

September 20, 2013

Mr. Santos H. Keimann,

Director Department of Harbors and Beaches Design Control Board

13483 Fiji Way, Trailer #3

Marina Del Rey, CA 90292

Attn: Planning

Dear Mr. Keimann,

Please accept this letter as a formal notice of our intent to change the restaurant brand name and to complete repairs and outdoor improvements to the parcel known as Shanghai Reds restaurant, Marina del Rey, California.

The Marina Del Rey Restaurant Corporation is proud to propose the name/brand change from "Shanghai Red's", to "Whiskey Red's". There are several proposed repairs and improvements that are part of the brand change.

1) Signage; the brand change will affect all existing signage at the location. Changes to the existing signage shall include the following scope of work: Fisherman's Village Parking Entrance Monument Sign will be re finished with a flat logo sign, with directional lettering, on both sides of the existing monument foundation; Shanghai/Whiskey Red's Main Valet Entrance Monument Sign will be re faced with a 'light-box' style sign face with the new restaurant logo. The 'light-box' sign will be a metal frame with fluorescent or LED light source, and a translucent plastic artwork face of the restaurant logo; The Promenade Two-Sided Hanging Blade Sign, will be re-painted, both sides, with the new logo. There is no proposed new signage, only changes to the existing locations. The new logo is included in this submittal. All signs will conform to the colors and artwork specified by the logo design. The sign contractor shall provide more detailed shop drawings of this installation. The sign contractor will comply with all permit requirements for the repainting of the existing signs.

2) Install a window wind screen along front edge of main patio. We will improve the outdoor seating patio with the addition of a new window wind screen along the front edge of the existing patio. The new window wind screen will be 60 inches high from the existing patio seating area floor level, and 72 inches high from the Promenade walkway floor level, and will be installed along the same location of the existing perimeter planter facing the promenade. The glass contractor will comply with all permit requirements for the installation of this window wind screen.

3) Install a lightweight overhead slider canopy to shade the sun on the smaller, middle patio. This installation is a manually operated sun-cloth material shade that will connect to slider cables, suspended above the patio area using the existing building architecture for framing and support. The slider canopy will be installed a minimum of 96 inches above the patio seating area floor level. The design plan for this shade canopy is part of this submittal.

4) Replace existing lighting with "market style" string lighting. Existing exterior lighting on all patio areas will be repaired and upgraded to feature commercial grade, "market style" string lighting. All lighting will use existing circuits and utilize existing architecture to anchor the strings overhead. Any new posts that are required in the installation shall be weather proof galvanized finished steel pipe, installed in a concrete base footing, as required by code. The electrical contractor will comply with all permit requirements for this electrical repair work.

We believe that the changes proposed, including the new brand for the restaurant, will give it a fresh, new look that will blend with the character and style of the Marina in general, but will help Whiskey Red's stand out from the crowd. This restaurant was the first established in the Marina and in all of it's years, it has undergone one brand change from Pieces of 8 to Shanghai Red's. It's time for a fresh new welcoming environment and a fresh new look.

Thank you very much for your review and consideration of the work we propose. We look forward to your approval of the same.

Best always,

Bill Tallichet

Regional Training Manager
