Community Development Commission

January 15, 2016

TO: Each Supervisor

FROM: Sean Rogan
Executive Director

**SUBJECT: REPORT BACK ON BIOSCIENCE INNOVATION HUBS AND
POTENTIAL OF THE FORMER MARTIN LUTHER KING JR.
COMMUNITY HOSPITAL FOR BIOSCIENCE RELATED USES**

On December 15, 2016, the Board directed the Community Development Commission (Commission) to provide a written assessment of the potential and feasibility of utilizing the former Martin Luther King Jr. (MLK) community hospital for bioscience related uses, as part of a motion regarding the potential development of County-owned real estate assets as hubs for bioscience innovation.

Under a contract approved by the Board on October 27, 2015, the Commission has engaged the Los Angeles Economic Development Corporation (LAEDC) to develop an implementation plan based on recommendations from the 2014 Battelle Memorial Institute report, with the goal of developing a regional economy of bioscience assets. Part of LAEDC's charge is to identify County-owned real estate assets for consideration as hubs.

LAEDC has received a database of all County-owned real estate assets, and they are currently working collaboratively with the Chief Executive Office (CEO) Real Estate division and the Commission to review the baseline property information and determine the status of properties that could serve as catalysts for development of bioscience hubs. To date, LAEDC has had numerous conference calls and meetings with CEO Real Estate and the Commission to discuss the requirements and readiness of each of the County assets for potential use as a hub.

LAEDC and its consultant team have established a schedule for meetings and contacts with the relevant County departments to develop realistic timelines for making County properties available. These efforts will include analyzing relocation options and associated costs.

To date, LAEDC has reviewed the master plan and related studies for LAC+USC Health campus, Harbor-UCLA and the MLK campus. Their initial review suggests that there is an opportunity to utilize County-owned land in all three instances to further the development of the bioscience industry in the region.

Each Supervisor
January 15, 2016

On the MLK campus, the Commission is analyzing the adaptive reuse of the old Multi-Service Ambulatory Care Center. The Commission's analysis will draw upon the Re-Use Feasibility Study commissioned by the CEO and conducted by AECOM, which provides an initial, broad review of the renovation needs of the building to assist in formulating a preliminary scope of work for any proposed renovation. AECOM's study focuses primarily on overall structural issues associated with adaptive reuse of the MACC.

A complete analysis must also include consideration of the specific needs for bioscience uses, such as lab space, energy and water consumption. The analysis should also consider the compatibility of bioscience with other potential uses at the site, including housing, autism-related services, or other health care services, and how all of these potential uses align with the MLK hospital campus master plan. Additionally, the analysis will consider the Charles Drew University campus master plan, which involves the utilization of County-owned property for the development of university buildings, clinics, educational facilities and potentially student housing.

Moreover, a thorough analysis should also incorporate a market feasibility study to evaluate the potential economic benefits and constraints of bioscience on the MLK campus, and its relationship to the Countywide strategy of bioscience innovation hubs. As mentioned above, this regional strategy will be detailed in LAEDC's forthcoming implementation plan, due in May 2016.

Finally, through outreach and dialog with community stakeholders, the analysis will address the ways in which adaptive reuse of MLK community hospital can realize various public benefits for the surrounding community.

If you have any questions, please contact me or Cordé Carrillo, Director of Housing Economic and Housing Development, at (626) 586-1800 or corde@lacdc.org.

REPORT BACK ON BIOSCIENCE INNOVATION HUBS (ITEM NO. 6, AGENDA OF DECEMBER 15, 2015)

On December 15, 2015, the Board approved a motion by Supervisors Mark Ridley-Thomas and Hilda L. Solis directing the Chief Executive Officer (CEO), in consultation with the Executive Director of the Community Development Commission, to take several actions related to bioscience innovation hubs. Among these was a directive to provide a work plan and timeline to assess the feasibility of utilizing portions of the LAC+USC Healthcare Campus and the surrounding area (LAC+USC Area) as a bioscience innovation hub. Moreover, the motion stated the work plan should analyze complementary and competing space uses within the LAC+USC Area, recommend a long-term disposition, and use strategy for County assets within the LAC+USC Area that focuses on optimal location of complementary or critical County health functions, identify options for location and development of a bioscience innovation hub within the LAC+USC Area, define the best practice process for soliciting proposals and for evaluating unsolicited proposals with respect to a bioscience innovation hub development partnership, and identify options for location and development of the public benefits set forth in the Community Development Commission's (CDC) community outreach program.

As described, the requested work plan contains several elements. The first of which involves compiling substantial, detailed property data of all County assets within a five-mile radius of the LAC+USC Medical Center Campus. The specified area is quite large and contains numerous County facilities including the Civic Center, for example. In consultation with the authors of the motion, we agreed to narrow the focus area in the interest of efficiency.

"To Enrich Lives Through Effective And Caring Service"

***Please Conserve Paper – This Document and Copies are Two-Sided
Intra-County Correspondence Sent Electronically Only***

Compiling property data and uses have been the main undertaking thus far. Collaborating with other County departments to get current information on facility uses is the main focus of our initial efforts. After gathering the data on facility uses, it should be a straightforward process to determine optimal uses and disposition strategies. The potential locations of bioscience innovation hub facilities will be an extension of the disposition strategies. Best practices for soliciting joint development proposals and dealing with unsolicited joint development proposals has legal and policy implications that will require collaboration with County Counsel and the Internal Services Department. The public benefits component will begin following completion of the community outreach activities by CDC, which is scheduled for June 2016.

The following is a timeline associated with this work plan:

TASK	START DATE	END DATE
Compile Property Data & Uses	12/17/2015	3/15/16
Disposition and Use Strategy	3/1/16	4/1/16
Identify Parcels for Bioscience near LAC+USC	3/1/16	4/15/16
Best Practices for Unsolicited Offers	3/1/16	4/15/16
Best Practices for Solicitation Process	3/1/16	4/15/16
Public Benefits	6/15/16	TBD

If you any have questions, your staff may contact Christopher Montana at (213) 974-4200, or email cmontana@ceo.lacounty.gov.

REPORT BACK ON BIOSCIENCE INNOVATION HUBS (ITEM NO. 6, AGENDA OF DECEMBER 15, 2015)

On December 15, 2015, the Board approved a motion introduced by Supervisors Mark Ridley-Thomas and Hilda L. Solis directing the Chief Executive Officer (CEO), in consultation with the Executive Director of the Community Development Commission, to take several actions related to bioscience innovation hubs as follows:

- 1) Provide a work plan and timeline to assess the feasibility of utilizing portions of the LAC+USC Healthcare Campus and the surrounding area (LAC+USC Area) as a bioscience innovation hub;
- 2) Analyze complementary and competing space uses within the LAC+USC Area;
- 3) Recommend a long-term disposition and use strategy for County assets within the LAC+USC Area that focuses on optimal location of complementary or critical County health functions;
- 4) Identify options for location and development of a Bioscience Innovation Hub within the LAC+USC Area;
- 5) Define the best practice process for soliciting proposals and for evaluating unsolicited proposals with respect to a Bioscience Innovation Hub development partnership; and
- 6) Identify options for location and development of the public benefits set forth in the Community Development Commission's (CDC) community outreach program.

"To Enrich Lives Through Effective And Caring Service"

**Please Conserve Paper – This Document and Copies are Two-Sided
Intra-County Correspondence Sent Electronically Only**

This report includes an analysis of the complementary and competing space uses, an identification of potential bioscience sites within the LAC+USC Area, and recommendations of long-term use, disposition and development strategies for the potential sites along with best practices for soliciting proposals and evaluating unsolicited proposals. The Chief Executive Office-Real Estate Division (CEO-RED) collaborated with County departments, as well as the Los Angeles Economic Development Corporation (LAEDC), to gather data on facilities within the LAC+USC Area and to identify potential bioscience sites within the LAC+USC Area. An overview of the facilities located within the LAC+USC Area along with complementary and competing space use data is provided in the Facility Matrix (Attachment A).

LAC+USC Area

The LAC+USC Area includes approximately 124 acres divided between five sections as follows:

Main Healthcare Campus:	65 acres
West Healthcare Campus:	11 acres
Probation/Court Eastlake:	29 acres
Public Works:	18 acres
Department of Public Social Services:	1 acre
Total	124 acres Area Map (Attachment B)

DPSS Section

The DPSS section is located at 4077 North Mission Road, which is 1.5 miles north of the LAC+USC Campus. The 1-acre site contains a 26,000 square foot administrative office that serves CalWORKs clients and is outlined in Attachment C. The office was constructed in 1988 and is in fair condition. Gensler recently completed a Strategic Master Space Plan for DPSS, and the Plan identifies this site as a facility for refurbishment or renovation. DPSS anticipates the ongoing need for a facility in this area to serve clients.

DPW Section

The second smallest section within the LAC+USC Area is the DPW section consisting of 18 acres divided between two parcels. The two parcels are about ¼-mile apart and commonly known as the Alcazar Yards. The parcel at 1525 Alcazar Street is 10 acres, and the parcel at 2275 Alcazar is 8 acres. Within the two parcels, they have 24 buildings amounting to approximately 270,000 square feet of aggregate space. The buildings were mainly constructed in the 1950s and 1960s with some buildings dating back to 1905 and 1915. DPW services are provided Countywide by staff and resources housed at the Alcazar Yards. The parcels were acquired using Flood Control District and Road funds that have to be compensated if the parcels are leased or sold.

Probation Section

The second largest section within the LAC+USC Area is the Probation section comprising 29 acres, 27 buildings, and approximately 493,000 square feet of space. Central Juvenile Hall and Eastlake Courthouse are the anchor facilities within this section. The majority of the facilities within this section were constructed in the 1950s and are in need of improvement. The State of California owns 55% of the Probation section and the construction of a new juvenile courthouse is in the planning stages. Any disposition of the assets in this section would require cooperation from the State and compensation to the State.

LAC+USC Healthcare Campus

The LAC+USC Healthcare Campus (Campus) is the core of the LAC+USC Area comprising of 76 acres and housing 7,000 DHS employees in 75 buildings that amount to approximately 4,100,000 square feet of space. The Campus dates back to construction of the original hospital in 1878 along Marengo Street and North Mission Boulevard. The Campus expanded east in 1933 when General Hospital was built. Other buildings on the Campus were constructed during expansion phases in the 1950s, 1960s, and 2008. A 20-year vision for the Campus is set forth in the Board-approved LAC+USC Campus Master Plan.

The LAC+USC Campus Master Plan was prepared by Lee, Burkhart, Liu, Inc. in 2014 in collaboration with DPW, ISD and DHS, and it provides direction for long-term land utilization for the campus. A major emphasis of DHS that is highlighted in the Master Plan is community engagement initiatives and the conversion of Marengo Street into a more inviting gateway to the Campus. CEO-RED staff met with DHS management and examined the Master Plan to get a clear understanding of the high priority real estate projects and the suitable locations for bioscience facilities. The high priority projects are as follows:

- Parking Structure(s)
- New Outpatient and Recuperative Care Facility
- New Skilled Nursing Facility
- New Warehouse/Storage Facility
- New Administrative Office and Nursing College Facility
- General Hospital Adaptive Reuse

Disposition and Development Strategies

The Board-approved LAC+USC Campus Master Plan identifies areas of underutilized land and structures within the northwest portion of the campus that can be redeveloped with 755,000 square feet of bioscience facilities along with 130,000 square feet of workforce housing. This northwest portion comprises the Nursing School, old laboratory buildings, a warehouse and older buildings leased to non-profit social and health services providers.

Four existing lab buildings (1801 Marengo, 1303 Mission, 1321 Mission, 1331 Mission), in the northwest area, are being vacated by USC and could be backfilled by private start-up firms as incubator space. The Children's and Women's Hospital is vacant and could be demolished for the development of administrative space to house occupants from the northwest area and for the development of bioscience facilities along with warehouse space. USC currently leases to DHS an 83,000 square foot warehouse at 2011 North Soto Street, Los Angeles. A new warehouse project may be feasible by relocating from the current leased warehouse facility and terminating the \$519,000 annual rent payment.

The redevelopment of the DPW and Probation land would require costly relocation of the current uses. The 124 acres of County-owned property within the LAC+USC area have long-term strategic importance to the County because of their central location, proximity to the Civic Center and other County facilities, and because they surround our flagship hospital. Given the limited land inventory, and the need to protect these strategic County assets, we recommend that this land remain in County-ownership in perpetuity. However, options such as the long-term ground leasing of portions of the property, or transactions involving the acquisition of suitable replacement property could also potentially be considered viable.

It should be noted that other on-going County initiatives, such as healthcare, homelessness, affordable housing, and diversion/re-entry are also seeking County land and/or buildings to address those needs.

Evaluating Unsolicited Proposals

If, at the time an unsolicited offer is received by the County, the County is already planning a solicitation or auction in the near term, the unsolicited offer should generally be sent back with notice that the developer would be put on the list to receive the County's solicitation or auction notice.

If the unsolicited offer presents a unique opportunity (such as adjacent property owner proposing joint occupancy or a property exchange), the County would not be necessarily legally prohibited from considering it, so long as there is a legal means of proceeding without a solicitation or auction. A property exchange of equal value should be allowable pursuant to Government Code 25365. The Government Code does not allow a direct sale to an adjacent property owner if the value of the subject property exceeds \$25,000.

Since the Alcazar Yards are Road and Flood Control District properties, these are governed by other statutes, and the governing statutes do not require a solicitation or auction if the existing DPW operations at those yards could be relocated offsite and those yards could therefore be considered surplus properties.

Each Supervisor

Page 5

Open and Competitive Land Development Solicitations

An open and competitive Request for Proposals (RFP) solicitation is a best practice for land development opportunities. The RFP process is a transparent, competitive and equitable way to secure the best financial terms for the County and to engage qualified and responsive development partners.
