24. **COMMENTS RE:** Medical

Re people being placed in the AIM/72 hour hold area:

Staff reported that people in that module are generally there for 72-hour holds. Once they are cleared by clinical staff, it is then communicated to LASD that they are ready to be moved. Communication occurs with various units (for instance, the population management bureau, different jail facilities, etc.), so it can often take multiple days after they are cleared to be moved to less restrictive housing. It did not appear (at least to Commissioner Veral) that the communication between entities is very streamlined and it seems to occur via email or verbal, likely causing additional delays and mistakes. Getting clarification of this communication process from custody and medical staff would be very beneficial.

## Mental Health

### 36. Facilities/Maintenance COMMENTS RE: Back Log Unfilled Order(s)

Since it was Commissioner Hennigan-Ohanesian's first inspection, one of the deputies on the module briefly showed us the Uniform Daily Activity Log (E-UDAL). He explained that it tracks various Title 15 requirements for those incarcerated. He explained that at least five deputies are on duty on each floor. These deputies are assigned to the following designations: cleaning, title 15, safety checks, SMY (unclear what this is), and the deputy explained that Title 15 ensures that incarcerated persons are fed, showered, have phone access, and that medical/mental health requests are being met.

Staff informed us they cannot check the status of facilities requests so they have no idea if something has been submitted for fixing or not

39. **Deputy Staffing COMMENTS RE:** Quality of Interactions w/Detainees

After inspecting the AIM on the 7th floor, we went to the FIP step-down (162). When we walked into the first set of Pods, ten deputies, all male, were behind the desk watching a screen. They immediately clicked off whatever they were watching when we walked in. These deputies confirmed that the WIFI does not allow them to access the internet besides department training videos. However, they could not confirm or explain if they were restricted from accessing material to watch via an external hard drive or some other method. After concluding our inspection, we checked out with Watch Commander Akchyan, as W/C Gonzalez was no longer there. We told him we had observed 10 male deputies behind the desk on the 6th floor watching a screen. He did not seem alarmed with their behavior.

## 72. Narrative Report

Only one elevator was working at the time of our visit. We were told this is being addressed, albeit slowly and it continues to impede activities, including getting to court and medical appointments.

The first area we inspected was the AIM (Acute Intervention Module) 172 A-C (7th Floor). We were advised these individuals were being held on a 72-hour hold for mental health issues.

We spoke with an incarcerated person who advised that he had been in jail for three days. He was wrapped in a blanket and did have a mattress. There were remnants of a food bag in the corner near the door, but he could not tell us if he had had anything to eat. He also complained about his arm hurting. He also advised that he had not been offered a shower.

The second incarcerated person we spoke with was waiting in the shower in the dayroom. He advised he had been in the pod for 4 days. He was dressed but had just taken a shower. He was waiting between the staircase and the cell for someone to transfer him. He had been waiting for an extended period. While we were there speaking with someone else, a deputy came in and escorted him back to his cell.

The third incarcerated person we spoke with asked that we call his family because they did not know he was in jail. He shared that he had been in jail for 8 days and had not been given any phone privileges. He had three blankets in his cell. He advised that his sink and toilet were in working order.

We observed two safety checks on this floor. One inspection appeared more thorough than the other (the deputy appeared to look inside most of the rooms). However, one man was lying on the ground, covered with a blanket and no mattress. The deputy conducting a safety check was observed walking past the room without checking if the individual was okay.

The incarcerated person was observed to be sleeping on the floor, and there was no mattress on the bed. He was covered up. When we inquired about his status, the clinical on call advised that he had not been cleared yet for a mattress and had been there only 24 hours. She reported that people in that module are generally there for 72-hour holds. Once they are cleared by clinical staff, it is then communicated to LASD that they are ready to be moved. Communication occurs with various units (for instance, the population management bureau, different jail facilities, etc.), so it can often take multiple days after they are cleared to be moved to less restrictive housing. It did not appear (at least to Commissioner Veral) that the communication between entities is very streamlined and it seems to occur via email or verbal, likely causing additional delays and mistakes.
