Best Practices that will be used throughout this SOW.
Personnel Requirements
• Contractor Key Employees o Contractor Project Director; o Contractor Project Manager; o Contractor Integration Architect;

Task 1 Conduct SOW Kick-off

- Contractor Clinical Strategist;
- Contractor Solution Architects;
- Contractor Delivery Consultants;
- Contractor Interface Architect; and
- Contractor Quality Center Architect.

- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County SOW Leads;
  - County Interface Manager;
  - County Third-Party Representatives (Quadramed Affinity Financials, Fuji PACS etc.); and
  - Testing Coordinator.

Subtasks/Deliverables

Subtask 1.1 Develop Sub-Project Work Plan for EHR System Testing

As part of the Project Initiation, Contractor will develop an overall Project Work Plan. The Project Work Plan will include an EHR System Testing-specific section. The overall Project Work Plan will include a Project Schedule, and will be developed in a MethodM Online compatible version of Microsoft Project, which shall include:

- Deliverables, tasks, and subtasks;
- Associated dependencies among Deliverables, tasks, and subtasks both within this SOW and across all related SOWs and work streams;
- Resources (effort hours and roles) required for each Deliverable, task, and subtask;
- Start date and date of completion for each Deliverable, task, and subtask;
- County review period for each Deliverable;
- Acceptance Criteria for each Deliverable; and
- Milestones and Key Milestones.

Contractor will adapt the EHR System Testing-specific section of the Project Work Plan to create a specific sub-Project Work Plan which includes timelines, activities, Deliverables, and Milestones specific to this Exhibit A.21 (EHR System Testing Statement of Work) and subject to County Approval.

Deliverable 1.1 Sub-Project Work Plan for EHR System Testing

- EHR System Testing-specific section of Project Work Plan.

Acceptance Criteria:

- The EHR System Testing-specific section of the Project Work Plan incorporates, and is consistent with, County-provided input.
- The EHR System Testing-specific section of the Project Work Plan addresses all elements described in subtask 1.1 (Develop Sub-Project Work Plan for EHR System Testing).
- The EHR System Testing-specific section of the Project Work Plan has been Approved by County.
- Timelines detailed in the EHR System Testing-specific section of the Project Work Plan and sub-Project Work Plan are realistically achievable with reasonable effort as determined by County.
- Elements of the EHR System Testing-specific section of the Project Work Plan are consistent with tasks, subtasks, and Deliverables as outlined in this and other SOWs.
- Plan for interacting with other SOW teams to ensure training is considered in those SOWs and relevant materials are developed.

Task 1 Conduct SOW Kick-off	
	• Confirmed availability of Contractor resources required to implement the EHR System Testing sub-Project Work Plan.
Subtask 1.2 Conduct Initiation Session for EHR System Testing Workgroup Contractor will conduct an initiation session to provide and introduction to the County Workgroup to the Services covered by this Exhibit A.21 (EHR System Testing Statement of Work), including the timelines and nature of the work effort that will be required to implement this SOW. Before the Initiation Session, Contractor will: • Work with County to identify all Contractor and County resources required to complete the tasks outlined in this SOW. • Provide County with a roster of EHR System Testing Initiation Session participants. • Conduct a Project Management Workshop. • Develop an agenda/schedule for the EHR System Testing Initiation Session. Contractor will conduct the EHR System Testing Initiation Session as follows: • Review and document Licensed Software and Third-Party-Products, Domains, Venues and Locations for which EHR System Testing must be completed. • Provide background and overview of EHR System Testing, including challenges and success criteria. • Review tasks, Deliverables and Milestones for the development of EHR System Testing. • Illustrate and document dependencies between this SOW and any other SOWs and Project work streams, including at a minimum: o Requirements gathering and functional/technical specifications during System Review, Design Review and System Validation; and o Go-Live readiness assessment. • Review and develop plans to address	**Deliverable 1.2 EHR System Testing Initiation Session** • EHR System Testing Initiation Session materials for County review one (1) week prior to Initiation Session. • List of Licensed Software Modules and Third-Party Products for which testing must be conducted. • Report documenting EHR System Testing SOW dependencies • List of County Workgroup members who attended the EHR System Testing Initiation Session. • List of assignments and roles associated with those assignments for members of County Workgroup. • Initiation Session Event Summary Report. • Agenda/schedule for EHR System Testing Initiation Session. • Attendance sheet/roster of participants for EHR System Testing Initiation Session. • EHR System Testing Initiation Session presentation materials. **Acceptance Criteria:** • The Initiation Session Event Summary Report from Contractor documenting that the EHR System Testing Initiation Session (a) has been completed and (b) includes accurate documentation of the content, outcomes and next steps agreed upon at the EHR System Testing Initiation Session Event. • The EHR System Testing Initiation Session Event Summary Report has been Approved by County. • Report documenting EHR System Testing SOW dependencies addresses all elements

Task 1 Conduct SOW Kick-off	
dependencies of training and knowledge transfer with other SOWs and Project work streams. After the Initiation Session, Contractor will prepare an Initiation Session Event Summary Report for review and Approval by County.	described in subtask 1.2 (Conduct Initiation Session for EHR System Testing Workgroup). • Report documenting EHR System Testing SOW dependencies has been Approved by County.

Task 2 Develop Test Plan	
Task Description	
Contractor will develop a comprehensive Test Plan with input and participation from County covering all testing necessary to confirm that the Licensed Software, Third-Party Products, Modules and all components of the EHR System, including Hardware, Interfaces and peripheral devices, function in an integrated fashion in accordance with the Specifications and County Business Objectives. The objectives and coverage of the Test Plan will be consistent with the testing strategy developed for subtask 9.1 (Develop Testing Strategy) of Exhibit A.2 (Project Initiation) and the work detailed in this SOW and the Deployment Strategy in Exhibit A.23 (Deployment).	
Personnel Requirements	
• Contractor Key Employees o Contractor Project Director; o Contractor Project Manager; o Contractor Integration Architect; o Contractor Clinical Strategist; o Contractor Solution Architects; o Contractor Delivery Consultants; o Contractor Interface Architect; and o Contractor Quality Center Architect. • County Key Employees o County Project Director; o County Project Manager; o County SOW Leads; o County Interface Manager; o County Third-Party Representatives (Quadramed Affinity Financials, Fuji PACS etc.); and o Testing Coordinator.	
Subtasks/Deliverables	
Subtask 2.1 Develop Test Plan Contractor will develop a Test Plan document with input and participation from County that identifies all major aspects and phases of testing throughout the Project, including a test plan for each Cluster deployment that specifically addresses testing at each facility where applicable. The Test Plan will detail Contractor's approach to performing and/or	**Deliverable 2.1 Test Plan** • Draft Test Plan. • Final Test Plan incorporating County feedback. • Updated Test Plan.

Task 2 Develop Test Plan	
supporting the following testing phases: • Unit Testing (completed as part of Exhibits A.4 – A.17); • System Testing (completed as part of Exhibits A.4 – A.17); • Interface Testing in accordance with subtask 4.1 (Build and Test Interfaces) of Exhibit A.20 (Interface); • Regression Testing; • Integration Testing; • User Acceptance Testing; • Failover testing in accordance with the processes and timelines developed in task 5 (Initiate and Perform Remote Hosting Services) of Exhibit A.3 (EHR Architecture and Hosting Services) and task 4 (Conduct Solution Readiness Assessment) of Exhibit A.23 (Deployment); • Load Testing (i.e., stress and volume testing); • Compliance Testing; and • Parallel Testing. The Test Plan will include a test approach for each testing phase and facility. The test approach will include: • Test overview including objectives and coverage; • Testing control; • Resourcing, including staffing (i.e., test user roles), infrastructure and communication protocols; • Contractor and third-party vendor roles and responsibilities; • How County will participate in the testing; • Test schedule with key dates and Deliverables; • Identification of recommended prerequisites to beginning each testing phase; • Testing sequence and interdependencies between testing phases; • Testing metrics (expected outcomes, including reports);	**Acceptance Criteria:** • Final Test Plan incorporates, and is consistent with, County feedback. • Final Test Plan addresses all elements required in subtask 2.1 (Develop Test Plan). • Final Test Plan is delivered in accordance with the Agreement, Specifications and agreed delivery date, and has been Approved by County.

Task 2 Develop Test Plan	

• Configuration management;
• Change control;
• Test environments;
• Tester training;
• Exit criteria;
• Required artifacts that cover all Domains, Venues and Locations, including:
  o Test scenarios (narrative);
  o Test scripts (step-by-step); and
  o Test data.
• Requirements for resetting test environment and test data to County-defined save point;
• Defect severity definitions;
• Communication procedures for defect identification, resolution, retesting and escalation;
• Test tools, both Contractor provided and County owned;
• Test cycle control sheets; and
• Assumptions, issues and risks.
Contractor will develop a draft Test Plan and submit it to County for review and feedback.
Contractor will review and incorporate County feedback and proposed changes into the Test Plan and submit a final versions County for Approval.
Throughout the Project, Contractor will review and update the Test Plan as required by County to increase testing effectiveness and efficiency and resolve testing problems, but at a minimum Contractor will review and update the Test Plan prior to each Cluster deployment.
Contractor will submit Test Plan updates to County for review and Approval.	

Task 3 Implement Test Tools and Test Environment and Conduct Training
Task Description
Contractor will implement the testing tools and required environments to conduct testing in accordance with the Test Plan developed in subtask 2.1 (Develop Test Plan).

Task 3 Implement Test Tools and Test Environment and Conduct Training

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Integration Architect;
  - Contractor Solution Architect;
  - Contractor EHR System Testing Delivery Consultant;
  - Contractor Clinical Strategist;
  - Contractor Interface Architect;
  - Contractor Quality Center Architect;
  - Contractor Technical Engagement Leader;
  - Contractor Hosting Services Technical Engagement Leader; and
  - Contractor Hosting Services System Engineer.
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County SOW Leads;
  - County Interface Manager;
  - County Third-Party Representatives (Quadramed Affinity Financials, Fuji PACS etc.);
  - County Testing Coordinator;
  - County Technical Manager; and
  - County SMEs.

Subtasks/Deliverables

Subtask 3.1 Implement Test Tools and Test Environments and Conduct Training	**Deliverable 3.1 Test Tools, Test Environments and Training**
For each type of testing, Contractor will: • Identify testing tools to be used; • Identify test environments; • Identify and coordinate data transmission between County system and third-party system vendor Interfaces; • In instances where no third-party system vendor test data can be obtained, assist County in developing proxy data for testing Interfaces; • Provision test users in test environment; • Implement and provide County with access to the Contractor-owned test tools; • Implement and provide County with access to the test environments in accordance with the test plan and tasks and deliverables in Exhibit A.3 (EHR Architecture and Remote Hosting	• List of Contractor test tools. • List of additional recommended test tools. • Contractor validation that test tools and test environments have been implemented. • County access to test tools and test environments. • Documented County readiness for testing including staff readiness (training complete). **Acceptance Criteria:** • County Approved test tools and test environment.

Task 3 Implement Test Tools and Test Environment and Conduct Training	
Services); • Recommend testing tools for County in areas where Contractor does not own tools; • Assist County in selecting third-party system vendor test tools identified by County; and • Load bulk test data into test environment, where applicable. Contractor will train users on use of Contractor-owned test tools.	

Task 4 Develop Test Scripts
Task Description
Contractor will provide Services with County input and participation to develop test scripts, test scenarios, test cycles, common test data, associated test conditions, and expected results for all testing phases. Test scripts and test scenarios will take into account departmental workflows, County provided policies and procedures, County provided actual patient scenarios and cross-departmental processes and activities across all Domains, Venues, and Locations.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Integration Architect;
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Quality Center Delivery Consultants;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect; and
  ○ Contractor SOW's Delivery Consultants.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Testing Coordinator;
  ○ County SOW Leads; and
  ○ County SMEs.

Subtasks/Deliverables

Subtask 4.1 Develop Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	Deliverable 4.1 Test Scripts, Test Scenarios, Test Cycles, and Common Test Data
Contractor will provide Services with County input and participation to develop test scripts, test scenarios, test cycles, common test data, associated test conditions, and expected results. Test scripts and test scenarios will take into account departmental workflows, County provided	• Sample test scripts • Review and validation of final test scripts. • Final test cycle control sheets. • Final issue tracking form. • Test script catalog.

Task 4 Develop Test Scripts	
policies and procedures, County provided actual patient scenarios, and cross-departmental processes, and activities across all Domains, Venues and Locations. Contractor will: • Provide County with samples of test scripts and test scenarios; • Work with County to identify and document relevant test scenarios; • Work with County to identify and document relevant patient data; • Document test scenarios and test patient data requirements; • Support County in developing detailed test scripts built upon Contractor provided samples; • Review and test County adapted test scripts and recommend revisions to ensure scripts are comprehensive and effective to test all Licensed Software and Third-Party Product content and functionality; • Support County in the development of common test data and specify volume of data required to perform thorough testing; • Monitor progress on test script and common test data development; • Validate completeness of test scripts and common test data, to ensure that test scripts and test scenarios take into account departmental workflows, County provided policies and procedures, County provided actual patient scenarios, and cross-departmental processes and activities across all Domains, Venues and Locations; • Notify County of any risks to schedule or quality and completeness of the test scripts and common test data being developed; • Identify systemic issues related to completion of test scripts or test data (e.g., time management, complexity, data quality, training issues) and provide County with recommendation for addressing them (e.g.,	**Acceptance Criteria:** • Test scripts and test scenarios completed. • County verification that common test data required to complete all test scripts has been identified and developed. • County Approved test cycle control sheets. • County Approved test script catalog.

Task 4 Develop Test Scripts	
through additional training, augmenting resources). • Provide additional resources to the address issues and recommendations above (the resources are to be as determined necessary to support the Project through the governance process defined in Exhibit A.2 (Project Initiation). • Provide recommendations on grouping test scenarios and conditions into test cycles to maximize efficient test execution; • Develop issue tracking form; • Develop test cycle control sheet detailing when and by whom test cycles will be executed and submit it to County for feedback; • Archive test scripts after all testing phases are completed; • Provide support by responding to all County ad hoc calls and emails in a timely manner to address questions as they arise; and • Deliver additional training on test scripts and common test data development to County personnel as needed. Contractor will develop a catalog of test scripts for the purpose of regression testing which documents interdependencies, including for each test script: • Test description; • Applicable Modules; and • Applicable Domains, Venues and Locations. Contractor will develop a draft test script catalog and submit it to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the test script catalog and submit a final version to County for Approval. Contractor will maintain and, if applicable, continuously update the test script catalog with all test scripts that are developed for task 5 (Perform Integration Testing), task 6 (User Acceptance Testing), task 8 (Perform Regression Testing), task 9 (Perform Load Testing), task 10 (Perform Parallel	

Task 4 Develop Test Scripts	
Testing), or other testing required by this or any other SOW.	

Task 5 Perform Integration Testing
Task Description
Contractor will monitor the progress, and validate completion, of all prerequisites to Integration Testing identified in the Test Plan. Contractor will assist County in performing Integration Testing in accordance with the Test Plan developed in subtask 2.1 (Develop Test Plan) to ensure that information is properly shared across the Licensed Software, Third-Party Products, County systems and third-party vendor systems. The Integration Testing will include peripheral device testing to ensure that all peripheral devices, medical devices, portable devices and other County hardware deliver the appropriate functionality in accordance with the Specifications.
Personnel Requirements

• Contractor Key Employees
  ○ Contractor Project Director;
  ○ Contractor Project Manager;
  ○ Contractor Clinical Strategist;
  ○ Contractor Integration Architect;
  ○ Contractor Solution Delivery Consultants;
  ○ Contractor Interface Architect;
  ○ Contractor Hosting Services Technical Engagement Leader;
  ○ Contractor Hosting Services System Engineer; and
  ○ Contractor Technical Engagement Leader.
• County Key Employees
  ○ County Project Director;
  ○ County Project Manager;
  ○ County Interface Manager;
  ○ County Desktop Technicians;
  ○ County SOW Leads;
  ○ County SMEs;
  ○ Third-Party System County Analyst and, if needed, Third-Party System Vendor Analyst;
  ○ County Network Technician; and
  ○ County Testing Coordinator.

Subtasks/Deliverables

Subtask 5.1 Identify Integration Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	**Deliverable 5.1 Integration Test Scripts, Test Scenarios, Test Cycles, and Common Test Data**
Contractor will: • Assist County in identifying appropriate Integration Test scripts from the test scripts developed in subtask 4.1 (Develop Test Scripts, Test Scenarios, Test Cycles, and Common Test Data) and developing any further test scripts	• Integration Test scripts. • Test cycle control sheet. • Common test data loaded into test environment database.

Task 5 Perform Integration Testing	
that may be required to complete Integration Testing. • Assess selected test scripts for completeness and accuracy related to Integration Testing and document gaps; • Identify additional test scenarios, test scripts and test data to address gaps; • Assist County in developing additional tests scripts for Integration Testing; • Develop draft test cycle control sheet detailing when and by whom test cycles will be executed and submit it to County for feedback; • Provide support by responding to all County ad hoc calls and emails in a timely manner to address questions as they arise; and • Deliver additional training on Integration Test script and test data development to County personnel as needed.	**Acceptance Criteria:** • County Approved test scripts and test scenarios. • County verification that common test data required to complete all test scripts has been identified, developed and loaded. • County Approved test cycle control sheets.
Subtask 5.2 Perform Integration Testing Contractor will assist County in conducting implementation testing, record progress, and validate completion, of all prerequisites to Integration Testing identified in the Test Plan. Contractor will: • Monitor the progress of all prerequisites to Integration Testing identified in the Test Plan; • Notify County of any issues, problems or incidents affecting the completion of any prerequisites to Integration Testing in accordance with the timeline identified in the Test Plan; • Validate the completion of all Integration Testing prerequisites identified in the Test Plan; and • Notify County when all prerequisites to Integration Testing identified in the Test Plan have been completed. Contractor will perform Integration Testing in accordance with the Test Plan and assist County in performing Integration Testing activities. Contractor will: • Use the test scripts selected and developed in	**Deliverable 5.2 Completed Integration Testing** • Integration Testing prerequisites identified in the Test Plan complete. • Contractor internal integration testing complete. • Integration Testing complete. • Test documentation including complete Error and defect log with documented resolution. **Acceptance Criteria:** • Contractor validated completion of all prerequisites to Integration Testing identified in the Test Plan. • Contractor validated completion of Integration Testing. • County Approved test documentation.

Task 5 Perform Integration Testing	
subtask 5.1 (Identify Integration Test Scripts, Test Scenarios, Test Cycles, and Common Test Data) to conduct Contractor internal Integration Testing prior to County's Integration Testing; • Provide on-site support during County Integration Testing activities in accordance with Test Plan and test scripts; • Load and configure Licensed Software and Third-Party Products and system reference tables; • County will load and configure physical adapters (if any) for all peripheral devices, medical devices, portable devices and other County hardware; • Review County log of Errors and defects; • Resolve all Errors and defects impacting Go-Live and support County personnel in trouble shooting issues; • Assist County with re-testing defect fixes; • Regularly communicate with County regarding status and schedule of Integration Testing; and • Document test results. Contractor will monitor status and schedule of integration testing and support re-testing resolved defects. Contractor will conduct daily wrap up sessions that include: • Integration Testing progress update; • Review of open issues; and • Strategy and schedule for resolution of defects.	

Task 6 Perform User Acceptance Testing
Task Description
Contractor will provide Services in connection with additional User Acceptance Testing activities in accordance with the Test Plan developed in subtask 2.1 (Develop Test Plan) to ensure that the Licensed Software and Third-Party Products function in accordance with the Specifications and support County's Business Objectives as set forth in Recital D of the Agreement and in Exhibit H (EHR Program Strategy) of the Agreement.

Task 6 Perform User Acceptance Testing

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Integration Architect;
  - Contractor Solution Delivery Consultants;
  - Contractor Interface Architect;
  - Contractor Hosting Services Technical Engagement Leader;
  - Contractor Hosting Services System Engineer; and
  - Contractor Technical Engagement Leader.
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Interface Manager;
  - County Desktop Technicians;
  - County SOW Leads;
  - County SMEs;
  - Third-Party System County Analyst and, if needed, Third-Party System Vendor Analyst;
  - County Network Technician;
  - County Testing Coordinator; and
  - Super Users, as determined by County.

Subtasks/Deliverables

Subtask 6.1 Identify User Acceptance Test Scripts, Test Scenarios, Test Cycles, and Common Test Data	**Deliverable 6.1 User Acceptance Test Scripts, Test Scenarios, Test Cycles, and Common Test Data**
Contractor will: • Assist County in identifying appropriate User acceptance test scripts from the test scripts developed in subtask 4.1 (Develop Test Scripts, Test Scenarios, Test Cycles, and Common Test Data) and, if required, developing any further test scripts that may be required to complete User Acceptance Testing; • Assess selected test scripts for completeness and accuracy related to User Acceptance Testing and document gaps; • Identify additional test scenarios, test scripts and test data to address gaps; • Assist County in developing additional tests scripts for User Acceptance Testing; • Develop draft test cycle control sheet detailing when and by whom test cycles will be	• User Acceptance Test scripts. • Test cycle control sheet. • Common test data loaded into test environment database. **Acceptance Criteria:** • County Approved test scripts and test scenarios. • County verification that common test data required to complete all test scripts has been identified, developed and loaded. • County Approved test cycle control sheets.

Task 6 Perform User Acceptance Testing	
executed and submit it to County for feedback; • Provide support by responding to all County ad hoc calls and emails in a timely manner to address questions as they arise; and • Deliver additional training on User Acceptance Test script and common test data development to County personnel as needed.	
Subtask 6.2 Perform User Acceptance Testing Contractor will provide Services to assist County in performing User Acceptance Testing activities. Contractor Services include: • Use the test scripts selected and developed in subtask 6.1 (Identify User Acceptance Test Scripts, Test Scenarios, Test Cycles and Common Test Data) to conduct Contractor internal User Acceptance Testing prior to County's User Acceptance Testing; • Provide on-site support during County with User Acceptance Testing activities in accordance with test plan and test scripts; • Review County log of Errors and defects; • Resolve all Errors and defects and support County personnel in trouble shooting issues, as applicable; • Assist County with re-testing defect fixes; • Regularly communicate with County regarding status and schedule of User Acceptance Testing; and • Document test results. Contractor will monitor status and schedule of User Acceptance Testing and support re-testing resolved defects. Contractor will conduct daily wrap up sessions that include: o User Acceptance Testing progress update; o Review of open issues; and o Strategy and schedule for resolution of defects.	**Deliverable 6.2 User Acceptance Testing** • Contractor internal User Acceptance Testing complete. • User Acceptance Testing complete. • Test documentation including complete Error and defect log with documented resolution. **Acceptance Criteria:** • Contractor validated completion of User Acceptance Testing. • County Approved test documentation.

Task 7 Perform Compliance Testing

Task Description

Contractor will conduct Compliance Testing throughout the term of the Agreement in accordance with the Test Plan developed in subtask 2.1 (Develop Test Plan) to ensure the Licensed Software, Third-Party Products and other EHR System components comply with legal and regulatory requirements in accordance with the Agreement. County will participate with Contractor in completing the compliance testing.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Clinical Strategist;
  - Contractor Integration Architect;
  - Contractor Solution Delivery Consultants;
  - Meaningful Use Analysts;
  - Contractor Hosting Services Engagement Leader; and
  - Contractor Technical Engagement Leader.
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County SOW Leads;
  - County SMEs;
  - County EHR System Testing Coordinator; and
  - Compliance Department Representatives.

Subtasks/ Deliverables

Subtask 7.1 Perform Compliance Testing

Throughout the design, build and test process, Contractor will conduct Compliance Testing that includes an assessment of how Licensed Software, Third-Party Products and other EHR System components meet the Legal Requirements and other regulatory requirements identified in the Agreement, including:

- Federal mandated requirements (e.g., HIPAA/HITECH);
- County provided State, County and payor mandated requirements;
- Domain specific compliance and certification review (e.g., College of American Pathologists and American College of Radiologists);
- Meaningful Use requirements, including those set forth in Exhibit V (Meaningful Use);
- Contractor Hosting Services security policies;

Deliverable 7.1 Compliance Review

- Completed Compliance Testing.
- Draft compliance and certification review.
- Final compliance and certification review.
- Updated compliance and certification review.

Acceptance Criteria:

- EHR System compliance.
- County-Approved compliance and certification review.

Task 7 Perform Compliance Testing	
and • Information protection requirements specified in Section 20 of the Agreement and Exhibit K (Information Protection Requirements) to the Agreement. Based upon the outcome of the Compliance Testing, Contractor will develop a draft compliance and certification review which identifies compliance and certification gaps and provides remediation recommendations and submit it to County for review and feedback. Contractor will review and incorporate County feedback and proposed changes into the compliance and certification review and submit a final version to County for Approval. Contractor will monitor changes to the Federal regulatory environment and Contractor and County will conduct compliance and certification testing activities to ensure Licensed Software and Third-Party Products continued compliance with Legal Requirements and other Federal regulatory requirements identified in the Agreement and this SOW. Contractor will: • Conduct additional compliance and certification testing as necessary with County participation to address new regulatory developments, during implementation phase. • Modify test scripts as necessary to address new regulatory developments to test continued compliance; • Update compliance and certification review document as necessary to address new regulatory requirements • Address compliance and certification gaps identified in updated compliance and certification reviews.	

Task 8 Perform Regression Testing

Task Description

Contractor will support County Regression Testing activities in accordance with the Test Plan developed in subtask 2.1 (Develop Test Plan) to ensure that changes to the Licensed Software do not introduce defects.

Personnel Requirements

- Contractor Key Employees
  - Contractor Project Director;
  - Contractor Project Manager;
  - Contractor Clinical Strategist;
  - Contractor Integration Architect;
  - Contractor Solution Delivery Consultants;
  - Contractor Interface Architect;
  - Contractor Hosting Services Technical Engagement Leader;
  - Contractor Hosting Services System Engineer;
  - Contractor Technical Engagement Leader;
  - Contractor AMS Project Manager; and
  - Contractor AMS Delivery Consultants.
- County Key Employees
  - County Project Director;
  - County Project Manager;
  - County Interface Manager;
  - County Desktop Technicians;
  - County SOW Leads;
  - County SMEs;
  - Third-Party System County Analyst and, if needed, Third-Party System Vendor Analyst;
  - County Network Technician;
  - County Testing Coordinator; and
  - County Super Users, as determined by County.

Subtasks/Deliverables

Subtask 8.1 Select Regression Test Scripts, Test Scenarios, Test Cycles, and Common Test Data Contractor will perform and assist County in performing Regression Testing activities at a minimum when: • New domains are created; • Existing domains are refreshed; • Code is loaded into a domain; • A configuration change occurs; • Hardware and operating system changes occur; and • Data conversion occurs.	**Deliverable 8.1 Regression Test Scripts, Test Scenarios, Test Cycles, and Common Test Data** • Regression Test scripts. • Test cycle control sheet. • Common test data loaded into test environment database. **Acceptance Criteria:** • County Approved test scripts and test scenarios. • County verification that common test data required to complete all test scripts has

Task 8 Perform Regression Testing	
Contractor will: • Assist County in identifying appropriate regression test scripts from the test scripts developed in subtask 4.1 (Develop Test Scripts, Test Scenarios, Test Cycles and Common Test Data) and subtask 5.1 (Identify Integration Test Scripts, Test Scenarios, Test Cycles and Common Test Data) and in developing any further test scripts that may be required for Regression Testing; • Assess selected test scripts for completeness and accuracy related to Regression Testing and document gaps; • Identify additional test scenarios, test scripts and test data to address gaps; • Assist County in developing additional tests scripts for Regression Testing; • Develop draft test cycle control sheet detailing when and by whom test cycles will be executed and submit it to County for feedback; • Provide support by responding to all County ad hoc calls and emails in a timely manner to address questions as they arise; and • Deliver additional training on Regression Test script and common test data development to County personnel as needed.	been identified, developed, and loaded. • County Approved test cycle control sheets.
