			Yadi -	SUPPORT LA County development of AI policy framework. It should definitely include input from various stakeholders, and work towards prevention of harm against marginalized communities and employees subject to AI. This policy should also consider instances of where AI should outright be banned, such as the use of facial recognition which has been shown time and time again to be biased and in cases of law enforcement use can lead the arrest of an innocent person and upending their life. As part of this initiative, state AI policy should also be tracked and weighed in, such as the current following legislation: AB 2013, AB 2355, *AB 2930, SB 942, SB 1047. I also urge the BOS to oppose SB 1047 which attempts to regulate facial recognition use by law enforcement but is woefully inadequate in redressing potential harms and can very negatively impact people wrongly accused of a crime.
