

2019 NURSERY QUESTIONNAIRE

NURSERY OWNERS/OPERATORS

Los Angeles County has consistently been one of the nation's leading producers of nursery stock. The Crop Report is used as a source of information by the nursery industry as well as banking and research organizations. Your assistance in providing sales and production data is critical, as funding for research (public and private) and other projects and services may be allocated on the basis of the information you supply.

State law (FAC Section 2279) requires that the Agricultural Commissioner gather the most reliable and complete information obtainable on acreage, production, and sales values in the county. The Agricultural Commissioner provides this information to the state in the form of a Crop Report. The facts and figures that are provided by individual firms are never used for any purpose other than to compile totals for the whole industry. All responses are confidential.

If you need further assistance regarding this form, please contact the Agricultural Commissioner/ Weights and Measures at (626) 575-5466.

We appreciate your cooperation in helping us compile the most accurate information for the 2019 Crop Report.

Please return questionnaire by March 1, 2020.

PRODUCTION AND SALES

Plant Type	Production Location (nearest address)	Covered Area* (square feet)	Field Area (acres)	Sales per category (dollars)
Ornamental Trees and Shrubs				
Bedding Plants
