- Each employee must be trained within the last 12 months and before assignment to work in a treated field
- Training shall be presented in a manner the employee can understand using nontechnical terms, including response to questions
- Training location reasonably free from distraction and trainer must be present throughout entire presentation
- This record must be kept for two years, must be accessible to the employee, and must be provided to the employee, the County Agricultural Commissioner or the Department of Pesticide Regulation upon request

TRAINING TOPICS CHECK-OFF LIST

- 1. Where and in what forms pesticides and residues may be encountered
- 2. Potential hazards that pesticides present to fieldworkers and their families, including acute, chronic, delayed, and sensitization effects
- 3. Routes pesticides can enter the body
- 4. Signs and symptoms of overexposure
- 5. Prevention, recognition, and first aid for heat-related illness in accordance with Title 8, CCR, section 3395

- 6. Wear work clothing that protects the body from pesticide residues. Wash work clothes separately from other laundry.
- 7. Information provided by Safety Data Sheets
- 8. Hazard communication requirements (Pesticide Use Records, Application-Specific Information, SDS availability, Completed A-9 location)
- 9. Routine decontamination procedures and the employer's responsibility to provide decontamination supplies:
 - Wash hands before eating, drinking, using the toilet, chewing gum, or using tobacco
 - Thoroughly wash or shower with soap and water
 - Change into clean clothes as soon as possible
- 10. First aid and emergency decontamination procedures (including emergency eye flushing and procedures if pesticides are spilled or sprayed on the employee)
- 11. How and when to obtain emergency medical care
- 12. REIs and what field posting means, including both California and federal field posting signs
- 13. Keep out of application exclusion zones
- 14. Employees must be at least 18 years old to perform early-entry activities. Employees must be provided specific information before directed to perform early-entry activities
- 15. Employees cannot be allowed or directed to handle pesticides unless the employee has been trained as a handler
- 16. Employees must not take pesticides home
- 17. Potential hazards to children and pregnant women from pesticide exposures
 - Wash hands before eating, drinking, using the toilet, chewing gum, or using tobacco
 - Thoroughly wash or shower with soap and water
 - Change into clean clothes as soon as possible
- 18. How to report suspected pesticide use violations
- 19. Employee's rights; including the right:
 - To receive information about pesticides
 - For the employee's physician or employee representative designated in writing to receive information
 - To be protected against retaliation
 - To report suspected violations to DPR or county agricultural commissioner
