Agenda #	Relate To	Position	Name	Comments
85-C.		Favor	GENEVIEVE M Clavreul	
		Oppose	Lola M Jackson	
			Monisha Parker	How to upgrade to the technology on using the Parking Enforcement Services in Los Angeles County? 1. Contact the Parking Enforcement Services department in Los Angeles County to inquire about the latest technology and equipment available for upgrading your parking enforcement system. 2. Research and compare different technology options such as digital ticketing systems, mobile apps for parking enforcement officers, and automated license plate recognition systems. 3. Consider factors such as cost, efficiency, accuracy, and user-friendliness when selecting a technology upgrade for your parking enforcement services. 4. Work with the Parking Enforcement Services department to implement the chosen technology upgrade, including training staff on how to use the new equipment and systems effectively. 5. Monitor and evaluate the performance of the upgraded technology to ensure it is meeting the needs of your parking enforcement operations and make any necessary adjustments or enhancements as needed.
			Yoanna Acosta	The parking enforcement should stay in the sheriff's department!!
		Other	Stan Frankel	Wow. That is a lot of metrics. Will anyone actually understand them let alone audit them to make sure they are being properly gathered? For instance, what does the number of appeals really mean? Wouldn't it be better to know if the fine is actually paid or if it is just being ignored by the person being cited? And how will "safety improvements" be measured? That one seems very subjective.

support@omnipark.com or [888-991-7275](tel:888-991-7275).

MANUAL ENFORCEMENT

Handheld

Mobile devices can be used by on-site attendants to scan license plates or manually denote the presence of tickets, hang tags, or stickers.

MANUAL ENFORCEMENT

Mobile License Plate Recognition (LPR)

Relies on a vehicle equipped with cameras that will drive around a lot and scan license plates.
