The women's recovery home is a separate gender-specific program allowing female clients a place to address the underlying issues specific to women in recovery. Here, the women exist as their own community of peers. The all-female environment provides a safe and distraction free environment. The clients then work on women's recovery issues: building self-esteem, learning how to be independent, and developing healthier relationships. Since some of the women have children - who are not staying with them but with their relatives - parenting classes are available so they can learn how to be better role models for their kids. However, other women enter the program with their children with them.

ALLIANCE FOR HOUSING AND HEALING dba SERRA PROJECT

825 Colorado Blvd, Ste 100 (Admin Office, mobile HCM's)
Los Angeles, CA 90041
www.serraproject.org

Main Line-----(323) 344-4888

The Serra Project offers three distinct housing programs to meet the needs of homeless adults and children living with HIV/AIDS in Los Angeles County.

- For those in need of a high level of care, we offer assisted living at four [Group Homes](#) licensed as Residential Care Facilities for the Chronically Ill

The house offers care for homeless persons struggling with symptomatic HIV and AIDS with four group homes licensed as Residential Care Facilities for the Chronically Ill (RCFCI's)

- For those able to live outside a group setting, we offer permanent supportive housing for clients and their families in individual rental units through Community Housing Options at Independent Supported Sites ([CHOISS](#)) -
- CHOISS is designed to allow destitute individuals dealing with symptomatic HIV/AIDS and a verified second diagnosis—such as mental illness, substance abuse or physical disability—to live on their own, either alone or with family members, rather than in a group setting or, worse, on the street.
- For those in need of housing information, referrals, placement and assistance with filling out applications, we offer [Housing Case Management](#)

The program links clients with on-staff Housing Case Managers, who work proactively with the client to formulate housing plans, build resources, access appropriate housing, navigate the search process, apply for housing assistance and make the actual move into housing. A significant issue is the need for affordable housing, a countywide phenomenon among the poor that is even more acutely felt by people who are chronically ill with HIV/AIDS.

Requirements -

- Must be HIV positive symptomatic or must have full blow AIDS
- Must have secondary diagnosis of substance abuse/dependence or mental health diagnosis
- Must qualify for low income housing
