

MOTION BY CHAIR HILDA L. SOLIS

August 9, 2016

**Community Participation Report Back**

This project has been developed with significant community and workforce community dialogue resulting in a significant community benefit package that we are learning more about today.

Nonetheless, we don't have a standard process for achieving community participation in the development process, particularly in major projects where there is a public private partnership achieving economic development in addition to County facilities.

This Board's December Motion related to proposed Bioscience Hubs development called for a report back to the Board on best practices for community participation in the development of the bioscience initiative economic development projects.

**I THEREFORE MOVE THAT THE BOARD OF SUPERVISORS:**

1. Receive the status of the Bioscience Hubs development report back.
2. Propose that CEO and CDC jointly return to the Board in 60 days with a report on best practices for community participation in County economic development projects going forward.
