		Oppose	Monisha Parker	<p>The Department of Public Works needs to do research before they report County Lighting Districts Annual Assessments for Fiscal Year 2024-25</p> <p>There are several ways to improve the County Lighting Districts Annual Assessments for Fiscal Year 2024-25:</p> <ol style="list-style-type: none"> <li>1. Conduct a comprehensive review of current lighting infrastructure: Assess the condition of existing lighting fixtures, poles, and wiring to identify areas that may need upgrades or replacements. This will ensure that the assessments are based on accurate and up-to-date information.</li> <li>2. Seek input from residents and stakeholders: Engage with the community to gather feedback on the current lighting services and any areas that may need improvement. This will help ensure that the assessments reflect the needs and priorities of the community.</li> <li>3. Explore energy-efficient lighting options: Consider investing in energy-efficient lighting technologies, such as LED fixtures, to reduce energy consumption and lower long-term operational costs. This may also result in cost savings for residents through lower assessments.</li> <li>4. Develop a long-term maintenance plan: Create a maintenance plan for the lighting infrastructure to ensure that it remains in good working condition and continues to meet the needs of the community. Regular maintenance can help extend the life of the lighting system and reduce the need for costly repairs in the future.</li> <li>5. Consider alternative funding sources: Explore potential grants, partnerships, or other funding sources to supplement the annual assessments and reduce the financial burden on residents. This can help ensure that the lighting district remains sustainable and well-funded for the future.</li> </ol> <p>By implementing these strategies, the County Lighting Districts can improve the accuracy and effectiveness of their annual assessments for Fiscal Year 2024-25, ultimately benefiting residents and the community as a whole.</p>
