27.		Oppose	Monisha Parker	<p>Dear Board of Supervisors,</p> <p>I am writing to address the need for expansion of the Department of Mental Health's Mobile Crisis Response Team (MCRT). As a concerned citizen and advocate for mental health awareness, I have noticed the increasing demand for immediate and effective crisis response services in our community. I believe that expanding the MCRT is crucial in addressing this issue and providing the necessary support for individuals experiencing mental health crises.</p> <p>The current MCRT has proven to be a valuable resource for our community, providing timely and compassionate crisis intervention services for individuals in need. However, with the rising number of mental health cases in our area, it is evident that the current team is not enough to meet the growing demand. This has resulted in longer response times and delays in providing necessary assistance to those in need.</p> <p>An expanded MCRT would not only improve response times but also increase the team's capacity to provide comprehensive and specialized care for individuals in crisis. This could include adding more mental health professionals to the team, such as licensed therapists and counselors, who can provide on-site support and follow-up care for individuals in need. Additionally, an expansion could also include the incorporation of new technology and resources, such as telehealth services, to ensure that the team can reach a wider range of individuals in need.</p> <p>Furthermore, the expansion of the MCRT would also benefit our community as a whole. By providing timely and effective crisis intervention services, the team can help prevent emergency room visits and hospitalizations, reducing the burden on our healthcare system and saving valuable resources. It would also promote community safety by addressing mental health crises before they escalate into potential harm to oneself or others.</p> <p>I urge the Board of Supervisors to consider the expansion of the Department of Mental Health's MCRT as a top priority. As a community, it is our responsibility to support and provide necessary resources for those experiencing mental health crises. The expansion of the MCRT would be a significant step towards achieving this goal and promoting overall mental health and well-being in our community.</p> <p>Thank you for your time and consideration.</p> <p>Sincerely, Monisha Parker</p>

27.		Other	kristen joseph	If more focus was put into the evident mental health crisis rather than indoctrinating our children to believe they can chose their genders which is a scientific impossibility, my son wouldn't have been kidnapped and forced through over 20 foster homes, hospital holds, isolation and seclusion and cut off from his mother with no contact for over two years while the county continuously avoids accountability and retaliates at every civil or federal complaint filed in the matter. If it didn't take a crisis team 8 hours to come to my home February 18, 2021 perhaps I wouldn't have needed to call 911 the following day when my son's meltdown exacerbated, and I wouldn't be typing this sitting in a hotel room that is trafficking children because i've lost EVERYTHING fighting for my son and STILL the county, state, and country ignores the very severe issues that need IMMEDIATE attention. The lack of oversight within Child Protective Services where they allow their workers to physically abuse children with video proof and do nothing allowing the workers to continue, where they lie to the courts and steal children without warrants. The clear and insanely concerning mental health crisis, the absolute homelessness emergency, the covid crisis and housing funds millions have yet to receive and are living in tents because it appears these tax dollars have unjustly enriched our public servants rather than assist with ensuring our community was able to move forward after the unconstitutional lockdowns. That there is a chain of hotels with the worst reviews, massive lawsuits, failed compliance with health and building codes that are trafficking children, cooking drugs, and instigating crime in cities across the county. In fact, Extended Stay America in Long Beach has been reported to over 20 agencies, I know because i've done the reporting. Not a single entity has stepped in. I sat in my room as a TEENAGER shot himself in the head in front of his three younger brothers hearing the gun go off..watching the sirens flood the parking lot, and then the coroner. The teenager had been being molested by staff for years. It had been reported a multitude of times, instead this county did nothing and allowed this poor little boys mental health to decline to the extend of needing to end his life in front of his three young brothers. Every board of supervisor knows exactly who is writing this public comment. I anticipate this not even being public because that's the amount of transparency we have in this county. You're public servants working for the people. I have a copy of every single one of your oaths of office and surety bonds. It appears you have all violated your oaths to the United States Constitution . No one needs "employee wellness through arts day". We need change, accountability, oversight, and work from those serving us. our families and children deserve it. freewrigley.org.
