Kim's Tip: Skin Care Tips When Wearing Make-up

Make-up is only to enhance your beauty. It is still important to take care of your skin underneath the make-up. Try these simple tips to keep your skin great and make-up looking flawless.

- **Moisturize** – Using a moisturizer protects your skin and retains moisture. Try using one with SPF to give extra protection from the harmful rays of the sun.
- **Use a Primer** – Primer helps make-up last and prevents fading and creasing. Apply it over your face before applying make-up. Use it to smooth imperfections like fine lines, and to fix make-up mistakes.
- **Replace Old Make-up** – Make-up does have an expiration date and it is important that you replace your old products to prevent breakouts and skin irritations.
- **Remove Make-Up Before Bed** – It is never a good idea to go to bed with make-up on. Some make-up products create an oil build-up which can leave your skin more prone to breakouts. Use a cleansing wipe to take off make-up at night.
