Complete this page only if you are requesting County Cremation

In compliance with the laws of the State of California, the following information is being provided to you. Please read the two (2) citations and sign where indicated and return the document to the Department of Coroner with the other documents you are being asked to complete. These documents will be maintained with the permanent file and will allow the county of Los Angeles Department of Health Services to proceed with the cremation according to your wishes.

Section 7051 of the Health and Safety Code reads in part: "This section shall not prohibit the removal of foreign material, pacemaker, or prostheses from cremated remains by an employee of a licensed crematory prior to final processing of ashes. Dental gold or silver, jewelry, or mementos, to the extent that they can be identified, may be removed by the employee prior to final processing in the equipment in such that it will not process these materials. However, dental gold and silver, jewelry, or mementos that are removed shall be returned to the urn or cremated remains container, unless otherwise directed by the person or persons having the right to control the disposition."

7054.7(b) reads: "Written acknowledgements from the person entitled to control the disposition of the cremated remains shall be obtained by the person with whom arrangements are made for disposition of the remains on a form that includes, but is not limited to, the following information: "the human body burns with the casket, container, or other material in the cremation chamber. During the cremations, the contents of the chamber may be moved to facilitate incineration. The chamber is composed of ceramic or other material, which disintegrates slightly during each cremation, and the product of that disintegration is commingled with the cremated remains. Nearly all of the contents of the cremations chamber, consisting of the cremated remains, disintegrated chamber material, and small amounts of residue from previous cremations, are removed together and crushed, pulverized, or ground to facilitate inurnment or scattering. Some residue remains in the cracks and uneven placed of the chamber. Periodically, the accumulation of the residue is removed and interred in a dedicated cemetery property, or scattered at sea. The acknowledgment shall be filed and retained, for at least five years, by the person who disposes of or inters the remains."

I have read the above sections of the California Health and Safety Code and under Section 710 of the California Health and Safety Code; I am one of those persons named with the right to control the disposition of the remains.
