

MOTION BY SUPERVISOR KATHRYN BARGER

APRIL 20, 2021

**Support for H.R. 2611 (Napolitano, D-CA) – Increasing Behavioral Treatment Act**

Within the U.S. health care system, there continue to be significant gaps in coverage for the treatment of serious mental illnesses. Over the last few decades, there have been efforts to address these disparities, including through the parity of health and mental health insurance benefits. Many of the efforts have been successful in bringing about positive changes; however, there is still a significant gap in coverage for low-income people who are in need of inpatient or residential mental health treatment as a result of the long-standing Medicaid Institutions for Mental Disease (IMD) exclusion.

The Medicaid Institutions for Mental Disease exclusion was built into the foundation of the Medicaid program in 1965. Consequently, states are prohibited from receiving Medicaid payments for adults, ages 21 to 64, receiving treatment in an IMD. An IMD is a hospital, nursing facility, or other institution of more than 16 beds that is primarily focused on treating mental illness, including substance use disorder. IMD facilities can be either secured (locked), limiting the outward movement of clients, or they can be open (unlocked) and allow the free movement of clients throughout the surrounding community; the IMD exclusion makes no distinction. This rule exists, in part, to encourage the delivery of behavioral health care outside of large institutions, but it has inadvertently resulted in contributing to a serious shortage of mental health care treatment beds.

SOLIS	_____

The County is committed to providing individuals with the most appropriate care in the most appropriate setting, and the IMD exclusion limits the County's ability to develop needed inpatient and residential care for those with serious mental illness. Far too often, individuals who need IMD care instead experience repeat hospitalizations, homelessness, and episodes of incarceration.

Representative Grace Napolitano has introduced critical legislation that would remove the IMD exclusion for states that have submitted a plan to: increase access to outpatient and community-based behavioral health care; increase availability of crisis stabilization services; and improve data sharing and coordination between physical health, mental health, and addiction treatment providers and first-responders.

H.R. 2611 addresses this longstanding problem by removing the IMD exclusion in a responsible way, ensuring states can develop needed IMD care while also holding them accountable for developing a robust community-based outpatient care continuum in tandem.

**I, THEREFORE, MOVE** that the Board of Supervisors direct the Chief Executive Office Legislative Affairs and Intergovernmental Relations Branch to send a five-signature letter in strong support of H.R. 2611 to Representative Napolitano, with a copy to the County's Congressional Delegation, and to advocate for the passage of this bill or a similar legislation.
