FRIENDS OF Cabrillo Marine Aquarium

January 22, 2021

The Honorable Janice Hahn
Supervisor, 4th District
Board Executive Office
Hall of Administration Room 358
Los Angeles, CA 90012
fourthdistrict@bos.lacounty.gov
kcoates@bos.lacounty.gov

Dear Supervisor Hahn,

Friends of Cabrillo Marine Aquarium wishes to communicate our full support and request for the Los Angeles County and State Departments of Public Health to immediately authorize schools in the Los Angeles Unified School District to serve as COVID-19 vaccine sites for school staff and the community at large. We are asking for your leadership to help expedite approvals of Los Angeles Unified Schools as vaccine sites.

Friends of Cabrillo Marine Aquarium has seen first hand the leadership and safety net our neighborhood schools have provided since the pandemic began. Schools are trusted community partners, are accessible to and can accommodate large groups of individuals with safe social distancing, and have trained and qualified staff on site. Our neighborhood schools are uniquely situated and qualified to help in the vaccination effort:

Our Neighborhood Schools Are Trusted Community Partners

- Los Angeles Unified schools are conveniently located where people live, which will help make vaccines accessible to people in all communities, in particular those who may lack access to health care services and reliable transportation. Families trust schools to keep their children safe and that trust extends to all aspects of a child's life. Providing the vaccination at a trusted location will increase the chances of a successful and more speedy vaccination effort.

- Since this crisis began, Los Angeles Unified has proven its ability to meet the needs of the community on a dramatic scale. The 63 food distribution centers at schools have provided our families and community members over 96 million meals along with 18 million items of much-needed supplies. They have distributed computers and internet access to 500,000 students, and operate 42 COVID testing centers at schools that have administered more than 350,000 tests to staff members, students and their families – the largest school-based program in the nation.

Our Neighborhood Schools Keep Visitors, Staff, and Families Safe

- Schools have the space needed to allow individuals to wait safely after their vaccine dose to make sure they aren't having an adverse reaction. Schools have all the necessary infrastructure already in place – security, electricity, restrooms and both covered and open areas – to support the vaccination process.

- Los Angeles Unified has school-based health clinics in high-needs areas which are already licensed to provide vaccinations. These sites can immediately provide COVID-19 vaccinations while more locations at additional schools become qualified under state guidelines.

Our Neighborhood Schools Have the Necessary Infrastructure

- Los Angeles Unified has the staffing, both clinical and logistical, to begin administering vaccinations now. The District employs more than 450 registered nurses and 120 licensed vocational nurses, all of whom can administer the vaccine and can attend to those who may have an adverse reaction to the vaccine. Moreover, these nurses have experience working with and caring for members of our neighborhood school and community.

- Los Angeles Unified has a technology and data system which can register individuals, schedule vaccination appointments and share the data with appropriate authorities. Microsoft is connecting the District's existing COVID-19 technology capabilities with the vaccine platform Microsoft has deployed in other cities and states across the country. This platform includes registration and scheduling, reporting on complications/adverse effects, tracking of vaccines in stock, contactless appointment check-in and data capture at time of appointment, rules to sort high-risk individuals and offer waitlists to low-risk individuals and dashboards to view data, among other features.

Equity in Community Access

- As you know, access to health care services is a real barrier for many people in low-income communities. More than 80% of the families served by Los Angeles Unified live in poverty and 83% are Black and Latino residents, which have been the demographics most impacted by the virus. It's critical that the vaccine be made available to these families. In a typical community we serve, there are about three drug stores, two fire stations and 25 schools. No organization has the infrastructure to provide easier access to vaccinations than schools.

Other Communities Have Made Schools a Priority

- New York has begun providing vaccinations to those who work in schools and Kansas City has committed to provide vaccinations to all school district staff in February. Locally, vaccinations are available in Riverside for all who work in education, in Ventura teachers will start receiving vaccinations next week and Long Beach will begin providing vaccinations to school employees later this month.

We need our schools to reopen as soon as possible, and in the safest way possible; having Los Angeles Unified as a vaccination partner would be an important and unprecedented benefit to this cause. We need your voice and leadership to get these vaccines distributed effectively, efficiently, and through trusted school sites.

Thank you, Caroline J. Brady

Dear Hon. Supervisor Janice Hahn,

On behalf of Valero Wilmington Refinery, I am writing to express our full support and request for the Los Angeles County and State Departments of Public Health to immediately authorize schools in the Los Angeles Unified School District (Los Angeles Unified) to serve as COVID-19 vaccine sites for the school staff and the community at large. We hope that the state and local agencies will expedite the review process for applications coming from Los Angeles Unified. We are asking for your leadership to help expedite approvals of Los Angeles Unified Schools as vaccine sites.

As a business member of the Wilmington community, with several employees, family members, friends, partners and stakeholders living within the local community, we are aware and in addition support the efforts seen firsthand of the leadership an safety net that our neighborhood schools have provided since the pandemic began. Schools are trusted community partners, are accessible to and can accommodate large groups of individuals with safe social distancing, and have training and qualified staff on site.

Our neighborhood schools are uniquely situated and qualified to help in the vaccination effort:

Our Neighborhood Schools Are Trusted Community Partners

- Los Angeles Unified schools are conveniently located in the middle of neighborhoods where people live, which will help make vaccines accessible to people in all communities, in particular those who may lack access to health care services and reliable transportation. Families trust schools to keep their children safe and that trust extends to all aspects of a child's life. Providing the vaccination at a trusted location will increase the changes of a successful and speedier vaccination effort.

- Since this crisis began, Los Angeles Unified has proven its ability to meet the needs of the community on a dramatic scale. The 63 food distribution centers at schools have provided families and community members over 96 million meals along with 18 million items of much-needed supplies. They have distributed computers and internet access to 500,000 students, and operate 42 COVID testing centers at schools that have administered more than 350,000 tests to staff members, students and their families-the largest school-based program in the nation.

Our Neighborhood Schools Keep Visitors, Staff, and Families Safe

- Schools have the space needed to allow individuals to wait safely after their vaccine dose to make sure they aren't having an adverse reaction. Schools have all the necessary infrastructure ready in place- security, electricity, restrooms and both covered and open areas- to support the vaccination process.

- Los Angeles Unified has school-based health clinics in high-needs areas which are already licensed to provide vaccinations. These sites can immediately provide COVID-19 vaccinations while more locations at additional schools become qualified under state guidelines.

Our Neighborhood Schools Have the Necessary Infrastructure

- Los Angeles Unified has the staffing, both clinical and logistical, to begin administering vacations now. The District employs more than 450 registered nurses and 120 licensed vocational nurses, all of whom can administer the vaccine and attend to those who may have an adverse reaction to the vaccine. Moreover, these nurses experience working with and caring for members of our neighborhood school and community.

- Los Angeles Unified has a technology and data system which can register individuals, schedule vaccination appointments and share the data with appropriate authorities. Microsoft is connecting the District's existing COVID-19 technology capabilities with the vaccine platform Microsoft has deployed in other cities and states across the country. This platform includes registration and scheduling, reporting on complications/adverse effects, tracking of vaccines in stock, contactless appointment check-in and data capture at the time of appointment, rules to sort high-risk individuals and offer waitlists to low-risk individuals and dashboards to view data, among other features.

Equity in Community Access

- As you know, access to health care services is a real barrier for many people in low-income communities. More than 80% of the families served by the Los Angeles Unified live in poverty and 83% are Black and Latino residents, which have been the demographics most impacted by the virus. Parent Engagement Academy's mission is to serve the families of Los Angeles County. We have seen first-hand the leadership and safety net that our neighborhood schools have provided since the pandemic began. Schools are trusted community partners, are accessible to and can accommodate large groups of individuals with safe social distancing and have trained and qualified staff on site.

Our neighborhood schools are uniquely situated and qualified to help in the vaccination effort:

Our Neighborhood Schools Are Trusted Community Partners

- Los Angeles Unified schools are conveniently located in the middle of neighborhoods where people live, which will help make vaccines accessible to people in all communities, in particular those who may lack access to health care services and reliable transportation. Families trust schools to keep their children safe and that trust extends to all aspects of a child's life. Providing the vaccination at a trusted location will increase the chances of a successful and more speedy vaccination effort.

- Since this crisis began, Los Angeles Unified has proven its ability to meet the needs of the community on a dramatic scale. The 63 food distribution centers at schools have provided our families and community members over 96 million meals along with 18 million items of much-needed supplies. They have distributed computers and internet access to 500,000 students, and operate 42 COVID testing centers at schools that have administered more than 350,000 tests to staff members, students and their families – the largest school-based program in the nation.

Our Neighborhood Schools Keep Visitors, Staff, and Families Safe

- Schools have the space needed to allow individuals to wait safely after their vaccine dose to make sure they aren't having an adverse reaction. Schools have all the necessary

infrastructure already in place – security, electricity, restrooms and both covered and open areas – to support the vaccination process.

- Los Angeles Unified has school-based health clinics in high-needs areas which are already licensed to provide vaccinations. These sites can immediately provide COVID-19 vaccinations while more locations at additional schools become qualified under state guidelines.

Our Neighborhood Schools Have the Necessary Infrastructure

- Los Angeles Unified has the staffing, both clinical and logistical, to begin administering vaccinations now. The District employs more than 450 registered nurses and 120 licensed vocational nurses, all of whom can administer the vaccine and can attend to those who may have an adverse reaction to the vaccine. Moreover, these nurses have experience working with and caring for members of our neighborhood school and community.

- Los Angeles Unified has a technology and data system which can register individuals, schedule vaccination appointments and share the data with appropriate authorities. Microsoft is connecting the District's existing COVID-19 technology capabilities with the vaccine platform Microsoft has deployed in other cities and states across the country. This platform includes registration and scheduling, reporting on complications/adverse effects, tracking of vaccines in stock, contactless appointment check-in and data capture at time of appointment, rules to sort high-risk individuals and offer waitlists to low-risk individuals and dashboards to view data, among other features.

Equity in Community Access

- As you know, access to health care services is a real barrier for many people in low-income communities. More than 80% of the families served by Los Angeles Unified live in poverty and 83% are Black and Latino residents, which have been the demographics most impacted by the virus. It's critical that the vaccine be made available to these families. In a typical community we serve, there are about three drug stores, two fire stations and 25 schools. No organization has the infrastructure to provide easier access to vaccinations than schools***Other Communities Have***

Made Schools a Priority

- New York has begun providing vaccinations to those who work in schools and Kansas City has committed to provide vaccinations to all school district staff in February. Locally, vaccinations are available in Riverside for all who work in education, in Ventura teachers will start receiving vaccinations next week and Long Beach will begin providing vaccinations to school employees later this month.

We need our schools to reopen as soon as possible, and in the safest way possible; having Los Angeles Unified as a vaccination partner would be an important and unprecedented benefit to this cause.

Parent Engagement Academy

We are asking for your support in expediting approvals for Los Angeles Unified as a vaccination partner. We need your voice and leadership to get these vaccines distributed effectively, efficiently, and through trusted school sites.

Thank you,

María Elena Meraz

"Creating a Better Future for Our Community through Advocacy, Mentorship and Education"

January 26, 2021

Honorable Janice Hahn
Los Angeles County Supervisor Fourth District
500 West Temple Street, Suite 822
Los Angeles, Ca. 90012

Dear Honorable Janice Hahn,

On behalf of Parents, Educators/Teachers & Students in Action I am writing to communicate our full support and request for the Los Angeles County and State Departments of Public Health to immediately authorize schools in the Los Angeles Unified School District (Los Angeles Unified) to serve as COVID-19 vaccine sites for school staff and the community at large. We hope that state and local agencies will expedite the review process for applications coming from Los Angeles Unified. We are asking for your leadership to help expedite approvals of Los Angeles Unified Schools as vaccine sites.

Parents, Educators/Teachers & Students in Action's mission is to serve the families of the Fourth District. We have seen first-hand the leadership and safety net that our neighborhood schools have provided since the pandemic began. Schools are trusted community partners, are accessible to and can accommodate large groups of individuals with safe social distancing and have trained and qualified staff on site.

Our neighborhood schools are uniquely situated and qualified to help in the vaccination effort:

Our Neighborhood Schools Are Trusted Community Partners

- Los Angeles Unified schools are conveniently located in the middle of neighborhoods where people live, which will help make vaccines accessible to people in all communities, in particular those who may lack access to health care services and reliable transportation. Families trust schools to keep their children safe and that trust extends to all aspects of a child's life. Providing the vaccination at a trusted location will increase the chances of a successful and more speedy vaccination effort.

- Since this crisis began, Los Angeles Unified has proven its ability to meet the needs of the community on a dramatic scale. The 63 food distribution centers at schools have provided our families and community members over 96 million meals along with 18 million items of much-needed supplies. They have distributed computers and internet access to 500,000 students and operate 42 COVID testing centers at schools that have administered more than 350,000 tests to staff members, students, and their families – the largest school-based program in the nation.

Our Neighborhood Schools Keep Visitors, Staff, and Families Safe

- Schools have the space needed to allow individuals to wait safely after their vaccine dose to make sure they are not having an adverse reaction. Schools have all the necessary infrastructure already

in place – security, electricity, restrooms, and both covered and open areas – to support the vaccination process.

- Los Angeles Unified has school-based health clinics in high-needs areas which are already licensed to provide vaccinations. These sites can immediately provide COVID-19 vaccinations while more locations at additional schools become qualified under state guidelines.

OFFICE OF THE MAYOR
NARESH SOLANKI

Cerritos All-America City 2008

January 26, 2021

Gerardo Pinedo
Chief of Staff
County of Los Angeles Supervisor Janice Hahn
Fourth District
500 West Temple Street, Room 822
Los Angeles, CA 90012

Dear Mr. Pinedo:

During this morning's meeting of the Los Angeles County Board of Supervisors, I was pleased to express the City of Cerritos' strong interest in partnering with the County of Los Angeles to offer a COVID-19 vaccination site in the City of Cerritos. I would like to again emphasize that the City of Cerritos is committed and eager to partner with Los Angeles County in this critical endeavor.

The City of Cerritos is centrally located and ideally suited to effectively serve the entire region, as the City borders the cities of Artesia, Bellflower, Lakewood, La Mirada, Norwalk and Santa Fe Springs. Cerritos is able to offer a safe and regionally accessible vaccination site to facilitate the distribution of the vaccine. The site is directly served by Long Beach Transit, OCTA, Norwalk Transit and Metro buses, as well as the City's fixed-route bus service, Cerritos on Wheels. The City also offers a Dial-A-Ride service to Cerritos seniors and residents with disabilities.

Cerritos is eager to assist Los Angeles County with the distribution of the vaccine and is happy to provide a COVID-19 vaccination site that meets the requirements as outlined in the Memorandum of Understanding Between County of Los Angeles Department of Public Health and City of Cerritos.

My Council colleagues and I greatly support this effort, and hope that Los Angeles County would be open to locating a vaccination site in the City. Please contact City Manager Art Gallucci at (562) 916-1301 should Los Angeles County be interested in pursuing this matter further. Thank you in advance for your consideration of this important matter.

Sincerely,

Naresh Solanki

RE: Reconsideration of Serving as Vaccine Site in Southeast Los Angeles County

Dear Supervisor Janice Hahn:

Because COVID-19 cases continue to reach record high numbers in Los Angeles County, Cerritos College and several cities served by our institution support the efforts in serving as a vested community partner to aid the region and be reconsidered as a designated COVID-19 vaccination site. Our campus continues to serve as a vital lifeline for many families in the region as a food distribution site once a month. Under current orders, our campus took the initiative in completing the process with the Los Angeles Department of Public Health to exhaust all resources necessary in aiding these efforts.

President Biden recently emphasized the importance of the role of higher education institutions with regard to vaccine education and access:

> "…[C]olleges and universities are natural partners for the United States in the effort to get the vaccine to all Americans. The federal government will work with colleges and universities to increase vaccine awareness, reduce hesitancy, and ensure that students, faculty and staff know when they are eligible to get the vaccine, and where to get it. If well-informed by their institutions, college students engaged in remote learning from home may also serve as trusted messengers on vaccine education for their families and communities."
>
> *Source: National Strategy for the COVID-19 Response and Pandemic Preparedness (January 2021, p.86)*

Our Southeast region carries more than 25 percent of the population living below the poverty line, and vaccine access and education are critical factors to ensuring the health and wellness of the communities we serve. A recent L.A. Times article elaborates on the impact of the increase in COVID-19 cases:

> "The southeast region, with 1.2 million people living in more than a dozen communities along the 710 and 605 freeways, has seen infection rates jump to some of the highest in the county. The area is home to many low-wage, front-line workers, and residents there are more likely to live in overcrowded, multigenerational households — key risk factors in the accelerating spread of the virus, according to experts."

Given this dire need, we urge the reconsideration to designate our campus to serve the communities in Southeast Los Angeles County and beyond. Thank you for your consideration at this time. Please feel free to contact me with any questions or concerns at jfierro@cerritos.edu.
